With respect to the United States Information Agency, the conference report authorizes the appropriation of $960 million for fiscal year 1990 and $1,050,313,000 for fiscal year 1991. The conference report also provides for (a) the enhancement of dissemination of information regarding U.S. policies and programs to combat drug trafficking; (b) necessary authorities for USIA television satellite system; (c) increased support for educational and cultural exchanges and other citizens exchanges; (d) the establishment of Television Marti; and (e) proper funding of VOA/Europe.

These funding levels are adequate to do a very important job overseas. Over the last decade this agency has developed into a very resourceful formulator of U.S. public diplomacy. While the conference report specifically authorizes funds for Academic programs, International Visitors and Humphrey exchanges, and the Arts America program, it provides authorization for a number of equally important exchange programs, the funds for which were included in the salaries and expenses account of the Bureau for Educational and Cultural Affairs. In addition, USIA has been expanding its capabilities in such areas television with USIA/TV and radio with VOA/Europe. These are examples of creative approaches to increasingly difficult challenges created by the sophistication of an increasingly information-rich audience with whom we must communicate clearly and quickly as well as over the longer haul. This is especially true in Europe where events are moving rapidly and so many U.S. interest are stake, both private and government. The situation in Central Europe further dramatizes the need for VOA/Europe programs and its expression of U.S. views in this fluid environment.

TITLE III

Title III authorizes $379,675,000 for fiscal year 1990 and $223,043,000 for fiscal year 1991 for the Board for International Broadcasting. These funds will ensure that Radio Free Europe/Radio Liberty will maintain its current level of operations which has been so effective and responsive to the needs of the peoples of Eastern Europe and the Soviet Union in these difficult and challenging times. In addition, in fiscal year 1990, the conference report provides $183,500,000 for the construction of a new transmitter in Israel for Radio Free Europe/Radio Liberty and the Voice of America.

TITLE IV

The conference report contains a number of provisions dealing with U.S. participation in international organizations, including provisions: (a) relating to reforms in the budget decisionmaking process of the United Nations and its affiliated agencies; (b) prohibiting funding of U.N. agencies if the PLO has been granted member state status (c) requiring reports on voting practices at the United Nations and provides for funding of the Commission on Improving the Effectiveness of the United Nations; and (d) authorizing U.S. membership in new environmental and wildlife organizations.

MISCELLANEOUS PROVISIONS

Title V and VI provide $13,900,000 for fiscal year 1990 and $18,000,000 for fiscal year 1991 for the Asia Foundation; and $16,932,000 for fiscal year 1990 and $25,000,000 for fiscal year 1991 for the Inter-American Foundation.

Title VIII adopts the PLO Commitments Compliance Act of 1989.

Title IX contains provisions dealing with sanctions against the People's Republic of China.

Title X contains miscellaneous provisions dealing with: (a) increased rewards for information regarding acts of international terrorism and narcotics trafficking; (b) assignment of commercial officers to the U.S. Mission to the European Community; (c) Buy-American requirements; (d) the establishment of an Association of Democratic Nations; (e) human rights abuses in Cuba; (f) U.S.-Soviet boundary agreements; and (g) establishment of a Latin American and Caribbean database.

Mr. Speaker, I yield such time as he may consume to the distinguished gentleman from California [Mr. DYMALLY].

Mr. DYMALLY. Mr. Speaker, this conference report represents the best this House has to offer in the area of compromise and bipartisanship. I want to take this opportunity to express my thanks to the gentleman from Florida [Mr. FASCELL], the chairman of the full committee, for his leadership, his determination, and his patience; to the gentlewoman from Maine [Ms. SNOWE] for her cooperation during the

last 9 months; and to the gentleman from Michigan [Mr. BROOMFIELD] for his support in the passage of the original H.R. 1487, and subsequently the conference report.

Mr. Speaker, I am very pleased that I have this opportunity to work with such outstanding Members of the House.

Mr. Speaker, I cannot tell you how pleased I am to stand in support of H.R. 1487, the State Department authorization bill. As chairman of the Subcommittee on International Operations, I share the sense of accomplishment which I am sure is felt by every member of the subcommittee and the Foreign Affairs Committee who labored long and hard on this legislation. We began this process in early March and, with your help, it was passed by the House in mid-April. This bill has survived very intense conference activity, and is before us today in a manner that is very much what the House with your overwhelming support wanted.

I am very grateful for the efforts, leadership, and cooperation of Chairman FASCELL, the full committee, Congresswoman SNOWE, and all of the Members on both sides of the aisle in the U.S. House of Representatives who labored so arduously and supported this bill.

I am in complete support of the conference agreement. I wish to call to your attention a few sections that are in keeping with our democratic strides toward equality and broad based representative involvement and participation of all in American institutions.

This conference agreement includes: $7.3 million for the 1992 Seville Expo. A pilot program designed to increase participation by economically and socially disadvantaged enterprises in foreign relations activities. The establishment of a Foreign Service internship program for groups that are currently underrepresented in the ranks of the Foreign Service. Sense of Congress that the Humphrey Fellowship Program should be reviewed with an eye toward broadening the placement of fellows in Washington, DC. A provision enabling the participation of minority contractors in the construction of a transmitter facility in Israel.

This is a good conference report. It will enable the Department of State to continue to act in the interest of the United States in its conduct of foreign relations, and will greatly facilitate the achievement of our foreign policy objectives.

Mr. FASCELL. Mr. Speaker, I yield such time as he may consume to the gentleman from Hawaii [Mr. AKAKA].

Mr. AKAKA. Mr. Speaker, I rise in support of the conference report on H.R. 1487, the Foreign Relations Authorization Act for fiscal years 1990–91. I am particularly gratified by the increased authorization granted the Center for Cultural and Technical Interchange Between East and West in Honolulu. I thank the committee for its continued support of the East-West Center, especially the chairman of the committee, Mr. FASCELL, and the chairman of the Subcommittee on International Operations, Mr. DYMALLY.

For 29 years, the center has distinguished itself as an educational institution uniquely qualified to conduct research, offer training, facilitate intercultural exchange, and monitor social, economic, and cultural developments in the region. Our Nation's success in penetrating both legal and cultural barriers is dependent upon our ability to comprehend the economic and cultural diversity which characterizes the Asian-Pacific region. Impressive research achievements, internationally recognized professional abilities, and a network of over 25,000 alumni and participants have earned the center the trust and confidence of government officials and academics necessary to address the major issues arising in the region.

I am confident that the East-West Center is poised to play a leading role in our national effort to focus and prosper during the coming Pacific century. The rapid economic expansion and opportunity in the Asian-Pacific region, and America's current limited capacity to respond to these developments, emphasize the need for a deeper knowledge and understanding of Asia and the Pacific. Likewise, an identical need exists in Asia and the Pacific for a multidimensional understanding of the United States.

The center, a nonprofit educational corporation, receives its primary funding from an annual congressional appropriation. This amount has remained constant for the past 4 years. Although the center has been successful in absorbing additional costs, a retrenchment of current programs would have occurred without the program enhancements authorized in H.R. 1487. This renewed support allows the center to implement its strategic plan for the 1990's and is essential to our commitment to secure close relations of mutual benefit between the United States and the nations of Asia and the Pacific.

I thank the chairman for this time, and urge my colleagues to support the conference report.

Mr. FASCELL. Mr. Speaker, I yield such time as he may consume to the distinguished acting chairman of the Committee on the Judiciary, the gentleman from Wisconsin [Mr. KASTENMEIER].

Mr. BERMAN. Mr. Speaker, will the gentleman yield?

Mr. KASTENMEIER. I yield to the gentleman from California.

Mr. BERMAN. Mr. Speaker, I would like to engage in a colloquy with the acting chairman of the Committee on the Judiciary with respect to an amendment within the jurisdiction of the Committee on the Judiciary that is in this bill.

It is my understanding that the conference substitute repeals the sunset provision in section 901 of the Foreign Relations Authorization Act, fiscal years 1988 and 1989, thus making the prohibition of ideologically motivated visa denials a permanent feature of the law. Is that your understanding?

Mr. KASTENMEIER. Yes, it is.

Mr. BERMAN. When originally enacted, the conference report explained the need for the new provision, noting that under the prior law, visa applicants were "forced to undergo the indignity of answering embarrassing questions about their political or personal activities, or since the enactment of the 'McGovern amendment' in 1977, required to submit to a lengthy bureaucratic process in order to obtain a waiver to enter the United States." The conference committee added that, "as a result of this history of visa denial, the citizens of the United States have been denied the opportunity to have access to the full spectrum of international opinion, and the reputation of the United States as an open society, tolerant of divergent ideas, has suffered." Is it your understanding that the purpose of this amendment is to reaffirm the intent of Congress when the law was originally enacted?

Mr. KASTENMEIER. Yes, that is my understanding.

Mr. BERMAN. Then, is it also your understanding that section 901, as amended, is not a waiver provision, but is a permanent substantive limitation on the executive's authority to exclude nonimmigrant aliens?

Mr. KASTENMEIER. That is correct. This limitation supersedes the relevant portions of the Immigration and Nationality Act of 1952, therefore, there is no longer any justification for asking intrusive questions of prospective foreign visitors regarding "any past, current, or expected beliefs, statements or associations, which, if engaged in by a United States citizen in the United States, would be protected under the Constitution of the United States."

Mr. BERMAN. Does this mean that people should no longer be required to go through the burdensome waiver process established under the McGovern amendment?

Mr. KASTENMEIER. That is correct. Section 901, as amended, renders the waiver process superfluous.

Mr. BERMAN. Mr. Speaker, I would like to ask the chairman of the committee, the gentleman from Florida [Mr. FASCELL] if that it is his understanding of the effect of this amendment.

Mr. FASCELL. That is my understanding.

Mr. Speaker, I reserve the balance of my time.

Mr. BROOMFIELD. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I wish to commend the chairman of the Foreign Affairs Committee, Mr. FASCELL, for his hard work and determination in getting this conference report to the floor. Credit also goes to Congresswoman SNOWE and Chairman DYMALLY of the Subcommittee on International Operations for their efforts.

This bill does an excellent job of authorizing the State Department's operations. The House minority conferees from the Foreign Affairs Commit-

tee were unable to sign the conference report. The single issue which prevented our agreeing to the report several days ago was White House opposition to inclusion of a provision based on the Moynihan amendment. This issue, which could very well lead to a veto by the President, was unfortunately not fully resolved in the conference.

This is a very good bill. It would provide necessary authorization for the operations of the State Department during fiscal years 1990 and 1991. Numerous improvements have also been made in the management authorities of the Department.

Adoption of this bill is essential to ensure that the operations of the State Department can continue on a sound fiscal basis and without any disruption in funding. This is because action by the House and Senate will prevent the Department and the other agencies whose activities are authorized through this bill from receiving full fiscal year 1990 funding unless an authorization is enacted. If no authorization is enacted, the Department would lose $362 million in appropriated funds.

Unnecessary and troubling provisions affecting U.S. foreign policy and its conduct by the President have been kept to a minimum in this bill. The policy provisions that have been retained are generally acceptable and some are both useful and important. In particular, the conferees—with the cooperation of the administration—were able to agree on a comprehensive set of sanctions against the People's Republic of China in response to the suppression of human rights in China that has unfolded since last June.

It is indeed unfortunate that members of the conference were unable to work out the Moynihan amendment to the satisfaction of the administration. The President himself indicated to me and also at a press conference how strongly he feels that this provision would affect his congressional prerogatives.

The arguments advanced by the administration on the Moynihan amendment in its current form deserve serious consideration. Hopefully this provision can still be revised prior to passage of the bill.

I understand the administration and the other body are close to an agreement and we would expect that language to be added to this bill before it is sent to the President.

Mr. Speaker, I yield such time as she may consume to the gentlewoman from Maine [Ms. SNOWE].

Ms. SNOWE. Mr. Speaker, I rise in support of the conference report on the State Department authorization.

I understand that the one remaining controversial issue in this conference report, the so-called Moynihan amendment, is in the process of being resolved. This will allow all Members, as well as the administration, to support strongly this legislation.

Before describing the major provisions of this conference report, I would like to express my gratitude to the chairman and ranking Republican of the full committee, Mr. FASCELL and Mr. BROOMFIELD, as well as the chairman of the Subcommittee on International Operations, Mr. DYMALLY.

While the Democrats and Republicans have not always agreed on every issue relating to this legislation, instances of disagreement have been rare and we have tried to work them out in a spirit of cooperation. This is the third time I have served as Republican manager of the State Department authorization bill, and Republicans and Democrats have consistently worked together in bipartisan cooperation.

First and foremost, this conference report is fiscally responsible. This was a major priority of mine throughout the entire authorization process. This conference report holds the budget of the foreign affairs agencies at or below current services.

There are only two notable exceptions where authorizations exceed current services. The first is full funding for the United Nations, which was requested by both former President Reagan and President Bush. In past years the Congress has restricted funding for the United Nations until the United Nations adopted substantive reforms in its budget process.

Now that the United Nations has adopted and implemented those reforms, the United States has no obligations to provide our full contribution in accordance with our treaty obligations.

The second area is in the one time increase to construct the joint Voice of America/Board for International Broadcasting transmitter in Israel. This will allow the radios to broadcast for the first time into the fast-growing areas of Soviet Central Asia.

Overall, the conference report authorizes $4.7 billion for the budgets of the State Department, USIA, the United Nations, and Radio Free Europe and Radio Liberty. This level, only $45 million above the fiscal year 1990 appropriation, conforms to the bipartisan budget agreement, and holds to the levels contained in the Senate and House bills.

This bill contains important legislative initiatives as well. It prohibits United States negotiation with PLO members who have been involved in past terrorist acts against Americans, and imposes economic sanctions on China. The two bodies passed nearly identical China sanctions provisions, and the conference adopted the Senate version to ensure presidential support.

It also establishes the TV Marti Program to broadcast uncensored news to Cuba. Last year, during the 30th anniversary of the Communist revolution in Cuba, Castro announced, "Glasnost has no place in Cuba." To emphasize the point, Castro recently banned Soviet newspapers from Cuba, accusing them of advocating Western capitalism.

TV Marti will bring the visual impact of such events as the opening of the Berlin Wall and free elections in Hungary to the people of Cuba. It will make it more difficult for Castro to continue to swim against the tide of dramatic changes elsewhere in the Communist world.

In another important action, House conferees for the first time succeeded in eliminating virtually all of the Senate's extraneous, nongermane amendments. We took this action while defending virtually all of the provisions contained in the House bill.

In recent years, the Senate had begun weighting down this bill to such an extent as to turn it into an alternate foreign aid bill because of their unwillingness for the past 5 years to bring up their foreign aid bill for consideration. In one motion, the conference removed more than 60 extraneous Senate provisions while defending virtually all House provisions.

For all these reasons, I urge my colleagues support passage of the conference report.

□ 1800

In addition, Mr. Speaker, all but two of the House amendments were retained in this conference report as well, and I think, given the fact that the Senate had more than 60 unrelated, nongermane issues to this legislation, we were able to extract those amendment in the conference report.

So, I am pleased that we are able to reach this point with this legislation because I think it represents the will of this House and all of the Members.

Mr. BROOMFIELD. Mr. Speaker, I yield 2 minutes to the gentleman from New York [Mr. GILMAN], a member of the committee.

Mr. GILMAN. Mr. Speaker, I rise to express support for the Department of State conference report, and I commend our distinguished chairman, the gentlemen from Florida [Mr. FASCELL] and our ranking minority member, the gentleman from Michigan [Mr. BROOMFIELD] also all of our good colleagues on the Foreign Affairs Committee for their outstanding efforts.

The State Department authorization bill for the next 2 fiscal years is, in general, a sound measure. It does, however, have several troubling provisions which can have a profoundly negative impact on the conduct of U.S. foreign policy. I am referring to the Moynihan amendment which not only restricts the first amendment rights of certain executive branch officials, but

fails to adequately define the activities that they are prescribed from participating in.

Despite the problems we have with the Moynihan amendment, this bill is necessary to ensure that the operations of the State Department continue with appropriate funding. In addition, we are pleased that the conferees were able to agree on a serious of sanctions against the People's Republic of China in response to the Tienanmen Square debacle.

Mr. Speaker, it is unfortunate that we could not have taken just a little more time to resolve the more controversial aspects of the bill, nevertheless I join my colleagues in urging its adoption.

Mr. Speaker, I yield back the balance of my time.

Mr. BROOMFIELD. Mr. Speaker, I yield 1 minute to the gentleman from Ohio [Mr. KASICH].

Mr. KASICH. Mr. Speaker, I just want to take a moment to thank the gentleman from Michigan [Mr. BROOMFIELD] along with the gentleman from Florida [Mr. FASCELL] and the rest of the staff for allowing me to have those two amendments that I have been pursuing for a long time included in the bill.

Mr. Speaker, one is debt collection for people who travel overseas and have big vouchers and do not file them, and I thank the gentleman for hanging in there for me on that, and second is the representational housing issue which will save at least $7,000 a unit, and I am just very, very pleased about it.

Again I want to thank the gentleman from Michigan [Mr. BROOMFIELD], the chairman, and the staff for being of great assistance.

Mr. BROOMFIELD. Mr. Speaker, I yield 2 minutes to the gentleman from New York [Mr. SOLOMON].

Mr. SOLOMON. Mr. Speaker, and my colleagues, at the appropriate time I was going to offer a motion to recommit this report to the conference committee with instructions to strike the so-called Moynihan language because that language, even in the modified form, really strips the President of the United States of his constituted authority to conduct foreign policy in the White House. I am not going to do that today to save the time of the House, but I would, and the gentleman from Michigan [Mr. BROOMFIELD], the good ranking member, has already alluded to the fact that we are on the verge of working out a compromise language under the bill.

Mr. Speaker, I just wonder if the gentleman from Florida [Mr. FASCELL], the chairman of the committee, could just tell me where we stand on the Moynihan language. In other words, are we close to a compromise?

Mr. FASCELL. Mr. Speaker, will the gentleman yield?

Mr. SOLOMON. I yield to the gentleman from Florida.

Mr. FASCELL. Mr. Speaker, the last report I got is that we are very, very close, and hopefully they can reach that agreement. They are working on it on the other side, and, if they do that, it will be very easy for them to add it to the conference, bring it back, and we will agree on it and send it on its way.

Mr. SOLOMON. So, Mr. Speaker, the gentleman from Florida [Mr. FASCELL] and the gentleman from Michigan [Mr. BROOMFIELD], the ranking member, would both be in agreement to supporting that language?

Mr. FASCELL. Mr. Speaker, if the gentleman will yield, if the agreement is reached, absolutely.

Mr. SOLOMON. Mr. Speaker, I want to praise the two gentlemen, and I would not offer the motion to recommit.

Mr. Speaker, at the appropriate time I was going to offer a motion to recommit the report to the conference committee with instructions to strike the Moynihan provision.

The Moynihan amendment, even in the modified form contained in the conference report, goes far beyond the legitimate interests of Congress. It not only affects situations in which U.S. foreign assistance is used to influence foreign countries, it also seeks to intrude on the ability of the President to conduct foreign policy on behalf of the United States.

I fully agree that Congress has an interest in the use of the funds that it authorizes and appropriates for foreign assistance. These funds should be used for the purpose appropriated, and not be diverted to prohibited purposes or used as a quid pro quo to get a foreign government to perform some action.

Congress has adopted valid limitations on the use of appropriated funds for this reason. In 1985, for example, Congress enacted the so-called Pell amendment which prohibits—

* * * any arrangement conditioning, expressly or impliedly, the provision of assistance * * * upon the provision of assistance by a recipient to persons or groups engaging in an insurgency * * * against the Government of Nicaragua.

This provision remains in effect. Earlier this year the administration agreed to a further provision in the foreign assistance bill passed by the House which would further clarify its provisions.

When Congress enacted the Pell language, it was recognized, however, that the powers of Congress did not extend to pure diplomacy which does not involve the use of U.S. assistance. The explanatory statement of the conferees which I helped write as a conferee specifically stated:

This section does not prohibit U.S. Government officials from discussing U.S. policy in Central America with recipients of U.S. assistance or purchasers of U.S. military equipment. Nor does it prohibit recipients of U.S. assistance from furnishing assistance to any third party on their own volition and from their own resources.

Unfortunately, with the Moynihan provision—even in the modified form adopted by the Conferees—we have gone far beyond these principles. Not only would the provision prohibit executive branch officials from using U.S. assistance to influence foreign governments to undertake prohibited activities. It would also attempt to prohibit them from performing certain activities to influence foreign governments even without using U.S. assistance as leverage.

The Moynihan amendment would also impede the conduct of foreign policy by creating criminal penalties. And it would require the President to notify Congress whenever an executive branch official "advocates, promotes or encourages" a foreign government to provide prohibited assistance—one again even when U.S. assistance is not used as a quid pro quo.

Not only do these provisions intrude on the ability of the President and his representatives to conduct foreign policy. They would also have a chilling effect on diplomacy through the creation of criminal penalties. And they could also infringe on the first amendment rights of executive branch officials in discussions with third parties.

Mr. Speaker, this conference report will be vetoed unless the Moynihan language is changed. I hope that can be done before this bill goes to the President for his signature.

Mr. MARKEY. Mr. Speaker, I rise in support of the conference report on the State Department authorization bill.

With the passage of the China sanctions contained in this conference report we take a major step toward restoring some credibility to our Nation's nuclear nonproliferation policy.

We know that the same Chinese officials who signed the 1985 United States-China Nuclear Cooperation Agreement were behind the brutal crackdown in Tiananmen Square. Leaders who do this kind of thing to their own people can't be trusted to safeguard sensitive nuclear technologies, and this legislation puts China on notice that it will have to clean up its act on nuclear nonproliferation if it wants access to United States nuclear energy technologies.

Mr. Speaker, earlier this year I joined with my distinguished Republican colleague, Mr. SOLOMON, in pressing for the inclusion of nuclear cooperation sanctions in the China package. I am pleased that the conference report contains the same nuclear energy cooperation sanctions language we worked out with the chairman of the Asia Subcommittee, and the chairman of the full committee. These nuclear cooperation sanctions will affect:

Direct exports of nuclear powerplant components and nuclear materials. This would halt approval of at least four pending applications for export licenses with a report value of more than $50 million, including applications by the Westinghouse Corp. and the Washington State Public Power System to ship nuclear powerplant components to China and an application by the Safety Light Corp. to ship 100 grams of tritium to China for use in airport runway lighting.

These exports were already held up prior to passage of the China sanctions bill because the President had not made the nonproliferation certifications required under the 1985 congressional resolution approving United States-China nuclear cooperation. The legisla-

29-059 O-90-39 (Pt. 20)

tion Congress adopted today adds additional legal hurdles which must be crossed before these exports could go forward.

Exports of other nuclear technologies or services. This would affect two pending applications for export licensees, one which would allow transfers of control room system manufacturing technology to China and one which would allow some Chinese nuclear powerplant operators to come to the United States for training. Such exports were not restricted under the terms of the 1985 nuclear cooperation approval resolution, and as a result, the U.S. Department of Energy has authorized 38 similar exports in the last 4 years. The most recent transfer, approved in May, authorized the sale of a nuclear powerplant control room simulator for China's Guangdong Nuclear Power Station. The newly imposed sanctions legislation closes the legal loopholes that have allowed such exports to take place.

Exports of so-called dual use technologies, such as certain types of electronics equipment, chemical compounds, or metal alloys, which the Government has determined can be used in the fabrication of nuclear explosives materials or components. This would affect a wide variety of exports on the Commerce Department's nuclear referral list. Such exports also were not restricted under the 1985 resolution, and DOE has approved 1,325 exports of dual use technologies to China since that time, with a total estimated value of approximately $1.7 billion. Passage of the sanctions legislation closes the legal loopholes that have allowed such dual use technologies to be exported to China.

Just last week the press reported that China is continuing its reckless proliferation policies, selling advanced ballistic missiles technology to the highest bidder and assisting Pakistan's efforts to acquire nuclear explosives. Until that situation changes, we shouldn't be giving the Chinese access to our most sensitive nuclear technologies.

I want to commend the gentleman from New York [Mr. SOLARZ] and the gentleman from Florida [Mr. FASCELL] for the leadership they have demonstrated in pressing for passage of this sanctions legislation, and I urge my colleagues to vote in favor of the conference report.

Mr. DINGELL. Mr. Speaker, I rise to express my support for the conference report for the State Department authorization bill. While there are problems in Yugoslavia today, the United States must be careful in addressing them. Congress must act in a way that will in no way jeopardize the progress that has been made in Yugoslavia, keeping in mind the vital importance of that Nation's stability for maintaining peace in all of Europe. I commend the conferees for wisely not adding the Senate wording on the recent events in Kosovo to the report.

In August of this year, I had the opportunity to visit Yugoslavia and witness firsthand the changes taking place there. I saw a nation with an intricate balance of minorities, trying to retain control of a decentralized government and reconcile ethnic differences. Yugoslavia is a nation trying to preserve its national unity against strong ancient and equally strong national and ethnic pressures. The language in the bill, which criticized the Yugoslavian Government for discrimination against ethnic Albanians, is viewed by the Yugoslavs as strongly anti-Serbian. That language could have done considerable harm to United States-Yugoslavian relations. The Yugoslavian Government believes strongly that the measures introduced in the province of Kosovo were aimed at maintaining national unity, and securing peace, personal safety, and equality for all citizens. Given the extraordinary ethnic conflicts and pressures now present for separatism, it is hard to prove otherwise. For those who have not been there, it would be a mistake to pass judgment. The language of the Senate bill could have polarized factions in Yugoslavia, something which would have been counterproductive to United States efforts in trying to promote the political and economic reform. Instead, this objective can be best achieved in a climate of friendship, where the Yugoslavs feel a sense of American respect for the sovereignty and integrity of Yugoslavia. Fortunately, the House and Senate conferees had the wisdom to drop that language from the conference report.

I do not deny that Yugoslavia does have its share of problems, but the Yugoslavs, of all nationalities and ethnic backgrounds are working on them. The coming trial of Albanian leader Azem Vlasi will be a good indication of the willingness of the Government to deal with the demands of the Albanians in a fair manner. Officials of the Yugoslav Government told me that this matter will be dealt with in the fairest and proper manner. The Yugoslavs face a most tense and amazingly complex political, social, and economic situation. The Yugoslavian Government is dealing with six republics, two autonomous provinces, and at least seven important ethnic groups. The racial and ethnic difficulties there have to be taken into consideration. The Yugoslavs are trying to hold together a nation whose very unity is important to world peace. Remember, the Balkans, the cockpit of Europe, are where countless wars began.

The Kosovo issue is an especially sensitive issue for the Serbs in Yugoslavia as they look upon the region as the cradle of Serbian culture. It is no less a matter of concern to Albanians of Yugoslav nationality and there is much to their demand for justice. One of the greatest difficulties for the Yugoslav Government is reconciling the legitimate demands of ethnic minorities for fair representation in the Government, with the its need for retaining central control of its many diverse provinces and regions. Yugoslavs feel that a condemnation of Yugoslavia for its alleged human rights violations of Albanians would be a challenge to the sovereignty of the Yugoslavians and would be counterproductive to their honest effort to resolve serious internal differences. With ethnic tensions at an all time high, due to the trial of Azem Vlasi, adverse congressional language could have been counterproductive to the good faith efforts of the many Yugoslavs of all racial and ethnic backgrounds to resolve their problems with justice and respect for all.

As Yugoslavia attempts to resolve the current crises, Congress should continue to monitor the situation to ensure that the rights of all minorities are protected. This we should do with real sensitivity to potential deterioration of the delicate balance between the many ethnic minorities of the Yugoslavian nation and the possible jeopardy to the stability of the nation. The language in the Senate version of the State Department authorization bill would have sent a wrong signal at the wrong time to a nation struggling with massive economic problems and political unrest. As it seeks to move to a freely elected multiparty democracy, Congress must take the utmost care to do all it can to move Yugoslavia, one of the most pro-American countries in Eastern Europe, forward in that country's effort to achieve a freely elected multiparty government and a market-oriented economy.

Yugoslavia, with all its problems and challenges, is working diligently to resolve its problems, including those of Kosovo and its Albanian citizens. Our informed and sympathetic understanding and support can be of immense help to that country in achieving a goal which America and Yugoslavia share, freedom, self-determination and democracy for all.

Mr. WEISS. Mr. Speaker, I rise in support of H.R. 1487, the conference report on the State Department authorization bill. This legislation contains many important provisions and is the result of months of tireless effort by the leadership of the Foreign Affairs Committee, who are to be commended for their success in bringing this important bill forward. I am especially pleased that this legislation contains a comprehensive package of economic sanctions against the Chinese Government, whose brutal suppression of the prodemocracy movement has shocked us all.

The Beijing government is still trying to convince the international community that the Tiananmen Square massacre was a purely domestic matter. They claim that the slaughter of hundreds of unarmed demonstrators does not concern the rest of the world, and that the United States should stop interfering in the internal affairs of China.

Mr. Speaker, with this legislation, the Congress of the United States will deliver a resounding "no" to those who believe that such indiscriminate slaughter should be ignored or quietly forgotten. The massacre of hundreds of prodemocracy demonstrators in Tiananmen Square should be everyone's concern, and the United States cannot ignore such gross abuses of human rights just because they occur within the borders of a powerful and strategically important nation.

On June 6, 2 days after the Tiananmen Square massacre, I offered an amendment to send a strong signal to the Chinese Government. My amendment suspended the activities of the Overseas Private Investment Corporation in China. I believed in June—and I continue to believe today—that the brutal suppression of the prodemocracy movement makes the Beijing government ineligible for the benefits associated with OPIC coverage.

This amendment, along with a broad range of other economic sanctions against China, is included in the legislation we are considering today. These sanctions will prohibit "business as usual" between the United States and China as long as the crackdown continues.

I would especially like to commend our distinguished colleague, Mr. SOLARZ, for his lead-

ership on this issue. His efforts have helped to produce a strong package of economic sanctions which enjoy broad, bipartisan support in both Houses of Congress. With the passage of these sanctions, the U.S. response to the crackdown will finally be brought into line with the views of the American people.

Mr. FRENZEL. Mr. Speaker, according to the terms of the bipartisan budget agreement, the foreign operations budget was both a floor and ceiling. The managers for the House have done a skillful job in preserving the spending target of the BBA.

Normally, I vote for this appropriation. Our country must exercise a leadership role in the world, and to do so it must support its allies and friends, particularly those under pressure. It should also support those in emergency distress, provide bilateral aid to developing countries, and support multilateral agencies which assist developing countries in various ways.

This bill meets both spending and outlay targets, but it has a critical deficiency: It is nearly $2 billion over its loan guarantee limit.

A Senate amendment allowed recipients of foreign military sales credits to refinance their loans, thereby saving a potential 2-percent interest cost, with loans 90 percent guaranteed by the U.S. Government. That amendment brought to the House separately is subject to a budget point of order and could be eliminated from the bill if the point of order was raised.

I considered raising the point of order as I have raised others in an attempt to maintain some modest discipline over this profligate Congress. I finally determined not to do so, but instead to vote against the bill because it violated the Budget Act.

In the future it is my intention to raise all points of order that are available against Budget Act violations.

Mr. BROOMFIELD. Mr. Speaker, I yield back the balance of my time.

Mr. FASCELL. Mr. Speaker, I yield back the balance of my time and I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER pro tempore (Mr. MCDERMOTT). The question is on the conference report.

The conference report was agreed to.

A motion to reconsider was laid on the table.

ARKANSAS STATE UNIVERSITY CONFERENCE ON ALTERNATIVE TRANSPORTATION FUELS AND THE ENVIRONMENT

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. ALEXANDER. Mr. Speaker, the money we paid for foreign oil in the 10 years following the OPEC oil embargo constitutes the largest transfer of wealth since the Spanish looting of the new world.

During that time, the United States paid more than one-half trillion for imported oil. The free world as a whole spent an incredible $1.6 trillion.

A greater reliance on home grown energy sources, such as ethanol, will help us stop this monetary hemorrhage which threatens the very security and stability of our Nation.

On Monday I cohosted a conference on alternative energy and the environment at Arkansas State University in Jonesboro.

During that conference former Energy Secretary James Schlesinger said that the American society vacillates between two moods—panic and complacency—when it comes to our energy supply.

Dr. Schlesinger said that for many years it was anticipated when we reached 50 percent of our oil needs through imports alarm bells would go off, but that did not happen. U.S. oil imports have hovered around 50 percent for several years; even topping that figure on some occasions.

He warned that the energy problem is coming back and that this Nation must develop a national energy policy which includes the greatly expanded use of alternate energy sources—including ethanol made from farm products.

It is difficult to build public support for a new direction in energy policy when fuel is abundant, when the tank is full. But we cannot wait for another crisis, another embargo. We also cannot continue to transfer the wealth of this Nation to oil producing nations at the current rate.

There are hopeful signs on the horizon, however. Public demand for cleaner air—for air that can be breathed without being hazardous to the health—is enhancing public awareness of alternate fuels, for example.

As the conference at Arkansas State proved clearly—the use of alternate fuels is not only an economic issue but an environmental and Nation security issue as well.

We would all benefit from the use of alternate fuels—the farmers I represent would have expanded markets for their products and the residents of Los Angeles would have cleaner air to breathe.

Mr. Speaker, we cannot afford to wait much longer to develop and implement an energy policy which addresses these issues.

Our economy, our security, our future is at stake.

Mr. Speaker, I also attach an editorial from the Jonesboro Sun commenting on the conference as follows:

[From the Jonesboro Sun, Nov. 15, 1989]

HEATING UP?

The nation's energy crisis has been on the back burner for several years now—since the long lines disappeared at gas stations and prices came down. Finally, the issue may be heating up, and that could be good news for the nation and for the farmers of Eastern Arkansas.

James Schlesinger, former Secretary of Energy, noted at a conference here this week that "the American society varies between two moods—panic and complacency. The tendency of this country is to ignore the problem of energy," but "we must worry about energy. For many years it was anticipated when we reached 50 percent" of our oil needs through imports "alarm bells would go off." But that did not happen. U.S. oil imports have hovered around 50 percent for several years, topping that figure on some occasions.

"The energy problem is coming back," Schlesinger said. "While it has been out of mind and out of sight, it has been growing." People do not believe there is a crisis until they see gasoline prices go up, and the OPEC nations have realized this. They know," he said, "the way to deal with America is to raise prices gradually."

However, clean air issues are coming into play, and leaders are realizing that America's foreign policy options are affected by this nation depending on foreign oil.

Schlesinger says there are no easy answers to the energy crisis, but alternate fuels must play a role, and that's where Northeast Arkansas comes in. Rep. Bill Alexander has been waging a somewhat lonely crusade for years for increased use of ethanol, a totally renewable energy source that is derived from grain. Extensive use of ethanol would not only be a boon to farmers of Eastern Arkansas, but its use would also do much to solve the problems of polluted air.

Coping with the nation's energy problems may be the major initiative of the 1990s, and farmers of this area could play a major role in finding solutions.

THE PLIGHT OF THE DYNKIN FAMILY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York [Mr. LENT] is recognized for 5 minutes.

Mr. LENT. Mr. Speaker, in conjunction with the Congressional Call to Conscience Vigil for Soviet Jews, I rise to voice concern for a Jewish family living in the Soviet Union that has been separated from their loved ones for over 2 years because of the intransigence of the Soviet Government. It is my fervent hope that prompt action will be taken to ensure that the injustice that has caused the Dynkin family to be apart will be corrected.

Efim Dynkin of Leningrad has been denied permission to leave the Soviet Union because of alleged contact with "state secrets" while working at the Granit Institute of Shipbuilding. However, he has not worked at the Granit facility for 14 years and I have learned that other individuals employed there, in capacities similar to that of Mr. Dynkin, have received permission to emigrate in recent years. In light of this fact and President Gorbachev's own assessment that an individual is not considered to have knowledge of state secrets after 5, or at most, 10 years, I find it difficult to accept that Efim Dynkin should continue to be refused.

Recently, I had the opportunity to meet with Mr. Dynkin's wife, Olga, who was in the United States on a visitors visa. I was very moved by her story and her eloquent pleas on behalf of her husband. Mrs. Dynkin has since returned to Leningrad, but I will never forget her cour-

age and optimism as she spoke of the day when she, Efim, and their young son, Anton, are permitted to be reunited with their other son, Boris, and Efim's parents and sister in the United States.

Mr. Speaker, I have been privileged to have the opportunity to speak out many times in this Chamber on behalf of families and individuals who have maintained their desire to be free despite hardship, humiliation, frustration, and religiously inspired persecution. While there has been progress toward realizing the goal of free emigration, I stand here today to remind the Soviet Government that the plight of those, like Efim, Olga, and Anton Dynkin, being forced to endure an unjust separation from their loved ones will continue to be of deep concern to this institution and to the American people.

THE DATA PROTECTION ACT OF 1989

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from West Virginia [Mr. WISE] is recognized for 5 minutes.

Mr. WISE. Mr. Speaker, one of the most enduring American values is the right to privacy. From colonial times to the present, Americans have been concerned about the right to be left alone and about intrusions into their personal lives, private papers, and homes. As a direct result of the early American experience, the fourth amendment to the Constitution protects against unreasonable searches and seizures by the government. Other constitutional provisions contain protections for other privacy interests.

Today, these traditional concerns about privacy are still vital. Individuals still want to be left alone. Individuals want to be able to exercise some control over how information about ourselves is used. In the computer age, threats to privacy come not only from the Federal Government, but also from the many public and private institutions that maintain records about individuals.

Using the power of modern computers and telecommunications, many third party record keepers have developed the capacity to store detailed information about people's transactions, habits, movements, purchases, and activities. Personal information is routinely maintained by banks, insurance companies, hospitals, schools, credit bureaus, cable television operators, telephone companies, credit card issuers, department stores, catalog merchants and marketers of all types, supermarkets, and others.

In our complex modern world, privacy has evolved as a concept encompassing many disparate elements. It includes a wide range of concerns about intrusive behavior, including wiretapping, surreptitious physical surveillance, and mail interception. The concept of privacy has also been cited in connection with other concerns such as contraception and confidentiality of bank records.

As the need to protect privacy has become more pressing, some aspects of its protection have become more focused. One concept that has emerged since 1970 is data protection, which applies to the control of the collection, use, and dissemination of personal information.

Data protection is the focus of my statement and of a bill that I introduced today. The Data Protection Act of 1989 would estabish a Data Protection Board as an independent, three-member, nonregulatory Federal agency. The Board would be an institutional representative for privacy concerns that relate to the use and misuse of personal information. The Board would be a resource, a consultant, a watchdog, and a facilitator.

We need a Data Protection Board principally because there is no voice in Government that represents and articulates data protection concerns on an ongoing basis. In the balancing of interests that shape Government policies and actions, data protection needs are frequently ignored because there is no institutional spokesman to represent them. There is no existing organization that accumulates knowledge and experience in the complicated balancing of privacy interests.

We need a Data Protection Board because information privacy issues arise frequently. This year, there has been controversy over the disclosure of Social Security information by the Social Security Administration to banks and insurance companies. Recent legislation has affected the privacy protections for bank records. During the last Congress, a data protection issue arose during the confirmation hearings for Robert Bork. As a result of the disclosure of the records of Judge Bork's video rentals, the Video Privacy Protection Act was introduced and passed.

A Data Protection Board could have been helpful during discussion of all of these issues. A Data Protection Board could help Government and industry do a better job of protecting personal information. A Data Protection Board could, with the cooperation of business, support voluntary data protection codes. A Data Protection Board could help Congress shape legislation.

The need for an independent entity with responsibility for data protection policies has long been recognized. Such an organization was originally proposed during congressional consideration of the Privacy Act of 1974. The Privacy Protection Study Commission recommended in 1977 that such an entity be established to monitor and evaluate privacy laws; to continue research; to issue interpretative rules for the Privacy Act of 1974; and to provide advice to the President, the Congress, and the States. My proposal is a direct descendent of the Privacy Commission's recommendation.

Most other Western industrialized nations have already established national and state data protection agencies. Canada established a privacy commissioner in 1978. Great Britain established a data protection registrar in 1984. The Federal Republic of Germany (1977), Austria (1978). France (1978), Sweden (1973), Norway (1978), The Netherlands (1988), Australia (1988), and Ireland (1988) also have permanent data protection agencies. I have even read recently that data protection is under consideration in Eastern Europe as well. It appears that Hungary is considering establishing a data protection office. Many other countries have passed data protection legislation in recent years.

Data protection agencies have been established elsewhere in the world because people everywhere are concerned about how their personal information is being used. These concerns have affected the way that American companies doing business abroad conduct their operations. The lack of a central data protection authority here has left American industry unrepresented when decisions are made about how multinational companies can use data for transborder purposes.

At the very least, we need an American Federal agency to represent American interests in ongoing consultations with other national data protection agencies. For example, there is no official American representative at the annual meetings of Data Protection Commissioners.

While privacy protection has been an issue of continuing concern to the American people, the Federal response has been erratic. Interest was high after passage of the Privacy Act of 1974 and following the report of the Privacy Protection Study Commission in 1977. Interest in the executive branch disappeared during the Reagan administration, but some legislation emerged from the Congress, including the Cable Communications Policy Act of 1984, the Electronic Communications Privacy Act of 1986, the Computer Matching and Privacy Protection Act of 1988, and the Video Privacy Protection Act of 1988.

I believe that the time has come to take a step beyond the responsive legislation of the last few years. We need to look to the future. We need to learn how to identify problems presented by new technology and new business methods before it is too late to react. We need to work together with recordkeepers and with record subjects to find ways to protect legitimate data protection concerns while allowing Government and industry to function.

The passage of the Data Protection Act of 1989 would serve all of these purposes. I expect to schedule hearings on the legislation later this year or at the beginning of the second session. I welcome comments from all interested persons.

VACATE OF SPECIAL ORDER

Mr. DORNAN of California. Mr. Speaker, I ask unanimous consent to vacate my special order of 60 minutes tonight.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

WELCOME TO A POLISH HERO

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. DORNAN] is recognized for 5 minutes.

Mr. DORNAN of California. Mr. Speaker, since I was first sworn in as a Member of this august body on January 4 of 1977, I have had the distinct privilege of standing or sitting in this Chamber while many of the heads of states around the world have addressed us. The stirring remarks of

Margaret Thatcher made a great impression upon me because of the quality of her leadership. We have had some people come before us, like the leader of the state of Egypt, Anwar Sadat, and because of the quality of his leadership, the change in direction he took to sign that historic Camp David treaty with the State of Israel, it cost him his life in a brutal assassination attempt.

□ 1710

Several of the leaders have gone on to their eternal reward who spoke to us. No words were more stirring than the words of Cory Aquino, the lady President of the Philippines, a housewife who has gone on to become a great world leader. Her remarks will be memorable.

I think as a young man watching through the magic of television the stirring remarks of Gen. Douglas MacArthur at that podium, Winston Churchill in his goodbye performance here, he is the only human being as the head of state who has ever addressed a joint session of the Senate and the House of Representatives three times.

We have only had three people who were not heads of state. One of them was Lafayette, one of only two portraits in this Chamber, the other the father of our country, our first President, George Washington; but the third nonhead of state was this morning at 11 o'clock, Lech Walesa, the founder of Solidarity, the great unelected but truly a national leader of the country of Poland.

His words today were simple, beautiful, and stirring in their simplicity. He thanked the President of the United States twice for his trips to Poland to give the people there hope and to embolden their spirits.

He spoke of his fellow Pole, another world leader, Pope John Paul II, and talked about how John Paul said that freedom is something that is an inalienable right, that you cannot take it away from men forever.

There was one other head of state that I think Mr. Walesa should have mentioned. I know he feels this way in his heart, and that is the former President of the United States, the most recent President, Ronald Reagan. It was Ronald Reagan who had the recently defected Ambassador to Poland, Ambassador Romuald Spasowski, light the Christmas tree in the President's first year in the White House, the Christmas of 1981. It was Ronald Reagan who sent his great Vice President, George Bush, to speak at the shipyards at Gdansk at that memorial outside the shipyards for the fallen workers. It was President Reagan who sent his Vice President, George Bush, back to Poland again to meet with Lech Walesa during that critical period 2 years ago, to kneel with his beautiful wife, Barbara, at the tomb of the open grave site of the martyred, the tortured to death by Polish Communist secret police, the priest, Father Jerzy Popieluszko.

I think President Reagan for all of his years kept up that vigil that this Congress by narrowing and narrowing votes because of liberal pressure kept alive Captive Nation Week for all these years.

Mr. Speaker, a year ago in August I drove with my youngest son all around Poland for 3 days, 1,300 miles in a rental car, visiting all six, six of six of the Nazi extermination camps, from Treblinka to Sobibor, to Maydanek, to Belzec, to the horror of horrors, Aushwitz and its massive companion camp, Birkenau, and then up to a mass at Wschowa, an outside mass with 15,000 people, then at midnight to the final extermination camps in this clockwise swing through Poland to Chelmo.

That state, as Lech Walesa told us so emotionally today, has suffered more than any of our allied nations in the struggle against fascism, only to be crushed by the equally evil force of communism.

Mr. Speaker, this was a stirring moment today. I will never forget it. I think it was worth a year in school to not only our young pages, but to the oldest of our Members who sit in this Chamber. It was a lesson for the Joint Chiefs, to the Supreme Court, to all our distinguished Ambassadors who visit with us at these joint sessions to hear from these world leaders.

Mr. Speaker, I hope that this country someday will consider making Lech Walesa an honorary citizen of the United States, as we have done with Rauol Wallenberg, who the Russians still claim that they have killed, and with Mr. Winston Churchill.

PERMISSION FOR COMMITTEE ON RULES TO FILE PRIVILEGED REPORT ON H.R. 3660, THE GOVERNMENT ETHICS REFORM ACT OF 1989

Ms. SLAUGHTER of New York. Mr. Speaker, I ask unanimous consent that the Committee on Rules have until midnight, tonight, to file a privileged report on H.R. 3660, the Government Ethics Reform Act of 1989.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from New York?

There was no objection.

A NEW BEGINNING FOR POLAND

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois [Mr. ANNUNZIO] is recognized for 5 minutes.

Mr. ANNUNZIO. Mr. Speaker, I am proud today to welcome Lech Walesa to the United States. It is indeed a stirring moment in the history of the Congress to receive in this Chamber, the chairman of Solidarnosc, Lech Walesa, for he is the first private citizen in 165 years to address the Congress in a joint session.

To mark this special day, the Architect of the Capitol, on my request, is flying an American flag over our Capitol Building which will be presented by me to Mr. Walesa as a remembrance of a truly great day in Poland's long and distinguished history.

We have witnessed remarkable changes in Poland since the birth of Solidarity when Mr. Walesa bravely led a walkout at the Lenin Shipyard in Gdansk in August 1980. By his actions and leadership, Lech Walesa has proven that peaceful, nonviolent means can work in achieving noble humanitarian goals. He has rekindled and revitalized Polish nationalism in the hearts of millions, and he remains an inspiring symbol for all individuals striving to free themselves from the yoke of tyranny and oppression. Today the events taking place throughout Eastern Europe are a testimonial to the strength of Lech Walesa's vision and to the justness of Poland's cause.

We in Congress remain committed to assist Poland as she embarks on her journey to restructure her political and economic system. As chairman of the House Administration Committee I expedited speedy congressional passage of legislation to provide for a team from the House and Senate with expertise in legislative systems management and parliamentary procedure to assess Poland's equipment and training needs in creating a new Parliament. Furthermore, as chairman of the Subcommittee on Financial Institutions of the House Banking Committee, I have supported legislation to encourage multilateral development banks to offer financial and technical assistance to the people of Poland who want to establish institutions, like credit unions, thrifts, and commercial banks. In addition, the aid package crafted by Congress will provide millions of dollars in assistance as Poles continue in their struggle to achieve democratic reforms.

It is fitting that Mr. Walesa is visiting the United States this week, since 71 years ago, on November 11, 1918, with the signing of the Treaty of Versailles at the conclusion of World War I, the Polish people proudly proclaimed their independence, and today we are witnessing the rebirth of this declaration of self-determination.

One of the first democratic constitutions known to the world was the Polish Constitution written in the 18th century. Unfortunately, shortly after the creation of this historic document, the Polish people saw their beloved country invaded by three more powerful and hostile neighbors. These nations subjugated and brutalized Poland until 1918. With the end of World War I, however, the major European powers recognized the national sovereignty of Poland, and the Polish people were once again able to assert their national destiny without the fear of persecution. Then in 1939, at the beginning of World War II, Poland again faced persecution and oppression, this time at the hands of the Nazis and the Communists, but her determination to prevail never wavered.

Despite the heartaches and disappointments of the past, today, 71 years after the declaration of Polish independence and 50 years after the invasion of Poland by the Nazis and the Communists, Poland stands on the threshold of a new beginning. An effective parliamentary system is in place, with the Solidarity Union joining two smaller political parties to form a majority in the Parliament, and with the election of a non-Communist, Tadeuzs Mazowiecki, as Prime Minister.

Mr. Speaker, Lech Walesa's visit to Congress today has helped define the enormous challenges his country now faces to achieve institutional reforms and revitalize the Polish economy. We are honored with the presence of Lech Walesa in the Congress and we stand ready to provide the economic and technical assistance necessary to enable Poland to join the community of free nations and to enjoy the fruits of freedom.

On the occasion of Lech Walesa's historic visit to America, which coincides with the 71st anniversary of Polish Independence Day, I am honored to join with Polish-Americans in the 11th Congressional District of Illinois which I am priviliged to represent, and Americans of Polish descent throughout the United States, in hopes and prayers for the successful dawn of a new age for a free and democratic Poland.

DEPARTMENT OF VETERANS AFFAIRS HAS INTEGRAL ROLE IN AIDS RESEARCH

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Mississippi [Mr. MONTGOMERY] is recognized for 5 minutes.

Mr. MONTGOMERY. Mr. Speaker, I dare say that the average American has little idea of the role the Department of Veterans Affairs [DVA] plays in improving the quality of life for all mankind—veterans and nonveterans alike.

Consider for instance, the medical breakthroughs and advancement of medical knowledge that can, in whole or part, be attributed to DVA scientists and researchers—the cure for tuberculosis; the development of the CAT scan, the pacemaker, kidney and home dialysis techniques, and prosthetic appliances; and the discovery of aspirin's effectiveness in combating heart disease. These are just a few of the achievements of a world-renowned medical research program which has claimed two Nobel Prizes.

DVA has also developed a reputation as a leader in AIDS research, probably the world's most pressing medical concern. The Department is second only to the National Institutes of Health in the magnitude of AIDS-related research it conducts. In fact, the Department's health care delivery system now treats almost 10 percent of the Nation's AIDS patients.

Working in tandem with 103 medical schools across the country, the Department monitors its AIDS-related activities through its central office here in Washington, which serves as a clearinghouse for information on the disease.

Six AIDS research centers initiate and coordinate individual AIDS research projects. The centers are located at DVA medical centers in Baltimore, Durham, Houston, Manhattan, San Diego, and San Francisco. Some 20 individual projects and several cooperative studies are underway in the Department. They range from basic science studies of the mechanism of AIDS virus infection through clinical trials in the treatment of AIDS patients.

On another front in the Department's battle against AIDS, four AIDS clinical units for veterans being treated for the disease are operating at DVA medical centers in Manhattan, Miami, Los Angeles, and San Francisco. These special clinical units are located at hospitals with high concentrations of cases and are designed to help refine treatment techniques which can then be shared with the medical community in general.

Mr. Speaker, the cure for AIDS could very possibly come from the Department of Veterans Affairs medical research program.

I would like to share with my colleagues a recent letter to the Atlanta Constitution from Dr. Robert J. Pollet, Chief of Research and Development at the Atlanta DVA Medical Center. His letter summarizes the magnificent DVA-funded research being conducted at just one hospital in the 172-hospital network operated by the Department of Veterans Affairs. Dr. Pollet also points out a problem experienced by DVA researchers nationwide—when there is media coverage of a research triumph, DVA involvement is often overlooked or ignored.

[From the Atlanta Constitution, Nov. 4, 1989]

VA MEDICAL CENTER DOES IMPORTANT RESEARCH WORK

Once again The Constitution's staff has come to the Atlanta Veterans Affairs (VA) Medical Center, interviewed a VA research investigator, published photographs of his VA laboratory and reported on clinically important BA research work supported by VA funds—all without appropriate acknowledgement.

These errors were made in the recent Science/Medicine article reporting the studies of Dr. Raymond Schinazi of the VA Medical Center concerning the discovery of the antiviral properties of AZDU toward the AIDS virus, in collaboration with Dr. David Chu of the University of Georgia.

It is disappointing that you would fail to acknowledge that Dr. Schinazi made this discovery as a full-time VA scientist, largely supported by VA research funds in work performed at the Atlanta VA Medical Center.

The newspaper also failed to acknowledge that the VA, in an act of exceptional generosity and compassion for AIDS patients, voluntarily donated its ownership of the drug rights to AZDU in order to ensure that the drug would be most rapidly developed as a promising treatment for AIDS.

The Atlanta VA Medical Center has a very active research program in broad areas of medical and rehabilitation research, with VA funding of more than $3 million per year.

The Atlanta VA research program cooperatively interacts with that of its affiliated medical institution, the Emory University School of Medicine, leading to excellence in biomedical research and clinical care, to the ultimate benefit of both patients and the community.

Dr. ROBERT J. POLLET,
Chief, Research and Development,
Atlanta VA Medical Center, Decatur.

U.S.-U.S.S.R. TRADE POTENTIALS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. STARK] is recognized for 5 minutes.

Mr. STARK. Mr. Speaker, with the Soviet Union now providing more freedom of emigration than the West actually seems willing to accept, and with the possible Soviet codification of rules of departure, the Congress may soon be asked to consider the normalization of trade relations with the Soviet Union. Normalization would mean a waiver of the Jackson-Vanik amendment so as to provide most-favored-nation tariff status, as well as amendment to various limits on export credits.

If trade with the Soviets were normalized, what would it mean in terms of economic change?

A look at past trade data shows that U.S.-U.S.S.R. trade has been a very minor part of our trade picture, but that it has also been one of the few areas where the United States has usually run a strong, job-creating trade surplus.

The potential for increased U.S.-U.S.S.R. trade can be seen by looking at some of the data on total U.S.S.R.-Western trade. Since our peak trade turnover with the U.S.S.R. in 1979 of $4.5 billion—which still only amounted to 1 percent of total U.S. trade and consisted of mostly agricultural commodities—and a trade surplus of $2.7 billion, U.S.-U.S.S.R. trade has declined and been erratic. Since 1987, however, bilateral trade has substantially increased. United States exports to the Soviet Union of grain as well as fertilizers, tractors and engineering equipment grew and imports of gold and nonferrous scrap metal have increased.

These recent trade increases has helped reduce the United States trade deficit with non-market economies [NME's] by 23.2 percent, from $2.46 billion in 1987 to $1.89 billion in 1988. This deficit decline can be largely attributed to an increase in our surplus with the Soviet Union, from $1.06 billion in 1987 to $2.2 billion in 1988. 1989 half-year export comparisons tell another positive story. The value of United States shipments to each of the three major NME trading countries or blocs—Soviet Union, China, and Eastern Europe—increased from January–June 1988 to January–June 1989. The result was a $1.6 billion expansion in total U.S. exports to the NME's over this period, from $4.5 billion to $6.1 billion. Setting the pace was $1.1 billion rise in U.S. exports to the U.S.S.R. from January–June 1988 to January–June 1989, caused largely by an increase of $951.4 million in Soviet purchases of U.S. corn.

TRADE WITH THE U.S.S.R.

[In millions of dollars]

	1979	1980–83	1984	1985	1986	1987	1988	198*
United States:								
Export	3,604	10,246.0	3,284	2,423	1,248	1,480	2,768	2,764.0
Import	872	1,422.2	554	409	558	425	578	374.5
Turnover	4,476	11,668.2	3,838	2,832	1,806	1,905	3,346	3,138.5
U.S. Trade balance (+)	2,732	7,313.8	2,730	2,014	690	1,055	2,190	2,389.5

a January-June totals from USITC.

U.S.–U.S.S.R. trade is relatively small, compared with West Germany's or Japan's trade with the Soviets. A look at the following trade data shows some of the potential of the Soviet market;

[In millions of dollars]

	1979	1980–83	1984	1985	1986	1987	1988
West Germany:							
Export	3,619	16,055	3,800	3,603	4,320	4,379	5,367
Import	4,061	17,469	5,031	4,690	4,278	4,045	3,914
Turnover	7,680	33,524	8,831	8,293	8,598	8,424	9,381
Japan:							
Export	2,443	12,764	2,515	2,772	3,178	2,587	3,131
Import	1,895	7,019	1,388	1,438	1,988	2,368	2,772
Turnover	4,338	19,783	3,903	4,210	5,166	4,955	5,903

The potential for trade between our two huge nations is significant. One way that trade is likely to increase is through the increase in joint ventures and the development of the ruble as a convertible, international currency.

Of all East-West trade in 1987, according to the Wharton School of Economics, U.S. exports equaled only 7 percent of all Western developed countries trade to the Soviet Union and only 6 percent of total imports by Western developed countries from the U.S.S.R. The Europeans and Japanese view trade with the East as economically beneficial and will most likely continue too. This stand has allowed them to dominate economic trading with the Soviets, as the Soviets look to them first when trading. In the period from 1986–90, total trade between the U.S.S.R. and nonsocialist nations is estimated to expand, with Western exports increasing from $37 to $52 billion, while imports are expected to increase from $33 to $43 billion.

U.S. exports are expected to grow moderately in 1989 to around $3 billion. Most of the growth will be in increased Soviet grain purchases, while nonagricultural exports may slightly increase from last year's $600 million. U.S. machinery exports can be expected to grow in 1989; they increased in 1988 to $250 million from $100 million the year before. The best prospects for sale by U.S. companies include the following industrial sectors: Food processing and packaging equipment, agricultural machinery, construction equipment, oil and gas equipment, chemicals, and analytical, scientific, and medical instruments. Consumer goods to the Soviet Union are likely to remain limited in 1989.

One change that is helping open up the Soviet economy was a government decree on joint ventures that greatly expanded the realm of cooperation between Western firms and Soviet ministries and enterprises. United States companies are behind their European and Japanese counterparts in setting up ventures with the Soviets. Of the nearly 800 joint ventures registered to date, less than 50 involve U.S. companies. By the end of 1988 in the absence of normal trade relations, only 13 United States-Soviet joint ventures were actually established and they involve only $23 million of the $441 million in total joint venture investments.

Mr. Speaker, this is a time of tremendous and exciting superpower change. Improved economic relations between our two nations can contribute to that change and to the overall improvement of relations. It is past time that we moved forward.

□ 1820

THE WILLIAMSBURG CHARTER

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Kansas [Mr. SLATTERY] is recognized for 5 minutes.

Mr. SLATTERY. Mr. Speaker, I rise today to share with my colleagues an important affirmation of the religious liberty clauses of the first amendment to our Constitution. The Williamsburg Charter addresses the manner in which, in our pluralistic society, we live with our deepest religious differences.

The Williamsburg Charter is an officially recognized project of the Commission of the Bicentennial of the Constitution. Beginning in 1986, it was drafted over 18 months by representatives of America's leading faith communities in conjunction with nearly 200 scholars, church-state relations experts, political activists and leaders of religious communities. On June 25, 1988, the 200th anniversary of Virginia's call for the Bill of Rights, the Charter was presented to the Nation. It has now been signed by nearly 200 national leaders, including former Presidents Ford and Carter, former Chief Justice Burger and Chief Justice Rehnquist. I am proud to have my signature on this document.

The Williamsburg Charter reflects three fundamental aims:

To celebrate the genius and uniqueness of the religious liberty clauses; to reaffirm religious liberty, or freedom of conscience, for people of all faiths and for the unchurched; to set out the place of religious liberty in American public life and the principles by which people with deep differences can contend with each other robustly, but civilly.

The Williamsburg Charter recognizes that religious differences are deep and important, but asserts that we can still maintain a limited, but vital, consensus, which is in the interests of all Americans, regardless of creed.

This vital consensus can be summarized in the three R's of religious liberty: rights, responsibilities, and respect.

Religious liberty, or freedom of conscience, is a precious, fundamental, and inalienable right; religious liberty is a universal right matched by a universal duty to respect that right for others; and living with our deepest differences requires a principled respect for persons, truth, and the guidelines by which we can conduct arguments robustly but civilly whenever those differences are in question.

We who have endorsed the Williamsburg Charter hope that reaffirmation of these first principles will bring practical benefits to our pluralistic society. The Williamsburg Charter Foundation's recently developed school curriculum on religious liberty in a pluralistic society, for example, has the support of all major educational groups and faith communities, and is being tested in schools this fall and will be introduced in schools in 1990.

We are a free and diverse people who must remain free and sustain our diversity as a source of national richness and strength. As legislators, we in Congress are custodians of the American experiment who know the depth of feeling these issues raise among our constituents.

The Williamsburg Charter calls upon us to reaffirm that religious liberty is a fundamental and inalienable right. According to the Charter:

A society is only as just and free as it is respectful of this right for its smallest minorities and least popular communities. Religious liberty is our Nation's first liberty, which undergirds all other rights and freedoms secured by the Bill of Rights. Religious liberty is founded on the inviolable dignity of the person. It is not based on science or social usefulness and it is not dependent on the shifting moves of majorities and governments.

The Charter also reminds us that:

Far from being a matter of exemption, exception, or even toleration, religious liberty is an inalienable right. Far from being a subcategory of free speech or a constitutional redundancy, religious liberty is distinct and foundational.

Far from being simply an individual right, religious liberty is a positive social good.

Far from denigrating religion as a social or political problem, the separation of church and state is both the saving of religion from the temptation of political power and an achievement inspired in large part by religion itself.

Far from weakening religion, disestablishment has, as an historical fact, enabled it to flourish.

Many of the most dynamic social movements in American history, including the struggle to bring civil rights to all of our citizens, were legitimately inspired and shaped by religious motivation. Freedom of conscience and the right to attempt to influence public policy on the basis of religiously informed ideas are inseverably linked. Politics is an extension of ethics which therefore can engage religious principles. This does not condone, however, those who bring to the public arena a misplaced absoluteness that idolizes politics, demonizes their opponents and politicizes their own faith.

The Williamsburg Charter's call for a revitalization of the American understanding concerning the role of religion in a free society, in the words of the charter, should:

Result in neither a naked public square where all religion is excluded, nor a sacred public square with any religion established or semi-established. The result, rather is a civil public square in which citizens of all religious faiths, or none, engage one another in the continuing democratic discourse.

Mr. Speaker, let me close with one more point from the Williamsburg Charter. We who have signed the Charter did so because we believe the renewal of religious liberty is crucial to sustain a free people that would remain free. We have committed ourselves to speak, write and act according to this vision and these principles. I urge my colleagues to join in this public debate.

As the Charter notes:

Pluralism must not be confused with, and is in fact endangered by, philosophical and ethical indifference. Commitment to strong, clear philosophical and ethical ideas need not imply either intolerance or opposition to democratic pluralism. On the contrary, democratic pluralism requires an agreement to be locked in public argument over disagreements of consequence within the bounds of civility.

Mr. Speaker, I am placing the text of the Williamsburg Charter in the RECORD at this point.

THE WILLIAMSBURG CHARTER—A NATIONAL CELEBRATION AND REAFFIRMATION OF THE FIRST AMENDMENT RELIGIOUS LIBERTY CLAUSES

Keenly aware of the high national purpose of commemorating the bicentennial of the United States Constitution, we who sign this Charter seek to celebrate the Constitution's greatness, and to call for a bold reaffirmation and reappraisal of its vision and guiding principles. In particular, we call for a fresh consideration of religious liberty in our time, and of the place of the First Amendment Religious Liberty clauses in our national life.

We gratefully acknowledge that the Constitution has been hailed as America's "chief export" and the "most wonderful work ever struck off at a given time by the brain and purpose of man." Today, two hundred years after its signing, the Constitution is not only the world's oldest, still-effective written constitution, but the admired pattern of ordered liberty for countless people in many lands.

In spite of its enduring and universal qualities, however, some provisions of the Constitution are now the subject of widespread controversy in the United States. One area of intense controversy concerns the First Amendment Religious Liberty clauses, whose mutually reinforcing provisions act as a double guarantee of religious liberty, one part barring the making of any law "respecting an establishment of religion" and the other barring any law "prohibiting the free exercise thereof."

The First Amendment Religious Liberty provisions epitomize the Constitution's visionary realism. They were, as James Madison said, the "true remedy" to the predicament of religious conflict they originally addressed, and they well express the responsibilities and limits of the state with respect to liberty and justice.

Our commemoration of the Constitution's bicentennial must therefore go beyond celebration to rededication. Unless this is done, an irreplaceable part of national life will be endangered, and a remarkable opportunity for the expansion of liberty will be lost.

For we judge that the present controversies over religion in public life pose both a danger and an opportunity. There is evident danger in the fact that certain forms of politically reassertive religion in parts of the world are, in principle, enemies of democratic freedom and a source of deep social antagonism. There is also evident opportunity in the growing philosophical and cultural awareness that all people live by commitments and ideals, that value-neutrality is impossible in the ordering of society, and that we are on the edge of a promising moment for a fresh assessment of pluralism and liberty. It is with an eye to both the promise and the peril that we publish this Charter and pledge ourselves to its principles.

We readily acknowledge our continuing differences. Signing this Charter implies no pretense that we believe the same things or that our differences over policy proposals, legal interpretations and philosophical groundings do not ultimately matter. The truth is not even that what unites us is deeper than what divides us, for differences over belief are the deepest and least easily negotiated of all.

The Charter sets forth a renewed national compact, in the sense of a solemn mutual agreement between parties, on how we view the place of religion in American life and how we should contend with each other's deepest differences in the public sphere. It is a call to a vision of public life that will allow conflict to lead to consensus, religious commitment to reinforce political civility. In this way, diversity is not a point of weakness but a source of strength.

I. A TIME FOR REAFFIRMATION

We believe, in the first place, that the nature of the Religious Liberty clauses must be understood before the problems surrounding them can be resolved. We therefore affirm both their cardinal assumptions and the reasons for their crucial national importance.

With regard to the assumptions of the First Amendment Religious Liberty clauses, we hold three to be chief:

1. The Inalienable Right

Nothing is more characteristic of humankind than the natural and inescapable drive toward meaning and belonging, toward making sense of life and finding community in the world. As fundamental and precious as life itself, this "will to meaning" finds expression in ultimate beliefs, whether theistic or non-theistic, transcendent or naturalistic, and these beliefs are most our own when a matter of conviction rather than coercion. They are most our own when, in the words of George Mason, the principal author of the Virginia Declaration of Rights, they are "directed only by reason and conviction, not by force or violence."

As James Madison expressed it in his Memorial and Remonstrance, "The Religion then of every man must be left to the conviction and conscience of every man; and it is the right of every man to exercise it as these may dictate. This right is in its nature an unalienable right."

Two hundred years later, despite dramatic changes in life and a marked increase of naturalistic philosophies in some parts of the world and in certain sectors of our society, this right to religious liberty based upon freedom of conscience remains fundamental and inalienable. While particular beliefs may be true or false, better or worse, the right to reach, hold, exercise them freely, or change them, is basic and non-negotiable.

Religious liberty finally depends on neither the favors of the state and its officials nor the vagaries of tyrants or majorities. Religious liberty in a democracy is a right that may not be submitted to vote and depends on the outcome of no election. A society is only as just and free as it is respectful of this right, especially toward the beliefs of its smallest minorities and least popular communities.

The right to freedom of conscience is premised not upon science, nor upon social utility, nor upon pride of species. Rather, it is premised upon the inviolable dignity of the human person. It is the foundation of, and

is integrally related to, all other rights and freedoms secured by the Constitution. This basic civil liberty is clearly acknowledged in the Declaration of Independence and is ineradicable from the long tradition of rights and liberties from which the Revolution sprang.

2. The Ever Present Danger

No threat to freedom of conscience and religious liberty has historically been greater than the coercions of both Church and State. These two institutions—the one religious, the other political—have through the centuries succumbed to the temptation of coercion in their claims over minds and souls. When these institutions and their claims have been combined, it has too often resulted in terrible violations of human liberty and dignity. They are so combined when the sword and purse of the State are in the hands of the Church, or when the State usurps the mantle of the Church so as to coerce the conscience and compel belief. These and other such confusions of religion and state authority represent the misordering of religion and government which it is the purpose of the Religious Liberty provisions to prevent.

Authorities and orthodixies have changed, kingdoms and empires have come and gone, yet as John Milton once warned, "new Presbyter is but old priest writ large." Similarly, the modern persecutor of religion is but ancient tyrant with more refined instruments of control. Moreover, many of the greatest crimes against conscience of this century have been committed, not by religious authorities, but by ideologues virulently opposed to traditional religion.

Yet whether ancient or modern, issuing from religion or ideology, the result is the same: religious and ideological orthodozies, when politically established, lead only too naturally toward what Roger Willians called a "spiritual rape" that coerces the conscience and produces "rivers of civil blood" that stain the record of human history.

Less dramatic but also lethal to freedom, and the chief menace to religious liberty today, is the expanding power of government control over personal behavior and the institutions of society, when the government acts not so much in deliberate hostility to, but in reckless disregard of, communal belief and personal conscience.

Thanks principally to the wisdom of the First Amendment, the American experience is different. But even in America where state-established orthodoxies are unlawful and the state is constitutionally limited, religious liberty can never be taken for granted. It is a rare achievement that requires constant protection.

3. The Most Nearly Perfect Solution

Knowing well that "nothing human can be perfect" (James Madison) and that the Constitution was not "a faultless work" (Gouverneur Morris), the Framers nevertheless saw the First Amendment as a "true remedy" and the most nearly perfect solution yet devised for properly ordering the relationship of religion and the state in a free society.

There have been occasions when the protections of the First Amendment have been overridden or imperfectly applied. Nonetheless, the First Amendment is a momentous decision for religious liberty, the most important political decision for religious liberty and public justice in the history of humankind. Limitation upon religious liberty is allowable only where the State has borne a heavy burden of proof that the limitation is justified—not by any ordinary public interest, but by a supreme public necessity—and that no less restrictive alternative to limitation exists.

The Religious Liberty clauses are a brilliant construct in which both No establishment and Free exercise serve the ends of religious liberty and freedom of conscience. No longer can sword, purse and sacred mantle be equated. Now, the government is barred from using religion's mantle to become a confessional State, and from allowing religion to use the government's sword and purse to become a coercing Church. In this new order, the freedom of the government from religious control and the freedom of religion from government control are a double guarantee of the protection of rights. No faith is preferred or prohibited; for where there is no state-definable orthodoxy, there can be no state-punishable heresy.

With regard to the reasons why the First Amendment Religious Liberty clauses are important for the nation today, we hold five to be preeminent:

1. The First Amendment Religious Liberty provision have both a logical and historical priority in the Bill of Rights.—They have logical priority because the security of all rights rests upon the recognition that they are neither given by the state, nor can they be taken away by the state. Such rights are inherent in the inviolability of the human person. History demonstrates that unless these rights are protected our society's slow, painful progress toward freedom would not have been possible.

2. The First Amendment Religious Liberty provisions lie close to the heart of the distinctiveness of the American experiment.—The uniqueness of the American way of disestablishment and its consequences have often been more obvious to foreign observers such as Alexis de Tocqueville and Lord James Bryce, who wrote that "Of all the differences between the Old world and the New, this is perhaps the most salient." In particular, the Religious Liberty clauses are vital to harnessing otherwise centrifugal forces such as personal liberty and social diversity, thus sustaining republican vitality while making possible a necessary measure of national concord.

3. The First Amendment Religious Liberty provisions are the democratic world's most salient alternative to the totalitarian repression of human rights and provide a corrective to unbridled natonalism and religious warfare around the world.

4. The First Amendment Religious Liberty provisions provide the United States' most distinctive answer to one of the world's most pressing questions in the late-twentieth century. They address the problem: How do we live with each other's deepest differences?—How do religious convictions and political freedom complement rather than threaten each other on a small planet in a pluralistic age? In a world in which bigotry, fanaticism, terrorism and the state control of religion are all to common responses to these questions, sustaining the justice and liberty of the American arrangement is an urgent moral task.

5. The First Amendment Religious Liberty provisions give American society a unique position in relation to both the First and Third worlds.—Highly modernized like the rest of the First World, yet not so secularized, this society—largely because of religious freedom—remains, like most of the Third World, deeply religious. This fact, which is critical for possibilities of better human understanding, has not been sufficiently appreciated in the American self-understanding, or drawn upon in American diplomacy and communication throughout the world.

In sum, as much if not more than any other single provision in the entire Constitution, the Religious Liberty provisions held the key to American distinctiveness and American destiny. Far from being settled by the interpretations of judges and historians, the last word on the First Amendment likely rests in a chapter yet to be written, documenting the unfolding drama of America. If religious liberty is neglected, all civil liberties will suffer. If it is guarded and sustained, the American experiment will be the more secure.

II. A TIME FOR REAPPRAISAL

Much of the current controversy about religion and politics neither refects the highest wisdom of the First Amendment nor serves the best interests of the disputants or the nation. We therefore call for a critical reappraisal of the course and consequences of such controversy. Four widespread errors have exacerbated the controversy needlessly.

1. The Issue Is Not Only What We Debate, But How

The debate about religion in public life is too ofter misconstrued as a clash of ideologies alone, pitting "secularists" against the "sectarians" or vice versa. Though competing and even contrary world views are involved, the controversy is not solely ideological. It also flows from a breakdown in understanding of how personal and communal beliefs should be related to public life.

The American republic depends upon the answers to two questions. By what ultimate truths ought we to live? And how should these be related to public life? The first question is personal, but has a public dimension because of the connection between beliefs and public virtue. The American answer to the first question is that the government is excluded from giving an answer. The second question, however, is thoroughly public in character, and a public answer is appropriate and necessary to the well-being of this society.

This second question was central to the idea of the First Amendment. The Religious Liberty provisions are not "articles of faith" concerned with the substance of particular doctrines or of policy issues. They are "articles of peace" concerned with the constitutional constraints and the shared prior understanding within which the American people can engage their differences in a civil manner and thus provide for both religious liberty and stable public government.

Conflicts over the relationshp between deeply held beliefs and public policy will remain a continuing feature of democratic life. They do not discredit the First Amendment, but confirm its wisdom and point to the need to distinguish the Religious Liberty clauses from the particular controversies they address. The clauses can never be divorced from the controversies they address, but should always be held distinct. In the public discussion, an open commitment to the constraints and standards of the clauses should precede and accompany debate over the controversies.

2. The Issue Is Not Sectarian, But National

The role of religion in American public life is too often devalued or dismissed in public debate, as though the American people's historically vital religious traditions

were at best a purely private matter and at worst essentially sectarian and divisive.

Such a position betrays a failure of civil respect for the convictions of others. It also underestimates the degree to which the Framers relied on the American people's religious convictions to be what Tocqueville described as "the first of their political institutions." In America, this crucial public role has been played by diverse beliefs, not so much despite disestablishment as because of disestablishment.

The Founders knew well that the republic they established represented an audacious gamble against long historical odds. This form of government depends upon ultimate beliefs, for otherwise we have no right to the rights by which it thrives, yet rejects any official formulation of them. The republic will therefore always remain an "undecided experiment" that stands or falls by the dynamism of its non-established faiths.

3. The Issue Is Larger Than the Disputants

Recent controversies over religion and public life have too often become a form of warfare in which individuals, motives and reputations have been impugned. The intensity of the debate is commensurate with the importance of the issues debated, but to those engaged in this warfare we present two arguments for reappraisal and restraint.

The lesser argument is one of expediency and is based on the ironic fact that each side has become the best argument for the other. One side's excesses have become the other side's arguments; one side's extremists the other side's recruiters. The danger is that, as the ideological warfare becomes self-perpetuating, more serious issues and broader national interests will be forgotten and the bitterness deepened.

The more important argument is one of principle and is based on the fact that the several sides have pursued their objectives in ways which contradict their own best ideals. Too often, for example, religious believers have been uncharitable, liberals have been illiberal, conservatives have been insensitive to tradition, champions of tolerance have been intolerant, defenders of free speech have been censorious, and citizens of a republic based on democratic accommodation have succumbed to a habit of relentless confrontation.

4. The Issue Is Understandably Threatening

The First Amendment's meaning is too often debated in ways that ignore the genuine grievances or justifiable fears of opposing points of view. This happens when the logic of opposing arguments favors either an unwarranted intrusion of religion into public life or an unwarranted exclusion of religion from it. History plainly shows that with religious control over government, political freedom dies; with political control over religion, religious freedom dies.

The First Amendment has contributed to avoiding both these perils, but this happy experience is no cause for complacency. Though the United States has escaped the worst excesses experienced elsewhere in the world, the republic has shown two distinct tendencies of its own, one in the past and one today.

In earlier times, though lasting well into the twentieth century, there was a de facto semi-establishment of one religion in the United States: a generalized Protestantism given dominant status in national institutions, especially in the public schools. This development was largely approved by Protestants, but widely opposed by non-Protestants, including Catholics and Jews.

In more recent times, and partly in reaction, constitutional jurisprudence has tended, in the view of many, to move toward the de facto semi-establishment of a wholly secular understanding of the origin, nature and destiny of humankind and of the American nation. During this period, the exclusion of teaching about the role of religion in society, based partly upon a misunderstanding of First Amendment decisions, has ironically resulted in giving a dominant status to such wholly secular understandings in many national institutions. Many secularists appear as unconcerned over the consequences of this development as were Protestants unconcerned about their de facto establishment earlier.

Such de facto establishments, though seldom extreme, usually benign and often unwitting, are the source of grievances and fears among the several parties in current controversies. Together with the encroachments of the expanding modern state, such de facto establishments, as much as any official establishment, are likely to remain a threat to freedom and justice for all.

Justifiable fears are raised by those who advocate theocracy or the coercive power of law to establish a "Christian America." While this advocacy is and should be legally protected, such proposals contradict freedom of conscience and the genius of the Religious Liberty provisions.

At the same time there are others who raise justifiable fears of an unwarranted exclusion of religion from public life. The assertion of moral judgments as through they were morally neutral, and intepretations of the "wall of separation" that would exclude religious expression and argument from public life, also contradict freedom of conscience and the genius of the provisions.

Civility obliges citizens in a pluralistic society to take great care in using words and casting issues. The communications media have a primary role, and thus a special responsibility, in shaping public opinion and debate. Words such as public, secular and religious should be free from discriminatory bias. "Secular purpose," for example, should not mean "non-religious purpose" but "general public purpose." Otherwise, the impression is gained that "public is equivalent to secular; religion is equivalent to private." Such equations are neither accurate nor just. Similarly, it is false to equate "public" and "governmental." In a society that sets store by the necessary limits on government, there are many spheres of life that are public but non-governmental.

Two important conclusions follow from a reappraisal of the present controveries over religion in public life. First, the process of adjustment and readjustment to the contraints and standards of the Religious Liberty provisons is an ongoing requirement of American democracy. The Constitution is not a self-interpreting, self-executing document; and the prescriptions of the Religious Liberty provisions cannot by themselves resolve the myriad confusions and ambiguities surrounding the right ordering of the relationship between religion and government in a free society. The Framers clearly understood that the Religious Liberty provisions provide the legal construct for what must be an ongoing process of adjustment and mutual give-and-take in a democracy.

We are keenly aware that, especially over state-supported education, we as a people must continue to wrestle with the complex connections between religion and the transmission of moral values in a pluralistic society. Thus, we cannot have, and should not seek, a definitive, once for all solution to the questions that will continue to surround the Relgious Liberty provisions.

Second, the need for such a readjustment today can best be addressed by remembering that the two clauses are essentially one provision for preserving religious liberty. Both parts, No establishment and Free exercise, are to be comprehensively understood as being in the service of religious liberty as a positive good. At the heart of the Establishment clause is the prohibition of state sponsorship of religion and at the heart of Free Exercise clause is the prohibition of state interference with religious liberty.

No sponsorship means that the state must leave to the free citizenry the public expression of ultimate beliefs, religious or otherwise, providing only that no expression is excluded from, and none governmentally favored, in the continuing democratic discourse.

No interference means the assurance of voluntary religious expression free from governmental intervention. This includes placing religious expression on an equal footing with all other forms of expression in genuinely public forums.

No sponsorship and no interference together mean fair opportunity. That is to say, all faiths are free to enter vigorously into public life and to exercise such influence as their followers and ideas engender. Such democratic exercise of influence is in the best tradition of American voluntarism and is not an unwarranted "imposition" or "establishment."

III. A TIME FOR RECONSTITUTION

We believe, finally, that the time is ripe for a genuine expansion of democratic liberty, and that this goal may be attained through a new engagement of citizens in a debate that is reordered in accord with constitutional first principles and considerations of the common good. This amounts to no less than the reconstitution of a free republican people in our day. Careful consideration of three precepts would advance this possibility.

1. The Criteria Must Be Multiple

Reconstitution requires the recognition that the great dangers in interpreting the Constitution today are either to release interpretation from any demanding criteria or to narrow the criteria excessively. The first relaxes the necessary restraining force of the Constitution, while the second overlooks the insights that have arisen from the Constitution in two centuries of national experience.

Religious liberty is the only freedom in the First Amendment to be given two provisions. Together the clauses form a strong bulwark against suppression of religious liberty, yet they emerge from a series of dynamic tensions which cannot ultimately be relaxed. The Religious Liberty provisions grow out of an understanding not only of rights and a due recognition of faiths but of realism and a due recognition of factions. They themselves reflect both faith and skepticism. They raise questions of equality and liberty, majority rule and minority rights, individual convictions and communal tradition.

The Religious Liberty provisions must be understood both in terms of the Framers' intentions and history's sometimes surprising results. Interpreting and applying them today requires not only historical research but moral and political reflection.

The intention of the Framers is therefore a necessary but insufficient criterion for in-

terpreting and applying the Constitution. But applied by itself, without any consideration of immutable principles of justice, the intention can easily be wielded as a weapon for governmental or sectarian causes, some quoting Jefferson and brandishing. No establishment and others citing Madison and brandishing Free exercise. Rather, we must take the purpose and text of the Constitution seriously, sustain the principles behind the words and add an appreciation of the many-sided genius of the First Amendment and its complex development over time.

2. The Consensus Must Be Dynamic

Reconstitution requires a shared understanding of the relationship between the Constitution and the society it is to serve. The Framers understood that the Constitution is more than parchment and ink. The principles embodied in the document must be affirmed in practice by a free people since these principles reflect everything that constitutes the essential forms and substance of their society—the institutions, customs and ideals as well as the laws. Civic vitality and the effectiveness of law can be undermined when they overlook this broader cultural context of the Constitution.

Notable, in this connection is the striking absence today of any national consensus about religious liberty as a positive good. Yet religious liberty is indisputably what the Framers intended and what the First Amendment has preserved. Far from being a matter of exemption, exception or even toleration, religious liberty is an inalienable right. Far from being a sub-category of free speech or a constitutional redundancy, religious liberty is distinct and foundational. Far from being an individual right, religious liberty is a positive social good. Far from denigrating religion as a social or political "problem," the separation of Church and State is both the saving of religion from the temptation of political power and an achievement inspired in large part by religion itself. Far from weakening religion, disestablishment has, as an historical fact, enabled it to flourish.

In light of the First Amendment, the government should stand in relation to the churches, synagogues and other communities of faith as the guarantor of freedom. In light of the First Amendment, the churches, synagogues and other communities of faith stand in relation to the government as generators of faith, and therefore contribute to the spiritual and moral foundations of democracy. Thus, the government acts as a safeguard, but not the source, of freedom for faiths, whereas the churches and synagogues act as a source, but not the safeguard, of faiths for freedom.

The Religious Liberty provisions work for each other and for the federal idea as a whole. Neither established nor excluded, neither preferred nor proscribed, each faith (whether transcendent or naturalistic) is brought into a relationship with the government so that each is separated from the state in terms of its institutions, but democratically related to the state in terms of individuals and its ideas.

The result is neither a naked public square where all religion is excluded, nor a sacred public square with any religion established or semi-established. The result, rather is a civil public square in which the citizens of all religious faiths, or none, engage one another in the continuing democratic discourse.

3. The Compact Must Be Mutual

Reconstitution of a free republican people requires the recognition that religious liberty is a universal right joined to a universal duty to respect that right.

In the turns and twists of history, victims of religious discrimination have often later become perpetrators. In the famous image of Roger Williams, those at the helm of the Ship of State forget they were once under the hatches. They have, he said, "One weight for themselves when they are under the hatches, and another for others when they come to the helm." They show themselves, said James Madison, "as ready to set up an establishment which is to take them in as they were to pull down that which shut them out." Thus, benignly or otherwise, Protestants have treated Catholics as they were once treated, and secularists have done likewise with both.

Such inconsistencies are the natural seedbed for the growth of a de facto establishment. Against such inconsistencies we affirm that a right for one is a right for another and a responsibility for all. A right for a Protestant is a right for an Orthodox is a right for a Catholic is a right for a Jew is a right for a Humanist is a right for a Mormon is a right for a Muslim is a right for a Buddhist—and for the followers of any other faith within the wide bounds of the republic.

That rights are universal and responsibilities mutual is both the premise and the promise of democratic pluralism. The First Amendment, in this sense, is the epitome of public justice and serves as the golden rule for civic life. Rights are best guarded and responsibilities best exercised when each person and group guards for all others those rights they wish guarded for themselves. Whereas the wearer of the English crown is officially the Defender of the Faith, all who uphold the American Constitution are defenders of the rights of all faiths.

From this axiom, that rights are universal and responsibilities mutual, derives guidelines for conducting public debates involving religion in a manner that is democratic and civil. These guidelines are not, and must not be, mandated by law. But they are, we believe, necessary to reconstitute and revitalize the American understanding of the role of religion in a free society.

First, those who claim the right to dissent should assume the responsibility to dabate: Commitment to democratic pluralism assumes the coexistence within one political community of groups whose ultimate faith commitments may be compatible, yet whose common commitment to social unity and diversity does justice to both the requirements of individual conscience and the wider community. A general consent to the obligations of citizenship is therefore inherent in the American experiment, both as a founding principle ("We the people") and as a matter of daily practice.

There must always be room for those who do not wish to participate in the public ordering of our common life, who desire to pursue their own religious witness separately as conscience dictates. But at the same time, for those who wish to participate, it should be understood that those claiming the right to dissent should assume the responsibility to debate. As this responsibility is exercised, the characteristic American formula of individual liberty complemented by respect for the opinions of others permits differences to be asserted, yet a broad, active community of understanding to be sustained.

Second, those who claim the right to criticize should assume the responsibility to comprehend: One of the ironies of democratic life is that freedom of conscience is jeopardized by false tolerance as well as by outright intolerance. Genuine tolerance considers contrary views fairly and judges them on merit. Debased tolerance so refrains from making any judgment that it refuses to listen at all. Genuine tolerance honestly weighs differences and promotes both impartiality and pluralism. Debased tolerance results in indifference to the differences that vitalize a pluralistic democracy.

Central to the difference between genuine and debased tolerance is the recognition that peace and truth must be held in tension. Pluralism must not be confused with, and is in fact endangered by, philosophical and ethical indifference. Commitment to strong, clear philosophical and ethical ideas need not imply either intolerance or opposition to democratic pluralism. On the contrary, democratic pluralism requires an agreement to be locked in public argument over disagreements of consequence within the bonds of civility.

The right to argue for any public policy is a fundamental right for every citizen; respecting that right is a fundamental responsibility for all other citizens. When any view is expressed, all must uphold as constitutionally protected its advocate's right to express it. But others are free to challenge that view as politically pernicious, philosophically false, ethically evil, theologically idolatrous, or simply absurd, as the case may be seen to be.

Unless this tension between peace and truth is respected, civility cannot be sustained. In that event, tolerance degenerates into either apathetic relativism or a dogmatism as uncritical of itself as it is uncomprehending of others. The result is a general corruption of principled public debate.

Third, those who claim the right to influence should accept the responsibility not to inflame: Too often in recent disputes over religion and public affairs, some have insisted that any evidence of religious influence on public policy represents an establishment of religion and is therefore precluded as an improper "imposition." Such exclusion of religion from public life is historically unwarranted, philosophically inconsistent and profoundly undemocratic. The Framers' intention is indisputably ignored when public policy debates can appeal to the thesis of Adam Smith and Karl Marx, or Charles Darwin and Sigmund Freud but not to the Western religious tradition in general and the Hebrew and Christian Scriptures in particular. Many of the most dynamic social movements in American history, including that of civil rights, were legitimately inspired and shaped by religious motivation.

Freedom of conscience and the right to influence public policy on the basis of religiously informed ideas are inseverably linked. In short, a key to democratic renewal is the fullest possible participation in the most open possible debate.

Religious liberty and democratic civility are also threatened, however, from another quarter. Overreacting to an improper veto on religion in public life, many have used religious language and images not for the legitimate influencing of policies but to inflame politics. Politics is indeed an extension of ethics and therefore engages religious principles; but some err by refusing to recognize that there is a distinction, though not a separation, between religion and politics. As a result, they bring to politics a misplaced absoluteness that idolizes politics, "Satanizes" their enemies and politicizes their own faith.

Even the most morally informed policy positions involve prudential judgments as well as pure principle. Therefore, to make an absolute equation of principles and policies inflates politics and does violence to reason, civil life and faith itself. Politics has recently been inflamed by a number of confusions: the confusion of personal religious affiliation with qualification or disqualification for public office; the confusion of claims to divine guidance with claims to divine endorsement; and the confusion of government neutrality among faiths with government indifference or hostility to religion.

Fourth, those who claim the right to participate should accept the responsibility to persuade: Central to the American experience is the power of political persuasion. Growing partly from principle and partly from the pressures of democratic pluralism, commitment to persuasion is the corollary of the belief that conscience is inviolable, coercion of conscience is evil, and the public interest is best served by consent hard won from vigorous debate. Those who believe themselves privy to the will of history brook no arguement and need never tarry for consent. But to those who subscribe to the idea of government by the consent of the governed, compelled beliefs are a violation of first principles. The natural logic of the Religious Liberty provisions is to foster a political culture of persuasion which admits the challenge of opinions from all sources.

Arguments for public policy should be more than private convictions shouted out loud. For persuasion to be principled, private convictions should be translated into publicly accessible claims. Such public claims should be made publicly accessible for two reasons: first, because they must engage those who do not share the same private convictions, and second, because they should be directed toward the common good.

RENEWAL OF FIRST PRINCIPLES

We who live in the third century of the American republic can learn well from the past as we look to the future. Our Founders were both idealists and realists. Their confidence in human abilities was tempered by their skepticism about human nature. Aware of what was new in their times, they also knew the need for renewal in times after theirs. "No free government, or the blessings of liberty," wrote George Mason in 1776, "can be preserved to any people, but by a firm adherence to justice, moderation, temperance, frugality, and virtue, and by frequent recurrence to fundamental principles."

True to the ideals and realism of that vision, we who sign this Charter, people of many and various beliefs, pledge ourselves to the enduring precepts of the First Amendment as the cornerstone of the American experiment in liberty under law.

We address ourselves to our fellow citizens, daring to hope that the strongest desire of the greatest number is for the common good. We are firmly persuaded that the principles asserted here require a fresh consideration, and that the renewal of religious liberty is crucial to sustain a free people that would remain free. We therefore commit ourselves to speak, write and act according to this vision and these principles. We urge our fellow citizens to do the same.

To agree on such guiding principles and to achieve such a compact will not be easy. Whereas a law is a command directed to us, a compact is a promise that must proceed freely from us. To achieve it demands a measure of the vision, sacrifice and perseverance shown by our Founders. Their task was to defy the past, seeing and securing religious liberty against the terrible precedents of history. Ours is to challenge the future, sustaining vigilance and broadening protections against every new menace, including that of our own complacency. Knowing the unquenchable desire for freedom, they lit a beacon. It is for us who know its blessings to keep it burning brightly.

INTRODUCTION OF LEGISLATION TO PROVIDE ADDITIONAL HOUSING ASSISTANCE TO THOSE AREAS AFFECTED BY THE LOMA PRIETA EARTHQUAKE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. PANETTA] is recognized for 5 minutes.

Mr. PANETTA. Mr. Speaker, I rise today to introduce legislation that will provide much needed housing assistance to those affected by the Loma Prieta earthquake. I am pleased that my colleague, ESTEBAN TORRES is joining me in introducing this bill.

While emergency housing assistance is available to the victims of natural disasters, there seems to be a shortfall of assistance available to rebuild affordable housing. The legislation that I have introduced would provide this much needed assistance.

Prior to the earthquake Santa Cruz, Monterey, and San Benito Counties were already suffering a severe housing problem. Many of my constituents traveled to Washington to participate in the "Housing Now March" to show their deep concern for the housing problems in their communities. In the aftermath of the earthquake the housing problems in this area have become even more desperate.

Reports from my district indicate that over 600 homes were destroyed and 1,800 were seriously damaged. Hundreds of people have been displaced. Many of those are still living in tents in Watsonville because there is no affordable housing available for relocation. Others, many of whom are senior citizens, will not be able to move back to their homes because the buildings that they lived in cannot be repaired. Clearly, the housing needs of these areas has reached a crisis level.

The Santa Cruz County Housing Authority has contacted me regarding their urgent need for additional section 8 vouchers or certificates and additional section 8 mod. rehab. funding. I am concerned that the affordable housing that was available before the earthquake will not be able to be rebuilt as affordable and that this will add to the already difficult housing situation. Without assistance to make the necessary repairs to buildings, landlords will be forced to raise rents. With assistance these landlords will be able to continue to provide affordable housing in an area with a severe housing problem. In conjunction with assistance for landlords, the county is in need of section 8 vouchers and certificates to help those displaced by the earthquake find alternative housing. Because of the high rents in the county section 8 assistance is vital.

In addition, a large amount of farmworker housing was destroyed. This housing is generally in poor repair and overcrowded. The problem is that the housing was not built for yearround use by families. However, that is exactly how the housing is used. Most of the families that live in this substandard housing cannot afford to make the needed repairs to make the housing livable. This legislation would make additional Farmers Home Administration funding available for the repair and construction of rural housing for the farmworker families displaced by the earthquake.

Finally, this legislation provides the Secretary of Housing and Urban Development with additional authority to redirect community development block grant [CDBG] funding to entitlement cities affected by natural disasters. One of the problems faced by the cities in my district in the aftermath of the earthquake is a lack of funding to carry out projects that were intended to be started shortly after the earthquake hit. Because of the need for many emergency measures these cities do not have the available funds to carry out these projects. In some cases these projects would provide long-term assistance to those affected by the earthquake. One example is a low-income housing project that is being built by a local nonprofit agency. Part of the planning for this project that will provide 130 units of low-income housing includes the building of storm drains by the city. However, the city does not now have enough money to pay for the repair work that needs to be done and for building the storm drains. Without the drains, the project cannot be built and 130 additional units of low-income housing will be lost.

The earthquake that hit California on October 17, 1989, has changed the lives of thousands of people. Many will not be able to resume a normal life for sometime to come. We, as a nation, have always shown compassion to those whose lives have been disrupted by a disaster. The people of California are grateful for the assistance that the American people have provided since the earthquake, but when the headlines end and the Nation's attention turns to another subject, the victims of the earthquake will be left with problems still unsolved. This legislation provides assistance for long-term permanent solutions to help these communities rebuild and revitalize. I urge you to support this measure.

H.R. ——

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. CERTIFICATES AND VOUCHERS.

The budget authority available under section 5(c) of the United States Housing Act of 1937 (42 U.S.C. 1437c(c)) for assistance under the certificate and voucher programs under sections 8 (b) and (o) of such Act is authorized to be increased in any fiscal year in which a major disaster is declared by the President under the Robert T. Stafford Disaster Relief and Emergency Assistance Act in such amount as may be necessary to provide assistance under such programs for individuals and families whose housing has been damaged or destroyed as a result of such disaster.

SEC. 2. MODERATE REHABILITATION.

The budget authority available under section 5(c) of the United States Housing Act of 1937 (42 U.S.C. 1437c(c)) for assistance under the moderate rehabilitation program

under section 8(e)(2) of such act is authorized to be increased in any fiscal year in which a major disaster is declared by the President under the Robert T. Stafford Disaster Relief and Emergency Assistance Act in such amounts as may be necessary to provide assistance under such programs for individuals and families whose housing has been damaged or destroyed as a result of such disaster.

SEC. 3. COMMUNITY DEVELOPMENT.

(a) COMMUNITY DEVELOPMENT BLOCK GRANTS.—Section 106(c) of the Housing and Community Development Act of 1974 (42 U.S.C. 5306) is amended—

(1) in paragraph (1), by striking "paragraph (2)," and inserting "paragraphs (2) and (4),"; and

(2) by adding at the end the following new paragraph:

"(4)(A) Notwithstanding paragraph (1), in the event of a major disaster declared by the President under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, the Secretary shall make available, to metropolitan cities and urban counties located or partially located in the areas affected by the disaster, any amounts that become available as a result of actions under section 104(e) or 111.

"(B) In using any amounts that become available as a result of actions under section 104(e) or 111, the Secretary shall give priority to providing emergency assistance under this paragraph.

"(C) The Secretary may provide assistance to any metropolitan city or urban county under this paragraph only to the extent necessary to meet emergency community development needs, as the Secretary shall determine (subject to subparagraph (D)), of the city or county resulting from the disaster that are not met with amounts otherwise provided under this title, the Robert T. Stafford Disaster Relief and Emergency Assistance Act, and other sources of assistance.

"(D) Amounts provided to metropolitan cities and urban counties under this paragraph may be used only for eligible activities under section 105.

"(E) The Secretary shall provide for applications (or amended applications and statements under section 104) for assistance under this paragraph.

"(F) A metropolitan city or urban county eligible for assistance under this paragraph may receive such assistance only in each of the fiscal years ending during the 3-year period beginning on the date of the declaration of the disaster by the President.

"(G) This paragraph may not be construed to require the Secretary to reserve any amounts that become available as a result of actions under section 104(e) or 111 for assistance under this paragraph if, when such amounts are to be reallocated under paragraph (1), no metropolitan city or urban county qualifies for assistance under this paragraph.".

(b) URBAN DEVELOPMENT ACTION GRANTS.—

(1) IN GENERAL.—Section 119(g) of the Housing and Community Development Act of 1974 (42 U.S.C. 5318(g)) is amended—

(A) by inserting "(1)" after "(g)"; and

(B) by adding at the end the following new paragraph:

(2)(A) Notwithstanding subsection (d)(5)(B)(iii), in the event of a major disaster declared by the President under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, the Secretary shall make available, to cities and urban counties eligible under subsection (b) for grants under this section that are located or partially located in the areas affected by the disaster, any amounts that are recaptured from previous grants.

"(B) In using any recaptured amounts, the Secretary shall give priority to providing emergency assistance under this paragraph.

"(C) The Secretary may provide assistance to any city or urban county under this paragraph only to the extent necessary to meet emergency urban development needs, as the Secretary shall determine (subject to subparagraph (D)), of the city or county resulting from the disaster that are not met with amounts otherwise provided under this title, the Robert T. Stafford Disaster Relief and Emergency Assistance Act, and other sources of assistance.

"(D) Amounts provided to cities and urban counties under this paragraph may be used only for eligible activities under this section.

"(E) The Secretary shall provide for applications (or amended applications under subsection (c)) for assistance under this paragraph.

"(F) A city or urban county eligible for assistance under this paragraph may receive such assistance only in each of the fiscal years ending during the 3-year period beginning on the date of the declaration of the disaster by the President.

"(G) This paragraph may not be construed to require the Secretary to reserve any recaptured amounts for assistance under this paragraph if, when such amounts are to be included in a competition pursuant to subsection (d)(5), no city or urban county qualifies for assistance under this paragraph.".

(2) CONFORMING AMENDMENT.—Section 119(d)(5)(B)(iii) of the Housing and Community Development Act of 1974 (42 U.S.C. 5318(d)(5)(iii)) is amended by striking the period at the end and inserting the following: "and have not been awarded under subsection (g)(2).".

SEC. 4 RURAL HOUSING.

Title V of the Housing Act of 1949 (42 U.S.C. 1471 et seq.) is amended by adding the end the following new section:

"DISASTER ASSISTANCE

"SEC. 536. (a) AUTHORITY.—

"(1) IN GENERAL.—Notwithstanding any other provision of this title, in the event of a natural disaster, so declared by the President under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, the Secretary shall allocate, for assistance under this section to the States affected for use in the counties designated as disaster areas and the counties contiguous to such counties, amounts available under this title. Allocations under this section shall be made for each of the fiscal years ending during the 3-year period beginning on the declaration of the disaster by the President.

"(2) AMOUNT.—Subject to the availability of amounts pursuant to appropriations Acts, assistance under paragraph (1) shall be made in an amount equal to the product of—

"(A) the sum of the official State estimate of the number of dwelling units in the counties described in paragraph (1) within the eligible service area of the Farmers Home Administration (or otherwise if the Secretary provides for a waiver under subsection (d)) that are destroyed or seriously damaged; and

"(B) 20 percent of the average cost of all dwelling units assisted by the Secretary in the State during the previous 3 years.

"(b) USE.—The assistance made available under this section may be used for the housing purposes authorized under this title, and the Secretary shall issue such regulations as may be necessary to carry out this section to assure the prompt and expeditious use of such funds for the restoration of decent, safe, and sanitary housing within the area described in subsection (a)(1).

"(c) ELIGIBILTY.—Notwithstanding any other provision of this title, assistance allocated under this section shall be available to units of general local government and their agencies and to local nonprofit organizations, agencies, and corporations for the construction or rehabilitation of housing for agricultural employees and their families.

"(d) WAIVER OF RURAL AREA REQUIREMENTS.—The Secretary may waive the application of the provisions of section 520 with respect to assistance under this section, as the Secretary considers appropriate.

"(e) RURAL HOUSING INSURANCE FUND.—The Secretary is authorized to advance from the Rural Housing Insurance Fund such sums as may be necessary to meet the requirements of subsection (a)(1).".

HIGHER EDUCATION POLICY ITEMS IN THE BUDGET RECONCILIATION REPORT WILL MAKE BAD POLICY FOR STUDENTS, SCHOOLS, AND TAXPAYERS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania [Mr. GAYDOS] is recognized for 60 minutes.

Mr. GAYDOS. Mr. Speaker, later this week, the House will take up the conference report on budget reconciliation. While I cannot speak for or against the report as a whole, there is a portion of it that, in its current form, will destroy a vital and necessary segment of the higher education community.

Within the budget reconciliation conference report, there is a section that purports to save almost $40 million in budget outlays for fiscal year 1990, but which really is a thinly veiled attempt to reduce access and choice for young people who want to attend career training schools rather than more traditional academic 2- and 4-year education programs by making it more difficult for them to get student aid.

The subconference committee dealing with that issue is on the verge of offering a laundry list of items that are less directed toward those savings as required by the Budget Committee than they are at radically changing current policies on student aid.

I have attached the full list of items with the potential savings of each, as calculated by the Congressional Budget Office. As you can see, overall, there is little to commend them as savings. Some do make sense as management tools to improve the flow of dollars to students and schools while providing better controls over those dollars, but three items are out-and-out threats to the futures of thousands of

young people hoping to break the chains of poverty.

Let me briefly cite those three that demonstrate what I mean and then go into greater detail.

The first item says that students who plan to attend career training schools having a student loan default rate of more than 30 percent would not be eligible to participate in the Supplemental Loan for Students Program [SLS].

The second item says that students must have either a high school diploma or a general equivalency diploma [GED] in order to be eligible to participate in the SLS Program.

And, the third item says the amount of SLS money available to students depends solely on the length of the training program.

While each of these items by itself will have tragic consequences, the combination will prove devastating to just those students who desperately need this kind of career training.

I am a member of the subconference committee on student aid, but cannot—and will not—put my name to any document which I believe is fundamentally flawed.

It is flawed for two reasons. First, and foremost, it will make it far more difficult for too many Americans who want and need specialized career training to get it. This, quite frankly, is just the opposite message we should be sending to those Americans who want to work, but don't have the skills; who want to learn a trade, but don't want to spend years combining academic and career work.

Second, but no less important, this agreement is a backdoor method of making a major policy change—without giving the parties involved an opportunity to speak on the issue.

If we were making significant budget savings by this package of adjustments to the higher education student aid formula, it might have some redeeming value. But it does not do that and, therefore, I must view this agreement as nothing more than the first attempt to eliminate the career training segment of higher education from eligibility in the entire student loan program.

By limiting access for students who are not interested in academic education to only academic programs, we will not only be selling them short, we will be affecting other Federal programs as well.

A 1989 report done by Shearson Lehman Hutton argues that any limitations on access to higher education programs, including, and especially, career training, will cost dramatically more in terms of other Federal programs such as welfare, food stamps, women and infant care, housing, and health care.

According to their report, taxpayers save $17,938 per student per year for every American who finishes a training program and gets a job earning $15,000. This money is saved as follows: family welfare benefits—$6,000; food stamps—$1,908; women and infant care—$480; housing—$7,200; and Medicaid—$500. In addition, the taxes generated by that $15,000 job is equal to $1,850.

These savings will quickly dwindle, become nonexistent and then turn into costs if students don't have access to those programs that will teach them the skills they need to get better jobs more quickly.

And, please keep in mind that I'm not talking about just a handful of students here.

Last year, for example, 1.2 million students earned certificates from career training schools as compared to 998,000 students who earned bachelor degrees at colleges and universities.

These 1.2 million students deliberately chose career training over academic programs because they wanted to learn a skill as quickly as possible so they could get into the job market with more practical hands-on training.

The students who choose a career training program are more likely to be older than traditional students—46 percent of them over the age of 25—and more likely to be financially independent of their parents—54 percent of them. Further, 71 percent of first-time career training school students have children and half of them are single parents.

Career training schools also educate a higher percentage of women than any post-secondary sector—78 percent—and minorities comprise 40 percent of the schools' enrollments.

For these students and many others, Federal student aid programs are the only opportunity they have, the single factor that enables them to change their circumstances.

The basic assistance programs are Pell grants, Stafford Guaranteed Student Loans [GSL], Supplemental Loans for Students [SLS], and parent loans [PLUS].

While original thinking behind these Federal assistance programs was to use grants for students coming from poorer backgrounds and loans for students whose families just needed some assistance, during the 1980's, Federal education policy has changed so that there has been considerably more dependence on loans overall.

There are many of us who believe we must change that system, that we must return to the original concept of grants for less economically secure students and loans for those somewhat better off.

I support those efforts, but I am also a realist. While our hope is to restructure the student aid system, it is unlikely to become reality in the immediate future.

So the question is: Where do we go from here? Do we make the commitment to keep the available loan programs open so that students will have access to the institution of higher education of their choice, or do we tell them that because too many previous students who attended a particular school didn't repay their loans, they either can't get the aid to go there, or they have to go somewhere else—assuming they can find the program they want, offered in the timeframe they desire.

Those students can rely on only two programs, both are loans—the GSL and the SLS.

The GSL is available to students on the basis on need. This takes into consideration how much the student and student's family earnes, what they can be expected to pay for the student's education, and how much the program of study will cost.

The GSL also offers a low interest rate—8 percent—and doesn't become payable until 6 to 9 months after the student leaves school.

Independent students, roughly 54 percent of the career training enrollment, are eligible for SLS loans. It is not based on need, is offered at market rate—about 12 percent—but comes due 60 days after it is issued. Students who receive a GSL can also get an SLS to help defray additional costs of their education.

Right now, first and second year students are eligible for $2,600 under a GSL and $4,000 under an SLS in a given year.

If we accept the policy changes in the subconference report, this will change. We will continue to allow students eligibility for the SLS loan provided they go to the right school and have a high school diploma or a GED. Unfortunately, that means that too many students will lose whatever chance exists to escape from a life of poverty and despair.

How often have we heard or read about some person who dropped out of high school to help support his or her family or to raise a family only to decide later in life to return to school to get that piece of paper? Are we saying to them that they don't count, that a piece of paper is more important than their immediate need? Have we lost all of our compassion and concern for those Americans who want to work, but for a variety of reasons have dropped out of high school before completing the program?

We say we are concerned about the amount of indebtedness these students assume, so the subconference has determined that the amount of the loan will depend on the length of the program. Thus, a person choosing to attend a course of less than 600 hours, a truck driver training program, for

example, is eligible to receive an SLS loan of only $1,500.

If the student is planning to attend a program of between 600 and 900 hours, he or she would be eligible for $2,500 in SLS funds, and if the student is lucky and attends a course of more than 900 hours, a maximum amount of $4,000 is available.

So here we go again, cutting off just those students who will benefit most. Dependent students who need more than the $2,600 maximum under GSL, can go to their parents and ask them to help.

The parents have several options. They can take a PLUS loan, which is very similar to the SLS program in interest rates and payment structure, or they may have the option of going to an employer-funded system of student aid, or, if they own their own home and have a reasonable amount of equity in it, they can borrow against that equity—and even deduct the loan interest.

The independent student, however, does not have those options. Generally, the SLS loan is the loan of last resort. So whom are we hurting? Middle-class kids? No. We are hurting just those students who need the help—the older student, the single parent who either wants to get training for entry into the work force or wants to learn new skills for better paying jobs.

We already throw students who want to attend career training programs into another class by making them ineligible for the Pell grants when the course of study is less than 600 hours, so now we make it even more difficult since a number of career training programs are less than 600 hours.

The average income of students who qualify for a Pell grant was $9,236 for 1987–88 while the average income of 47 percent of the students who attended career training schools was less than $11,000.

By requiring students to have GED's before they are eligible for an SLS loan, we will be forcing these students, who have already dropped out of an academic environment once before, back into that same academic environment.

We will be telling those students who do not want an academic education that we don't believe they can benefit enough from career training, despite reports from most researchers who feel such programs are ideal for students who don't do well in an academic program.

They don't want to be teachers, accountants, or lawyers. They want to be truck drivers, electricians, secretaries, dental assistants on paralegals. They want to learn the exact skills they will need to do a job well and to become productive members of our society.

We will also be telling those students that we don't think they can benefit enough from career training to enable them to get off welfare, get a good paying job, and attempt to make a better life for themselves and their families. And many of the students I'm talking about have families they have to support while they go to school.

Tuition costs are increasing at career schools just as at all other post-secondary schools but the tuitions at career schools aren't rising at such an outrageous pace as some people insist. A survey by the Association of Independent Colleges and Schools reveals the average cost of tuition for career schools in 1988–89 is $4,433. Their tuition increased 12.2 percent since 1984–85 in real terms. But that 12.2-percent increase should be compared to the 30-plus-percent increase for private, not-for-profit colleges and universities.

As I just noted, the average tuition at career schools is $4,433 and the maximum GSL for first and second year students is $2,625. If the SLS loan is not available to these students who just want to learn a skill, they won't be able to do it. They won't have the money needed to pay for the training that would lead to a better job.

Since 47 percent of students who attended career schools last year had an income of less than $11,000, many of these students need the SLS loan to cover the living expenses for them and, often times, their families while they attend school. These are people who cannot afford to attend school without having some means to pay the bills for the length of the training program. These are also people who barely make enough money to cover their expenses from one month to the next, much less be able to save up enough money so they can pay their living expenses and the cost of their education while they study.

Without access to the SLS loan, they will be stuck doing whatever they can to get by, or, worse yet, stuck on welfare and other Federal programs.

If this isn't bad enough, we will be moving even farther in the wrong direction by accepting the policy changes in this package because it will limit access to career training programs themselves, even for those Americans who have a GED.

And that brings us to that part of the budget savings program that would eliminate schools with more than a 30 percent default rate from participation in the SLS Program.

First, let me explain how the default rate is calculated. If just one student in a given institution of higher learning gets a loan and fails to begin repayment within a certain term after the loan becomes due, that school is then charged with a 100-percent default rate.

It makes no difference whether that student has dropped out of the program before its completion or whether the program has been completed. The school, according to almost everyone, is in the wrong—especially if it is a career training school.

Now, if two students at an institution get loans, and one repays the loan while the other one does not, the default rate is 50 percent. It doesn't make any difference what the amount of the dollars in default are, only the number of loans that are not being repaid on schedule.

Second, the calculated default rate we are using includes defaulted Stafford GSL loans only or both GSL and SLS loans. The Department of Education says it cannot give us separate default rates for GSL and SLS.

That, to me, seems a little strange since I have heard from several schools that have been able to give me the separate default rate numbers—that they received from the Department of Education.

One such school, Dickinson Business College told me that its combined default rate was about 42 percent. Its SLS default rate, as calculated by the Department, was about 14 percent.

The people at Dickinson told me that because SLS loans go into repayment 60 days after being granted, they have a better chance to ensure that those loans are repaid, because the student is still in the program. The GSL loan doesn't become due for repayment until 6 to 9 months after the student leaves or completes the program.

This arbitrary cutoff for loan defaults combines GSL and SLS loans and is detrimental to many smaller schools, most of which are career training schools; 1983 figures supplied by the General Accounting Office illustrated just how detrimental this will be.

In 1983 there were 112 schools rated as having a 100-percent default rate with only one loan in default. There were 92 schools listed in the same GAO report that had only 1 loan in default, but were rated as having a 50 percent default rate. Now if three students at an institution got loans and only one did not repay it, the default rate would be 33⅓ percent.

Thus the 30 percent cut off really doesn't make any sense.

The amount of money involved in these types of defaults varies from $348 to $5,000 at schools with the 100-percent default rate and from $350 to $15,000 at schools with the 50 percent default rate. These amounts are a drop in the bucket compared to bigger schools who have millions of dollars in default but may have a low default rate.

According to that same 1983 GAO report, for example, the University of

Maryland and Rutgers University each had default rates of less than 10 percent but the combined money in loan defaults from students who attended these two traditional institutions of higher education totaled over $3 million.

There is no question that we need to reduce the student loan default rates, but the Department of Education has been moving in that direction. Last year, the Subcommittee on Postsecondary Education created a major student loan default management bill. Even though it did not make it through the process, much of the proposal has been utilized by the Secretary of Education in crafting his proposed default management regulations.

Still, if we are interested in where the $2 billion in GSL defaults are, we need to look beyond the default rate. We must consider the amount of dollars in default.

I have just cited two examples. Many more exist. I will insert into the RECORD an entire page of that 1983 GAO report listing schools with one loan in default but having a 100-percent default rate. At the same time, I am going to include a listing on those institutions of higher learning with default rates under 10 percent, but which have more than $1 million in defaulted loans according to the same 1983 report.

I would use more current figures but the Department of Education does not have a current comprehensive report that lists default rates and the amount of money in default by school. Apparently, the schools' default rate and the amount of money in default are treated as two separate types of information which are put into two or more separate reports.

My staff people have been told the information is available but it would be a very expensive and time-consuming task to put together a single report listing those two types of information by school. It's a shame. I think many of us, as well as the Department of Education, would find a single comprehensive report very helpful.

But ever by using 1983 numbers, I think you can understand how the 30-percent cutoff will have a disastrous affect on the career training segment of higher education.

Since career training schools provide about half of all of the vocational training in the United States, limiting access to this training will have a terrible effect on our country's labor pool.

Shearson Lehman Hutton predicts "denying certain students access to vocational education is ultimately far more costly to the U.S. taxpayer."

In their 1989 report, I cited earlier they estimate that even if a school stays open with a 50-percent default rate with 100 students who have loans of $2,500 each, taxpayers save $896,500 per year for just that one student population of 100.

Also, the three top fastest growing occupations percentwise according to the Department of Labor are jobs in which career training plays an important role: paralegal, medical assistant, and physical therapist.

In 1986, the Department estimated there were 61,000 paralegals and by 2000 we will need 125,000. That's a 103.7-percent increase. They also estimate increased needs of 90.4 percent for medical assistants and 87.5 percent for physical therapists.

Aside from causing shortages in certain skilled labor pools by forcing small training schools out of business and denying them a supply of students, if this package is accepted, we will also end up increasing labor shortages that already exist in such fields as the trucking industry.

There are now well over 2 million truck drivers but the driver shortage is expected to exceed 300,000 by 1991. According to a study by the Hudson Institute, it is estimated the trucking industry needs 450,000 new drivers every year.

Truck driving schools are the primary source for new drivers, especially since we passed the Commercial Motor Vehicle Act of 1986 which, among other things, requires better trained truckdrivers. Where do we expect to get the 450,00 new drivers per year if we make most of the students who want to drive trucks ineligible for aid and the schools that would educate them ineligible to participate in any of the financial assistance programs? And even more, do truck drivers really need the kinds of long-term programs that combine academic and skill training? The answer is a simple "No!"

Considering the amount of money the Department of Education appropriated for defaults in 1989—$243.5 million for the SLS/PLUS loans and $1.6 billion for the Stafford loans, the default issue must be addressed, but cutting off schools with a 30 percent or higher default rate is not necessarily the answer.

Having looked at the phenomenal growth of the SLS in the past 2 years, I can understand the concern, but both the Department of Education and the Congressional Budget Office have said that it is too early to tell what the real effects of this growth will be.

SLS loans in 1987 totaled $711 million and in 1988 loans were nearly $2 billion. The effects of the big surge in 1988 won't be seen until the Department's 1989 cohort default tapes can be analyzed, but CBO has based the cost figures in this report on the Department's 1987 cohort default tapes.

Many people are worried about the growth in the SLS program and are saying something has to be done now but these particular policy changes will not address the potential, if any, problem. They will create new problems that will eventually have to be addressed.

I am opposed to these policy changes because they won't save any money in the long run and will end up costing far more than any pretence of savings now. Further, these changes will take us in the wrong direction.

I believe in higher education. I believe that every one who wants more education—whether the academic skills that will lead to certain kinds of careers or the specific career training for immediate employment—should be allowed to pursue that dream. It is in the best interest of the Nation.

Last month, the Washington Post editorialized about the problems of student aid loans and defaults.

I responded to that editorial with a letter detailing some of the history of changes in the higher education structure in the United States.

Since the Post has not yet decided whether it will print my letter, I will include it with this commentary.

I think it is important that we understand the need for all kinds of educational opportunities for Americans, regardless of age, program interest, or type of school.

Not every one has to be a rocket scientist, doctor, lawyer, or accountant. We definitely need truck drivers, plumbers, electricians, welders, secretaries, and medical and dental assistants.

I know that we will not be allowed to single out one element of this budget reconcilation report, but, if we could, this is the one I would urge all of you to vote against.

This portion of the report is bad because it makes policy in a budget bill, and it is worse because it makes bad policy.

Mr. Speaker, I would like to have the following material made a part of the RECORD.

STAFF PROPOSED AGREEMENT FOR BUDGET RECONCILIATION

	Savings	
	1990	1991
(1) Medical Student Loan Internship Deferments, including mandatory forbearance provisions:		
Budget authority	−10	−15
Outlays	−10	−15
(2) Eliminate undergraduate borrowers attending schools with calculated cohort default rates of 30 percent or more from participating in the SLS program except allow current borrowers at those schools to participate in the SLS program until their program is completed. This provision also includes language that would limit the ability of an institution from evading this provision through change of ownership, branching or consolidation:		
Budget authority	−5	−60
Outlays	−3	−60
(3) Require that all loan disbursements (SLS and GSL) to be made 30 days after the begining of the course of instruction for all first-time, first-year, undergraduate borrowers. This provision also includes language that would require that institutions certify that a student has been enrolled for 30 days:		
Budget authority	(1)	−3
Outlays	(1)	−3
(4) Establish a 6 month amnesty program:		
Budget authority	−20	15

STAFF PROPOSED AGREEMENT FOR BUDGET RECONCILIATION—Continued

	Savings 1990	Savings 1991
Outlays	−20	15
(5) Require the GSL/SLS to be disbursed to be made halfway into the period of study and be one-half of the loan amount:		
Budget authority	(1)	−3
Outlays	(1)	−3
(6) Provides the Secretary with the authority to take emergency action for 30 days against lenders and provides the Secretary with the authority to limit, suspend or terminate a lender's agents for 60 days when there is reliable information that such entities are in violation of the law. Also permits guarantee agencies to exercise the same authority:		
Budget authority	(2)	(2)
Outlays	(2)	(2)
(7) Prohibit accreditation jumping by denying aid eligibility should accreditation be withdrawn or should the institution withdraw under suspicion of termination:		
Budget authority	(1)	(1)
Outlays	(1)	(1)
(8) Remove prohibitiion by the Secretary against the use of the National Student Loan Data system in verifying student eligibility or student information before a loan is certified or guaranteed:		
Budget authority	(2)	(2)
Outlays	(2)	(2)
(9) Provides the Secretary with the authority to take emergency action for 30 days against institutions and provides the Secretary with the authority to limit, suspend or terminate institutions' agents when there is reliable information that such entities are in violation of the law. Also permits guarantee agencies to exercise the same authority:		
Budget authority	(2)	(2)
Outlays	(2)	(2)
(10) Prohibit charging students or parents fees for the collection of additional information for use in financial aid administrator discretion. Also clarify the prohibition against using aid administrator discretion for whole groups of students:		
Budget authority	(2)	(2)
Outlays	(2)	(2)
(11) Require all schools with programs of less than 2 years to insure that a student is enrolled in a GED program and require that all students have received GED before they are eligible for an SLS:		
Budget authority	(1)	−10
Outlays	(1)	−10
(12) Pro Rate SLS Annual Loan Limits for programs of less than one academic year based on length of program such that students attending programs between 300–599 clock-hours (or the equivalent) would be eligible for $1,500. Students attending programs between 600–799 clockhours (or the equivalent) would be eligible $2,500. Students attending programs of 1 academic year or greater would be eligible for $4,000—except that no student is eligible to receive more than one SLS over a period of 9 consecutive months:		
Budget authority	(1)	−10
Outlays	(1)	−10
(13) Permit institutions to reduce the amount a student can borrow under the SLS program to more accurately reflect other resources available to the student such as part-time employment:		
Budget authority	(2)	(2)
Outlays	(2)	(2)
(14) Clarify the disclosure requirements for providing students with repayment information on an SLS loan:		
Budget authority	(2)	(2)
Outlays	(2)	(2)
(15) Permit lenders to operate lender referal programs:		
Budget authority	(2)	(2)
Outlays	(2)	(2)

[1] Less than $500,000 savings.
[2] No Federal savings.

APPENDIX I.—SCHOOL DEFAULT RATES FOR 1983 BORROWERS

School name, city/State [1]	Borrower default rate	Total default dollars	Total number of defaulters
Essie Mae's Sch of Beauty Culture, Elizabeth, NJ	100.00	$2,500	1
Everett Beauty School, Everett, WA	100.00	2,500	1
Federico College, Fresno, CA	100.00	2,500	1
Florida Parishes Voc School, Greensburg, LA	100.00	500	1
Fremont Beauty College, Fremont, CA	100.00	2,500	1
Gino Robair Beauty College, Riverside, CA	100.00	2,500	1
Grant Hosp Sch For Med Rec Libr, Chicago, IL	100.00	4,000	1
Haifa University, Israel, FC	100.00	1,500	1
Hairbenders School of Hairstyling, Lawrence, KS	100.00	2,500	1
Hairmasters University of Beauty, San Bernardino, CA	100.00	1,500	1

APPENDIX I.—SCHOOL DEFAULT RATES FOR 1983 BORROWERS—Continued

School name, city/State [1]	Borrower default rate	Total default dollars	Total number of defaulters
Hines Jr VA Hosp Sch of Nuclear Med, Hines, IL	100.00	5,000	1
Illinois Masonic Hosp Sch of Rad-Te, Chicago, IL	100.00	2,300	1
Jaffna College, Ceylon, FC	100.00	2,500	1
Jeffie Liles Academy of Hair Design, Oxford, MS	100.00	2,500	1
Jeromes Sch of Bty Culture, New Orleans, LA	100.00	5,000	1
Jett Col of Cosmetology Barbering, Memphis, TN	100.00	2,500	1
Kane Business Institute, Cherry Hill, NJ	100.00	2,500	1

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, DC.

EDITOR,
The Washington Post, Washington, DC.

DEAR EDITOR: As your editorial on October 15, ("Reforming Student Aid") implies, it is important that student aid programs undergo some reform. And, as you suggest, excluding those students most in need of such aid would certainly improve the default rates on those loans.

Unfortunately, penalizing those students and the private career schools they attend is a clear case of throwing the baby out with the bathwater. Aid to higher education must assist needy students who want an academic education program as well as those trying to get a technical education that will lead to good and meaningful jobs.

The history of higher education in this country is marked by three milestones. The first was the creation of the land grant university. In the effort to provide greater access for young people who could not afford the existing private colleges and universities or who wanted a more technically driven education, federal and state dollars helped produce a new class of university whose aim was to instruct students in the practical arts of engineering and agriculture. These land grant colleges and state universities changed the mission of higher education and helped in the economic development of the country by enrolling a new type of student.

The next milestone was the establishment of the community college system. Beginning in the 1950's, these schools again broadened the mission of higher education and made postsecondary education a reality for everyone, especially the baby boom generation.

The community colleges provided academic, vocational, and community-based education. The admission policy was "open-door" and tuition, initially, was most reasonable. Today, more than five million students are enrolled in the nation's community colleges.

The third marker in the history of higher education is the growth of private career schools. While many of these schools have been teaching young people for 25, 50, and 100 years, it is only recently that the movement has been recognized as a significant factor in the higher education fabric, offering educational opportunity to a whole new class of students. And, as has happened at each previous milestone, the curriculum and format of postsecondary education has been altered.

These private career schools are run as businesses by men and women who more often than not, are not included in the state governing process or even in Federal education data collection. As a result of this neglect, they appear to be invisible, poorly understood by traditional educators and policy makers who have little, if any, direct experience with them.

I, on the other hand, have had a direct experience with this sector of postsecondary education. My daughter attended and graduated from Bradford School in Pittsburgh as a legal secretary and has had a very successful career because of that schooling. The decision to attend a career training school instead of a traditional academic postsecondary program was her choice, and it worked.

The impact of student aid on the enrollment of low income or minority students, the original goal of student aid, has been minimal at most traditional colleges and universities. However, the combination of student aid and private career schools is responsible for introducing a whole new type of student to postsecondary education. Minority students comprise 40 percent of enrollment in the private career school community. This compares to 25 percent of undergraduates in community colleges, 19 percent in public four-year colleges, and 18 percent in private, non-profit colleges.

In addition, private career schools are supplying a large share of the human capital for business and industry in this country. According to a 1984 Department of Labor study entitled, "Occupational Prospects and Training Data," private career school graduates who entered the job market in 1984 in-

cluded: Almost half of all respiratory therapists; 74 percent of all surgical technicians; 52 percent of all computer programmers; 49 percent of all electrical technicians; 33 percent of all secretaries; 25 percent of all aircraft mechanics; and 54 percent of all diesel mechanics, just to name a few.

The demographics in this country are changing and federal policy must reflect this change, especially if we are to remain competitive in a global economy. According to a Department of Labor study entitled "Workforce: 2,000," by the year 2000 approximately 20 percent of all jobs created in this country will require a baccaleaureate degree and the remaining 80 percent will require some level of technical education beyond high school.

This shift from traditional college education to postsecondary technical education can best be demonstrated by the number of graduates each sector produced last year. In 1988, there were approximately 998,000 baccalaureate degrees awarded. At the same time, private career schools awarded approximately 1.2 million degrees or certificates.

Each of the educational milestones has changed the character and style of higher education by defining a whole new curriculum and enrolling a new part of the population in postsecondary education. Each has made higher education more inclusive and democratic in nature. Each of the additions has been built on the existing system without significantly affecting the schools in existence prior to the addition.

Student aid must be reformed. However, it must not be reformed to restrict choice and competition. Rather, it must be reformed in such a manner that will continue to give any student the opportunity to attend any postsecondary institution that best suits his or her educational needs.

Sincerely,

JOSEPH M. GAYDOS
Member of Congress.

[From the Washington Post, Oct. 15, 1989]

REFORMING STUDENT AID

Federal aid to higher education is in serious trouble. Even the normally sympathetic House and Senate appropriations committees have joined the critics, saying that the costly major programs have been bent out of shape—the career and trade school industry now absorbs more than a fourth of the money—and are being ripped off. It used to be mainly the Reagan administration that criticized the programs in often hyperbolic terms, and defenders were able to dismiss the criticisms as ideological outbursts or assaults on the poor. That won't wash any more. These important forms of assistance badly need to be reformed for their own protection.

The student-aid programs were greatly expanded in little-remembered legislation in 1978, in part by making them available to the middle class. That legislation and other liberalizations, the related broadening of access to higher education and rising costs mean that about half of all post-secondary students receive some form of federal aid. The annual cost is nearly $10 billion.

The Reagan administration came to office determined to roll back the 1978 expansion, which it saw as a major new federal entitlement that the Carter administration and Congress had sneaked into place without sufficient national debate. In the rather bitter, inconclusive fight that followed, both sides took extreme positions and rational policy was the loser. It still is.

But the appropriations panels are not so easily brushed aside. In the 99th Congress the protective authorizing committees approved extension of the major student grant program to so-called nontraditional students attending classes less than half-time. But conferees on this year's Labor/Health and Human Services appropriations bill have voted to suspend such aid for fear that, to pay for it, they would have to reduce aid proportionately to all students.

The appropriators nearly voted, for similar reasons, to suspend grants to students without the equivalent of high school diplomas. This is a step the authorizing panels have been reluctant to take in the past on grounds that it would restrict access to postsecondary education. Both House and Senate appropriations committees also charge in their reports that the aid programs have been allowed to drift away from their original purpose of producing college graduates, that too much money is now taken up by suspect proprietary schools and that too much—nearly $2 billion a year—is required to cover defaults on student loans.

The government needs to maintain support for higher education. No federal investment is more important; none has a greater equalizing effect. At the same time there is a need, neglected in the past, to make sure that this large amount of money is being usefully spent. That is a difficult balance to achieve in the best of circumstances: the government can never sit comfortably in judgment on higher education. Surely this is not a set of issues that should be dropped on the appropriations committees as they struggle to meet budget targets each year.

A House subcommittee proposed last fall that the major student grant program, like the major loan program, be made a true entitlement not subject to the annual appropriations process. It would be well worth giving the program that protection if in return both programs could be tightened up. But that would require the higher education community and its congressional protectors to give as well as get. The shabbier schools and practices the current programs are supporting have to go.

CONFERENCE REPORT ON H.R. 2883, RURAL DEVELOPMENT, AGRICULTURE, AND RELATED AGENCIES APPROPRIATIONS ACT, 1990

Mr. MURTHA, on behalf of Mr. WHITTEN, submitted the following conference report and statement on the bill (H.R. 2883) making appropriations for Rural Development, Agriculture, and Related Agencies programs for the fiscal year ending September 30, 1990, and for other purposes:

CONFERENCE REPORT (H. REPT. 101-361)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 2883) making appropriations for the Rural Development, Agriculture, and Related Agencies programs for the fiscal year ending September 30, 1990, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 24, 25, 45, 48, 49, 52, 53, 60, 75, 77, 81, 82, 86, 92 and 93.

That the House recede from its disagreement to the amendments of the Senate numbered 4, 13, 17, 19, 40, 41, 43, 64, 67, 68, 70, 72, 73, 90 and 97, and agree to the same.

Amendment numbered 1:

That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment, amended as follows:

In lieu of the sum named, insert: *$400,000*; and the Senate agree to the same.

Amendment numbered 2:

That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment, amended as follows:

In lieu of the sum named, insert: *$400,000*; and the Senate agree to the same.

Amendment numbered 3:

That the House recede from its disagreement to the amendment of the Senate numbered 3, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by amendment insert *$470,000*; and the Senate agree to the same.

Amendment numbered 5:

That the House recede from its disagreement to the amendment of the Senate numbered 5, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$542,000*; and the Senate agree to the same.

Amendment numbered 6:

That the House recede from its disagreement to the amendment of the Senate numbered 6, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$52,053,000*; and the Senate agree to the same.

Amendment numbered 7:

That the House recede from its disagreement to the amendment of the Senate numbered 7, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$21,828,000*; and the Senate agree to the same.

Amendment numbered 8:

That the House recede from its disagreement to the amendment of the Senate numbered 8, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$51,102,000*; and the Senate agree to the same.

Amendment numbered 10:

That the House recede from its disagreement to the amendment of the Senate numbered 10, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$450,000*; and the Senate agree to the same.

Amendment numbered 11:

That the House recede from its disagreement to the amendment of the Senate numbered 11, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$10,675,000*; and the Senate agree to the same.

Amendment numbered 12:

That the House recede from its disagreement to the amendment of the Senate numbered 12, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$157,045,000*; and the Senate agree to the same.

Amendment numbered 15:

That the House recede from its disagreement to the amendment of the Senate numbered 15, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$43,066,000*; and the Senate agree to the same.

Amendment numbered 16:

That the House recede from its disagreement to the amendment of the Senate numbered 16, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$325,000*; and the Senate agree to the same.

Amendment numbered 18:

That the House recede from its disagreement to the amendment of the Senate numbered 18, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$6,004,000*; and the Senate agree to the same.

Amendment numbered 20:

That the House recede from its disagreement to the amendment of the Senate numbered 20, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$13,507,000*; and the Senate agree to the same.

Amendment numbered 22:

That the House recede from its disagreement to the amendment of the Senate numbered 22, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$45,686,000*; and the Senate agree to the same.

Amendment numbered 23:

That the House recede from its disagreement to the amendment of the Senate numbered 23, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$244,094,000*; and the Senate agree to the same.

Amendment numbered 26:

That the House recede from its disagreement to the amendment of the Senate numbered 26, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$5,250,000*; and the Senate agree to the same.

Amendment numbered 27:

That the House recede from its disagreement to the amendment of the Senate numbered 27, and agree to the same with an amendment, as follows:

In lieu of the matter proposed by said amendment insert: *; payments for carrying out the provisions of the Renewable Resource Extension Act of 1978 under 3(d) of the Act, $2,765,000*; and the Senate agree to the same.

Amendment numbered 29:

That the House recede from its disagreement to the amendment of the Senate numbered 29, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$8,811,000*; and the Senate agree to the same.

Amendment numbered 30:

That the House recede from its disagreement to the amendment of the Senate numbered 30, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$14,883,000*; and the Senate agree to the same.

Amendment numbered 31:

That the House recede from its disagreement to the amendment of the Senate numbered 31, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$385,000*; and the Senate agree to the same.

Amendment numbered 32:

That the House recede from its disagreement to the amendment of the Senate numbered 32, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$352,182,000*; and the Senate agree to the same.

Amendment numbered 33:

That the House recede from its disagreement to the amendment of the Senate numbered 33, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$13,422,000*; and the Senate agree to the same.

Amendment numbered 34:

That the House recede from its disagreement to the amendment of the Senate numbered 34, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$33,171,000*; and the Senate agree to the same.

Amendment numbered 35:

That the House recede from its disagreement to the amendment of the Senate numbered 35, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$1,250,000*; and the Senate agree to the same.

Amendment numbered 36:

That the House recede from its disagreement to the amendment of the Senate numbered 36, and agree to the same with an amendment, as follows:

In lieu of the matter stricken and the matter inserted by said amendment, insert the following:

For fiscal year 1990, such sums as may be necessary to reimburse the Commodity Credit Corporation for net realized losses sustained, but not previously reimbursed (estimated to be $4,800,000,000 in the President's fiscal year 1990 Budget Request (H. Doc. 101-4)), but not to exceed $4,233,000,000, pursuant to section 2 of the Act of August 17, 1961, as amended (15 U.S.C. 713a-11).

Such funds are appropriated to reimburse the Corporation to restore losses incurred during fiscal years. Such losses for fiscal years 1988 and 1989 include $1,969,000,000 in connection with carrying out the Export Enhancement Program (EEP), $264,000,000 in connection with carrying out the Targeted Export Assistance Program (TEA), $1,500,000,000 in connection with carrying out the Federal Crop Insurance Program, and $31,831,000,000 in connection with carrying out the commodity programs.

And the Senate agree to the same.

Amendment numbered 37:

That the House recede from its disagreement to the amendment of the Senate numbered 37, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$1,932,490,000*; and the Senate agree to the same.

Amendment numbered 38:

That the House recede from its disagreement to the amendment of the Senate numbered 38, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$1,881,920,000*; and the Senate agree to the same.

Amendment numbered 42:

That the House recede from its disagreement to the amendment of the Senate numbered 42, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$3,500,000,000*; and the Senate agree to the same.

Amendment numbered 44:

That the House recede from its disagreement to the amendment of the Senate numbered 44, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$3,500,000*; and the Senate agree to the same.

Amendment numbered 47:

That the House recede from its disagreement to the amendment of the Senate numbered 47, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$430,190,000*; and the Senate agree to the same.

Amendment numbered 50:

That the House recede from its disagreement to the amendment of the Senate numbered 50, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$19,500,000*; and the Senate agree to the same.

Amendment numbered 51:

That the House recede from its disagreement to the amendment of the Senate numbered 51, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$17,500,000*; and the Senate agree to the same.

Amendment numbered 54:

That the House recede from its disagreement to the amendment of the Senate numbered 54, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$11,000,000*; and the Senate agree to the same.

Amendment numbered 55:

That the House recede from its disagreement to the amendment of the Senate numbered 55, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$8,750,000*; and the Senate agree to the same.

Amendment numbered 56:

That the House recede from its disagreement to the amendment of the Senate numbered 56, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$16,500,000*; and the Senate agree to the same.

Amendment numbered 58:

That the House recede from its disagreement to the amendment of the Senate numbered 58, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$3,234,000*; and the Senate agree to the same.

Amendment numbered 63:

That the House recede from its disagreement to the amendment of the Senate numbered 63, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$445,000*; and the Senate agree to the same.

Amendment numbered 65:

That the House recede from its disagreement to the amendment of the Senate numbered 65, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$12,292,000*; and the Senate agree to the same.

Amendment numbered 66:

That the House recede from its disagreement to the amendment of the Senate numbered 66, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$8,824,000*; and the Senate agree to the same.

Amendment numbered 69:

That the House recede from its disagreement to the amendment of the Senate numbered 69, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$4,000,000*; and the Senate agree to the same.

Amendment numbered 71:

That the House recede from its disagreement to the amendment of the Senate numbered 71, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$20,884,000*; and the Senate agree to the same.

Amendment numbered 78:

That the House recede from its disagreement to the amendment of the Senate numbered 78, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$102,529,000*; and the Senate agree to the same.

Amendment numbered 79:

That the House recede from its disagreement to the amendment of the Senate numbered 79, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$860,955,000*; and the Senate agree to the same.

Amendment numbered 80:

That the House recede from its disagreement to the amendment of the Senate numbered 80, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$309,900,000*; and the Senate agree to the same.

Amendment numbered 83:

That the House recede from its disagreement to the amendment of the Senate numbered 83, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$6,118,000*; and the Senate agree to the same.

Amendment numbered 84:

That the House recede from its disagreement to the amendment of the Senate numbered 84, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$875,000*; and the Senate agree to the same.

Amendment numbered 85:

That the House recede from its disagreement to the amendment of the Senate numbered 85, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$560,271,000*; and the Senate agree to the same.

Amendment numbered 87:

That the House recede from its disagreement to the amendment of the Senate numbered 87, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$8,350,000*; and the Senate agree to the same.

Amendment numbered 88:

That the House recede from its disagreement to the amendment of the Senate numbered 88, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$90,000,000*; and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 9, 14, 21, 28, 39, 46, 57, 59, 61, 62, 74, 76, 89, 91, 94, 95 and 96.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and Senate at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 2883) making appropriations for Rural Development, Agriculture, and Related Agencies programs for the fiscal year ending September 30, 1990, and for other purposes, submit the following joint statement to the House and Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report.

CONGRESSIONAL DIRECTIVES

The conferees agree that Executive Branch wishes cannot substitute for Congress' own statements as to the best evidence of congressional intentions—that is, the official reports of the Congress. The conferees further point out that funds in this Act must be used for the purposes for which appropriated as required by section 1301 of title 31 of the United States Code which provides: "Appropriations shall be applied only to the objections for which the appropriations were made except as otherwise provided by law."

Report language included by the House which is not changed by the report of the Senate, and Senate report language which is not changed by the conference are approved by the committee of conference. The statement of the managers, while repeating some report language for emphasis, does not intend to negate the language referred to above unless expressly provided herein.

TITLE I—AGRICULTURAL PROGRAMS

PRODUCTION, PROCESSING AND MARKETING

OFFICE OF THE SECRETARY

FARM AND EXPORT PROGRAMS

Amendment No. 1: Appropriates $400,000 instead of $500,000 as proposed by the House to enable the Secretary of Agriculture to develop a plan for returning the use of the Commodity Credit Corporation to its primary function which was to buy and sell competitively to enable the farmer to offset high American costs and to maintain his fair share of world markets; and to restore the use of section 32 (30 percent of customs receipts) as authorized by law, the use of which is presently suspended, to enable the farmer to secure his income from the user of his products rather than the U.S. Treasury and to enable the American farmer to regain and retain, by competitive sales, our normal share of world markets. The Senate amendment deleted the House language.

COMPILATION OF METHODS USED BY FOREIGN COUNTRIES TO PROTECT THEIR DOMESTIC AGRICULTURE

Amendment No. 2: Appropriates $400,000 instead of $500,000 as proposed by the House to enable the Secretary of Agriculture to investigate and compile a listing of the provisions of existing laws and practices used by foreign countries, by name, to protect their domestic agriculture from foreign competition and to expand their foreign markets in order to assist the Department in regaining and retaining our fair share of world markets, and report to the appropriate committees of Congress within 90 days of enactment of this Act. The Senate amendment deleted the House language.

FARM PROGRAM POLICIES

Information provided by the Library of Congress confirms that during periods of reasonable support levels and inventory positions, commodity markets tend to be stable. In the 1950's and 1960's the Department held excessive inventories of cotton, which eliminated the need to hedge and the need of the trade to hold inventories. At that time the New Orleans, New York and Liverpool cotton exchanges dried up. Doubtless the record would show similar situations for the other basic commodities.

Present policies appear to be moving to the other extreme from that of the 1950's and 1960's. Low commodity prices, low CCC inventories, and reduced acreage all have the potential for moving in the direction of wildly fluctuating commodity markets where profits are made by the speculators at the expense of the farmers.

The conferees agree that it is essential that farm programs be operated in such a way as to ensure adequate income to farmers and stability in the marketplace.

OFFICE OF THE ASSISTANT SECRETARY FOR ADMINISTRATION

Amendment No. 3: Appropriates $470,000 for the Office of the Assistant Secretary for Administration instead of $467,000 as proposed by the House and $474,000 as proposed by the Senate.

WORKING CAPITAL FUND

Amendment No. 4: Deletes the appropriation for the Working Capital Fund as proposed by the Senate. The House proposed an appropriation of $3,750,000.

CONGRESSIONAL RELATIONS

Amendment No. 5: Appropriates $542,000 for congressional relations instead of $497,000 as proposed by the House and $588,000 as proposed by the Senate.

OFFICE OF THE INSPECTOR GENERAL

Amendment No. 6: Appropriates $52,053,000 for the Office of the Inspector General instead of $51,576,000 as proposed by the House and $52,530,000 as proposed by the Senate.

OFFICE OF THE GENERAL COUNSEL

Amendment No. 7: Appropriates $21,828,000 for the Office of the General Counsel instead of $21,316,000 as proposed by the House and $22,340,000 as proposed by the Senate.

ECONOMIC RESEARCH SERVICE

Amendment No. 8: Appropriates $51,102,000 for the Economic Research Service instead of $50,489,000 as proposed by the House and $51,714,000 as proposed by the Senate.

The conference agreement provides $1,500,000 for data collection and analysis of pesticide and chemical use instead of $1,000,000 as proposed by the House and $2,000,000 as proposed by the Senate.

For water quality impact analysis the conference agreement provides $338,000 instead of $225,000 as proposed by the House and $450,000 as proposed by the Senate.

The Senate report earmarked funds for a joint project on regional farm models between ERS, Texas A&M University, and the University of Missouri. This project has been addressed as a Cooperative State Research Service special grant.

NATIONAL AGRICULTURAL STATISTICS SERVICE

The conferees expect the Department to reinstate its quarterly oats stocks estimates reports. Oats producers need this timely information to make informed planting decisions.

AGRICULTURAL RESEARCH SERVICE

Amendment No. 9: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: *$592,339,000*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement appropriates $592,339,000 for the Agricultural Research Service instead of $589,500,000 as proposed by the House and $591,447,000 as proposed by the Senate. The conference agreement is based on the following changes to the budget request:

	House bill	Senate bill	Conference agreement
1. Aflatoxin research	$750,000	$750,000	$750,000
2. Animal germplasm	−900,000	−900,000	−900,000
3. Appalachian Soil and Water Lab, Beckley (WV)		300,000	150,000
4. Aquaculture at South Central Research Center (OK)	150,000		150,000
5. Bacterial contamination in livestock	−700,000	−700,000	−700,000
6. Bacterial contamination and pesticide residues	−2,350,000	−2,350,000	−2,350,000
7. BARC modernization	7,250,000	7,250,000	7,250,000
8. BARC modernization—Powder Mill Road	300,000	300,000	300,000
9. Barley research (ID, ND)		100,000	100,000
10. Blueberry/Cranberry:			
a. New Jersey		70,000	
b. Poplarville, MS		50,000	50,000
11. Calicivirus (OR)		108,000	
12. Center for Applied Aquaculture Research and Training (HI)	463,000	463,000	463,000
13. Center for Food Safety and Post Harvest Technology (MS)		(500,000)	(250,000)
14. Cotton ginning:			
a. Texas		300,000	200,000
b. New Mexico		300,000	200,000
c. Mississippi		300,000	200,000
15. Crop Simulation Laboratory (MS)		500,000	250,000
16. Diagnostic methods	−1,500,000	−1,500,000	−1,500,000
17. Ethanol production (AR)	25,000		25,000
18. Food toxicology (MI)	60,000		60,000
19. Fruit Fly Research Eradication Program (HI)	475,000	475,000	475,000
20. Fruit research at Kearneysville (WV)		300,000	150,000
21. Human nutrition research:			
a. Baylor (TX)	1,500,000	1,500,000	1,500,000
b. Tufts (MA)	500,000		400,000
c. Letterman (CA)	250,000		300,000
d. Beltsville (MD)	500,000		400,000
e. Grand Forks (ND)		575,000	400,000
22. Kenaf (MS)	300,000	500,000	400,000
23. Low input agriculture (MN)	200,000		200,000
24. Meat Animal Research Center (NE)	400,000	400,000	400,000
25. Mycoplasma (MD)	100,000		100,000
26. National Animal Disease Center contsortia grant (IA)		175,000	88,000
27. National Soil Tilth Center, Ames (IA)	500,000	325,000	500,000
28. Northern Great Plains Lab, Mandan (ND)		300,000	200,000
29. Oat research:			
a. Aberdeen, ID		200,000	100,000
b. ND State U		200,000	100,000
30. Peach research (GA)	125,000	125,000	125,000
31. Pear thrip (VT)		50,000	50,000
32. Poisonous Plants Lab, Logan (UT)		245,000	123,000
33. Potato research	500,000	500,000	500,000
a. Aphids	(200,000)	(200,000)	(200,000)
b. Beetles	(300,000)	(300,000)	(300,000)
34. Russian wheat aphid		975,000	750,000
35. Scrapie		500,000	500,000
36. Sheep Experiment Station, Dubois (ID)		450,000	200,000
37. Small Farm Research Center, Booneville (AR)		400,000	200,000
38. Soybean oil-based ink:			
General increase	142,000		70,000
Lehigh University (PA)		100,000	50,000
39. Space Remote Sensing Center (MS)		100,000	
40. Sugar beets (ND)		350,000	300,000
41. Sugarcane (HI)	218,000	218,000	218,000
42. Sweet potato white-fly (FL)	100,000	100,000	100,000
43. Systemic Entomology Lab (MD)	500,000	500,000	500,000
44. Table grapes (CA)	75,000	75,000	75,000
45. Urban pest control (FL)	150,000	150,000	150,000
46. Water quality		−4,000,000	−2,000,000
47. Wheat Quality labs:			
a. Wooster, OH		250,000	150,000
b. Manhattan, KS		250,000	150,000
c. Pullman, WA		250,000	150,000
d. Fargo, ND		250,000	150,000
48. Unspecified increase	99,000		99,000
49. All other	579,318,000	579,318,000	579,318,000
Total	589,500,000	591,447,000	592,339,000

Rangeland grasses.—The conferees are aware of the need for research to make determinations of ways to combat the effect of drought on rangeland grasses and related problems. The conferees will expect the Agricultural Research Service to give special attention to these problems and to allocate adequate levels of funding to the Ft. Keogh Livestock and Range Research Laboratory in Miles City, Montana, for such research.

Kimberly, Idaho.—The conference agreement includes funds to purchase up to 120 acres of land at the Kimberly Research Station in Idaho.

Kenaf.—The conference agreement includes an increase of $400,000 for research on kenaf instead of $300,000 as proposed by the House and $500,000 as proposed by the Senate. The agreement provides for an increase of $325,000 for the Mississippi program and an increase of $75,000 for the Texas program.

Amendment No. 10: Places a limitation of $450,000 each on 10 buildings to be constructed or improved by the Agricultural Research Service instead of $400,000 as proposed by the House and $500,000 as proposed by the Senate.

BUILDINGS AND FACILITIES

Amendment No. 11: Appropriates $10,675,000 for buildings and facilities of the Agricultural Research Service instead of $5,390,000 as proposed by the House and $11,735,000 as proposed by the Senate. The following table reflects the conference agreement.

	House bill	Senate bill	Conference agreement
1. South Central Agriculture Research Center, Lane, OK (preliminary planning)	$150,000		$150,000
2. Salinity Lab at Riverside, CA (construction)	2,250,000		2,000,000
3. National Seed Storage Lab, CO (construction)	1,000,000	$8,750,000	5,500,000
4. Vegetable Lab at Charleston, SC:			
(Planning)	600,000		
(Planning and construction)		1,935,000	1,135,000
5. Bee Lab at Weslaco, TX (planning)	340,000		340,000
6. Fruit and Vegetable Lab at Yakima, WA (construction)	1,000,000	1,000,000	1,000,000
7. Northwest Small Fruit Center (report)	50,000	50,000	50,000
8. Plant Stress Lab at Texas Tech, TX (construction)	(1)	(1)	500,000
Total	5,390,000	11,735,000	10,675,000

[1] House bill included $500,000 and Senate bill included $50,000 under CSRS, buildings and facilities.

COOPERATIVE STATE RESEARCH SERVICE

Amendment No. 12: Provides $157,045,000 for research under the Hatch Act instead of $158,545,000 as proposed by the House and $155,545,000 as proposed by the Senate.

It has come to the attention of the conferees that some States may plan to decrease their monetary commitment to Hatch Act and Smith-Lever programs in an amount equal to any increased appropriations granted by the Congress. This is clearly not the intent of Congress regarding the use of such funds. When additional monies are appropriated for a program, such increases are not meant to relieve the States of their responsibility. The conferees will monitor this situation closely during the coming year.

Amendment No. 13: Provides $17,500,000 for grants for cooperative forestry research as proposed by the Senate instead of $12,975,000 as proposed by the House.

Amendment No. 14: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: *$56,543,000*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement provides $56,543,000 for special research grants instead of $47,835,000 as proposed by the House and $45,838,000 as proposed by the Senate. The following table reflects the conference agreement:

[In thousands of dollars]

	House bill	Senate bill	Conference agreement
Special research grants (Public Law 89–106):			
Acid precipitation	661	661	661
Aflatoxin (IL)	175		88

[In thousands of dollars]

[In thousands of dollars]

	House bill	Senate bill	Conference agreement
World food systems (IN and OH)	360	360	360
Youth Science Camp (WV)		150	75
Total, special research grants	47,835	45,838	56,543

[1] Senate bill and conference agreement includes $173,000 under Seafood and aquaculture harvesting, processing, and marketing.
[2] Senate bill included $50,000 under CSRS, B&F.
[3] House bill provides $200,000 for Maine. Senate bill provides $100,000 for Idaho, Oregon, and Washington.
[4] Senate bill provides up to $500,000 under ERS.
[5] Conference agreement includes $100,000 for Washington, and $250,000 to be divided equally between Oregon, Idaho, and California.
[6] House bill includes $173,000 under food processing research.
[7] Senate bill includes $10,000,000 under amendment No. 20 (Federal administration).

Potato Research.—The conference agreement provides $1,327,000 for potato research, including an increase of $100,000 for work in Maine and an increase of $50,000 for work in Idaho, Oregon and Washington.

Amendment No. 15: Provides $43,066,000 for competitive research grants instead of $40,416,000 as proposed by the House and $45,716,000 as proposed by the Senate. The following table reflects the conference agreement:

	House bill	Senate bill	Conference agreement
1. Plant science	$4,000,000	$8,000,000	$7,850,000
a. Soybean research	(493,000)	(493,000)	(493,000)
b. Alcohol fuels	(514,000)	(514,000)	(514,000)
2. Plant Science Centers	1,700,000		
3. Animal science	4,000,000	6,000,000	5,000,000
a. Brucellosis	(475,000)	(475,000)	(475,000)
4. Pest science	2,000,000	2,000,000	2,000,000
5. Human nutrition	1,000,000	2,000,000	1,500,000
6. Biotechnology	19,016,000	19,016,000	19,016,000
7. Stratospheric ozone	3,700,000	3,700,000	3,700,000
8. Forestry	5,000,000	5,000,000	4,000,000
Total	40,416,000	45,716,000	43,066,000

The conferees are concerned about the current geographical distribution of competitive research grants and request that the Department submit a report to the Committees on Appropriations by January 1, 1990, providing the following: (1) a geographical breakdown of the Department's competitive grant awards for the period 1984–89; (2) an estimate of the potential for increasing the diversity of this funding pattern; and (3) an analysis for the potential for such a coordinated effort to improve the research and science education base in the States.

Amendment No. 16: Provides $325,000 for supplemental and alternative crops research instead of $200,000 as proposed by the House and $425,000 as proposed by the Senate.

Amendment No. 17: Provides $5,368,000 for research under the Critical Agricultural Materials Act as proposed by the Senate instead of $1,168,000 as proposed by the House.

The conference agreement provides $668,000 for research on guayule as proposed by both the House and the Senate. For the National Center for Physical Acoustics the conference agreement provides $2,000,000 as proposed by the Senate instead of $500,000 as proposed by the House. The agreement includes $500,000 which shall be available for contracting with the Center for research work needed by the Department. For additional funding for the Polymer Institute at the University of Southern Mississippi the conference agreement provides $2,700,000 as proposed by the Senate. These funds will be used to complete the construction and to equip the facility.

Amendment No. 18: Provides $6,004,000 for higher education activities instead of $5,754,000 as proposed by the House and $6,254,000 as proposed by the Senate.

The conference agreement includes $250,000 for a competitively awarded grant for the development of a program for infusing aquaculture education into the vocational agriculture curriculum instead of $500,000 as proposed by the Senate.

The conferees agree that funds for institution challenge grants will be made available to institutions on a competitive basis and will require matching support. The Secretary shall require, as a condition of receipt of these grants, that the recipient match the Federal funds on at least a dollar-for-dollar basis from non-Federal sources.

Amendment No. 19: Provides $3,152,000 for the operation of international trade development centers as proposed by the Senate instead of $2,000,000 as proposed by the House. The conference agreement continues all six centers at the fiscal year 1989 funding level.

Amendment No. 20: Provides $13,507,000 for Federal administration of the Cooperative State Research Service instead of $11,248,000 as proposed by the House and $22,348,000 as proposed by the Senate. The following table reflects the conference agreement:

[In thousands of dollars]

	House bill	Senate bill	Conference agreement
Federal Administration:			
Shrimp aquaculture (Hawaii and Mississippi)	3,236	3,236	3,236
Mississippi Valley State University	625	625	625
Ag in classroom	87	187	137
Agriculture biotechnology	225	225	225
Peer panels	250	250	250
Office of grants and program systems	575	575	575
Center for Agricultural and Rural Development (Iowa)	750	750	750
1890 capacity building	5,500	5,500	5,500
Water quality [1]		10,000	1,709
Geographic information system		1,000	500
Total, Federal Administration	11,248	22,348	13,507

[1] Includes $1,000,000 (University of ND), $500,000 (IL), and $209,000 (IA).

The conference agreement includes $500,000 for the geographic information system project instead of $1,000,000 as proposed by the Senate. The conferees will expect that these funds will be matched by State and local contributions, including in-kind. In addition, the conferees will expect the Department to report to the appropriate committees of Congress on how these funds are being used. The conferees agree that the funds are to be distributed equally among the Arkansas, Georgia and Chesapeake Bay projects.

Amendment No. 21: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: *$341,994,000*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement appropriates a total of $341,994,000 for the Cooperative State Research Service instead of $319,625,000 as proposed by the House and $341,630,000 as proposed by the Senate.

BUILDINGS AND FACILITIES

Amendment No. 22: Appropriates $45,686,000 for buildings and facilities of the Cooperative State Research Service instead of $22,960,000 as proposed by the House and $49,414,000 as proposed by the Senate.

Facilities funded by this appropriation shall be based on a matching formula of not to exceed 50 percent Federal and not less than 50 percent State funding, including funds received by the State from private sources and from local units of government. Construction of such facilities shall be based on a firm indication of local support, including a commitment for paying all operating costs of the facility. Further, the research program to be carried out at these facilities shall be complimentary to the overall programs of the Department of Agriculture.

The following table reflects the conference agreement:

	House bill	Senate bill	Conference agreement
1. Montana State University Bioscience Center: (Planning)	$500,000		$250,000
2. Center for Tropical and Subtropical (HI): (Planning)	1,135,000	$1,135,000	1,135,000
3. Virginia and Maryland Regional College of Veterinary Medicine: (Construction)	480,000		480,000
4. University of Nebraska Center for Advanced Technology: (Planning and construction)	2,000,000	4,000,000	3,000,000
5. University of Wisconsin, Agriculture Biotechnology and Genetics Building: (Planning)	600,000	600,000	600,000
6. Plant Science Center at Kansas State University: (Construction)	500,000	4,500,000	3,000,000
7. Iowa State University Nutrition Research Center: (Planning and construction)	1,250,000	2,755,000	2,300,000
8. Texas A&M (Houston) Institute of Bioscience and Technology: (Construction)	500,000	5,600,000	3,000,000
9. Center for Molecular Biology, Rutgers University: (Preliminary planning)	90,000		90,000
10. Agriculture Biotech Facility at Virginia Tech: (Preliminary planning)	225,000		113,000
11. National Soybean Lab at University of Illinois: (Planning and construction)	1,250,000	1,395,000	1,323,000
12. Food Toxicology Center at Michigan State: (Planning and construction)	2,250,000		3,000,000
13. University of Georgia, Biocontainment Facility: (Construction)	500,000	1,496,000	998,000
14. Washington State University Food and Human Nutrition Center: (Construction)	2,135,000	2,000,000	2,135,000
15. Gonzaga University Center for Information and Technology Transfer (WA): (Construction)	625,000	323,000	625,000
16. National Center for Food and Industrial Agriculture Products (IA):			
(Construction)	1,700,000	2,962,000	1,944,000
(Renovation)	1,300,000	1,300,000	1,300,000
17. University of Florida Biotech Institute: (Construction)	500,000	2,700,000	1,550,000
18. South Dakota State University, Northern Plains Biostress Lab:			
(Planning)	300,000		
(Construction)		3,100,000	1,700,000
19. University of North Dakota, Earth Systems Science: (Construction)	500,000	4,200,000	4,200,000
20. North Dakota State University Industrial Agriculture and Communications Center:			
(Planning and construction)	500,000		
(Construction)		2,408,000	2,333,333
21. Center for Nutrition at Wake Forest, North Carolina: (Planning and construction)	2,890,000		2,890,000
22. Plant Stress Lab at Texas Tech: (Construction)	500,000	50,000	(1)
23. Biotechnology Lab at Utah State University: (Report)	50,000	50,000	(2)
24. College of Veterinary Medicine, Animal Disease Biotechnology Facility at Washington State University: (Report)	50,000		(2)
25. Rice Germplasm Center at Stuttgart, Arkansas:			
(Report)	50,000		(2)
(Planning)		100,000	
26. Biotechnology Facility, North Carolina: (Report)	50,000	50,000	(2)
27. Building Consolidation, University of Rhode Island: (Report)	50,000		(2)
28. Grape Importation Facility, University of California at Davis: (Planning)	130,000		130,000
29. National Center for Equine and Bovine Biotechnology Research (OK): (Planning)	300,000		300,000
30. University of Maine (new building to consolidate six separate buildings): (Report)	50,000	50,000	(2)
31. Center for Alternative Pest Control Research (AR): (Construction)		550,000	425,000
32. Hettinger Research Teaching Laboratory (ND): (Construction)		150,000	150,000
33. Kimberly Research Station (ID): (Land purchase)		360,000	(3)
34. Masardis Research Farm (ME): (Construction)		230,000	115,000
35. National Laboratory for Environmentally Sound Production Agriculture (GA): (Report)		50,000	(2)
36. Natural Products Laboratory (MS):			
(Planning and construction)		3,800,000	3,800,000
(Consortium)		250,000	125,000
37. Plant Science Greenhouse Complex (ND): (Report)		50,000	(2)
38. Poultry Center for Excellence (AR): (Planning)		100,000	(2)
39. Poultry Lab and Isolation Facility (AR): (Construction)		250,000	250,000
40. Poultry Research Center (WV): (Construction)		1,500,000	1,500,000
41. Tree Physiology and Maple Research Lab (VT): (Construction)		750,000	375,000
42. Nursery Crop Research Station (TN): (Planning and construction)		500,000	250,000
43. Idaho Biotechnology Facility: (Report)		50,000	(2)
44. Washington State University Pesticide Research Laboratory: (Report)		50,000	(4)
45. Molecular and Cellular Biotech Facility (IN)			(2)
46. Fund for reports on footnote 2 items			300,000
Total	22,960,000	49,414,000	45,686,000

[1] Item funded under ARS, B&F.
[2] Fund for reports (No. 46).
[3] Item funded under ARS.
[4] Funded as a CSRS special grant.

The conference agreement includes $300,000 for reports on 11 proposed facilities, rather than a specific amount for each facility.

The conference agreement completes the funding for the Washington State University Food and Human Nutrition Center (WA), Gonzaga University Center for Information and Technology Transfer (WA), University of North Dakota Earth Systems Science Center (ND), Hettinger Research Technology Laboratory (ND), Poultry Laboratory and Isolation Facility (AR), and Poultry Research Center (WV).

EXTENSION SERVICE

Amendment No. 23: Provides $244,094,000 for payments under the Smith-Lever Act instead of $246,594,000 as proposed by the House and $241,594,000 as proposed by the Senate.

It has come to the attention of the conferees that some States may plan to decrease their monetary commitment to Hatch Act and Smith-Lever programs in an amount equal to any increased appropriations granted by the Congress. This is clearly not the intent of Congress regarding the use of such funds. When additional monies are appropriated for a program, such increases are not meant to relieve the States of their responsibility. The conferees will monitor this situation closely during the coming year.

Amendment No. 24: Restores House language providing $3,500,000 for the urban gardening program.

Amendment No. 25: Restores House language providing $970,000 for the farm safety program.

Amendment No. 26: Provides $5,250,000 for payments for a water quality program instead of $4,000,000 as proposed by the House and $6,500,000 as proposed by the Senate.

Amendment No. 27: Provides $2,765,000 for renewable resource extension work as proposed by the Senate, and makes a technical correction.

Amendment No. 28: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: *$363,146,000.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement appropriates $363,146,000 for the Extension Service, excluding Federal administration, instead of $361,631,000 as proposed by the House and $357,426,000 as proposed by the Senate.

Amendment No. 29: Appropriates $8,811,000 for Federal administration of the Extension Service instead of $7,319,000 as proposed by the House and $9,245,000 as proposed by the Senate. The following table reflects the conference agreement for Federal administration and recommends not to exceed the following amounts:

[In thousands of dollars]

	House bill	Senate bill	Conference agreement
Federal Administration and special grants:			
General administration	4,982	4,982	4,982
Pilot tech. transfer (OK, MS)	333	333	333
Rural development (NE)	190	190	190
Rural development (OK)	433		433
ATTRA		1,100	
Crambe/rapeseed (NE)	65	65	65
Ag. development Pacific (HI)	650	650	650
New England vertabrate (MA)	95		95
Project future (MN)	138		138
Rural rehabilitation (GA)	258	258	258
Agricultural film (NY)	175	175	175
Rural education pilot (ND)		852	852
Presgue Isle (ME)		140	140
Crop simulation		500	500
Total, Federal Administration	7,319	9,245	8,811

NATIONAL AGRICULTURAL LIBRARY

Amendment No. 30: Appropriates $14,883,000 for the National Agricultural Library instead of $14,448,000 as proposed by the House and $14,947,000 as proposed by the Senate.

Amendment No. 31: Earmarks $385,000 for the National Center for Agricultural Law Research and Information at the Leflar School of Law in Fayetteville, Arkansas, instead of $400,000 as proposed by the Senate. The House had no similar provision.

The conferees direct that no more than 10 percent of these funds will be retained by the National Agricultural Library for administrative expenses.

ANIMAL AND PLANT HEALTH INSPECTION SERVICE

SALARIES AND EXPENSES

Amendment No. 32: Appropriates $352,182,000 for salaries and expenses of the Animal and Plant Health Inspection Service instead of $342,146,000 as proposed by the House and $352,768,000 as proposed by the Senate.

The following table sets forth the conference agreement by program:

[In thousands of dollars]

	House bill	Senate bill	Conference agreement
1. Plant disease and pest control:			
(a) Plant protection programs:			
(1) Africanized bee	1,950	1,950	1,950
(2) Bio control	5,509	5,950	5,950
(3) Boll weevil	9,600	13,135	13,135
(4) Golden nematode	800	800	800
(5) Grasshopper and Mormon cricket	5,950	3,850	3,850
Reserve fund	—	5,000	5,000
(6) Gypsy moth	5,442	5,442	5,442
(7) Honeybee pest	250	500	375
(8) Imported Fire ant	5,000	5,000	5,000
(9) International programs	2,153	2,153	2,153
(10) Mediterranean fruit fly	10,256	9,856	10,266
(11) Mexican fruit fly	1,717	1,553	1,717
(12) Miscellaneous plant pests	1,124	1,124	1,124
(13) Noxious weeds	597	1,197	897
(14) Pest detection	3,928	3,928	3,928
(15) Pink bollworm	1,700	1,700	1,700
(16) Russian wheat aphid	—	1,588	1,000
(17) Witchweed	5,281	5,281	5,281
Total, plant protection	61,257	70,007	69,558
(b) Agricultural quarantine inspection	66,468	66,468	66,468
Total, plant disease and pest control	127,725	136,475	136,026
2. Animal disease and pest control:			
(a) Animal health programs:			
(1) Animal welfare	7,567	7,567	7,567
(2) Brucellosis eradication	61,841	63,729	62,786
(3) Cattle ticks	6,258	4,193	6,258
(4) Animal disease detection	5,394	5,394	5,394
(5) Foot-and-Mouth disease (Darien Gap)	3,053	3,053	3,053
(6) Horse protection	161	161	161
(7) Import-export inspection	8,604	8,604	8,604
(8) International programs	2,151	2,151	2,151
(9) Animal health compliance and enforcement	14,694	14,694	14,694
(10) National poultry improvement plan	219	219	219
(11) Poultry diseases	643	643	643
(12) Pseudorabies	2,950	3,725	3,338
(13) Scrapie	—	1,500	1,100
(14) Screwworm	32,045	32,045	32,045
(15) Swine health protection	3,265	3,265	3,265
(16) Tuberculosis eradication	3,501	3,501	3,501
(17) Veterinary diagnositics	12,371	12,371	12,371
(18) Miscellaneous animal diseases	1,998	1,772	1,300
Total, animal health	166,715	168,587	168,450
(b) Veteranary biologics	8,641	8,641	8,641
(c) Animal damage control	29,815	29,815	29,815
Total, animal disease and pest control	205,171	207,043	206,906
3. Biotechnology	4,750	4,750	4,750
4. Contingencies:			
(a) Plant disease and pest control	2,250	2,250	2,250
(b) Animal disease and pest control	2,250	2,250	2,250
Total, contingencies	4,500	4,500	4,500
Total, salaries and expenses	342,146	352,768	352,182

The conference agreement provides $29,815,000 for animal damage control activities. The conferees expect APHIS to give consideration to individual increases provided in the House and Senate reports and to review ongoing activities to assure their continued viability. Further, the conferees expect animal damage control activities to be cost-shared with non-Federal participants. The conferees also expect APHIS to work with universities where necessary to develop curricula in wildlife management that will further the science of animal damage control.

For the Mediterranean fruit fly program the conference agreement provides $10,256,000. For test eradication of fruit fly infestations in Hawaii, the conferees have provided $400,000 for the cost of releasing sterile fruit flies on Kauai. In addition, the conferees expect APHIS to provide approximately 50 million sterile flies per week for this test eradication. Also included in the amount provided are funds to continue the Caribbean fruit fly protocol.

For the noxious weeds program the conferees have provided $897,000. This level includes $100,000 for hydrilla control in Imperial Valley, California, and $450,000 for a common crupina eradication program.

The conferees expect APHIS to enter into cooperative agreements with universities and other appropriate entities where such agreements will aid in the control of the Russian wheat aphid.

For the boll weevil eradication program the conference agreement provides $13,135,000. The conferees are aware of the escalating costs of the control efforts and expect APHIS to work with producers to find cost-efficient methods in the program. The conferees expect the program to continue as a cost-share program with the Federal share at no more than 30 percent.

Bunchy top banana virus, a serious disease that has nearly destroyed the banana industry in Guam and Australia, is posing a serious threat in Hawaii since its introduction in July 1989. Using funds available in fiscal year 1990, the conferees will expect APHIS to provide assistance to the State of Hawaii in its efforts to identify outbreaks and eradicate this disease as well as enforce necessary quarantines to prevent reintroduction of this disease.

The conferees agree to delete the earmark for calicivirus in miscellaneous animal diseases as proposed by the Senate.

BUILDINGS AND FACILITIES

Amendment No. 33: Appropriates $13,422,000 for buildings and facilities of the Animal and Plant Health Inspection Service instead of $15,172,000 as proposed by the House and $11,672,000 as proposed by the Senate.

AGRICULTURAL MARKETING SERVICE

MARKETING SERVICES

Amendment No. 34: Appropriates $33,171,000 for the Agricultural Marketing Service, Marketing Services, instead of $33,187,000 as proposed by the House and $33,155,000 as proposed by the Senate.

The conferees will expect the Department to initiate market development studies on the Chicago and Maine Terminal Markets and to continue work on the Columbia, South Carolina project. The conference agreement also provides $100,000 for the Horticultural Producers Federation marketing program.

PAYMENTS TO STATES AND POSSESSIONS

Amendment No. 35: Appropriates $1,250,000 for Payments to States and Possessions instead of $942,000 as proposed by the House and $1,500,000 as proposed by the Senate.

AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE

SALARIES AND EXPENSES

The House recedes from its position regarding the transfer of $100,000 of funds budgeted for the Arkansas State Office of the ASCS to the State Office of the Soil Conservation Service for services.

COMMODITY CREDIT CORPORATION

REIMBURSEMENT FOR NET REALIZED LOSSES

Amendment No. 36: Appropriates $4,233,000,000 for reimbursement of net realized losses of the Commodity Credit Corporation as proposed by the House instead of $4,800,000,000 as proposed by the Senate.

The agreement also modifies House language regarding examples of the types of losses incurred during fiscal years 1988 and 1989.

TITLE II—RURAL DEVELOPMENT PROGRAMS

RURAL DEVELOPMENT ASSISTANCE

FARMERS HOME ADMINISTRATION

RURAL HOUSING INSURANCE FUND

Amendment No. 37: Provides $1,932,490,000 for loans from the Rural Housing Insurance Fund instead of $1,944,990,000 as proposed by the House and $1,919,990,000 as proposed by the Senate. The conference agreement includes the following loan levels:

Low-income housing (502)	$1,329,210,000
Unsubsidized housing loans	(50,000,000)
Site development (524)	570,000
Rental housing (515)	579,900,000
Housing repair (504)	11,330,000
Farm labor (514)	11,480,000
Total	1,932,490,000

Amendment No. 38: Provides that $1,881,920,000 of the loans from the Rural Housing Insurance Fund shall be for subsidized interest loans to low-income borrowers instead of $1,894,420,000 as proposed by the House and $1,869,420,000 as proposed by the Senate.

AGRICULTURAL CREDIT INSURANCE FUND

Amendment No. 39: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter stricken and inserted by said amendment, insert: *$13,500,000 shall not become available for obligation until October 1, 1990, (for the purposes of section 202 of the Balanced Budget and Emergency Deficit Control Reaffirmation Act of 1987 (Public Law 100-119, September 29, 1987), to the extent that this action has the effect of transferring an outlay of the United States from one fiscal year to an adjacent fiscal year, such transfer is a necessary (but secondary) result of a significant policy change) and $475,500,000*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement provides that of the $569,000,000 available for farm ownership loans, $475,500,000 shall be for guaranteed loans instead of $474,000,000 as proposed by the House and $519,000,000 as proposed by the Senate.

The agreement also makes $80,000,000 available for direct farm ownership loans in fiscal year 1990 instead of $95,000,000 as proposed by the House and $50,000,000 as proposed by the Senate. To effectuate this agreement, the conferees agree to defer $13,500,000 in direct loans until fiscal year 1991.

Amendment No. 40: Provides a total of $7,000,000 for water development, use, and conservation loans as proposed by the Senate instead of $14,000,000 as proposed by the House.

Amendment No. 41: Provides that of the total available for water development, use, and conservation loans, $1,500,000 shall be for guaranteed loans as proposed by the Senate instead of $3,000,000 as proposed by the House.

Amendment No. 42: Provides a total of $3,500,000,000 for operating loans instead of $3,523,000,000 as proposed by the House and $3,467,500,000 as proposed by the Senate. Both the House and Senate bills provide that of the total amount available for operating loans, $2,600,000,000 shall be for guaranteed loans.

Amendment No. 43: Provides $1,000,000 for Indian tribe land acquisition loans as proposed by the Senate instead of $2,000,000 as proposed by the House.

Amendment No. 44: Provides $3,500,000 for matching grants for State mediation programs instead of $3,000,000 as proposed by the House and $4,000,000 as proposed by the Senate.

Amendment No. 45: Deletes Senate language which required the Secretary, by October 15, 1989, to allocate to the States the full amount of farm operating loans authorized by this Act in a manner that would provide each State with the same percentage of the total as it used in fiscal year 1989.

The conferees are concerned about unused direct operating loan funds. Despite farmers' eligibility for these funds and their efforts to obtain them, FmHA maintains a substantial unobligated balance of direct operating loan funds. The Department's policy of holding back a reserve of funds in Washington serves to delay the obligation of these funds until after the season when the farmers most need them. The conferees direct the Department to obligate these funds in a timely manner so that all farmers who are eligible can obtain the funds when they are needed.

Furthermore, the conferees direct the Department to pool operating and ownership funds—both direct and guaranteed—which are unused by States, and distribute them to needy States early enough in the year to ensure that all the funds will be used.

Amendment No. 46: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: *$4,120,159,000*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement appropriates $4,120,159,000 for reimbursement for net realized losses and interest subsidies of the Agricultural Credit Insurance Fund instead of $4,259,000,000 as proposed by the House and $4,462,159,000 as proposed by the Senate.

RURAL DEVELOPMENT INSURANCE FUND

Amendment No. 47: Provides $430,190,000 for water and sewer facility loans instead of $445,380,000 as as proposed by the House and $415,000,000 as proposed by the Senate. Both the House and Senate bills provided $75,000,000 of the foregoing amount shall be for guaranteed loans.

Amendment No. 48: Provides a total of $119,700,000 for comminuty facility loans as proposed by the House instead of $145,700,000 as as proposed by the Senate.

Amendment No. 49: Provides that of the total amount available for community facility loans, $24,000,000 shall be for guaranteed loans as proposed by the House instead of $50,000,000 as proposed by the Senate.

RURAL DEVELOPMENT LOAN FUND

Amendment No. 50: Provides a total loan level of $19,500,000 for the Rural Development Loan Fund instead of $14,000,000 as proposed by the House and $25,000,000 as proposed by the Senate.

Amendment No. 51: Appropriates $17,500,000 for the Rural Development Loan Fund instead of $12,000,000 as proposed by the House and $23,000,000 as proposed by the Senate.

RURAL WATER AND WASTE DISPOSAL GRANTS

Amendments No. 52 and 53: Appropriate $209,395,00 for rural water and waste disposal grants. The conference agreement deletes rewording of the appropriation language as proposed by the Senate, and restores House language.

The conferees are aware of the urgent need to upgrade the water and sewer services of the town of Clinton, Tennessee. The Department shall work with the town of Clinton to assure that as soon as each incremental stage of the project is available for initiation, the Department will make the necessary grant funds available.

The conferees agree that the Department may use unused rural water and sewer grant and loan funds returned from other States into the national pool to fund the high priority Kimzey Regional Water District proposal.

RURAL HOUSING FOR DOMESTIC FARM LABOR

Amendment No. 54: Appropriates $11,000,000 for rural housing for domestic farm labor instead of $12,500,000 as proposed by the House and $9,513,000 as proposed by the Senate.

MUTUAL AND SELF-HELP HOUSING

Amendment No. 55: Appropriates $8,750,000 for mutual and self-help housing instead of $9,500,00 as proposed by the House and $8,000,000 as proposed by the Senate.

RURAL DEVELOPMENT GRANTS

Amendment No. 56: Appropriates $16,500,000 for rural development grants instead of $6,500,000 as proposed by the House and $26,500,000 as proposed by the Senate. The conferees concur in the funding levels for the projects earmarked in the House report. The conferees agree that the $500,000 for Oklahoma shall be for Hughes County.

Amendment No. 57: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the sum named in said amendment, insert: *$1,250,000*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement earmarks $1,250,000 for grants to statewide private, nonprofit public television systems in predominately rural States instead of $2,000,000 as proposed by the Senate.

SALARIES AND EXPENSES

Amendment No. 58: Earmarks $3,234,000 for the circuit rider program instead of $3,068,000 as proposed by the House and $3,400,000 as proposed by the Senate.

Amendment No. 59: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which provides $1,000,000 to carry out the Lower Mississippi Delta Development Act and extends the date for submission of the Commission's interim report to October 16, 1989.

This Commission was activated in the fiscal year 1989 Appropriations Act and was slow in getting organized—it was six months before an executive director was selected and most of the staff were not selected until last May. $2,000,000 was appropriated in last year's Act and an additional $1,000,000 was authorized.

The appropriation was justified to Congress as a means of restoring the economy of the Mississippi River Delta, which had gone from one of the richest and more prosperous areas to one of the poorest in nine years.

To date, only an interim report has been made without reference to efforts to correct apparent causes of problems.

To accomplish its purpose, the Commission must work to correct the known causes of the problems which have resulted in the area, with perhaps the richest and most fertile farmland in the Nation, becoming the poorest in nine years, largely as a result of the Nation's decisions on agriculture as shown by the House report on this year's Appropriations bill, H.R. 2883.

That report points out:

"Agriculture, our largest employer at home, our biggest market for industry and labor, our biggest dollar earner in world trade, has been permitted to go down the drain during the last decade.

"For 48 years, farm prices were maintained to offset costs and our surplus sold in world trade at competitive prices,

"Instead of using section 32 (30 percent of customs receipts) as intended to promote exports and to support the price with special attention to perishable commodities, they divide it among consumer programs.

"Instead of the farmer receiving a fair price from the buyer, as he did for 48 years, he must look to a check from the U.S. Treasury.

"After eight years of current policy, what is the result:

"The national debt of $932 billion in 1981 has tripled to over $2.8 trillion.

"Our trade deficit has gone from $19.3 billion in 1980 to $170.0 billion in the red in 1987 and $119.8 billion in the red in 1988.

"For the first time since 1914, the United States is a debtor nation, the largest debt any nation ever had throughout history.

"Since 1981 some 811 banks and 586 savings and loan associations have gone bankrupt.

"This year, the farmer's production costs are being raised by an increase in minimum wages and increases in fuel, chemicals, seed and other items the farmer requires to produce and market his crop.

"AMERICA FOR SALE

"During the past five years nearly $800 billion in foreign capital washed across the United States buying up companies, banks, luxury hotels, retail chains, building new factories, establishing bank accounts, and financing a major portion of the national debt. This has helped turn the United States from the world's largest creditor to the world's largest debtor.

"According to information from the Congressional Research Service, more than 300,000 farmers (12 percent) have been forced off their farms since 1981. Moving to town has added to the problems of the cities which are already heavily burdened with serious social problems.

"Further, the Farmers Home Administration adopted a policy of requiring the farm borrower to show that he could pay off the new loan, plus all past due loans, in a single crop year. Farmers are the only class of borrowers who are required to live with such stringent rules. Not even foreign borrowers from the United States are treated so harshly.

In addition, the Delta is also faced with an action of the Federal Government to let the EPA, in consultation with the Fish and Wildlife Service, determine wetlands, rather than a determination based on the historical use of the land.

A recovery will be dependent upon a return to a prosperous agriculture, which in turn requires a recapturing of domestic and foreign markets as well as a growing industrial development. This can only be accomplished by the government providing the same consideration as other nations give to their agriculture and industry.

The Commission must tackle the known problems—which again come from our government turning over a large share of our domestic market to foreign imports as well as a major share of our normal world markets.

The $1,000,000, which is the second and last payment authorized, shall be made available only upon a resolution by the Commission to attack these known causes and a certificate of such fact made to the appropriate committees of the Congress.

RETAINAGE REQUIREMENTS

The conferees also concur in the House position regarding retainage requirements.

RURAL ELECTRIFICATION ADMINISTRATION

RURAL ELECTRIFICATION AND TELEPHONE REVOLVING FUND LOAN AUTHORIZATIONS

Amendment No. 60: Deletes Senate language which required the REA to use unobligated loan authorizations from prior years to reduce the backlog of applications. However, the conferees expect that full use be made of these previously authorized funds to reduce the backlog of loan applications.

RURAL ECONOMIC DEVELOPMENT SUBACCOUNT

Amendment No. 61: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following:

RURAL ECONOMIC DEVELOPMENT SUBACCOUNT

For grants and loans authorized under section 313 of the Rural Electrification Act, for the purpose of promoting rural economic development and job creation projects, $5,000,000, to remain available until expended: Provided, That this amount will be in addition to any amounts generated by the interest differential on voluntary cushion of credit payments made by REA borrowers.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement appropriates $5,000,000 for the rural economic development subaccount instead of $11,357,000 as proposed by the Senate. The conferees expect that the local REA cooperatives will continue to participate financially.

SALARIES AND EXPENSES

Amendment No. 62: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the sum named in said amendment, insert: *$500,000*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement requires that not less than $500,000 of the REA salaries and expenses funds shall be used to provide community and economic development technical assistance to rural electric and telephone systems, and such assistance shall be made available within 90 days of enactment.

The conferees expect that compliance of loan fund and accounting reviews will continue to be provided by Rural Electrification Administration personnel and that the cost of such reviews will not be imposed on any borrower financed under the Rural Electrification Act. This function has always been performed by Rural Electrification field accountants because such reviews assure compliance with loan purposes and benefit the government in providing loan security on funds authorized for insured, guaranteed and rural telephone bank loans.

CONSERVATION

OFFICE OF THE ASSISTANT SECRETARY FOR NATURAL RESOURCES AND ENVIRONMENT

Amendment No. 63: Appropriates $445,000 for the Office of the Assistant Secretary for Natural Resources and Environment instead of $422,000 as proposed by the House and $467,000 as proposed by the Senate.

SOIL CONSERVATION SERVICE

CONSERVATION OPERATIONS

Amendment No. 64: Provides a limitation of not less than $355,000,000 for personnel compensation and benefits of the Soil Conservation Service as proposed by the Senate instead of $370,000,000 as proposed by the House.

Within the amount provided for conservation operations the conference agreement includes $250,000 for the Michigan subirrigation study; $490,000 for the North Dakota windbreak project; $100,000 for work on the Red Rock Reservoir, Iowa, sedimentation project; $75,000 for expanding work at the Louisana State University Rice Research Station; $375,000 for work on the Plum Bayou project in Arkansas; $176,000 for Alcorn State, Mississippi; and $150,000 for the Idaho abatement plan.

RIVER BASIN SURVEYS AND INVESTIGATIONS

Amendment No. 65: Appropriates $12,292,000 for river basin surveys and investigations instead of $12,533,000 as proposed by the House and $12,051,000 as proposed by the Senate.

WATERSHED PLANNING

Amendment No. 66: Appropriates $8,824,000 for watershed planning instead of $8,997,000 as proposed by the House and $8,651,000 as proposed by the Senate.

WATERSHED AND FLOOD PREVENTION OPERATIONS

Amendment No. 67: Appropriates $26,271,000 for the Public Law 534 watershed program as proposed by the Senate instead of $27,271,000 as proposed by the House.

Amendment No. 68: Appropriates $20,000,000 for emergency watershed work as proposed by the Senate instead of $15,000,000 as proposed by the House.

Amendment No. 69: Provides $4,000,000 in loans for the watershed program instead of $7,949,000 as proposed by the House and $3,755,000 as proposed by the Senate.

The conferees agree to the urgent need for providing funding for the Wheeling Creek, Upper Buffalo Creek, Patterson Creek and Lost River, West Virginia, watershed and flood control projects. As soon as each incremental stage of the projects is available for initiation, the conferees will expect SCS to make the necessary funds available.

RESOURCES CONSERVATION AND DEVELOPMENT

Amendment No. 70: Provides $600,000 in loans for the resource conservation and development program as proposed by the Senate instead of $1,207,000 as proposed by the House.

GREAT PLAINS CONSERVATION PROGRAM

Amendment No. 71: Appropriates $20,884,000 for the Great Plains conservation program instead of $20,474,000 as proposed by the House and $21,293,000 as proposed by the Senate.

TITLE III—DOMESTIC FOOD PROGRAMS

FOOD AND NUTRITION SERVICE

CHILD NUTRITION PROGRAMS

Amendment No. 72: Provides a total of $4,887,494,000 for the child nutrition programs, including transfer of funds from section 32, as proposed by the Senate instead of $4,869,804,000 as proposed by the House.

The conference agreement provides for the child nutrition programs at the following annual rates:

Total obligational authority

	Amount
Child nutrition programs:	
School lunch program	$3,115,074,000
School breakfast program	563,926,000
State administrative expenses	60,651,000
Summer food service program	170,883,000
Child care food program	757,288,000
Commodity procurement	207,837,000
Nutrition studies and surveys	3,185,000
Income verification of food service claims	3,600,000
Nutrition education and training	5,000,000
Homeless pilot	50,000
Total available	4,887,494,000

Amendment No. 73: Appropriates $730,940,000 for the child nutrition programs as proposed by the Senate instead of $713,250,000 as proposed by the House.

Amendment No. 74: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert the following: *: Provided further, That $500,000 shall be available to establish the Food Service Management Institute at the University of Mississippi.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement provides $500,000 for activities related to the Food Service Management Institute to be established at the University of Mississippi. The University may contract with and work in conjunction with others to accomplish the goals and objectives of the Institute.

SPECIAL SUPPLEMENTAL FOOD PROGRAM FOR WOMEN, INFANTS, AND CHILDREN (WIC)

Amendment No. 75: Provides that up to $2,000,000 may be used to carry out the farmer's market coupon demonstration project as proposed by the House instead of $2,800,000 as proposed by the Senate. The conferees expect the Food and Nutrition Service to submit a report to the appropriate committees of Congress on the effectiveness of the farmer's market coupon demonstration project.

FOOD STAMP PROGRAM

Amendment No. 76: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and

concur in the amendment of the Senate with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: *$15,707,096,000*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement appropriates a total of $15,707,096,000 for the food stamp program instead of $14,200,235,000 as proposed by the House and $15,400,235,000 as proposed by the Senate. The conference agreement includes the Administration's mid-year estimates for the food stamp program and the Puerto Rico block grant.

Amendment No. 77: Provides a limitation of $10,825,000 on the amount of funds available under the Puerto Rico Nutrition Assistance block grant for the Cattle Tick Eradication Project as proposed by the House instead of $12,825,000 as proposed by the Senate.

TITLE IV—INTERNATIONAL PROGRAMS

Foreign Agricultural Service

Amendment No. 78: Appropriates $102,529,000 for the Foreign Agricultural Service instead of $98,787,000 as proposed by the House and $106,270,000 as proposed by the Senate.

The conferees agree that up to $350,000 of this appropriation may be used to complete the trade missions and conduct the necessary follow-up visits in connection with such visits. Such funds shall be in addition to the $200,000 specifically appropriated for trade missions.

The conferees note that the United States lags behind the competition as an exporter of value-added and high-value products. The conferees believe FAS, in conjunction with private industry, should increase value-added and high-value product promotion and exports. The conferees will expect FAS to analyze ways to accomplish this goal and provide the appropriate committees of Congress with a report within 120 days of enactment of this Act on the methods available and the actions that the Service is taking to implement them.

PUBLIC LAW 480

Amendment No. 79: Provides for a program level of $860,955,000 for titles I and III of the Public Law 480 program instead of $860,900,000 as proposed by the House and $878,055,000 as proposed by the Senate.

Amendment No. 80: Appropriates $309,900,000 for titles I and III instead of $309,845,000 as proposed by the House and $327,000,000 as proposed by the Senate.

Amendment No. 81: Provides for a program level of $682,100,000 for Title II of the Public Law 480 program as proposed by the House instead of $665,000,000 as proposed by the Senate.

Amendment No. 82: Appropriates $682,100,000 for title II as proposed by the House instead of $665,000,000 as proposed by the Senate.

Office of International Cooperation and Development

Amendment No. 83: Appropriates $6,118,000 for the Office of International Cooperation and Development instead of $4,376,000 as proposed by the House and $6,725,000 as proposed by the Senate.

The conference agreement provides $1,492,000 for the middle-income countries training program as proposed by the Senate. The agreement also provides $125,000 for the U.S./Ireland exchange instead of $250,000 as proposed by the Senate. Funds for FODAG/Rome are included under FAS.

For Operation FAST the agreement provides $500,000 instead of $375,000 as proposed by the House and $750,000 as proposed by the Senate. For development, planning and analysis the agreement provides $470,000 as proposed by the House instead of $535,000 as proposed by the Senate.

SCIENTIFIC ACTIVITIES OVERSEAS

(FOREIGN CURRENCY PROGRAM)

Amendment No. 84: Appropriates $875,000 for scientific activities overseas instead of $750,000 as proposed by the House and $1,000,000 as proposed by the Senate.

TITLE V—RELATED AGENCIES

Department of Health and Human Services

Food and Drug Administration

SALARIES AND EXPENSES

Amendment No. 85: Appropriates $560,271,000 for salaries and expenses of the Food and Drug Administration instead of $550,171,000 as proposed by the House and $581,871,000 as proposed by the Senate.

Within the increase provided, the conferees expect the Food and Drug Administration to implement management improvement systems and automated data processing enhancements necessary for centralizing its planning, ongoing oversight, and allocation of limited resources to priority activities among its various centers and field offices. Management information and automated processing systems development should include effective controls for review of foods, human and animal drugs, biologics, and medical devices; optical storage and retrieval technology; and computer-assisted review and tracking of product applications.

To enable FDA to recruit and retain qualified medical and scientific personnel imperative to meet statutory responsibilities, the conferees expect FDA to expand regulatory training and fellowship programs to create a larger pool of qualified candidates to fill agency staff requirements.

The conferees expect FDA to increase substantially its assistasnce to small businesses in order to meet FDA's complex regulatory requirements.

The conferees also expect FDA to implement the Generic Animal Drug and Patent Term Restoration Act within funds available.

The conferees are very concerned with reports regarding the generic drug program. The public expects and should receive safe and effective products while the industry is treated in a fair and evenhanded manner. The conferees are aware of a pending budget amendment to address generic drug problems. Accordingly, the conference agreement includes up to $4,000,000 for quality control, surveillance, review, and tracking of human generic drugs. Congress will consider other action upon receipt of an official budget request.

FDA will report details of its progress with these directives as part of its 1991 budget justifications.

The conferees are also concerned with the results of the survey by FDA on microbial contamination in cosmetic makeup testers. The results of the survey indicated that at least five percent of the shared cosmetics studied were inadequately preserved, resulting in a level of microbial contamination that raises questions of consumer safety. As as result of these findings, the conferees expect FDA to develop microbiological testing procedures and regulations to ensure adequate preservation of shared and unshared products. FDA should cooperate with the cosmetic industry in the development of single cosmetic samples rather than shared samples. The conferees will expect FDA to submit a progress report by March 30, 1990.

RED DYE NO. 3

The managers on the part of the House expect the Food and Drug Administration to provide the technical expertise necessary for the development and design of protocols for a long-term study to determine if the secondary mechanism effect can be confirmed for FD&C Red No. 3. Such study shall be financed by the affected industries. The managers on the part of the House further expect the Food and Drug Administration to review the results of this study, in addition to any other scientifically based findings which may emerge, prior to making any decision relating to changes in the provisionally or permanently approved uses of this color.

The managers on the part of the Senate believe that the FDA should reach its final decision on Red Dye No. 3 solely under the standards of the Food, Drug, and Cosmetic Act (21 U.S.C. 376 and the transitional provisions thereto, 74 Stat. 397, 203), and section 10(e) of the Administrative Procedure Act, 5 U.S.C. 706.

Amendment No. 86: Deletes Senate language which authorized the hire of temporary employees without regard to title 5 U.S.C. The House had no similar provision.

BUILDINGS AND FACILITIES

Amendment No. 87: Appropriates $8,350,000 for buildings and facilities of the Food and Drug Administration instead of $6,950,000 as proposed by the House and $12,250,000 as proposed by the Senate.

The conferees will expect FDA to provide requirements development for necessary renovation and consolidation of FDA facilities. The conferees direct the FDA Commissioner to report concurrently to the appropriate committees of Congress and the Office of Management and Budget on progress with its master site plans and requirements development for consolidation by December 31, 1989. The conference agreement does not provide funds for the biotechnology demonstration project at the National Center for Toxicological Research.

Department of the Treasury

PAYMENTS TO THE FARM CREDIT SYSTEM FINANCIAL ASSISTANCE CORPORATION

Amendment No. 88: Appropriates $90,000,000 for payments to the Farm Credit System Financial Assistance Corporation instead of $88,000,000 as proposed by the House and $93,000,000 as proposed by the Senate.

Commodity Futures Trading Commission

Adjunct oversight of the commodity futures industry should be accomplished in order to restore public confidence and provide stability to the commodity futures trading markets.

In view of the recent investigations and indictments facing the commodity futures industry, resulting from fraud and abuse within the industry, the Commodity Futures Trading Commission should issue rules and regulations to assume direct regulatory activities associated with any board of trade, exchange or market or any transaction involving contracts of sale of a commodity for future delivery, traded or executed on a contract market subject to regulation by the Commission. Included within the amount provided is $50,000 to promulgate such rules and regulations. Such regu-

latory action should be in addition to and separate from the industry's ongoing self-regulatory process.

TITLE VI—GENERAL PROVISIONS

Amendment No. 89: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which has the effect of providing that $5,000,000 in new obligational authority for the Grasshopper and Mormon Cricket Control Programs shall remain available until expended.

Amendment No. 90: Provides for a floor on employment for the Food and Drug Administration of 7,500 as proposed by the Senate instead of 7,400 as proposed by the House.

Amendment No. 91: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which provide that loans offered for sale by the Rural Development Insurance Fund in fiscal year 1990 shall be first offered to borrowers for prepayment.

Amendment No. 92: Restores House language which limits the export enhancement program to $770,000,000.

Amendment No. 93: Deletes Senate language which prohibited a State from receiving WIC funds if that State has not implemented cost containment activities.

Amendment No. 94: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following:

SEC. 636. In fiscal years 1990 and 1991, $30,000,000 of section 32 fund shall be used to purchase sunflower and cottonseed oil, as authorized by law, such purchases to facilitate additional sales of such oils in world markets at competitive prices, so as to compete with other countries: Provided, That these funds shall be in addition to funds made available for this purpose by the Rural Development, Agriculture, and Related Agencies Appropriations Act, 1989 (Public Law 100-460).

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the House to the amendment of the Senate.

The conferees point out that section 32 was enacted by Congress to be used to "encourage the exportation of agricultural commodities." The conferees will expect the Secretary to reinstate the use of this authority as a means of promoting our exports.

The conference agreement provides that $30,000,000 of section 32 funds shall be used in fiscal years 1990 and 1991 to purchase sunflower and cottonseed oil to facilitate additional sales of such oils in world markets at competitive prices. The House bill provide that sunflower and cottonseed oil be purchased in fiscal year 1990 without providing a specific amount and the Senate bill provided $40,000,000 in fiscal years 1990 and 1991.

Amendment No. 95: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which provides for a sugar reexport program.

Amendment No. 96: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following:

SEC. 641. (a)(1) Not later than 20 days after the end of each fiscal year, the Secretary of Agriculture shall (A) submit to Congress a report on the amounts obligated and expended by the Department during that fiscal year for the procurement of advisory and assistance services, and (B) transmit a copy of such report to the Comptroller General of the United States.

(2) Each report submitted under paragraph (1) shall include a list with the following information:

(A) All contracts awarded for the procurement of advisory and assistance services during the fiscal year and the amount of each contract.

(B) the purpose of each contract.

(C) the justification for the award of each contract and the reason the work cannot be performed by civil servants.

(b) The Comptroller General of the United States shall review the reports submitted under subsection (a) and transmit to Congress any comments and recommendations the Comptroller General considers appropriate regarding the matter contained in such reports.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement adopts Senate language which establishes various reporting requirements with respect to the procurement of advisory or assistance services by the Department of Agriculture. The conference agreement deletes Senate language which would have placed a specific limitation on the amount of funds that could be obligated or expended for this purpose.

Amendment No. 97: Deletes the table of contents contained in the bill as proposed by the Senate.

CONFERENCE TOTAL—WITH COMPARISONS

The total new budget (obligational) authority for the fiscal year 1990 recommended by the Committee of Conference, with comparisons to the fiscal year 1989 amount, the 1990 budget estimates, and the House and Senate bills for 1990 follow:

New budget (obligational) authority, fiscal year 1989	$42,675,463,000
Budget estimates of new (obligational) authority, fiscal year 1990	39,471,766,000
House bill, fiscal year 1990	37, 964,873,000
Senate bill, fiscal year 1990	40,103,935,000
Conference agreement, fiscal year 1990	39,450,955,000
Conference agreement compared with:	
New budget (obligational) authority, fiscal year 1989	−3,224,508,000
Budget estimates of new (obligational) authority, fiscal year 1990	−20,811,000
House bill, fiscal year 1990	+1,486,082,000
Senate bill, fiscal year 1990	−652,980,000

UNITED STATES MUST REMAIN STRONG ELECTRONICALLY

The SPEAKER pro tempore (Mr. HUTTO). Under a previous order of the House, the gentlewoman from Maryland [Mrs. BENTLEY] is recognized for 60 minutes.

Mrs. BENTLEY. Mr. Speaker, stories are circulating around Washington this week that the Defense Department will start negotiating with the Japanese to buy flat panel displays, part of the range of HDTV continuing technology. Up until this rumor hit the streets, 45 U. S. firms had been recognized by DARPA as having the capability of producing these screens, and the firms had application into DARPA for development funds.

However, there is another story being confirmed by some Defense insiders, which I understand will be carried in the New York Times tomorrow, that reports the Defense Department will cut all HDTV funding from DARPA. Maybe this fact makes the previous rumor about the purchase of screens true.

My sources at Defense also report that all Government contributions to Semitech will be cut, MANTECH will be cut, Defense Manufacturing Board will be cut out, Gallium Arsenide Research will be stopped. In essence, and very frighteningly so, every major industrial base initiative being run by the Defense Department will be dropped.

Now, while all of this is coming together, and, as we say, blowing one's mind, another story has surfaced in the publication called "New Technology Week." This reports that the staff economist to the White House Council of Economic Advisors, Gary Saxenhouse, is on the advisory board of the Research Institute at Japan's Ministry of Industry and Trade, better known as MITI.

For those of you who are not familiar with MITI, it is the Ministry of Industry and Trade, that guides all of Japanese manufacturing, and also guides them in the trade wars: It was MITI that was said to have its fingers in the sale of the milling machines, the silent milling machines by Toshiba to the Russians, et cetera.

Throughout the book, "The Japanese Conspiracy," it is MITI which helped organize the Japanese industries to focus in on American industries to destroy them one by one.

□ 1900

So, Mr. Speaker, I have to wonder is Mr. Saxenhouse, as a member of this advisory board, an agent of a foreign government, or, were he merely a lobbyist, he would have to register as such, and is he responsible for the idea that defense should stop funding programs for the future which would impact, not only on defense purchases, but also would have tremendous impact on restoring some of our microelectronic base that was lost to the Japanese?

I understand, and, once again, it is only a rumor that we may have consultants to the Japanese scattered throughout our Government. I really hope not, Mr. Speaker.

Is Mr. Saxenhouse only a tip of the iceberg? Well, I must say, Mr. Speaker, that I do not know whether there is undue foreign influence involved here, but the possibilities are so great and recognized to be so by our foreign agents registration laws that I really find the situation absolutely outrageous.

Mr. Speaker, Mr. Saxenhouse should be fired immediately, and any other person who is a consultant employed by a foreign government also should be discharged. It is not enough that they merely drop their Japanese affiliation to continue collecting U.S. taxpayers' money because every bit of advice given to this Government by such people will forever be suspect.

As my colleagues know, it is very difficult for me to understand how this happened. Surely these people must have security clearances to work at such high level positions. No one in the employment of a foreign government or who has a close association to a foreign government should ever be at a policymaking level of this Government.

Now some comments about the wisdom of this action in light of what is best for the United States:

Mr. Speaker, it is true that the Defense Department faces some budget cuts. However, the reports coming out of Germany right now is that they want our troops out, some 35,000 of them. Fine. Let us take a cut there. Considering our precarious budget position, it is probably wise to stop spending money on other countries which do not want us there in the first place.

Another thought: These kinds of cuts mandated out of this administration will create a political firefight from people, such as myself, who see this as a threat to the future, especially in our beleaguered microelectronics industry, and from constituent congressional Members who represent these programs.

This is not only outrageous, Mr. Speaker, it is absolutely ludicrous. Everybody agrees that the future is in electronics, and I hope that perestroika and glasnost also are all legitimate to the core, but just in case the Russians change their mind, and Mr. Gorbachev has told the world this week that capitalism would not be an import to the Eastern bloc, I suggest that the loss of research and development funds for dual use technology in the Defense Department shall be regarded as one of the most horrendous displays of disarmament that this country has experienced without a gun ever being placed at our head.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Ms. SNOWE) to revise and extend their remarks and include extraneous material:)

Mr. LENT, for 5 minutes, today.

Mr. DORNAN of California, for 5 minutes, today.

(The following Members (at the request of Mr. HARRIS) to revise and extend their remarks and include extraneous material:)

Mr. STARK, for 5 minutes, today.

Mr. SLATTERY, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. MONTGOMERY, for 5 minutes, today.

Mr. PANETTA, for 5 minutes, today.

Mr. BUSTAMANTE, for 5 minutes, on November 16.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Ms. SNOWE) and to include extraneous matter:)

Mr. HEFLEY.

Mr. PAXON.

Mr. PETRI.

Mr. BURTON of Indiana.

Mr. LAGOMARSINO.

Mr. DONALD E. "BUZ" LUKENS.

Mr. SCHUETTE.

Mr. LEWIS of California in three instances.

Mr. LENT in two instances.

Mr. SKEEN.

Mr. MACHTLEY.

Mr. DANNEMEYER.

Mr. GINGRICH.

(The following Members (at the request of Mr. HARRIS) and to include extraneous matter:)

Ms. OAKAR.

Mr. ROE.

Mr. MATSUI in two instances.

Mr. HAMILTON.

Mr. MONTGOMERY.

Mr. RAY.

Mr. GRAY.

Mr. TORRES.

Mr. STARK in three instances.

Mr. MORRISON of Connecticut.

Mr. OWENS of New York.

Mr. CROCKETT.

Mr. ERDREICH.

Mr. MANTON.

Mr. HALL of Ohio.

Mr. TALLON.

Mr. OBEY.

Mr. LAUGHLIN.

Mr. ATKINS.

Mr. RICHARDSON in two instances.

Mr. RANGEL.

Mr. CLAY.

Mr. LEVINE of California in five instances.

ENROLLED BILLS AND JOINT RESOLUTION SIGNED

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills and a Joint Resolution of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 215. An act to amend title 5, United States Code, with respect to the method by which premium pay is determined for irregular unscheduled overtime duty by a Federal employee;

H.R. 2642. An act granting the consent of the Congress to amendments to the Southeast Interstate Low-Level Radioactive Waste Management Compact;

H.R. 3014. An act making appropriations for the legislative branch for the fiscal year ending September 30, 1990, and for other purposes;

H.R. 3544. An act to authorize the transfer of a specified naval landing ship dock to the Government of Brazil under the leasing authority of chapter 6 of the Arms Export Control Act; and

H.J. Res. 278. Joint resolution to designate the period commencing on November 20, 1989, and ending on November 26, 1989, as "National Adoption Week."

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 931. An act to protect a segment of the Genesee River in New York.

ADJOURNMENT

Mrs. BENTLEY. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 7 o'clock and 15 minutes p.m.), under its previous order, the House adjourned until tomorrow, Thursday, November 16, 1989, at 11 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2019. A letter from the Director, the Office of Management and Budget, transmitting the cumulative report on rescissions and deferrals of budget authority, as of November 1, 1989, pursuant to 2 U.S.C. 685(e) (H. Doc. No. 101-110); to the Committee on Appropriations and ordered to be printed.

2020. A letter from the Deputy Associate Director for Collection and Disbursements, Department of the Interior, transmitting notification of proposed refunds of excess royalty payments in OCS areas, pursuant to 43 U.S.C. 1339(b); to the Committee on Interior and Insular Affairs.

2021. A letter from the Deputy Associate Director for Collection and Disbursements, Department of the Interior, transmitting notification of proposed refunds of excess royalty payments in OCS area, pursuant to 43 U.S.C. 1339((b); to the Committee on Interior and Insular Affairs.

2022. A letter from the Deputy Associate Director for Collection and Disbursements, Department of the Interior, transmitting notification of proposed refunds of excess royalty payments in OCS areas, pursuant to 43 U.S.C. 1339(b); to the Committee on Interior and Insular Affairs.

2023. A letter from the Chairman, Merit Systems Protection Board; transmitting a report titled, "Federal Personnel Management Since Civil Service Reform: A Survey of Federal Personnel Officials", pursuant to 5 U.S.C. 1205(a)(3); to the Committee on Post Office and Civil Service.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. WHITTEN: Committee of Conference. Conference report on H.R. 2883 (Rept. 101-361). Ordered to be printed.

Mr. MOAKLEY: Committee on Rules. House Resolution 290. Resolution providing for consideration of H.R. 3660, a bill to amend the Rules of the House of Representatives and the Ethics in Government Act of 1978 to provide for Governmentwise ethics reform, and for other purposes. (Rept. 101-362). Referred to the House Calendar.

[Omitted from the Record of November 14, 1989]

DISCHARGE OF COMMITTEE ON H.R. 2567

The Committee on Merchant Marine and Fisheries discharged from further consideration of H.R. 2567; H.R. 2567 referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BATEMAN:

H.R. 3659. A bill to amend the Internal Revenue Code of 1986 to provide that certain real property listed on the National Register of Historic Property shall be exempt from the estate tax; to the Committee on Ways and Means.

By Mr. FOLEY (for himself, Mr. MICHEL, Mr. FAZIO, and Mrs. MARTIN of Illinois):

H.R. 3660. A bill to amend the Rules of the House of Representatives and the Ethics in Government Act of 1978 to provide for Governmentwide ethics reform, and for other purposes; jointly, to the Committees on Rules, Post Office and Civil Service, House Administration, Standards of Official Conduct, the Judiciary, Ways and Means, and Government Operations.

By Mr. CONTE (for himself, Mr. MINETA, and Mr. WHITTEN):

H.R. 3661. A bill to authorize the establishment of a Smithsonian Senior Service, and for other purposes; to the Committee on House Administration.

By Mr. ECKART:

H.R. 3662. A bill to amend the Securities Exchange Act of 1934, and for other purposes; jointly, to the Committees on Energy and Commerce and Agriculture.

By Mr. FLORIO (for himself, Mr. WAXMAN, Mr. SIKORSKI, Mr. GUARINI, Mr. PALLONE, Mr. ROE, Mr. TORRICELLI, Mr. HUGHES, Mr. FEIGHAN, Mr. PAYNE of New Jersey, and Mr. DWYER of New Jersey):

H.R. 3663. A bill to promote the recycling of valuable materials contained in municipal refuse, and for other purposes; jointly, to the Committees on Energy and Commerce; Ways and Means; and Science, Space, and Technology.

By Mr. HATCHER (for himself, Mr. EMERSON, Mr. PANETTA, Mr. FASCELL, Mr. LEWIS of Florida, Mr. STALLINGS, Mr. SCHULZE, and Mr. ESPY):

H.R. 3664. A bill entitled, "The Omnibus Agricultural Commodity Promotion and Research Act of 1989"; to the Committee on Agriculture.

By Mr. KOSTMAYER (for himself, Mr. KOLTER, Mr. WELDON, Mr. MAVROULES, Mr. LEWIS of Georgia, Mrs. COLLINS, Mr. OWENS of New York, Mrs. BOXER, Mr. DE LUGO, Mr. PENNY, Mr. FORD of Tennessee, Mr. CAMPBELL of Colorado, Mr. FAUNTROY, Mr. MILLER of Washington, Mr. DEFAZIO, Mr. MCCOLLUM, Mr. FROST, Mr. PARRIS, Mr. SPENCE, and Mr. GUNDERSON):

H.R. 3665. A bill to amend the International Revenue Code of 1986 to provide for the establishment of, and limited deduction of contributions to, education savings accounts; to the Committee on Ways and Means.

By Mr. PANETTA (for himself and Mr. TORRES):

H.R. 3666. A bill to provide assistance to disaster victims through programs under section 8 of the United States Housing Act of 1937 and the Community Development Block Grant Program and to provide for allocation of rural housing funds in the event of a disaster; to the Committee on Banking, Finance and Urban Affairs.

By Mr. ROTH:

H.R. 3667. A bill to establish a Department of Commerce and Trade, and for other purposes; to the Committee on Government Operations.

H.R. 3668. A bill to require an annual assessment and ranking of foreign countries with respect to the extent to which those countries engage in open international trade, and for other purposes; jointly, to the Committees on Ways and Means; Foreign Affairs; and Banking, Finance and Urban Affairs.

By Mr. WISE:

H.R. 3669. A bill to establish a Data Protection Board, and for other purposes; to the Committee on Government Operations.

By Ms. OAKAR:

H.J. Res. 436. Joint resolution to designate the week beginning March 5, 1990, as "Federal Employees Recognition Week"; to the Committee on Post Office and Civil Service.

By Mr. OWENS of New York (for himself, Mr. BARTLETT, and Mr. SMITH of Vermont):

H. Con. Res. 228. Concurrent resolution to express the sense of the Congress regarding the 25th anniversary of Volunteers In Service To America; to the Committee on Education and Labor.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 8: Mr. HANSEN, Mr. EMERSON, and Mr. YATES.

H.R. 509: Mr. GINGRICH, Mrs. KENNELLY, and Mr. SWIFT.

H.R. 655: Mr. BOSCO.

H.R. 1036: Mr. DUNCAN.

H.R. 1137: Mr. VENTO.

H.R. 1167: Mr. HAYES of Illinois, Mr. KILDEE, and Mr. COLEMAN of Texas.

H.R. 1292: Mr. ROBERTS and Mr. WHITTAKER.

H.R. 1470: Mr. COYNE.

H.R. 1515: Mr. MCMILLEN of Maryland.

H.R. 1530: Mr. CONYERS, Mr. WHEAT, Mr. OWENS of Utah, Mr. FUSTER, and Mr. HERTEL.

H.R. 1676: Mr. DOWNEY.

H.R. 2005: Mr. JOHNSON of South Dakota.

H.R. 2006: Mr. MARLENEE and Mr. JOHNSON of South Dakota.

H.R. 2192: Mr. BLAZ, Mrs. UNSOELD, and Mr. REGULA.

H.R. 2255: Mr. MILLER of Washington, Mr. FIELDS, Mr. WELDON, Mr. BENNETT, Mr. LENT, and Mrs. SAIKI.

H.R. 2273: Mr. SCHUMER, Mr. RUSSO, Mrs. PATTERSON, Mr. BUECHNER, Mr. BLAZ, Mr. RINALDO, Mr. BARTLETT, Mr. GINGRICH, and Mr. WELDON.

H.R. 2584: Mr. WELDON.

H.R. 2754: Mr. ALEXANDER, Mr. ENGEL, Mr. FLORIO, Mr. HAYES of Illinois, Mr. HAYES of Louisiana, Mr. HUBBARD, Mrs. MARTIN of Illinois, Mr. PANETTA, Mr. PAYNE of New Jersey, Mr. POSHARD, Mr. ROGERS, Mr. ROWLAND of Georgia, Mr. SABO, Mr. SCHAEFER, Mr. SCHUETTE, Mr. SKEEN, Mr. SKELTON, Mr. SLATTERY, Mr. STALLINGS, Mrs. VUCANOVICH, and Mr. WEBER.

H.R. 2755: Mr. DURBIN.

H.R. 2761: Mr. PASHAYAN, Mr. THOMAS of Georgia, Mr. HUBBARD, Mr. SLAUGHTER of Virginia, Mr. SKAGGS, Mr. NOWAK, Mr. UPTON, Mr. RINALDO, Mr. SUNDQUIST, Mr. FAZIO, Mrs. SAIKI, Mr. TRAXLER, Mr. MARTINEZ, Mr. BILBRAY, Mr. MOORHEAD, Mr. GREEN, Mr. MINETA, Mr. ROSE, Mr. MOODY,

Mr. FASCELL, Mr. REGULA, Mr. OXLEY, Mr. JENKINS, Mr. MCCANDLESS, Mr. CAMPBELL of Colorado, Mr. KLECZKA and Mr. GEREN.

H.R. 2798: Mr. SCHAEFER, and Mr. EMERSON.

H.R. 3220: Mr. SMITH of Texas, Mr. LAGOMARSINO, Mr. EMERSON, Mrs. PATTERSON, Mr. ECKART, Mr. ENGEL, and Mr. WYLIE.

H.R. 3256: Mr. OBERSTAR, Mr. POSHARD, and Mr. MILLER of Washington.

H.R. 3274: Mr. ROBERTS.

H.R. 3321: Mr. DANNEMEYER, Mr. DOUGLAS, and Mr. LAGOMARSINO.

H.R. 3333: Mr. SENSENBRENNER, Mr. LAGOMARSINO, Mr. BLILEY, Mr. MOORHEAD, Mr. OXLEY, Mrs. JOHNSON of Connecticut, Mr. FIELDS, Mr. MADIGAN, and Mr. GEKAS.

H.R. 3370: Mr. JOHNSON of South Dakota.

H.R. 3380: Mr. BROWN of Colorado, Mr. NOWAK, Mr. ESPY, Mr. PICKLE, Mr. CONDIT, Mr. PERKINS, Mr. SOLARZ, Mr. MCHUGH, Mr. SKEEN, Mr. TRAXLER, Mr. GEREN, Mr. PANETTA, Mr. EDWARDS of California, Mr. TAYLOR, Mr. KLECZKA, Mr. SHUSTER, Mr. DUNCAN, Mr. LEATH of Texas, Mr. GORDON, Mr. HEFNER, and Mr. FLORIO.

H.R. 3386: Mr. DEFAZIO and Mr. HERTEL.

H.R. 3430: Mr. HERTEL and Mr. LIPINSKI.

H.R. 3442: Mr. RICHARDSON, Mr. MONTGOMERY, Mr. NELSON of Florida, Mr. DEFAZIO, Mrs. BOGGS, and Mr. ORTIZ.

H.R. 3475: Mr. EDWARDS of Oklahoma and Mr. ROWLAND of Connecticut.

H.R. 3483: Mr. UPTON.

H.R. 3500: Mr. KOLBE and Mr. SLAUGHTER of Virginia.

H.R. 3502: Mr. RINALDO and Mr. HYDE.

H.R. 3560: Mr. RAVENEL.

H.R. 3562: Mrs. COLLINS.

H.R. 3594: Mr. MURPHY, Mr. KILDEE, Mr. STARK, Mr. HAYES of Illinois, and Mr. JACOBS.

H.J. Res. 429: Mr. GORDON, Mr. SAWYER, Mr. COSTELLO, Mr. HYDE, Mr. BOSCO, Mr. SCHUETTE, Mrs. BENTLEY, Mr. HOCHBRUECKNER, Mr. TALLON, Mr. BEVILL, Mr. FRENZEL, Mr. DELLUMS, Mr. PORTER, Mr. COUGHLIN, Mr. PAYNE of New Jersey, Mr. WAXMAN, Mr. FAZIO, Mr. DENNY SMITH, Mr. KOLTER, Mr. PALLONE, Mr. WOLPE, and Mr. HANSEN.

H. Con. Res. 67: Mr. DELLUMS, Mr. CONYERS, Mr. FAUNTROY, Mr. SAVAGE, Mr. THOMAS A. LUKEN, Mrs. COLLINS, Mr. FAZIO, Mr. ENGEL, Mr. SMITH of Vermont, Mr. WHEAT, Mr. MFUME, Mr. SAWYER, Mr. PAYNE of New Jersey, and Mr. FOGLIETTA.

H. Con. Res. 203: Mr. BOEHLERT, Mr. ATKINS, Ms. SLAUGHTER of New York, Mr. BUSTAMANTE, Mr. EVANS, Mr. AUCOIN, Mr. MAVROULES, Mr. SCHEUER, Mr. DE LUGO, Mr. OWENS of New York, Mr. NEAL of Massachusetts, Mrs. UNSOELD, and Mr. CLAY.

H. Con. Res. 205: Mr. YATRON.

H. Con. Res. 219: Mr. DREIER of California, Mr. WALKER, Mr. PENNY, Mr. FIELDS, Mr. HAYES of Louisiana, Mr. APPLEGATE, Mr. PAXON, Mr. HALL of Texas, Mr. HOLLOWAY, Mr. SCHAEFER, Mr. LIVINGSTON, and Mrs. VUCANOVICH.

H. Con. Res. 227: Mr. ROSE, Mr. DORNAN of California, Mr. FAUNTROY, Mr. CAMPBELL of California, Mr. CAMPBELL of Colorado, Mrs. MARTIN of Illinois, Mr. WALSH, Mr. BUSTAMANTE, Mr. DEFAZIO, Mr. ARMEY, Mrs. KENNELLY, Mr. HYDE, Mr. MANTON, Mr. GINGRICH, Ms. PELOSI, Mrs. BENTLEY, Mr. HORTON, Mr. HUGHES, Mr. WAXMAN, Mr. SOLOMON, Mr. SIKORSKI, Mrs. JOHNSON of Connecticut, and Mr. NEAL of North Carolina.

H. Res. 139: Mr. LEACH of Iowa, Mr. CLINGER, and Mr. PETRI.

H. Res. 206: Mr. JAMES, Mr. BLAZ, Mr. MCNULTY, Mr. HERGER, Mrs. SCHROEDER, Mr. REGULA, Mr. GONZALEZ, Mr. PAYNE of Virginia, Mr. NELSON of Florida, Mr. DWYER of New Jersey, Mr. HORTON, Mr. BARNARD, Mr. WALGREN, Mr. MAZZOLI, Mr. ESPY, Mr. HAYES of Illinois, Mr. WISE, and Mr. BRENNAN.

H. Res. 283: Mr. ACKERMAN, Mr. AKAKA, Mr. ATKINS, Mr. BOSCO, Mr. BOUCHER, Mr. CONYERS, Mr. EDWARDS of California, Mr. FALEOMAVAEGA, Mr. FAZIO, Mr. FRANK, Mr. HALL of Ohio, Mr. LIPINSKI, Mr. MARKEY, Mr. MRAZEK, Mr. NEAL of Massachusetts, Mr. POSHARD, Mr. ROYBAL, Mr. STARK, Mr. TOWNS, Mrs. UNSOELD, Mr. WEISS, and Mr. WOLPE.

SENATE—*Wednesday, November 15, 1989*

(Legislative day of Monday, November 6, 1989)

The Senate met at 10 a.m., on the expiration of the recess, and was called to order by the Acting President pro tempore [Mr. ROBB].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray:

Ye shall know the truth, and the truth shall make you free.—John 8:32.

Almighty God, perfect in truth and justice, we rejoice at the incredible movement for freedom in Eastern Europe, especially East Germany. We are sobered in the realization that godless communism has failed after 40 years. We celebrate the profound freedom we enjoy after 200 years. In our celebration, help us not forget the faith that produced our Constitution and Bill of Rights. Help us not overlook the firm belief of our Founding Fathers: That human rights are endowed by a Creator God and are, therefore, inalienable, that it is the responsibility of government to secure these rights and that that government receives its power from the consent of a sovereign people.

Gracious Lord of life and liberty, forbid that we should celebrate the fruit while we reject the root from which its springs. Deliver us from the tendency to reduce God to a religious issue and, thereby, remove Him from public life. Return us to the faith of our fathers and preserve us in all that distinguishes us from communism and its bankruptcy.

In Jesus' name who is the Truth. Amen.

RECOGNITION OF THE ACTING MAJORITY LEADER

The ACTING PRESIDENT pro tempore. Under the standing order, the acting majority leader is recognized.

THE JOURNAL

Mr. PRYOR. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

SCHEDULE

Mr. PRYOR. Mr. President, this morning following the time reserved for the two leaders, there will be a period for morning business until 10:40 a.m., with Senators permitted to speak therein for up to 5 minutes each.

The Senate, Mr. President, will then recess from 10:40 a.m. until noon for the joint meeting with the House to hear an address by Lech Walesa.

Upon reconvening at 12 noon, the majority leader has expressed his intention to turn to the Department of Defense authorization conference report, H.R. 2461, under a unanimous-consent agreement which provides for a 2½-hour debate on the conference report.

Beginning at 2 p.m. today, there will be another hour of debate on the Packwood-Roth capital gains IRA proposal, with a vote occurring at 3 p.m. this afternoon on the motion to invoke cloture.

Once that vote has been completed, and if action has not been completed on the DOD conference report, the Senate would then return to that measure to complete action. After which, the majority leader has indicated his desire to act on any of the available conference reports.

Mr. President, I notice the distinguished Republican leader is here and I assume at this time he would want to utilize his time.

Mr. President, I reserve the remainder of the majority leader's time.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

RECOGNITION OF THE REPUBLICAN LEADER

The ACTING PRESIDENT pro tempore. Under the standing order, the Republican leader is recognized.

FREEDOM: CELEBRATIONS IN EASTERN EUROPE, ASSAULTS IN CENTRAL AMERICA

Mr. DOLE. Mr. President, freedom is not a partisan issue. Every Senator—Democrat and Republican—shares the excitement of recent events in Eastern Europe.

As our vote on aid for Poland and Hungary demonstrated, virtually every Senator wants to help the nations of Eastern Europe on their path toward free government and free enterprise.

So it is a bit distressing to hear the increasing level of democratic carping about the President's actions and words on Eastern Europe.

My memory is still pretty good. I can remember what happened a year ago. George Bush was overwhelmingly elected to be the President of the United States.

And I can read pretty good, too. I can read the Constitution, which says the President runs our foreign policy.

And I can read the polls, which show that the American people, by an overwhelming majority, believe President Bush is doing an outstanding job as President, including in the area of foreign relations.

So what gives?

I do not know—I truly do not know.

For 8 years, liberals lambasted Ronald Reagan—for his rhetoric, which unashamedly identified America with the global struggle for freedom and against communism; for his policies, which kept America strong and rejected unilateral concessions to the Communists.

For 8 years, they preached gloom and doom, and said Reagan's rhetoric and policies would doom us to an era of cold war and stalemate. Where are all those liberals now?

Well, they are all still making speeches—but now their speeches all say how wonderful it is that the nations of Eastern Europe are throwing off the Communist yoke and turning to freedom.

One enormous reason all that is happening is because of the policies of Ronald Reagan, which all those liberals made a career out of lambasting.

And now that President Reagan has passed the mantle to President Bush, the liberals have a new war cry: He is to timid. He is not being aggressive enough in seizing the opportunities to roll back the Iron Curtain.

Mr. President, they are as wrong today, as current events unquestionably prove they were wrong in their attacks on President Reagan.

Ronald Reagan was right. And George Bush is right, too.

He has us exactly on the right course. He has his eye squarely on the ball.

Yesterday, the distinguished majority leader urged the President to stage a photo op at the Berlin Wall.

Mr. President, George Bush is not interested in photo ops. He is interested in advancing the cause of freedom in East Germany.

Yesterday, the majority leader suggested that we ought to start exploring with the Soviets how we can help them out economically—with the laudable goal that our help might give Gorbachev the support he could need

to fight off internal efforts to reverse his reforms.

We hope Mr. Gorbachev succeeds in moving the Soviet Union down the path is now on. But let us not get too carried away with Gorby mania.

President Bush and Gorbachev will meet in the floating summit in just a few weeks. Rather than suggesting now that we go into the summit offering a plan to help Gorbachev bail out Soviet communism—why do we not focus on what we want from Gorbachev?

What is the benefit, to the United States, when we publicly pressure the President to go into the summit with an American agenda of volunteering aid to the Soviets?

There may be some U.S. interest in seeing that he succeeds—as long as he stays on his current course. But there is still a great deal in Soviet policy that is directly inimical to United States interests; Soviet policies that must be changed, and drastically, if we are to have any business getting in the game of helping Gorbachev bail out the Soviet system from the failures of Soviet communism.

We have a lot that Mr. Gorbachev wants—but I do not see much interest in laying it out for him in some kind of buffet, and inviting him to make his choice. Let us extract a reasonable price for any concessions we offer.

One place to start is right on our southern doorstep, in Central America.

Just as Poland and Hungary and East Germany—and now, perhaps, even Bulgaria and Czechoslovakia—are embarked on the road toward greater freedom; just when the tide of freedom is running high in Eastern Europe—freedom is under vicious assault in Central America.

Daniel Ortega unilaterally trashes a cease-fire, in a blatant effort to crush the democratic resistance, and thwart the increasingly clear determination of the Nicaraguan people to oust him through a free and fair election.

In El Salvador, Communist guerrillas launch their most vicious military and terrorist assault in a decade—murdering hundreds, and shutting down even the most innocent civilian commerce and transportation.

Mr. President, imagine what would be happening on the floor of the Senate if freedom fighters in Nicaragua launched a suicidal attack on Managua? The liberals would be queued out into the hall, with their speeches and press releases ready—blasting the Contras for undermining the so-called peace process in Central America.

But let the Communist murderers in El Salvador assault a freely elected government and a free people—literally shooting innocent people down in the streets of the capital city—and we have heard not a word, not a peep, out of any of the liberals.

Mr. President, the Soviet Union bears important responsibility for what is going on in Central America.

Ortega is their client—pure and simple. Without their hundreds of millions of dollars of aid, his regime would have collapsed long ago. Without the hundreds of millions of dollars of arms aid they have pumped in—and they continue to facilitate going in through Cuba and other channels—the freedom fighters would have thrown him out of office long ago.

The guerrillas in El Salvador are carrying Soviet supplied weapons, directly or indirectly; communicating on Soviet-supplied "commo" gear, directly or indirectly; and responding to orders and advice that start in Nicaragua—with the clear knowledge and at least implicit approval of the Soviet Union.

It may be in our interest, at some point, to more actively help Mr. Gorbachev out. But it is time, now, for him to get his own policies in order—especially in areas like Central America, which are central to our own security concerns.

Is it not about time for Senators to stop criticizing President Bush, and urging that we help out Mr. Gorbachev—and start criticizing the policies that lead to the events of Nicaragua and El Salvador?

President Bush deserves our praise—for what Reagan-Bush policies have already done so much to accomplish, and what the Bush administration is doing to keep the momentum toward freedom strong.

He deserves our support—bipartisan support.

He does not deserve our nitpicking and petty politicking.

It is not timidity to withhold our largesse from Gorbachev until he straightens out his policies in Central America and elsewhere; it is common sense.

We do not need photo ops of the President at the Berlin Wall. We need a continuation of the steady, well-focused leadership he is providing. And we need a reasonable degree of bipartisan support for the President of the United States, as he leads our country in this exciting, promising, but still dangerous time.

Mr. President, I reserve the remainder of my time.

The ACTING PRESIDENT pro tempore. Without objection, the remainder of the Republican leader's time is reserved.

MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, there will be a period for the transaction of morning business not to extend beyond the hour of 10:40 a.m., with Senators permitted to speak therein for not to exceed 5 minutes each.

The Chair recognizes the Senator from Tennessee [Mr. GORE].

EASTERN EUROPE

Mr. GORE. Mr. President, I wish to address the subject just covered by the Republican leader. The true credit for the events now taking place in Eastern Europe goes to Thomas Jefferson and James Madison and our founders who created a system of self-government and representative democracy that has proven to be resilient, durable and capable of promoting and sustaining the yearnings of people all over this world to be free.

We need visionary leadership just now in order to find a path toward the new world we hope to create. The last time we saw movements in history of the scale and magnitude of the ones underway right now was in the years immediately following World War II. In that period, when the Marshall plan was put in place and many other designs were presented, Gen. Omar Bradley said, "It is time we steered by the stars and not by the lights of each passing ship."

Mr. President, taking overnight tracking polls and doing what they say the next morning isn't leadership. It's the equivalent of steering by the lights of each passing ship. We need a goal to steer toward. We need a vision of the world as it can be, not simply a snapshot of the world as it is.

Last month, in San Francisco Bay, an earthquake shook the Earth in the middle of the World Series. This month, in Europe, the tectonic plates of history are moving with sudden and violent force. Hidden from view, deep beneath the surface, great ideas are grinding one against the other. The plate we might call democracy is covering and submerging the plate created by Lenin and Stalin. The fault line of this great conflict in history runs right through Berlin.

Mr. President, the way to survive an earthquake is to build structures that are resilient and durable. The Communist governments in Eastern Europe are like some of the damaged buildings in San Francisco: not safe to go back into, even though they did not fall to the ground.

We came to the aid of the earthquake victims in California. Now we must participate in efforts to build a new structure in Eastern Europe and help the people who live there to realize their yearnings for democracy and self-representation.

Mr. President, it will not be sufficient to simply look at the tracking polls. It will not be sufficient to just play it by ear. After the earthquake in San Francisco, I suppose some people were still waiting for the pregame show. They were still watching their television sets waiting for the third

29-059 O-90-40 (Pt. 20)

game of the World Series to come on. Let us not make sure that does not take place in Eastern Europe. The world has changed and time has moved on. We cannot afford to sit back and wait for history to happen.

Mr. President, let me turn to the subject I had intended to address, and with the indulgence of my colleagues, I ask unanimous consent for an additional 5 minutes.

The ACTING PRESIDENT pro tempore. Without objection, the Senator is recognized for an additional 5 minutes.

Mr. GORE. I thank the Chair.

(The remarks of Mr. GORE pertaining to the introduction of legislation are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

MEASURE INDEFINITELY POSTPONED—S. 1582

Mr. DIXON. Mr. President, I am glad to yield to my colleague from Washington State in a moment with the understanding that it will leave me time to make some brief remarks until 10:40 when we assemble to go to the House Chamber to hear Lech Walesa.

With cooperation and consent of the Republican leader, I ask unanimous consent that S. 1582, the Poland-Hungary assistance bill, be indefinitely postponed.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

DRAMATIC CHANGES IN EASTERN EUROPE

Mr. GORTON. Mr. President, during the course of his inauguration speech President Bush stated, "A new breeze is blowing. The totalitarian era is passing, its old ideas blown away like leaves from an ancient lifeless tree."

Mr. President, I believe that very few statements or predictions by newly inaugurated Presidents at the time of inauguration have been so amply fulfilled in so short a period of time.

Today, we welcome the leader of Solidarity, the noted and courageous Lech Walesa, now representing the people of Poland and their aspirations for freedom. Poland has had dramatic changes during the course of the past year, including what we would call free elections for at least a part of its new parliamentary system. It is now going through extremely difficult economic times as it attempts to move from the failures of a command economy to the promises of a free economy.

Hungary now has scheduled totally free elections both for a new President and for a new Parliament. It perhaps has more promise of success without wrenching change than any of the other countries in Eastern Europe because it has been in the process of reforming both its political system and its economic system at roughly the same speed and in the same time.

Dramatic changes have taken place in the Soviet Union where some freedoms, freedom of speech particularly, have been notably advanced, where a number of members of a new Parliament have been elected freely, and where a new breeze is blowing from a political standpoint but where difficulties of changing from an economy with a 70-year history, which is now a total failure, to a free economy are extremely daunting.

Now it is East Germany, to the surprise of all of us, here and elsewhere, where a demand by the people themselves has resulted in striking progress toward freedom and a dramatic destruction, figuratively, and gaining literally as well, of the Berlin Wall.

Next, Mr. President, I am convinced will be Czechoslovakia. I do not see how that repressive government can last another year or even 6 months.

Each of these changes is a triumph for the cause of liberty and the self-determination of people. Each is a triumph for us and our ideals in the United States, ideals which go back, as the distinguished Senator from Tennessee said, to Jefferson, Madison, and Adam Smith, but changes which have resulted largely because of our strength, our own sense of purpose, our confidence in our own system and our self-confidence in American society.

At the same time, I think we must confess, Mr. President, that in one respect these changes are also a triumph of the new communications revolution, a triumph of television and the VCR. Nevertheless, nothing happens in any country with a repressive government like that of East Germany without the people, without the courage of that small handful of East Germans who were willing to start a movement called New Forum, when it was very risky to do so, off those Christians who were willing to meet week after week in their churches and then go out and demonstrate for freedom.

The true heroes of these changes in East Germany, Mr. President, are the people of East Germany themselves and their demand for freedom. It is simply because this is a revolution of the people that I believe we should not fear the eventual reunification of all of Germany. I believe we have a very different Germany today from what we have had at any time in the past, and that we can confidently expect that a new and reunited Germany would be a free and democratic Germany.

But this is not so much a triumph of what we have done as Americans, Mr. President; it is a triumph of what we are. It is not something which we need to respond to day by day, because it is a triumph of what we are and of our own ideals. Of course, we should encourage these changes and should help them when they are basic changes.

Mr. Gorbachev of the Soviet Union now effectively says that the Warsaw Pact will be dead if we will only abandon NATO. But those are not equivalent alliances, Mr. President. NATO is an alliance of free people. The United States will leave Europe when the Western Europeans want us to do so, because we have joined together freely.

The Warsaw Pact, Mr. President, will collapse the minute the people of Eastern Europe are allowed to make their own choice as to its continuation. But we must be willing to change our thoughts about security in Europe and about what is required for that security. It may well be that in the course of the next few years many of our troops and airmen will return home, but they will do so, Mr. President, because we and our ideas have been triumphant, not because we have failed. Future reductions in the size of our military establishment, future cuts in our defense budget, the so-called defense dividend, will be the results not of failure but of success. Our ideals, our military posture, our alliances, have been successful in this world. It now requires us only to show the thoughtfulness, the imagination, and the dedication which we have shown over the course of the last 40 years to make the next 40 years a time of triumph for peace and democracy around the world.

WELCOME TO LECH WALESA

Mr. DIXON. Mr. President, it gives me great pleasure to welcome Lech Walesa, the leader of the independent self-governing trade union Solidarity, to the United States. I am particularly proud of this moment because I remember quite vividly how far Solidarity has come, and how the U.S. Congress helped bring this day to pass.

As many of my colleagues will recall, 2 years ago, Solidarity was still an outlawed trade union organization, whose members were imprisoned and beaten for their efforts to democratize Poland. I remember the heroic efforts of Lech Walesa, a worker at the Lenin Ship Yards in Gdansk to keep the dream of freedom and democracy alive in his believed country. He suffered the indignities of prison and house arrest. He and his family suffered greatly. In spite of the many dark days he and his family faced, the Polish people continued to see in him what the Communist Government feared most. He truly represented the people and was able to turn their vision into stunning reality.

It was increasingly clear to this Senator, as well as others in this body,

that the only way for the United States to effectively advance democratization in Poland was to support those who were espousing the cause of democracy, at grave risk to their own well-being. It was a case of putting our money where our mouth was.

Along with my distinguished colleague, Senator SYMMS, and many others, I introduced an amendment to the fiscal year 1987 supplemental appropriations bill to provide Solidarity $1 million in unconditional support. It was the very first demonstrable and realistic assistance to the then outlawed union by the United States. This step put the U.S. Government squarely behind the advocates of freedom. The message was loud and clear to the Soviets and Solidarity supporters alike: The United States doesn't just talk democracy, it backs it.

Mr. President, it was money well spent.

The Congress saw in Solidarity and its leader, Lech Walesa, a movement of great force and determination. Lech Walesa, as its leader, fought for their rights with a deep and abiding faith that freedom would prevail.

Who would have thought that 2 short years later, the Polish Government would be a non-Communist controlled, Solidarity-backed Government? Some who served time in prison are now senators and representatives in the Polish Parliament. I recently had the chance to meet Jacek Merkl, who had been imprisoned during the period of martial law. He said he would never forget the assistance of the U.S. Congress toward Solidarity at a time when they needed it most. It was a reminder to me of the foresight of this body then, and a reminder to us all that our assistance is still necessary.

The Polish people, led by Mr. Walesa, have caused the dam of communism to burst open wide. Democracy is flooding Eastern Europe, from Gdansk to Sofia, the Baltic Sea to the Black Sea.

We must keep in mind, however, that there always remains the prospect of the Communists damming the river of democracy farther downstream. We must never believe the job of democratization is finished. We must all work to ensure its success.

I am reminded today of a copy of a letter I received from Solidarity supporters in Poland. I think the words of those who were in the thick of the struggle for Polish democracy are especially meaningful today. They are even more so when one realizes the statements were made in May 1988, a little more than a year and a half ago. The letter said:

To our adversaries and bad-wishers I have this to say: abandon hopes that we shall ever give up, grow tired or surrender. The final victory shall be ours.

Lech Walesa's visit to the United States is a testament to those who struggled against incredible odds for the opportunity to speak freely and choose their own destiny. Lech Walesa has brilliantly led his people's struggle. Their struggle is our struggle, Mr. President.

I welcome Lech Walesa to the Congress and warmly congratulate him on the long road he has traveled to get to this day and this place. Working together, we can continue to walk down the road of democracy.

I thank my colleagues.

I thank the Chair. I yield the floor.

Mr. DOLE addressed the Chair.

The ACTING PRESIDENT pro tempore. The Chair recognizes the Republican leader.

Mr. DOLE. Mr. President, how much time do I have?

The ACTING PRESIDENT pro tempore. The Senator has 3 minutes and 7 seconds.

NOMINATION UPDATE

Mr. DOLE. Mr. President, I want to give a nomination update statement, and I intend to, as I have indicated to the majority leader, indicate every day how far we have come in getting some of these nominations confirmed.

As of today, Wednesday, November 15, there are now 127 nominations remaining pending in the Senate awaiting confirmation. Of those 127 nominations, 61 have not been in the Senate longer than 30 days.

However, there are still 66 nominations that have been in the Senate longer than 30 days and have not been confirmed. I want to indicate for the record I was pleased with the majority leader's statement, I guess yesterday or the day before, indicating that as many as half the pending nominations may be confirmed if unforeseen problems do not arise.

So I thank the majority leader for his assistance and his leadership in this matter. I want to reiterate that I will do all I can on this side to be helpful, and, as I have said before to my colleagues who have holds on some of the nominees, these nominees are outstanding men and women. They have families. They have changed their plans, they have relocated, and they are waiting for confirmation.

If, in fact, we are to depart here either this week or next, or soon thereafter, I think it would be unfair to many of the nominees who have had hearings—maybe there is no real controversy—to have to wait until sometime in late January.

I urge my colleagues on this side who may have holds to release your holds and turn the nominations loose. I again indicate my willingness to cooperate in every way with the majority leader in getting all of the confirmations that we can.

Mr. DIXON. Mr. President, may I just say, as the bottom of the leadership team on the Democratic side, that I am delighted to hear those remarks from the Republican leader on the efforts that are going to be made by his side.

May I respond by saying we are anxious over here to cooperate. Any idea that any nominees are being held up on this side is totally at odds with the facts.

I had the pleasure of being with my good friend from Illinois, the Secretary of Transportation, Sam Skinner, last weekend, when he dedicated Clark Bridge in Alton. He discussed this subject with me. I assured him that we are anxious to move all of these people.

We just confirmed 10 in the Armed Services Committee a moment ago. I just talked last night to the chairman of the Agriculture Committee, the distinguished senior Senator from Vermont, about moving out a person we are concerned about, and to the Banking Committee chairman today about the same thing.

I see my friend, the chairman of our conference, coming in. We are all anxious to cooperate and have these various nominees considered and voted upon for confirmation.

In the case of one or two that frankly will be somewhat contentious, we are ready for the vote. We are ready to vote no if we want to vote no. But any charges that this side—and I know the Senator has not made that charge—anybody in leadership on this side is conspiring to not bring up anybody is totally at odds with the facts.

I thank my good friend and valued friend, the Republican leader, for indicating that folks on his side should release any holds. We say the same to the people on this side.

I might say that the administration might send some people over here to do a little more work on this because there is no reason or effort on this side or desire on this side to hold up these folks.

Mr. DOLE. I thank the distinguished Senator from Illinois. I know he is sincere in his remarks. Obviously, the bottom line is, to get the confirmations done, we have to have a vote. Some may even be debated. I do not suggest every nominee any President sends up here is perfect and the nomination should not be debated. Some ought to be rejected, I assume.

I guess the point I would make is we certainly want to work together. There are some holds on the Republican side. I have implored my colleagues on this side to work out any differences. Let us have these confirmations completed by the end of this week or by Thanksgiving Day.

I thank the Chair. I yield back the time.

The ACTING PRESIDENT pro tempore. Who seeks recognition?

Mr. SIMON. Mr. President, I question the presence of a quorum.

The ACTING PRESIDENT pro tempore. The absence of a quorum has been suggested. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

MOBILE VOLUNTEERS

Mr. HEFLIN. Mr. President, in his inaugural address, President Bush urged Americans to give of themselves and their time through volunteer work. Volunteerism is admirable and often brings out the best in people. Volunteers are an enormous help to organizations such as the Red Cross, the Cancer Society, various churches and schools, and many other groups.

I think those who give of their time to help others without expecting any type of monetary or compensatory reward should be praised for their selfless efforts. They are indeed a great asset to our society.

I want to take this opportunity to praise a particular group of volunteers in my home State of Alabama.

Every year, Helping Hands for the Children, a volunteer support group for the Children's and Womens' Hospital of the University of South Alabama Medical Center, honors outstanding community leaders in the Mobile area for their volunteer work.

I want to join Helping Hands for the Children in saluting the efforts of Joyce Chavers, Chadwick Clark, Lynn Green, Walter McKean, Jr., Jenny Rich, Rena Scheuerman, Audrey Wilhelm, Mary Wood, and Bernard Wood III.

Ms. Chavers has given much of her time to help the Mobile Terrace Youth Group in Mobile. Mrs. Clark has worked to help the Cancer Society, Camp Rap-a-Hope, and Wilmer Hall. Mrs. Green also worked with Camp Rap-a-Hope, as well as volunteering her time for the Junior League and Dauphin Way Methodist Church.

Mr. McKean has donated his time to help the Mobile Opera Guild and the Arthritis Foundation. Mrs. Rich has been quite busy in her efforts to help the Mobile Helpline, the Mobile Heart Association, the Medical Auxiliary, and the Spring Hill Avenue Temple Sisterhood.

Ms. Scheuerman has worked with the Boy Scouts and the senior citizens' Christmas party in Saraland. Mrs. Wilhelm has donated her time and energy for the Child Advocacy Center, Azelea City Sertoma Club, and the attorney general's task force on victim's rights.

Mrs. C.W. Wood has volunteered for MARC and the Mobile Art Association. Mr. Bernard Wood has volunteered for the Red Cross, St. Paul's School Senior Band, and the American Junior Miss Pageant.

Mr. President, I also want to praise Lee Stearns of Helping Hands for the Children, who has also done a lot of volunteer work in the Mobile area.

Dedicated and caring individuals such as these deserve a great deal of praise for their commendable efforts to help others. I want to thank these individuals for their work, and I hope they, and all volunteer workers, be an inspiration to many others.

THE 50TH ANNIVERSARY OF LUTHERAN REFUGEE AGENCY

Mr. KENNEDY. Mr. President, this year marks the 50th anniversary of the Lutheran Immigration & Refugee Service. Representatives of this phenomenal humanitarian agency are in Washington this week from throughout the United States to mark this important occasion, and I am pleased to join in paying tribute to their enormous dedication and remarkable achievements.

LIRS got its start in the midst of the human upheaval of the Second World War now a half century ago. Since that time, the Lutheran Immigration & Refugee Service has made the difference between lives of oppression and deprivation and lives of hope and freedom for over 150,000 refugees from throughout the world.

Mr. President, the dedication of American Lutheran churches to rescuing the uprooted has been extraordinary. Since 1939, LIRS has mobilized over 6,000 Lutheran congregations across the country to assist needy refugees to start new lives in America. This network of churches represents one of the most vibrant and caring refugee resettlement responses in the world.

A special ministry of the Lutheran Immigration & Refugee Service is its resettlement of refugee minors who become separated from their parents during flight—the so-called unaccompanied minors. This is an exceptional program in which LIRS is one of only two agencies in the entire United States with the expertise and commitment to care for this sensitive population.

We in Congress also benefit from the fact that so many Lutheran congregations associated with LIRS not only resettle refugees, but advocate policies to assure refugees of continuing protection and support. LIRS has been a leading voice on behalf of Indochinese, Central Americans, Eastern Europeans, and other refugees around the globe.

Mr. President, I know my colleagues in the Senate join me in commending this remarkable voluntary agency for its 50 years of service on behalf of uprooted people in every corner of the world. And we know the next 50 years will be even more successful than the first.

TERRY ANDERSON'S CONTINUING CAPTIVITY

Mr. MOYNIHAN. Mr. President, today marks the 1,705th day that Terry Anderson has been held in captivity in Beirut.

I ask unanimous consent that a recent Buffalo News article on this matter be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Buffalo News, Oct. 25, 1989]

CAPTORS RENEW DEMAND

BEIRUT, LEBANON.—Pro-Iranian kidnappers holding Americans Terry Anderson and Thomas Sutherland revived an old demand yesterday for the release of 15 Shiite Muslim comrades held in Kuwait for bombing the U.S. and French embassies.

"We renew our firm emphasis on the need to free our struggling brethren from the jails of the collaborating Kuwaiti regime, and declare that the Mujahedeen (holy warriors) shall not rest until they see their brethren free," said a statement from Islamic Jihad, or Islamic Holy War.

Copies typewritten in Arabic were delivered to the independent newspaper An-Nahar and a Western news agency in Muslim west Beirut. Accompanying the one delivered to the agency was an instant photograph of Anderson, a former Batavia resident who was kidnapped March 16, 1985, and has been held longest of the 18 Western hostages.

The photograph was similar to one released by Islamic Jihad on Nov. 4, 1988, with the last statement from the group, showing Anderson about to cut a birthday cake.

No cake was visible in the latest picture, a close-up from a slightly different angle that showed Anderson from the waist up, mustached and smiling, wearing glasses and a yellow T-shirt. In the background is what appears to be the same blue curtain.

Anderson, chief Middle East correspondent for The Associated Press, will be 42 on Friday. It will be his fifth birthday in captivity. Sutherland, 57, of Fort Collins, Colo., was acting dean of agriculture at American University of Beirut when he was adducted June 9, 1985.

The Shiite Muslims in Kuwait were convicted on terrorist charges stemming from the embassy bombings, in which at least five people were killed and 86 wounded. Kuwait has refused previous demands to release the prisoners.

With the statement delivered to An-Nahar were two pictures of the U.S. Marine base and the French paratroop headquarters attacked with truck bombs Oct. 23, 1983. Islamic Jihad said it issued the statement to mark the anniversary of the bombings, which killed 241 U.S. military personnel and 58 French soldiers.

"We are proud of our martyrs who destroyed the Marine and the French paratrooper headquarters in Beirut, and the

spying nests (embassies). We are determined to follow their path," Islamic Jihad said.

Reaction in Washington was negative.

"There is nothing new here," a State Department official said. "It's just another cynical attempt to influence the American public."

The official who spoke on condition of anonymity, added: "Our policy remains: No deals. We are not going to reward hostage-takers."

Like most other radical Lebanese factions claiming to hold Western hostages in Lebanon, Islamic Jihad is believed to be a group of Shiite zealots loyal to Iran.

President Hashemi Rafsanjani of Iran offered on Monday to help get the hostages freed if the United States released frozen Iranian assets or helped determine the fate of three Iranians kidnapped in Lebanon.

Iranian assets in the United States, now worth an estimated $11 billion to $12 billion, were frozen in 1979 after militants seized the U.S. Embassy in Tehran. They held 52 Americans hostage for 444 days.

The three Iranians are believed dead. They are Ahmad Motevaselian, commander of Iranian Revolutionary Guards based in the Bekaa Valley of eastern Lebanon; Charge d'Affaires Hussein Musavi; and Kazen Akhavan, a correspondent of the official Islamic Republic News Agency.

Christian militiamen seized the Iranians and their Lebanese Shiite driver Rastegar Moqadam, who also held an Iranian passport, in north Lebanon in July 1982. The driver also is missing.

The 15 men Islamic Jihad wants released are Kuwaiti, Iraqi and Lebanese Shiites convicted of a bombing spree in which several government and private Kuwaiti installations also were attacked.

Over the past four yeas, Islamic Jihad has released four U.S. hostages and three Frenchmen. In 1985 it killed American captive William Buckley, described as the chief of the CIA in Beirut.

TESTIMONY OF JAMES C. KIELSMEIER

Mr. KENNEDY. Mr. President, it has come to my attention that testimony by Mr. James C. Kielsmeier, president of the National Youth Leadership Council at the University of Minnesota, was inadvertently omitted from the Labor and Human Resources Committee hearing record on the national and community service. I ask unanimous consent that Mr. Kielsmeier's statement be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

[Written Testimony for U.S. Senate Committee on Labor and Human Resources]

SERVE-AMERICA: THE SERVICE TO AMERICA ACT OF 1989

(By James C. Kielsmeier)

("As for myself, I learned that for the first time in my life I accepted the mentally handicapped for what they are and didn't just feel sorry for them like I did in the past. This may sound strange, but through working with the women and learning to understand them, I've come closer to understanding myself. It's like while I'm working with them to broaden their perspective, I find myself broadening my own. In a way we're like a team. I help them and they help me and together we've gained a healthier self-concept."—Student volunteer at a home for the mentally retarded, part of a college course organized by the National Youth Leadership Council)

WHY THIS TESTIMONY

I'm compelled to offer testimony on this legislation because of what I know of people like the young woman who wrote the above in her journal. Youth service is not for me a vauge conceptual framework of enlightened social engineering. I'm a person who works with kids—for over 25 years, a youth worker. Youth service is a hands-on reality for me, something that is good for kids—all kinds of kids, and good for America.

After years as a school teacher, soldier, wilderness instructor and college professor I have found in the act of engaging young people in interesting, useful service for others the most powerful youth development tool at my disposal. In the process I have learned and grown in my respect for the incredible capacity of our younger citizens to work, create, problem solve and give. Young people *are* a vastly underused and underacknowledged resource.

Convinced by the validity of youth service or service-learning as an educational and community development process, I set out, with a number of colleagues, to shape a comprehensive operating model of youth service in the state of Minnesota. As our plans have begun to bear fruit and as other states and national leaders have come to similar conclusions I have offered the example of our work—a single state, a comprehensive plan—that might be instructive as a national plan for youth service is shaped.

A MINNESOTA MODEL: TOWARD A LARGER VISION OF YOUTH SERVICE

Here in Minnesota youth service is a growing collaboration of schools and colleges, traditional youth organizations, the adult volunteer community, and the private sector—bolstered by public officials such as Governor Rudy Perpich and members of the Minnesota Legislature, who are giving visible support and needed fiscal backing through legislation.

Collaboration has been forged around a shared vision: "to see youth service opportunities available and integrated into every level of the growing up experience of Minnesota youth." An outline of that vision is found in figure A.

We believe that a comparable mission could and should be created for the nation to form the foundation for new national service legislation. Our present and future internal security is dependent on a citizenry who are invested in this nation. Citizenship is learned behavior taught through progressive involvement in the community—taught through service at every age and development level. No longer can we rely on our family structures alone to nurture the next generation for responsible participation in the democracy. Modern citizen building must be a team effort involving and engaging all the potential key actors who influence and educate our children and youth. Thomas Jefferson's insights are no less important today than they were during this time:

"I know no safe depository of the ultimate powers of the society but the people themselves; and if we think them not enlightened enough to exercise their control with a wholesome discretion, the remedy is not to take if from them, but to inform their discretion by education."—Thomas Jefferson

Converging with this recognition that young people need to become educated as responsbile citizens through active service, is the growing realization that young people are needed! In Minnesota the merging of these seemingly desperate ideas has been dramatic.

High school students in several rural schools are trained by science teachers to be emergency medical technicians and are routinely called out of classes to operate the town ambulance, a service that would not be available without student volunteers. A coalition of Minnesota colleges currently fields over 1500 mentors and tutors to work with low achieving grade school youth. The Minnesota Conservation Corps, made up of low income young adults, is spearheading the statewide cleanup of Minnesota rivers.

GRASSROOTS INITIATIVE YIELDS STATEWIDE PROGRAMS AND LEGISLATION

Private foundations, ACTION and state government have seeded the Minnesota initiative allowing for piloting of creative models that have inspired landmark legislation which passed during the just completed 1989 session of the Minnesota legislature. This legislation is comparable to Title I: School and Campus-Based Community Service, in that it funds start up youth service programs at both the school and college level.

1989 K-12 school legislation passed:

Will generate over $1 million annually for schools doing youth service.

Based on local tax levy, making this the first statewide community-funded youth service program in the nation.

Youth Service funding contingent on community-based planning process.

Offers schools the opportunity to grant credit for service activities.

1989 College legislation passed:

$150,000 state appropriation.

Grants of $10,000 each to be used for start up programs must be matched by colleges.

State Coordinator of college-based service funded.

In addition to the new funding, related bills just passed in the 1989 legislative session gave formal authorization and increased funding to the Minnesota Conservation Corps and increased funding to the Minnesota Office on Volunteer services, Department of Administration, who will prepare hospitals, nursing homes and other volunteer placement sites for the influx of new youth volunteers.

Through private sector sources and redirected existing funds, several schools and colleges in Minnesota developed youth service models which have inspired the recent state legislation. Clearly, without these demonstrations of quality service programs, integrated into the curricula of Minnesota schools and colleges, there would have been no landmark state legislation this year. My point is that focusing on start up grants to

existing institutions is a good way to channel youth service funding—which is what you have proposed in Title I of Service-America.

Exemplary pilot models have done much to trigger the statewide youth service movement in Minnesota and Federal funds, directed in this manner, should have a similar effect in other states.

REGIONAL TRAINING CENTERS ESSENTIAL

I also support the proposal to fund regional, catalytic organizations that will bolster the start up of local and regional program models. The National Youth Leadership Council (NYLC) has played this role in Minnesota and in several other states. Training is essential for teachers who wish to integrate service methods into the curriculum. Recognizing this, the NYLC launched this year, with the support of private funders and the Minnesota Department of Education, a series of teacher workshops, a week-long teacher institute at the University of Minnesota, a two week training session for high school students and a curriculum writing project involving a team of teachers. Constitutional Rights Foundation in Los Angeles has provided training and support services to California schools in a comparable manner. Similar efforts could be initiated nationally by organizations such as would be funded by the legislation.

NATIONAL RECOGNITION AND COMPREHENSIVE FEDERAL SERVICE STRATEGY

Titles III and IV make good sense as written. It should be noted however, that a key to redirecting existing government resources for youth service is that identification of a compelling mission for young people to accomplish. Young people make good soldiers, which is why we drafted 18 year olds. Every level of government which seeks to engage youth in service should give serious consideration to important tasks which need to be accomplished, make-work projects will give this phase of the national effort a bad name and will not actively engage young people. Along with the Yellowstone Project, young people, through use of Forest Service, Department of Interior or EPA resources, could begin a massive environmental inventory and improvement project reminscent of the Civilian Conservation Corps. This would be vital, necessary work that all the nation would respect. Similar efforts directed by HHS could engage young people in the fight against AIDS or address the needs of the isolated elderly. The list of possibilities is considerable.

CONCLUSION

I find the proposed legislation comprehensive and creative, and potentially helpful to state models such as Minnesota's.

I appreciate the opportunity to offer this testimony and hope the Senate will find in the Minnesota experience, a useful model for the crafting of federal legislation.

CHRISTOPHER BABCOCK

Mr. ADAMS. Mr. President, last Saturday night, the ongoing violence in El Salvador struck home in my State with the tragic death of Christopher Babcock, of Spokane, WA. I want to join with those who have expressed their sorrow and sense of shared loss with Christopher's parents Jack and Kay Babcock, his sister Amy, and his brothers John, Patrick, Paul, and Matthew.

Christopher Babcock was much more than just an innocent bystander when he was struck by a grenade fragment in San Salvador last weekend. His presence in that war-torn country was living testimony to the kind of youthful idealism and dedication to mankind that is truly the best of what this country has to offer. In losing his life through a cruel twist of fate, Christopher Babcock died the death of a martyr. The occasion of this tragedy should be sufficient for all of us to rededicate ourselves to demanding that our role in El Salvador be that of a peacemaker and a voice for reason. We owe that much and more to Christopher Babcock, and indeed, to all the other noncombatants who have been caught in the crossfire between competing forces in El Salvador's bloody civil war.

Mr. President, Christopher Babcock wanted to be a school teacher from the time he was a student at Gonzaga Prep in Spokane. As a student at Washington State University in Pullman, he chose to enter the school's international education program. After a brief period teaching in Taiwan, he went to San Salvador to teach English and advanced social studies at a private school with students from kindergarten through grade 12.

Mr. President, some might ask, "Why would a young man from a comfortable background take such an assignment, in a battle scarred little central American country in the throes of a civil war?" Perhaps the best answer to that question comes from his mother, Kay, who recently noted, "The students he was teaching lived in a very small world. He wanted to convey that there was more to life than what they saw. He wanted them to think for themselves."

Christopher Babcock's brief life of 25 years speaks well of the family, friends, teachers, and students who helped instill such a selfless and generous spirit in this exceptional young man. Those who knew and loved him, and particularly his students in El Salvador, must feel a sense of loss that seems without limit. I sincerely hope that the many lives he touched will continue to be inspired by the good work of a young man's life that ended far too soon.

Mr. President, I am proud to represent the State that Christopher Babcock called home.

CONCLUSION OF MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Morning business is now closed.

JOINT MEETING OF THE TWO HOUSES—ADDRESS BY LECH WALESA, LEADER OF THE POLISH FREE TRADE UNION SOLIDARITY

RECESS UNTIL 12 P.M.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Senate stand in recess.

Thereupon, the Senate, at 10:44 a.m., took a recess, and the Senate, preceded by, the Secretary of the Senate, Walter J. Stewart; the Sergeant at Arms, Henry K. Giugni; the Vice President of the United States, and the President pro tempore, ROBERT C. BYRD, proceeded to the Hall of the House of Representatives to hear the address by Lech Walesa, leader of the Polish Free Trade Union Solidarity.

(The address delivered by Lech Walesa, leader of the Polish Free Trade Union Solidarity to the joint meeting of the two Houses of Congress is printed in the proceedings of the House of Representatives in today's RECORD.)

At 12:10 p.m., the Senate, having returned to its Chamber, reassembled, and was called to order by the Presiding Officer [Mr. BINGAMAN].

The PRESIDING OFFICER. In my capacity as a Senator from the State of New Mexico, I suggest the absence of a quorum.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. FOWLER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. SHELBY). Without objection, it is so ordered.

Mr. FOWLER. Mr. President, I ask unanimous consent to speak for such time as I may consume, as if in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator from Georgia is recognized.

LECH WALESA

Mr. FOWLER. Mr. President, I was about to go meet with a group of Georgians to discuss some problems of modern American agriculture and our attempts to continue to support our farmers and strengthen the food security of our country. But I think it would be remiss if I did not take a few minutes to report to my colleagues, most of whom were there, but by extension to the American people, on the extraordinary experience that we in the United States Congress just had in hearing Mr. Lech Walesa, the leader of the Solidarity movement in Poland, and now one of the finest, if not the finest spokesman for democracy in our world.

I will not attempt to paraphrase his stirring words, spoken in simple, precise, specific language; the words of an electrician, a dock worker from the city of Gdansk, in Poland. I believe that freedom does lie in the hearts of every man and woman as an intrinsic right. He, through his perseverance, stubbornness, determination, and dedication, and, by extension, his coworkers and the people of Poland, have shown the United States of America that democracy is alive and can be achieved, even in the Communist countries of the world.

It was an extraordinary address; only the third, I understand, of someone not a head of state ever invited to speak to a joint meeting of the U.S. Congress.

I take to my feet this morning to urge every schoolteacher in this country to get a copy of Mr. Walesa's remarks and read them to the schoolchildren of our country. They will be understandable to every school child from the fourth grade upward.

It is the story of a man in a Communist country, fired from his job in the shipyard who said, "This is not right." Rather than sit down on the job or go out whining in the streets, as he told us this morning, he jumped back over the fence into the shipyard and said to his coworkers that we can give more to our country than tyranny can ever exact from us; that, we can stand together and improve the economic conditions of our country, the moral conditions of our country. Communism as an economic and a moral force has failed.

And if nobody else will show the way, then we will do it, as he challenged us, the leader of the free world, whose aid and efforts have given hope to so many Europeans, from the postwar Marshall plan to the action of the United States Senate yesterday in voting $780 million. That investment will go further, in his words, to achieving the future security of his country and Eastern Europe than many of the tanks and armaments that have been necessarily in place as a hope that this day might soon come.

There is a play that won the Pulitzer Prize in our country in 1945 called "The State of the Nation." In it there is a fictitious President of the United States. He has had a bad day. He was trying to go to bed, and suddenly one of the aides rushes up to him and says, "Oh, Mr. President, before you retire for the evening, there are a bunch of Southerners who would like to see you."

Seeing the scowl on the President's face, the aide said "Please, Mr. President, please see them. They can deliver a lot of votes." The wife of the President turns to her husband and asks, "How do you deliver the votes of a free people?" to which the President replies, "My dear, whenever people are ignorant or prejudiced or lazy, they are never free."

Those of us in the United States of America, the land of the free and the home of the brave, take off our hats for the renewed example given by the people of Poland, the people of Hungary, the people of Eastern Germany, of how a repudiation of laziness and a determination to claim God-given rights will not be thwarted. I only hope that that renewed lesson will go to every young American as we salute the people of Poland for their leadership and thank Mr. Walesa for inspiring us all today.

Mr. PRESIDENT, I yield the floor.

The PRESIDING OFFICER. The senior Senator from Georgia.

Mr. NUNN. Mr. President, let me commend my colleague from Georgia for an eloquent expression—I think on behalf of everyone in this body—of the reaction of the Senate to the wonderful message we just heard, an inspiring message, a message of courage, a message of stubborness, a message of peaceful revolution.

That is what we are seeing in Eastern Europe, a revolution. It is peaceful, but it is revolution. It is political revolution, it is economic revolution, and it is indeed changing our world for the better.

Mr. President, I commend the Senator from Georgia for his statement, and I associate myself with his remarks.

DEPARTMENT OF DEFENSE AUTHORIZATION ACT—FISCAL YEAR 1990

Mr. NUNN. Mr. President, I submit a report of the committee of conference on H.R. 2461 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 2461) to authorize appropriations for fiscal year 1990 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe personnel strengths for such fiscal year for the Armed Forces, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the Senate proceedings of the RECORD of November 6, 1989.)

The PRESIDING OFFICER. There will be 2½ hours of debate on the conference report, with 1 hour under the control of the Senator from Georgia [Mr. NUNN], 50 minutes under the control of the Senator from Virginia [Mr. WARNER], 10 minutes under the control of the Senator from Wyoming [Mr. WALLOP], and 30 minutes under the control of the Senator from Ohio [Mr. GLENN].

The Senator from Georia.

Mr. NUNN. I thank the Chair.

Mr. President, I am pleased to lay before the Senate the conference report on H.R. 2461, the National Defense Authorization Act for fiscal years 1990 and 1991.

This conference report authorizes programs for the Department of Defense, the national security programs of the Department of Energy, and the civil defense functions for fiscal years 1990 and 1991.

The conferees of the House and Senate have worked very hard for the last 8 weeks to resolve the hundreds of funding and major policy differences between the Senate and House versions of this bill.

It was in a spirit of compromise and cooperation between the House and Senate conferees, as well as the Secretary of Defense, Dick Cheney, and his deputy, Don Atwood, which allowed the conference to complete its work at this stage.

I want to thank Chairman ASPIN and Congressman DICKINSON for their leadership in this conference. I also want to thank my friend and colleague, Senator WARNER, the ranking member of our committee, for his splendid leadership, his cooperation, his support, and his superb efforts in this bill from the very beginning of this year through this date.

Without that kind of cooperation, without the kind of cooperation we have had between his staff and the staff on the majority side, we would not be here today with this report. I thank him for that continued superb leadership.

Mr. President, I want to thank every member of the committee, particularly the chairman and the ranking members, for all their work this year. I want to take a few moments to highlight some of the major features of the conference report for our colleagues.

The conference bill authorizes $305.5 billion in budget authority and $299.1 billion in outlays for fiscal year 1990, which fully funds the administration's amended budget request.

I think it should be said here that a good bit of this money is not going to defense; however, it is going to other causes that have very high priority that have been agreed to, including several hundred million dollars for drugs and $140 million for aid to Poland. All of these total a little over $2 billion.

In addition, the bill meets both the budget authority and outlay targets

set by the April 1989 bipartisan budget agreement and by the fiscal year 1990 budget resolution.

While the overall funding level authorized in the conference report is consistent with the amended budget request, the funding in some areas of the bill, such as procurement, are significantly above the requested levels; and in other areas, such as operation and maintenance, the authorized funding is significantly below the request.

Mr. President, I assume we will have an appropriations bill conference report, since they have completed their work, that will follow soon. The details of the transfers for the Nation's antidrug effort are contained in that appropriations bill.

But I think everyone should consider the context of both bills because that is how we will have the final product. The funding adjustments that we made were necessary to meet the outlay requirements of the bipartisan budget agreement and the budget resolution.

The conferees worked with Secretary of Defense Cheney in determining how best to reduce the outlays in the amended budget request by $3.8 billion. Targets for the allocation of the funding authorized in each of the titles of this conference report were adopted by the conferees based on the recommendations of the Secretary of Defense.

Mr. President, the defense authorization bill has been the victim of some very frustrating problems in the budget process this year. It is not new. We have been going through this for several years. But it is getting worse every year.

We have several technical provisions here which we hope are going to help alleviate some of the problems; namely, the disparity we get each year in the budget resolution between budget authority and outlays.

Putting the matter simply, Mr. President, what we are given in budget authority in the budget resolution is usually higher than what we can accommodate with the lower outlay level. What that boils down to is, for those who do not want to get involved in all the arcane kinds of study that would be necessary in determining this very cumbersome and complex budget process we now have, is the Defense authorization and Appropriations Committees are given, in effect, a mandate to achieve something that is impossible without seriously distorting the overall funding levels and, in some cases, almost unbalancing some of the defense considerations.

What we are given the incentive to do is to put more programs in the budget that spend slowly, keeping the budget authority number at the higher agreed level and yet causing the actual expenditures to be reduced. If you build ships, if you build tanks, if you build planes, even though you have the authority to start those this year, those programs do not spend out in 1 year. They spend out over several years. Therefore, when you get a budget authority number that is higher than the associated outlay number, that is, expenditures, in the given year, the only thing that we can do in this circumstance is to cut accounts that spend very rapidly—such as personnel, operation and maintenance, spare parts—and to put more in the slower spending accounts now.

What is wrong with that? There are several things wrong with it. One thing is that it drives expenditures up in future years. I am one of those who supported Gramm-Rudman, but I am becoming increasingly frustrated with what I believe is its counterproductive nature of measuring all expenditures on a 1-year outlay basis. That is causing distortions all through the fiscal affairs of our country, most notably in defense, because what we are in effect being encouraged to do by the very budget process that is supposed to be saving us money is to drive up spending in future years in order to hold it down now. We are seeing gimmicks played all over the whole budget.

We voted on capital gains yesterday. There was an IRA provision in the capital gains package and that is one of the reasons I voted against cloture. I favor capital gains reduction and I favor the general thrust of the Packwood proposal on capital gains. I hope we can pass it next year. But there was an IRA provision in there that basically tried to raise revenue in the short term at the expense of costing a great deal of revenue in the long run in order to meet these budget requirements and to make the capital gains expenditure, or revenue loss side, look less onerous. So we are doing this all through the budget process, not simply in defense.

It is time for the leadership of the House and the Senate and the White House to sit down and come up with a 5-year budget plan and quit behaving as if everything happens in 1 year. The financial markets are smarter than that. The American people are smarter than that. If we do not start dealing with this budget in defense and other matters over a 3- to 5-year period, then we are going to continue to be counterproductive in the way we are handling this Nation's fiscal affairs, and our errors in this respect will be paid for in the future. No one can predict exactly how we will pay for them, but I think we will have a slow erosion, or perhaps even a more rapid erosion, unless we change our fiscal behavior.

When the President submitted his amended budget request following the bipartisan budget agreement with Congress last April, the budget authority totals in his request complied with the agreed target of $305.5 billion. While the outlays associated with this request met the target of $299.5 billion according to administration estimates, the Congressional Budget Office estimated that the outlays exceeded the target by $3.8 billion.

This technical disagreement between OMB and CBO has created a situation in which the House and Senate Armed Services and Appropriations Committees have been required to cut $3.8 billion in outlays from the amended budget request without cutting any budget authority. This could only be done by disproportionate reductions in the faster spending personnel and operating accounts, coupled with large increases in the slower spending investment accounts. When we are forced by short-term outlay constraints to increase slow-spending procurement programs, the long-term result is that defense outlays are increased, not decreased.

The technical disagreement in outlay estimates between OMB and CBO has been compounded this year by disagreements between the House and Senate Budget Committees on the scoring of the defense authorization and appropriations bills.

Under the procedures used by CBO to score the fiscal year 1990 Defense Appropriations bill in the Senate, this conference report complies with the budget resolution targets for national defense. However, under the CBO scoring rules relied upon by the House Budget Committee, this conference report would not be consistent with the budget resolution targets without a cap on expenditures, or outlays, in DOD.

The conferees hoped to avoid a repetition of this situation next year. The conference agreement includes an amendment requiring the Director of the Office of Management and Budget and the Director of the Congressional Budget Office to report jointly to the Speaker of the House of Representatives and the Committees on Armed Services, Appropriations, and the Budget of the Senate not later than December 15 of each year on the resolution of all differences in technical estimating methods with respect to the national defense function. Any differences that could not be resolved would be averaged.

In addition, the amendment expresses the sense of Congress that the technical estimating methods contained in this joint report should be used in the submission of the President's budget request for national defense, in the preparation of the budget resolution, and in all scorekeeping of the defense authorization and appropriation bills.

Finally, the amendment expresses the sense of Congress that the outlay

target contained in the budget resolution should not require any reductions in outlays from the President's request for national defense in excess of those that could be achieved by an across-the-board reduction of each title in the President's national defense budget authority request, unless the budget resolution is accompanied by a report describing the differences between the President's request and the budget resolution.

Mr. President, the conferees understand that the overall level of defense spending must be decided in the context of the broad fiscal policy situation that is properly considered in the debate on the budget resolution. The intent of this provision in the conference agreement is to eliminate the technical disagreements over outlays that in the past have disrupted the defense authorization and appropriation processes, and to permit the defense committees to make decisions on defense programs based on national security considerations rather than technical budget factors.

TWO-YEAR BUDGETING

There is some good news on the budget front. I am very pleased that the conference bill sustains the initiative of the Senate Armed Services Committee to authorize defense spending for a 2-year period. For several years, the committee has promoted biennial budgeting as a way to improve congressional oversight of defense programs and to achieve long-term savings and better defense management.

As part of this effort, the conference approved 80 percent of the defense authorization request for fiscal year 1991. Because of the uncertainty of the overall Federal budget, the conferees could not determine an overall top-line figure for defense spending in fiscal year 1991. So there is no way we could deal with 100 percent of the authorization. In addition, the conferees did not authorize the entire fiscal year 1991 budget request because future funding of controversial programs is uncertain in the face of declining defense budgets.

The Armed Services Committee intends to continue to work for adoption of a 2-year budget for the Department of Defense.

PROGRAM TERMINATIONS

One of the most difficult issues before the conference was the question of program terminations. The Senate-passed bill endorsed all of the major program terminations proposed by Secretary Cheney in the amended budget request. The House-passed bill continued many of these proposed program terminations. The conferees concluded that program terminations are essential in order to meet the fiscal constraints of the Five-Year Defense Program and avoid further deterioration of already unacceptably low production rates of most weapon systems.

We argued long and hard over this. The Senate would have liked obviously a much stronger position. We had terminated these programs as requested by the Secretary of Defense. The House had funded several of those programs, most notably the F-14D and the Army helicopter improvement program. This, in effect, had turned down the Secretary's request. We worked out a compromise which we believe keeps the thrust of the Secretary's request while giving these programs what I would term a soft landing, meaning we phase them out over 1 or 2 years, but we do have definite fixed termination language in this conference report. For instance, on the F-14D, before further aircraft can be built, not only the Defense Department but also the contractor have to sign up for this termination so there is no doubt in my mind that this conference report will bring about the terminations as called for.

The exception here was the V-22, which will receive continuing research and development funds but no new funds for procurement. We deem that to be a program that has had a lot of expenditure. It is a high technology program, a real breakthrough in many respects in aviation, and we felt that at a minimum that program should be continued through the research and development stage. We make it clear in the report language that the program is enormously expensive; the contractor, as well as the Department of Defense and those who favor this program in the Department of Defense, the Marine Corps and others, are going to have a lot of work to do between now and next year to determine if they can expand the number of users of that aircraft so that the overall per unit cost and the overall program cost makes more sense from a defense point of view and, hopefully, also from a commercial point of view.

The conference bill terminates all of the programs canceled by Secretary Cheney, except for the V-22, which will receive funds for research and development but no new funds for procurement.

The conference agreement terminates the following programs in either fiscal year 1990 or fiscal year 1991:

F-14D new production Navy aircraft, after fiscal year 1990;

F-15E Air Force aircraft, after fiscal year 1991;

AH-64 attack helicopter, after fiscal year 1991;

Army helicopter improvement program, after fiscal year 1990; and

M-88A2 armor recovery vehicle, after fiscal year 1989.

Secretary Cheney proposed the termination of the F-14D aircraft and the Army helicopter improvement program [AHIP] after fiscal year 1989. after spending considerable time deliberating this proposal, the conferees decided that the F-14D and AHIP aircraft should be terminated after fiscal year 1990.

Since the F-14D and AHIP aircraft will be in service for many years, the Navy and the Army will have to protect engineering and manufacturing functions in order to support the aircraft once their production lines are shut down. The conferees decided that a final, one-time purchase of aircraft would facilitate the transition required in the industrial base to support these aircraft after their production lines are closed. Thus, the conference authorized funds for 18 new production F-14D aircraft and 36 AHIP modifications.

For the F-14D program, the conference bill would further require that the manufacturer sign a contract to terminate further production before the funds authorized and appropriated for fiscal year 1990 aircraft could be spent.

For the AHIP program, the line is terminated after the fiscal year 1990 one-time purchase of 36 aircraft.

The conferees strongly supported and fully funded the administration's amended budget request for the remanufacture of F-14 aircraft.

The conferees did not restore procurement funds for the V-22 program, but they did provide $255 million for continued research and development. Procurement funds were not authorized because the program currently is too expensive.

The conferees approved R&D funds in order to give the contractors the opportunity to demonstrate the commercial potential of the aircraft during the next year. At the same time, the conferees directed the administration to study the cost effectiveness of additional military applications for the V-22 aircraft.

The conferees did not authorize advance procurement funds for fiscal year 1990, but they did not restrict the Secretary of Defense from utilizing prior year procurement funds.

BURDENSHARING

There were several major burdensharing issues before the conferees. The conference agreement includes a Senate provision that is intended to reinforce U.S. efforts to persuade NATO members not to make significant unilateral reductions in their active duty forces deployed in Europe while the alliance is trying to reach an agreement with the Warsaw Pact to reduce conventional forces in Europe. This provision requires the Secretary of Defense to ensure that, for the next 3 years, the ratio—expressed as a percentage—of U.S. Forces deployed in Europe to allied forces deployed in Europe does not exceed the current ratio by more than a specified amount.

So we are basically saying to our European allies we are going to hold the line but we want you to do the same thing and we are not willing, while we are negotiating arms control, to see the proportion of U.S. forces going up in Europe. We are all in this together, and I think we need to stick together.

The conferees also agreed to adjust the existing European troop strength ceiling established in the Department of Defense Authorization Act for Fiscal Year 1985 to reflect the elimination in Europe of approximately 15,000 manpower positions related to the U.S. intermediate-range nuclear forces [INF] which will be destroyed by 1991 under the terms of the INF Treaty. Finally, the conferees agreed to allow the relocation of the 401st Tactical Fighter Wing from Torrejon Air Base, Spain, to Crotone Air Base, Italy, to proceed, but specified that the U.S. contribution to the costs of relocating all activities from Torrejon could not exceed $360 million.

DEPARTMENT OF DEFENSE ROLE IN DRUG INTERDICTION

The conferees applauded Secretary Cheney's recent decision to enhance the Department of Defense's role in the Nation's counterdrug effort. The conference agreement authorizes up to $450 million to carry out the Defense Department's drug interdiction and law enforcement support activities in fiscal year 1990, an increase of $150 million over fiscal year 1989.

Building on legislation enacted last year, the conferees decided that the detection and monitoring of drug shipments is a military mission and not merely a discretionary activity performed to assist civilian law enforcement agencies. In addition, the conference bill provides $70 million to the National Guard for increased drug interdiction and law enforcement activities.

The conference agreement contains several other important initiatives concerning the Defense Department's counterdrug activities. It requires the Department of Defense to include in the Department's annual budget submission a separate budget proposal for drug interdiction and support to civilian agencies. It encourages the armed forces to conduct training in drug interdiction areas, and it authorizes the Secretary of Defense to transfer excess Department of Defense personal property to Federal and State agencies with counterdrug responsibilities. Finally, it authorizes the Secretary of Defense to provide up to $40 million in support services to Federal agencies with counterdrug responsibilities.

STRATEGIC FORCES AND NUCLEAR DETERRENCE

Strategic programs were another major area of disagreement between the House and Senate versions of the bill. The conference agreement generally continues the ongoing strategic modernization program, in both weapons systems and command, control and communications programs, but at a somewhat slower rate than was requested by the administration.

For the ICBM modernization program, the conference agreement authorized $1.13 billion for both the small ICBM and the rail garrison MX. This level is $150 million below the administration's request for $1.28 billion for both programs. The bill gives the Secretary of Defense the authority to allocate the $1.13 billion among procurement; research, development, test and evaluation [RDT&E]; and military construction.

The conference agreement authorizes a level of $3.79 billion for the strategic defense initiative, $3.57 billion in DOD and $220 million in the Department of Energy. This program is going down slightly from previous year's funding.

The conferees extended by 1 year the restriction in the past two Defense authorization acts which required that SDI tests and experiments be conducted in accordance with the plan outlined in the annual SDI organization [SDIO] report to Congress. During the fiscal year 1990 budget hearings, Defense officials confirmed that this plan was established in accordance with the President's standing directive that the SDI program be conducted in accordance with the traditional interpretation of the ABM Treaty.

The conference agreement authorizes production of two B-2 bombers in fiscal year 1990 and long-lead items for five B-2's in fiscal year 1991. The funds for the two B-2 production aircraft may not be obligated until:

First, the initial block of flight testing is completed;

Second, the Director of Operational Test and Evaluation has reviewed the test results and provided the Secretary of Defense with an "early operational assessment";

Third, the Secretary of Defense has provided to the Congress a cost, capability and schedule report;

Fourth, the Secretary has provided to the Congress an unclassified version of the B-2 full performance matrix;

Fifth, the B-2 has begun its low-observability flight testing; and

Sixth, the Secretary of Defense certifies to the Congress that the early testing has not identified major aerodynamic or flightworthiness problems.

The Senate and House sides agreed that we should not go headlong into this B-2 program without making darned sure that the high technology is going to really work as advertised. We think that is enormously important, and the fences in this bill we believe will facilitate that goal.

The conference agreement authorizes another Trident missile submarine and $1.5 billion for Trident II missiles, with the expectation that the recent flight test problems will be resolved.

The conference agreement fully funds the Milstar Satellite Program and a second Titan IV booster launch facility on the west coast.

Another very important area that our committee took a lead in is the national security programs of the Department of Energy. The conference agreement adds $357 million to the administration's budget request in order to accelerate the cleanup of the extensively contaminated facilities in the nuclear weapons complex. The conference agreement authorizes a total of $1.7 billion in waste cleanup accounts, a 68-percent increase over last year's funding level and a 27-percent increase over the administration's amended budget request. This figure includes $572 million for environmental restoration and $700 million for waste management. The conference agreement also includes $155 million to develop innovative cleanup technologies and to establish a new Cleanup Technology Program.

Mr. President, this whole area of nuclear and hazardous waste cleanup in the future is going to take more and more and more of the resources of the Department of Energy and the Department of Defense. These are very, very important matters. We are beginning down a road that is going to be a long and very expensive road.

In addition, the conference agreement contains several other provisions to improve DOE management and cleanup efforts. Among other things, the conference agreement:

Establishes annual reporting requirements for major national security programs;

Requires 5-year planning for all DOE defense programs;

Authorizes a management training program for DOE employees in the national security area; and

Recognizes that environmental restoration is one of the major missions of DOE's national security programs.

The agreement also contained several other important initiatives. In order to improve the technical qualifications of DOE personnel, the conference bill removed statutory limitations on the ability of critically needed DOE employees to return to DOE laboratories after Government service. The conferees also agreed to require a certification by the Secretary of Energy that the special isotope separation project is essential to U.S. national security and is necessary to meet plutonium requirements before site preparation for this project begins. Finally, the bill contained an initiative to foster the commercial application of technologies developed at DOE laboratories.

CONVENTIONAL FORCES AND ALLIANCE DEFENSE

In an effort to increase inventory levels for several advanced conventional munitions and to avoid stretching-out missile production rates, the con-

ference committee agreed to add funds to procure additional advanced conventional munitions above the levels in the amended budget request. These missiles include Hellfire, Stinger, and Standard missiles, and multiple launch rocket system [MLRS] rockets.

The conference committee endorsed a Senate proposal to improve the quality of equipment available to infantrymen in the Army and Marine Corps. This proposal would provide additional funds to the Army and Marine Corps to test commercially available equipment, from both domestic and foreign sources, and to field better weapons and equipment for our Nation's footsoldiers.

The conferees recognized the importance of the National Guard and Reserve Force contribution to the total force by authorizing $890 million above the administration's amended budget request. These funds will provide essential equipment to modernize the Guard and Reserve and to increase the combat readiness of these forces.

The conference authorized every program recommended for multiyear procurement, except the F-18 and E-2C aircraft. In the view of the conferees, the multiyear contract savings were insufficient to justify multiyear contracts for the F-18 and the E-2C at this time.

PROJECTION FORCES AND REGIONAL DEFENSE

Excluding the Trident program, the conference agreement authorizes $9.8 billion for the construction of new ships and the conversion of three existing ships. These include:

One SSN-688 class attack submarine;

Five DDG-51 class guided missile destroyers;

Three MCM-1 class mine countermeasures ships;

Three MHC-51 class coastal minehunters;

One LSD-41 class landing ship dock—cargo variant;

One AOE-6 class fast combat support ship;

One TAGOS ocean surveillance ship;

Three oceanographic research ships;

Twelve landing craft air cushion [LCAC] vehicles;

Conversion of one AO—jumbo—oiler;

One aircraft carrier service life extension; and

Refueling and modernization of the U.S.S. *Enterprise.*

The conferees agreed to authorize multiyear procurement of DDG-51 class destroyers and to increase funds for procurement of additional Standard surface-to-air missiles.

The conferees also adopted several important initiatives to strengthen U.S. sealift capability. The conferees authorized $15 million to help develop technologies to be incorporated into multimission ships. These ships could serve as fast sealift ships in time of war and support fleet operations in peacetime. In addition to R&D funds, the conferees added $20 million for the procurement of long lead items for multimission ships.

Because of continuing difficulties in the development of the C-17 cargo aircraft, the conferees reduced research and development and procurement funding for the program by $393.9 million from the administration's amended budget request. The authorized level of $2.1 billion will continue the program, but it reduces the number of aircraft procured in fiscal year 1990 from six to four.

DEFENSE INDUSTRY AND TECHNOLOGY

Because of continued strong support for defense science and technology base programs, the conferees authorized $3.51 billion for these programs, a $220 million increase over the administration's budget request for fiscal year 1990. The conferees recommended an authorization of $3.77 billion for fiscal year 1991 technology base programs, which will provide 2-percent real growth over the fiscal year 1990 funding level.

The conference agreement also significantly increased funding for several critical technology programs managed by the Defense Advanced Research Projects Agency [DARPA]. The conference agreement added: $40 million for the x-ray lithography program; $25 million for the digital gallium arsenide program; $20 million for the high resolution display program; and $12 million for the artificial neural network research.

The conferees continue to be concerned about the Nation's defense industrial base. As a result, the conference agreement adds $30 million to the administration's budget request for defense industrial preparedness programs. The conferees also recommended $100 million in fiscal year 1990 funding for the Semiconductor Manufacturing Technology [Sematech] Program.

The administration's request for the balanced technology initiative [BTI] was increased by $32 million to a total of $238 million to maintain funding at the fiscal year 1989 level.

In the area of small business subcontracting, the conferees agreed to establish a 3-year test program to study the potential benefits of a plan to allow prime contractors to negotiate with subcontractors on a companywide basis. If successful, this test program will enhance business opportunities for small and disadvantaged businesses.

The conferees also included bill and report language indicating their serious concerns over the recent decline in the U.S. science and engineering work force and the potential impact of this decline on national security. The Defense Science and Engineering Graduate Fellowship Program, initiated last year under the Hatfield-Nunn amendment, is authorized at $10.5 million in fiscal year 1990 and $11 million in fiscal year 1991.

The conferees also directed the White House Office of Science and Technology to prepare a national critical technologies report, which will form the basis of a more detailed defense critical technologies plan.

The conferees adopted several other initiatives in the defense acquisition area. They established a 3-year demonstration program to increase the use of commercial products. Second, because of the Ill Wind scandal, the conferees agreed to require the Department of Defense to develop a single, uniform regulation to ensure the integrity of the source selection process. The conferees also extended for 3 years an existing program which sets a 5-percent goal for the award of DOD contracts to small and disadvantaged businesses, historically black colleges and universities, and other minority institutions. Lastly, the conference agreement changes some of the Governmentwide postemployment restrictions in order to strike a proper balance between the need to stop abuses of the revolving door and the need to encourage people from industry with technical and managerial skills to enter public service.

READINESS, SUSTAINABILITY, AND SUPPORT

In the operation and maintenance accounts, the conference agreement authorizes a total of $86.2 billion, a reduction of $4 billion below the budget request. Of this reduction, $2.4 billion represents transfers of functions from the operation and maintenance accounts to the procurement accounts. The conference reduced the remaining $1.6 billion in order to meet the budget targets of the April 1989 budget summit agreement. The conferees made these reductions as broad and generic as possible in order to minimize their impact on the readiness and operations of the military services.

The conferees did not provide any funds to operate the SR-71 squadrons in fiscal year 1991, and the conferees agreed that the squadrons should be inactivated in fiscal year 1990 as proposed in the administration's amended budget request.

Funding for overseas military construction programs was reduced in light of uncertainties over future deployments of U.S. forces. The conference agreement authorizes $500 million in both fiscal year 1990 and 1991 to begin the process of closing and realigning military bases in line with the recommendations of the Commission on Base Realignment and Closures.

MANPOWER AND PERSONNEL

In the area of manpower and personnel, the conferees supported the hard choices Secretary Cheney included in the amended budget request. The con-

ference agreement sought to protect the gains in personnel readiness and to ensure that military personnel were treated equitably in terms of compensation and benefits.

In general, the conference agreement authorizes the manpower levels requested in the administration's amended budget request. The conferees recognized that funding constraints might require additional reductions in force structure. Therefore, the conference agreement gives the Secretary of Defense as much flexibility as possible by authorizing an overall cap of $78.8 billion for military personnel accounts in fiscal year 1990. This approach gives the Secretary of Defense the widest possible flexibility to meet this funding target, without specifying how specific reductions must be made.

In a package of improvements to military pay and benefits, the conference agreement provides a 3.6-percent pay raise for military personnel and a substantial increase in aviation career incentive pay to help retain military aviators. I know Senator GLENN will probably speak to that subject as chairman of Manpower Subcommittee. He did a very fine job in taking some initiatives in terms of retaining our very expensive and very valuable pilots. I believe these initiatives will pay off in terms of our needs in the future years.

The conference agreement also:

Increases the amount of money that the Army can pay in addition to basic GI bill benefits to aid the Army in recruiting quality enlistees in critical skills:

Increases the selective reenlistment bonus ceiling to help the Navy retain nuclear-qualified personnel;

Boosts funding for and improves the management of child care services for military personnel and their families;

Reduces the cost to current and future participants in the survivor benefit plan.

To improve health care for military personnel and their families, the conference agreement approves a number of initiatives to help recruit and retain health care providers, including physicians, nurses and nurse anesthetists. In addition, the conference agreement approves certain initiatives to hold down the cost of health care and to improve the efficiency of health care delivery to military personnel and their families.

Our committee is very concerned in this area. We have certain commitments to our military personnel and their families which are a very important part of the explicit as well as implicit contract with the personnel that serve our Nation, the men and women in uniform. So we want to do everything we can to improve the medical care delivery system in the military.

Finally, the conferees approved of the recent efforts of the Secretary of Defense and the Chairman of the Joint Chiefs of Staff to implement the provisions of the Goldwater-Nichols Defense Reorganization Act which relate to professional military education. These efforts will strengthen the focus of professional military educational institutions on joint matters and will help prepare officers to serve in joint duty assignments and to become joint specialists. The conferees also agreed upon a statement of congressional policy on the subject of professional military education and mandated a 3-month minimum duration for the course at the Armed Forces Staff College which is intended to train officers for joint service assignments.

CONCLUSION

In conclusion, I want to thank all members of the Armed Services Committee for their diligent work throughout the year on this bill. Again, I want to especially thank the chairman and ranking minority members of the subcommittees who perform the lion's share of the work of the conference.

I see the Senator from Alabama in the Chair. He is a very valuable member of our committee. While I have his attention I will thank him personally for his interest in the committee, and for his very fine work and leadership.

I also want to thank the staffs, led by Arnold Punaro, on the majority side and Pat Tucker on the minority side, for their untiring and professional efforts on this bill.

The staff of the Armed Services Committee I think work as hard or harder than any group of people on Capitol Hill. They have an enormously difficult task on the Senate side. We have not only this bill, but we have literally scores of confirmations—we are involved in one right now—as well as much in the way of oversight. So we have a very heavy load.

I want to say a special word of thanks to Kim Wincup, the staff director of the House Armed Services Committee. This was Kim's last conference. He has been nominated by the President to be Assistant Secretary of Army for Manpower and Reserve Affairs. I have worked with Kim on the conference since he was counsel to the House Manpower and Personnel Subcommittee in the early 1970's. At that time I was chairman of the Subcommittee on Manpower in the Senate.

Kim is a true professional. He will be greatly missed on both sides of Capitol Hill, but we will continue to deal with him in his very important new job in the Pentagon.

I might say that Kim's nomination was unanimously approved by our committee this morning, and the Senate will have an opportunity to vote on that nomination in the next day or so.

I also want to add a special note of thanks to Hugh Evans, of the Senate legislative counsel's office, and Bob Cover of the House legislative counsel. Hugh and Bob have been writing national security legislation for our committee in the House and Senate as far back as I can remember. They are true professionals. We could not operate without them. They do a superb and very professional job.

Mr. President, this conference report represents the culmination of a great deal of hard work by many Senators and many Members of the House, and I urge the Senate to support it.

I see the Senator from Wyoming on the floor. I know he has certain time reserved.

I want to thank him particularly for his excellent work on the Armed Services Committee.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. WARNER. Mr. President, several Senators are waiting. I am anxious to make a few remarks. I start off, again, by commending the distinguished chairman of the committee. It has been my privilege to work with him for some 11 years. Somehow, each year seems to become more difficult. At least there are different elements we had not experienced in the year previous.

The Defense budget is subject to a lot of pressure. There are a lot of extraneous matters that come in which are not traditionally within the province of our committee. But we somehow manage to do it on a basis equitable to all Senators who have these issues. And then to go into the conference.

Here again I think the chairman of the Senate Armed Services Committee deserves an unusual commendation because the Senate basically aligned its conclusions with respect to this year's annual defense bill with the priorities as established by the President of the United States.

The House went in many directions totally contrary to what the President had sent up by way of his several budget messages.

Only under the leadership of Chairman NUNN are we now given a conference report which, in large measure and on the principal points, coincides with the priorities as established by the President; in the President's judgment and now in the judgment of the Senate, anticipating strong support on the vote that will come shortly, priorities which are consistent with the national security requirements of this Nation.

Mr. President, the question is now being raised in every forum, what should we expect next year with defense? We have had 5 consecutive

years of declining defense budgets. We are witnessing a very extraordinary scene in Eastern Europe. The threat situation that is a support, basically, for the Defense budget, is changing. How, we do not know precisely. But we do know it is changing.

The newscast this morning indicates there are differences of opinion within the various agencies and departments of the Federal Government charged with rendering a judgment on the annual threat assessment. So next year we have a very difficult problem again facing us, given the background—primarily in Eastern Europe and other places in the world—where the threat has the appearances of diminishing.

I would fail in my obligation were I not to bring to the attention of the Senate that, as this bill is voted on today, the Soviet Union still has the most powerful and largest army in the world with ground forces unequaled by any Nation. They have naval forces which are continuing to be modernized. And, above all, strategic nuclear forces, intercontinental systems, and two mobile systems which today are operational with intercontinental ballistic missiles.

And, therefore, we have not reached that point where we can make a major realignment in the priorities of spending in this country, as that spending relates to national defense.

General Secretary Gorbachev has made considerable strides. He is a man of courage; a man of foresight; a man of wisdom. I was privileged to go with Chairman NUNN and others to see him. I had the privilege to see him when he visited the United States. I have studied perestroika; I have studied glasnost, but there is no basis on which to judge this man as becoming a pacifist. He still is commander in chief of the most powerful collection of military forces—ground forces, naval forces and strategic forces. Therefore, I am suggesting that this budget is adequate to address the threat in the coming year, and it is my hope that the Congress will continue to assess that threat and next year provide an adequate budget.

We must await the President's message. But I say most respectfully to my President and others that the budget next year will rest more heavily than ever before on the concept of the need to maintain a credible modernization program, both in strategic forces and in conventional forces, while at the same time the president and his negotiators proceed to assess the possibility of a START Treaty and the possibility of a treaty embracing conventional systems. We have traditionally and successfully, and I underline successfully, negotiated from a position of strength. What better example than the INF treaty. It was the modernization of those forces, the determination of the President to go forward with the modernization that eventually led to the Soviet Union returning to the bargaining table, negotiating in good faith and eventually arriving at a treaty which for the first time eliminated a system of nuclear arms.

I think those precedents, coupled with Soviet history itself; for example, history has shown that declarations of change in the Soviet Union do not always lead to concrete results. During the 1950's, Mr. Khrushchev allegedly attempted to liberalize Soviet society only to have his initiatives reversed upon his removal from power. Similarly, the era of détente ended with the invasion of Afghanistan and increased tensions between the superpowers.

I remember as if it were yesterday that this Chamber was totally engrossed in the deliberations and preparations on the SALT II Treaty when the Soviet troops, without any provocation whatsoever, invaded Afghanistan. SALT II was quickly put to one side and any thought of continuation of détente disappeared.

I wish, as do all Americans, the best of good fortune to Mr. Gorbachev. He is trying to provide for an element of democracy in the Soviet Union, an element of personal freedom. He is apparently thus far supportive of what is taking place, this remarkable set of circumstances, in the Warsaw Pact, but I do not believe that the time has arrived now or in the near future for this Nation to make any major readjustment in its priorities with respect to national defense predicated on the facts as we know them today.

Mr. President, I support the conference report on the Defense Authorization Act for fiscal years 1990 and 1991. The conference on this bill was by far the most difficult process in which I have participated in my nearly 11 years as a member of the Senate Armed Services Committee, but I am generally pleased with the final compromises contained in this bill.

The conference bill authorizes approximately $305 billion in budget authority and $299 billion in outlays for fiscal year 1990, in full compliance with the targets of the budget summit agreement and the budget resolution. The conferees also provided authorizations for 80 percent of the programs contained in the fiscal year 1991 budget, continuing the Armed Services Committee's initiative for biennial budgeting for defense. I urge my many colleagues who have a strong interest in budget process reform to support implementation of a 2-year budgeting policy for the entire Federal budget, from submission of the President's request and continuing through the budget resolution, authorization, and appropriations processes.

This bill generally endorses the President's budget proposals and legislative initiatives. There are, however, a number of programs and issues about which I would like to specifically comment.

PERSONNEL AND READINESS

Mr. President, while the conferees supported the recommendations of the Secretary of Defense concerning military personnel matters, the conferees took some added steps to improve quality of life of our service men and women. One of the hardest issues facing the Congress and the Secretary of Defense is the future size of the active force and the Reserve components.

The conferees approved an active duty personnel endstrength of approximately 2.1 million and 1.2 million for the Reserve components. Unfortunately, these levels cannot be sustained throughout fiscal year 1990 for two reasons.

First, the conferees approved cuts in personnel funding which were recommended by Secretary Cheney in order to meet outlay targets. Second, the sequester order that is now in effect will require that an additional $3 billion be cut from the personnel accounts before the end of fiscal year 1990. Should the sequester order remain in place for the entire fiscal year, more than 170,000 personnel may have to be removed from the active duty rolls. It goes without saying that this could have a tremendous impact on the CFE talks currently underway.

Mr. President, as I stated earlier, the conferees took several steps to improve the quality of life of our military personnel, and I would like to mention them briefly.

The conferees increased some of the specialty pays for military physicians in an effort to keep more doctors in the military services. This will not only improve health care in peacetime, but will also improve our medical readiness in the event of armed conflict.

The conferees increased funding for child care for military dependents, and reduced the cost of the survivor benefit plan for current and future participants.

And the conferees approved the requested 3.6-percent pay raise for military personnel.

Mr. President, I believe that it is imperative that we maintain the high quality of our Armed Forces. As our military forces become fewer in number, the level of technological sophistication will continue to increase. Therefore, we must make every effort to attract and retain high-quality recruits. This conference report supports these goals.

The conferees were forced to make reductions in the readiness accounts in order to meet the outlay targets of the April 1989 budget summit agreement. The conferees made these reductions as broad and generic as possible in order to minimize the unfavorable

impact on the readiness and operations of the military services.

STRATEGIC FORCES

The Strategic Modernization Program was probably the most contentious and time-consuming set of issues that the conference addressed. The major issues—small mobile missile, MX rail garrison, B-2, and SDI—were bundled together in the negotiations; very little progress on other issues was possible before these issues were settled.

The conference agreement authorizes a level of $3.79 billion for the strategic defense initiative—$3.57 billion in DOD and $220 million in the Department of Energy. I am troubled by this reduction of over $1 billion from the President's SDI budget request. SDI is an extremely important part of our Strategic Modernization Program. The President and Vice President have told me personally that they consider SDI to be one of their highest priority national security programs. Given the rapidly changing events in the Communist world, increased proliferation of ballistic missiles in developing countries, and the potential for significant reductions in nuclear weapons through arms control negotiations, we must ensure that the United States has the defensive capability to enhance deterrence and strengthen stability during a rapidly changing and historic period in world affairs.

SDI funding at $3.79 billion is the bare minimum needed to ensure that the President can make an informed decision on strategic defenses by 1992. It is my intention to work to prevent any further decline in the SDI budget. I encourage the administration to restructure SDI to emphasize near-term phase 1 research and, at the same time, maintain a robust phase 2 technology program. Such an approach will provide the President and the Nation with the necessary information to make an informed decision on whether to deploy strategic defenses.

The small mobile missile and MX rail garrison are authorized in the conference report at $1.13 billion—$150 million below the President's request. But the bill gives the Secretary of Defense the needed flexibility to allocate the funds in the most effective manner to move these programs forward.

The B-2 Stealth bomber was a very serious issue in conference. The President requested initial low-rate production of three bombers in fiscal year 1990 and five in 1991. The conference outcome agreed to authorize two bombers this year with only advanced procurement funding for the 1991 bombers, very close to the original Senate position. The major Senate concern—that the bomber pass certain fences or gates before further procurement—prevailed in conference. The House provision—that the program be put on hold pending a separate vote of both Houses—was totally unacceptable to the Senate conferees and was ultimately dropped. This is a significant step forward for the program which will allow Congress to decide on the B-2 next year with a solid base of testing results.

I am also pleased that the conference agreement authorizes unconditionally virtually the entire budget request for the Kinetic Energy Antisatellite Program. During our hearings this year, the Secretary of Defense, Chairman of the Joint Chiefs of Staff, and every service chief emphasized the importance of the Asat Program. Asat capabilities are critical for enhancing the survivability of our military forces—particularly U.S. naval forces.

In addition, the conference agreement authorizes full funding for the MILSTAR Satellite Program, the national aerospace plane, and a second Titan IV booster launch facility on the west coast.

401ST TACTICAL FIGHTER WING AT CROTONE

I am pleased that the pending conference report contains a provision which allows NATO to proceed with construction of a new fighter base in Crotone, Italy for the United States 401st Tactical Fighter Wing.

The forward basing of the 401st makes a powerful contribution to deterrence and defense by providing modern, flexible and immediately available military strength to NATO's southern region. The southern flank has historically been NATO's weakest and least modernized area. The 401st represents a significant portion of the military strength in this region—it represents the only U.S. tactical aviation unit and 72 percent of the total third generation NATO aircraft in the southern region. In addition, because of its dual-capable role, the 401st accounts for 75 percent of the southern flank's airborne nuclear deterrent.

NATO demonstrated the importance it attaches to keeping the 401st in Europe by deciding to relocate the unit to a new base in Crotone, Italy and by agreeing to use NATO infrastructure funds to construct the new base.

The compromise arrived at in conference imposes a $360 million cap on the cost of relocating the 401st to Italy. This compromise allows construction of a new airbase at Crotone to proceed without delay, and guarantees that our NATO allies will contribute a large share of the construction costs at Crotone.

TACTICAL AIRCRAFT PROGRAMS

While I do not abide some of the ruthless lobbying methods by which the conference outcome was influenced on the matter of the Navy's F-14D new production, I do endorse the rationale for an orderly shutdown of this line while preserving the remanufacturing effort. This final, one-time purchase will facilitate the transition required to support these important aircraft until development of the follow-on Navy advanced tactical fighter is complete. To this end, the F-14D remanufacturing program represents the most sensible and economically feasible approach.

The conference report also provides for a one-time buy-out of 36 additional AHIP helicopters which will enable the Army to close the existing gap in scout helicopter requirements and extend mission operations pending development of the LHX program.

The unique capability provided by the V-22 Osprey tilt-rotor concept is certainly worthy of additional study. It was for this reason that the conference strongly supported completion of development, which is fully authorized in this bill. We could not, however, in today's fiscal climate, continue to support production for an aircraft of this expense. We look forward to the results of studies which this bill directs in order to determine any possible methods by which the V-22 cost structure can be made more favorable.

I note with pleasure that the Appropriations conference has increased funding for the KC-135R reengine program to 36 kits. This level equates to the minimum economic order quantity and is in keeping with the production rates which have been in place over the past 4 years. The authorization report did not fund more than the requested 24 kits and, through an administrative oversight, did not include the language to encourage the Air Force to reprogram up to 40 kits which was intended by the conferees. This engine upgrade program is a practical and economic method of upgrading our tanker force.

The conference endorsed a Senate proposal to improve the quality of equipment available to infantrymen in the Army and Marine Corps. This proposal provides additional funds to the Army and Marine Corps to test commercially available equipment, from both domestic and foreign sources, and to field better weapons and equipment for our Nation's foot soldiers.

This bill endorses the increased involvement and enhancement of the Department of Defense's role in drug interdiction. As part of the national antidrug effort, the conferees increased funds for drug interdiction, expanded some existing programs and sponsored several new initiatives.

The conferees agreed to provide up to $450 million to the Department of Defense to help the national counterdrug effort, an increase of $150 million over fiscal year 1989.

ACQUISITION POLICY

One of the most serious issues facing us in our attempts to improve the management of the defense acquisition system has been attracting and

retaining qualified officials in key positions in the Department of Defense. The procurement integrity section of the Office of Federal Procurement Policy Reauthorization Act passed late last year had caused a great deal of concern in the Department of Defense through lack of understanding of the scope of the new conflict-of-interest provisions contained therein. The conference report includes a section (814) amending section 27 to clarify who is covered by the restrictions. The amendment also provides current officials a procedure for refusal in appropriate circumstances.

Both the chairman of the Defense Industry and Technology Subcommittee, Senator JEFF BINGAMAN, and the ranking member, Senator MALCOLM WALLOP, are to be commended for their diligent work on this and the other provisions in title VIII of the bill. Also to be commended are the House conferees, including Government Operations Committee Chairman JOHN CONYERS and Judiciary Committee Chairman JACK BROOKS, for their cooperation and forbearance in allowing us to address amendments to the OFPP Act in the context of the Defense authorization bill.

NATIONAL GUARD AND RESERVE FUNDING

The conference report recognizes the importance of the National Guard and Reserve Forces' contribution to the total force by authorizing $988 million in addition to the President's request specifically for the these vital forces. This authorization provides essential equipment for the increased readiness and modernization of these forces.

Mr. President, I urge my colleagues to vote in support of the conference report on the Defense authorization bill.

Mr. WALLOP. Mr. President, let me again give my thanks to the Senator from Georgia. I have to say that his relationship with me, his leadership of the committee, has been admirable and exemplary. It is therefore with a certain sense of sadness that I rise to oppose the DOD conference report. But I will do nothing to delay its process or any such thing, and even do not expect any Members to side with me.

But I want to begin my statement by making it absolutely crystal clear that my vote against the report is not a condemnation of the process by which we arrived at it, because nothing would be further from the truth.

I want to begin by paying my greatest respects to the hard work, and very honest, very helpful approach that the distinguished Senator from Georgia brought to the conference.

Without his guidance, I doubt very much that we would have had an opportunity to even vote on this conference report, and I believe it is his role to make sure, as the chairman of the authorizing committee, that we play our part in the budgetary process lest the committee lapse into total irrelevancy in policy and have our role coopted, in effect, by the Appropriations Committee. I just say that the Senator from Georgia did his job as well as it could be done, given the circumstances.

Let me also acknowledge and praise the hard work and skillful guidance of the distinguished Senator from Virginia. In every step of the way he made certain that Senators on our side were fully informed of the activities of the so-called Big Four, and as a result, the Republican side of the committee, which represents very different views on a number of issues, was able to work effectively together and with the Democratic majority to push for the Senate position.

Mr. President, having said those two things, I also say that there is so much in this legislation that is good. In particular, the chairman of the Defense Industry and Technology Subcommittee, Senator BINGAMAN from New Mexico, is to be commended for his diligent efforts to bring some greater rationality to the defense acquisition process. His hard work paid off in the section amending the Office of Federal Procurement Policy authorizing section 27. This section relating to conflict of interest for Government employees has caused great confusion in the Federal work force because of a lack of clarity about whom is to be covered and by what. The amendments to the OFPP Act included in section 814 of this authorization should provide a much greater degree of certainty about the scope of coverage of those ethics provisions.

There are other sections in title VIII, as well, which provided for increased efficiency in defense procurement. We have included sections emphasizing the acquisition of commercial products for defense requirements, allowing DOD to test the use of competitively awarded master agreements for the acquisition of professional technical services and providing more realistic testing and evaluation. I am pleased that the Senator from New Mexico and I are off to a good start, and one cannot help but look forward to the coming year of cooperation.

So, Mr. President, despite all the good things in this bill, I cannot support it yet. I cannot support it, because in the first instance it legislates, for the first time in the history of the issue, a cap of 50 deployed MX missiles. This has been a position pushed by the House since the early days of the Reagan administration, a position that has been rejected, and rejected, and rejected by the Senate and by the White House. It is absolutely inconsistent with the modernization program outlined by the Scowcroft Commission, in which the United States was to proceed ahead with the deployment of 100 MX to enhance the hard target capability of our force, and to develop a small mobile ICBM for survivability. My support, at least for the controversial programs such as the B-2 and the Midgetman, was based on the concept of an overall strategic modernization program. That program is, again, in total shambles.

Mr. President, we have abandoned the fig leaf that the House maintained that if only we could find an acceptable basing mode for MX, we would consider further deployment. If the Senate believes that the MX rail garrison program is a sound one—and I believe that a majority of Senators on our committee do—then it does not stand to reason that we arbitrarily limit that program to 50 deployed missiles, when the Soviet Union possesses some 308 SS-18 ICBM's, each more capable than MX, and hundreds of other heavy ICBM's, including the new rail mobile SS-24.

Mr. President, MX is the only ICBM that the United States has in production. We are not producing Midgetmen, and given its enormous cost and a breakdown of events in the world, it is doubtful, in this Senator's judgment, that we ever will. The Soviet Union, with whom we are engaged in negotiations at this moment, has no fewer than three types of intercontinental ballistic missiles in production and no fewer than six types of ICBM's deployed So by placing a cap of 50 on the MX program, we have effectively checkmated America's ability to counterbalance Soviet modernization of their ICBM force. Oh, I know that the Washington Post thinks the millenium has come, and that nobody in the Soviet Union is making any effort to sustain their military capability, but the Washington Post is wrong and other papers who make similar claims are wrong.

So while the Soviets replace their SS-18 with a vastly more capable SS-18 MOD 5, a missile so different from its predecessors that it would have been classified a new type by the intelligence community, had it not been for the fact that to so call it could have declared it in violation of an existing arms control treaty. So while we sit with 50 Peacekeepers in their silos, or spend the money to move those same 50 Peacekeepers to the rail mobile, the countermilitary potential of the Soviet ICBM force is being enormously increased. And we in the Congress are about to arbitrarily limit the development of an offsetting countermilitary potential.

Mr. President, it makes no strategic sense. It weakens our negotiators' hand in Geneva, and I simply cannot understand how the administration could accept this limitation that predecessors have rejected. How can we accept an arbitrary limit of 50, when

we have the prospect of deploying a full hundred MX either in Wyoming or other rail garrison bases?

Second, Mr. President, I cannot understand how the committee, the joint conference, reached a figure of 18 airplanes for the F-14 buy. The Secretary of Defense, my old colleague from Wyoming, Secretary Cheney, indicated he wanted to terminate further production of the F-14 in favor of the remanufacturing program. I supported that decision. The Senate supported that position. The Senate offered a compromise of six F-14D's and I would have reluctantly supported that.

The House bill had 12 planes, too high by anybody's reasoned judgment. So how did we arrive at 18? Are we adding the House and Senate numbers together these days? I should think not, since we would have funded SDI at over $7 billion, if that were the process. I understand that the Appropriations Committee cut out the funding in this bill for the F-14 program termination.

Mr. President, what happened was nothing short of a blatant act of political blackmail. It is as blatant as any I have seen since coming into the Senate. The New York delegation, headed by Congressman DOWNEY and the Democratic Caucus in the House of Representatives, let it be known that the purpose of Defense spending in America is not to provide the most efficient defense of America, but to provide jobs in congressional districts. How can these same Congressmen decry inefficiencies in our defense procurement system, when they force that system to procure weapons it neither wants nor needs? How can an administration accept what amounts to a repudiation of the decisions of the Secretary of Defense on program terminations?

In my judgment, Mr. President, next year when more terminations will undoubtedly prove necessary, the Secretary of Defense will be rained on by a House of Representatives that has learned to hold any decision of the Secretary hostage to the wishes of its individual Members.

The PRESIDING OFFICER (Mr. KERREY). The Senator's time has expired.

Mr. WALLOP. On behalf of the Senator from Virginia in whose place I stand I yield myself such time as I require to finish the statement, and so ask unanimous consent.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WALLOP. Finally, Mr. President, and most important, I cannot support a level of SDI funding—$3.57 billion dollars—that is little more than 75 percent of the President's request and that represents the first real decline in SDI funding since the inception of the program.

I stood on this floor, with the chairman and ranking member of the Armed Services Committee, when they supported an amendment to the Defense Appropriations Committee bill that successfully increased the Senate figure from $3.7 billion to $4.3 billion. At that time, the Senator from Georgia was in a colloquy with the Senator from Louisiana over the level of SDI funding.

As I recall, both agreed that the level should come out at about $3.7 billion, a figure that would constitute an increase over last year's level. I personally think we ought to fund the President's request fully, but I certainly believe that with even Senator JOHNSTON talking of support for a $3.7-billion figure, we could and should have come out better than we did.

Mr. President, I do not fault anyone on the Senate Armed Services Committee for this. I fault the absolutely irresponsible position of the House of Representatives on SDI and all other strategic issues. And alas, I must fault the administration for failing to fight harder for SDI funding and for not sticking to their own pronouncement on the importance of the SDI Program.

Mr. President, last July the President wrote a letter in which he said:

> SDI is at a critical juncture. The technological progress we have made means that we need to conduct large scale, realistic, and therefore expensive, tests to prove the feasibility of defenses. Already, because of cuts required in the overall Defense budget, I have reluctantly submitted a revised budget, cutting over $1 billion from the program. If the Congress cuts even more deeply, our ability to investigate and test the most promising options will be seriously damaged.

Mr. President, this conference report cuts over 1 more billion out of that program. Are those tests no longer necessary? I would say, Mr. President, not the President of the Senate but President Bush, are they no longer necessary? Do you now believe they are no longer of use to the United States, that they are no longer important? Or, President Bush, are those words just that, nothing more than words?

Secretary of Defense Dick Cheney stated in a letter to Senator DOLE:

> Any level of funding for SDI less than provided in the Senate passed Defense authorization bill would cause cancellation or delay of experiments crucial to demonstrating the feasibility of defense against ballistic missiles.

Can we now safely eschew these crucial experiments? Or do we no longer desire to demonstrate the feasibility of ballistic missile defense?

In another letter to the chairman of our committee, Senator NUNN, in September the Secretary said:

> The House and Senate have voted on SDI programs with fundamentally different objectives, and the differences cannot be resolved simply by selecting a funding level to split the difference in the authorization values.

Mr. President, this bill exactly splits the difference with the House—$3.57 billion is exactly in between the House and Senate authorization bills. I take this to mean that important, no "crucial" experiments will have to be canceled.

I take this to mean that we have chosen a fundamentally different objective for the SDI program, one that does not lead to development, testing, and then deployment, but one that leads to defunding, dismantlement, and political oblivion, the only difference being that we will all stand around and vote for lower and lower levels of SDI funding and go home to tell our constituents how we supported SDI and in the process have wasted the public's money for a program that nobody now seems, if the President may be believed, to care for any longer.

Mr. President, I have fought for this program, this concept since 1978. I believe in it. I believe the technology has demanded our tests. I believe the technology has demonstrated that America's safety can be greatly enhanced by proceeding with it.

As I indicated in an op ed shortly before the Senate floor votes on SDI this year, the time to choose for SDI has arrived. Either we construct and fund a program that gets us to a fully informed deployment decision—one that will require a much more aggressive funding profile than contained in this bill—or we abandon that objective, in which case we can cancel SDI outright and spend that money on other needed defense programs.

As a Member of the Strategic Forces Subcommittee, I am sure that Chairman EXON and Senator THURMOND, the ranking member, would agree that we can find worthwhile and neglected projects for that money. So why then waste money on SDI if it is not the President's intention nor the Congress' intention even to reach the deployment decision? I am not talking about deployment itself, just an informed deployment decision.

Mr. President, it makes no sense to follow this course. The American people deserve better. It is for these reasons that I cannot support a Department of Defense authorization bill which is supposed to fund programs based on their merit, based on their strategic contribution, their defense contribution to the security of the American people and the United States—this program harms that strategic security in SDI; it harms it in strategic modernization programs—all the while funding the needless pork of House Democrats.

Mr. President, I ask unanimous consent to have printed in the RECORD a letter dated July 24, 1989, from Presi-

dent Bush to Senator DOLE; a letter dated August 10, 1989, from Secretary Cheney to Senator BYRD; and a letter dated September 11, 1989, from Cheney to Senator NUNN.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

THE WHITE HOUSE,
Washington, DC, July 24, 1989.

Hon. ROBERT J. DOLE,
Minority Leader, U.S. Senate, Washington, DC.

DEAR SENATOR DOLE: When the Fiscal Year 1990 Defense Authorization Bill comes to the floor next week, you and your colleagues will make critical decisions affecting the future of deterrence and arms control for the balance of the century. Before you vote, I want to be certain that you understand my reasons for the strategic modernization program I have proposed.

Taken together, these strategic programs are essential to preserve a capable, survivable and effective deterrent. They are an integrated package that deals with the evolving threat and is flexible enough to hedge against uncertainties. They also undergird our arms control negotiations and provide incentives to the Soviets to continue the internal changes they appear to be making. Each represents, not simply modestly improved capability but fundamental change in strategy or system performance.

I am optimistic about what we are beginning to see in the Soviet Union. The Soviets may finally be willing to make significant changes in the character and size of their military forces. This willingness is at least in part the result of our commitment to a modern, capable deterrent force. Weakening the commitment now could undermine the positive trends we see emerging in Soviet forces.

I have taken another hard look at SDI and confirmed that the goal of the program—providing the basis for an informed decision on deployment of defenses that would strengthen deterrence—remains sound. We owe it to ourselves and our children to pursue that goal. I am personally and deeply committed to doing so.

Moreover, SDI is at a critical juncture. The technological progress we have made means that we need to conduct large scale realistic, and therefore expensive, tests to prove the feasibility of defenses. Already, because of cuts required in the overall Defense budget, I have reluctantly submitted a revised budget, cutting over $1 billion from the program. If the Congress cuts even more deeply, our ability to investigate and test the most promising options will be seriously damaged. We will be unable to determine, in a meaningful way, whether we can rely more on defenses for our security. The American people are entitled to that assessment.

The B-2 is also at a critical point. The aircraft is based on revoluntionary technology that will guarantee the effectiveness of the penetrating bomber well into the next century. Without it, the strategic Triad, which has been the bedrock of our nuclear strategy, will virtually disappear. The B-2 is also the core of our START strategy for achieving stable deterrence at reduced levels. Indeed, under the terms of our current arms control proposal, the bomber force will be assigned a very large percentage of our targets. I have no doubt that the B-2 is worth its cost and deserves your support.

ICBM modernization has been marked with considerable controversy and strong opinion. Yet there is broad agreement that mobility is required for our land-based missiles to improve their survivability and enhance their unique capabilities. After careful review of the issue, I have determined that we should deploy, in a carefully phased manner, the Rail-garrison Peacekeeper and the Small road mobile ICBM. I am committed to doing so.

Rail-garrison Peacekeeper will improve the survivability of the ICBM force quickly and at modest cost, while preserving the considerable military capability of this system. The Small ICBM represents the future of the ICBM force. It offers a high degree of survivability, even with virtually no warning. But, it will not be ready to deploy as soon as Rail-garrison and will obviously be more expensive than a multiple warhead system. We can field Rail-garrison in the near term while at the same time continuing development of the Small ICBM for 1997 deployment. We likewise need to commit to an ICBM mobility program to avoid a deadlock in the START negotiations on the mobile issue.

In addition to the requirement for these forces as the heart of our nuclear deterrent strategy, in which they form an integrated and inseparable whole, there is the role which this modernization program plays in our arms control strategy. We are entering a very important and promising stage in our strategic arms control negotiations. We have already introduced some changes in our position and we are actively considering others which could make a significant contribution to the stability of the nuclear balance. To pull the rug out from under me at this crucial juncture by weakening my program could destroy this opportunity to make real progress. Indeed, it could even prevent the conclusion of an arms control agreement. I need the negotiating flexibility which this dynamic and sensible modernization program provides. Don't prevent me from achieving a treaty which could make great strides toward reducing the chances of nuclear conflict.

Let me add two cautionary notes. First, good arms control cannot be legislated. I seek and welcome the advice and counsel of the Congress and regularly consult you on the full range of arms control issues. But, in the final analysis, I must be responsible for negotiating arms control agreements. The many arms control amendments that are customarily proposed to the defense bills only undercut me and our foreign policy and frequently have an effect opposite to that intended by their sponsors.

Second, the pressures to play one modernization program off against another or to pay for one with cuts in another threaten the balanced strategy behind our programs. Secretary Cheney and I have had to make hard choices in these times of tight budgets—this budget is the best balance of needs and affordability and represents an integrated strategic approach.

As you begin final debate on the defense bill, I ask you to carefully consider the affordable, integrated plan we have designed to strengthen deterrence, to reinforce the incentives for change in the Soviet Union, and to further our goal of negotiating arms control agreements that will reduce the likelihood of nuclear war. We cannot afford to lower our defenses because of Gorbachev's rhetoric; we cannot afford to pull the rug out from our negotiators, and we cannot afford to forfeit the investments we have made in strategic modernization. We can afford to make the needed improvements provided by this cohesive, fiscally sound package. It deserves your support.

Sincerely,

GEORGE BUSH.

THE SECRETARY OF DEFENSE,
Washington, DC, August 10, 1989.

Hon. ROBERT C. BYRD,
Chairman, Committee on Appropriations, U.S. Senate,
Washington, DC.

DEAR MR. CHAIRMAN: As your Committee begins markup of the FY 1990 Defense Appropriations bill, I would like to provide my views on the bill as passed by the House (H.R. 3072). If the Congress were to pass the bill in the form in which it passed the House, the President's senior advisers would recommend that he veto it.

The House provided over $1 billion less than the defense level agreed to in the budget summit. While there continues to be debate on the argument pertaining to outlays, the House clearly has not honored the budget authority targets set in the Agreement. I urge the Senate to support the agreed-upon budget authority level, which was reaffirmed in the concurrent Budget Resolution passed by both Houses.

I am deeply concerned by the large number of program changes made by the House and the devastating effect these changes have on the defense priorities we have set. In particular, the House restored programs that we cannot afford within the planned future funding levels, including the V-22, Army Helicopter Improvement Program (AHIP), F-14D, EA-6B, and F-15E aircraft programs, the Phoenix missile program, and a SSN-688 submarine. The decisions to terminate these programs considered long-term costs relative to mission accomplishments and sought to avoid funding weapon systems at inefficient rates of production and delaying the introduction of newer, more survivable and capable weapons. The House actions to restore these programs, ostensibly to address short-term concerns, will disrupt the effective execution of our entire defense program, and increase its long-term cost to a level that cannot be sustained. In short, the House would force us to buy things we cannot afford in the long-term, at the expense of higher priority programs essential to the national defense.

House action on the V-22 Osprey program highlights the problems created by restoring funding for these programs. The House provided $351 million to complete development and $157 million to initiate procurement of the V-22 Osprey. Our decision to terminate the V-22 program was based on a careful consideration of recess and expected gains in amphibious surface lift capability and the availability of helicopters in production that provide a considerable increase in capability over our current aircraft at much less cost than the V-22. Within current constrained resources, the program we have proposed is the proper amount we should spend to upgrade our capabilities in this limited mission area. Delays in V-22 development and test flight efforts have increased the technical risk of production in FY 1991. If the V-22 program is restored, over $7.5 billion will have to be added back to the FY 1990-1994 budget plan at the expense of higher priority programs.

I am deeply concerned that the House reduced the SDI program by $1.8 billion and reallocated these funds to other programs. This action would cause cancellation or

delay of experiments crucial to demonstrating the feasibility of defense against ballistic missiles. Several technologies key to the SDI are now in the demonstration phase, and the reductions proposed by the House would be extremely disruptive and ultimately increase costs of determining the feasibility of strategic defenses. We need to protect the option to begin deploying defenses in the 1990s to meet the military requirements established by the Joint Chiefs of Staff. In addition, at this reduced funding level, arms control leverage is severely weakened and adequate Allied participation is jeopardized. The budget request of $4.6 billion is the minimum required for orderly evaluation of technologies needed for the strategic defense systems.

The B-2 bomber is an essential element of our strategic deterrent. Without it, we would be unable to maintain the effectiveness of the bomber leg of the Strategic Triad against rapidly improving Soviet air defenses. The House gutted the program. Ironically, given the debate about the plane's cost, the House proposed stretch-out of the program by deferral of one aircraft and reduction of $500 million will only result in higher costs for the overall program. If this proposal is sustained, the reductions will force the current $70.2 billion total cost estimate markedly upward.

The House reduced MX/Rail Garrison funding by $396.8 million, deleting all procurement funds and reducing RDT&E funding by $174.2 million. This action delays the Initial Operating Capability by up to 2 years. In addition, no funds were provided for the Small ICBM. The House action rejects plans to rectify U.S. ICBM vulnerability and seriously undermines the U.S. arms control strategy. Deferring Rail Garrison would leave little hope of ever obtaining survivable MX/Peacekeeper missile basing. Canceling the Small ICBM program would terminate the effort to reestablish survivable, flexible, and enduring land-based ICBM forces. Further, this action would remove an incentive for the Soviets to negotiate START numerical limits and verification procedures for road mobile missiles, which will assuredly be the core of future Soviet forces.

The House has proposed deleting procurement of the Advanced Cruise Missile in FY 1990. The program recently completed three consecutive successful test flights and has now met the test flight criteria previously put forth by the Appropriations Committees for the prior procurements. The dual sourcing of missile production is resulting in improved quality and performance. We cannot afford to delay further this critical strategic weapon system.

The House deleted funding in FY 1990 for the current Advanced Tactical Fighter (ATF), based on concerns over the acquisition strategy, costs, and technical risks. The ATF is the highest priority tactical development in the Air Force. The ongoing Demonstration/Validation phase is specifically designed to address and resolve the types of issues raised by the House; reduce risk prior to entering full-scale development, mature technologies, refine requirements and goals, and define full-scale development/production phases of the program. FY 1990 is the culmination and execution of this phase. Therefore, fully funding the ATF is the logical and most cost effective approach.

The House proposes to terminate the MILSTAR program after the third satellite, delay first launch, and defer all terminal procurement funding until FY 1991. MILSTAR is DoD's highest priority communications system. A three satellite constellation provides only a very limited EHF capability that would have serious coverage and capacity problems. For example, we would have to continue to rely on vulnerable UHF communications in the polar areas. Under the House proposal, DoD will spend approximately 60 percent of the total acquisition cost, but will support only 30 percent of the requirements. A delay in the terminal program will require renegotiation of contracts resulting in increased cost and a delay in receipt of production terminals to support the first launch.

The House restructured the Chemical Demilitarization program by denying $24.9 million for the accelerated European retrograde of unitary weapons and adding $36.4 million for continuation of the cryofracture process. The Department has an effective plan to safely complete the accelerated retrograde program that covers all aspects of the process from preparation at the current storage site to the munition destruction at the final destination. This action is essential to the demilitarization program and is being conducted in cooperation with Allies. Also, the proposed funding for cryofracture should be deleted. Internal and independent reviews of the cryofracture program have concluded that it will not be an effective back-up system to the disassembly method. I am advised that cryofracture is costly ($200 million per plant), can only be used on 35 percent of our stockpile, and causes a safety concern since it simultaneously incinerates a chemical agent, metal parts, propellants, and explosives.

The House limited production of SSN-21 attack submarines to two ships per year until adequate testing has been completed, and adds one SSN-688 ship. The SSN-21 will be three times more effective than the improved SSN-688 and is needed to counter Soviet deployments of new, more capable, and quieter SSNs. Limiting production of the SSN-21 will exacerbate the problem of maintaining the required attack submarine force level beyond the mid 1990s due to the block obsolescence of SSN-637 class submarines that will begin to occur in that timeframe. There is no alternative to the SSN-21 that will achieve the major improvements needed in submarine warfighting capability.

The House rejected planned multiyear procurement of the F/A-18, E-2C, SH-60B/F helicopters, and the Maverick missile. Denial of the multiyear contracting strategy will increase unit costs significantly and increase the possibility of production stretchouts or terminations for other programs. For example, the savings projected for the F/A-18 multiyear procurement proposal alone could save in excess of $350 million. Given continuing constrained resources, the Department must explore every savings opportunity. I am concerned that the House position denies that opportunity for multiyear efforts.

The House also proposed limiting total outlays to $281.928 billion in FY 1990. Outlay estimates are simply not precise enough to be subject to a legal limitation. Even if correct in total, estimates by account are subject to wide variance. A legislated ceiling on outlays will create an immense and costly administrative burden, in addition to creating the possibility of disruptive program slowdowns. I urge the Senate to strike the outlay limitation in the bill.

The House reduced Operation and Maintenance (O&M) funding by $45.6 million, but increased O&M program requirements, especially for real property maintenance, depot maintenance, and CHAMPUS, by over $2.8 billion. To ensure that these program increases are maintained, the House restricted the reprogramming of funds from these programs. The House also restored planned operating and support reductions and increased defense support to nondefense Agencies. The House proposed that a portion of the financing for these increased program requirements come from unspecified increases in efficiencies, the use of stock fund cash that is not available for transfer to O&M, reductions to productivity program initiatives, overstated savings and absorption of increased requirements from within available funds. Despite severe funding constraints in recent years, the Department has made a conscious decision to protect the near-term readiness of our forces. To achieve this goal, the Department has carefully balanced O&M resources to protect readiness and provide for other priority programs. The adjustments proposed by the House will degrade this balance and result in reduced unit readiness.

Finally, I am also disturbed that the House required the Department to finance $300 million for the Coast Guard and $82.9 million for the National Science Foundation within the DoD topline. This violates the budget summit agreement and reduces the funding available for DoD programs, distorts the amount of support being provided for defense, and generates an administrative burden to manage funds for another agency. I support adequate resources for these programs, but I strongly object to funding them from reductions to critical defense programs.

I appreciate your continued support for a strong defense program and look forward to working with you to preserve the defense capabilities so critical to our national security. The Office of management and Budget advises that this letter reflects the President's program.

Sincerely,

DICK CHENEY.

THE SECRETARY OF DEFENSE,
Washington, DC, September 11, 1989.

Hon. SAM NUNN,
Chairman, Committee on Armed Services, U.S. Senate, Washington DC.

DEAR MR. CHAIRMAN: The authorization conference soon will begin action on the House and Senate bills for FY 1990. I am pleased that the budget authority levels provided by both the House and the Senate conform with the Bipartisan Budget Agreement and include many of the crucial items requested by the Administration. However, the House bill would decimate our strategic modernization program and unnecessarily impair relationships with our NATO allies and, if this bill were presented to the President, I would recommend that he veto it.

There have been reservations expressed about the need for strategic modernization in an age of perestroika and glasnost. Unfortunately, the Soviet Union is making major efforts to modernize its own strategic forces at the same time as it is making overtures on other fronts. We believe that the U.S. government's first obligation must be to make sure the United States can continue to deter a strategic threat in the face of the Soviet's new systems. We believe it would be a grave mistake to go forward with reductions that would gut SDI, the B-2, Peacekeeper Rail Garrison, and the Small ICBM.

The House position on SDI and strategic modernization is unacceptable.

I am deeply concerned that the House cut the SDI program by $1.8 billion. The House and Senate have voted on SDI programs with fundamentally different objectives, and the differences cannot be resolved simply by selecting a funding level to split the difference in the authorization values. The Administration's Strategic Defense Initiative is focused on developing defensive technologies to support a decision on possible deployment of strategic defenses in the next 4 years, where actual deployment could begin in the next 10 years. However, the cumulative effect of budget cuts in SDI since the program began has brought it perilously close to forcing abandonment of these important overall objectives. The Senate level more closely supports these objectives; the House level does not come close.

I also continue to be extremely concerned about reductions to the B-2 program. The B-2 is essential to maintaining a penetrating manned bomber force, and penetrating bombers are essential to maintain our strategic deterrent. Stand-off platforms with cruise missiles can make an important contribution, but they cannot do an adquate job by themselves. The manned penetrating bomber is, and will remain, an essential element of our strategic deterrent.

The House reduction would threaten the B-2 program. Its restrictive language would require a dramatic restructuring in FY 1990-91 and reduce the planned procurement from eight to four aircraft in these years. It is ironic that the House, reacting to the B-2 unit costs, took a step that would increase the total program cost by approximately $3.5 billion. In contrast, the Senate position would allow DoD to proceed with this program at an economic rate of production.

It is particularly disconcerting that the House reduced funds for Rail Garrision, an action that will delay Initial Operating Capability by up to 2 years. Deferring Rail Garrison basing leaves little hope of ever obtaining procurement authority for survivable Peacekeeper missile basing. The House also proposed cancellation of the Small ICBM, an action that maintains our ICBM vulnerability and undermines the U.S. arms control strategy. Further, the House position removes Soviet incentives to negotiate effective verification of mobile missiles in START. I urge your support for the Senate position on Rail Garrison and Small ICBM to ensure the sequential development and deployment of the President's two-missile ICBM program.

The United States and the Atlantic Alliance have a critical defense need to move the 401st Tactical Fighter Wing to Crotone, Italy. The restrictive language proposed by the House would block the relocation of this highly sophisticated wing of 72 F-16 aircraft to NATO's Southern Region. It is important to uphold the commitments we have made in support of NATO's decision to maintain this capability in the Alliance's Southern Region.

In times of budgetary restraint we simply cannot fund every weapon system, including those of relatively low priority. I once again emphasize the Administration's strong opposition to reallocationg funds to the V-22 Osprey, the F-14D aircraft new production and the Army Helicopter Improvement Program (ANIP). The decision to move forward with these programs will increase the total funding requirement in future years to a level that cannot be sustained.

In addition to these concerns, I want to touch on several other key issues including base closures, initiatives for civilian personnel in critical positions, and chemical demilitarization.

Although the Commission on Base Realignment and Closure initially estimated a $300 million up-front investment to begin the process in FY 1990 of realizing long-term savings from base closures in the out-years, DoD currently estimates a requirement of $500 million. This includes about $450 million for construction and $50 million for environmental restoration. The House position authorizing the full $500 million to carry out all bases closure and realignment actions within the tight schedule prescribed in the law has the Administration's support.

I am opposed to lowering the number of troops stationed in Europe after 1991 by 14,787 spaces which were previously allocated to the Pershing II and Ground Launched Cruise Missiles (GLCMs) that are being abclished under the Intermediate-range Nuclear Forces treaty. Now is not the time to enact legislation making unilteral troop reductions. Such a course of action can only serve to weaken the U.S. bargaining position in the Conventional Forces in Europe negotiations. In addition, I am opposed to the House reduction to Air Force active duty personnel. DoD plans to eliminate all GLCM-associated manpower authorizations by the end of FY 1991. A futher reduction essentially would cause the Air Force to take the GLCM reduction a second time. I urge the conferees to forego the duplicative reduction.

I support initiatives to establish alternative personnel management systems that permit greater flexibility with respect to pay and status of civilian employees in certain critical positions. Increased flexibility in defense personnel management is critical if we are to attract and retain the talented, experienced people the nation's defenses require.

I continue to oppose inclusion of the technically doubtful cryofracture technology into the chemical demilitarization program and believe we should complete the chemical demilitarization program using the safe and reliable disassembly technology.

I know you and your colleagues will appreciate the profound importance of these issues to our defense and foreign policy as you consider the implications of the Defense Authorization Bill for FY 1990.

The Office of Management and Budget advises that there is no objection to the submission of this report and that enactment of the House bill in its present form would not be in accord with the program of the President.

An identical letter has been sent to the Chairman, Committee on Armed Services, House of Representatives.

Sincerely,

DICK CHENEY.

Mr. WALLOP. Mr. President, I reserve the remainder of the time of the Senator from Virginia and I yield the floor.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. GLENN. Mr. President, as a member of the Senate Armed Services Committee, I rise to support the Defense authorization conference report for fiscal years 1990 and 1991. Although I disagree with some of the provisions in the report, especially a provision to terminate the SR-71 Aircraft Reconnaissance Program, I believe it is a reasonable bill, given the special constraints under which we are operating.

As chairman of the Subcommittee on Manpower and Personnel of the Committee on Armed Services, I am very gratified by the results achieved for the pay and benefits of our men and women in uniform that we provide in this bill.

The one area where I am certain that we have really gotten a full return on our investments in defense over the past decade has been in manpower. We all recall the situation in the late 1970's when our forces had grossly inadequate numbers of quality, experienced personnel.

Many of us even remember that some of the ships were laid up because we did not have petty officers enough to put those ships to sea, did not have the forces to even take the ships out. That was a sad time in our defense posture when our forces had grossly inadequate numbers of quality, experienced personnel.

We were warned at that time by the Chief of Staff of the Army that we had a "hollow Army", to use his words, and by the Chief of Naval Operations that petty officer shortfalls threatened the Nation's ability to deploy the Navy's ships. However, these problems, which were severe then, have largely been corrected; we now are challenged to ensure that we do not return to those unfortunate days.

In rising to that challenge, the Congress invested in targeted compensation initiatives, such as enlistment and reenlistment bonuses, sea pay and submarine duty pay, aviation bonuses, nuclear duty pay, and medical pay. It also invested in improved PCS permanent change of station reimbursements—though more still needs to be done in this area—the average civil servant being transferred by our government gets far and away more benefits than the average military person making a transfer of the same type—and in improving the overall quality of life of military members and their families through substantial upgrades in facilities such as child development centers and housing.

As a result of these types of initiatives, recruiting and retention of quality people have improved significantly and have stabilized at record levels over the past 4 years. For example, last year, 93 percent of nonprior-service recruits, those who had never been in the service before, were high school graduates, and 95 percent scored average or better on the mental category entrance examination; comparable percentages for 1980 were 68 percent and 65 percent respectively. So in the past 10 years we have had an improve-

ment in recruit quality of 37 percent in the rate of high school graduates, and an increase of 46 percent in the rate of average or above mental categories.

The gains in retention are equally dramatic. Last year, first-term and career retention rates were 49 percent and 86 percent respectively; comparable figures for 1980 were 39 percent and 71 percent. This is an increase of 26 percent in the first term retention rates, and an increase of 21 percent in career retention rates. So that looks pretty good.

This is not to say, however, that the recruiting and retention picture in the military services is perfect. Obviously, there are problems, such as the declining youth population, and nagging shortages in specific skills, that continue to bother us, that continue to require our attention.

However, despite occasional comments to the contrary, the Congress does care about manpower readiness and the welfare of military personnel and their families, and has continued to invest heavily in the personnel accounts, even in these difficult fiscal times.

For fiscal year 1990, the conference approved a military pay raise of 3.6 percent, effective January 1, 1990, and also approved a number of enhancements in pay and benefits.

Let me make a specific point in one particular area. Most people in this country are not fully aware that we have a major pilot shortage in the military, and it is getting worse. It is a problem. The package to help the military services retain aviators is a major part of this bill.

Many of our experienced pilots are leaving for more lucrative jobs in the airlines because of military job dissatisfaction caused by a combination of inadequate compensation and insensitive utilization practices. What is the need? Well, we have seen such an expansion of airline and commercial air traffic that we have a bigger requirement for pilots. About two-thirds of our airline and commercial pilots normally come from the military ranks. Estimates are that the airlines will need about 7,000 pilots a year over the next 10 years—an enormous drain on military pilots—and that already has started.

We have the airlines offering those who can get out of their military commitment or wish to leave the military, offering them almost what they would be making in the military just to start out, and going up, over a period of about 3 to 5 years, to even or above, well above, and over about a 10-year period really going to major increases, in some cases double or two and a half times the pay that they would be getting in the military, plus better retirement benefits, better health benefits, and everything else that goes along with service in the airlines.

So it is very attractive to people who like to fly to get out and make more money, spend more time at home, work maybe 4 days a week, and do better in the long run. They do not have to spend time aboard ship, for instance, if they are in a Navy squadron over in the Mediterranean or somewhere else away from their families. So this has been something that has been very attractive to many people, and so we are having a problem keeping pilots in the military.

Right now the U.S. Navy is over 1,500 pilots short. That is out of a total of, I believe, around 11,900, or something like that, that we are authorized; 1,500 pilots short in the U.S. Navy right now. I never thought I would live to see the day that that would be the case.

The Air Force is short 250 pilots, but projected, by 1994, to be 2,500 pilots short, if nothing is done to turn this situation around. And so that is why we address this issue very substantially this year.

The bill substantially increases aviation career incentive pay for aviators, while requiring them to fly more to be entitled to continued receipt of that pay. Additionally the bill requires that aviators serve longer on active duty after completing flight training, and also that the services cut back on the number of nonflying jobs for aviators.

Let me expand just a little bit. We extended the time requirement for people to stay in from the time they get their wings. The amount of the committed service that they would incur will go up as a result of this legislation. We put it up to 8 years, the requirement, from the time aviators get their wings. Prior to this, we had various lengths of time in the different services.

But let me run through why we think this is so important. It costs a little over a half a million dollars just to get a person through flight school up to the point where they get their wings, where we say, "Yes, you are OK. You are a pilot and you can get that thing up and down. You can do that. You are not a combat pilot by a long shot, but you can get that airplane up and down. You now have your wings. You are now a qualified pilot." That is about a half a million dollars.

Then we send them to a replacement air group for combat training for 6 months to a year. The cost for that additional training can run as much as $2 million more, depending on the aircraft type and the weapons system that they are training on.

Then we send them out to a squadron and they spend 2 to 3 years out in the squadron, and there is another $2 million to $2.5 million or possibly $3 million, depending on what kind of squadron they are in, that it costs for that person to fly through that first squadron tour.

When they come back from that first squadron tour, they are combat ready. They have done the whole business. It is at that point, some 3 years or 3½, maybe 4 years after they are out of flight school before you really have an honest-to-goodness combat pilot that you can say, "Here is your assignment. You go to wherever in the world and you will acquit yourself well because you are now trained as the finest pilot in the world through our military training."

Now, at that time, we also have somewhere between $4.5 million and $6 million invested in that young person. So it just does not make good economic sense for us at that point to turn the people loose to staff the airlines—as much as I would like to cooperate with the airlines—and start over again with a loss of combat capability, start over training another pilot to replace the first one whom we just spent $5 or $6 million on.

So that is the reason we thought this was so important this year, at a time when we were being very hard hit, to keep people, keep military people, keep our pilots in the service.

This is a problem we have addressed, and we have great hopes that the package we put together will work this year and that it will help solve most of the problems. I do not mind cooperating with the airlines and say, once we get a suitable return on investment for these pilots—9, 10 years, whatever it is that they are willing to spend—by that time, they are 32, 35 years of age, something like that. We would want them to serve a 20-year career. Pilots can still fly in the airlines up to 60. Undoubtedly, it will be up to 65 one of these days. So there is another 15 years or so after a 20-year military career, at about age 45, that the airlines can have them if they want them. I would be willing to cooperate with the airlines from that point on.

But our first job in the military budget is to see that we provide the military with pilots that they need and not just set up a training school for the airlines. So we have taken a good crack, I believe, at formulating a package for pilots that will keep them in. I hope so. And I hope they look at it very carefully.

At the same time, this bill requires an evaluation by the Department of Defense on the assignment practices of the services to determine if there are any other improvements that can be made to the system to encourage aviators to remain on active duty.

The conference between the Senate and the House also approved a major package of initiatives aimed at improving the requirement and retention of medical personnel, including substan-

tial increases in the special and incentive pay for medical officers, authorization for nurse recruiting incentives, and implementation of other management initiatives aimed at improving manning, both in direct care, and in support of personnel positions, in the Reserve as well as in the Active Forces. These initiatives should go a long way toward correcting some of the more pressing medical staffing problems that the services are facing. However, much more needs to be done. I expect we also will have to have substantial action on medical issues next year.

Unfortunately, current medical readiness is very questionable. Under the Total Force Policy, and I will address this a little bit later on when I discuss the study we are asking for on Total Force Policy—under Total Force Policy, 80 percent of our wartime medical, combat medical support is assigned to the Reserves. Now, that makes sense. We do not need them as much in peacetime as we do in wartime. And so why not let the Reserves handle this under fast mobilization, get them there to combat, they are there within the first couple of weeks after a war starts. The regulars can handle it until the Reserves get there. And that is the way the system is supposed to work.

Has it worked? Let me give you some figures right now with regard to that 80 percent of combat medicals assigned to the Reserves. We are 71 percent short of doctors—short, not that we have that many. That is 7,100 doctors that we are short; 71 percent.

We are 66 percent out of that 80 percent that is assigned to the Reserves, we are 66 percent short on nurses across DOD. That is 31,000 nurses short that we do not have. When you get into war games, you come to a point where there are a lot of casualties that are coming in and you say, "Well, realistically now, where is the help going to come from?" And they fall back too often in war games on, "Well, we will rely on host nation support."

As though, in a situation like that, host nations are going to be in any better shape than we will be in that.

But in that 80 percent assigned to the Reserves, 71 percent short of doctors, 66 percent short of nurses. That is a huge shortfall.

So I look forward to receiving a rational and comprehensive plan from the Secretary of Defense in which he makes recommendations to correct these and other longstanding problems in the manning of our military medical system.

The conference also approved improvements in the survivor benefit plan that will reduce premium cost to a flat 6.5 percent of the gross annuity, and also provide an option for a higher level of coverage for those who feel they need it. The current plan guarantees to surviving spouses of military retirees who participate in the plan an annuity of 55 percent of retired pay until the beneficiary reaches age 62, and 35 percent thereafter. This reduction in annuity at age 62 implicitly recognizes that surviving spouses qualify for Social Security at that age, with the net result a steady income stream to the survivor for life.

The conference approved a provision that would allow participants the option of purchasing a supplement that would provide level benefits of 55 percent of retired pay to a survivor for life. This option, and a related 12-month open enrollment period to allow current nonparticipants to join SBP, will become effective October 1, 1991. The delay in implementation is to allow the Department of Defense time to make recommendations on verious actuarial options to support the high option part of the survivor benefit plan.

The final issue I want to emphasize on manpower is the requirement for the Secretary of Defense to conduct a comprehensive study of the total force policy [TFP], and the decision process used by DOD to determine the correlated structures of the Active and Reserve Forces.

The total force policy was implemented in 1973 to integrate our Reserve Forces more fully into our national defense posture. What it basically said was yes, we have our regular forces out there in each of these services but we do not need that big a regular force if we can take the Reserves and National Guard and integrate those Reserve Forces more fully into our national defense.

Quite frankly, last year I was startled to learn that an assessment of the effectiveness of this policy has not been conducted since its implementation 16 years ago.

There is no doubt, that National Guard and Reserve Forces are vital to national security. Importantly, the total force policy designates Guard and Reserve Forces as full partners with the Active components in deterring aggression during peacetime, and in waging war if peace should fail.

Very substantial missions are assigned to Guard and Reserve components as integral parts of theater operational plans. For example, the Army Reserve provides 70 percent of the Army's combat support and combat service support forces—combat support includes engineer, signal, intelligence, and chemical activities; combat service support includes medical, maintenance, supply, transportation, and ammunition activities. It is crystal clear that the Army has a big stake in the readiness of these forces.

So how well is the total force policy working? If Senators look at the readiness of the Army Reserve, they have to conclude, as I do, that it has not been working very well. For example, in last year's Reserve Forces Policy Board report, 45 percent of Army Reserve units were rated below C-3, noting units which were not combat ready. These and earlier year figures speak for themselves: In fiscal year 1984, 58 percent of Army Reserve units were not combat ready; in fiscal year 1985, 60 percent; in fiscal year 1986, 55 percent; and in fiscal year 1987, 45 percent of Army Reserve units were not combat ready.

Let me add on that, every year we go through this. We have a new plan, how we are going to flesh these out and make them more combat ready. And over the last 3 years that I have been directly responsible on this subcommittee, we have not really seen any progress. We can note that from the figures I have already read.

On the brighter side, the Air National Guard and the Air Force Reserve are rated below C-3 in only 6 and 10 percent of their units respectively. So the Air Guard and the Air Force Reserve units are exceptionally high in readiness, and they are performing substantial air missions on a day-to-day basis. For example, the Air National Guard provides 86 percent of strategic interceptor forces based in the United States, 50 percent of tactical reconnaissance forces, and 36 percent of tactical air support forces. The Air Force Reserve and Air National Guard combined provide 59 percent of theater airlift forces, 45 percent of air rescue and recovery forces, and 40 percent of weather reconnaissance forces. They also provide 93 percent of aeromedical evacuation aircrews, 50 percent of strategic airlift aircrews, and 38 percent of tanker/cargo aircrews.

So what is the bottom line on the current status of the total force policy? I think the National Guard Association of the United States summarized it best in one sentence in its legislative action plan for 1989, and I quote: "As we near the end of the 1980's, it is apparent that the total force policy in the 1970's has not been fully implemented." There is no question in my mind that there continues to be a leadership vacuum in the Department of Defense as far as the total force policy is concerned; I stress this because all the rhetoric put out by DOD would have us believe otherwise. As I found in a hearing we had on May 16 of this year, there has never been a singular, authoritative assessment of the total force policy, even though the policy has been in effect for 16 years. Everybody seems to have a piece of the action, but no one has the whole policy in hand.

In consequence, and not surprisingly, there seems to be no coherent total force policy worthy of the name. We need to correct this, and the report

the bill requires from the Secretary of Defense on the matter is the first major step toward that end.

We want the people in the Pentagon and the Secretary of Defense and the President to take this total force policy review very, very seriously, So I look forward to receiving that assessment, especially in light of the major restructuring of our military forces that I believe we will be implementing over the next several years.

What has worked well with regard to the regulars? What has worked well with regard to the reserve, with the national guard? Can we learn something from our past experience? Perhaps new missions can be assigned to the reserves. Perhaps fewer can be assigned in other areas, or taken out and put back into the regulars. We do not know. But that is the kind of guidance we need if we are to get the maximum benefit of every defense dollar spent in the years ahead.

Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 7 minutes and 21 seconds.

Mr. GLENN. Mr. President, I would also like to highlight for my colleagues several of the provisions in the conference report concerning the ongoing modernization of our conventional and strategic forces, to include funding for several important procurement development programs. Procurement programs authorized in the bill for fiscal year 1990 include the M-1 tank, the multiple launch rocket system, the C-17 transport aircraft, the DD-51 destroyer, the F-14D fighter aircraft, and the submarine-launched Trident D-5 missile. Development programs authorized for 1990 include the SSN-21 attack submarine, the V-22 tiltrotor aircraft, the small ICBM, and the B-2 Stealth bomber.

In that context, Mr. President, I would like to call my colleague's attention to conference action regarding the development of the V-22 tiltrotor aircraft. In the amended fiscal year 1990 budget submitted last April, the Bush administration proposed to terminate the V-22 program. This in spite of the fact that for 9 years the V-22 had been fully supported by both DOD and the Congress, that nearly $2 billion had already been invested in its development, and that the aircraft already was entering flight testing.

The Congress reacted quickly and decisively to the proposed termination of the V-22. On receipt of the amended budget, the Senate unanimously passed a resolution sponsored by Senator STEVENS and myself expressing the sense of the Senate as strongly supporting continuation of the V-22 program. Again in August, during Senate deliberation on the fiscal year 1990 Defense authorization bill, 15 Senators sponsored an amendment to the bill which passed the Senate. It stated that it was the sense of the Senate that the President should continue development of the joint services V-22 tiltrotor aircraft.

In addition, all four congressional committees dealing with the V-22 issue approved development funds for the aircraft in fiscal year 1990, and two of the four committees also approved advance procurement funding.

Mr. President, Secretary Cheney wanted to zero out the V-22 on the basis that it was not worth it for the money spent just to give the Marines a new ship-to-shore capability compared to the helicopter capability they have now. But that was such a narrow interpretation of what the V-22 is all about that I could not believe it. This Congress and the committees of the Congress have supported the V-22 program for over 9 years, brought it along, not just as a marine ship-to-shore; it is for all the things that follow that ship-to-shore movement and, indeed, every single use of helicopters that can be made. This tilt rotar aircraft, the V-22, will have the capability of going twice as far as the helicopters it will replace, twice as far, twice as fast, and with at least one-third more payload. If somebody walked into our office today and said that was a capability we could buy, we would probably fall all over ourselves trying to support that kind of an increased capability. Yet, here we have it, and we are talking about canceling it for the military, and for all the civilian use, I think, that will eventually flow from that, also.

Again, the Congress reacted quickly and decisively to the proposed termination, and we passed that resolution, as I indicated.

The four committees approved development funding in fiscal year 1990, and two of the four committees also approved advanced procurement funding. The conference report before us today authorizes funding for the continued development of the V-22 in 1990, and also authorizes advance procurement funds appropriated in fiscal year 1989 to be brought forward for potential use in 1990.

Finally, regarding the current status of the V-22 Development Program: two of the six V-22 test aircraft are now flying in both the helicopter and airplane modes. As of today, a total of 50 test flights have been completed successfully with no major problems encountered That is very promising.

Mr. President, the other development program addressed in the conference report I want to highlight for my colleagues is the B-2 Stealth bomber. During Senate deliberation on the DOD bill, I sponsored an amendment to strengthen the operational test requirements for early flight testing of the B-2. I am pleased to report to the Senate today that those requirements are now part of the conference report. These flight test milestones essentially restrict the obligation of procurement funds for the two B-2's authorized for procurement in 1990 until the Secretary of Defense certifies to Congress that the results of early flight testing, including low observable testing and performance and flying qualities testing, are satisfactory.

Mr. President, I have just highlighted what I consider to be some of the very positive aspects of the 1990 Defense authorization bill. Regrettably, this bill also contains a provision that will have a major negative impact on our defense readiness, as far as I am concerned; namely, the termination of the SR-71, the Blackbird, the strategic reconnaissance program. Termination of this program is a particularly disappointing and startling decision given that the Senate Select Committee on Intelligence, the Senate Armed Services Committee, and both the House and Senate appropriations committees had voted to support full funding for the SR-71 in fiscal year 1990, this in spite of the administration's opposition to the program. As a member of both the Senate Select Committee on Intelligence and the Senate Armed Services Committee, I am deeply concerned about the termination decision.

Mr. President, the SR-71 is a proven reconnaissance asset. It brings a unique capability to America's strategic intelligence efforts. It is a high altitude, high speed, long-range reconnaissance platform that has served our Nation well since it first flew in the mid 1960's. That might lead people to believe that it is out of date. Anything but. It is still the finest system of its type anywhere in the world today. Today, it remains a highly modern and proven asset providing multisensor coverage on demand while giving little or no warning to its reconnaissance targets.

Mr. President, it flies basically above the SAM range, surface-to-air missile range, and below the Asat range. That is a pretty good order, I will tell you. It is very valuable. Because it is the world's fastest and highest flying aircraft, the SR-71, unlike other reconnaissance platforms, can accomplish its mission with comparatively little vulnerability to attack. This makes it particularly useful in crisis situations, such as the Persian Gulf. While opponents of this aircraft argue that national technical means are capable of performing the same mission, these alternate platforms are far less flexible and survivable than the SR-71.

Mr. President, I think that few Members of the Congress and certainly few members of the public, realize the magnitude of the negative effects that will flow from this decision to terminate the SR-71. This lack of understanding is due in large part to the fact that the vast majority of our Na-

tion's intelligence capabilities, including the SR-71, cannot be fully disclosed in public because these programs are so highly classified.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. GLENN. I yield myself time off the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GLENN. Mr. President, this lack of understanding is due in large part to the fact that the vast majority of our Nation's intelligence capabilities, including the SR-71, cannot be fully discussed in public. Because these programs are so highly classified, few Members of Congress are even aware of the existence of many of these systems, unless the Members serve on one of the committees that has oversight of one of these programs.

And because they are classified, intelligence systems have virtually no public constituency. Unfortunately, in an increasingly constrained budget environment defense systems and programs that bring highly visible benefits to constituents are far more likely to survive the budget cutter's ax than very low-profile classified programs, such as the SR-71, no matter how valuable. It is interesting to note that for some years now DOD has been making the case that the U.S. needs an antisatellite, an Asat, capability, in large part due to the threat posed to our satellites by the Soviets.

Should the U.S. deploy an Asat system, it is likely the Soviets would end their moratorium on testing and advance their Asat Program. Given the increased threat that such a superpower Asat race would pose to our already vulnerable satellites, I feel very strongly that this Nation is ill-advised to cancel the SR-71, which is the only truly survivable air-breathing reconnaissance platform in our inventory.

Termination of the SR-71 highlights yet another problem that our Nation will face in the years to come. With the revolutionary changes taking place in the Communist bloc, the prospects of reaching sweeping and truly meaningful arms control agreements with the Soviet Union are better than they have ever been since World War II. While I am second to no one in my enthusiasm for this prospect, this Nation must nonetheless keep in mind that any arms control agreements necessarily will be complex and will be difficult to monitor adequately. Consequently, enormously expensive intelligence systems that enable us to monitor Soviet compliance with these complex agreements constitute a major hidden cost of such agreements. If these essential intelligence systems are sacrificed to narrow budgetary considerations, our ability to monitor these agreements adequately will be placed at risk, endangering our Nation's security and reducing public support for the arms control process.

Why should we have this program? The Air Force does not particularly want it. They do not particularly like to be in the reconnaissance business. They do not control the program, so they would like to make other use of their money. This airplane does not shoot; it does not drop anything, and, they have not supported it.

In short, intelligence systems, such as the SR-71, are the eyes and ears of our Nation's defense. They are the true force multipliers that let us use all of our other systems intelligently. In making the potentially disastrous decision to terminate the SR-71 program, we opt to remove the United States from the strategic aerial reconnaissance business, placing this Nation at a serious disadvantage in future crisis situations. Given the magnitude of the harm to our Nation the termination of this program will cause, I strongly urge my colleagues to support recent appropriations conference action to fully fund the SR-71 program.

Mr. WARNER. Mr. President, I am most apologetic to interrupt my colleague, but as one who is controlling the time of the chairman, another Senator had been scheduled for this period. We have to go off the bill at 2.

Mr. GLENN. I will be 1 minute.

Mr. WARNER. I thank the Senator.

Mr. GLENN. As a final comment, Mr. President, I sound a note of caution to the administration to ensure that next year's defense budget is based on, and justified with, the congressionally required national security strategy report. Unfortunately, this annual report was not provided in support of the budget before us today. However, given our ongoing fiscal constraints and rapidly changing geopolitical environment, future defense budgets must be based on our national security objectives, not the other way around. Those objectives are in a changing state of flux right now.

In summary, Mr. President, I believe on balance the defense authorization bill for fiscal year 1990 is a reasonable compromise. I urge my colleagues to support the bill and vote for its approval.

Mr. President, I want to give thanks to Fred Pang and David Lyles of the committee staff who are here with me on the floor today, and to Ken Johnson of the minority staff, all of whom worked so hard, particularly on the manpower end of this thing. Also my thanks to Phil Upschulte and to Milt Beach of my office, who worked long and hard on these and other aspects of the bill. I likewise want to recognize the assistance of Comdr. Bill McKee, U.S. Navy, who was very helpful to me in the preparation of this bill.

In summary, Mr. President I think this is a good bill even though I have reservations in those areas about which I spoke, and I yield the floor.

Mr. THURMOND addressed the Chair.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. WARNER. Mr. President, I yield such time to the distinguished Senator on my time as he may require.

Mr. THURMOND. Mr. President, I wish to thank the able and distinguished Senator from Virginia.

Mr. President, earlier this year, the Senate passed a Defense authorization bill that supported the President's Budget request, emphasized strategic modernization, and maintained a vigorous Strategic Defense Program. Our bill also included enhancements in readiness and modernization of our conventional forces.

In contrast, the House passed a bill that reinstated all the programs terminated by Secretary Cheney, virtually eliminated the funding for strategic modernization, and cut the SDI Program from $4.6 billion to $218 billion.

The conference report before us today goes a long way toward redressing the more egregious positions and recommendations in the House bill. It also provides a solid framework for defense in a period of constrained budgets and uncertainty in the Soviet Union.

Before I discuss the bill, Mr. President, I want to congratulate Senator NUNN and Senator WARNER for their leadership during the joint conference. I do not recall any conference where the two Houses were further apart on so many issues. Both the chairman and ranking member of the Armed Services Committee were superb in their negotiations, and I believe obtained the best possible results in view of the wide gap between the House and the Senate.

Mr. President, President Bush asked the Congress to fully fund the SDI request so that he could make an informed decision in 1992 as to whether the United States should deploy strategic defenses. Although the $3.57 billion authorized in the conference report will not—in my opinion—invoke a Presidential veto, it will delay an informed decision on deployment of any strategic defense.

Further, congressional cuts in SDI will require the restructuring of the program and may result in a reduction in the work force currently planned for fiscal year 1990 SDI research. I hope that this bleak forecast does not materialize, especially at a time when there are indicators of progress in the SDI Program.

SDI is a vital program. We in this distinguished body realize the importance of strategic defense in an era of reduced nuclear weapons and the proliferation of ballistic missiles to the developing countries. The United States

should not be without strategic defenses, however limited.

Mr. President, the conference report also provides $1.13 billion funding level for ICBM modernization. This funding level is significant in that it will allow the administration to proceed with both the small ICBM and the rail garrison MX. During the debate here on the Senate floor, we were told that the Soviet Union is reducing its forces. I agree that they are reducing their forces. However, I would like to remind my colleagues that these are conventional forces, not strategic.

All the evidence I have seen indicates that the Soviet Union is proceeding with its strategic nuclear modernization. They have deployed two mobile missile systems that are fully operational, and continue to deploy more. The Soviet's goal is to deploy an ICBM force that is capable of satisfying their wartime objectives with fewer, significantly more survivable missile systems.

I believe that the United States must continue strategic modernization, not only to provide for the survivability of our missile force, but also to support our position in the strategic arms reduction talks. This conference report supports these positions.

Mr. President, let us not fool ourselves—this bill is a compromise. Many Members in the House and Senate feel that defense spending should be reduced. They base this belief on the statements made by Secretary Gorbachev. Although we are seeing significant changes in Eastern Europe and some reduction in Soviet conventional forces, we cannot take the unilateral step of cutting our forces.

By all accounts Secretary Gorbachev is in serious trouble. There is ethnic unrest, labor unrest amid the civilian population, and grumbling in the Soviet Armed Forces. Although we all wish him success in trying to bring more freedom to the people, Mr. Gorbachev may not survive the evolution taking place in the Soviet Union.

During our lifetime, we have seen several attempts at reform in the Soviet Union. Each attempt has failed, and has been followed by a period of significant military tension between our nations. In the past, the United States was prepared to meet these shifts in power, and we must be prepared to meet the prospect of another change. Our Nation's strength is, in large measure, the reason why we have seen such dramatic changes in the Soviet Union and Eastern Europe and has enabled us to get the agreements that we have. Now is not the time to alter our strategy of peace through strength.

Mr. President, I support this compromise bill and urge my colleagues to do the same. I believe it meets our minimum current defense needs while, at the same time, it recognizes the fiscal realities that our Nation faces.

Mr. President, I yield the floor. I wish to thank again my distinguished friend from Virginia.

Mr. WARNER. Mr. President, I compliment the distinguished Senator from South Carolina on his very perceptive remarks. He has been here a number of years and has seen many, many conference reports on the authorization bill. He speaks truly with a voice of experience.

Mr. President, I understand that under a previous order the Senate will now move from the conference report on the authorization bill to another issue, and I wonder if the Chair would care to address the Senate.

The PRESIDING OFFICER. That order will be executed by the Chair at 2 p.m.

Mr. WARNER. Mr. President, at such time as this bill is taken up again, the Senator from Virginia will give his remarks rather than to experience interruption which will take place in just about 1 minute's time. In view of that, seeing no other Senator seeking recognition, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. NUNN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NUNN. Could I inquire of the Senator from Virginia of the number of speakers on his side who will want to be heard and how much time he thinks that will require.

Mr. WARNER. Mr. President, the Senator from Virginia has not yet had an opportunity to speak, having yielded as a matter of courtesy to others. I will require 10 minutes, perhaps less. I was told that the senior Senator from Alaska desires to have a period of 5 minutes, and the Senator from New Mexico 5 minutes. I think on the side of caution I will just reserve another 5 minutes under the time of the Senator from Virginia. I have not used but very little of it.

Mr. NUNN. It sounds like we will have another 30 minutes of discussion. I say to the Senator from Oregon, we have about 30 minutes more of discussion on this bill. I know the Senator is going to take his bill up at 2 o'clock. Is it the view of the Senator from Oregon that we will have a vote at 3 o'clock?

Mr. PACKWOOD. Yes. Under the time agreement, there is a vote at 3 o'clock.

Mr. WARNER. Mr. President, will the Senator repeat that for Senators.

Mr. PACKWOOD. There is a vote already set at 3 o'clock. There is 1 hour of debate equally divided on capital gains to start at 2.

Mr. BENTSEN. My understanding is a maximum of 1 hour. If such time is returned and not utilized, what would the status be on the time of the vote then? Could the vote occur before 3 o'clock?

Mr. NUNN. I was going to inform the leader, who is now on the floor, we have about probably 30 minutes that will be actually needed on the Armed Services authorization bill and then we can go to a rollcall vote on it. We do not seek it now, if the majority leader would like to go ahead with the previous order.

The PRESIDING OFFICER. The Chair advises there is no order for a time certain to vote on cloture.

Mr. NUNN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. NUNN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NUNN. Mr. President, based on the conversation we have had here I can inform all of the individual Senators who would like to speak on the military authorization bill that we will begin again on the military authorization bill after the rollcall vote is completed on the cloture on capital gains which will be no later than about 3:15. It could be earlier than that.

So I would ask all Members who would like to be heard on this authorization bill to be prepared. It will be our intention to yield back the time, and not to use the entire time remaining. If we can do so we can come to a vote somewhere in the neighborhood of 4 o'clock.

So those Senators interested in speaking on this authorization bill, I hope, will be prepared to speak sometime between 3:15 and 4 o'clock.

Mr. WARNER. Mr. President, as a clarification of the comments of the Senator from Georgia, the Senator from Virginia has reserved 10 minutes for himself, 5 minutes to the Senator from New Mexico, 5 minutes for the senior Senator from Alaska. That would be an additional 20 minutes.

The first question is how much time has been consumed by the Senator from Virginia thus far, and then how much time remains, and also for the Senator from Georgia? Because if there are a number of Senators who desire to speak, in fairness we have to indicate what I perceive is a very limited time remaining. I just did not want the statement of the Senator from Georgia to be as an open invitation for a great many individuals to join.

The PRESIDING OFFICER (Mr. ADAMS). In response to the request of the Senator from Virginia, the Senator from Virginia has used 24 minutes, has 36 minutes remaining; the Senator from Georgia has used 30 minutes and has 29 minutes 17 seconds remaining.

Mr. WARNER. So in essence the Senator from Virginia has roughly 15 minutes remaining and the Senator from Georgia has 30 minutes remaining.

Mr. NUNN. What happens to the Senator from Georgia's 43 seconds?

The PRESIDING OFFICER. Vanished. We will restore the Senator's 43 seconds so he has precisely 30 minutes remaining.

Mr. NUNN. I thank the Chair.

Mr. WARNER. Mr. President, I have a commitment of 15 minutes, and 15 remaining uncommitted.

The PRESIDING OFFICER. That is correct.

Mr. NUNN. Mr. President, due to an administrative error, four tables showing the details of the conferees' recommendations for authorization of military construction projects in fiscal year 1991 were inadvertently omitted from the conference report statement of managers on the National Defense Authorization Act for fiscal years 1990 and 1991.

I ask unanimous consent that these four tables be printed in the RECORD.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

TEMPORARY REDUCTION IN CAPITAL GAINS TAX FOR NONCORPORATE TAXPAYERS

The PRESIDING OFFICER. Under the previous order of the Senate, the hour of 2 p.m. having arrived, the Senate will now resume consideration of H.R. 3628, which the clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 3628) to temporarily reduce the capital gains tax for noncorporate taxpayers, and for other purposes.

The Senate resumed consideration of the bill.

Mr. PACKWOOD addressed the Chair.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. PACKWOOD. Does the time on this run out at 3 o'clock or an hour from now?

The PRESIDING OFFICER. I say to the Senator from Oregon there is an hour of debate equally divided.

Mr. PACKWOOD. I thank the Chair.

Mr. President, I would like to yield 10 minutes to the Senator from Delaware.

Mr. ROTH. Mr. President, the most important contribution I can make to this debate—over the next 10 minutes—is to clear the air of misunderstood and misrepresented facts—many of which have been used by the opponents of this important bill.

And to begin, let me say simply that it is no accident that America is in its 83d straight month of economic expansion. It's no accident that over 20 million new jobs have been added to American payrolls since 1982, and that economic growth has pushed real median family income up 12 percent.

This growth does not surprise those, who in 1981, supported the Roth-Kemp tax cuts. This growth was precisely what we intended. And, it is what we intend now with this capital gains tax cut and the introduction of the IRA-plus. All we are doing is giving Americans—our constituents—the power for continued economic growth and self-reliance. We are encouraging Americans to invest in America—to build a strong, sound economic foundation as we move into the 1990's and the scenario of increasing global competition.

Now, just as the naysaying tax addicts railed against Roth-Kemp—not because it would really reduce Federal revenues—because Federal revenues have increased from $517 billion in 1980 to a projected $1 trillion, 80 billion in 1990—but because it would reduce pork barrel politics, these people are using the same, old, worn out, misleading arguments today.

And frankly, Mr. President, they are wrong. I know it. They know it. And the American people know it. That is why we have a majority of the U.S. Senate supporting this bill.

Quite simply, the opposition is missing the point. Their main argument is that the bill will cost money, and that the wrong people will get the benefits. Both arguments are misleading. And both fail to address the most important need facing our country—inexpensive capital for investment growth and jobs. More than that, they fail to consider what this program is going to do for the economy. They also fail to understand that if America is to compete in the emerging global community, and if the economic comeback realized by Roth-Kemp is to continue, this country needs capital. We need a plan to encourage Americans to save and invest.

Concerning the cost argument, the truth is that the IRA-plus does not cost any revenue, but, in fact, raises revenue for the Federal Government.

Three private and prestigious organizations are forecasting that the IRA-plus will result in increased revenues in 5, 10, 15, 25, and beyond years. And these studies are based on extremely realistic economic assumptions. Not only that, but these opinions are widely held, by both Republicans and Democrats.

Martin Feldstein, president of the prestigious National Bureau of Economic Research, recently wrote me saying that

Although revenue will be "lost" when the funds are withdrawn without tax by retirees, this should be more than offset by the additional new saving of future earners • • • raising our national saving rate deserves to be one of the highest priority issues facing the Congress.

An equally prestigious group, the Institute for Research on the Economics of Taxation, has also studied our IRA proposal and estimates that it will raise $32 to $37 billion over the next 5 years at a minimum, and by 2030 it will increase GNP by 4.5 percent creating over 500,000 jobs and increasing real wages by 2 percent. The end result according to IRET is an increase in Federal tax revenues by 2030 of $40 to $44 billion in present value terms. Lewin/ICF concluded that the IRA-plus would result in a long-term revenue increase, increased capital accumulation and a higher GNP if savings increased to the 1986 IRA level.

Lawrence Summers, of Harvard University and a Dukakis adviser, has said that "without increased national saving it will be impossible to simultaneously increase investment and reduce the trade deficit and America's dependence on foreign capital." He has also found that IRA saving is new saving, and not merely the transfer of funds from other accounts. Which is the primary reason that the IRA-plus will not lose, but raise Federal revenues in the years to come. Since IRA saving is primarily new saving, it represents money that otherwise would have been consumed. Because there is no tax on consumption there is no foregone tax revenues from money that is placed in an IRA and not taxed. However, increased savings and capital will result in a lower cost of capital, a reduction in the trade deficit, and ultimately an increase in Federal tax dollars. My opponents are completely missing the point.

Concerning the benefits argument—or that these measures are only for the wealthy—we see that the opposition's line is equally absurd. Two-thirds of IRA participants were middle of lower income individuals, and they contributed nearly two-thirds of the funds added to IRA's in 1986. Of more than 15 million tax returns with IRA contributions, 67 percent were of families and individuals with an adjusted gross income of $50,000 or less. This IRA-plus no more benefits the rich over the poor than air and water. It is simply a tool that can be shared and a tool that can benefit all Americans. It benefits our families by allowing for early withdrawal for necessities like health, education, and shelter. It benefits our young couples, by encouraging them to start early to save for home, family, and retirement. And it benefits our middle aged and elderly by resurrecting the savings opportunities they relied on prior to 1987. And as I have said, Mr. President, it is also good public policy that benefits America as America seeks to maintain leadership in the arena of global competition.

The PRESIDING OFFICER. Who yields time?

Mr. PACKWOOD addressed the Chair.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. PACKWOOD. Mr. President, let me simply announce to anybody who wants to speak on our side on this subject—and several Senators have indicated so—there is only about 20 minutes of time left. I plan to use, on our side, about 10 minutes now. If they want to speak, they should come relatively soon.

Mr. President, yesterday the majority leader in speaking berated our bill and indicated that the major problem we face in this country is deficit reduction. If we want to increase savings, we should reduce the deficit. If we want to increase productivity and competition, reduce the deficit.

That is a fair argument. He was alleging that the capital gains bill loses money and increases the deficit. I will allege that the capital gains bill does not lose money. Indeed, it raises money and will narrow the deficit. But it is interesting to listen to the arguments of those who are opposed and then compare them with some of their other comments or votes earlier in the year.

Let us take child care. We passed a bill earlier this year, a hotly contested bill. Basically there was a Republican-Democrat split, with a few crossovers on each side. The child care bill that we passed will result in $8.4 billion in additional spending over the next 5 years. We raise taxes to take care of the cost.

I am not accusing anybody here of raising the deficit. My point is that, if we were willing to raise taxes to take care of a child care bill that cost $8.4 billion, we obviously had done nothing to reduce the deficit. We raised taxes; we raised spending.

The same is true with the so-called tax extenders that are in the House reconciliation bill and that the Senate conferees want to adopt. These are tax provisions that are the extenders scheduled to expire at the end of this year, or have already expired.

For example: research and development credit. Under current law, businesses are allowed to take a credit against their taxes for research and development expenditures. This expires at the end of 1989. Extending it costs money.

Another example is I strongly support this provision under which an employee is not taxed on up to $5,250 of undergraduate tuition and expenses paid for by his or her employer. The employer sends an employee to the local community college to take a course or courses that will help them in their work. This provision expired at the end of 1988. If this was counted as income to the employee and the employee had to pay taxes on it, the Government would collect some money.

In order to extend these and other provisions, we have to pay for them. If we do this—as we have done several times in the past—we would raise taxes to pay for them.

We would be saying the deficit is not the critical problem, because if it was the most critical problem, we would use these taxes to reduce the deficit. Instead, we said that these programs have a higher priority than using the taxes to reduce the deficit. Similarly, we could have made permanent the telephone excise tax, which is what we did to pay for child care, to reduce the deficit instead of having a child care program. We said, no, child care is a higher priority.

So when those who come in to attack the capital gains tax and say the deficit is the most critical problem, I respond that they are saying the deficit is the most critical problem, except for the programs they like, and then that is more critical problem than the deficit.

I realize we all see the world through our eyes and we all have favorite programs that we say are worth a higher priority than narrowing the deficit. Most of us probably find when we go home, all the groups want to narrow the deficit until we come down to actually saying how we are going to narrow it. You have to either cut spending or raise taxes. If there is another way to narrow the deficit I do not know what it is. Then, as soon as you want to cut any program somebody likes, they do not want to narrow the deficit that way. Or if you are going to narrow it by raising their taxes, they do not want to narrow it that way.

That is what I find. The opponents of this bill say narrow the deficit but do child care first; narrow the deficit but do tax extenders first.

Now we come to capital gains, and I could make the argument, if I wanted. Senator ROTH's IRA raises enough money to pay for the capital gains—if you assume capital gains loses money which I do not. The opponents say they want to raise revenue to pay for child care and extenders, instead of narrowing the deficit. My argument is no different—here is the revenue to pay for capital gains.

But I want to stress that capital gains is different. The Treasury Department predicts that the lower individual capital gains tax that we have introduced, forget the IRA's for the moment, does not lose money; it raises money. And it raises money throughout the entire 5-year period and, frankly, that is as far as we ought to try to intelligently predict. Beyond that the variables are great. There is no reliability as to what our predictions are. So Treasury says it raises money and it is understandable why.

You are an employee in a corporation and making $30,000 or $40,000 a year and you happen to own a piece of property; you are holding it; you are not selling it. As you are not selling it, the Federal Government is not collecting any taxes on it because you are not selling it and getting money for selling it.

But if the capital gains tax is lowered Treasury says—and I think they are correct—some people will undertake transactions they would not otherwise undertake. Some people will sell property; some people will sell stock; some people will invest in a corporation in the hope that it will make profits. They would not otherwise do it but for the capital gains differential.

So a person sells a piece of property for a $10,000 profit; it was bought for $10,000 and sold for $20,000. The $10,000 profit is called a capital gain. Under our bill, you would pay a 20 percent tax or $2,000. That is $2,000 that the Government has collected that we would not otherwise collect but for the capital gains differential, because the person would not have sold the property. Now the person has gotten to keep $8,000 himself. There is nothing wrong with that. He keeps $8,000; we get $2,000. We can use it for poverty programs, tax extenders, child care, or whatever else we want to use it for.

Those who say that a lower capital gains rate loses money presume that the cut in the rates is so great that there will not be enough additional transactions to make up for the loss of rate.

Let me give an example. Let us say that the capital gains tax was 30 percent and you had 10 transactions a year. Let us say they are all the same value transactions. If you cut the capital gains rate in half, if you cut it to 15 percent, you would have to have 20 transactions of the same value to make as much money as you would at a 30 percent tax rate on 10 transactions. The Treasury Department projects that there will be more than 20 transactions when this rate is cut. Those who criticize the tax cut say there will not be 20 transactions so we will lose money.

In the past, we have depended in this body upon the estimates of the Joint Committee on Taxation. They predicted in 1978 when we cut the capital gains rate that we would lose money. As a matter of fact, we did not. We gained money. They predicted in 1981 we would lose money when we cut the capital gains rate again; as a matter of fact, we did not lose money. We gained money. They are predicting again we will lose money. The Treasury is predicting we will gain money. I think the Treasury is more likely right.

In contrast, all the other perfectly worthy programs that people have advocated on the floor of the Senate this year—child care, extension of expiring tax provisions—clearly lost money. We raised taxes not to narrow the deficit, but to pay for these programs.

In this case, we will raise money by lowering the capital gains tax and we can use that money to pay for some of these other programs.

For that reason, Mr. President, I would hope when cloture is invoked today we would have a few more votes than we had yesterday. If we do not quite have 60, I hope the next time we have this go-around we have 55 or 56 or 57, and one day we will have enough, and pass a lower capital gains rate.

Mr. ARMSTRONG. Mr. President, will the Senator yield?

Mr. PACKWOOD. I am happy to yield.

Mr. ARMSTRONG. Mr. President, if the Senator has 7 or 8 minutes, I am glad to address this subject if he will yield me time.

Mr. PACKWOOD. I ask how much time do I have remaining.

The PRESIDING OFFICER. The Senator has left 10 minutes and 40 seconds.

Mr. ARMSTRONG. Mr. President, under the circumstances I wish to ask

for a lesser amount of time; 2 or 3 minutes.

Mr. PACKWOOD. I am happy to yield 3 minutes to the Senator from Colorado.

The PRESIDING OFFICER. The Senator from Colorado is recognized for 3 minutes.

Mr. ARMSTRONG. Mr. President, I am grateful to my distinguished colleague from Oregon for yielding. Particularly I want to express my admiration for the way he presented this issue. There is no doubt in my mind, this is the major financial issue facing Congress. Although there is some doubt we are going to get the 60 votes this afternoon, there is very little doubt in my mind in the near future we are going to enact a capital gains tax cut primarily because of the energy and creativity in which he advocated this issue.

I do not know whether it is going to happen this afternoon. If it does not, it will be a pity and too bad for the country. If we are a little short today, it is a forerunner for victory in January or February or whenever.

My own theory is if we fail today, we ought to come back in January and plan to bring this issue up every morning and afternoon until it passes. It is clear the majority in both the House and Senate favor this measure. It is very, very clear it is good for the country from an economic standpoint.

To have it defeated because of parliamentary stalling I think does an injustice to the country and it is a proposal I think will pass and deserves to pass.

Mr. President, I want to make one observation about the substance of it and that concerns the indexing provision. It is all very well to argue what the rate of tax ought to be with respect to real gains. But at the present time we are taxing people on inflation.

I want to give you one very concrete and specific example. Let us say Uncle Harry—not his real name—but in 1960 he bought $1,000 worth of stocks. In 1989 he sold that for $9,000. His taxable gain—his nominal gain is $8,000. Because Harry is in the 33-percent tax bracket he pays $2,640 in capital gains taxes. However, inflation has eaten up all but $2,026 of his profit. After he pays his tax Harry is $613 worse off than before.

That is unfair. It is unjust. Whether you think the capital gains rate ought to be 25 percent, 35 percent, or 5 percent, surely it should not apply to illusory gains of this type. This is no isolated case. It is not my Uncle Harry. It is someone else.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point six arguments in favor of capital gains indexing, the observations of such distinguished economists as Dr. Murray Weidenbaum, Dr. Alan Blinder, Dr. Norman Ture, Dr. James Miller and a number of others who commented on this specific proposal, as well as the editorial comments from around the country in support of indexing the basis for capital gains taxation.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CAPITAL GAINS INDEXING

Proposal: To permit individual taxpayers to index for inflation the basis used to calculate capital gains tax liability. The indexing would be based on the GNP deflator and would apply to inflation after December 31, 1989. Indexing would be available in addition to capital gains rate reduction.

Why This Provision Should Be Adopted:

(1) Fairness—taxpayers should not be subject to tax on capital gains that are due solely to inflation.

(2) Indexing capital gains would reduce the effective capital gains tax rate.

(3) The tax on inflationary capital gains is not a tax on income or even on the increase in the real value of the asset. It is purely a tax on capital very much like a property tax—but only assessed on property when sold!

(4) The United States now has one of the most anti-capital tax systems in the world. Reducing the effective capital gains tax rate would reduce the income tax bias against saving and investment in this country, thereby increasing domestic investment, the growth rate in employment and output, and improving our international competitiveness.

(5) Indexation of the tax basis of capital assets would encourage risk-taking and entrepreneurship, the backbone of our economy. New businesses and new ventures are essential to a dynamic economy.

(6) Indexation of capital gains encourages research and development by insuring the value of the product of the research against erosion from inflation.

(7) Capital gains indexing is supported by economists and journalists of all political persuasions and viewpoints.

(8) Indexing capital gains enjoys broad support in Congress. The Senate passed capital gains indexing in 1982 by a vote of 61 to 32. Indexing is also included in the 1989 House Budget Reconciliation package, having been affirmed by a 239-190 vote.

LEADING ECONOMISTS SPEAK OUT ON CAPITAL GAINS INDEXING

"There's one aspect of capital gains that unites virtually all economists: liberals, conservatives, and independents. And that is the need to eliminate the inflationary component of capital gains for tax purposes. We do that by indexing."—Dr. Murray Weidenbaum, President of the Center for the Study of American Business and former Chairman of the President's Council of Economic Advisors.

"Many so-called capital gains are overtaxed because they are most illusory. If an asset's dollar value grows only because of inflation, its owner gains no purchasing power and should pay no tax. Only real capital gains, gains in excess of inflation should be taxed."—Dr. Alan Blinder, Gordon S. Rentschler Memorial Professor of Economics at Princeton University.

"Indexing prevents the mistakes of the Federal Reserve from increasing the capital gains tax burden. You really need to index capital gains. You sure don't accomplish much by reducing the tax rate if inflation doubles the nominal capital gain."—Dr. Norman B. Ture, President of the Institute for Research on the Economics of Taxation and former Under Secretary of the Treasury for Economic Policy.

"It's only fair that we index capital gains and take away the inflation tax. It's plainly a winner all around."—Dr. James Miller, Chairman of Citizens for a Sound Economy and former Director of the Office and Management of Budget.

"If the price of the asset rises because of inflation, there is no real gain at all, and the [capital gains] tax is nothing but a confiscatrion device."—Dr. Paul Craig Roberts, William E. Simon Professor of Political Economy at the Center for Strategic and International Studies and former Assistant Secretary of the Treasury.

"Indexing is a critical feature of honest tax policy. It protects Americans from unlegislated tax increases resulting from inflation. This priniciple applies to capital gains which so often represents a purely inflationary phenomena."—Dr. Walter Williams, John M. Olin Distinguished Professor of Economics at George Mason University.

"Indexing is necessary to treat capital gains like ordinary income. If you don't index, then you're imposing an extra heavy tax burden on capital gains by forcing people to pay tax on illusory gains. Indexing also reduces uncertainty. Without indexing, the investor has to guess about inflation in order to calculate a real after-tax return on investment."—Dr. John Makin, Director of Fiscal Policy Studies at the American Enterprise Institute.

"Bills to index capital gains have been introduced in both the house and the Senate. All these efforts are commendable and would promote economic growth."—Dr. Richard Rahn, Vice President and Chief Economist, United States Chamber of Commerce.

"The major change that should be considered to the Tax Reform Act of 1986 would be to index all the business tax provisions. Indexing capital gains is only the first important step in that direction."—Dr. William Niskanen, Chairman of the Cato Institute and former Chairman of the President's Council of Economic Advisors.

"Indexation of capital gains is appropriate in that the taxation of nominal capital gains is harmful. However, the double taxation of real equity capital raises the importance of a capital gains differential."—Dr. Barry Rogstad, President of the American Business Conference.

EDITORIAL COMMENT ON INDEXING CAPITAL GAINS

Another worthy reform would be to index capital gains for inflation. Investors (including homeowners) shouldn't have to pay tax on the appreciated value of assets attributable to inflation, especially given the goal to encourage long-term investments. [The Christian Science Monitor, 2/15/89]

Inflation eats away at the worth of money you put into a long-term investment, so some of your ultimate profit is an illusion. Under present law, some of that illusion gets taxed. That's unfair. [Long Island Newsday, 2/12/89]

The nation's tax laws and the Internal Revenue Service persist in the fiction . . . that the dollar's value stays the same year after year. The result is that thrifty Americans are required to pay income taxes on fictitious paper profits. This is clearly unfair. . . . Quite sensibly, two bill currently

being considered by Congress to cut capital gains taxes include provisions for indexing profits to account for inflation. [The San Francisco Chronicle, 9/19/89]

Indexing capital gains to inflation would reduce the imposition of taxes on nonexistent gains and impose them on gains that are "real." . . . It deserves to be considered. [The Boston Globe, 2/5/89]

Capital gains are unfairly taxed in one respect. The increased value of long-held assets reflects some inflation and some real profit. Indexing capital gains is warranted, so inflationary increases are not taxed. [The New York Times, 9/15/89]

In the Treasury Department's tax-reform program of 1984, department experts noted that one justification for the lower capital-gains rate then in effect was to compensate for the tendency to overtax capital gains because of inflation. The Treasury plan proposed that capital gains be indexed for inflation and then taxed as ordinary income. Thus, the seller of the property would pay a higher tax rate, but only on its real value, not at a higher imaginary value created by inflation. Congress went through with only half the plan, however: The tax rate was raised but capital gains still are not indexed for inflation. [Los Angeles Times, 2/26/89]

Think for a moment what happens when inflation increases the price of a home. When you sell it, you pay a capital gains tax even though the value of the home (adjusted for inflation) hasn't increased a penny. Indeed, the government can tax you for capital gains when a property actually has lost value by appreciating less rapidly than the inflation rate. An indexed capital gains rate would put an end to this kind of bracket creep. [Washington Times, 3/7/89, Editorial Comment on Capital Gains]

A cut in the capital gains tax, whether through a lower rate or through indexing to inflation, is good economic sense, and more Democrats are realizing it. [Chicago Tribune, 8/2/89]

TAX PAIN BUT NO REAL GAIN

EXAMPLES OF WHAT HAPPENS UNDER CURRENT LAW WHEN AN INDIVIDUAL SELLS AN ASSET

Example No. 1: A family purchases a home (for investment purposes) in 1960 for $25,000 and sells it for $125,000 in 1989. Under the current tax code this would be considered a $100,000 gain and subject to a tax of $28,000. However, the house must sell for $100,000 just to keep up with the increase in prices between 1960 and 1989. The real inflation adjusted gain is $25,000 (not $100,000) and if capital gains were indexed the tax would be $7,000 (not $28,000).

Example No. 2: The McCoy's bought a small farm in 1950 for $50,000. The McCoy's sold their farm in 1989 for $300,000. They paid a tax of $70,000 on the $250,000 gain. However, inflation has eroded all but $5000 of their gain, and taxes have set them back another $70,000. If capital gains were indexed however, the tax on the gain of $55,000 would be $15,400 and the McCoy's would have a real gain after taxes of $39,600.

Example No. 3: "In 1960, Uncle Harry bought $1,000 of stock . . . If Harry sells the stock in 1989 for $9,000, his taxable income gain under current law is $8,000. Because Harry is in the 33% bracket, he pays $2,640 in capital gains taxes. But inflation has eaten up all but $2,026 of his profit. So after tax and inflation Harry loses $613. But if the law were changed so that capital gains were indexed for inflation, Harry would only pay tax on his real gain of $2,026. His tax bill would be just $668, and his real aftertax return $1,357." [Business Week, 2/20/89]

CAPITAL GAINS TAX WITHOUT INDEXING

A family farm bought in 1950 for $50,000 is sold in 1989 for $300,000. A capital gain tax is applied to the full amount of the gain—$250,000. At a 28% tax rate, that would be a tax of $70,000, leaving the family with $230,000. So they end up worse off than they were in 1950 because they would need $245,000 today just to have the value (the same purchasing power) of their original $50,000 investment.

CAPITAL GAINS TAX WITH INDEXING

A family farm bought in 1950 for $50,000 is sold in 1989 for $300,000. Because $245,000 of that amount is due to inflationary increases over the last 39 years, the real gain is only $55,000. A capital gains tax applied to the real gain would come to $15,400. This leaves the family better off by $39,600.

Mr. PACKWOOD. I yield 3 minutes to the Senator from Missouri.

The PRESIDING OFFICER. The Senator from Missouri is recognized for 3 minutes.

Mr. BOND. Mr. President, I thank my distinguished colleague, the Senator from Oregon.

I commend my good friend, the Senator from Colorado, for his eloquent statement. I, too, came over here to speak about the absolute unfairness of the current system of taxing phantom gains as regular income.

The proposal before us today has a very modest relief from this phantom tax by providing a 5-percent reduction for up to 7 years in the gain to compensate for inflation.

People of modest means in my State are very upset. They are outraged that they now have to pay a tax on gains they never realized.

The Senator from Colorado gave a good example.

Let me give you a simpler example. A $100 investment held for 2 years. Say over 2 years that inflation has now put a marketplace value of $110 on it. Under the current system the holder of that asset, if he or she turns around and sells it, would be taxed at an income tax rate perhaps as high as 33 percent on that $10 of gain. This reduction in the gain only reduces 10 percent of that $10. So they would still have to pay a tax on the $8 of phantom gain. But at least it is better than paying tax on the full $10.

In many instances this will not even compensate for the losses that the phantom gains of inflation taxes as income will generate.

I have had small farmers, husbands and wives, who want to retire and sell their farm who have told me if they sell it for twice what they paid for it they will be getting less in actual spending money, less in actual purchasing power than they put in.

And yet they have to pay taxes, higher in some instances than the tax, the marginal tax, that multimillionaires who buy junk bonds have to pay on their income. It is not fair.

Mr. President, I urge my colleagues, in the interest of fairness, to recognize that when inflation devalues our currency, it artificially inflates the value of property, and unless we do something to recognize that inflationary gain or element, we will be imposing an unfair tax.

I thank my colleague. I urge my colleagues to support the motion for cloture.

I yield the floor.

Mr. BENTSEN. Mr. President, I yield myself 10 minutes.

The PRESIDING OFFICER. The Senator is recognized for 10 minutes.

Mr. BENTSEN. Mr. President, this is an interesting proposal and I have listened to the debate with a great deal of interest.

I hear my distinguished friend from Colorado talking about illusory profits, and inflationary gain. Absolutely. I could not agree with him more on that. I am one of those who fought long and hard to lower the capital gains tax. I thought it was something we should do to have more mobility of capital.

But the problem you run into is that in 1986 the Reagan administration said that we ought to bring the top rate down. And we brought it down to the lowest top rate of any major nation in the world. We brought it down to 28 percent.

Can you imagine a person of wealth thinking 10 years ago that they would ever have a top rate of 28 percent in this country? Incredible. But that is what we have. And that is the kind of a deal we struck.

The argument was that if we would bring that top rate down—it had been 70, then 50 percent—we would pay for it by increasing the capital gains rate to 28 percent. The administration contended that if we did that, we would pick up $22 billion over 5 years. That is the plan we designed to pay for bringing the ordinary income tax rates down. That was our deal. But now we are talking going the other way.

Let's look at how they pay for their proposal. I admire the creativity of my friends. They have proposed a back-ended IRA. Under this proposal you could shift existing savings into a back-ended IRA. You could pay the tax on this transfer over 4 years. Four years—how convenient. That's just long enough to pay for capital gains over the budget period. Very creative.

But after 5 years, the bottom falls out. You are looking at instant gratification here. "Now-nowism," as Mr. Darman says.

When the Secretary of the Treasury testified before us we asked him about the back-loaded IRA's. He said, "It is simply passing it on to the next generation." That is where the cost is

going to be. It is time we—both Congress and the administration—quit doing that.

Let us try to truly get this deficit down. That is what we ought to be trying to do. The biggest problem we have today in this country is not our foreign competition, it is what we have to pay for money—interest rates on a loan or what you have to pay on an issue of bonds if you want to build a new factory. We're in competition with the Japanese and the West Germans. While we have a 10-percent prime, the Germans have an 8½-percent prime and the Japanese have a 4.8-percent prime. If you finance that factory, the cost of that borrowed money is in the cost of the product that you manufacture. Oh, we fuss about the mistakes of management in this country—short-term horizons instead of long-term horizons—and there is legitimacy in some of those charges. But we also have some of the most effective and some of the best management in the world today.

Then we ponder whether our workers have lost the work ethic. The vast majority of them sure have not. We have some of the best workers in the world. But anytime you have the cost of capital over twice what your principal competitor has and you put that into the cost of the product, no matter how smart the management, no matter how effective the laboring force, you are at enormous competitive disadvantage. Remember that this also makes it more difficult to bring about a trade balance in this country.

So what we ought to be trying to do is get savings up. Will this proposal increase savings? Now think about it. Think about the reaction of the average taxpayer on April 15. How is he going to react? He is going to do it this way: When he sits down to write out that check to the IRS and realizes he has an immediate deduction if he puts it in the Bentsen IRA account—the more conventional IRA account—he will take advantage of that deduction rather than send his money to the Treasury.

He is not going to say that 20 years from now. The tax rules that are in place now will be the same. Will an administration and a Congress in the future be able to resist the great temptation to reach in there and start taxing those things they said they were not going to tax? I'm not sure and the American public isn't sure either.

How much continuity has there been in the tax system? The tax laws have changed and changed and changed.

I do not believe that your average taxpayer is really going to put his money in a so-called back-ended IRA. He is not going to try and estimate what his income is going to be 20 years from now, what tax bracket he is going to be in, and what the future laws are going to be.

So I do not think it works. To the extent you have some investor who decides to take current IRA savings and move them over, you gain no net savings for our country. We have a savings rate in this country of around 5 percent. We are looking at the Japanese at around 16 percent; the Germans in between those two.

We have to increase savings. That means we have to broaden the base of the IRA and we have to increase the deduction for IRA contributions. Savings rates in this country ran in tandem with the Canadians until they expanded their equivalent of the IRA. And then the savings rate went up to 11 percent, and they have stayed up there while our savings rate dropped to the lowest level it has been in over 40 years. We are going in the wrong direction. Our savings rate dropped after we took away some of the incentives for the IRA. The IRA was a retirement account that should have never been retired.

The Bentsen IRA, we would expand the existing IRA. I am delighted to see the Senator from Delaware has expanded his proposal to take on some of the things we have talked about, like helping people save for that first home. That is becoming a tougher and tougher objective for the young people in our country. Saving to buy that first home and make that down payment is very difficult. However, under the plan I proposed they will be able to draw that money out to buy their first home without a tax penalty.

What is the other big problem in this country? The question of how to finance a college education for your children. That is an enormous problem with the costs escalating. So, once again, we expand the objectives, the incentives, for that IRA account. Under the Bentsen IRA you could take that money out to help send that child to college. Take that money out, without a penalty, for that purpose. And, of course, you could also take the money out for your own retirement.

That is what I proposed earlier. And that is something that will give us a continuous benefit over a long period of time. If we can get interest rates down and savings up this country will really prosper. If we can increase savings in this country by $20 a week, we will increase personal savings by 30 percent.

Next year, of course, we are going to do some things on tax policy. We will be working on that in the Finance Committee. But we will be talking about a comprehensive package and capital gains, of course will be among the things considered. We will also consider an IRA. But we will try to put together a package that will be revenue neutral over a long period of time.

Proponents for a capital gains rate differential contend that we need to encourage venture capital. When you reach down in your pocket and put some money in a venture capital deal, I don't believe you really care about whether you can save 5 or 10 percent in taxes in the future.

If you are figuring it that close, you better not go into a venture capital deal because they are high risk deals. The reason you go into a venture capital deal is because you think you are going to hit a home run. You think you are going to get an Apple computer. That is why you go into a venture capital deal.

Not better than 1 out of 10 really is a major success. The vast majority of venture capital deals go broke and do not make any money. If you have a lemon, it matures very quickly. You find out you have it. Maybe you have one or two that may make a little money, and, hopefully, one of them is a home run. That is why you go into a venture capital deal.

Where does most of that money come from today? It does not come from individuals. It used to, but not now. Much of it comes from pension funds that pay no taxes. The incentive means nothing insofar as their going into a venture capital deal.

That is why it is important that we have, I think, an overall comprehensive approach to try to encourage investment in this country, to try to encourage savings, and try to get the deficit down. If we really want to get interest rates down, the biggest savings of all is in Government expenditures—and that means cutting the deficit. That is what we will be working to bring about.

Mr. President, I think what we see here is a situation where we are passing the costs on to the next generation and not facing our responsibility. I hope my colleagues, once again, will decide that we should wait until some point in the future and have an overall comprehensive approach to the objectives of increasing savings in our country, getting our deficit down, and increasing investment.

Mr. President, I reserve the remainder of my time.

Mr. PACKWOOD. Mr. President, how much time do I have left?

The PRESIDING OFFICER. The Senator has 4 minutes and 44 seconds.

Mr. PACKWOOD. I will yield 2½ minutes to the Senator from Alabama.

The PRESIDING OFFICER. The Senator from Alabama.

Mr. HEFLIN. Mr. President, I rise today to offer my support for the efforts to restore capital gains differentials to the Tax Code. As some Senators know, I opposed the elimination of this rate in 1986 and I have long supported restoring the capital gains rate.

I support restoring the capital gains differential because I am convinced that a lower tax rate for capital gains will lower the cost of capital and stimulate investment. A lower tax rate for capital gains will encourage investors to realize any gains they have earned on their assets, which will result in greater revenues for the Federal Treasury. A lower capital gains rate will help increase the competitive position of the United States in world markets. The United States taxes capital gains at a higher rate than almost all countries in Europe and Asia.

Opponents of capital gains contend that it favors wealthy taxpayers and is not supported by the average middle-class taxpayer. This argument is simply not true. For example, in 1985, the year before the Tax Code was revised to eliminate this rate, the majority of taxpayers who took advantage of a capital gains rate were middle-class taxpayers. Anyone who owns a few acres of timber or a few shares of stock supports restoring the capital gains rate. It is their dream. The amount of tax savings to these taxpayers may look small to some, but to these taxpayers it is a relatively large amount which they eagerly anticipate.

Restoring the capital gains tax rate is especially important to my State in which a majority of the land is timber property. As you know, timber takes time to grow. Someone who invests in timber must plan to hold this asset for a long time in order to receive any gain. The longer an asset is held, however, the greater the likelihood that the value of the investment will be diminished by the effects of inflation. Restoring the capital gains differential is one way to minimize this inequity.

Finally, Mr. President, I would like to mention one aspect of this issue which has not received very much attention. That issue is how the elimination of a capital gains rate has affected many of our senior citizens.

In their earlier years, a good number of senior citizens invested in stock, timber, or some other type of capital asset. They did so in order to build an investment that might generate retirement income in the future. As time goes by, the value of this asset has appreciated. Now these senior citizens are at a stage where they have retired and are interested in receiving income from their investment. Naturally, they would like to receive as high a rate of income as possible. When these senior citizens made their original investments, they invested in assets whose value would grow and not in assets that would produce income. For example, many bought stock that pays very little in dividends. Or they invested in timber, which pays nothing at all until it is sold.

Now that they have retired, these senior citizens need to convert these assets into some other type of investment that will generate income. They might want to sell their stock or timber and invest in a bond that pays a high rate of interest, for example. Or they might want to purchase an annuity.

These taxpayers have planned ahead for their retirement, which is commendable. The only problem is that these plans counted on a capital gains rate being in effect when it was time to retire. Now these senior citizens have discovered that it does not pay for them to sell their assets. They have put pencil to paper and just cannot figure out how it will be to their advantage to realize the gain on their investment without a capital gains rate. These senior citizens are faced with the painful choice of selling their assets and realizing less income than they had counted on or leaving their assets to their children and getting by in their retirement years on even less. Mr. President, equity demands that we restore this rate.

I urge my fellow Senators to vote for restoring the capital gains rate to the Tax Code.

I yield the remainder of my time to the Senator from Oregon.

Mr. PACKWOOD. I yield the remainder of the time I have to the minority leader.

The PRESIDING OFFICER. The minority leader is recognized for 2 minutes and 25 seconds.

Mr. DOLE. Mr. President, I thank the distinguished Senator from Oregon. I think we have heard good arguments, particularly from those who support capital gains rate reduction. But I want to indicate, as I did yesterday, this is an important vote. I thank all my colleagues who yesterday voted to invoke cloture. Fifty-one out of one hundred is a majority, the last time I checked.

But, first, we have to get beyond cloture. This will be our last opportunity this year. We have agreed with the other side that if we had a couple of cloture votes to test the water, we would put it off until next year. It was my feeling this session could end, if not this week, certainly next week midweek.

So I simply implore my colleagues to take a look at the record and to understand that this is not a surprise to anybody in this Senate. As I said yesterday, the candidate for President, George Bush, advocated this throughout the campaign. The American people knew it was on the table. It was not any back door effort to undo the 1986 tax reform bill.

The President took his case to the American people. The majority of the American people support what he attempts to do. And, as I indicated yesterday, we spent a lot of time around here talking about the Japanese and how tough they are and we are not competitive and we blame the Government or we blame the industry or blame somebody. We never blame Congress.

One reason they are more competitive is the cost of capital is less. Their capital gains rates are much less. I would say, from the standpoint of trade and the standpoint of being more competitive, from the standpoint of cost of capital, the standpoint of business expansion, the standpoint of creating jobs, there are dozens of reasons to support what the distinguished Senator from Oregon and the Senator from Delaware propose.

I am a realist. I know probably we are not going to get cloture. But I would say I know there are others on the other side who would like to vote for cloture, and we would be willing to have 59 votes for cloture today; maybe not quite 60, but 59. I hope the majority leader will free some of his people, let his people go, take off the handcuffs, take off the chains, let them express their own views on this vote. Then, if it looks like he might lose, he could reassess his strategy.

For all the reasons I have stated, and more, I hope we may invoke cloture today and we just accept the amendment on a voice vote and go to conference. We would probably have the conference finished by next Tuesday or Wednesday and, in my view, it would be a step forward, something we should not have to wait for until next year.

The PRESIDING OFFICER. The time of the Senator from Oregon has expired.

Who seeks recognition?

Mr. BENTSEN. Mr. President, I yield myself 3 minutes.

The PRESIDING OFFICER. The Senator from Texas is recognized for 3 minutes.

Mr. BENTSEN. Mr. President, quite a bit has been made of procedural questions involved in this type of a vote. We have been taught by experts in that regard by some of my distinguished colleagues on the other side of the aisle. We have been trying on S. 2, campaign reform, for a long time around here, but we never have been able to get it to a question of a straight up or down.

Procedures have been used extensively to keep that from coming about. We have seen since 1987, 35 separate instances of where we have been denied a majority vote on procedural grounds. So we are no strangers to this process. With that, I now yield such time as the majority leader would use and utilize within the limits of the time allotted to me.

The PRESIDING OFFICER. The majority leader.

Mr. MITCHELL. Mr. President, 3 years ago, this Congress had a long and thorough debate about what kind of tax system this Nation should have.

On one side were those who believed that through the use of tax subsidies, the tax system should guide investment in our economy. On the other side were those who believe in free market principles, who believed that the private sector, not the Government through the tax system, will make the right decisions on where to invest.

Those who believed in the free market won the debate. As a result, maximum tax rates were reduced to only 28 percent for the highest income persons in America, by far, the lowest tax rate of any industrialized nation. The price that was paid for this tax rate cut was the removal or limitation of many special tax incentives that distorted the free market. That change in law has proven to be successful. Net national savings and investment are higher today than they were prior to tax reform. We found that the most efficient and productive utilization of resources is possible when the tax system and the Government do not distort private sector, free market decisionmaking.

Those who believe in the free market prevailed in 1986, but it is no surprise that those who did not prevail have not given up. Regardless of the facts, they continue to sing the siren song that our economy will collapse unless special tax benefits are provided for some in our society. They continue to maintain that Government knows better than the free market, where and how to invest and how long to hold on to an investment.

As everyone should know by now, just as sure as night follows day, if we adopt this amendment to cut capital gains taxes, the subsidy crowd will not stop there. They will continue to construct misleading studies, cite irrelevant statistics and selectively compare tax policies in other nations to justify the next tax break for the wealthy and then the next and then so on and so on until we are buried under an even higher mountain of debt.

I recently asked a Joint Tax Committee of Congress to take a look at just how important capital gains tax rates are to the very highest income earners in America.

Mr. President, I ask unanimous consent that the Joint Tax Committee information be printed in the CONGRESSIONAL RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

JOINT COMMITTEE ON TAXATION,
Washington, DC, November 14, 1989.

Hon. GEORGE J. MITCHELL,
U.S. Senate, Senate Russell Office Building, Washington, DC.

DEAR SENATOR MITCHELL: This is in response to your request dated October 25, 1989, for an estimate of the average tax benefit received by certain taxpayers under the capital gains proposal recently passed by the House, as well as under the President's plan. In particular, you asked that we provide you with the average benefit calculated for the taxpayers with the largest (net) long-term capital gains in 1990. For this purpose, we have defined the average benefit as the tax savings which would have resulted in capital gains had been taxed and ordinary income, assuming no change in taxpayer behavior.

Unfortunately, our data do permit this type of analysis with respect to the President's proposal as it was introduced. This is because the proposal was targeted to specific asset types, and we do not have this information available for all of the taxpayers in question. Consequently, our estimates assume the President's original proposal is extended to include all capital assets.

Below is our estimate, at 1990 income levels, of the average tax benefit received by the taxpayers with the 100 (alternatively, 1,000) largest amounts of net long-term capital gains:

AVERAGE BENEFIT

[1990 income levels, in millions of dollars]

Taxpayers with capital gains	House bill [1]	President's proposal [2]
Largest 100	3.0	5.0
Largest 1,000	1.0	2.0

[1] 30 percent exclusion for all capital assets.
[2] 45 percent exclusion with a 15-percent maximum tax rate. Assumed to cover all capital assets.

JOINT COMMITTEE ON TAXATION,
Washington, DC, November 14, 1989.

Hon. GEORGE J. MITCHELL,
U.S. Senate.

In providing you with these estimates, we have assumed that the average net capital gain of each group grows at approximately the same rate as aggregate (net) long-term capital gains.

We wish to emphasize the hazards of attempting to estimate the benefits accruing to such a small segment of the population. In particular, the largest 100 (or 1,000) capital gains in any one year can be expected to be extremely sensitive to economic conditions and, consequently, the average benefit is subject to wide variation.

We hope this information proves useful. If we can provide further assistance, please let me know.

Sincerely,

RONALD A. PEARLMAN.

JOINT COMMITTEE ON TAXATION,
LONGWORTH HOUSE OFFICE BUILDING,
Washington, DC, October 24, 1989.

Hon. GEORGE J. MITCHELL,
U.S. Senate,
Senate Russell Office Building,
Washington, DC.

DEAR SENATOR MITCHELL: This is in response to your request for an estimate of the average tax benefit received by the 1,000 taxpayers who had the largest (net) long-term capital gains in 1985. Please be advised, that, because of taxpayer confidentiality concerns, on specific details concerning the tax situation of the aforementioned group, or of particular transactions, can be released. We have examined the 1,000 largest net long-term gains reported on Form 1040 by individual taxpayers in 1985. For this purpose, we have defined the average benefit as the tax savings which would have resulted if capital gains had been taxed as ordinary income, assuming no change in taxpayer behavior.

We estimate this average benefit to be approximately $4 million. You should be aware that this was in a year (1985) in which the exclusion for long-term capital gains was 60 percent and the top marginal tax rate was 50 percent. Obviously, the results would change under a different regime of tax rates and exclusions.

We emphasize that we have only examined data from 1985 (1985 may not be representative of other years). We would expect that the selection of the 1,000 largest net long-term gains reported by taxpayers is sensitive to economic factors specific to 1985 and that the 1,000 largest gains in another year could be substantially different. For example, the difference between the largest net long-term gains reported by a taxpayer and the thousandth largest net long-term gains reported by a taxpayer was in excess of $190 million in 1985. In another year, the difference between the largest and the thousandth largest could be substantially different.

Sincerely,

RONALD A. PEARLMAN.

JOINT COMMITTEE ON TAXATION,
LONGWORTH HOUSE OFFICE BUILDING,
Washington, DC, October 24, 1989.

Hon. GEORGE J. MITCHELL,
U.S. Senate,
Senate Russell Office Building,
Washington, DC.

DEAR SENATOR MITCHELL: This is in response to your request for an estimate of the average tax benefit received by the one hundred taxpayers who had the largest (net) long-term capital gains in 1985. Please be advised, that, because of taxpayer confidentiality concerns, on specific details concerning the tax situation of the aforementioned group or of particular transactions, can be released. We have examined the 100 largest net long-term gains reported on Form 1040 by individual taxpayers in 1985. For this purpose, we have defined the average benefit as the tax savings which would have resulted if capital gains had been taxed as ordinary income, assuming no change in taxpayer behavior.

We estimate this average benefit to be approximately $13 million. You should be aware that this was in a year (1985) in which the exclusion for long-term capital gains was 60 percent and the top marginal tax rate was 50 percent. Obviously, the results would change under a different regime of tax rates and exclusions.

We emphasize that we have only examined data from 1985. 1985 may not be representative of other years. We would expect that the selection of the 100 largest net long-term gains reported by taxpayers is sensitive to economic factors specific to 1985 and that the 100 largest gains in another year could be substantially different. For example, the difference between the largest net long-term gains reported by a taxpayer and the hundredth largest net long-term gains reported by a taxpayer was in excess of $150 million in 1985. In another year, the difference between the largest and the hundredth largest could be substantially different.

Sincerely,

RONALD A. PEARLMAN.

Mr. MITCHELL. Mr. President, the Joint Tax Committee reviewed actual tax returns for 1985 and discovered that the 100 taxpayers with the most capital gains income in that year each

received an average tax break of $13 million—$13 million per person. That is the difference between the capital gains taxes they paid and what they would have paid if capital gains were taxed the same as ordinary income. That means that these 100 taxpayers received $1.3 billion in tax breaks. The Joint Tax Committee also reviewed the top 1,000 tax returns for 1985 and found that the average tax benefit under prior law to these taxpayers was about $4 million each. Each taxpayer, a $4 million tax break. That works out to a total of $4 billion in tax breaks provided to the top 1,000. That was in 1985 under the old tax system.

Under the legislation that is before the Senate today—the House approved capital gains tax cut—the 100 taxpayers with the most capital gains would each receive on average $3 million. The top 1,000 taxpayers would each receive an average tax cut of $1 million. Under the President's proposal, applying the capital gains tax cut to all capital assets, the top 100 would each receive an average tax cut of $5 million. That is $5 million each: The top 1,000 taxpayers would each receive a $2 million tax cut. That is $2 million each. In other words, there are 1,000 people in America, each of whom would receive an average tax break of $2 million if President Bush had his way. The President is proposing to lavish $2 billion in tax breaks on the 1,000 wealthiest Americans. That is just plain unfair. If there were any credible evidence that a capital gains tax cut would increase savings and investment, it might be worth it, unfair as it is. But the entire debate so far has been based on the unproven speculation that if the wealthiest of Americans pay less in taxes, the rest of Americans will be better off. That is the theory behind this proposal. If we can just cut taxes for the very wealthiest of Americans, somehow all the rest of Americans will be better off.

There is no evidence to support this theory. Instead, it will be a fantastic windfall, a huge tax break to the very wealthiest Americans that, as night follows day, the middle class will end up paying for, either through higher budget deficits or increased taxes just like the middle class always ends up paying the bill.

Given our circumstances when so many in our Nation are without decent housing, when so many young Americans cannot afford an education, when so many Americans lack health insurance, it is a travesty that the Senate should now even be considering a huge tax cut for the very wealthy with no evidence that it will assist the economy or help other Americans. Given our budget deficits, so large, so threatening which can so adversely affect our Nation, it is wrong, just wrong for the President to place a higher priority on cutting capital gains taxes than on reducing the Federal budget deficit.

In closing, I want to repeat what I said yesterday on this floor on this subject. We are struggling to reduce the deficit. This proposal will increase the deficit. It has been suggested by proponents of this amendment that this vote on cloture is a test of sentiment on capital gains. I suggest that the true test of this vote on cloture is a test of sentiment on Federal budget deficit. A vote for cloture is a vote for fiscal irresponsibility.

A Senator who votes for cloture cannot thereafter credibly claim concern over the budget deficit. A Senator who votes for cloture cannot with a straight face claim to be for reducing the Federal budget deficit since that Senator will just have voted for a huge increase in the Federal budget deficit.

A vote against cloture is a vote for fairness. A vote against cloture is a vote for fiscal responsibility. A vote against cloture is the right vote for the Senate and for the Nation.

Mr. BENTSEN addressed the Chair.

The PRESIDING OFFICER. The Senator from Texas.

Mr. BENTSEN. Let's put those numbers used by the majority leader in a somewhat different perspective. When you talk about the tax break to the 1,000 highest income earners in this country you're really talking about a tax break that is more than all the personal income taxes paid by the people of Vermont, more than all the personal income taxes paid by the people of South Dakota, more than all the personal income taxes paid by the people of Wyoming, more than all the personal income taxes paid by the people of Montana. That is how much money we are talking about. That is money that is needed to try to narrow this Federal deficit, to get that budget deficit down, to try to get savings for the Government that will bring interest rates down in our country to make it more competitive and in turn bring that trade deficit down.

Mr. PELL. Mr. President, I intend again today, as I did yesterday, to express my support in the Senate for limiting debate, or imposing cloture, on the capital gains reduction amendment pending in the Senate.

I want to make it very clear, however, that my support for limiting debate on this issue does not indicate that I would vote for the capital gains amendment if cloture were imposed and a vote were held on the amendment. My support for cloture is in accord with my practice during my 29 years in the Senate of never having voted in support of a filibuster. During those years I have often voted to limit debate and then voted against passage of the bill that was the subject of a delaying filibuster. I have always believed that the Senate should be permitted to work its will on legislation before it, and that is why I have never supported a filibuster.

If cloture is invoked on this capital gains reduction amendment, it will be my intention to vote against approval of the amendment. I make this statement because some members of the press, apparently unaware of my voting record on cloture have interpreted my support for cloture yesterday as being an indication of support for the capital gains amendment.

Mr. DASCHLE. Mr. President, for several months now the Congress and the White House have been engaged in a prolonged, indeed torturous capital gains cut debate. Progress in reducing the deficit, and on any number of other important issues, has been slowed while the White House remains fixated on a capital gains reward for its friends.

What is going on here? I suggest that a good metaphor may be the ritual of sumo wrestling. In this great sport of Japan, a strict code of ritual conduct is followed. Indeed, as much attention is given to the etiquette of ritual preparation as there is to the great moment when the two wrestlers lunge at each other. So it is now with the Congress and the White House.

Like two gigantic sumo wrestlers, the White House and the Congress have been engaged in ritual posturing before we lunge at the real question that hovers over all we do—how to reduce the budget deficit which has hampered our economic growth for the past 7 or 8 years.

The problem is that, in the current battle, the White House has been postponing the real fiscal fight with a capital gains measure that has little to do with reducing the deficit or promoting economic growth. They keep sending signals that next year's budget negotiations will be even tougher, while at the same time proposing a measure that could keep us in the red for years to come.

I find it fascinating how Congress was lured into this ritual. The first act of the ritual took place last April when the Congress and the White House made the ritual bow to each other in agreeing to the fiscal year 1990 budget. With a nod and a wink, the White House agreed to help craft a serious plan to address the budget deficit next year, in exchange for Congress' promise to allow the President to keep his 1988 campaign pledge of "no new taxes" this year. All that was needed to hold the compact together was $5.3 billion in new revenue.

The White House posturing was evident even back then. Richard Darman, the Director of OMB, asserted with respect to the budget agreement that, "With the first batter up * * * we hit a double." Many congressional Democrats had their doubts, which were aptly expressed in the words of Col-

umnist George Will, who said, "A more precise analogy might be that you're trying to steal first base."

What happened after the budget agreement was an extraordinary evolution of the President's capital gains proposal. The Treasury produced new studies on the effects of a capital gains tax cut, and, lo and behold, found that their previous study had been wrong. A capital gains rate cut would raise revenue indefinitely, they said, rather than lose revenue over an extended period of time.

The capital gains rate cut became more than just an economic tool, in the eyes of the administration. In fact, it evolved into a revenue raiser of such proportions that it would answer the question of how to raise the $5.3 billion needed under the budget agreement. In short, the President's capital gains proposal became another version of David Stockman's magic asterisk; a quick injection of needed revenue to tide us over until another creative way could be found to postpone any real effort to restore fiscal integrity to the budget.

What is now clear is that the White House has little regard for the real economic consequences of a capital gains tax cut. Whether the proposed tax cut loses revenue or stimulates economic growth has all but been forgotten in the effort to gain a political advantage.

This is all the more evident in the current proposal to link a capital gains cut to the so-called IRA-plus, which could easily be described as the stepchild of Reagan's voodoo economics. The IRA-plus allows those who can afford it to pay a few dollars of tax today, in order to avoid 10 or 12 times that amount of tax at a future time. This is a good deal for the wealthy and a bad deal for the rest of the country. Worse still, there is no evidence that the IRA-plus would promote increased savings.

We have all heard references to Richard Darman's now-nowism. It is hard not to call attention to this term which he says is a "shorthand label for our collective shortsightedness, our obsession with the here and now."

When Mr. Darman spoke about now-nowism, he spoke forcefully on behalf of future generations. But Mr. Darman cannot speak on behalf of any future generation and in the very same breath advocate a policy which is the very essence of now-nowism.

The capital gains proposal and the IRA-plus are perfect examples of measures that allow the current generation to continue slipping by to the extreme detriment of future generations.

Like many of my colleagues on this side of the aisle, I am willing to listen to sound proposals to stimulate economic growth. I believe that a properly formulated capital gains tax cut may be a positive economic tool, and I am a cosponsor of one such proposal. But I am unwilling to support a proposal that lacks basic fiscal integrity. A proposal that will create a loophole big enough for wealthy taxpayers to drive a truck through, if they get the chance.

I do not know how long this ritual must go on before we lunge at the real foe, the budget deficit. Hopefully we can end the posturing today and get on with the deficit reduction job at hand. It will be none to soon.

Mr. EXON. Mr. President, I rise to oppose ending debate on the Packwood-Roth amendment to H.R. 3628. To cut off debate and ram this amendment through the Senate would be an exercise of fiscal irresponsibility, smoke-and-mirrors budgeting, and a knowing increase in the long-term Federal budget deficit for short-term political gain.

These problems have been clearly laid out in the record by Senator LLOYD BENTSEN and other of my colleagues and I will not repeat all the statistics. But to paraphrase an old Midwestern saying, this amendment tries to make a silk purse out of a sow's ear.

This vote is about honesty. This vote is about the budget deficit.

This vote is about whether the President gets a short-term political victory at the long-term expense of sound economic decisionmaking.

We have before us a take it or leave it vote on a package that is fatally flawed. The IRA's in the Packwood-Roth amendment are not IRA's as the American people know them. This IRA proposal is a carefully doctored attempt to play the smoke-and-mirrors numbers game and make this amendment look, superficially, as though it will not increase the Federal budget deficit. But nothing could be further from the truth.

In all fairness, I think the basic form of the capital gains portion of this amendment is better compared to the House version. But I cannot accept what is before us today on a take-it-or-leave-it basis. This should be debated in the context of the Federal budget process. This should be debated under conditions where other amendments are allowed.

Unfortunately, those are not the conditions under which this is being considered today.

The Packwood-Roth amendment is a clasic example of what the President's Office of Management and Budget Director Richard Darman recently called now-nowism, that is, placing short-term gratification ahead of the long-term good. I oppose now-nowism and am disappointed the administration has resorted to this tactic here.

I support a fiscally responsible capital gains proposal directed at encouraging long term investments. I support expanding eligibility for IRA's. I voted against the 1986 Tax Reform Act that repealed the capital gains differential and put restrictions on IRA's. I am an original cosponsor of legislation to restore IRA deductions that were lost in the 1986 act. My record on these topics is clear.

Mr. President, it has become obvious that in the current political atmosphere neither Congress nor the President is capable of devising legislation on these issues that is honest and fiscally responsible. Accordingly, I oppose the cloture motion and hope for a better day on which we may take these subjects up again.

Mr. KERRY. Mr. President, the proposal before us today is not just a plan to reduce the capital gains rate; it is an irresponsible proposal to increase the deficit and hide that fact with a back loaded individual retirement account program that will lead to a drain on the Federal Treasury in the decades to come.

This is the final vote on the capital gains issue this year. I sincerely hope that the Senate does not have to consider similar proposals in the second session of this Congress. The capital gains debate has unfortunately meant that we have not seriously addressed many economic issues of great importance—the Federal budget deficit, our international competitiveness, policies that would stimulate investment and productivity, investments in education and infrastructure.

As I have said before, instead of honestly taking on the real issues, we are addressing last year's campaign issues. I hope that in 1990, the 1988 campaign will be behind us.

I have long been a supporter of a capital gains rate differential—and I will continue to support such a differential. The differential that I support is targeted to sectors in the economy where investment capital is hard to come by, not to sectors where capital is easily available.

Last summer, I introduced the Small and High-Risk Business Investment Act of 1989 which will encourage the venture and high-risk investment necessary to the startup and growth of U.S. small businesses and, thus, the future economic competitiveness of the U.S. economy.

This bill will lower the rate on capital gains from investments in small business, that is, investments involving a direct purchase, and minimum 5-year holding, of equity in a business worth $100 million or less. After a 10-year holding period, that rate falls to 10 percent.

The bill lowers the rate for gains on investments in high-risk ventures—investments which involve a direct purchase, and minimum 5-year holding period, of equity in a business worth $10 million or less. The capital gains

rate for this type of investment will start at 10 percent after a 5-year holding period and decrease to 5 percent after 10 years.

Senator BUMPERS' Venture Capital Gains Act of 1989 also lowers rates on gains on direct equity investments in businesses of qualified size. The Bumpers bill would set a maximum capital gains rate of 21 percent on investments in businesses worth $100 million or less and held for a minimum of 4 years.

Narrowly targeted capital gains rate reductions such as these would stimulate the kind of venture and high-risk investment necessary to the startup and growth of U.S. small businesses and, thus, the future economic competitiveness of the U.S. economy.

My proposal rewards risky investments in small, growing firms. The riskier an investment; the lower the rate and, thus, the larger the incentive. It's a simple concept, yet one vitally important in today's economic climate.

These rate reductions for gains on investments in small and risky firms, and further rate reduction for longer holding periods, are designed to encourage productive investment and long-term investment decisions. These are two crucial elements of a thoughtful capital gains rate reduction. The proposals before us this fall have not reflected these concepts.

Yesterday in his remarks before the vote on the motion to invoke cloture, my colleague from Maine, Senator MITCHELL, stated that he also supported a capital gains rate differential targeted to new and small business. I look forward to working together to craft such a package in the next session.

One of our goals next year must be to increase savings and increase investment. It is hard to see the direct impact of low savings rates but our standard of living has been, and will continue to be, lower than it would otherwise be. We must increase personal savings; we must reduce the Federal budget deficit; we should encourage corporations to invest in the future.

The Federal budget deficit absorbs capital; we must enter into serious negotiations with the administration to reduce the deficit. The Federal deficit means higher interest rates, which in turn mean businesses put off making investments. Fiscal constraints cut back public investment in housing, research, factories, roads, education, and technology. Less investment, both public and private, mean an even slower growth in our standard of living in the 1990's and in the next century.

It is not the time to enact legislation that will irresponsibly increase the deficit, either now or in the future. Couching the arguments for the Packwood-Roth bill in the context of economic growth is disturbing. We are all deeply concerned about economic growth, especially those of us from regions that are experiencing sluggish growth, and worse. But the proposal before us will only worsen the deficit, and worsen our long-term competitive position.

Before I close, I would like to specifically address the Roth IRA-plus proposal. I am a strong supporter of the restored deductibility of individual retirement accounts for all taxpayers. I fought for continued full deductibility during the 1986 debate on tax reform. I am an orginal cosponsor of Senator BENTSEN's proposal for restored deductibility for all taxpayers and expanded withdrawals.

Senator BENTSEN's individual retirement account approach would result in increased savings and investment in our economy. It would make it easier for taxpayers to save for housing and education. Senator BENTSEN's proposal is important and makes good economic sense.

On the other hand, Senator ROTH's proposal would not increase savings. It shifts revenues from the future to the present. Its economic impact would be negligible, in fact, in the long term, its economic impact would be negative.

Many taxpayers would undoubtedly benefit from the Packwood-Roth IRA-plus proposal. Taxpayers would be able to convert their existing IRAs to IRA-plus accounts. They would be able to withdraw savings and earnings for downpayments, health care costs, and downpayments of first homes.

Income taxes on the accumulated earnings would be paid over the next 4 years, and income taxes on subsequent earnings would be eliminated. This amounts to a sale on taxes. The country cannot afford it. Our children would have to make up the tax losses when we withdrew our earnings during our retirement. For too long, we have shifted our fiscal problems to our children. It is time to stop doing so.

Worse, it is not obvious that this intergenerational shifting of tax burden is the consequence of the proposal. We see yet another case of budget gimmicks. In a year where we have shifted costs of the largest Federal bailout of an industry in history off budget, budget gimmicks should not surprise. It is my sincere hope that next year, we see no more gimmicks.

Mr. BIDEN. Mr. President, America needs a comprehensive capital investment strategy that is carefully targeted to benefit only those long-term investors whose entrepreneurship improves our economic productivity and competitiveness. When both American lawmakers and American families are struggling with mounting debts and shriking savings, to even consider such an unfocused approach as a capital gains cut is ill-advised at this time. In the current economic climate, I cannot support this sweeping proposal—a blanket reduction to the most economically advantaged among us which throws money at the problem in the hopes that some will trickle into savings accounts and long-term investments.

The experience of the last 8 years undermines the basic arguments of the proponents of this capital gains tax cut. They insist that by allowing income earned on investments and assets, capital gains, to escape full taxation we will be putting more money into the hands of those more likely to reinvest the benefits. They advocate taxing income earned "passively" through ownership of assets—property, stocks and the like—at a lower rate than income earned "actively" through wages—from paychecks. They assure us that, although only a tiny percentage of Americans will receive the lion's share of this tax relief, the imbalance is worthwhile because this group is more likely to save and invest than the rest of America.

We all recognize the urgent need to increase our savings and investment levels. But the logic underpinning this capital gains tax cut is the very same logic that was behind the supply-side tax cut which has produced the distressing economic circumstances we now face. The timing could not be worse.

The 8-year economic experience of supply-side tax cuts has failed to spur savings and investment. Chronic trade deficits have made Americans the largest debtors in the world. We now owe over $3 trillion—$12,000 for every American. Personal savings are now only 73 percent of what they were in 1980. Growth in capital investment has been 20 percent slower in the 1980's than in the 1970's.

Thanks to supply-side tax policies of the 1980's, real income increased, but the inequality of income distribution also increased. The top 5 percent of American earners saw their incomes raise by 26 percent. And what did this tax windfall for the wealthy bring to the economy as a whole? We now know that for every dollar returned to those top earners $1.08 was consumed, not invested. Borrowing increased and savings declined.

This capital gains proposal would now provide another $25,000 benefit to those earning over $200,000 per year; 80 percent of the tax cut benefits will go to less than 2 percent of Americans. How much more will middle America be asked to sacrifice to finance this failed investment incentive strategy? By comparison an average family of four will receive a tax benefit of only $30 per year. And this national sacrifice, which will cost the Treasury more than $10 billion over the next 5 years, will come at a time when Federal deficits are still running over $100 billion per year.

After 8 years of chronic debt, deficits and disinvestment in our future, a change in economic policies is indeed overdue. But this capital gains proposal offers only more of the same tired supply-side remedies which have failed to increase our competitiveness or expand opportunity. In short, this proposal would provide yet another windfall for the same top income-earners who have benefited most from Reaganomics, while perpetrating another raid on the national Treasury. This at a time when Federal deficits already threaten to overwhelm our efforts to combat drug violence, to redress the national disgrace of homelessness, to revitalize our increasingly irrelevant education system, and more.

In the context of previous tax revisions, I question the wisdom of this proposal. Looking at the disequity in the distribution of the benefis, I challenge the justice of this proposal. Recognizing the loss of revenues which will result when our deficits already soar out of control, I am astonished at the timing of this proposal. And in the light of the debt and deficit legacy of the supply-side policies of the last 8 years, I doubt the logic of this proposal.

Mr. BENTSEN. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER (Mr. ROBB). The Senator has 4 minutes 56 seconds.

Mr. BENTSEN. Has all time expired on the other side?

The PRESIDING OFFICER. The Senator is correct.

Mr. BENTSEN. Mr. President, unless there are further requests on this side for time, I yield back the remainder of my time.

QUORUM CALL

The PRESIDING OFFICER. By unanimous consent, the quorum call has been waived.

VOTE

The PRESIDING OFFICER. The question is, is it the sense of the Senate that debate on the substitute amendment to H.R. 3628 relative to capital gains shall be brought to a close? The yeas and nays are required. The clerk will call the roll.

The legislative clerk called the roll.

Mr. PELL. Mr. President, on this vote I have a pair with the distinguished Senator from Hawaii [Mr. MATSUNAGA]. If he were present and voting, he would vote "nay." Therefore, I withhold my vote.

Mr. CRANSTON. I announce that Mr. MATSUNAGA, is absent because of illness.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 51, nays 47, as follows:

[Rollcall Vote No. 298 Leg.]

YEAS—51

Armstrong	Gramm	McClure
Bond	Grassley	McConnell
Boren	Hatch	Murkowski
Boschwitz	Hatfield	Nickles
Burns	Heflin	Packwood
Chafee	Heinz	Pressler
Coats	Helms	Roth
Cochran	Humphrey	Rudman

Dixon	Leahy	Wirth
Dodd	Levin	

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—1

Pell, for

NOT VOTING—1

Matsunaga

The ACTING PRESIDENT pro tempore. On this particular vote the yeas are 51, and the nays are 47. Three-fifths of the Senators, duly chosen and sworn, not having voted in the affirmative, the motion is not agreed to.

Mr. MITCHELL. Mr. President, I move to reconsider the vote.

Mr. DIXON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The ACTING PRESIDENT pro tempore. Under the previous order the bill is placed on the calendar.

DEPARTMENT OF DEFENSE AUTHORIZATION ACT—FISCAL YEAR 1990—CONFERENCE REPORT

The Senate continued with the consideration of the conference report.

Mr. MITCHELL. I understand the managers are ready to resume consideration of the Defense authorization bill. I am advised by the managers that they anticipate completion around 4 p.m. If a vote is requested, there will then be a vote on this at about that time, so the Senators should prepare their schedules accordingly.

I yield the floor to the managers.

Mr. NUNN addressed the Chair.

The ACTING PRESIDENT pro tempore. The Senate will be in order. Senators having conversations are requested to take them to the cloakroom.

The Senator from Georgia is recognized.

Mr. NUNN. Can the Chair review the time that is remaining on this bill?

The ACTING PRESIDENT pro tempore. The Senator from Georgia controls 30 minutes. The Senator from Virginia controls 35 minutes.

Mr. NUNN. That is all the time remaining?

The ACTING PRESIDENT pro tempore. The Senator is correct.

Mr. NUNN. Mr. President, it is our hope that we can cut this time in about half. It depends on how many people want to speak on this bill. I also have a request from others to speak on the time remaining on this bill on other subjects. I cannot honor those requests, unless there are no Senators here to talk about the Defense bill, which we have to reserve this time for as a priority.

I urge all Senators on both sides to please come over, if they have something to say on this bill.

Mr. DIXON. Mr. President, I only require about 3 minutes. My statement will be very brief, if I can do it now.

Mr. NUNN. Mr. President, I yield 3 minutes to the Senator from Illinois. I thank him for this great work on the committee and his leadership as chairman of a very important subcommittee.

The ACTING PRESIDENT pro tempore. The Senator from Illinois is recognized for 3 minutes.

Mr. DIXON. Mr. President, I am pleased to support the 1990-91 Defense Authorization Conference Report. This is good legislation that has emerged from a very long and hard fought conference between the two Houses. Given the fiscal constraints we faced, I think the chairman, the senior Senator from Georgia, has worked out a good bill.

Mr. President, during the conference I worked very hard to retain the Senate's position on the Federal prison industries. Because of strong objections by the House, however, we receded to the House and removed that provision from the bill. Mr. President, I have a separate statement on this issue and request unanimous consent that it appear at the end of my statement.

Mr. President, there were two other issues which were taken up in conference that were of special interest to me: First was the issue of postsecondary off-duty base education services; second was a cargo preference provision inserted in the House defense bill which discriminated against the Great Lakes region and added a tremendous paperwork provision on small- and medium-size companies working on defense contracts.

POSTSECONDARY EDUCATION

Mr. President, I want to commend the chairman of the Armed Services Committee, the chairman of the Subcommittee on Manpower and Personnel, and the ranking minority member, the gentleman from Virginia, for working so tirelessly during the conference to preserve the benefits of choice and competition in the offering of postsecondary education opportunities for military personnel, their dependents and civilian employees of the Department of Defense. For more than 20 years, military personnel overseas have benefited from competition in the offering of these courses. The ability to choose among offerors gives students more flexible scheduling, intangible benefits that accrue from active competition among offerors, and as the GAO found in its 1987 report entitled "DOD Voluntary Education: Determining and Meeting Postsecondary Education Needs in Europe," demonstratable tuition savings as well.

Therefore, I am grateful for the chairman's diligence in defending the overseas off-duty base education system from efforts to totally eliminate competition and choice in the offering of these services. Section 518 of the fiscal year 1990 Defense Authorization Act is intended to, and I am confident will, ensure that competition in the offering of these services remains the rule rather than the exception in the European theater, and will once again become the rule elsewhere. As you know, Mr. President, section 518 has been adopted in response to the Army's recent effort to procure off-duty postsecondary educational services for military personnel stationed in Europe on a basis that would assign each level, category, or group of courses to a single institution. Several years ago, a similar procurement effort led to earlier remedial legislation, section 1212 of the fiscal year 1986 Defense Authorization Act. Many of us share the view of the Nation's more than 1,100 community colleges represented by the American Association of Community and Junior Colleges that the Army procurement violated the principles of competition and choice of offeror that we enunciated in enacting section 1212. I commend the chairman and the gentleman from Virginia for their firm support for clarification of the principles of choice of offeror which we have clarified with the enactment of section 518.

This section directs that the Secretary conduct a study of the postsecondary educational service needs of military personnel, their dependents, and civilian DOD personnel overseas. Based upon the results of this study, the Secretary is to report to the Armed Services Committees of both Houses of Congress by March 1, 1990 on the policies he intends to promulgate relative to the procurement and administration of these services, consistent with the intent of section 1212 that service members have the benefits of choice of provider in the offering of courses. This issue has now been the subject of legislation in both the fiscal year 1986 and fiscal year 1990 acts. I believe that in the conduct of the required study it is incumbent upon the Secretary to involve representatives of the national higher education associations that represent public and private 2- and 4-year colleges and accrediting organizations so as to ensure that all those interested in providing the most effective educational services to our military personnel are a part of this process.

I believe there has been a reluctance on the part of the armed services to involve the various interested constituencies in the development of appropriate models for the delivery of these important educational services. I certainly hope that the study required by section 518 will develop, for the Secretary and for the Congress, the information we need to resolve once and for all how these educational services should be delivered to give service members the benefits that result from competition and choice of offeror.

In the past, it has been argued that choice is provided by competition in the selection of one offeror for a given group, level, or category of courses. The conference, with section 518, has indicated that in the "choice in the offering" of postsecondary education courses, the guiding principle should be that more than one school should be permitted to offer the same category, level or group of courses, and in so doing directly compete for students on the basis of cost, scheduling, instructors, and other factors that best meet the needs of the student.

As used in section 518, "choice in the offering" of services means that the Department should not as a general rule award sole provider contracts for a given level, group or category of courses. Military personnel served by this program should have the ability to choose among qualified schools to the extent that more than one school wishes to offer such services. But let me emphasize that neither section 1212 nor section 518 require DOD to go out and find schools to compete, nor should any institution that is not fully qualified to provide quality instruction be authorized under this program. In the past, there have usually been more than one qualified offeror for the major levels of courses, and I expect that this pattern will continue. However, I do not contemplate the intent of section 518 being vitiated by generalizations that choice in the offering of these services is not feasible. To the extent the general rule affording the users of these services a choice of offerors is to be limited, I trust the Secretary will carefully and narrowly define the circumstances where such limitations will apply. Section 518 makes it obvious that the manner through which the Army determined that affording service members the benefits of choice of offerors would be impracticable for the entirety of the European theater is not consistent with the standard I have enunciated.

Mr. President, section 518 suspends the current Army procurement and bars the award of any new contracts for overseas off-duty education services contracts, except under the preexisting memorandum of understanding procedures that provided for choice of offeror, for a period of 60 days after receipt of the report by the committee. I hope the committee will promptly hold a hearing on the report to give all interested parties the opportunity to comment on its findings and the policies that the Secretary has proposed to adopt to insure compliance with section 1212 in the procurement of these services.

Mr. President, I know that neither the members of this committee nor the Secretary of Defense want to see this kind of activity managed by legislation. Therefore, I hope that after the hearing and consultation with the committees, the Army's procurement—and indeed all procurements for overseas off-duty postsecondary education—will be modified to incorporate the new policies to be promulgated by the Secretary after consultation with the committee.

It is also my hope that to avoid problems of this nature in the future, the Secretary will name a panel of experts drawn from the higher education associations representing 2- and 4-year public and private institutions and the accrediting community to advise him on subsequent procurement policy, and to alert him to situations where a proposed procurement might diminish the opportunity for competition and choice, or favor one school or type of school to the detriment of students and other providers. The absence of this kind of ongoing involvement has contributed to the misunderstandings and distrust that have characterized the procurement process for several years. I am sure the Secretary shares my desire that all the parties—and most certainly the educational institutions that provide these important services—become a part of the policymaking process. Procuring educational services is not quite like the purchase of military hardware. We are talking about an area where the leading experts are in our colleges and universities as well, as among our armed services. I trust that the Secretary will reach out to this source of expertise in the future, so that the leaders of our Nation's colleges and universities will

be entirely comfortable with the procurement process.

Mr. President, I am also concerned that the legitimate questions raised about the pending Army procurement may affect how some institutions that are presently providing these educational services are treated. It is the conference committee's intent that all educational institutions providing postsecondary education services overseas be afforded equitable treatment in the assignment of course and program responsibilities within each command where such services are being offered. I urge the Secretary to promptly issue a directive to ensure equitable treatment for all educational institutions in the European theater.

Mr. President, the intent of section 1212 was to continue the practice of giving military students a choice among schools. I believe that new section 518 makes it manifestly clear that blanket elimination of choice in the offering of courses was not intended by the Congress.

HOUSE CARGO PREFERENCE PROVISION

Mr. President, section 1219 of the House Defense authorization bill, "Transportation of Components of DOD Contractor Supplied Items," would have given statutory authority to an interim DOD regulation that such supplies, including components, must be shipped under cargo preference provisions, and would have applied this requirement to all tiers of subcontractors.

I am happy to say that having found this provision slipped into the bill, I was able to bring to light the broad scope of consequences that would have resulted from its passage and to see that it was dropped in conference.

This provision, were it allowed to remain in the bill, would have imposed unnecessary and overly burdensome requirements on the many small businesses that serve as contractors, subcontractors, and suppliers on DOD procurement.

Until recently, the Military Transport Act of 1904 was interpreted by DOD to apply only to the shipment of items for which title had already passed to the Department.

The Department of Justice issued an opinion that the act covered items which are "clearly identified as destined for eventual military use at the time of shipment by sea." The Department stated, however, that there was no requirement to bring this coverage down to the level of every nut, bolt or scrap of raw material. Despite this admonition, DOD issued regulations requiring such a flowdown.

Many lower tier subcontractors purchase materials overseas, that, at the time of purchase or shipment, are not clearly destined to be incorporated in an item that is ultimately purchased by DOD. However, the seemingly small change created by section 1219 would require DOD prime contractors to certify that all of the components in every item sold to DOD has been shipped by U.S. flag vessels.

Because failure to certify or false certification can lead to criminal penalties, prime contractors will be forced to obtain similar certifications from all of their subcontractors. As a result, a small business would be forced to obtain, prepare, and maintain reams of documents merely because its materials may later be incorporated in a DOD purchase.

The enormous paperwork burden created by such requirements could force many companies to direct that overseas purchases be shipped via air.

The alternative for the small business is to decide, up front, that it will designate that its goods not be incorporated in a DOD purchase. Forcing small businesses to make such a decision would have led to reduced competition and increased costs.

Given this enormous paperwork burden, I am concerned that DOD did not give proper consideration to the requirements of the Paperwork Reduction Act of 1980. By DOD's own summary of the cargo preference rule, contractors and subcontractors at all levels will be required to submit overly extensive information to the Government, directly contradicting the goals of the Paperwork Reduction Act.

For example, if a fourth tier subcontractor needed to purchase a component from Great Britain, and no timely United States flag service were available, the company would be required to obtain a waiver of the cargo preference requirement from the prime contractor. It is clear that a prime contractor has no reason to concern itself with the transportation problems of even a second tier subcontractor, let alone the fourth tier.

It will interest my colleagues to know that I received a letter this week from the Assistant Secretary of Defense for Production and Logistics, acknowledging that the interim rule does, indeed, contain information collection requirements, and that the Department has prepared a Paperwork Reduction Act analysis and sent it to OMB for approval.

In another area entirely, this provision would have served to further reduce the participation of Great Lakes ports in the shipment of our Nation's cargo. Because there is no regularly scheduled U.S. flag service in the Great Lakes, cargo preference requirements virtually exclude the use of Great Lakes ports. The Great Lakes region, therefore, will be particularly harmed by this provision.

Cargo preference laws, ostensibly designed to advance the interests of the U.S. merchant marine in the international marketplace and protect it from foreign competition, has in fact acted to exclude an entire region of the country from participating in the shipment of cargoes affected by its requirements.

I have always supported the advancement and protection of our merchant marine, but I cannot support laws that do so at the expense of the economic viability of the Great Lakes region.

For these reasons, Mr. President, it was imperative that section 1219 be dropped from the bill.

Mr. President, I also want to thank at this time David Lyles, Bob Bayer, and Mary Kampo, who worked very hard not only during the conference, but over the entire year on my subcommittee. They did a very fine job, and they are truly outstanding professionals.

Mr. President, as this body knows, I introduced an amendment on the Senate version of the Department of Defense authorization bill concerning the competitive participation of the Federal prison industries—known as FPI or UNICOR. My amendment was adopted without opposition. The House did not have a similar provision. Since that time, we have engaged in a protracted and contentious conference with the House on this provision. I would like to share with my colleagues the history of this issue, and the series of events that led to the Senate receding to the House's unreasonable demands.

Mr. President, my amendment was designed to insure FPI's participation in the Federal procurement process on a competitive basis. Presently, FPI is authorized to short-circuit the Government's regular procurement process. Under FPI's enabling statute, and the implementing regulations, Federal agencies must acquire products or services offered by FPI, if they meet their requirements as to performance, and availability. In the jargon of procurement, FPI is a required source of supply, taking precedence before all commercial sources. The small business community generally refers to this as FPI's super preference. In practical terms, it lets FPI take any contracting opportunity within its product line virtually without restriction—a predatory situation from the viewpoint of the small business community, and in fact the business community at large.

The amendment I offered reconciles current Federal procurement practices, designed to assist small and small disadvantaged business concerns, with a 1934 policy that granted FPI a procurement super-preference superior to all small businesses or other businesses offering products to the Federal Government. My amendment curtailed the preference that FPI currently enjoys over small and small disadvantaged business concerns, and also made certain that FPI only sell its

products to the Defense Department at a fair market price, the standard demanded on all who furnish supplies or services to the Government.

Clearly Mr. President, FPI super preference falls hardest on small business concerns and disadvantaged small business concerns who have decided to focus their entreprenurial efforts in the various segments of the federal procurement market. FPI's competition is unpredictable, and overwhelming given its unrestricted freedom to offer products of its choice and to capture as much of the market as it desires.

Yet, by FPI's enabling statute, FPI is to conduct its activities so that no single private industry shall be forced to bear an undue burden competition from the products of prison workshops. Further, FPI is required to avoid capturing more than a reasonable share of the market amont Federal departments, agencies, and institutions for any specific product. Many small firms complain that there are clear statutory words that are meaningless in practice. They must be given practical effect though implementing regulations.

From 1934 to 1985, FPI participated in a modest amount of business with Federal agencies. They used their authority for the congressional purpose intended: To provide rehabilitative training opportunities for inmates, so they would be better prepared to reenter society with a skill that could lead to gainful employment. This Senator has no quarrel with this purpose and modest manufacturing activities supporting such a proper correctional purpose.

It appears, however, that the correctional purpose of the prison workshops has been eclipsed since 1985 by a desire to expand production. The purpose of this expansion effort is twofold: First, to create a larger business base to maintain FPI's status as a self-sufficient Government-owned corporation that does not require any direct appropriations. And second, to provide more activity for the expanding Federal prison population. During the discussions of my amendment, FPI repeatedly emphasized the necessity of an ever-growing Federal prison workshop network to maintain tranquility in the Federal prison system. Combating idleness has, for all practical purposes, replaced the laudable goal of rehabilitative opportunities. To expand its market, FPI has been pursuing the Federal procurement market with a zeal that would be admired in a small business concern. Without some needed tempering of FPI's super procurement preference, however, FPI's zealousness could become predatory in nature.

FPI is a Government-owned corporation that possesses a lock on any market it chooses to pursue and direct access to a captive workforce that is compensated far below prevailing wages. FPI's reported sales in 1988 were $320 million. It currently employs over 15,000 employees in 72 factories at 41 correctional facilities maintained by the Federal Bureau of Prisons. FPI pays wages from 15 cents to $1 an hour, and most, if not all, of its products require labor-intensive production. FPI receives Government-purchased equipment, has unlimited borrowing authority at a point below prime, and has guaranteed markets for its goods. These are tremendous advantages to a vendor in competition with other vendors, particularly small and disadvantaged firms.

FPI plans expansion of its sales program to $462 million by fiscal year 1992. This tremendous expansion is in anticipation of a 15-percent increase in prisoner population, not because of any increased Federal Government demand for FPI products. This concerns me greatly. FPI's management is more bent on market expansion, than prisoner rehabilitation, as its principal objective. Small business concerns and disadvantaged small business concerns have become increasingly alarmed as FPI focuses its marketing lock on the Department of Defense, which accounts for 70 percent of the Government's procurement activity.

Mr. President, FPI's advantage does not stop with its ability to specify its own market share, essentially without check. An agency must pay FPI's price, provided that the price represents the current market price. Unfortunately, this pricing standard has never been defined. Worse yet, disputes relating to price, as well as the suitability of FPI's product to meet agency requirements, must be submitted to an arbitration board consisting of the Comptroller General, the Administrator of General Services, and the President, presumably represented by the Attorney General who exercises responsibility for FPI.

This dispute resolution mechanism is hardly conducive to even the most courageous challenges on the part of Government contracting officers. Even if they are convinced about the unacceptability of FPI's product or the reasonableness of its price, the process virtually forecloses any effective check on FPI. Not surprisingly, this arbitration mechanism has not been used since the 1930's.

During the last Congress, FPI's competitive advantage reached new heights when it was accorded authority to borrow from the Treasury by a provision of the Omnibus Anti-Substance Abuse Act of 1988, Public Law 100-690. This expanded access to capital will enable FPI to broaden its current product line and expand in to new areas. Without confronting the hurdle of finding the resources to capitalize expansions that all private firms, large as well as small, must overcome.

Mr. President, these market advantages make FPI such an unfair competitor that we can no longer expect small businesses and disadvantaged small businesses to challenge FPI successfully in the Federal procurement arena. My amendment simply would have leveled the playing field. Having transformed itself into a large and aggressive corporation, with the mandate of its Government-owned status, FPI should no longer be accorded a procurement preference superior to that of small business concerns and disadvantage small business concerns. FPI should be required to compete for Federal contract requirements on the basis of quality and price just like any other contractor. This would make good business sense, for the procuring agencies and for the taxpayers who foot the bill. If FPI wants to become the Federal Government's vendor of choice, it should have to earn that status by performance and price, like any other contractor.

I have given my colleagues many examples of the undue burden FPI's aggressive competition already has had on numerous small business companies in Illinois as well as in other States. I have also expressed my experience as the Secretary of State in Illinois with prison industries being successful in a competitive environment—where in an open competition for license plates, the Texas State penitentiary won the contract over all other bidders.

With all of FPI's advantages—low wages, Government-supplied equipment, unlimited borrowing authority, and tax exempt status—it escapes me how FPI could argue that it would lose all its DOD business if they were required to compete. Nevertheless, FPI did argue that its bids may not always be the lowest, or would be stigmatized. Even more curious was that FPI rejected my compromise proposals to grant it a price preference in competitions instead of its super preference. Perhaps FPI does not want to own up to the fact that it has overpriced its products to the Government. Even if FPI plows its profits back into its operations to remain self-sufficient as it claims to be, might it not also be true that decreases in Justice Department funding of FPI are matched or exceeded by the cumulative overcharges to all other Federal agencies?

It was also argued during the debate over my amendment that the Anti-Drug Abuse Act of 1988 contained mechanisms to prevent private businesses from being hurt by FPI where it plans to enter new product lines, or plans to expand existing producton. However, the organizations that help develop those mechanisms have found them to be unworkable in subsequent negotiations with FPI. In fact, no

fewer than nine industry groups signed a joint letter to FPI, dated July 10, 1989, which formally rejected FPI's proposed implementation. This letter followed many months of joint discussions between FPI and industry, in which affected industries devoted considerable time and thought to developing a mutually agreeable implementation. My amendment was, in part, an outgrowth of industry disenchantment with the 1988 legislation and mechanisms designed to protect industry.

My amendment, and the several alternatives I suggested in conference, were designed to infuse some fairness into the contracting process that the 1988 FPI amendments did not provide. The 1988 statute provided no protection whatsoever for private businesses in product markets where FPI plans no substantial expansion, because it already is dominant. Private firms find no comfort in the fact that FPI's board of directors makes the decision on whether FPI's operations will have an undue impact on private industry, particularly since FPI has proposed no objective criteria for the board to make—or for anyone to review—such as determination.

The Congress must act to rectify this unjust situation, and this Senator plans to pursue legislation to do just that. There will be hearings which will provide an open forum in which all sides can present their views and have ample opportunity to rebut each other's arguments. Then we will sit down and consider reform proposals. Mr. President, I would like to share some of my thoughts on what changes will be needed.

First, Mr. President, I believe Congress needs to revisit FPI's enabling statute. Title 18 of the United States Code, chapter 307, states that an agency shall purchase such products from FPI at a price not to exceed the current market price, if such products meet the agency's requirements and are available. That provision is reasonable and flexible. Unfortunately, the FPI regulations venture far beyond their statutory directive by imposing a mandatory super-preference for FPI over any other vendor—regardless of price, quality, or delivery requirements. Furthermore, neither the FPI statute nor its implementing regulations define current market price.

Therefore, the first necessary clarification to the FPI enabling statute is to define current market price. In my opinion—and many of my colleagues agree with me—that term should have the same meaning as fair market price—the price for which small businesses must sell their products to the Government.

The second clarification that should be made either in the FPI statute or the FPI regulations, is to give Government contracting officers the flexibility contemplated in the 1934 FPI statute. In other words, the 1934 statute contemplated Federal agency purchases from FPI if: First, FPI's price does not exceed the current market price, second, FPI's product meets the agency's requirements, such as, for quality, safety, and delivery: and third, are available. If FPI's proudcts do not meet these standards, then the contracting officer should have the flexibility to seek offers from private vendors.

The third amendment to the FPI enabling statute that should be considered is provision of some more effective remedy for an industry which has already suffered undue burden from FPI's current presence in the market for that industry's products. One approach might be to provide a private right of action to small business concerns to enforce the safeguards already provided in the FPI statute. Another approach would be to apply the Administrative Procedures Act of FPI so that, among other things, FPI board of directors decisions could be appealed.

Fourth, clarification is necessary to ensure that once a Government contracting officer issues a solicitation, FPI may not exercise its super preference and demand that it be the source of supply for the procurement. Small and small disadvantaged firms should not be placed in the untenable position of spending their scarce time and resources on bidding, only to have the work diverted to FPI. Once a solicitation is issued, award should be made solely on the basis of that solicitation.

Fifth, restraints should be imposed on FPI's unfettered power to deny agency requests for waivers where, for example, the agency has justified a noncompetitive procurement from contractor, or can more effectively meet its needs by buying off the General Services Administration's schedule of products, for which GSA has already negotiated prices and quality standards.

Sixth, Federal agencies purchases from FPI should be reported to the Federal Procurement Data Center—just like all other contractors' sales to Federal agencies. Right now, agency purchases from FPI are treated as interagency transfers that do not have to be reported to the Federal Procurement Data System. As a result, objective data is not available from which we can judge the extent to which FPI has penetrated the Government market for particular products. My amendment would have cured this problem by making any contract awarded to FPI subject to Federal procurement data reporting requirements.

Seventh, FPI should be encouraged to subcontract with as many small and small disadvantaged businesses as possible. Furthermore, all FPI subcontracts and supply contracts with small and small disadvantaged businesses should be reported. This would help FPI show to the Congress and to the public that, in fact, FPI is giving more work to small and small disadvantaged firms than perhaps it is taking away.

Many of us who are concerned about the erosion of our defense industrial base should do our best to ensure that a broad range of companies continue to participate in the Federal Government market. Sad to say, many companies in competition with FPI are on the brink of getting out of the Government market, for the simple reason that they can no longer afford to participate as the pool of available contract opportunities steadily shrinks. Further, some would question the prudence of permitting Federal prisoners to become the sole source of supply for mission critical items such as cable and wire harness assemblies. It is a sobering thought.

Mr. President, some may argue that small companies which have lost business to FPI can make up for those Federal market losses by shifting emphasis to the commercial market. This may be true, but many small businesses have tailored their production to specialized Federal Government requirements. All too frequently, they are required to meet Government-unique military or Federal specifications, mandating the use of materials and manufacturing processes that are not viable in the commerical market. And, some of these small firms that have lost substantial business to FPI, particularly disadvantaged firms are in labor surplus areas with staggering unemployment. Should the rights that these disadvantaged firms have in Federal procurements generally be eviserated totally by FPI's super procurement preference? My answer is no.

FPI's mission to educate and train inmates in laudable. But as FPI grows and expands into new product areas, it must live up to its second, equally important, mandate: To operate in such a way that "no single private industry shall be forced to bear an undue burden of competition from the products of the prison workshops, and to reduce to a minimum competition with private industry or free labor."

I am an advocate of an effective criminal justice program. I do not want to eliminate FPI and I have met with the Director of Federal Corrections and told him so. Unfortunately, a campaign of scare tactics—threats of prison riots and chaos—blurred the real issues raised by my amendment. None of the frightening assertions made by my opponents had any substance behind them. Making FPI a more accountable contractor would not force it to close its prison workshops and lay off prison workers.

Mr. President, during the conference, I offered a series of compromises to the other body with respect to my

amendment. Federal Prison Industries asserted that the Senate amendment would have foreclosed FPI from being able to compete for the very products that comprise the mainstay of its product line. They made this assertion on the basis that they would have to compete as a large business concern, and would be frozen out of the competitions due to the Small Business Act authority relating to restricting competitions to small firms.

I responded directly to this argument by offering an alternative that would allow FPI to compete for any contract opportunity. The objective was to make FPI compete, not merely claim, contract opportunities of its liking through its super preference. This change satisfied the concerns of some of my colleagues on the House side, but did not dissuade FPI from continuing to argue that any competition requirement would destroy their enterprise, idling thousands of prisoners.

In the final analysis, the House conferees refused to agree to a statement of managers to accompany the decision of the conferees that the Senate would recede and drop my amendment as adopted by the Senate. I am dismayed by this action, and ask unanimous consent to have the text of the proposed statement of managers included in the RECORD following my statement.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. DIXON. Mr. President, my colleagues and the public at large can reach their own conclusions regarding the danger that the House must have perceived in the words that I offered.

I will continue to pursue legislation that will allow FPI to fulfill its important mission, and yet not unduly burden small business contractors. Small business concerns across the Nation deserve our attention on this issue. They deserve to operate in a predictable environment where they can make reasonable business decisions. Small business concerns deserve our support, and I am going to see that they receive it. I hope that those who were opposed to my amendment do not think that this issue is closed. We have just begun.

I sincerely congratulate Senator NUNN and the distinguished ranking member, Senator WARNER, on the outstanding work they did on this conference.

EXHIBIT 1

STATEMENT OF MANAGERS—PARTICIPATION OF FEDERAL PRISON INDUSTRIES IN DEFENSE PROCUREMENT

The Senate amendment contained a provision (sec. 837) that would have required the Department of Defense to obtain products from Federal Prison Industries (FPI) only through competitive procurement procedures. It also established a definition for the undefined term "current market price" used in FPI's enabling statute by equating it with the defined term "fair market price".

The House bill contained no similar provision.

The Senate recedes.

All of the conferees agreed that the workshops operated by Federal Prison Industries were an essential mechanism to combat idleness in the Federal inmate population. A majority of the conferees were convinced that any proposal requiring Federal Prison Industries to compete for work within the Federal procurement system held the potential to interrupt the work flow needed to sustain activity at those workshops. These conferees were persuaded by FPI's assertions that its operations would be crippled if the Senate amendment, or any of the various alternatives offered by the Senate, were adopted. The majority of the conferees maintained that any adverse impacts alleged to flow from the current manner in which FPI operates would have to continue to be tolerated by the small business community and the executive agencies until a more careful analysis of the various proposals for changes to FPI's mode of operating could be conducted.

Federal Prison Industries, or UNICOR (its tradename), is a Government-owned corporation that presently operates 72 factories in 41 correctional facilities maintained by the Federal Bureau of Prisons. It has an inmate workforce of approximately 14,000 out of a total prison population of approximately 50,000.

Under FPI's authorizing statute, executive agencies are required to purchase products offered by FPI if those products "meet their requirements" and FPI's prices do not exceed "current market prices". Under the Federal Acquisition Regulation (FAR) provisions implementing the statute, FPI is designated as a "required source of supply" giving it priority over any private commercial source. Agency contracting officers are required to solicit FPI for products or services appearing in FPI's Schedule of Products. Agency purchases from FPI are handled as "interagency transfers", negotiated between FPI and the agency making the purchases. FPI's sales totalled $335.9 million in FY 1988.

The conferees observe that in light of the persistent allegations regarding FPI's unfair competitive position strongly voiced by elements of the small business community and FPI's planned expansion of its sales program to $462 million by Fiscal Year 1992, a review of the program's current manner of operations appears fully warranted. It has also been suggested that FPI's statute, and especially the implementing regulations may exesssively hamper the ability of the procuring agencies to effectively question the reasonableness of FPI's prices, the suitability of its products to meet agency needs, and the timeliness and quality of FPI's performance. Hearings by the Committees on Small Business of the Senate and House of Representatives regarding the alleged adverse impact of FPI's current operating mode on small business government contractors are expected. Recommendations for reform will certainly be vigorously renewed. In addition, oversight hearings may be scheduled by the House Committee on the Judiciary.

The conferees agree that one change in the manner in which FPI operates within the Federal procurement system may be made without any danger of adversely effecting the operations of its workshops. This relates to the reporting of purchases of products or services from FPI by the various Executive agencies. Because acquisitions from FPI are currently viewed as "intragovernment transfers", these purchases from FPI are not reported to the Government-wide Federal Procurement Data System (FPDS), established by Section 6(d)(4) of the Office of Federal Procurement Policy Act. Such reporting would afford to the Congress a more effective opportunity to assess the scope of FPI's participation in the overall Federal procurement market, and its impacts on the small business community and the procuring agencies. Such reporting will faciliate implementation of amendments to FPI's enabling statute made by Section 7096 of Public Law 100-690, the "Anti-Drug Abuse Act of 1988". These amendments require FPI to conduct a form of small business adverse impact analysis based on market share before deciding to produce a new product or significantly expand production of an existing product. The manner in which FPI keeps data on its sales activities is not comparable to the data maintained by the FPDS. Hence, the analyses required by last year's amendments can not be made in a manner deemed reliable or equitable by the small business community.

In light of the foregoing, the conferees direct the Administrator for Federal Procurement Policy to modify the FPDS reporting requirements so that agency purchases from FPI are reported to the FPDS in the same manner as an agency purchase from a commercial enterprise, beginning not later than October 1, 1990. Each report published by the Federal Procurement Data Center shall note that purchases from FPI are currently considered intragovernmental transfers, but such purchases from FPI are being reported to provide a complete overview of the acquisitions by the Executive agencies and to facilitate conduct of analyses required by statute.

The ACTING PRESIDENT pro tempore. Who yields time?

Mr. WALLOP. Mr. President, I yield 5 minutes to the Senator from Alaska.

The ACTING PRESIDENT pro tempore. The Senator from Alaska is recognized for 5 minutes.

Mr. STEVENS. Mr. President, I want to start by commending the Senator from Georgia, the chairman, Mr. NUNN, and ranking member, my good friend from Virginia, Senator WARNER, for their work on this bill. I want to state that it is a good bill, and I will support it.

The Armed Services Committee and the Defense Appropriations Subcommittee have worked together very closely this time, due to the efforts of Senator BYRD, Senator HATFIELD, and Senator INOUYE. I do have some concerns. I wrote the members of the Appropriations Committee last week explaining my concerns, and those have been made available to the Armed Services Committee chairman and ranking member.

Mr. President, I believe the Armed Services Committee should establish priorities for defense spending. That is their role, and I firmly advocate their fulfillment of that role. Their pronouncements on the share of spending for individual accounts, for aircraft,

for ships and other systems, is an important guide for the appropriations process. But the Appropriations Committee, which I have been honored now to serve for over 18 years, also needs flexibility and an understanding of its role in our process.

We have now had such constraints placed upon our process, and I think this bill demonstrates those constraints, and I want to discuss them. The imposition of limits in this bill for spending on individual programs has complicated the work of the Appropriations Committee in balancing the accounts with the Budget Act. New information and changing priorities often provide the Appropriations Committee with additional options or requirements, that can be fulfilled, that were not even anticipated at the time the Senate and the House considered the authorization bill.

To me, it does not make any sense to artificially block spending on important programs in the authorization bill, especially when the House and the Senate have differed, as in past authorization bills, and the same has been true in the appropriations process.

The House passes an armed services bill; we pass one. The House passes an appropriations bill; we pass one. Now, theoretically, those four versions have to come into sync, despite the fact that the one is not completed by the time we start the appropriations process.

My problem, I think, is demonstrated, Mr. President, by the constraint that is placed upon cleanup of hazardous waste by the Department of Defense in this bill before us.

I happen to have a great interest in that program. It was started in the appropriations process when I was chairman of the subcommittee. It is now an authorized program and an enormous program, but there is a constraint in the bill on the amount that can be spent by the Department of Defense in cleaning up hazardous waste.

I know that the members of that committee do not oppose the cleanup of hazardous waste, but this conference report that is before us now specifically limits the amount that the Department of Defense can spend on hazardous waste without regard to the amount of money we can find as we wind up the appropriations process.

That is unfair. It is unfair to us in the Appropriations Committee, and it is unfair to the public at large.

Again, I am not saying they have done it to show any antipathy toward the cleanup program. But it is there.

I do not know which projects will not get cleaned up this year because of that limit, but there are some. We funded more than can be spent.

The defense appropriations report will come before the Snate I hope today or tomorrow. At least before we adjourn, I hope.

The interesting thing about the process is the Members of the Senate, through the approach of an amendment to an amendment in disagreement, can change anything in the appropriations bill, and does. We spend days, and we will do it again here. There will be changes made in the appropriations bill here, but because of the procedure used by the authorization committee, those of us who are interested in defense and know what we have money for in the appropriations process do not have an opportunity to disagree with this report.

It is brought before us as a complete report. It is not subject to an amendment. The only thing we can do is send it back to conference or defeat it. We cannot vary it. That makes this process unfair, in my judgment. We will have to deal with that. The issues that ought to be addressed here today should be addressed.

I ask for about 4 more minutes.

Mr. WALLOP. I yield 4 minutes to the Senator from Alaska.

The ACTING PRESIDENT pro tempore. The Senator from Alaska is recognized for an additional 4 minutes.

Mr. STEVENS. Mr. President, we are duplicating each other's work, there is no question about that. The problem with this conference report is it goes into detail with details, getting down to individual line items instead of accounts, getting into budget details that normally have been the mission of the Appropriations Committee.

What it means is if we perform our mission, part of it cannot be accomplished because of the constraints contained in this authorization bill.

We have tried to pledge our efforts to settle the differences between the two committees in each House that handled defense affairs, and God knows, I have been part of those difficulties. But it is because we feel, those of us who handle the accounts, feel we, too, understand the systems and particularly understand the complications of trying to finance one as opposed to another.

I hope that the Senators from Georgia and Virginia and their colleagues on the Armed Services Committee will dedicate themselves to compliance next year with this new found feeling of cooperation you will find is represented by the appropriations bill as we bring it out.

The unfortunate part of it, again, I call to the attention of the Senate, is the fact there is no way to disagree with this report. Many of the things that are before the Senate right now were not before the Senate in the Senate bill. They were in the House bill. The House bill was stripped out. We put in the Senate bill in the authorization process.

Now we find that we are dealing with systems and an array of priorities that were not the priorities of the Senate. Those of us on the Senate Appropriations Committee attempt to live up to those priorities as we go through the appropriation process. Now we are frustrated as we come back and we find we cannot have any impact on the total functioning of the systems. There are some that I feel very strongly about.

For instance. I made that statement rationally at the beginning of the process I would not vote for a bill that did not authorize the initiation of procurement in the V-22. I still believe that is one of the most revolutionary systems we ever found.

It is new technology. We ought to be pursuing it with a vengeance. Instead, we are putting a cap on it. The cap is on R&D. We cannot exceed that cap because of provisions in this bill, although we could have fund money in this last minute we could have used. We used that for unauthorized projects the committee is going to find fault with along the line. The reason we did, the authorized project had the cap on it and we could not put the money where it should have been this year. That system should change.

I thank the ranking member for his time.

The ACTING PRESIDENT pro tempore. Who yields time?

Mr. WALLOP. Mr. President, I yield 5 minutes to the Senator from New Mexico.

The ACTING PRESIDENT pro tempore. The Senator from New Mexico is recognized for 5 minutes.

Mr. DOMENICI. Mr. President, I thank the distinguished Senator from Wyoming.

Mr. President, there are a lot of things I could speak to in this bill, but I choose in this short time to speak specifically about science and technology transfer.

Let me acquaint the Senate with a few facts that I think are rather startling. If one were to ask what organization or institution in the free world has the most scientists, engineers, physicists, and supporting personnel under their jurisdiction, I do not think very many Senators, and certainly not very many Americans, would get the right answer. The answer is the Department of Energy.

About 23,000 scientists, physicists, engineers, and supporting personnel make up the national laboratory system that is under the jurisdiction of the Department of Energy.

Of those, three of their biggest laboratories are so-called nuclear deterrent laboratories; Sandia National Laboratories, Albuquerque, NM; Los Alamos in New Mexico; and Lawrence Livermore in California. Each of those laboratories and the others within the

Department of Energy contain a myriad of scientists with a truly versatile scientific potential.

Now let me move to a rather wild statement made by the head of the Patent Office of the United States in 1843. The man running it, a man named Ellsworth, thought then that he should retire and we should close the Patent Office because all inventions the world was going to see had already occurred and perhaps we did not even need a Patent Office.

Then move to today, when one can stand on the floor of the U.S. Senate and say without fear of being contradicted that, believe it or not, more scientific breakthroughs will occur in the next 30 years than in all of history.

I used to say 20, and some scientists said I was wrong and I thought I must have really gotten the wrong set of facts. They said, "if you say 30, you are probably right." Now I say more scientific breakthroughs will occur in the next 30 years than all of civilization.

And locked up within the laboratories of the U.S. Department of Energy are technologies and scientific capabilities beyond that which anyone else has, believe it or not.

This bill, finally, after 4 years of effort on my part—and I have been joined in the last 2 years by my junior Senator, Senator BINGAMAN, and by a number of House Members—we have finally succeeded in passing in this bill and sending to the President the National Competitiveness Technology Transfer Act. This legislation will essentially enable those three nuclear deterrent laboratories to function like all the other Federal laboratories with regard to improving technology transfer. It will enable them to conduct cooperative research with the private sector and universities, enhance the exchange of scientific knowledge and permit the exchange of scientific personnel, between business, the laboratories, and the universities, and the bill will clarify a number of those kinds of things that have caused business in America not to use these laboratories.

With the full cooperation of this Secretary of Energy, this new authorization for the Department of Energy's laboratories could indeed give the United States of America—through the business university community a new birth of patents, royalties, technology transfer, and exchange of ideas leading to things of commercial value beyond measurement.

I am very hopeful now that with the passage of this effort we will add to the repertoire of science making America more competitive by enabling us to really use the national defense deterrent laboratories.

Federally funded research can contribute significantly to our economic well being if properly managed. And the contribution can be significant.

Technology based sectors generated approximately one-half of the U.S. gross national product in 1988, twice what is was a generation ago.

Experts have predicted that we will have more scientific discoveries in the next 30 years than there have been so far in all of recorded history. It is hard to believe that in 1843, Henry L. Ellsworth, the Superintendent of Patents wanted to resign and do away with the Patent Office. He believed that everything that possibly could be invented had already been invented, and there was no further need for the Patent Office or a Superintendent of Patents.

We have come a long way since then.

The United States invests substantially in science. The United States spends more for research and development—$117 billion according to the budget—than the next four Western industrialized countries combined. The amount of money that the Federal Government spends has increased from $29 billion in 1980 to $63 billion in 1989.

The largest single scientific organization in the free world, with more scientists on the payroll than any other organization is the U.S. Department of Energy. It has more than 23,000 scientists and engineers, and supporting personnel.

Any discussion of competitiveness must include a vital role for this tremendous resource. That role is technology transfer.

"Technology transfer" means making technology developed in the laboratory useful in industry so that the knowledge can contribute to our economy. Technology transfer means new businesses and new products. It means keeping new jobs in America instead of moving them overseas.

In the past, the term usually meant publishing the research results in journals which sit on the shelf in the library. In time, the technology would make its way to industry and eventually find application. For three decades after the Second World War, this haphazard system worked well enough in helping U.S. industries keep up with technological advances. It worked primarily because we had no significant competitors. The world would wait until we were ready to commercialize. Even if firms took many years to apply new technology coming of the labs, we would still dominate the market.

But that was then and now is now.

Now, delay is fatal to capturing part of the market. Increasingly, foreign firms are ahead of U.S. firms in applying the latest technology to manufacturing.

As we enter the 1990's technology transfer needs to include an active approach to commercialization of lab-generated technology. This can take the form of extra effort by the labs to acquaint industry with the research it is doing. It must mean getting industry and the laboratories to collaborate early in the research process. It must mean that scientists must have an eye toward commercialization. It must mean incentives to the investors. It must mean exclusive licensing rights in exchange for industry's further development and commercialization of a technology into a useful product. Spinout and collaboration are important to technology transfer.

Numerous reports by scientific groups, the Energy Research Advisory Board, GAO, and others made recommendations on how to make the technology transfer system at the Department of Energy work better.

Hearings were held. The first hearing was a joint hearing of the Senate Energy Committee and the House Science and Technology Committee held in Albuquerque in 1986.

I introduced S. 1480 on July 10, 1987. The bill was cosponsored by Senators BINGAMAN, WILSON, and MURKOWSKI. MARILYN LLOYD introduced a similar bill in the House. Hearings were held on September 15, 1987, May 11, 1988, and passed the Senate during the last days of the 100th Congress. Unfortunately, the House and the Senate could not agree on the final language.

The bill was reintroduced in the 101st Congress on March 9, 1989, as S. 550. It was reported out of the Energy Committee on August 4, 1989. I offered a version of the bill as an amendment to the fiscal year 1990 DOD authorization bill. This language would accomplish many of the same things S. 550 and S. 1480 would have accomplished.

Under the legislation industry will only have to learn one set of procedures for working with Federal laboratories.

These procedures will better enable the laboratories to transfer rights to innovations and information created as a result of cooperative research and development agreements.

WHAT THE LEGISLATION ACTUALLY DOES

Amends the Stevenson-Wydler, and the Federal Technology Transfer Acts to grant Government-owned, contractor-operated [GOCO] Federal laboratories—like Sandia National Laboratories and Los Alamos National Laboratories—the same opportunities to enter into cooperative research and development agreements with universities and private industry that Government-owned, Government-operated [GOGO] laboratories have had for almost a decade.

To negotiate licensing agreements with these entities for inventions made at the laboratories;

Laboratory directors would be allowed to exchange personnel, services, and equipment with their research partners that are universities and industry;

Grant and waive rights to laboratory inventions and intellectual property;

Allow current and former employees to participate in commercial development, to the extent there is no conflict of interest.

Establish new time deadlines within which agencies must act on proposed agreements. These deadlines will expedite the approval process and are very important if we are to capture the full commercial potential of inventions developed in these agreements.

Allows information and innovations brought into, and created through, cooperative agreements to be protected from disclosure.

Provides a technology transfer mission for the nuclear weapons laboratories.

THEN WAS THEN, NOW IS NOW

When I first started working on this legislation, some described doing business with the Department of Energy as slow, tedious, uncertain, and unrewarding.

Some had the view that the weapons laboratories were still secretive, walled-off enclaves and should remain that way.

The prevailing view outside DOE was that technology transfer wasn't working at the Department. It was taking an average of 18 months to process a routine patent waiver. In some instances the delay was as long as 52 months. One reason cited by GAO was that technology transfer was given a very low priority among the work that the patent lawyers were assigned.

A company wanting to do cooperative research with one of the National Laboratories had to negotiate at least nine different agreements—more than 4 inches worth of documents.

DOE felt that it was exempt from the Executive order under which the President called for all Federal agencies to make technology transfer a top priority.

But that was then, and now is now, and now is better. With this new law, the future can be even better.

Admiral Watkins strongly advocates a change in the mission of the laboratories to include technology transfer.

DOE is several years into its pilot programs on superconductivity.

Defense programs experts at DOE have outlined an impressive program for additional pilot programs in areas like electron beam research, specialty metals, machine tools, laser welding, plasma destruction of toxic substances, and combustion synthesis.

And industry is getting more interested. An $11 million agreement dealing with superconductivity was finalized on October 30, 1989, between Los Alamos, Du Pont, and Hewlett Packard. It will involve 25 or more researchers sharing equipment and facilities at all three institutions.

POTENTIAL FOR THE NEW LAW

It is difficult to predict the potential for this new law, but I would expect a surge of technology transfer activity similar to what we experienced when Congress enacted Stevenson-Wydler and the Federal Technology Transfer Act in 1986.

Cooperative research between industry and laboratories increased 74 percent since the enactment of Stevenson-Wydler and the Federal Technology Transfer Act. Several reports have cited this law for improving the number of reported inventions from covered scientists by 40 percent.

Today's legislation will put Sandia and Los Alamos under this technology transfer umbrella. In terms of potential, the sky is the limit.

We can expect to see more centers of excellence established among businesses, universities and the labs. These centers would be directed toward new commercial enterprises.

In my own State of New Mexico, the potential is very real.

New Mexico ranks fourth nationally in both Federal and university technology sectors for research and development, while the State's private technology sector lags behind, ranking 21st.

Technology transfer will utilize more of the successful research we have at our labs and universities in the private sector.

Total technology-based economic impact on the State accounts for $10.5 billion out of the total $38.1 billion New Mexico economy. High technology is important already, but we are just beginning to tap the potential.

The Federal technology sector in New Mexico is responsible directly and indirectly for 83,000 jobs.

University technology sector contributes another 12,000 jobs.

Private technology sector contributes 25,000 jobs.

We are tapping into the Nation's and the labs true potential.

If the Department of Energy correctly implements this program, we should be able to have a 10 to 10 plan—increase these statistics by tenfold in 10 years.

The challenge is timely. There is tremendous anxiety about the future and our place in it. A thousand conversations begin with the latest trade deficit statistic, with the latest Pacific Rim accomplishment in superconductors, advanced semiconductors, high definition TV, supercomputers or other critical technologies. It leads many to a dire prognosis for the next century.

Japan is ahead in developing many of the building blocks of the 21st century. The Japanese have not only filed more than 2,000 superconductor patents worldwide, but have already started to develop motors and generators using the superconductors. U.S. projects are still in the planning stage.

Such facts could throw us into a national toxic thought syndrome where we engage in self-defeating behavior and our companies simply give up. To the contrary, the United States can be a very strong competitor in these high technology areas.

But we have to do better with what we have and that means making the national laboratories user friendly. We need to use the laboratories to their optimum. We can no longer enjoy the luxury of keeping these scientists isolated. We need to maximize their potential by making technology transfer work. This bill will help accomplish that goal.

I want to thank all who have worked with me over the past several years to develop this legislation and work it through the Congress. MARILYN LLOYD was the champion of this issue in the House and has worked very hard. Without her determination this legislation would not be possible.

Senator BINGAMAN has been very interested in this issue and has been helpful in the legislation's passage today. Senator JOHNSTON and Senator MCCLURE have spent a great deal of time on this issue and I appreciate the priority the Energy Committee assigned to this important issue.

Lastly, let me commend Secretary of Energy Watkins and the many people on his staff who have worked on this legislation.

Mr. President, I would like to take a few more moments to discuss several other items in the fiscal year 1990 Department of Defense authorization conference report.

I believe that what the conferees came up with is a good bill under extremely difficult circumstances. Compared with the House passed authorization bill, I believe the final result was an extraordinary improvement.

SDI funding was negotiated to a spending level of $3.57 billion for the Department of Defense, far below the Senate Armed Services Committee level of $4.5 billion and even further below the President's request of $4.9 billion. My hope was that we could strike a bargain with the House conferees that would provide this vital program with a funding level at the higher end of the spectrum that divided our level of $4.5 billion and that of the House at $3.1 billion. Without a sustained and responsible level of funding for SDI, I am concerned that the program will gradually unravel while the many promising and ongoing research projects will fall victim to the budget ax.

In addition to SDI, there were a number of New Mexico projects and programs that I was successful in focusing the Senate's attention on and which were approved in conference.

One involved laser weapon verification. I offered an amendment to the DOD bill concerning research and development of laser weapon verification which was adopted by the Senate. It would give the New Mexico labs a greater opportunity to compete for work in this vital area of arms control. The House bill contained no such similar amendment and, through working with the conferees, I was able to persuade the House and Senate conferees to fully support this vital technology research.

Another amendment I offered would direct the Army to continue to participate in a joint DOE-Army research project concerning magnetoencephalography. This project would examine how the brain works and how those findings might apply to the fields of medicine and military personnel selection and training. The Senate agreed on the need for this project and approved of my amendment. In conference, the Armed Services Committees agreed that the Army should continue its participation in this promising program.

I also offered an amendment that would require a report from the DOD regarding military families with disabled or blind children. This is the problem addressed in S. 1721, a bill I introduced to correct what I felt was a significant inequity. These families with disabled or blind children have in the past been eligible to receive supplemental benefits to care for their disabled dependents. Unfortunately, these same military families discovered that when they were deployed overseas, they lost these much needed benefits.

My amendment would require the Department of Defense to focus on the number of families eligible for these benefits while living in the United States, the number of families that lose these benefits when they are deployed overseas, and the costs involved if we were to provide these benefits to them while overseas in the service of our country. Fortunately, the Senate and House also included in their reconciliation bills language to help these families. As a consequence, the law will be changed in order to provide these families with the much needed aid.

Finally, I was able to convince my colleagues of the need for and benefits of a center for national security and arms control to be located at one of our national laboratories.

I am pleased that the conference agreement includes a provision to authorize the construction of the Center for National Security and Arms Control at Sandia National Laboratories. Additionally, I am pleased that the conferees agreed to allow a land transfer between the Department of Defense and the Department of Energy that is necessary to clear the way for this vital arms control and verification project. This accomplishes the goals of S. 701, the Center for National Security and Arms Control Act.

Sandia National Laboratories is one of our Nation's leading centers for national security research and development. They have demonstrated leadership in arms control and verification technology.

The Center for National Security and Arms Control will bring together work in four interrelated areas:

Arms control studies and verification technology;

Systems analysis and advanced concepts;

Intelligence; and

Threats and countermeasures.

These functions are currently scattered throughout Sandia National Laboratories in temporary and substandard space. The Center for National Security and Arms Control will consolidate these functions in a single facility for more efficient operation of the pioneering arms control and verification work at Sandia National Laboratories.

The total cost of the facility is estimated to be $32 million.

The land upon which the Center for National Security and Arms Control is to be located is a 5.5-acre tract at Kirtland AFB in Alburquerque. It is adjacent to Sandia National Laboratories, which is a DOE facility. DOE desires to acquire title to the tract so that it can construct the Center for National Security and Arms Control on the site.

DOE has been occupying the land upon which the Center for National Security and Arms Control will be located since 1967 under a permit from DOD. Continued utilization of the land under a permit for DOD, however, is no longer an option.

The substantial cost of the facilities to be located on the property requires that DOE own the land, rather than continue to operate under a permit from DOD, which could reassert control over the land at any time. Such an action would result in the relocation of the Center for National Security and Arms Control, which would be very costly to the Federal Goverment.

This transfer has been proposed as the best means available to allow construction on this vial project to begin in an expeditious manner. The alternative is to attempt a transfer under the "declaration of excess property" process, which takes a minimum of 2 years.

The transfer of title to this facility would be accomplished without compensation to DOD because neither DOE nor DOD would benefit from any compensation, as the funds would simply be returned to the Treasury—from which they came in the first place.

This bill contains a number of important projects, both beneficial to New Mexico and of benefit to the Nation as a whole, that I am proud to support. I look forward to passage of this bill and I urge my colleagues to vote for this conference report.

I thank the managers of the bill and in particular the distinguished Senator from Georgia [Mr. NUNN] for helping us with this, and Senator WARNER for his accommodating us as we attempted to solve the problems that I just described on the defense authorization bill. It is solved. It will soon become law.

I yield the floor.

The ACTING PRESIDENT pro tempore. Who yields time?

Mr. LEVIN. Mr. President, I wonder if the manager would yield a total of 10 minutes to Senator RUDMAN and myself so we could introduce the Ethics Reform Act which we are trying to introduce today.

Mr. WALLOP. I would be willing to cooperate, but, for the time being, I cannot. The time over here is already spoken to. If the Senator would ask unanimous consent to speak as if in morning business, we would have no objection.

Mr. LEVIN. Mr. President, I ask unanimous consent that I be allowed to speak for 5 minutes and Senator RUDMAN be allowed to speak for 5 minutes in morning business without the time counting against the pending business.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The Senator from Michigan is recognized.

Mr. LEVIN. I thank the Chairman.

(The remarks of Mr. LEVIN and Mr. RUDMAN pertaining to the introduction of S. 1882 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

The ACTING PRESIDENT pro tempore. Who yields time?

Mr. WARNER. Mr. President, how much time does the Senator from Virginia have under his control?

The ACTING PRESIDENT pro tempore. Twenty-one minutes and 30 seconds.

Mr. WARNER. Of that time, I yield 4 minutes to the Senator from California.

The ACTING PRESIDENT pro tempore. The Senator from California is recognized.

Mr. WILSON. Mr. President, I thank my friend. I thank him not only for his courtesy now but I thank both the Senator from Virginia, as the ranking Member, and the distinguished chairman, the Senator from Georgia, for the effort they have made to lead us through a very difficult, very protracted, and contentious conference with House of Representatives. I think they have done an extraordinary job.

I am not nearly so full of praise for the product, but that is not their fault. The fact of the matter is, they have had to deal with the House conferees. Unhappily, my purpose in rising is to suggest that, despite the best efforts that have been made by the Senate, we have before us much less in the way of product than we should. For all of the time, all of the effort, what we have is a very mediocre compromise in some of the most important aspects of the bill because the House began with a conscious bargaining position that was, virtually, irresponsible. And they have been rewarded for their irresponsibility in that we have come to a compromise that does not reflect the real needs of the United States, in terms of our security posture.

In particular, if we focus upon the strategic accounts and the funding for the strategic defense initiative, they have been rewarded for irresponsibility because the end result is we have far less to spend than we did in the preceding year for a program that should be increasing, in terms of the amount of time, attenion, and resources we are devoting to it, if we are to make good on the announced intention of the administration which is to permit the President of the United States to make a decision of full deployment within his first term.

There is very serious doubt cast upon his ability to do so now, as a result of the fact that we have so cut the funding that a number of projects necessary to his gaining the information required to make that informed decision will simply not be permitted to go forward, and certainly not at the pace and tempo they were scheduled to enjoy.

Much of this, we might say, will be made academic if we have a prolonged sequestration, if that course is not altered by our success on a reconciliation measure that will prevent it.

But, in any case, what I will say to may colleagues, Mr. President, is there needs to be a very different path taken. Here I would call upon the administration. I think the administration needs to be far more definite, far more firm, far earlier, in dealing with the kind of irresponsibility that has in fact occurred.

No one on the authorizing committee enjoys the prospect of putting in long hours, indeed days and months, upon a bill that the President of the United States finds himself compelled to veto. Yet that may very well be the course we have to urge on the President of the United States if, next year, there is a repetition of the kind of procedure that this year, through attrition, through beginning and ending with irresponsibly low marks for critical accounts, we come to a bill which, through no fault of the Members of the Senate and certainly no fault of the managers, the chairman, and ranking Member, results in a bill not responsive to the needs of America.

I rise, in short, to perform an unpleasant task, and that is to give an admonition. The admonition, very simply, is the best efforts of the Senate by themselves will not be sufficient if the administration does not do its part. The administration must make clear far earlier and more clearly that what we have this year is an unacceptable result.

Again, my congratulations to the two managers for making the best of a very difficult situation.

The ACTING PRESIDENT pro tempore. Who yields time?

Mr. WARNER. Mr. President, I yield to myself such time as may be required.

The ACTING PRESIDENT pro tempore. The Senator from Virginia is recognized.

Mr. WARNER. Mr. President, I thank our distinguished colleague from California. He is a tower of strength on that committee. I appreciate his remarks. He deserves in every respect equal commendation for his contributions on many issues, particularly in the area of personnel.

At this time, I yield such time as the distinguished Senator Mr. LOTT, may require.

The PRESIDING OFFICER (Mr. KOHL). The remaining time is 7½ minutes.

Mr. LOTT. Mr. President, how much time do I have left?

The PRESIDING OFFICER. Seven and a half minutes.

Mr. LOTT. I yield myself 4 minutes.

Mr. President, I thank the distinguished ranking member of the committee, the Senator from Virginia, for yielding at this time. I also want to commend him and the chairman for the outstanding job that they have done on behalf of the Senate Armed Services Committee and on behalf of the Senate in support of this legislation. The conferees worked very hard in arriving at the very difficult compromise defense bill, but I think the diligence and persistence of our chairman, the Senator from Georgia [Mr. NUNN], and the Senator from Virginia [Mr. WARNER] made it possible because they just hung in there and insisted on getting this authorization bill agreed to.

I must say as a Member who served in the other body for 16 years, this is one of the most unusual conferences I have ever seen. Certainly that was expected because there were such great differences between the bills that the two bodies passed. At one point, I really wondered if we would even have an authorization bill this year. So I am pleased we have one. I think it would have been disastrous if we had been unable to reach agreement on this authorization bill and if we let the Appropriations Committee do its work without this authorization legislation.

Like my colleague from California, I must say that I am concerned about what it portends for the future. If the House conferees in the future are in a position of having to work under the restraints they worked under this year, I think it is going to become more and more difficult to get an agreement. I think the country will suffer in the process.

While I think this legislation is basically a good package and I am going to support it, I want to emphasize that this represents the fifth year in a row the defense spending has declined in real terms. I keep talking about that. I know that other Senators talk about it, but it just does not seem to be getting through. The media do not tell that side of the story and the people do not know it. But it is the fifth year in a row that there has been a decline. I really worry as we see the changes that are taking place in Europe and throughout the world, that next year defense spending will go down even further in real terms, maybe even dramatically. I am concerned there is going to be a rush pell-mell to cut defense without really looking at what it is going to do to a number of very important areas for the future defense of this country.

So I hope that we will be very careful in the future as we assess the changes and we decide what we are going to do in the defense area; that we just not start cutting across the board.

In general terms, this bill does accommodate the administration's proposed budget and it departs significantly, in my opinion, from past budgets by making difficult choices to terminate some weapons programs. I think that needed to be done. In the part, we have been accused of never meeting a weapons system we did not like, always trying to perpetuate them into infinity. This year Secretary Cheney did his job. He deserves a lot of credit for his courage in proposing necessary terminations. We do have some terminations in this bill, but they are well thought out and a lot of work went into them by the administration, by the Department of Defense, and by the Congress.

I have a particular area of concern in the bill that we cut some 22 percent from the President's request for the strategic defense initiative. Regardless of dramatic improvements in relations with the Soviet Union and the changes that may be taking place there, I think that SDI offers the real possibility of reducing future threats. A cut of this magnitude will clearly slow down this critical program. It is gratifying to note that the bill makes a significant contribution to the detection and monitoring of aerial and maritime transit

of illegal drugs. In fact, there is a 50-percent increase over the amount for fiscal year 1989, from $300 million to $450 million. I am very pleased with that because the Defense Department resisted getting into an effort to help monitor drug traffic and trying to help us with this tremendous problem. At least this year the administration, and the Congress agreed to go forward with using the military in fighting the war on drugs. It is clear that future defense budgets will be influenced by recent events in Eastern Europe, but I think we should be very careful to look at our long-term commitments and keep in mind that force levels should be based in potential Soviet capabilities, not on intentions which are subject to change or which may not ever, in fact, go into effect.

In conclusion, I again want to congratulate the committee for the work they did. I think we basically have a good bill and we should support it and go forward to the appropriations bill.

I will be glad to yield 4 minutes to the distinguished Senator from Washington.

The PRESIDING OFFICER. There are 2 minutes left.

Mr. LOTT. The remainder of the time.

Mr. GORTON. Mr. President, seeing no one else on the floor desiring to speak, I ask unanimous consent for 5 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GORTON. Mr. President, this final discussion of the defense authorization bill for 1990 is in my view a time for looking back with gratitude at the efforts of many in the Senate and forward to the difficult challenges of 1991.

The bill itself is a culmination of more than 8 weeks of work in a conference committee, a conference committee which took longer on this bill than did the liberation of East Germany by its own people.

That conference lasted so long and was so deeply divisive for two sets of negotiations; funding for the President's strategic nuclear modernization program, and the desire of the administration to terminate a number of other significant programs.

By and large, Senate negotiators were successful under difficult circumstances. Both the distinguished Senator from Georgia and the distinguished Senator from West Virginia deserve more credit than any of us can possibly give them on this floor for their diligence, for their patience, and for their firmness during the course of those negotiations.

Nevertheless, we have ended up with a bill which, in my view, given the amount of money we have altogether does not deal sufficiently with the problem of strategic modernization and which does spend too much money on programs which are no longer needed.

We will, however, at least be able to go forward into the debate next year with a strategic nuclear modernization program in SDI, with respect to the B-2, with respect to mobile missiles, which will allow us to make intelligent policy decisions in that connection.

The distinguished Senator from Virginia, looking forward now, mentioned the fact that for 5 consecutive years the actual real dollars for the defense budget have declined. He made a plea that we not overlook the very real needs for national defense during the coming years.

Mr. President, I think we have to look at reality. It is my view that the actual defense authorization next year will be fortunate if it is within $10 billion in nominal dollars of the amount we are spending this year. I believe that next year we are going to have to make many very difficult decisions which we have managed to avoid during the course of this year. We will make those decisions, of course, because our defense programs have been successful, because this country is strong, and because it is confident we have seen extraordinary changes in the East bloc, but we are now going to have to react to those changes ourselves.

The people of the United States are going to demand a defense dividend, and no task can be more important, not just for the chairman and for the ranking minority member of this committee, but for the committee, for the President, for the Senate, and for the country to determine how it is that we can continue our national security, continue absolutely necessary modernization and at the same time deal with striking reductions in defense budgets in years in the future. Those challenges will cause to pale into insignificance the kinds of problems and challenges we have faced this year, but they are challenges we are allowed to make not because of the failure but success of the American defense policy over the course of the last decade.

The PRESIDING OFFICER. The Senator from Georgia has 26½ minutes.

Mr. NUNN. Mr. President, I yield to Senator EXON who is one of our most valued and most diligent members of the committee. He has the responsibility of the Department of Defense strategic programs. He has the production of the nuclear weapons, DOE, and he has other matters that are enormously important. I do not know of anyone who is more conscientious and works more diligently than the Senator from Nebraska.

Mr. EXON. Mr. President, I rise in support of passage of this conference agreement on the Defense Authorization Act for fiscal years 1990 and 1991. As the chairman of the Armed Services Subcommittee on Strategic Forces and Nuclear Deterrence, I participated in the ordeal which was this conference. I reluctantly conclude that this is an agreement which we should accept.

However, I have many reservations about it both in regard to its content and the manner in which it was developed.

First, with regard to content, I am satisfied but not enthusiastic about the agreements reached on strategic programs. In particular I remain concerned that the House's reluctance to fund the B-2 bomber at the level approved by the Senate. The compromise will ultimately increase the unit cost of the B-2 and possibly make it unaffordable.

Unable to kill the B-2 outright this year, the House has instead selected a back-door method whereby the cost of the aircraft is deliberately increased to the point of possible unafforability. The House has set in motion a self-fulfilling prophecy which should fool no one.

Mr. President, I remain convinced that, with the extensive Senate safegaurds prohibiting the spending of money on the B-2 until that plane passes its test. The Senate funding levels were wiser economically and strategically.

The House's flip-flop on ICBM modernization, as evidenced by a series of conflicting floor votes, is also worrisome. There is no strategic foundation to what the House wants in the area of nuclear deterrence.

The SDI figure is lower than last year's number but not disastrously so. Simple economics dictate that we can no longer afford the SDI buildup of the past years. But again, given its choice, the House would have destroyed this program as well.

I am also disappointed that the House has insisted upon overruling the Secretary of Defense on program termination decisions. Let me state clearly for all Americans to understand, we have a Secretary of Defense who made tough decisions, terminated lower priority programs, and favors smaller but better prepared Armed Forces. The Congress, however, in its inability to distinguish between short-term constituent concerns and long-term national interests has viewed the defense bill as a jobs and social welfare bill.

That is highly irresponsible and ensures more inefficient defense spending in the future—the exact opposite of what every Member of Congress decries with a righteous voice. I simply cannot understand such shortsightedness and duplicity.

Turning to the process of getting an agreement, I find myself even more despondent. The House always appoints a horde of outside conferees.

This year, however, it out did itself. Sadly, the House Armed Services Committee, as an institution, is being dismantled by conflicting elements within that body. By appointing outside conferees with an interest in only one particular issue, the House has created an environment in which their positions must prevail or there is no bill. Our procedures give only veto powers to the President not individual Members of Congress. Democracy is not meant to work in that way.

Mr. President, what I witnessed was a sad lesson in democracy gone sour.

Having expressed my disappointment with the torturous route taken by the conference and the poor decisions made, let me say that, under these circumstances, the Senate conferees did as well as could be expected. Senators NUNN and WARNER should be applauded for their patience, persistence, and negotiating skills. I doubt that anyone has had to contend with as much since the Panmunjon peace talks ending the Korean war. I urge my colleagues to support this conference agreement and hope that the President will sign it into law.

Mr. NUNN. Mr. President, I yield myself such time as I may need to complete my statement.

Mr. President, a few minutes ago the Senator from Alaska, who is a strong supporter of national security and is a very effective member of the Appropriations Committee, made a statement about a certain provision as an example of restrictive language that the Armed Services Committee puts in its bill. The statement he made was in reference to section 351 which provides for a limit on how much money can be expended above $517,800,000 until such time as a report is submitted by the Department of Defense. This is in the account called environmental restoration.

The Senator from Alaska indicated he feared certain projects might not be able to be funded and completed or even started because of this provision. I have two or three observations on that comment by my friend, the Senator from Alaska.

First of all, the administration requested only $517,800,000 in this account. The language restricts expenditures above that amount. So everything they requested can be done even absent the report.

The second point I make is that they can get the report in and then they will be able to spend even more than they asked for because we increased that account by $83 million.

There is another section, section 301, that authorizes $601 million for this account. So we believe it is a very important priority, environmental restoration. We think it is the duty of the Department of Defense to be very forthcoming and diligent in this respect. There are many areas that have to be attended that have been neglected too long. So there can be no interference with any of the administration's requested projects because we have funded everything that they asked for and gave them an additional $83 million.

The only thing we are really saying in this section is before you spend the extra money you did not ask for, give us a report on what you are doing with the money you did ask for.

Two other observations on the comments of the Senator from Alaska. The Appropriations Committee did not exceed this amount, so there has been no effort by the Appropriations Committee to go beyond the $601 million. In fact, I am told by staff that their number tracked our number of $601 million

The Senator from Alaska said that they were impeded from going over because that would be going over an account. We welcome that because if that is the case, then the strong point we have made over the years about the Appropriation Committee being obligated to respect our ceilings in accounts is being taken seriously, and we thank the Senator from Alaska for that.

I must say, though, that there are six other accounts. And I am not complaining here. We have and are going to work very closely with the Senators from Hawaii and Alaska, but there are six other accounts where they did go over including Army aircraft procurement, shipbuilding, and Army ammunition.

Based on that track record, it is my belief they must have agreed with our amount for environmental restoration. Otherwise, based on these other account ceilings they exceeded, I think they would have done so here as well. So I just wanted to deal with that subject. I believe that we and the appropriators are in agreement on this account.

We have some differences on technical language. We have some differences on university set-asides but that can wait another hour for debate when the Appropriations Committee bill comes up.

In general, we worked very carefully with the Appropriations Committee this year. We tried to keep them fully informed of our position. We have invited them to our meetings in accordance with the agreement we have entered into with them. We have eliminated on the floor of the Senate all floors. We are supposed to be a ceiling.

The authorization level is a ceiling, that is, they are not supposed to exceed the authorization level. Neither are we supposed to put floors in saying they cannot go below a certain level. They are able to cut and should be able to cut below our levels. They have that right. So we have eliminated every floor in the bill that we have known about. We did it when we came on the floor of the Senate with the original bill out of committee. We worked very closely with the Senator from West Virginia, the chairman of the Appropriations Committee, Senator BYRD. We had an amendment that specifically eliminated all floors because we, frankly, did not intend to put them in to begin with, and, second, even those that may have been intended by a certain member should not have been in there.

So we eliminate it. We try to keep all those floors out in conference. The House had all sorts of floors in their bill. We told them we could not bring back any floors because that would breach our understanding with the Appropriations Committee. We thought we had accomplished that. We believe we largely did accomplish it.

But we found three places that could be construed as floors, and we have taken the step of going with a concurrent resolution that the House has already passed, and at our request they passed that particular part of it—we are going to pass it here hopefully today—which eliminates those three floors. So we are trying to live up to our obligation. We regret there were three errors made here.

The Senator from Alaska sent us a letter citing I believe 21 or 22 provisions that he believe to be in violation of the agreement we entered into. I will not go into all the details on that. We disagree on all but three. We think the other 19 are either ceilings or fences. Those are matters that we always do in the authorization committee. We have every right to have a ceiling. That is what an authorization bill is.

Second, we have every right to put fences about the expenditure of money. For instance, the B-2; we have a fence on the B-2 bomber as to how much production money can be spent before certain tests are completed. We have done that year after year after year. In fact, most of those provisions that the Senator called to our attention were in the original Senate bill and were not complained about by anyone after reviewing that bill when we were on the floor debating it for several weeks. So I did want to make those positions clear.

I want to end by thanking the Appropriations Committee for the work they have done. They worked very hard. They work long and hard, as we do. They have completed their conference. We will be dealing with that bill at a later point, I hope this week.

Mr. President, are there any other Senators who wish to speak?

Mr. KERRY addressed the Chair.

Mr. NUNN. I would like to accommodate the Senator from Massachusetts.

I yield to him. How much time do I have remaining?

The PRESIDING OFFICER. The Senator has 18 minutes.

Mr. NUNN. I yield to the Senator.

Mr. KERRY. May I take such time as I may need, and then I will yield.

Mr. NUNN. I will yield up to 10 minutes in the hopes he can cut it short. We are trying to get to a rollcall.

Mr. KERRY. Mr. President, I thank the distinguished chairman of the Armed Services Committee. I know he is trying to proceed rapidly here.

STOP THE FIGHTING IN EL SALVADOR—NOW

Mr. KERRY. Mr. President, today, as we listened to Lech Walesa talk about the changes in Eastern Europe, particularly in Poland, all of us stood up and applauded particularly when he talked about the ability of that country to undertake change without violence, without breaking windows, without confrontation; a change obviously of enormous consequences when measured against the tanks and the oppression that had previous reform efforts in Eastern Europe.

Mr. President, El Salvador's warweary and long-suffering population is now being subjected to another spasm of violence as a rebel offensive has taken the war to the barrios and residential neighborhoods of that nation's capital.

This is but another of the seemingly unending tragedies to afflict the innocent of that strife-torn nation. Just this past September, hopes both in El Salvador and abroad, were raised when representatives of the Government and the FMLN agreed, in Mexico City, to a framework for negotiating a political solution to that nation's civil war. However, maybe it was too much to expect that the aspirations and desires of the vast majority of the Salvadoran people for peace would be heeded by the radical extremists of the right and the left. That agreement in Mexico City appears only to have served as an inducement to these radical minorities to pursue their deadly, dirty work in earnest.

The simple fact of the matter is that a small minority on both the right and the left do not want a negotiated political solution to El Salvador's decadelong war. And the last thing that concerns them is how many civilians will have to be murdered brutally in order to accomplish their ends.

Late yesterday President Oscar Arias Sanchez of Costa Rica issued a moving statement calling for the warring parties to return to the negotiating table immediately and commit themselves to ending the suffering of the people of that country. President Arias, the winner of the Nobel Peace Prize, and an eloquent and persistent advocate of dialog, negotiation, democracy and peace brings a moral standing to the issues of peace and war in Central America that cannot be challenged. For this reason, I hope my colleagues will listen carefully to what President Arias had to say. More importantly, it is critical that the armies of the warring parties in El Salvador heed his words. I want to take a moment to share his statement verbatim.

President Arias stated:

Once again, senseless violence assaults the sister nation of El Salvador. There is no justification for the continuation of violence. The people of the world are weary of aggression and destruction that leads nowhere. The Berlin Wall that now falls is the best symbol of an era in which nazism, fascism and communism shaped the dogmas that have caused the greatest harm to the history of mankind.

Those dogmas that feed the fanatic spirits of a few no longer inspire sympathy, least of all that of the young people who, time and again were betrayed by their idealism and made the first victims of violence.

I strongly, and without hesitation, condemn the military offensive of the Farabundo Marti National Liberation Front. Today, the number of mothers, wives, and Salvador children in mourning is great. Civilized humanity rejects the foolish justification of violence as an instrument for demonstrating strength in negotiation.

The Central American agreements for peace are based on the legitimacy of governments and the need for insurgents to be integrated into the political process with guarantees for the full respect of their rights. In order to carry out the commitments that make up the plan for peace in Central America, I asked the Nicaraguan Contra to renounce armed struggle or abandon Costa Rican territory. I believe that all Central American governments should take a similar initiative. I urge those who signed the plan for peace to honor their signatures by fulfilling their commitments. I urge them to cease all support of those who practice violence as a form of political action.

The plan for peace of the Central American people represents the sentiment of the majority of our nations. It is time for fanatical minorities, regardless of ideological leaning, whether that of the government or that of the opposition, to stop obstructing the road toward peace that is longed for by worker and businessman, mother and child.

I call for the immediate return to the dialogue that was scheduled to take place in Caracas between the authorities of the Salvadoran Government and the guerrilla forces. I am firmly convinced that more courage is needed to make peace than to wage war. I believe that the recent dialogue between the two parties has been one in which there has been much talk, but little listening; dialogue that has been characterized more by intransigence than by tolerance, more by distrust than by mutual respect. I urge the Farabundo Marti National Liberation Front to attend the meeting in Caracas unequivocally committed to agree on a cease-fire that will allow the negotiation of the conditions under which the insurgents will be integrated into the political life of El Salvador.

I call upon the parties to agree to a cease-fire, a cessation to that violence which kills, and kills without remembering that through peace there can be a better future for all Salvadorans.

Mr. President, neither side comes to the negotiating table with clean hands. And those who are desirous of an end to the bloodshed, who are desirous of a negotiated political solution in that country, and those who are desirous of political, social, and economic opportunity for all Salvadorans understand this reality all too well.

For those who are concerned about human rights abuses, we condemn those abuses, no matter who perpetrates such abuses on behalf of whatever ideological causes. The ends do not justify the means. There is absolutely no difference between the indiscriminate killing by the Salvadoran Armed Forces using helicopter gunships and bombs, than the killing and maiming of innocent civilians by guerrilla land mines placed indiscriminately throughout the countryside. There is absolutely no difference between the Salvadoran Armed Forces firing purposefully into the crowds of peaceful demonstrators, and the guerrillas establishing military strongholds in heavily populated areas. There is absolutely no difference between the operations of right-wing death squads murdering labor and peasant leaders, church workers, political figures, and human rights advocates and the left wing death squad murdering mayors, politicians, intellectuals, and the children of army officers.

Unfortunately, neither side in the Salvadoran conflict can claim the moral high ground. Unfortunately, the armies of the adversaries argue over who cast the first stone or the last stone, indifferent to the growing human toll they are exacting among the innocent civilian population.

The talk is not of peace, but of retribution. The actions are not of confidence-building and reciprocal measures, but of provocation and polarization by both sides.

It is time for those of courage on both sides to step forward and lead El Salvador to peace. There are already too many cowards hiding behind guns on both sides. It is time for the will of the people of El Salvador to be respected and supported. For far too long the people of El Salvador have been used as cannon fodder by the idealogues of the extreme right and extreme left. Anyone, right or left who believes that violence is the only path to pursue cannot claim the hearts and minds of the people.

For the Government, it is imperative that it exercises restraint in the use of military force. The Air Force should be grounded. It should not be allowed to bomb and strafe rebel positions in heavily populated areas, thereby endangering the lives of numerous civilians. To use such force in such a manner would only play into the hands of the extremists on both sides.

The military should seal off these neighborhoods, call upon the FMLN to allow the civilians who desire to do so, to leave. Red Cross and Green

Cross workers should be allowed to tend to the needs of the wounded civilians.

This crisis is a test of who controls El Salvador—the extremists, or those on both sides who place the safety and well-being of the people above their own personal ideology and personal agendas.

The winds of change are blowing with increasing force around the world. These are the winds of political, economic and social liberalization. These are the winds of negotiation and dialogue, the reduction in tensions, the avoidance of confrontation, the tending to human needs. The ancient rites of barbarism have no place in today's world, not even in El Salvador.

It is time for a cessation to the hostilities. It is time to return to the negotiating table. It is time for both sides to agree, without preconditions, that a cease-fire will be implemented. It is time to undertake the step-by-step process of confidence building measures that can lead to a comprehensive, political solution to that Nation's tragic crisis. It is time to heed the words of a peacemaker, President Oscar Arias Sanchez of Costa Rica, who yesterday stressed:

The plan for peace of the Central American people represents the sentiment of the majority of our nations. It is time for fanatical minorities, regardless of ideological leaning, whether that of the government or that of the opposition, to stop obstructing the road toward peace that is longed for by worker and business, mother and child.

I ask unanimous consent to have an Americas Watch release printed in the RECORD at this point.

There being no objection, the release was ordered to be printed in the RECORD, as follows:

NEW YORK, NEW YORK, November 14, 1989, 6 pm EST: Americas Watch called on the U.S. Ambassador to El Salvador, William Walker, publicly to urge the Salvadoran Armed Forces to avoid indiscriminate attacks upon civilians and civilian objects, and to take all precautions to assure that civilians are not wounded. Americas Watch noted that Ambassador Walker had been quoted as indicating that there was no way that the Army could evict the guerrillas from San Salvador guerrilla-held shantytowns without producing many civilian casualties. Americas Watch is alarmed by press reports that heavily-populated urban neighborhoods are being strafed by armed forces helicopters, despite the presence of civilian families unable to escape from their homes.

Also, Americas Watch remined both sides, the Salvadoran Armed Forces and the FMLN guerrillas, that the rule of proportionality, under the Geneva Conventions, requires both sides (1) to do everything feasible to verify that the objectives to be attacked are neither civilians nor civilian objects, (2) to take all feasible precautions in the choice of means and methods of attack with a view to avoiding, and in any event to minimize, incidental loss of civilian life, injury to civilians and damage to civilian objects, and (3) to refrain from deciding to launch any attack which may be expected to cause incidental loss of civilian life, injury to civilians or damage to civilian objects which would be excessive in relation to the concrete and direct military advantage anticipated.

Americas Watch noted, and called to the attention of the FMLN as well as the Salvadoran Armed Forces, the provisions of international humanitarian law that forbid the parties to the conflict to direct the movement of the civilian population or individual civilians in order to attempt to shield military objectives from attacks or to shield military operations. Under the laws of war, civilians may not be used to shield military objectives from attacks or to shield, favor or impede military operations.

Americas Watch urged that effective advance warning be given of attacks which may affect the civilian population, and that civilians and wounded combatants be permitted to evacuate the currently contested areas, where possible under appropriate international protection. Under Protocol II to the Geneva Conventions, the parties are obliged to ensure the adequate care of the wounded, whenever circumstances permit. Preliminary reports from aid workers indicate that both sides have impeded the evacuation and thus the treatment of the injured.

Reprisals against the civilian population also violate the rules of war, and both sides were urged by Americas Watch to respect the lives and physical integrity of wounded and captured combatants.

Mr. NUNN. The Senator from West Virginia is on the floor. He is a very valued member of the Armed Services Committee, and chairman of the Appropriations Committee.

Does the Senator from West Virginia desire time?

Mr. BYRD. I would appreciate some time.

Mr. NUNN. I yield 5 minutes.

Mr. BYRD. I thank the distinguished chairman of the Armed Services Committee, my friend, and one of the most outstanding Senators that I have seen come to this body in my 31 years here.

I take this occasion to say something that may surprise Senator NUNN, but it should not surprise others of us. I have had the opportunity to study the history of this institution. I am not a historian, but I try to be a student of history.

Niccolo Machiavelli, born in 1469 in Florence, Italy, grew up under the rule of Lorenzo the Magnificent. Machiavelli was once selected secretary to the Second Chancery to the Republic of Florence.

He acquitted himself well and proved himself to be a very capable individual. He had charge of the military and foreign services. He was later exiled to a little place in the country, and while he was in exile, he wrote some notes.

Each morning when he arose, he would go out to the woods and talk to the woodcutters. Then he would go down to the inn and talk to the landlord and the butcher and a couple of the bricklayers and the miller. Then he would go back to his little place in the country. In the evenings he would take off his mud-stained country dress and put on his royal attire and go into his study, where he would "converse" with great men. He would ask questions of these great men. He touched hands with the great through the books in his library, and he made notes for those who aspire to political office. He wrote "The Prince," and his intention, presumably, was to give these notes to Lorenzo the Second, but he died without publishing his notes.

His book became a handbook for aspiring politicians. In this book, he told the prince to study history. He said, select someone as an idol, and try to emulate him, as Alexander the Great did Achilles, and as Caesar did Alexander the Great, and as Scipio Africanus did Cyrus the Great.

My point here is that he said to study history. Well, I have tried to study history in recent years, and I am sorry I did not spend more of my lifetime studying history. But I have studied the history of England and am continuing to do so, and one day I may make some extended remarks in that regard, to point out how much we owe our English motherland for our Constitution and for many other things.

In my study of the history of the Senate, I have had an opportunity to walk, as Machiavelli did, with great men—the great men who spoke in this Chamber in years gone by, and in the old Chamber down the hall, and in the older Chamber down on the floor beneath where we stand today.

In doing so, I have, in my own mind, tried to picture those Senators today who might very well have graced the Senate of the past. There has never been a new Senate, because two-thirds of the Senate always carries on, unlike the other body, where, in theory at least, and under the Constitution, there can be a brand new body enacted every 2 years.

But not here. This is a continuing body, and it will be thus until the crack of doom. There will never be a new Senate.

It continues, like the waters of a spring, to refresh itself over time. The old waters go out to the sea and new waters trickle from the hills into the spring. That is the way it is with the Senate.

In my own mind I have tried to evaluate and analyze as to whether or not there are Senators today who very well could have graced the Senate of 1789, in the First Congress, or the Senate in 1850, or the Senate in 1859 when 64 Senators came from the Chamber down the hall to this new Chamber, or who could have stood here during the Civil War years or during the reconstruction years or during the early part of this century while Senators were still being elected by the State legislatures, or who could

have been here during the Great Depression, or the New Deal years, or the years of World War I, or World War II, and who might very well have been one of the strong guiding lights of the Senate in any of those periods of history.

Of course, there never will again be, I suppose, Senators who could stand as orators in the place of Henry Clay, Daniel Webster, John C. Calhoun, or Thomas Hart Benton. Yet, we must remember that even Webster took his speeches to the boarding house and edited them, and, in my volume II, "The Senate, 1789–1989," I will show that in his debate with Hayne, a speech that schoolboys and girls all over this country memorized for decades. It was not the speech, in several respects, that he had actually delivered. Webster was a good writer and had edited it, and it did not come out altogether as he spoke it. That does not detract any from his great presence and his tremendous ability as an orator.

But there are Senators other than that great triumvirate who were great Senators, and that brings me to my point. I say this because I believe it; I mean it. There are some Senators in this Chamber today who could very well have deported themselves well in any period of the history of this country in this body and who would have been recognized as great Senators in any age, and one of those, in my own mind, is SAM NUNN. There are others. But it becomes an invidious exercise to begin stating names, because where does one stop? What about those Senators who are not named? So, there are others, but I shall leave it at that for the time being. I may elaborate a little at some future time. But SAM NUNN is one who, in my judgment, could very well have been an outstanding and great Senator in any period during these 200 years.

Would the Senator now yield me 5 minutes for the purpose for which I first began?

Mr. NUNN. Mr. President, after that comment by the Senator from West Virginia, which happens to be the highest compliment I have ever heard made in my tenure in the Senate, not just because of the words, but because of the individual who spoke the words, and I mean that, I will say to the Senator, after those comments, I will yield him the remainder of my time.

Mr. BYRD. I do not want to take the remainder of the Senator's time. How much time does the Senator have remaining?

The PRESIDING OFFICER. All time has expired.

Mr. NUNN. Not a very big concession, Mr. President.

I will ask the Senator from Virginia if he has time he could yield.

Mr. WARNER. Mr. President, I think we should yield to the distinguished Senator from West Virginia such time as he deems necessary to complete his remarks. I ask unanimous consent for that purpose.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. Mr. President, I thank the distinguished senior Senator from Virginia, my very warm friend, Mr. WARNER, for his kindness.

I ask unanimous consent that I be permitted to speak for 5 minutes without charging the 5 minutes to anyone.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. Mr. President, I commend the distinguished chairman and the ranking minority member of the Armed Services Committee, Senator NUNN and Senator WARNER. It is a great team; they work well together, they are both able men, and they have the interest of their country at heart, and we all know that.

I also compliment the other members of the conference committee on the Defense authorization bill.

I know that this year's conference has been one of the most difficult and contentious in recent memory. The bills passed by the two Houses represented fundamentally different approaches to national security. I know how hard our conferees worked to secure a compromise that would be acceptable to the House and the President without undermining the Senate's position. So, I thank Chairman NUNN and Senator WARNER for their dedicated efforts in this regard.

I personally appreciate the efforts made by Chairman NUNN to work closely with the Appropriations Committee throughout this tedious process. I know that he has made an extra effort to ensure that nothing in this bill infringes on the prerogatives of the Defense Appropriations Subcommittee or the full Appropriations Committee.

And just as I would not want any Senator to infringe upon the prerogatives and the authorities of the Appropriations Committee, I would not want the Appropriations Committee to infringe upon the authorities and rights and powers of any other committee.

I know that Senator NUNN has made this extra effort. He has shown unusual sensitivity to the relationship of the two committees and has gone to extraordinary lengths to accommodate the Appropriations Committee members and staff.

I also applaud Chairman NUNN for his continued leadership in all aspects of national security policy. He is considered by most, if not all, and certainly by this Senator, to be the Senate's preeminent expert in this area. This past week he further demonstrated the kind of insightful analysis which earned him this reputation. In remarks to the Democratic Leadership Council, remarks which appeared in the Washington Post on the 14th of November, he cautioned President Bush to be prepared for dramatic arms reduction proposals from the General Secretary Mikhail Gorbachev at their upcoming meeting. He questioned how the United States would respond if Gorbachev offers to remove all foreign troops from Europe. He went on to discuss other fundamental questions about our overall military posture in a changing world.

It is unfortunate that such a warning is necessary. We have been dealing with Mr. Gorbachev and his surprise announcements since 1985, but he always seems to have the ability to catch us off guard. I would hope that in the future we can start anticipating some of his initiatives and preparing some of our own. Chairman NUNN is already doing this. Included in this authorization bill are sections calling for the Secretary of Defense and the President to report to the Congress on conventional force requirements in a rapidly changing environment and to evaluate various scenarios for mutual reductions in conventional forces. Again, Chairman NUNN, in crafting these provisions, is asking the questions we need to have answered before we can make long-term decisions about our defense budget. These are excellent provisions and will contribute greatly to our deliberations next year.

Just a few years ago no one would have predicted the rapid changes taking place in the world today. It is too late this year for much of what I hope we can eventually accomplish. But, I hope we can convince our allies, not only in Europe, but also Japan and Korea, to shoulder more of the burden for their own defense. I hope we can conclude delayed negotiations over chemical weapons and nuclear testing.

Mr. President, we are witnessing an amazing transformation in the world today. I think this authorization bill provides the necessary funding for our national security needs and again I compliment the conferees and compliment, most heartily, Senator NUNN and Senator WARNER.

Mr. President, I ask unanimous consent to have printed in the RECORD the statement by Senator NUNN to the Democratic Leadership Council Conference on November 13, together with the Washington Post article entitled "Nunn: Bush Can Expect Soviet Proposal on Troops."

There being no objection, the material was ordered to be printed in the RECORD as follows:

RETHINKING AMERICA'S ROLE IN THE CHANGING WORLD

My challenge is to talk about events in the Soviet Union and Eastern Europe in about 6 or 7 minutes, and I'm going to watch the clock very carefully. Let me start by saying that these comments are about as ad hoc and unstructured as the events themselves

in Eastern Europe, so I hope you put them in that context.

The way I would describe the events that we've witnessed in 1989 is that they are historic, they are unprecedented, they were unpredictable. I think the title I would use would be the one that Alvin Toffler used a few years ago when he wrote his book, "Future Shock." "Future shock" is where we are not with these events.

Who could have imagined that the leaders of the union called Solidarity, who were trying to stay out of prison about a year ago (and many of them were in prison), would now be leading the government in Poland? Who could have possibly imagined that in Hungary they would have cut down the fence separating Austria from Hungary and thereby opened up, in effect, the "back door" of the Iron Curtain? Who could have imagined that in the Soviet Union itself they would have abandoned Afghanistan in the physical sense (even though they are continuing to support it, of course, with tremendous goods and supplies)?

Who could have imagined that the Foreign Minister of the Soviet Union would have denounced his own government's action as immoral in terms of the invasion of Afghanistan? Who could have imagined that that same Foreign Minister would have said before the whole world that the ABM Treaty had been violated by the Soviet's positioning of a radar at Kraznoyarsk? Who could have dreamed that Sakharov, a few months ago in exile, would be in the Soviet leadership in Parliament—in effect, leading much of the opposition? Who could have imagined that just in the last few days the Iron Curtain would have been turned to Swiss cheese in East Gurmany and East Berlin? What should our response be to these events that I have titled "future shock?"

First, I would say that we have to have a sense of history. Second, I would say we have to have a vision of the future. It is not easy under these circumstances. Looking at history, I think we should note, particularly with the emphasis on the Wall coming down, the Cold War between the East and West started a number of years before the Berlin Wall was built in 1961. The building of the Wall was a very significant event, a cruel event, an inhuman event, and a stark reminder of the difference between freedom and totalitarianism, but it was not the beginning of the Cold War. That started years before under Stalin.

Second, I think we ought to remember in history that the United States and our allies, basically starting in about 1942 and continuing until about 1948, 1949, offered a number of opportunities to the Eastern bloc. We proposed the United Nations as an instrument for conflict resolution. We proposed the International Monetary Fund as an instrument for economic cooperation and we invited the Soviets to join. We proposed the Baruch plan, basically saying we were willing to work with them in controlling nuclear weapons. Stalin rejected each of these proposals without even giving them consideration. He pursued and his country pursued, under his leadership, unilateral advantage and, in many cases, confrontation.

Now that is changing dramatically. Gorbachev has changed the scene dramatically. I think we can say without any doubt that Gorbachev is a political genius—a long way from being an economic genius, as we all know, and those events and challenges remain ahead.

But what should the United States' response be to these startling events in Eastern Europe and the Soviet Union? I would say, number one, that we should not view this as a public relations contest—not a public relations contest at all, not whether George Bush has scored today or whether Gorbachev has scored today.

Number two, I think that we should not view this as a zero sum game. This is one of those rare times in human history that all sides and all peoples can come out winners if we act with wisdom.

Finally, I would say that we should view Gorbachev's actions in recent months not as new offers to the U.S. and our allies, but rather as a response to our forty year-old offer that has been outstanding all of these years without acceptance by the Soviet Union. I think we ought to pronounce that we now have after 40 years a conceptual agreement—an agreement in concept—and that we now are going to insist on performance and watch that performance very closely.

In terms of specifics, I made about a 35, 40 minute speech in London back in September (at the International Institute on Strategic Studies) about what I thought we should do in terms of responses both in Eastern Europe and in the Soviet Union. I will spare you that lengthy set of remarks today. Let me see if I can summarize it very briefly.

I would divide our reactions to the Soviet Union into three parts: one, a red light; second, a yellow light (a caution light); and third, a green light. Without trying to include all the red light areas, let me just say that one area that we should give a red light to in responding in any action that would be much more difficult for the West to reverse than for the East to reverse. I would include in that set of red light signals the denuclearization of Europe. If we do that, it's going to be virtually irreversible politically. So we need to watch that one very closely.

I would also include on the red light list the sharing of key technology that is militarily very valuable to the Soviet Union. (Representative Dave McCurdy already alluded to that.) We certainly need to narrow our list of what we protect. We need to narrow it rather dramatically, and not because of recent actions, but because the only way you can really protect something in this age of high technology is to have a narrow list and then to concentrate on protecting that list well.

On the cautionary light side—the yellow flashing light—I would say that we need to offer the Soviet Union a chance to be an observer in the International Monetary Fund and other international financial organizations, provided they continue to move towards a private sector and towards real prices and a freer market.

I would include on the green light list the areas of arms control which are many; numerous—conventional arms control, strategic arms control, chemical arms control, and others. I would also include on the green light list cooperation on regional issues, which we are making some progress in with the Soviet Union, but we have a lot of regional issues that have not yet even been addressed.

I would also say that it is time for us to seriously consider a waiver of the Jackson-Vanik amendment for 2 or 3 years. The immigration policies in the Soviet Union have dramatically changed. It is time for us to acknowledge that. I would not take that off the books because we don't know when they are going to reverse, but I think a waiver is in order.

I would also say that we need to cooperate with them, trying to find new roads of cooperation in the whole area of terrorism where we are beginning to have more of a mutual interest. Also, most importantly, in the area of environment. This is an area where the world has a common stake. We ought to make that very clear through our leadership. I would say exchanges, like George Mitchell mentioned a few minutes ago, with the legislative branch, which is newly emerging as a more independent group in the Soviet Union, are enormously important.

Finally, on the economic side, I believe that any time they are moving towards private enterprise and the private sector we ought to be willing to assist them with know-how and with managerial, entrepreneurial skills.

We heard a social panel today I thought was absolutely superb. The bottom line there, in many cases, they said that government should get out of the way. Perhaps one of the best things we could do economically vis-a-vis the Soviet Union in this set of circumstances is for the Government to get out of the way (except in certain areas) and let our private sector do its own thing. If the private sector is risking its own money that will have a disciplining effect on our efforts and perhaps a real impact on fundamental changes within the Soviet Union.

Turning to the question of Germany, I would say last week was probably the most significant week that we've had since World War II. There are many German questions that come as a result of these rapidly flowing events. The first fundamental question is, will there be free elections? If there are free elections, then there will be freely elected leaders in the country we call East Germany. But what will the people want in East Germany? It's very hard to ascertain that now because we don't have freely elected people. Under that question, is there a sense of identity in East Germany—is there a sense of identity with that state that transcends Communism? We don't know the answer to that. Probably not, but who knows until we see free elections?

Second question. Do the East Germans really want reunification, or do they want a non-Communist, but separate, state? (And I think it's apparent that certainly they don't want a totalitarian, Communist regime.) Do they want all Soviet troops removed from their soil? Probably so. But these questions have to be addressed by the East Germans themselves.

Another major question. What will change the Soviet Union's position on reunification? They are certainly against the reunification of the two Germanys now. A key component of that—and perhaps President Bush and all of us need to do some thinking about this because it may come up sooner than we think since everything is coming up sooner than we think—is, how would the United States and our allies respond if Gorbachev offers to remove all foreign troops from all European countries within a period of a few years? How would we respond to that? We had better start thinking about it.

On arms control, without getting into the details of that complicated, complex subject, we have to ask the fundamental question: are these events out-pacing our arms control proposals—which we felt were rather far-reaching even two or three months ago—or do we need to think more conceptually and much broader in the arms control field? We have agreements in concept on conventional arms control for equal ceilings, a fundamental, very important breakthrough. All of us want to see that

come into fruition, because if it does, then there is real hope for reducing from those equal levels down to dramatically lower levels. But agreement in concept and putting a final agreement together are two different things. It is awfully hard to get the details down on a piece of paper. It is very difficult. Admiral Crowe said that completing arms control agreement is somewhat like chewing horsemeat—the more you chew, the bigger it gets. [Laughter.] So we have to ask that question.

Finally, the reaction of our allies. This is a standard line, but it probably applies to others, too—it has been said over a period of time that some of our allies (like the French) like Germany so much they want to keep two of them! So we have that to consider.

The bottom line is that all these events are swirling around us. We have a summit conference coming up between President Bush and President Gorbachev in the near future. We cannot afford to be ill-prepared at the summit conference. We simply cannot afford another Reykjavik in this set of circumstances where the world will be watching for, not agreements necessarily, but every nuance that comes from that summit. So the President has to prepare thoroughly. We moved from the Brezhnev Doctrine to what is now called the "Sinatra Doctrine," meaning, as the Soviet spokesman said, "The Eastern European countries can now do it their way instead of *our* way" (meaning the Soviets). We have moved from the Iron Curtain to a curtain of Swiss cheese and we are going to have to have vision to react.

Conclusions. This is a period of instability, but it is also a period of great excitement and great hope. How much better it is to have unpredictability with hope than to have a status quo freezing in the captivity, in effect, of the East Europeans. NATO has coped with confrontation and perhaps the most serious military threat ever envisioned by mankind—we've coped with it very well as an alliance for some forty years. NATO's challenge now is how we cope with a threat that may be dramatically reduced. The post-World War II era has ended. The question is, what new era is now beginning? That is an open question. Totalitarian Marxism has lost. Clearly, Marxism has lost but democracy and free markets have not yet won. We should keep that very much in mind.

The question of East Europe's future is really one that is very much open. One model would be Finlandization—neutralization, in effect. Another model would be Balkanization, which was very dangerous and which led, of course, to World War I. We hope that there will be other models and options developed.

After Stalin repudiated the offer the United States made after World War II, we had a very courageous, very visionary President of the United States by the name of Harry Truman. Harry Truman and our allies established a lasting framework of containment. They established the NATO alliance. They established the Truman Doctrine vis-a-vis Greece and Turkey. They established the Marshall Plan rebuilding Europe and Japan. They established the International Monetary Fund and other international organizations. They established a containment policy containing the Soviet Union, not letting them dominate Europe and Asia. That policy has basically succeeded. America rose splendidly to the challenge of that era. Today's challenge is equal and will require the very best of all of us.

Thank you.

[From the Washington Post, Nov. 14, 1989]

NUNN: BUSH CAN EXPECT SOVIET PROPOSAL ON TROOPS

(By Patrick E. Tyler)

Senate Armed Services Committee Chairman Sam Nunn (D-Ga.) warned yesterday that President Bush must expect and be prepared to counter a possible Soviet proposal to withdraw all U.S. and Soviet armed forces from Europe when he meets with Soviet President Mikhail Gorbachev next month.

In an address to the Democratic Leadership Council, Nunn posed what he said was a critical question for the Bush administration:

"How would the United States and our allies respond if Gorbachev offers to remove all foreign troops from all European countries within a period of a few years? We had better start thinking about it."

After the address, Nunn said in an interview that he believes strongly that Gorbachev, spurred by the political upheavals in the Eastern European countries that comprise the front line of the Warsaw Pact military alliance, will use the seagoing summit to frame a new peace initiative that will catch Washington off guard.

He said he would advise the Bush administration to deal very carefully with any Soviet proposal for massive withdrawals, making sure that Gorbachev defines "how far out of Europe" Soviet troops would be withdrawn.

Nunn cautioned against Bush making a sweepng proposal of his own, such as "the denuclearization of Europe." That, said Nunn, "would be much more difficult for the West to reverse than for the East to reverse."

The Western alliance has relied on its nuclear forces in Europe to make up for the significant numerical advantage of Warsaw Peace conventional forces. NATO military doctrine calls for using battlefield nuclear weapons to repel an all-out Soviet-led invasion of Western Europe.

Nunn's remarks at the forum reflect the rapidly evolving response to the political upheavals in Eastern Europe, capped last week by the opening of the Berlin Wall.

Democratic mass movements that earlier swept Poland and Hungary and, now East Germany, have begun shaping a debate in Western capitals over the redefinition of the East-West military balance between the NATO and Warsaw Pact forces that have faced each other on Europe's dividing line since the end of World War II.

Nunn said current East-West negotiations to reduce NATO and Warsaw Pact conventional forces in Europe may soon come under intense pressure to expand their horizons.

"We have to ask the fundamental question," he said in his address: "Are these events [in Europe] outpacing our arms control proposals . . . or do we need to think more conceptually and much broader?"

Nunn, arguing that the upcoming Bush-Gorbachev meeting has become one of the most important East-West dialogues in years, said, "We cannot afford to be ill-prepared at the summit. We simply cannot afford another Reykjavik," a reference to the October 1986 meeting between Gorbachev and former President Ronald Reagan, who was caught uprepared to drastically reduce strategic nuclear forces.

In other remarks, Rep. Lee H. Hamilton (D-Ind.) said the United States should expect pressure from its European allies to drop plans to modernize short-range nuclear forces deployed in Europe.

Bush earlier this year urged West German leader Helmut Kohl to allow replacement of aging Lance battlefield nuclear missiles, but Bush agreed to a compromise that deferred the issue until 1992 in recognition of strong grass-roots political sentiment in West Germany against nuclear arms.

Mr. NUNN. Mr. President, I ask unanimous consent for 30 seconds.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NUNN. Mr. President, let me thank the Senator from West Virginia for his very kind remarks. They could not have been more meaningful to me. I am indeed grateful. It is a day I will remember for the rest of my, not just my Senate career, but my life.

Mr. HARKIN. Mr. President, I did not vote for final passage of the Senate's fiscal year 1990 Defense authorization bill. Back in August, I considered the DOD bill to be too out of touch with reality. At that time, I felt that this bill represented a continuation of business as usual, a continuation of 40 years of cold war mentality driving massive weapons procurements, far beyond our real defense needs.

Events since August in Eastern Europe have only reenforced the sharp disconnect between the real world and our military procurements. Mr. Gorbachev has demonstrated by word and deed that the Soviet Union will not use military force even to keep Communist governments in power on the east side of the Iron Curtain.

If Mr. Gorbachev will not use military force to keep Warsaw Pact nations in line, how much less likely is he to use military force against NATO nations? The crumbling of the Berlin Wall is just the final symbolic manifestation of the decay of the old order within the Warsaw Pact.

And yet we continue to procure new weapons and to maintain a huge standing peacetime army as though Soviet attack were imminent. While our economy stagnates, while the national debt increases by some $240 billion each year, while foreign nations gradually take over control of U.S. assets, while our cities and our infrastructure deteriorate, we continue to pour $300 billion per year into our military machine.

About 60 percent of this military budget, or $180 billion, is to stop a Soviet military attack in Europe. I am not suggesting that we should unilaterally pull all troops out of Europe next year, or that we should unilaterally disarm. Far from it. If we stop building new weapons now, we would still have the most powerful and capable military machine the world has ever known.

But we should not be adding redundant and destabilizing new weapons

systems. In particular, we should not be building new weapons systems that would slow Mr. Gorbachev's drive to reduce his own military machine.

Our primary goals should be to reduce Soviet military capabilities for offensive attack. Some in the Bush administration are urging restraint, worrying that Mr. Gorbachev might not survive.

But the possibility of Mr. Gorbachev's departure should spur us on to more action, not less. We need to act now, during the Gorbachev window of opportunity, to restructure our military forces. In particular, we should be working with Gorbachev's Soviet Union to move to vastly smaller forces on both sides. Then, if a repressive regime should ever take back control of the Soviet Union, they would not have the offensive forces in place to resubjugate Eastern Europe.

Furthermore, the remaining forces should be restructured into a nonoffensive defense or nonprovocative defense posture: forces would be deployed to defend territory, but would not have the mobility and offensive firepower for massive attacks. In short, we should be working vigorously to establish a stable environment for new democracies to flourish.

I would recommend a gradual reduction of military forces, starting with a 10 percent reduction next year. We could make these reductions unilaterally in the beginning, asking the Soviets to follow our lead. The CIA has already noted a 1.5-percent decline in Soviet military spending this year, and expect about 7 percent cuts next year. However, if the Soviets do not match our military funding cuts after a year or two, then we could drop our annual military cuts.

Given Mr. Gorbachev's past unilateral cuts and stated desire to reduce their own military economic burden, I suspect that he would happily join such a move. Reducing our forces and creating a less threatening force posture is in the best interests of both superpowers.

By contrast, the conference report includes funds for many destabilizing and unnecessary weapons systems. To build all of the weapons ordered by the Reagan administration, the military budget would have to increase. This is totally unrealistic.

The Pentagon's 5-year plan is not only fiscally irresponsible, but calls for adding destabilizing new weapons. If a few hundred survivable nuclear warheads is sufficient to deter any future adversary, no matter how repressive, do we really need to add more MX missiles, more manned bombers, or more submarines, when we can already deliver more than 13,000 nuclear bombs to Soviet soil?

If 5,000 deliverable nuclear weapons were enough to deter a Khrushchev or a Brezhnev, why is 13,000 not enough to deter a far more moderate Gorbachev?

Should we really squander $4 billion per year on star wars research to try and stop a small fraction of a hypothetical Soviet attack, knowing full well that any effort to deploy such a ballistic missile defense would only cause the Soviets to add more offensive weapons, and cause them to break any subsequent START agreement limiting offensive missiles?

And should we continue to pay $180 billion each year to support a standing American army in Europe, 40 years after the end of the war, while our European allies plan for a unified Economic Community in 1992, unburdened by massive military forces?

Mr. President, when I voted against the Defense authorization bill in August, I hoped that some of the limitations on strategic nuclear weapons contained in the House bill would survive in conference. None of the House limits survived. All strategic weapons systems and all new conventional weapons systems were funded, including the programs slated for termination by Mr. Cheney. True, some conventional weapons were slated for termination next year, but our growing national debt will create even more pressure in fiscal year 1991 to reduce military programs.

We now have the worst of all worlds: no terminations of costly conventional weapons and no curbs on destabilizing new offensive nuclear weapons.

Mr. President, the cold war is ending at a faster pace than anyone could have expected. We must redefine "national security." The Soviet Union is no longer the major threat to our Nation's security.

Our national security is threatened, however, by economic decline, huge Federal budget deficits, trade deficits, illicit drugs, and environmental degradation. Any of these threats, by themselves, could degrade our way of life. Taken together, these internal threats could destroy our Nation as surely as any external invasion.

We must, therefore, reorient our priorities. We simply cannot pay for all of the new weapons designed during the Reagan administration.

We can sit by passively, and allow the automatic Gramm-Rudman meat ax to chop away at our military forces, or we can take charge.

Working with the Soviets, we can design a much more stable international military environment at much lower force levels.

We can redirect resources devoted to the arms race to our growing internal problems, including the drug war, environmental restoration, rebuilding our Nation's roads and bridges, and developing renewable, nonpolluting sources of energy.

This is a time for bold new initiatives. We cannot continue to pour $300 billion per year into the Pentagon. I must therefore vote against the fiscal year 1990 Defense authorization conference report.

SIS SITE PREPARATION PROVISION

Mr. McCLURE. Mr. President, the 1990 Defense authorization bill contains a provision that is vitally important for the future of our nuclear deterrent. This provision specifically allows for site preparation to go foward on the special isotope separation project at the Idaho National Engineering Laboratory in Idaho, with certain conditions. Two of these provisions require that the Secretary of Energy will certify to the appropriate committees in the House and Senate that the SIS is:

First, essential for the national security of the United States; and

Second, necessary to meet plutonium requirements.

Based upon all the briefings I have had on the nuclear material needs for the future, I believe these requirements will be met. I would point out that the President's national security directive responsible for nuclear materials specifically states that, "It has long been U.S. policy that national security needs and not the availability of special nuclear materials shall govern the nuclear stockpile."

I note this because the SIS will provide vitally needed contingency and flexibility to our materials production capability, a nonreactor source of weapons grade plutonium. The projections for nuclear materials needs in the mid-1990's tell us that we will need an assured source of weapons grade plutonium at that time.

The $3 million site work takes up just a fraction of next year's $40 million SIS construction budget. The bulk of this money is budgeted for project design.

The site preparation provisions allow:

Utility lines: Water and sewer lines would be rerouted to the SIS site. An overhead power line would be removed, and an underground electrical line would be installed.

Security: A 2,200-foot security fence would be installed, and a 2,200-foot concrete vehicle barrier built. The fence would separate the SIS construction area from the Idaho chemical processing plant to the south.

Roadwork: This involves building a 375-car parking lot and upgrading a 3,300-foot access road to the lot.

Earthwork: The project site would be excavated, raising the construction area's elevation by about 4 feet. This backfill work will raise the SIS buildings above the area's maximum possible flood level. Drainage to control flooding and snowmelt would also be built.

The site preparation itself is modest, but it is highly significant. It means a

lot more than building fences and moving dirt. It means starting to hire people to build SIS. It also sends out a message that SIS is destined to be built. It is a psychological step, as well as a physical step on the way to building SIS. It signals that this facility, the first replacement facility in the defense complex to be built in almost 30 years will go forward as planned.

Mr. WIRTH. Mr. President, I would like to commend the distinguished chairman of the Senate Armed Services Committee, SAM NUNN, and the ranking Republican member, JOHN WARNER, for their hard work and dedication in bringing this conference report before the Senate. The conference was long and arduous, and the committee leaders pulled us through it with their customary skill and grace.

This legislation represents the first defense budget of the 1990's—a decade which, in my view, will be shaped by fundamental changes in international relations and budget politics in America. We are already seeing these trends emerge in 1989. We debate this defense legislation on the very day on which Lech Walesa addressed a joint session of Congress. The defense budget contained in this report is subject to a Gramm-Rudman-Hollings sequester of as much as $8 billion in budget authority.

As evidenced by the recent and extraordinary events in Berlin, it is abundantly clear that we are living through a remarkable period of change. The most poignant image of this change could be seen in the faces of East and West Germans celebrating the effective fall of the Berlin Wall, the defining symbol of post-war East-West conflict.

Beyond the drama in Berlin, Hungary rejects the nomenclature of communism, and Poland elects a democratic non-Communist government. Change is underway in Bulgaria and Czechoslovakia. Members of the newly elected Supreme Soviet visit Kansas, and the Chairman of the Joint Chiefs of Staff meets with his counterpart in the Soviet Union. Modern nuclear weapons are being burned and crushed under the terms of the INF Treaty and Soviet tank regiments are unilaterally being withdrawn from Eastern Europe. History is being made at an exhilarating pace.

A change in the politics of the Germanies goes right to the heart of the postwar order in Europe and raises fundamental questions about the future of the two military alliances. As political revolution sweeps Eastern Europe and as the cold war levels of confrontation are drawn down, a new European system will inevitably evolve to replace the old security order. The shape of that order, be it defined by the "common European house," a "Europe whole and free," or another metaphor, has been moved to center-stage as a result of the recent dramatic events in Germany.

Certainly a Germany that is coming together cannot do so under NATO—this would be unacceptable from the Soviet perspective. If Germany were to opt out of NATO, a central purpose and focus of the alliance would disappear. What is the meaning of "forward defense" when the face of Europe changes to reflect a democratic Poland and open trade and flow of people between East and West Germany? A new order will emerge, and we had better get prepared for it. The impact of such changes on American defense planning, policy, and budgeting will be enormous.

As these remarkable changes in global politics take place, we in America are facing a very serious budget crisis which will continue to impact defense planning. The recent Gramm-Rudman-Hollings budget sequester would slash the fiscal year 1990 defense budget baseline by approximately $8 billion. According to the Pentagon, this would result in a manpower cut of 170,000; the Army slice of that cut would be three division equivalents. This sequester comes several months after the Comptroller General of the United States, Mr. Bowsher, told the Senate Armed Services Committee that the Cheney 5-year defense plan will likely have to be cut by $150 billion. If the East-West political climate continues to improve, these dire budget predictions may well prove to be benign.

Barring an unforeseen turnaround in global politics, the American defense budget will continue to decline, in my view. The issue is whether we can responsibly manage that decline through a negotiated multilateral framework—or whether defense cuts will come willy-nilly through annual, incremental, unilateral actions by ourselves and our NATO allies. Perhaps arms control cannot step up to this challenge, perhaps we will experience "apes on the treadmill" running in reverse. A more rational course, however, would be to seek mutual and controlled reduction of defense efforts on both sides.

A clear objective of the Soviet Union in Vienna is to reduce the burden of defense expenditures on the Soviet economy. We should view Vienna similarly. The CFE negotiations can play a significant role in reducing defense expenditures, but cost savings as an arms control objective have been derided by the defense community traditionally. I do not think that will continue to be the case as we make further real cuts in the defense budget. We are now in the fifth consecutive year of real annual decreases in defense spending. It is virtually inevitable that that trend will continue. It is time that the strategic community join the dismal world of budgeteers.

It is certainly true that East-West arms control historically has not yielded cost savings. But since the dawn of the Cold War, the strategic community has not sought a reduction of the defense burden as an explicit goal of arms control, focusing instead on the goal of military stability—reducing the risk of war. The barren MBFR talks consumed 15 years without agreement. SALT placed ceilings on strategic launchers in the context of ABM Treaty constraints on strategic defenses.

Today, for the first time since demobilization after the Second World War, we have an opportunity to achieve sharp force reductions. The START talks seek cuts of 30 to 50 percent of strategic nuclear weapons, depending on whether you use truth-in-accounting for the bomber-delivered weapons. The CFE negotiations will reduce Soviet forces well below the deep cuts outlined by Mr. Gorbachev at the United Nations last year and now being implemented, while NATO forces will be cut to 10 to 15 percent below current levels in the agreed categories.

Will the relatively modest Western cuts foreseen in the NATO proposal yield savings? An editorial in last week's Economist suggested that "though the Soviet Union will save a lot from an arms-cutting deal, the West will get virtually no 'peace dividend' at all." This would certainly have been true before President Bush last May successfully proposed that the Western position at Vienna include a cap of 275,000 for United States and Soviet air and ground forces deployed in Central Europe.

Under this proposal, the United States would withdraw and presumably disband approximately 30,000 troops from Western Europe. A recent Congressional Budget Office study found that this proposal, if implemented, would save about $2.1 billion annually in manpower and training costs and several hundred million per year in acquisition savings. Even after discounting the additional costs for monitoring compliance with a CFE accord (INF costs about $150 million annually), the current Western draft treaty would save the United States about $2 billion annually—"real money" even by Senator Dirksen's standards, but still only a fraction of the reductions in annual defense expenditures we are likely to experienced in the years ahead.

President Bush was right to urge manpower cuts in the Vienna talks. But we need to go further. Defense budgets consist of three major categories: manpower; equipment; and training. The largest single account is manpower, and it is here that significant savings can most effectively be realized. By cutting military manpower,

pay is immediately scored as a saving, and associated training and equipment costs are also reduced.

President Gorbachev has proposed even deeper cuts in stationed forces in Central Europe to 300,000. The Soviet proposal, however, includes allied—not just United States and Soviet—stationed forces. To accommodate the roughly 100,000 West European troops stationed in West Germany, the Gorbachev formula would require the United States to scale back an additional 75,000 troops beyond the cuts envisioned in the Bush proposal, fewer if allied nations shared in the reductions. We should be moving in that direction—not only to reduce defense expenditures, but because it makes good political-military sense.

The Western military objective at Vienna is to reduce the capability for surprise attack and sustained offensive operations. Certainly, the lack of trained military personnel assigned to operational units will severely constrain the ability of the Warsaw Pact to mount a blitzkreig in Central Europe or to achieve the traditional military objective of "seizing and holding territory."

Vienna, however, is also very much a political exercise in which manpower reductions can play a central role. Our clear goal here has been to reduce the number of Soviet troops deployed in Eastern Europe—now in excess of 500,000, of which 380,000 are stationed in East Germany. With the demise of the Brezhnev doctrine and the associated policing requirement for Soviet forces—the goal of deep reductions in forward-deployed troops appears to be shared by Moscow. We should seize the opportunity to dismantle Soviet military domination in Eastern Europe through deep manpower cuts in CFE.

It is questionable whether our European allies would be pleased with an arms control outcome in which the United States takes all the reductions. Demographics and politics will force cuts in NATO European forces. The coming debate on "burden shedding" has the potential to be as devisive as the "burden sharing" debate. One solution would be to accomodate national needs within much lower overall ceilings in the current and future negotiations.

Many skeptics question the advisability of pursuing a CFE follow-on negotiation. In my view, we have no choice but to press on in CFE for further and deeper reductions. To suggest that we should be content with the gains of CFE Phase One is to suggest that we should be complacent about the burden huge defense expenditures place on our societies—in human and financial capital. We must, of course, spend what is necessary for the national defense—but our publics quite rightly will not allow us to expend scarce resources to sustain a military posture out of proportion to political realities and purpose.

I authored a provision in the 1990 Defense authorization bill requiring the President to submit a report to Congress on the military, political and cost implications of further reductions in equipment and manpower to 25 percent and 50 percent below current lower levels. Such deep cuts will enable us to save a significant portion of the $170 billion we spend annually on our NATO commitment.

Deep cuts also will require a radical revision of Western military doctrine, force structure and acquisition strategy. Many NATO analysts shudder at the idea of revisiting "flexible response" and "forward defense", at the challenge of recasting military force structure, of developing new approaches to conventional deterrence and stability. We should be welcoming that opportunity with enthusiasm and creativity, for events certainly will force us to undertake a radical revision of our political and military thinking.

Budget constraints dictate that cost-effective answers to these questions be found. Greater reliance on reserve forces with "user friendly" weapons may, for example, be preferable to a high-tech interdiction option to compensate for the loss of firepower under CFE. We must rethink basic premises in the context of a very significant constraint on defense resources. In short, we should focus on the requirements for a minimal conventional deterrent and not view CFE as a zero-sum budget game.

I am also pleased, Mr. President, that this conference report addresses the need for better understanding in Congress of conventional arms control verification. It is certainly true that verification of a CFE agreement will be the most ambitious—and most expensive—monitoring system ever contemplated. But this is not a cost that we can complain about.

Mr. KOHL. Mr. President, I have decided to vote against the National Defense Authorization Act.

To begin, I am dissatisfied with the way specific differences between the House and Senate bills were resolved. When the bill was before the Senate, I voted for a number of amendments designed to reduce spending on strategic systems. For example, I voted to cut spending on SDI and the MX rail garrison system. When the bill left the Senate, I hoped it would return a lot closer to the House position on these issues. It did not. We are moving ahead with the rail garrison version of the MX while substantially underfunding the Midgetman; we are placing mostly cosmetic constraints on the development of the B-2 Stealth bomber despite the fact that it has no clear mission and uncertain capabilities; we continue to spend more than we ought to on the strategic defense initiative; the list goes on. I had really hoped that we might adopt the House position on these issues in the conference. We did not. And that disturbs me.

I am also disturbed by our failure to really cancel programs. The administration finally responded to our pleas to recommend some realistic cost savings. But when they did, we started pleading for mercy. Instead of facing the fact that we have to find systemic ways to address the economic and employment consequences of reduced defense spending, we cobbled together a program which allows continued production of low priority weapon systems with the vague promise that we may get serious about eliminating them next year. In short, we did not do enough to cut spending and we didn't do anything about coming to grips with the problem of minimizing the disruptions which will inevitably result when we do.

And I am disturbed by the fact that back in August we were operating under what we were told was a "binding budget agreement" which required us to authorize the full $305 billion for the Pentagon. Since then, the ties that bind the agreement have been cut: we took money from the Pentagon to fund the war on drugs and the President has taken money from Defense by accepting a sequester. I have never believed that we needed to authorize $305 billion to have the kind of defense we need. Given our failure to honor the budget agreement, I no longer feel obligated to accept that figure as a given.

But those reservations pale in significance when compared to my major problem with this bill and with American defense and foreign policy: We simply have not responded to the new realities we face. Week after week, we witness historic and revolutionary changes in the world in which we live: Elections in Poland, demonstrations in Moscow, the Wall coming down in Berlin, defense spending going down in the Soviet Union. We are seeing a wave of freedom sweep through the Communist world.

But we are not reacting to it.

In response to this revolution, all I have heard are the same slogans: those changes, we are told, are a result of the strength and solidarity of the Western World. Our military might, our leaders assert, forced the Soviets to change. We cannot change course now, they tell us, because it is working so well.

Mr. President, that is just not true—or, more accurately, it is only partly true. Yes, our strength as a nation and the unity of the NATO Alliance have played a role in what is happening in the East. But our military capability alone is an insufficient explanation for the changes we are witnessing. The

shifts in Soviet policy are a response to forces more real and more powerful than our missiles, bombers, and troops. The Soviet shift is ultimately a function of the force of ideas—ideas which we have championed and which have now taken root in the hearts of the Soviet people and the policies of the Soviet leadership.

But this bill does not reflect those ideas. It is a reflection of, and a prisoner to, a cold war dogma that is no longer capable of guiding us through the 1990's.

But—and this is the problem Mr. President—we do not yet have a strategy for responding to the new reality we face. The President has not proposed a policy; he simply offers us a less strident plea for more of the same. The Pentagon has not advocated an approach; it simply asks for more emphasis on technology so that we can build more sophisticated weapons. The Congress has not created a coherent response; there are voices here and there calling for nipping in the defense budget here and tucking it in over there—but there is no vision of what national defense means in the new world in which we live.

The net result is that we have a defense bill which is, in my mind, an inadequate response to reality. But, to be honest, we also have no alternative on the table, or even in mind.

And that creates a dilemma for all of us who are being asked to vote yea or nay on this $305 billion authorization. I recognize that the bill contains many things we need. I appreciate the hard work and good intentions that went into it. But despite that fact, I just cannot bring myself to support it.

Mr. President, this bill requires us to spend too much and gives us too little. It doesn't give us the tools we need to respond to the kind of military threats we face. We do face threats. But they are threats from terrorists, from drug cartels, from local revolutionary forces. An MX missile is not a response to those threats. A B-2 bomber is not a deterrent to those threats. SDI is not a defense against those threats. Nor are MX's or B-2's or SDI a realistic response to our need to continue to be capable of responding to the Soviet forces which still represent a potential danger.

No, Mr. President, we are not building the right weapons, we are not responding to the real threat, and most importantly we are not prepared to win the victory that is now within our grasp. We will spend $305 billion to defend our Nation—but less than a billion to help the Polish people defend their new found freedom. We will spend billions to protect our people—but our Navy is forced to cease all operations for 48 hours while they figure out how to protect our sailors from dangers on their own ships. We will spend billions to ward off some theoretical threat from abroad—but that means we will not spend the billions we need to deal with the real disasters we face: Our need to educate our kids, rebuild our cities, help our farmers, revitalize our economy, reduce our deficit.

The plain truth is that we are spending too much. We are spending it on the wrong things. And worst of all, none of the spending is guided by any comprehensive principle or policy or strategy.

I recognize that a "no" vote on this conference report does not create the kind of policy we need. But a "yes" vote is an endorsement of a policy that weakens our Nation economically. A "yes" vote does nothing to address the real military threat we face. A "yes" vote totally ignors our opportunity to end the superpower divisions which have blocked human progress and threatened human existence for over a generation.

Mr. President, I will vote "no" on this conference report. That vote is not so much a rejection of what is before us as it is a way of saying that all of us need to do better.

Our strength as a people, our security as a nation, are dependent on the health of our economy, the education of our children, the viability of our cities and towns. With freedom spreading throughout Eastern Europe and the world, it makes sense to spend less than this bill would on weapons designed to destroy the world. With the Soviet military threat receding, it makes sense to take some of the money allocated for defense and spend it on implementing the kind of domestic economic strategy which will make America more competitive in world markets. We can have a defense which is second to none without authorizing $305 billion for the Pentagon. But I am afraid that America will be second to many unless we spend more on the battle against drugs, the fight against illiteracy, the war to clean up our environment. My vote against this bill is a vote for a new set of priorities. It is a vote for recognizing the new set of challenges we face. It is a vote for a more appropriate, more balanced, more rational national defense strategy—one which responds to the continuing external threats we face but also reacts to the internal challenges we face.

THE NEED FOR STRATEGY AS WELL AS BUDGETS: THE UNADDRESSED ISSUES IN THE FISCAL YEAR 1990 DEFENSE BUDGET

Mr. McCAIN. Mr. President, I support the conference report on the fiscal year 1990 Defense Authorization Act. It is far from perfect, but I believe that it represents the best compromise we can currently achieve. In an ideal world, I would like to see an act that did more to address the need to make fundamental adjustments in our strategy, forces, and spending levels. I would like to see an act that was free of many of the present congressional add-ons and earmarks. At the same time, I would like to see an authorization act which took fewer risks in terminating programs of proven value and success and which bet less of our future force structure on high technology programs that are nearly certain to rise sharply in cost, present performance problems, and slip in their delivery date.

Nevertheless, I believe that the chairman and the ranking member of the Armed Services Committee, as well as the committee staff from both parties, deserve our congratulations for forging a compromise with the House that responds to many of the key concerns of President Bush and Secretary Cheney. I believe the conference version of the act also reflects a proper concern with the budget deficit and the need to keep tight limits on Federal spending.

The conference version of the fiscal year 1990 Defense Authorization Act has several other important features. It reflects the proper kind of congressional concern with arms control. It emphasizes the need to present effective plans, strategies, net assessments, and data bases to prepare Congress for the nearly certain prospect of major arms reduction talks during the course of the coming year. The act is free of the kind of destructive arms control amendments that impede the President's efforts, but it has strong provisions that reflect both the committee's interest in making every effort possible to reach meaningful arms control agreements and to ensure that such agreements really do reduce the risk and cost of war.

There are many detailed provisions of which we can be proud, and that represent the result of a dialog with the administration, rather than arbitrary congressional micromanagement. In spite of the continuing cuts in defense spending, the act contains provisions that will strengthen or help preserve our key conventional capabilities. In spite of some important compromises with the House, it reflects the Senate Armed Services Committee's concern with the need for adequate levels of munitions and to avoid creating a hollow force structure by underfunding such supplies.

The act funds most of the naval and power projection forces we need, while expressing the proper concern that every effort be made to manage and modernize these forces as effectively as possible. The act does not reflect the kind of damaging debate over the carriers we have had in previous years, but it does require better reporting on the nature and cost of modernizing our carrier forces.

The act reflects our growing concern with the lack of adequate efforts by

the services to develop cost-effective force modernization plans that can be implemented within real world current resource constraints. For example, it requires a comprehensive long-term naval aviation plan. I would have liked to have seen like requirements for similar plans in each important procurement area, and to help avoid the procurement bulge or "wedge" that now seems probable in the early 1990's. The act does, however, set at least one important precedent, and perhaps next year we can go on to provide similar tasking—for example, to ask the Army to develop a realistic long-term plan for improving our armor and antiarmor capabilities.

The act reflects our committee's concern with manpower and readiness. There are strong provisions to ensure we retain key skills such as pilots. There are provisions that send a clear message to the Nation's budgeteers that they cannot balance the national budget at the expense of fair pay for our servicemen, or by hacking away at cost-of-living allowances and/or flight pay.

There also are provisions that reiterate the committee's concern with the lack of any integrated readiness reporting system, and with the continuing lack of reporting from any service that links key factors like active and reserve readiness, sustainability, and sea and airlift. The first such report from the Department of Defense is now a year overdue, but the act indicates we have not given up in this area.

The act reflects our concern with the fact that we risk creating a hollow National Guard and Reserve structure because we do not have a cohesive concept for ensuring the overall readiness and balance of these forces. It reflects our concern that we have no real world capability to meet our commitment to provide 10 divisions to NATO in 10 days, and do not even really know the extent of the problems that have created a "hollow commitment" in the late 1980's which is as dangerous as the "hollow forces" of the 1970's.

The act also makes impressive progress in coming to grips with burdensharing in a form that will help stabilize our ability to meet our strategic commitments, rather than undermine it. I believe that the burdensharing amendments contained in this act—and which I developed with Senators NUNN, WARNER, and LEVIN—are a vital step forward in redefining our posture towards Europe and East Asia.

THE NEED TO SHAPE THE FISCAL YEAR 1991 BUDGET AROUND A NEW STRATEGY AND FORCE MIX

Having said this, I must note that the conference report on the Defense Authorization Act is still largely the result of an effort to fit our present forces, and existing roles and missions, to a lower level of resources. It does not respond to the changing politico-military conditions that are forcing us to restructure our strategic posture.

It does not respond to the future budget problems we face at a time when we will be very lucky to maintain constant real defense spending over the next 5 years, and may well see a series of sequential real annual cuts of up to 2 percent. The act tacitly assumes outyear increases in real defense spending which are now very unlikely to occur. It makes unrealistic assumptions about the rise in weapons costs and inflation, and it does not touch upon the longer term problem of how to fund the advanced technology the Department of Defense now plans to deploy in the mid and late 1990's.

We all know that we need to make cuts in our active and reserve force structure to create a force mix that we can afford to make truly combat effective. We know that we need to make these cuts as soon as possible to avoid wasting further defense dollars on units that will have to be eliminated in the future, and reduce the ultimate impact of bringing our forces into balance with our resources.

The content of the fiscal year 1990 act also reflects continuing problems in the way the defense budget is submitted to Congress. It reflects the fact that the budget is still a line item budget, and does not show the Congress what is being spent on given roles and missions. It reflects the fact that the budget is submitted without a supporting net assessment that is based on the spending levels in the budget and which realistically explains the trends in U.S., allied, and potential threat forces, and the risks inherent in the current level of funding. It reflects the fact that the budget only projects spending for 2 years and does not provide any long-term spending and procurement data that would encourage the Congress to maintain a stable level of spending and program structure.

It is clear from President Bush's strategic review effort, and from Secretary Cheney's recent report on ways to improve our defense budgeting and procurement efforts, that the Bush administration recognizes how serious many of these problems we currently review the defense budget are, and that our present budget submissions and review process have grave defects. I sincerely hope that the fiscal year 1991 defense budget submission will mark a major improvement in these areas, and that we will have a much stronger and more timely net assessment to support the fiscal year 1991 budget.

I hope that this concern within the administration means that we will not see further long delays in meeting the critical reporting requirements of Congress to justify future budgets and defense spending. We are still waiting, for example, for an arms control strategy report that is now nearly a year overdue.

Similarly, we learned a year ago that the data base NATO is using for assessing NATO and Warsaw Pact forces was grossly inadequate and had many serious errors. Ironically, the Department of Defense corrected this situation in response to legislation included in last year's Defense Authorization Act, and produced an accurate data base as part of a report to Congress. This data base, however, has now been "lost" in the bureaucracy for nearly a year, and the CFE talks continue to use an inadequate data base as a result. Given the pace of events in the Warsaw Pact, this is the last thing we need either for CFE or in considering our future defense needs.

THE NEED TO GIVE PRIORITY TO A NEW APPROACH TO MARITIME STRATEGY

If we are to properly address these challenges next year, we must be prepared to address all of these issues in terms of clear strategic priorities, new roles and missions, and new priorities for force planning. For example, we need to redefine our strategy and to establish new priorities. Our dependence on maritime strategy and power projection forces seems nearly certain to increase during the coming decades, and we should recognize this in future budgets, rather than simply cut each service by the same percentage or make equal cuts in every aspect of our force mix.

Regardless of the timing and nature of any START agreement, strategic nuclear deterrence is now far more stable than it has been in the past and the risk of nuclear war is far smaller. We still need a strong nuclear deterrent and our post-START force posture must have the strength and survivability to ensure that the risk of war or any test of our nuclear capabilities will remain minimal. Nuclear forces will not, however, be the driving thrust behind our defenses or a practical instrument of power in dealing with the many contingencies where we must use limited force to deal with limited problems.

Every day, we see new changes in our relationship with the U.S.S.R. that are likely to greatly reduce our need to deploy forces in Europe. With luck, NATO and the Warsaw Pact will soon move toward mutual force cuts that will lead to a major easing of the tensions between East and West, to significant withdrawals in the U.S. forces we must maintain in Europe, and to important savings in the money we must spend on technology and equipment tailored to European combat.

In fact, our priorities in spending on forces for NATO already have

changed. We do need to maintain the existing quality and quantity of our forces in Europe until we can reach a CFE agreement, but we should not continue to fund costly improvements in their capabilities we will later eliminate or withdraw.

We should begin to shift resources to give our air forces the long range strike capability and rapid redeployment capability they need to react to any shift in the relaxation of tension with the Warsaw Pact, and to study how to give our ground forces the force mix and lift they will need to match the future redeployment capabilities of Soviet forces.

At the same time, we need to reconsider how our future ground forces can be given lighter and cheaper equipment that is more deployable and which is as well suited for contingencies outside Europe as it is contingencies within them.

We should begin in fiscal year 1991 to shift from a nuclear war and European oriented strategy to a strategy and force posture focused on the capability to project power anywhere in the world, and which assigns equal or greater power to dealing with crises in Asia, the gulf, the developing world. We cannot afford to waste money on forces whose priority is declining, and underfund the forces we really need.

THE CHANGING NATURE OF MARITIME STRATEGY

I do not mean in saying this that we should use the resources in our fiscal year 1991 Defense budget to fund the maritime strategy we have pursued in the past. The new maritime strategy we need for the 1990's does not mean buying a 600-ship Navy—a goal that was never justified by any supporting strategic plan, net assessment, or clear military rationale. It does not mean focusing on naval forces alone, or the type of Soviet and Warsaw Pact threat we focused on in the past.

A modern maritime strategy means that we must take full account of our geographic and strategic posture as a nation whose trade and defense is dependent on access to both of the world's major oceans, and whose power is largely dependent on its ability to project power by sea and air, rather than through the deployment of massive land forces. It means concentrating our declining defense resources on maintaining the mix of Army, Navy, Marine Corps, and Air Force assets we need at a time we must give priority to contingencies in the Third World and Northeast Asia.

In practice, this means we should structure our fiscal year 1991 and future defense budgets to:

Maintain the key elements of the seapower we already have, and particularly the carrier forces that are the key to our power projection capabilities.

Ensure that we do not let an obsession with stealth and high technology make our combat aircraft so expensive that they cannot actually be used in power projection missions.

Concentrate on developing land forces that are combat ready to deal with low level contingencies anywhere in the world.

Restructure the posture of our Reserve Forces so that rather than prepare for a massive war in Europe that they are increasingly unlikely to ever fight, and lack the lift assets and balanced readiness to deploy to, they can meet the special purpose needs of global power projection.

Change our force posture in Asia, as well as in Europe, to reflect the changing political, economic, and military realities in East Asia and the Pacific by seeking added offset and support from Japan, finding a stable solution to the problems we now face in the Phillipines, and changing our force mix in Okinawa and South Korea.

Restructure our basing, seapower, and air and sealift postures so that they can both maintain the forward deployment capabilities we need and develop the readiness and lift capability necessary to meet our needs. This may well mean accepting the need to reduce our dependence on fixed bases, and to emphasize carrier and amphibious forces.

Seek the overall mix of commitments and burdensharing from our allies that both minimizes the cost of this new forces posture to the United States, when our allies can afford it and our forces contribute to allied defense, and ensures that our friends and allies continue to act as our most effective "force multipliers."

THE PROBLEMS IN OUR CURRENT APPROACH TO RESOURCE ALLOCATION

We can only fund this approach to changing our strategy, however, if we do a better job of addressing several key issues in fiscal year 1991.

STRATEGIC FORCES

Our current debate over strategic force modernization risks allocating a great many resources in the wrong place. I do not believe we need to buy two new ICBM's, particularly if the U.S.S.R. is serious about accepting the United States position to ban all mobile missiles.

We should proceed with the rail garrison basing of the Peacekeeper to both improve our survivable target coverage and as a hedge against the need for mobile missiles. I believe, however, that the President should take advantage of the flexibility in the current act to leave the small ICBM in the R&D phase until it is clear that we first, really need to convert to a mobile ICBM force or second, need a replacement for the Minuteman.

More importantly, we will definitely have to fully reevaluate our requirement for the B-2. First, I see little real sign that we have actively negotiated with the U.S.S.R. to find ways to remove the need for such a capability. Second, the Air Force has still failed to make convincing arguments for a penetrating bomber on any grounds other than START. Third, the target mix the Air Force proposes to attack seems to have insufficient little real marginal value in terms of deterrence, war fighting, and/or damage limiting.

Equally importantly, we will need to fully examine the cost, performance, and total force procurement capability risks inherent in relying on Stealth in the light of all the potential advances in low observables technology. This is a vital issue which not only affects the B-2, but the ATA, ATF, and NATF.

I believe that a major review is needed of both our strategic rationale for the B-2 and of our dependence on Stealth, and one that clearly includes the use of an A team and B team approach. I also believe that it is clear that the issue is not one of canceling the B-2, but whether we really need 132 of these aircraft, and the ATA, ATF, and NATF in their current form. Taken collectively, we might well be able to save tens of billions of dollars, as well as give our overall force posture far greater capability.

POWER PROJECTION FORCES

We need to comprehensively reexamine our power projection forces to determine how we can best strengthen the capabilities of the Air Force, Marine, and Army units that can serve our future military needs. I am concerned with the focus on extremely expensive future combat fighters and attack aircraft costing well in excess of $70 million each. I am concerned at the lack of apparent balance in our plans to modernize all the capabilities of our Marines and with the fact we still have not adequately examined the mission requirement for the V-22.

I am concerned that the U.S. Army has too many divisions in its force structure which seems to have little real-world contingency value, and need to focus on developing a small force structure that will really suit our future force requirements. I am equally concerned that we need new long term RDT&E, procurement, and O&M plans from the Army in virtually every area that we can actually fund, and which are tailored to the changes taking place in our force requirements.

I am equally concerned with the lack of plans and concepts for a smaller, leaner, Air Force we know must come in the future, and with the emphasis on unaffordable and unrealistic aircraft procurement plans—many of which would only be valid if we faced the kind of growing Warsaw Pact threat we faced in the early 1980's. We may well be able to slow many of our current procurement efforts, take the time to fully test new aircraft and eliminate the current emphasis on concurrent development and produc-

tion, and focus on modifying existing aircraft and air units for power projection missions.

More broadly, we need to take a very hard look at the resources the fiscal year 1991 Defense budget allocates to Uscentcom, Socom, and the Marine Corps. These forces are likely to make up the key elements of much of our future military action. Uscentcom, however, is tied to Southwest Asia, when it may need a much broader power projection mission. Socom needs to be given the priority it really needs in future contingency planning, and the deployments and strategic lift for the Marine Corps may well need to be adjusted to reflect changing priorities and political conditons.

We have to come to grips with the importance of funding the full range of our needs for carrier forces and naval aviation. This year, we have dropped a carrier from our force structure, and took steps to cancel production of the F-14, A-6, and EA-6B. We did this without any real examination of our growing priorities for such forces.

In short, we must carry out a comprehensive reexamination in fiscal year 1991 of every aspect of our force structure in the United States. The present structure of our defense budget leaves us on a track that will create a hollow mix of Active and Reserve Forces in the United States which have dubious contingency capabilities, which lack lift and overall readiness, and which increasingly face severe "war stoppers" because of inadequate sustainability and support.

The key to finding the resources we need to fund the strategy and forces we need in the 1990's is to act as quickly as possible to eliminate the forces that are no longer necessary. These forces defintely do not consist of our forward forces in Europe and Northeast Asia, the forces which are the key to deterrence and effective global military action.

Even in this defense budget climate, in many cases, the fiscal year 1990 defense budget still funds an outdated myth. We should not withdraw our Active Forces in Europe until we negotiate mutual force reductions with the U.S.S.R., provided that our allies keep up their strength. There is no point, however, in continuing to pay for Forces in the United States whose only real value lies in a European war where we had months and months of warning that can be spent much more wisely on Forces for other roles and missions.

We can no longer afford to fund an outdated myth. Fiscal year 1991 is the time to make major reductions in the large pool of Active and Reserve Forces in the United States whose only real world contingency value, if any, lies in refighting World War II and a long-term general war in Europe. Now is the year to admit to the fact we have never had, and never will have, the ability to deploy 10 divisions in 10 days or give our NATO allies the support and sustainability they need. It is the year to focus our resource allocation on those air units we can actually deploy and sustain in Europe, and to eliminate the rest.

I am particularly concerned that the men and women of the National Guard and Reserves should be utilized in a more meaningful force structure, and such units get the readiness and training they deserve. The dedication of the personnel in our Reserve Forces needs to be rewarded by funding a balanced force concept that focuses of preserving the units with the highest future contingency value, and giving them readiness and contingency value they need. This cannot be done by annual exercises that substitute "pork" for purpose, and give the Guard and Reserves equipment and funds that serve the needs of manufacturers and special interests, rather than the Nation.

We also need to take a comprehensive relook at our current plans to provide lift and sustainability. Our present goals for sea and airlift date back to a very different world. It is clear that they will never be funded in today's budget climate, and it is equally clear that they should not be. We do, however, have a very real need for strategic and theater lift for power projection, Northeast Asia, and to provide lift for at least some of the forces we will withdraw from Europe as a result of CFE. This means we need new requirements, revised programs, and revised budgets.

The Department of Defense also requested so little sustainability this year that it was clear that it was attempting to preserve force structure at the cost of combat capability. We need to establish sound requirements for major munitions or spare parts that are properly funded.

Finally, we may have to consider trading money out of our defense budget and into security assistance. The last thing we need in the middle of our peace efforts in the Middle East, and the continuing crisis in Afghanistan, is to cut aid to Egypt, Israel, and Pakistan. It is all too clear, however, that we are now so short of foreign aid funds that we risk creating a situation where we will have to send U.S. troops to areas in the future where a limited amount of immediate aid could prevent or control the problem. We need to rethink security assistance and give it the focus it really needs.

LOOKING BEYOND THE STATUS QUO

I do not want to give the impression that I have the answers to all the issues I have raised, or that the kind of strategic rethinking, and changes in the fiscal year 1991 defense budget that I have called for will be easy. I recognize that it is easier to stand in Congress and call for changes in defense plans and budgets than it is for the executive branch implement them.

I believe, however, that we must recognize that the fiscal year 1990 Defense Authorization Act cannot be a meaningful model for the future. We cannot ignore the coming decline in defense spending. We cannot ignore the events in the U.S.S.R. or Eastern Europe. We cannot ignore the need for major changes in our present roles and missions and in our force structure. We must either begin to master the process of change or it will master us.

Mr. COATS. Mr. President, I rise today with mixed emotions regarding the conference report on this year's DOD authorization bill. I do believe that, overall, this is a good bill, largely consistent with President Bush's original budget request. Nevertheless, it denies the President and the Department of Defense the ability to implement several high-priority initiatives. Although this bill generally does a good job of balancing diverse interests and priorities, it contains a number of provisions that, in my view, are unacceptable.

I understand that we are in the midst of very tight fiscal constraints and that Defense spending will very likely continue to decline. Secretary of Defense Cheney deserves to be commended for the tough decisions he has forced to make, and while I do not agree with each of his decisions I applaud his decisiveness in implementing a very difficult charter. We in the Congress should strive to support Secretary Cheney as he attempts to craft a rational and affordable procurement strategy for the 1990's. After all, it has been largely at congressional prompting that defense spending has declined, and therefore we should share the responsibility for dealing with the tradeoffs and constraints that a shrinkage Defense budget inevitably produces.

The debate over this year's Defense budget is complicated even further by the fact that we are truly at a transitional point in the maintenance and modernization of the U.S. military forces. Budget constraints are simply one part of this equation. Changes in international relations are also producing pressure to reduce U.S. military spending and overseas commitments. Modifications in Soviet foreign policy seem to have cleared the way for a number of arms control agreements to proceed; most significantly, the strategic arms reduction talks [START] and the conventional forces in Europe talks [CFE]. Changes in the Soviet Union and Eastern Europe, moreover, have significantly reduced Western threat perceptions, thereby reinforcing the belief that we can

safely reduce efforts to maintain robust and modern military forces. Although I believe that we should proceed cautiously in evaluating our defense requirements for the years ahead, one simply cannot deny that unprecedented changes are in fact occurring in the Communist world.

Before we become too euphoric over new breezes blowing from the East, however, we should remember that things are not always as they seem. We must continue to base U.S. military requirements on what we see, not what we hear. The old maxim "actions speak louder than words" is very relevant in assessing Soviet intentions, and while I am encouraged by the rhetoric emanating from Moscow, we should withhold final judgment, and remain resolute in the maintenance of strong military forces, until changes are visibly and permanently implemented.

Despite Soviet announcements of a defensive military doctrine and new political thinking many elements of the Soviet threat remain unchanged. The Soviets are proceeding at an undiminished pace with their strategic modernization programs, with a heavy emphasis on preemptive counterforce capabilities in their strategic nuclear forces and an undiminished commitment to damage limitation through vigorous active and passive strategic defense programs. We also see an aggressive Soviet military space program, matched with what appears to be a serious commitment to a space warfighting doctrine. According to a recently released congressional research report, the Soviets are laying a much sounder foundation for military space power, in orbit, at lunar bases, or both.

Around the globe the Soviets also continue to prop up Marxist dictatorships and support antidemocratic revolutionary movements. Soviet bloc military aid continues unabated or has increased to a number of Communist forces, including the Sandinista government in Nicaragua, the Communist government in North Korea, the Najibullah regime in Afghanistan, and the Vietnamese client regime in Cambodia. Recent events in El Salvador graphically illustrate the adverse impact that Soviet bloc aid continues to have on global stability.

In debating the future requirements for U.S. military forces we thus find ourselves in a situation where optimism is warranted yet prudence is essential. There are signs that the military confrontation in Europe may soon decline, although significant changes have thus far not occurred. Assuming that a CFE agreement can be reached, which seems likely in the current political environment, we face the difficult task of reevaluating our conventional and theater nuclear requirements for NATO, as well as our other alliance commitments. Similarly, a START agreement would significantly reduce the number of strategic nuclear forces on both sides, thereby requiring the United States to reassess its strategy and force posture. This may lead to programmatic changes in the near future, yet it is certainly premature for the Congress to assume that it is safe to restructure the President's strategic and conventional modernization programs.

Implicit in the changes taking place, both domestically and internationally, is a requirement to restructure U.S. military forces to match emerging realities. This does not mean that we will be less committed to U.S. military strength, only that U.S. military strength itself will inevitably take on a new form in the future. As we reduce defense spending, and as arms control agreements force us to reduce the size of our military posture, it will become increasingly important to ensure that residual forces remain as capable, flexible, and modern as possible. Arms control reductions should not be accompanied by a reduced commitment to our military preparedness. We must find ways to keep our forces in a modern state of readiness while simultaneously keeping their cost down. The introduction of commonality in our procurement system may significantly contribute to the dual objectives of modernizing and saving. The Army's Heavy Forces Modernization Program, which foresees a whole family of armored vehicles based upon a common chassis, is an example of an approach that, in principle, is highly consistent with our future requirements and constraints. I am a supporter of this program and I hope it will serve as a model for other procurement programs.

Future adjustments in our force structure will also require weapon systems that are multimission capable and offer significant technological innovation. In this regard, the V-22 Osprey should be an essential component of our developing military force posture. The V-22 offers an order of magnitude increase in capability over existing helicopter systems and could be flexibly employed by all the services in a variety of roles. I am pleased that the Congress has provided sufficient funding to see the V-22 through its final stages of flight testing and evaluation. Next year, of course, we will have to revisit the issue to determine our long-term commitment to tilt-rotor technology. I am hopeful that the Department of Defense will see fit to include the V-22 in its fiscal year 1991 budget request. I understand that cancellations are necessary and that we are overextended in terms of the number of programs we are currently developing, yet it is my firm belief that the technology represented by the V-22 is so important that it would be truly shortsighted to forgo its incorporation into our military posture.

Mr. President, although there are many very positive aspects to this conference report, there are a number of provisions that, in my view, are very bad. Perhaps worst of all is the funding level for the strategic defense initiative [SDI]. The Reagan administration originally budgeted $5.6 billion for SDI in fiscal year 1990. The revised Bush administration request reduced this amount by $1 billion. During the Defense authorization conference we were forced to reconcile two very different funding levels for SDI, $4.3 billion in the Senate bill and $2.8 in the House bill. The resulting funding level of $3.57 billion represents a real decline in SDI funding over last year's level. In my view, this low funding level fundamentally threatens the overall SDI Program. President Bush's SDI request was designed to permit a deployment decision within his first term in office. Unfortunately, the SDI funding in this conference report threatens the President's ability to make a decision on phase 1 deployment and will require the program to be significantly scaled down, including the release of key scientific and engineering personnel and the termination of promising programs.

It is ironic and unfortunate that our ability to deploy a viable SDI system is declining precisely at a time when it is needed the most. In my view, the SDI could significantly contribute to a stable strategic relationship between the United States and the Soviet Union, one based on lower levels of strategic offensive forces and a greater reliance upon strategic defenses. A strategic environment in which nuclear forces have been greatly reduced may lead to unpredictable instabilities as each side's forces become more vulnerable to preemptive attack. Moreover, the threat of Third World and outlaw nations' possession of ballistic and cruise missiles is not a mere possibility. The threat is very real. A defense dominant strategic posture is a very appealing notion, especially if we are serious about really reducing nuclear weapons and transcending the instabilities that are likely to emerge in the future. I find it unsettling that the Congress would be willing to deny the American people protection against nuclear attack.

Mr. President, I am also disturbed by the lack of any strategic cohesion in the current plan for modernizing our intercontinental ballistic missile [ICBM] force. Even though this conference report seems to largely fund the President's ICBM request, in reality it precludes the eventual deployment of a survivable force by placing a 50-missile cap on the number of MX missiles that can be deployed. This sig-

29-059 O-90-42 (Pt. 20)

nificantly undermines the President's MX rail garrison deployment plan.

Certainly all fault does not rest with Congress in obstructing a coherent ICBM modernization plan. In my view pursuing a two-missile strategy was a mistake from the beginning. Although I see merit in both the MX and the small ICBM systems, I think that pursuing both simultaneously detracts from the chances of ever achieving a truly survivable and stabilizing ICBM posture. My hope is that we take this opportunity to get serious about the small ICBM program, especially since a single-warhead system will be considerably more attractive in the context of START. Under a plan that radically reduces the number of warheads possessed by the United States and the Soviet Union, a mobile, single-warhead ICBM makes a tremendous amount of sense. I encourage the Air Force, the Office of the Secretary of Defense and the Defense Committees of Congress to reevaluate this system and assemble a coherent plant to deploy a small ICBM force for the 1990's and beyond.

Mr. President, despite the flaws contained in this conference report, I support the compromise package. I am pleased to be a member of the Senate Armed Services Committee and I commend and thank the chairman and ranking member for their excellent performance in a very difficult situation. In my view, we would have been far better off had we accepted more of the recommendations of the Senate Armed Services Committee. I only hope that next year we are able to produce a more logical and cohesive defense package. I yield the floor.

COOPERATIVE RESEARCH AND DEVELOPMENT AGREEMENTS

Mr. McCLURE. Mr. President, I rise in support of provisions in the conference report on H.R. 2461, the fiscal year 1990 Armed Services Authorization bill. I am particularly pleased with the provisions in the agreement which provide for cooperative research and development agreements between industry, universities and certain of our Nation's national laboratories. Those provisions will aid American businesses to move into the marketplace technologies that will enable them to more effectively compete in domestic and international markets.

Our trade statistics reveal that American industry is falling behind in the international marketplace. Worldwide competition is increasingly tough because of the explosion of technologies in foreign countries; in part, due to foreign government support.

Unless as a nation we are more successful in bringing new technologies to the marketplace, we will continue to lose ground. For years opportunities have existed for the advancement of new energy technologies at many of our national laboratories. But often the necessary authorities were not available to enable the Federal Government to foster private industry commercialization of such technologies. This has been particularly true for technologies developed at Government-owned, contractor-operated Federal laboratories.

Mr. President, provisions in the conference agreement before us changes this situation. The measure provides the vital missing link that will enable cooperative research and development agreements between industry, universities and contractor-operated national laboratories, such as DOE's Idaho National Engineering Laboratory [INEL], to expand the scope of their activities to include initiatives in such areas as environmental control technologies, energy efficiency and solar energy technologies, and medicine, to name a few areas.

This measure establishes a uniform Federal policy governing cooperative agreements among Federal laboratories, universities and the private sector. The conference agreement extends the provisions of the Stevenson-Wydler Innovation Act of 1980, which now apply to Government-owned, Government-operated laboratories, to also apply to Government-owned, contractor-operated laboratories.

Under these provisions Federal laboratories, such as DOE's national laboratories, can now enter into cooperative research and development agreements with universities and private industry. For example, those INEL facilities whose primary purpose is research and development could enter into such arrangements with the private sector. Similar arrangements could be undertaken by those contractor-operated facilities where a substantial purpose of the contract is the performance of research and development for the Federal Government.

In order to avoid conflicts of interest and unjust enrichment of laboratory contractor-operators and employees, the conference agreement provides appropriate safeguards. The measure also requires prompt agency review of all proposed cooperative agreements and work statements.

For several years, the Committee on Energy and Natural Resources has been working on legislation similar to the provision in the conference agreement. During the 100th Congress, the Senate passed legislation on two occasions, but was unable to reach final agreement on statutory language with the House committees before adjournment sine die despite extensive discussions.

Thanks to the leadership of Senator DOMENICI, and subsequent support from Senators BINGAMAN, GARN, MURKOWSKI, and others, I am pleased to report that work on the National Competitiveness Technology Transfer Act of 1989 is now completed and included in this measure. It reflects Senator DOMENICI's vision of a much broader role for the thousands of scientist and engineers at the DOE research and development facilities around the country. Because of this legislation, national laboratories, such as INEL and the Los Alamos and Sandia national laboratories, will be able to foster the commercialization of new technologies. This means new businesses, new jobs and new products for American manufacturers, and a more efficient and effective way to deliver American technology to the domestic and international marketplace.

Mr. President, for these reasons I urge my colleagues to support these provisions.

Mr. BINGAMAN. Mr. President, I rise in support of the conference report on the fiscal year 1990 Department of Defense Authorization Act.

This report is the result of 7 weeks of work between the House and Senate Armed Services Committees. It is a good report and one which I believe warrants the full support of the Senate. There were wide divisions between the House and Senate on many issues in the bill, and it was only after lengthy deliberations and compromise that we were able to reach a final agreement. I would like to commend Senator SAM NUNN for his leadership throughout the process. That an agreement was reached at all is a tribute to his skill and ability. I would also like to commend Senator WARNER for his efforts to forge compromises throughout this process.

Mr. President, I would like to take a few minutes to highlight some of the major points of this bill that fall under the jurisdiction of the Defense Industry and Technology Subcommittee. I would also like to thank Senator WALLOP, the ranking member of the subcommittee, for his hard work and assistance on these vital issues.

TECHNOLOGY BASE

The conference report includes $3.51 billion for the defense technology base in fiscal year 1990, $220 million over the administration's request. The conferees have also recommended a fiscal year 1991 authorization to fund technology base programs at $3.77 billion, a level that will provide for a 2-percent real increase over the fiscal year 1989 level.

The House and Senate conferees were in complete agreement on the critical need to fund these programs, which did not take part in the Reagan defense buildup. With our technological edge under ever more serious challenge, this is not the time to be shortchanging the technology base. This year we could not do as much as we would have liked to do largely because research as a whole was being cut back sharply from the administration's request in order to meet the defense outlay target established by the

budget summit. However, the tech base fared very well compared to the rest of the defense research budget.

SPECIFIC PROGRAMS

The conference authorized additional funding for several DARPA projects which support technologies identified by DOD earlier this year as critical to national security. All of these projects involve long-term, high-risk, high-leverage research, which the private sector simply will not adequately fund with their short time horizons and high cost of capital. The bill adds $40 million for the x-ray lithography program; $25 million for the digital gallium arsenide program; $20 million for the high resolution display program; $12 million for the artificial neutral network research program; $9.6 million for high temperature superconductivity; and $3 million for the consolidated DOD software program. These technologies were identified in the first critical technologies plan, which was submitted to Congress in March 1989 under a provision developed by my subcommittee and included in last year's Defense authorization bill. In our analysis following receipt of the report, these programs were determined to be most underfunded.

We agreed with our House counterparts that a robust program in antisubmarine warfare [ASW] is urgently needed to counter improvements being made by the Soviets in quieting their submarines. Accordingly, the conferees agreed to increase funding for antisubmarine warfare research and exploratory development programs by nearly $33 million.

CRITICAL TECHNOLOGIES PLAN

As mentioned above, we found the first DOD-DOE critical technologies plan, submitted March 15, 1989, to be a useful roadmap of the most important technology base programs. However, we also felt it could be improved. The conferees agreed to a provision I drafted to strengthen our national critical technologies planning process. The provision directs the Office of Science and Technology Policy to prepare a biennial national critical technologies report, with the first report due to Congress next November. The panel to prepare the report will include representatives from the private sector. This report will serve as a check on the DOD-DOE defense critical technologies plan and will bring in additional agencies charged with civilian technology research including NASA and the Department of Commerce.

The provision also asks DOD and DOE to strengthen their annual critical technologies plan in several respects. We want a lead organization designated for each of the critical technologies, so we know who is responsible for progress or lack thereof, compared to other nations. We want a summary of that lead organization's plan, including how it intends to involve other DOD and DOE organizations, other Federal agencies, and the private sector. We want more detailed budget information on both past and future funding. We would like to see improvements in the international comparisons on the technologies.

Mr. President, I believe these reports can serve both the executive branch and the Congress as we seek to ensure continued American technological leadership in the areas of greatest importance to our long-term national security and economic prosperity. We perhaps no longer can seek preeminence across the board, but in my view we must do so in at least this short list of critical technologies. With limited resources, we must make choices and these documents will help us make those choices.

DOD ROLE IN EDUCATION

The conferees also included bill and report language indicating their serious concerns over the recent decline in the United States' science and engineering work force and the potential impact of this decline on national security. The conferees included a sense of the Congress provision included in the Senate bill directing the Secretary of Defense to take actions to encourage and promote growth in the number of U.S. citizens studying science and engineering. The bill also provides a permanent authorization for the Defense Science and Engineering Graduate Fellowship Program, initiated last year by a Hatfield-Nunn amendment to the fiscal year 1989 Defense appropriations bill. The bill provides $10.5 million in fiscal year 1990 and $11 million in fiscal year 1991 for this program.

Mr. President, this is our first effort to rationalize DOD's role in science and engineering education. I expect the Subcommittee on Defense Industry and Technology to continue to pursue this area in future years.

BALANCED TECHNOLOGY INITIATIVE

The administration's request for the balanced technology initiative [BTI] was increased by $32 million to a total of $238 million to keep funding at the same level as fiscal year 1989. The conferees noted, however, their deep concern over the lack of Department of Defense support, leadership and guidance for this important initiative and reaffirmed the original congressional intent that the Secretary of Defense and the Director, Defense Research and Engineering, should take a strong role in providing management and oversight for this program.

INDUSTRIAL BASE

The conferees continue to be concerned about the Nation's defense industrial base. Therefore, we tried to address critical shortfalls both in funding for Manufacturing technology programs and in the industrial base planning process.

FUNDING

We authorized an additional $67 million for manufacturing related programs, $25 million to the Air Force manufacturing technology program to keep it at last year's level, $5 million to the Navy for its Center of Excellence for Composites Manufacturing, $30 million to DARPA's initiative for concurrent engineering, and $7 million to DARPA's continuous fiber metal matrix program. We fully funded other manufacturing technology programs, including the $100 million request for SEMATECH, the semiconductor industry's manufacturing initiative now in its third year.

The conferees also recommended continued support for the National Center for Manufacturing Sciences, the National Powder Metallurgy R&D Center, and the Low Articulating Robotic Systems Program and the establishment of a Center of Excellence for Advanced Flexible Manufacturing Systems.

Mr. President, this again was one of the few research areas to get a significant infusion of funds. Manufacturing technology programs, like the tech base, were neglected in the Reagan buildup. The National Academy of Sciences, the Center for Strategy and International Studies, and numerous other groups have called for increased funding of generic manufacturing research in the fields most important to the Defense Department. This is an areas where the defense industry has little incentive to make adequate investments in the defense sector and where American industry has fallen down even in the civilian sector. There is a broad consensus that DOD has not given sufficient attention to this area and it will be an issue of continuing concern to both committees.

CRITICAL INDUSTRIES PLAN

Mr. President, I believe that our industrial base planning has been woefully inadequate thus far. In an attempt to improve it, the conferees agreed to a provision which expands the duties of the Defense Industrial Base Office to make that office responsible for identifying those industries most critical to national defense applications of the technologies identified in the annual critical technologies plan and for developing the capability to gather, analyze and assess information on all aspects of the defense industrial base. In conjunction with the critical technologies plan, we direct the Defense Department to submit a report on the defense industrial base next March, in which we expect critical industries to be discussed and means for insuring their viability to be identified.

DEFENSE TRADE

COMMERCE DEPARTMENT ROLE

The conferees agreed to a Senate provision which would further

strengthen the role of the Department of Commerce in the negotiation, renegotiation and implementation of memoranda of understanding with foreign governments relating to research, development, or production of defense equipment. This amends a provision included in last year's Defense authorization bill. We are essentially using the Secretary of Commerce as a check to insure that these MOU's are reciprocal and do not have a significant adverse impact on our industry.

DEFENSE OFFSETS

The conferees also included a provision regarding defense offsets. This follows up a mandate in last year's defense authorization bill to develop a U.S. policy on offsets and to get on with negotiations with our allies to stem the adverse impacts that offsets have on our industrial base, especially at lower tiers.

Since we have seen little response to last year's mandate thus far from the executive branch, with the exception of the Korea FX negotiations, we are directing the President to address the offset issue in the negotiation and renegotiation with our allies of reciprocal procurement MOU's. This will be an area of continuing interest for our committee.

ACQUISITION REFORM

The conferees adopted several provisions intended to improve the acquisition process. Action on others was deferred until next year. I regret that we were not able to do more in this area. However, I would once again like to thank Senator WALLOP for his work in this area, and the strong support he provided both in committee and in conference on these issues.

PERSONNEL REFORM

All of the Senate's provisions on acquisition personnel reform were rejected by the House. These included a proposal for ten 25,000 person demonstration projects, four reserved for DOD and one for NASA; a proposal to increase pay for 500 DOD scientists and engineers and 25 DOE managers to up to $134,250; and a proposal to waive the current penalty for further Government service for up to 1,000 military retirees in scientific, engineering, professional and managerial positions in DOD and 250 military retirees in similar positions in DOE.

The Senate had included these provisions in an attempt to respond to the acquisition personnel recommendations made by the Packard Commission in 1986, by Secretary Cheney's Defense Management Review this year, and by the Secretary of Energy Watkins in testimony before the Armed Services and Energy Committees.

In the course of the conference, the administration proposed a compromise which would have provided for up to eight 25,000 person demonstration pay projects, four reserved for DOD; allowed up to 400 critical positions Governmentwide to be paid up to cabinet-level salary—currently $99,500; and given OPM authority to waive the penalty for further Government service for both military and civilian retirees on a case-by-case basis. That compromise was acceptable to the Senate, but not the House, which insisted that any relief provided in this bill would endanger the prospects for comprehensive reform of the civil service pay system and of executive, judicial, and congressional salaries. My colleagues and I countered that these modest steps would not relieve the pressure for reform and instead would be regarded as a signal of congressional intent to tackle this issue.

Mr. President, I regret the outcome. I wish House Civil Service Committee Chairman BILL FORD and OPM Director Connie Newman well in their efforts to fashion comprehensive reform proposals that could win congressional approval next year. I am convinced that strengthening our civilian personnel is the single most important action within the Congress' power to take to improve the defense acquisition system and to address the crisis in the DOE weapons complex. I therefore intend to remain active in pushing for action as a member of both the Armed Services Committee and the Governmental Affairs Committee.

POSTGOVERNMENT EMPLOYMENT RESTRICTIONS

The conferees agreed to a number of changes in the post-Government employment restrictions that had been enacted on a Governmentwide basis last year. This built on a provision Senators GLENN, LEVIN and I had authored in the Senate bill. The changes reemphasize the importance of precluding abuses of the "revolving door," but clarify the application of the law so that it does not act as a disincentive to the healthy interchange between the public and private sectors, particularly in terms of encouraging people from industry with technical and managerial skills to engage in public service.

COMMERCIAL PRODUCTS

The conferees also included a provision directing DOD to take certain specific actions to increase the use of commercial products. This built on a provision authored by Senator LEVIN in the Senate bill. For example, DOD must develop a simplified, uniform contract for the acquisition of these off-the-shelf items. DOD must also revise existing regulations to ensure that contractors are required to provide cost or pricing data only when that is necessary to protect the public interest. The conferees have directed DOD to establish a 3-year demonstration program for the procurement of military clothing using a solicitation that reflects typical commercial solicitations for these same items. This program should encourage the participation of vendors that currently do not supply these items to the military.

UNIFORM REGULATION REGARDING DISSEMINATION OF ACQUISITION INFORMATION

The recent Pentagon III Wind scandal reveals that DOD still lacks clear rules and adequate enforcement procedures to control the release of nonpublic acquisition information. Therefore, the conferees have agreed upon a provision that was included in the Senate bill that requires DOD to develop a single, uniform regulation regarding the dissemination of, and access to, acquisition information.

TECHNOLOGY TRANSFER

Mr. President, I would also like to comment briefly on the technology transfer provisions included in the conference report. These provisions, for the first time, put Government-owned, contractor-operated national laboratories under the Stevenson-Wydler Act of 1980. The bill gives the labs statutory authority to negotiate cooperative research and development agreements, provides proprietary protection for technology developed under those agreements, and establishes technology transfer as a mission for the Department of Energy.

The report includes three key components included in our subcommittee's markup of the bill. The first is language which authorizes the laboratories to negotiate cooperative research and development agreements [CRADA's] on behalf of the Government, with industry, universities, nonprofits, and small business incubators. These cooperative agreements are subject to expedited approval procedures from the Department of Energy.

I am concerned, however, that our intent in regard to the agency approval process be clear. Although the conference report makes clear that a purpose of section 12 of the Stevenson-Wydler Act is to allow prompt consideration and disposition of proposed CRADA's, industry might at first consider the contemplated sequential approval process, first of the work statement and then of the CRADA itself, as being conducive of anything but promptness.

However, there is nothing in the language of section 12 as now amended that specifically requires a sequential approval process. Section 12 only provides that no CRADA may be entered into without an approved work statement—which must be reviewed within 90 days of submission and an approved CRADA—within 30 days of submission. Accordingly, when time is of the essence, laboratories may appropriately provide a proposed CRADA in its entirety for consideration and disposition by the Agency, ask that the CRADA be deemed formally submitted immediately upon approval of the joint work statement, and expect that

the Agency will complete its review and disposition well within 120 days, that is the 90-day timeframe set forth for review and disposition of a joint work statement and the 30-day period set forth for review of the CRADA. It would be this Senator's expectation that in many instances agency disposition should occur with 60 to 90 days.

The second key component is clear language authorizing the parties to any such agreement, including the labs and the Government, to grant proprietary rights in the technology developed under the agreement, including protection for computer software and technical data.

And third, the bill establishes technology transfer as a stated mission in the Atomic Energy Act for the Defense Weapons Complex of the Department of Energy. Amending the mission in this way will ensure future DOE cooperation in technology transfer matters, as well as pave the way for future expansion of these provisions.

Mr. President, I feel that this is a good bill, and one which merits the support of the Senate. Overall, I am pleased with the results of our conference, and I believe that we continue to achieve the goals of our subcommittee and the Senate in supporting the defense technology and industrial base and continuing to seek to streamline the defense acquisition process. Again I would like to commend Senator NUNN, as well as my other colleagues on the Armed Services Committee, for their good work on this bill. I urge my colleagues to support this legislation.

I yield the floor.

Mr. KENNEDY. Mr. President, I rise in support of the National Defense Authorization Act for Fiscal Years 1990 and 1991.

The Projection Forces and Regional Defense Subcommittee, which I chair, reviewed a fiscal year 1990 budget request from the administration totaling $23.4 billion in procurement and research and development for programs affecting the Navy, the Marine Corps, the Air Force, the U.S. Transportation Command, and Special Operations Forces. Of the amount requested, $23 billion has been authorized in the legislation presently before the Senate.

I want to single out three important initiatives that the Projection Forces Subcommittee has pursued. Each of these initiatives is the consequence of hearings that the subcommittee held this past year and all are supported by provisions in the Defense authorization bill.

First, the Projection Forces Subcommittee has concluded that the military requirements of the United States necessitate an increase in our force of fast sealift ships. This need for additional fast sealift results primarily from our current inability to meet our commitments for the reinforcement of NATO Europe. But, if the negotiations on reduction of conventional forces in Europe prove successful and troop levels are reduced we will become more reliant on sealift for the defense of Europe.

Traditionally, military sealift has been provided for the nation by the U.S. merchant marine. Due to the declining numbers of ships available and suitable for military sealift, it is becoming necessary to provide for this requirement from the defense budget. This creates strains in the shipbuilding account where we would ordinarily only fund combatants and combat support ships. But, by requiring sealift ships to have multimission capabilities, we ease the pressure on the shipbuilding account while still investing in technology that may have significant benefit for the Nation's merchant marine. Toward this end, the bill authorizes $30 million for fast sealift technology development. In addition, the bill authorizes $20 million for long lead items toward the construction of the first ship in a new class of fast sealift ships. The Secretary of the Navy has been directed to report to the Congress the design details and a concept of operations for this new class of ships before any funds may be obligated.

The subcommittee's second major initiative focuses on ensuring that aircraft carrier technology will be able to meet the threats that our fleet will face well into the next century. The current Nimitz-class carrier design was developed during the 1960's. This design continues to serve us well and the Navy is constantly engaged in upgrading this technology. But, the next generation of carriers that we build will have to operate past the midpoint of the next century. To evaluate the requirements and technology needed for these carriers, the Defense authorization bill directs the Secretary of the Navy to commission an independent study of these questions. The results of this study will be crucial to future congressional oversight of our aircraft carrier requirements.

The third major initiative contained in the conference agreement involves pursuit of more advanced technologies for ship propulsion. Specifically, the bill places increased emphasis on integrated electric drive and requires its installation in a combatant ship before the year 2000. This system could lead to potentially revolutionary developments in naval technology by allowing much greater flexibility in ship architecture and by vastly increasing the power levels available for propulsion, sensors, and weapons.

In addition to these three initiatives, the conference agreement authorizes almost $11 billion for shipbuilding and conversion. Ships authorized include one Trident submarine, one SSN-668 class submarine, five DDG-51 class guided missile destroyers, three MCM-1 class mine countermeasures ships, three MHC-51 class coastal minehunters, one LSD-41 class landing ship dock, one AOE-6 class fast combat support ship, one Tagos ocean surveillance ship, and three oceanographic research ships. Twelve Landing Craft Air Cushion [LCAC] vehicles also were authorized. Authorization was included for the conversion of one AO [Jumbo] oiler, one aircraft carrier service life extension, and the refueling and modernization of the USS *Enterprise.*

Multiyear procurement authorization was granted for a number of programs among which are the DDG-51 guided missile destroyer program and the SH-60B and F antisubmarine helicopter programs.

Finally, with respect to military airlift the conference agreement reduced the amount requested for the C-17 cargo aircraft program. Continuing difficulties in that program suggest that slowing it and reducing some of the concurrenty between the development of the aircraft and its production is indicated at this time. Accordingly, the authorized level of $2.1 billion for the C-17 represents a reduction of $393.9 million to the requested amount for the program. At this reduced level, four aircraft may be procured instead of the six requested.

Mr. President, the National Defense Authorization Act for Fiscal Years 1990 and 1991 represents hard work over many months by members and staff. It has been constructed with care and deserves the support of the Senate.

Mr. DECONCINI. Mr. President, on balance I would like to state that I am very pleased with the work of the conference on the fiscal year 1990 DOD authorization bill. The bill, in my judgment, supports Secretary Cheney's overall plan to balance resources among many critical programs that are needed to maintain a strong military while facing up to the challenges presented by a tighter budget. I commend the conferees, and especially Senate Armed Services Committee chairman, SAM NUNN, and the ranking minority member, JOHN WARNER, for their efforts in reaching a reasonable compromise on some very complicated and hotly debated issues regarding our military force structure.

The question of the scope of our strategic modernization program was particularly troublesome this year. There was considerable disagreement among the Members on support for the Stealth bomber, the MX and Midgetman missile systems, the Trident missile, and the strategic defense initiative [SDI]. I support the conference committee's final decision to fund these important strategic programs, albeit at a slower rate. I also believe

the committee was correct in its decision to reduce the SDI Program. The authorized amount of $3.8 billion, which includes $220 million from the Department of Energy account, is adequate to sustain a solid research program in strategic defense while scaling back on premature plans to build or develop a near-term system.

I am pleased that the conferees authorized $234 million for the development of the LHX helicopter. This aircraft will be needed in the future to match the Soviet buildup of tanks and improved battlefield weapons. I must, however, express my concern over what I consider a disregard for the current needs of the Army and its aviation modernization program. The conference report authorizes the procurement of only 132 Apache helicopters and maintains Secretary Cheney's termination of the program after fiscal year 1991. I believe this is a mistake, especially considering the Army's need for this helicopter and the large gap between the termination of the Apache production after fiscal year 1991 and the delivery of the first LHX helicopters in fiscal year 1997. The authorized production raises the total inventory of Apache helicopters to 807, an amount far short of the 1,031 aircraft originally sought by the Army. This leaves seven Army battalions—two active, two Reserve, and three National Guard units—without a modern heavy attack aircraft. I find it ironic that the report authorizes $256 million for the procurement of 6,200 laser-guided Hellfire antitank missiles, an increase of 2,000 missiles and $70 million over the DOD request for fiscal year 1990, yet does not fully provide for the primary aircraft which carries these missiles. I know that the House Armed Services Committee supported the purchase of at least 240 Apaches under a multiyear contract (fiscal year 1990 through fiscal year 1993), similar to the agreement reached in the fiscal year 1989 Defense Appropriation, so I am hopeful that the conference restriction on Apache procurement will be revisited next year.

Another disappointment for me in reviewing the authorization report was the complete lack of funding for continuation of SR-71 aircraft operations. The House and Senate Appropriation Committees both felt very strongly that this aircraft provides a unique capability in intelligence collection and should remain in our active inventory. The Defense Appropriation conferees provided $210 million to maintain the program and agreed to transfer operations to the Air National Guard. I suspect that the Armed Services Committees responded primarily to the Air Force desire to terminate Air Force responsibility for funding the SR-71 Program and that the Members do not have serious objection to a continuation of the aircraft operations. This is an issue which is expected to be addressed shortly during debate on the Defense appropriations bill.

I am very pleased that the report authorizes $450 million to carry out the Defense Department's drug interdiction and law enforcement support activities in fiscal year 1990. This is an increase of $150 million over last year's levels. It provides $70 million to the National Guard to increase their activities in the war on drugs. It also includes a requirement that the Department of Defense provide a separate budget proposal for the antidrug program in its annual submission. I commend the committee members for their timely action in response to this critical national problem.

As a longtime supporter of the National Guard, I was pleased to see that the report authorizes $2.2 billion for the National Guard and Reserve forces. This amount is $846 million above the administration's budget request, but they are funds which are clearly needed to provide the Guard with modernized equipment and to increase their readiness.

In the technology base, the conference report provides $3.51 billion, an increase of $220 million over the administration's budget request. This increase signals a continuation of the strong support by the Congress for defense science and the maintenance of a strong defense industrial base. I was especially pleased that the conferees provided full support for the Semiconductor Manufacturing Technology [Sematech] Program, an item of interest to many in my State of Arizona.

In conclusion, I believe the fiscal year 1990 Defense authorization conference report strikes an appropriate balance between the need to maintain a strong national defense and the desire to hold the ceiling agreed to on the defense budget. Clearly, the events in Eastern Europe and around the world will have an impact on future strategic and conventional defense requirements. In my judgment, however, the document before us today is a carefully constructed compromise which should serve the Nation well regardless of uncertainties in the year ahead.

Mr. ADAMS. Mr. President, today the Senate is debating the conference report on the Department of Defense authorization bill for fiscal years 1990 and 1991. The conference report, which has already been adopted by the House, would provide more than $305.5 billion for defense activities for fiscal year 1990. This amount reflects the so-called budget summit agreement reached between the Congress and the White House concerning how much will be spent on defense and domestic programs.

I do not agree with every provision of the conference report. In fact, there are several programs, such as the MX rail garrison and the strategic defense initiative, which I opposed during the Senate's consideration of the original authorization bill and do so today.

Additional questions can and should be raised about the advisability of spending this amount of money on defense programs at a time when the United States is facing serious budget problems and so many domestic needs.

We are also witnessing almost unimaginably dramatic changes taking place in Eastern Europe. We have witnessed extraordinary events in East Germany. Today, Lech Welesa addressed a joint meeting of the House and Senate. Clearly, the world and our strategic tension with the Soviet Union is rapidly changing and yet the bill before us would still fund virtually every strategic system including the SDI, the MX, the Midgetman, and Trident 2.

Nonetheless, in case after case, the conference report reduces funding or adds constraints to weapons programs compared to the Senate bill. Funding for SDI not only declined from the Senate bill, but declined below the level appropriated in fiscal year 1989 by more than $200 million. The conference report funds fewer B-2 aircraft and incorporates both the House and Senate "fly-before-buy" testing requirements. The conference report cut $150 million from the intercontinental ballistic missile programs and imposed, for the first time, a statutory limit on the number of MX missiles to be deployed at 50.

In an area of enormous importance to the State of Washington, the bill increases the level of funding for the environmental restoration and defense waste management at the Department of Energy defense plants by 68 percent over this year's level and 27 percent over the Bush administration request.

Later this week, as we debated the conference report on the Defense appropriations bill, we will be asked to approve even more dramatic changes in spending and to transfer funds from the defense budget to the war on drugs and to aid to Poland.

Clearly, the changes that are occurring in the Soviet Union and in Eastern Europe offer the hope and indeed demand that we revisit the full range of our national defense posture and requirements. We are at an important crossroads in terms of reassessing our role in the world, our obligations around the world, and our defense needs. This bill does not go as far as some of us would like toward responding to this changing climate, but we should all recognize that the world is changing. There is little doubt that in a few short months when we again take up this matter when the President submits his budget for fiscal year 1991 that new priorities must be debated.

Mr. NUNN. Mr. President, I know there are many Senators who have to leave. I ask, if there are no other Senators desiring to speak, that we have a vote on this conference report.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. There being no further debate, the question is on agreeing to the conference report. The yeas and nays have been ordered. The clerk will call the roll.

Mr. CRANSTON. I announce that the Senator from Hawaii [Mr. MATSUNAGA] is absent because of illness.

The PRESIDING OFFICER (Mr. CONRAD). Is there any other Senator in the Chamber desiring to vote?

The result was announced, yeas 91, nays 8, as follows:

[Rollcall Vote No. 299 Leg.]

YEAS—91

Adams	Ford	Mikulski
Armstrong	Fowler	Mitchell

NOT VOTING—1

Matsunaga

So the conference report was agreed to.

Mr. NUNN. Mr. President, I move to reconsider the vote.

Mr. WILSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CORRECTIONS IN NATIONAL DEFENSE AUTHORIZATION BILL

Mr. NUNN. Mr. President, last Thursday the House approved House Concurrent Resolution 225, which directs the enrolling clerk to make certain technical and conforming changes in the conference report on the National Defense authorization bill. In the days between House action and our consideration of the conference report which was just agreed to, further review of the bill has disclosed the need for a few additional technical and conforming amendments.

It is with those amendments in mind that I ask unanimous consent that the Senate proceed to the immediate consideration of House Concurrent Resolution 225, that such concurrent resolution be amended by the amendment I have sent to the desk, that there be no time for debate, that no other amendments to the resolution be in order, that the resolution, as amended, be agreed to, and the motion to reconsider be laid upon the table.

Mr. WILSON. Mr. President, there is no objection from our side.

AMENDMENT NO. 1130

(Purpose: To make corrections in conference report on H.R. 2461, the Department of Defense authorization bill for fiscal year 1990)

The PRESIDING OFFICER. The amendment will be dated.

The legislative clerk read as follows:

The Senator from Georgia [Mr. NUNN] proposes an amendment numbered 1130:

At the end of the resolution, add the following new paragraphs:

(4) In section 5—

(A) strike out the section heading and insert in lieu thereof the following (and conform the table of contents in section 2(b) accordingly):

"SEC. 5. ANNUAL OUTLAY REPORT";

(B) strike out subsections (a) through (h);

(C) redesignate subsection (i) as subsection (a) and in paragraph (3) of such subsection strike out subparagraph (C);

(D) redesignate subsection (j) as subsection (b); and

(E) redesignate subsection (k) as subsection (c) and strike out the period at the end of such subsection and insert in lieu thereof "unless the budget resolution is accompanied by a report that describes the difference between the budget authority and outlays for National Defense (function 050) in the President's budget and the budget resolution.".

(5) In the first sentence of paragraph (2) of section 121(c), strike out "using fiscal year 1990 funds".

(6) In section 1641—

(A) strike out the heading and insert in lieu thereof the following (and conform the table of contents in section 2(b) accordingly):

"SEC. 1641. ANNUAL DEPARTMENT OF DEFENSE CONVENTIONAL STANDOFF WEAPONS MASTER PLAN AND REPORT ON STANDOFF MUNITIONS"; and

(B) in subsection (a), strike out "Joint Standoff" and insert in lieu thereof "Department of Defense Conventional Standoff".

The PRESIDING OFFICER. Without objection, the unanimous consent request of the Senator from Georgia is agreed to.

So the concurrent resolution (H. Con. Res. 225), as amended, was agreed to.

Mr. McCLURE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UNANIMOUS-CONSENT AGREEMENT

Mr. MITCHELL. Mr. President, I ask unanimous consent that the majority leader, after consultation with the Republican leader, may proceed at any time to consider H.R. 3610, the District of Columbia appropriations bill, and that no amendments or motions to recommit, with or without instructions, with respect to the bill be in order.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. SIMPSON. Mr. President, there is no objection on this side of the aisle. I yield to the majority leader.

DISTRICT OF COLUMBIA APPROPRIATIONS, FISCAL YEAR 1990

Mr. MITCHELL. Mr. President, it is my understanding that there has been consultation and agreement to proceed to it.

Accordingly, I ask unanimous consent that the Senate now proceed to the consideration of H.R. 3610 the District of Columbia appropriations bill.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A bill (H.R. 3610) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1990, and for other purposes.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. ADAMS addressed the Chair.

The PRESIDING OFFICER. The Senator from Washington.

Mr. ADAMS. Mr. President, the bill before the Senate is the second District of Columbia bill for the fiscal year 1990, and pursuant to the order that has just been entered, we will not have any amendments to the bill. We hope to take the bill up, proceed through with it, if necessary have a rollcall on it, and then we will have completed this bill for the year.

Consideration of District appropriations has been extended due to a veto of an earlier version, H.R. 3026. This is an important bill. Mr. President, because the District appropriations bill this year contains $32 million to fight the war on drugs in the Nation's Cap-

ital, a war that the President himself enlisted in last spring when he said he wanted to make Federal funds available to help the Federal city.

The Congress responded with the funds, yet the President vetoed the bill over language concerning abortion. That language has been contained in the D.C. bill for 10 of the last 11 years, and which restricted the use of Federal funds in the cases where the life of the mother is in danger or in cases of rape or incest, which are promptly reported.

This bill is identical to the conference report on H.R. 3026, which the Senate approved October 16 by unanimous consent, except for a change in the abortion language.

We once again included an increase in Federal funds to fight the war on drugs. This bill contains $17 million to hire 700 additional policemen; $5 million for the D.C. courts to handle the increased caseload, including eight new judges; $600,000 for 10 additional prosecutors to handle increased juvenile drug cases, to speed child neglect and asset forfeiture cases; $1.7 million for drug prevention programs in the D.C. public schools; and $2 million for drug treatment programs for pregnant abusers.

In addition, we included $23 million in 1991 funds to complete construction of an 800-bed correctional treatment facility being constructed in southeast Washington. We have also included once again the $5 million to pay for housing D.C. prisoners in Federal prisons, and $72 million in D.C. funds for construction of a new prison and design of three others at the District's prison complex at Lorton, VA.

Mr. President, this bill also includes $430.5 million for the Federal payment. This payment is provided in the District in lieu of the Federal Government paying property taxes on its vast land holdings in the District. This payment has not increased in 3 years. In fact it is below fiscal year 1987 in that level. Since that time, the cost of city services has increased by 12 percent; Federal budget outlays have increased by 8 percent, with no increase in the Federal payment to the District.

Mr. President, I am pleased to report that recently the District established a Commission on Budget and Financial Priorities and committed $1 million to its work. I met with this Commission, and this Commission is charged with preparing a 5-year comprehensive financial plan for the years 1991 through 1995.

In addition, the Commission will review staffing and administrative overhead and employee compensation, and make a program-by-program review and examine the desirable overall level of tax revenues, including the level of the Federal payment.

Like the House, I believe this work is of the utmost importance and urgency in order to return the District to a sound financial footing.

Therefore, I encourage the District government to make Federal funds available through normal reprogramming procedures of up to $1 million to the Commission to match what we have made available from District funds, in order to look at this total problem of how the District government is run.

The District should look at Federal funds available to the Department of Corrections for the design and construction of the prison in Southeast Washington for the source of the reprogramming.

Mr. President, this is not a perfect bill. I would have preferred more funds for drug programs. I would have preferred to retain the original language on abortion. However, we are not able to accomplish those things this year. I am pleased that the language has been corrected in order to protect the integrity of the government of the District of Columbia to establish its own rules. This bill is the best we can do this year. It is past time to enable the District to proceed with its budgeted programs, rather than hold them hostage to the President's desire to have a particular type of provision or to impose his will on the citizens of the District.

Mr. President, we are offering a compromise on abortion, but this is not with regard to the District's funds. We have deleted language that would permit Federal funds to be used to perform abortions for poor women who are victims of rape and incest. I personally think the President is wrong to object to this kinder and gentler act of compassion for those who have the least and then are the victims of violent acts that leave scars that we can only imagine.

In an effort to ensure the speedy enactment of the drug emergency funds, we have deleted the language that would have allowed that type of use of Federal funds to perform abortions for poor victims of rape and incest. At the same time, we have retained a longstanding policy of restricting only the Federal funds in the bill and, therefore, preserve for District citizens the same rights enjoyed by all of the citizens of the United States; that is, to have their own elected representatives decide how their tax dollars should be spent on this issue.

Mr. President, this is not the best bill that we could devise. It is a bill all Senators can support. It contains critical Federal and local funs for the District's war on drugs and a compromise on abortion funding. I urge my colleagues to support this bill. I notice that my colleague from Texas has arrived. I, therefore, will yield the floor to my colleague from Texas.

Mr. GRAMM addressed the Chair.

The PRESIDING OFFICER. The Senator from Texas.

Mr. GRAMM. I want to congratulate our distinguished chairman. I believe that we have put together a bill that refocuses the priorities of the District of Columbia. I think it refocuses in the right direction toward law enforcement, toward regaining control of the streets, and toward strengthening the criminal justice system, and that is something that every citizen benefits from. I think it represents a good use of funds.

There still remains a dispute concerning the abortion language in the bill. I think that has been amply debated both here and around the country. So I think that we are now in a position to deal with this bill, and people can decide where they stand on the issues remaining. I think overall it is a good bill, and, again, I thank the chairman for his leadership.

Mr. ARMSTRONG. Mr. President, I suggest the absence of a quorum. I need just a moment to confer.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll

Mr. ADAMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DIXON. Mr. President, I rise to state that were there to be a rollcall vote on the conference report before us, I would be compelled to vote nay. When the report came before us the first time I objected, and I continue to object.

Let me make it clear, Mr. President, that my objection has nothing to do with the abortion issue that caused this bill to be vetoed by the President. My position has consistently been that I support Federal funding of abortion in case of rape, incest, or when the life of the mother is in danger.

I am continuing to oppose this bill because I think we need to send the government of the District of Columbia a message—they must do better to provide basic services to their citizens. It is inconceivable the amount of time one must spend in lines simply to register their vehicle or obtain a driver's license. As a former secretary of state in Illinois, I can attest that we are able to provide our citizens with both of these basic services in a prompt, timely manner. There is no reason that this city cannot do the same.

I sometimes wonder what the District government's priorities are. At a time when many basic services are deteriorating, the District is using scarce Federal funds to nearly double the budget of the Office of Cable Television.

We have watched for years now while the city has worked to bring

cable television to the District, and we have seen delay after delay brought on by incompetent management. To this day the municipal administration has still not completed wiring the city.

While this is a minor issue on its own, I believe it is representative of the recent mismanagement displayed by the District government in running the affairs of our Capital City. I have never believed that we, the Congress, should excessively interfere in the affairs of the District, but, because of the size of the Federal payment to Washington, we are, in effect, D.C. taxpayers. Mr. President, this is one D.C. taxpayer who objects.

The PRESIDING OFFICER. The Senator from Washington.

Mr. ADAMS. I know of no further debate.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 3610) was ordered to a third reading, was read the third time, and passed.

Mr. ADAMS. I move to reconsider the vote.

Mr. GRAMM. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ADAMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. LEAHY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. LEAHY. Mr. President, I understand we have a conference report on foreign operations.

The PRESIDING OFFICER. The Senator is correct.

Mr. LEAHY. I would move to consider the conference report.

The PRESIDING OFFICER. The question is on agreeing to the motion.

The motion was agreed to.

FOREIGN OPERATIONS, EXPORT FINANCING, AND RELATED PROGRAMS APPROPRIATIONS, FISCAL YEAR 1990—CONFERENCE REPORT

Mr. LEAHY. Mr. President, I submit a report of the committee of conference on H.R. 2939 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the bill (H.R. 2939) making appropriations for the Foreign Operations, Export Financing, and Related Programs for the fiscal year ending September 30, 1990, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of November 11, 1989.)

Mr. LEAHY. Mr. President, I am pleased to present to the Senate the conference report on the foreign operations, export financing and related programs bill for fiscal year 1990. The report is the product of a long, difficult conference during which 295 issues were resolved, including several extremely controversial and important matters.

Before turning to the contents of the conference report, I want first to thank my good friend and colleague, the ranking member of the Foreign Operations Subcommittee, Senator KASTEN. It would be impossible to overstate how cooperative and supportive Senator KASTEN has been in working through the issues and reaching the results reflected in this report.

There is a lot of talk in this body about bipartisanship, going back to the Vandenberg days especially in foreign affairs. I think it can be said without exaggeration that Senator KASTEN and I, and all the members of of the Senate Foreign Operations Subcommittee, actually do practice real bipartisanship in the area of foreign assistance. We were able to resolve all conference issues without a single vote of the Senate conferees.

Mr. President, the principal source of the difficulties in this bill is the lack of resources to fund both the programs that the administration asserts are high priority and those that the Congress strongly supports as well.

This fundamental difficulty was compounded by an unusually inept and feckless performance by the administration, particularly the Department of State, throughout the process. The approach taken by the administration was to promise everything to everyone in foreign aid, to make "commitments" at the highest levels to foreign governments, and then to leave it to Congress to make the hard choices among competing programs for insufficient resources.

I will provide details about funding levels in my prepared statement for the RECORD. To save time, I will simply summarize some of the main features of the conference report.

First, the conference agreed to provide a $50 million U.S. contribution to the paid-in capital of the International Bank for Reconstruction and Development, the World Bank. However, at the insistence of the House, the Senate conferees reluctantly agreed to defer to a future supplemental the question of provision of "callable capital" by the United States to the World Bank. This action means our paid-in capital contribution will not be usable by the World Bank until Congress provides the $2.41 billion in callable capital.

The position of the Senate conferees is that we should provide the callable capital at the earliest opportunity next year. Because of the failure of the administration to fund adequately U.S. refugee programs, there will have to be a refugee supplemental in fiscal 1990. It is my intention to seek approval by the Senate of the callable capital required by our contribution of $50 million in paid-in capital. To fail to provide the callable capital would be an act of gross irresponsibility. By late spring or early summer, the U.S. voting share in the World Bank would decline sharply, possibly to a level negating our veto in World Bank decisions.

On a more positive note, the conference provides over $538 million in U.S. assistance to Poland during this vital period of transition to democracy and non-communist government. This is a far more appropriate response to the historic events taking place in Poland than the paltry $10 million initially requested by the President. The conference provides over $100 million in direct assistance to Poland, establishes a new Trade Credit Insurance Program of $200 million specifically for Poland, and contributes $200 million to a Poland Economic Stabilization Fund. Additional amounts are provided to help Solidarity in the transition to democracy and to assist with Poland's most urgent environmental problems.

In addition, the conference has taken a major initiative to assist the Andean nations in the war against the drug lords. To a drug package of more than $240 million in the bills of both Houses, the conferees added an additional $125 million from funds transferred from the Defense appropriation, raising the U.S. commitment to the international drug effort to more than $360 million in fiscal 1990. The Foreign Operations conference also contributed another $60 million in across the board cuts for counternarcotics programs as mandated by the drug amendment in the Transportation appropriation conference.

Mr. President, those are the highlights of this conference report. I will now provide more details about funding levels agreed to by the conferees.

Overall, the conference report provides $14.6 billion in foreign assistance of all types for fiscal 1990, a nominal increase of some $400 million over fiscal 1989. After accounting for inflation, this is approximately a 2 percent real reduction in foreign aid, continuing the trend since 1985 of steadily declining resources for foreign assistance. The $14.6 billion is just under $500 million below the President's request for fiscal 1990.

Foreign aid is not politically popular, either in Congress or among the American people. With next to no constituency, fighting for sufficient resources for foreign aid is not easy. Nevertheless, the United States has made commitments which must be honored, and we have important foreign policy, developmental, trade and humanitarian interests which depend on adequate funding for a wide range of foreign aid programs. Even though it may not be politically advantageous, the Senate conferees felt a responsibility to work for funding to meet the high priority programs needed to meet those commitments and needs.

In title I, the conference recommends $1.88 billion in U.S. contributions to the Multilateral Development Banks, nearly $100 million below the President's request and about $340 million more than last year's level.

I have already described the conference's action on the World Bank. Let me stress again to Senators how important it is that Congress provide for the callable capital in a supplemental next year so that U.S. leadership in the World Bank is not further undermined. The House's adamant insistence, to the point of threatening the entire conference, on not providing the callable capital is regrettable. It is folly to weaken that institution at a time when the United States is looking to the World Bank to play a leading role in helping Poland overcome its profound economic problems, when we are urging the World Bank to take a central part in our overall strategy for dealing with international debt, and when we are finally making headway in improving the Bank's performance on global environmental problems.

Fortunately, the Senate conferees were able to prevail in insisting on a full U.S. contribution to the Inter-American Development Bank and reasonable contibutions to the other international financial contributions. This includes a $140 million contribution to the Enhanced Structural Adjustment Facility, a fund designed to help the poorest nations cope with the social costs of economic reforms aimed at rationalizing inefficient, overly centralized economies.

In title II, I am pleased that the conference was able to provide $6.7 billion for bilateral assistance, an increase of about $300 million over last year and about $10 million more than the President's request. Bilateral assistance is what most Americans think of when they hear about U.S. foreign aid. These are the programs aimed at helping nations develop sustainable economies and meet the basic needs of their people for food, clothing, housing, education and jobs. The conferees agreed to fund a major new global warming initiative under the auspices of the Agency for International Development. This global warming initiative will, I believe, activate AID to play a much more active and leading role in addressing the urgent problems of deforestation, greenhouse gases and alternative forms of energy in the Third World.

The conferees provide $565 million to assist the countries of sub-Saharan Africa, among the poorest and most needy nations in the world. The conference continues to afford AID wide flexibility in using these funds under the Development Fund for Africa. The goal of the conferees is to give AID the latitude to respond to the special problems of sub-Saharan Africa.

In title II, the conferees provide $370 million for the migration and refugee assistance account in the Department of State, the President's requested level. However, recognizing that this level is grossly inadequate to meet the urgent needs of refugees around the world, the conferees also agreed to increase the emergency refugee and migration assistance account from the requested $10 to $50 million. This should enable the administration to meet the most pressing refugee needs until a refugee supplemental can be submitted to Congress. The conferees believe the migration and refugee assistance account is underfunded by at least $100 million, and urge the administration to come forward with a supplemental to meet this shortfall as soon as possible.

In another step to help meet refugee needs, the conference agreed to provide an additional $15 million to the Migration and Refugee Program of the Department of State to assist the Refugee Entrant Program of the Department of Health and Human Services. The administration refused to seek adequate funding for that program, leaving a severe funding shortage for absorbing new refugees into American society. This left an additional burden on the States which the conferees agreed was inequitable.

The conferees are especially pleased to be able to provide $168 million for the Peace Corps, a $5 million increase over the $163 million requested by the administration; $2 million of this increase is to assist in the implementation of Peace Corps programs in Poland and Hungary. While this is only half of the increase the Senate wished to provide, it is all that could reasonably be found without doing severe harm to other essential programs.

Under title III of the bill, the conferees provided $5.5 billion for military assistance programs, a reduction of $250 million from fiscal 1989 and over $370 million from the President's request. Within those totals, the conference provides $4.66 billion for Foreign Military Financing Program activities and $47.4 million for the International Military Education and Training Program.

In title IV, the conferees provided a total of $647 million to support export assistance in the Export-Import Bank and the Trade and Development Program. It was extremely difficult to provide this level of export assistance, given that the President initially requested only $100 million for the Export-Import Bank direct loan program. Later, he raised his request to $500 million for Eximbank, though he transferred no funds to Foreign Operations to cover this additional request. Only through painful choices was the conference able to agree on $615 million for the direct loan program and $32 million for the Trade Development Program. As part of its final action on the Eximbank, the conference agreed to allow up to $110 million to be used as tied aid credits to combat predatory trade financing practices by foreign competitors. The conference also agreed to establish a $20 million interest subsidy account under which Eximbank could buy down interest rates when necessary to assist American businesses to compete against subsidized foreign financing. These measures reflect the determination of the conference to protect and assist American export businesses to have a more level playing field in competition with government-aided foreign exporters.

In other actions in general provisions under title V, the conferees agreed to continue strong United States support to the Afghan people in their struggle for freedom and independence. The conferees provided $70 million in bilateral humanitarian assistance for Afghan refugees, and a contribution of $13.5 million for a new Afghan Emergency Trust Fund under the auspices of the United Nations aimed at helping Afghan refugees return to their homes after peace is finally achieved. This means not less than $83.5 million will be available to assist the Afghan people cope with the ravages of this cruel war.

In addition, the conferees agreed to direct AID to provide not less than $50 million for the immunization of children, and to require that at least $200 million be spent on child survival activities worldwide. The conferees are determined that a major effort shall be made to attain the goal of universal child immunization.

Further, as part of the global effort to curb the drug trade, the conferees agreed to provide the President with new authority under section 506(a) of the Foreign Assistance Act to draw on up to $75 million in defense equipment and services specifically to assist in counter-narcotics activities, humanitarian needs, and refugee assistance. This authority is separate from and in addition to existing authority the President has to use up to $75 million in defense stocks and services in emergency situations requiring military assistance. The conferees believe this will give the President new means to combat the scourge of drugs.

Mr. President, this is a brief summary of some of the main elements of the Foreign Operations bill as reported by the conference in this report. With considerable difficulty, the conferees have put together a bill which meets essential U.S. foreign policy, humanitarian, development and export assistance objectives. I would be less than candid if I did not also state that in many areas this bill falls short of funding valuable programs at levels to meet demonstrated needs. The conferees had to make some very hard choices, and real cuts were made in important programs. As we struggle to meet deficit reduction targets, this is as it should be. The foreign operations bill, as with most Federal spending programs, must bear its fair share of reductions.

Mr. President, I urge my colleagues to approve the foreign operations, export financing and related programs appropriations bill for fiscal 1990 as reported by the conference.

The PRESIDING OFFICER. The Senator from Wisconsin.

Mr. KASTEN. Mr. President, I would like to express my appreciation to the chairman of the subcommittee, Senator LEAHY. At all stages of this legislation, he has been very supportive and cooperative. I would also like to thank the staff of the subcommittee for their hard work.

We have labored on this bill for 10 months, Mr. President. During that time we have witnessed some remarkable events in the world, some of which none of us would have believed possible when this process started.

The Soviet Union has liberalized its emigration policies, allowing unprecedented numbers of Soviet Jews and other minorities to emigrate to the United States and Israel. Poland, Hungary, and East Germany are in the process of political liberalization and economic change, with seeming Soviet approval. We hope and pray that it continues, Mr. President, but even it not, that part of the world will never be the same.

In Colombia, the government has declared war against the insidious drug lords who are poisoning out youth and sapping our State and local resources. Other Latin American countries are coming to grips with this scourge as well, and the administration has offered to help them make tough decisions in this long-term effort.

As we focus our attention on these events, we must not lose sight of equally important changes taking place in the Middle East, Africa, the Philippines, Asia, and in Central America. Many of these changes have been because the United States has been strong, consistent, and responsive.

But even as we nurture and savor the objectives we have pursued for so long, we have become more constrained in our ability to deal with world events. This is not good for the world at large, Mr. President, nor is it good for America.

We have handled our foreign policy resources like a cheap watch. We have wound it tighter and tighter each year, and the pieces will soon fly apart. I only hope that when the watch breaks, the damage to the U.S. national security—which is what we are talking about here—is minimized and that we can design a new and more responsive system to replace it.

The conference report before us may be the final turn on that watch stem. It does a number of good things for important countries and programs, including Israel and Egypt, Pakistan, Poland, and Hungary, refugee admissions and assistance, antinarcotics, efforts, and a variety of economic, developmental, humanitarian and security programs. But to accommodate all these good things, we do not provide enough funds to carry out a number of other critical programs. When this bill is signed into law, if it is signed, the administration will have the unenviable tasks of deciding whether to continue to fund the process of democratization in Central America or the Philippines; whether to fund continued economic development in Africa or the Caribbean. Whether to abandon our assistance commitments to some of our NATO partners or to support friends like Thailand, Oman, and Tunisia. These are not choices that the administration should have to make.

Mr. President, I know that the foreign assistance programs have no national constituency. But it is our responsibility to do what is right, not just what is easy.

I realize that the budget deficit is not going to disappear, and that we will have to more creatively meet our objectives with limited resources. We have to respond to emerging requirements and new opportunities without damaging equally important programs that aren't in the latest headlines.

Mr. President, this bill may never be enacted. The President has threatened to veto if the U.N. fund for population activities and the so-called leveraging provisions were not deleted. And they have not been. So, we may find outselves with the opportunity to build a new watch very soon. I do not know whether there will be enough time. I suspect not. But I challenge my colleagues in the Senate and in the other body to start the process now, before it is too late, before the damage to U.S. national interests is too severe. And I call upon the administration to work with us in a cooperative, bipartisan way to do what is right, what is absolutely critical to America's future. This certainly will not be easy, but I strongly believe that it must be done.

POLAND

This conference agreement, incorporates $532 million for the emerging democracies in Poland and Hungary. This is the bipartisan downpayment for a multiyear effort to encourage democracy in Central and Eastern Europe.

The appropriations committees have funded a package for Poland and Hungary that includes the three major initiatives requested by President Bush.

Enterprise funds for Poland ($45 million) and Hungary ($5 million);

The U.S. share of an international stabilization fund for Poland ($200 million); and

Urgent environmental assistance for the Krakow region and a regional environmental activities center in Budapest $3 million.

The conference package of assistance for Poland also includes several congressional initiatives: $40 million in loan guarantees by the overseas private investment corporation; $2 million for medical supplies and hospital equipment; $2 million for investment feasibility studies by the trade and development program; up to $10 million for agricultural activities; $1 million for the farmer-to-farmer program; and $1.5 million to support the Solidarity Trade Union.

A number of other activities in this conference agreement will benefit both Hungary and Poland: $2 million for Peace Corps programs; $2 million for technical training in private sector development, including management training; $3 million for education and cultural exchanges to be carried out by the U.S. Information Agency; $2 million for scholarships that enable Polish and Hungarian students to study in the United States under A.I.D.'s International Student Exchange Program; $10 million for a Clean Coal Technology Program to be carried out in conjunction with the Department of Energy; $1.5 million for technical assistance by the Department of Labor with unions and business groups to help implement labor reforms; $2.5 million to support independent, democratic organizations and activities other than solidarity.

Finally, we agreed that the administration can extend the existing Cen-

tral America Trade Credit Insurance Program to include Poland. If use of the TCIP in Poland proves to be feasible, up to $200 million in loan guarantees can be extended for short-term trade credits to Poland.

Mr. President, I note for the record that our subcommittee agreed to include in this conference report several activities in Poland and Hungary that ordinarily would be funded in other appropriations bills. The other subcommittees had already completed their conferences before we had a bipartisan agreement on assistance to Poland and Hungary.

Because of the urgency of the situation in Central Europe, we agreed to fund environment, labor, and cultural exchange activities in this bill for this year only. This does not establish a precedent, and I would exepct those programs to be funded in the customary manner by the proper appropriations subcommittee next year.

On a related matter, our conferees encourage the administration to increase food aid to Poland, if it is required, to $125 million. President Bush has already set aside $100 million for Poland. Food aid comes under the jurisdiction of the Agriculture and Rural Development Subcommittee.

The opening to democracy in Poland and Hungary, as well as the opening of the Berlin Wall, are a great opportunity for the United States and the free world. I am proud to participate in helping Poland's new Solidarity-led government through this bipartisan compromise.

Our aid to Poland and Hungary does not come free. In order to make room for these unanticipated requirements within the subcommittee's budget allocation, other programs were reduced. Although $140 million in budget authority was transferred, at the President's request, to our subcommittee's allocation from the defense subcommittee, it was not enough.

Direct appropriations for Poland and Hungary in this conference agreement amount to $292.5 million. The remaining $240 million is in the form of loan guarantees. That is $150.5 million more than the defense offset. To make room for this $150.5 million, the conference had to drop Senate earmarks that protected economic aid to Central America, Portugal, and Tunisia.

I have gone into this detail to make a simple point; we cannot do what the President wants us to do with the resources now available to this subcommittee.

Should the fast-moving events in Central and Eastern Europe continue to require foreign assistance funds at the fiscal year 1990, levels, one of two things will happen:

Congress and the President will have to work together to protect our subcommittee's priorities, or,

Some of the new democracies in Latin America and other parts of the world are going to have to do with much less help from the United States than they have been led to expect.

On a related matter with respect to Hungary, the administration has announced a comprehensive program of assistance for that country, including an extension of most favored nation status for the maximum period allowed by law without need for annual waivers. Some officials in the Department of Treasury and State are not aware of this determination with respect to the introduction of Hungarian sporting firearms to the United States.

I assume the two departments will consult on this matter and license the importation of sporting firearms which are otherwise legally importable as a further signal of United States support for Hungary.

FOREIGN MILITARY SALES—RULEMAKING

The Senate version of this bill included language which would have required regulations put together by the Defense Security Assistance Agency for FMS financing of direct contracts to go through the regular rulemaking process. The House would not address this issue of process, and the conference dropped the Senate provision. I am pleased to note that both the OMB and the Defense department are looking into this matter, and the Senate Government Affairs Committee may do as well.

We mentioned in the Senate report the reported inability of the Department of Justice to successfully investigate and prosecute cases of fraud and corruption, and to recover stolen FMS funds.

That expression was not meant as a green light for the Defense Department to promulgate rules notwithstanding the laws of the United States, especially the Administrative Procedures Act and the Paperwork Reduction Act.

These two laws were designed to protect American citizens, companies and Federal and local governments, for example, the guidelines in question require certain actions affecting bank records. Because of the way these rules were handled, however, Federal agencies in charge of bank regulations had no opportunity to comment on how these regulations would affect banking rules. Likewise, there are allegations that the rules violate State laws. These kinds of questions could have been avoided had the Defense Department not chosen to ignore the Paperwork Reduction Act and the Administrative Procedures Act.

Perhaps these guidelines are needed for these transactions, but that is not good reason to ignore existing law.

JOB RELATED CRIMES

Another provision I would like to mention relates to the ability of managers of Foreign Service officers to institute indefinite suspensions of employees where there is reasonable cause to believe the employee has committed a crime for which a sentence of imprisonment may be imposed.

The House originally had such a provision which we modified by adding extra protection for Foreign Service Officers. Subsequent to our action, various unions and organizations representing the Foreign Service officers suggested that both sides retreat on this issues.

The conference allowed for such indefinite suspensions but only if an individual has been convicted and sentenced.

We have put Foreign Service officers under the same standards as civil servants with respect to this issue. Evidently, Foreign Service officers believe that they should be treated in a much more liberal fashion.

I regret the action of the conference, though we have language in the conference report seeking immediate consideration by the authorizing committees on this issue. There should be a standard other than conviction which would allow for indefinite suspensions just as there is in the civil service.

ENVIRONMENTAL PROTECTION

This legislation affects the protection of natural resources and the environment around the world. It contains numerous initiatives to reform our own development assistance program and that of the international community. We are convinced that long term economic development is not possible unless basic natural resources are protected.

We provide the first funding for the African elephant conservation plan through AID. We expect these funds will contribute to an international program where U.S. funds are matched by a factor of at least two to one.

Second, we have amended current law so that we can directly assist park and wildlife law enforcement personnel in developing nations. This single action may be the most important international wildlife initiative we will take this year.

For the first time, we require some of the most basic environmental constraints and reviews be utilized by the International Monetary Funds that we require of the MDB's.

We have elevated energy conservation as a major component of our bilateral and multilateral assistance programs. We have to reduce the emission of CO_2 and other greenhouse gases. Increasing energy efficiency is the most effective step we can take today.

The Senate report has successfully catalyzed key actions in the Philippines to incorporate environmental management into the MAI. A centerpiece of our assistance policy will also

be the management of environmental resources in the Philippines.

Finally, we have included five separate major "debt for nature" directives in this legislation. If successfully implemented, we will have been successful in turning the debt crisis into a real opportunity to promote the conservation and wise use of the natural resources of developing nations.

These are just a few highlights of the environmental provisions of this legislation. I believe we have taken several important steps here to promote both environmental protection and economic development.

Mr. President, I shall discuss a few points here.

First of all, I thank the chairman of the committee for his kind comment and also express my appreciation to him. At all stages of this legislation we have been supportive of one another and he has been tremendously helpful and cooperative not only with me but also with the administration. And I also thank the subcommittee staff for their tremendously hard work.

Mr. President, over the months it has taken to bring the foreign operations bill to this point we have witnessed some remarkable events in the world. In the Soviet Union, Poland, Hungary, East Germany, the Middle East and Asia, we see stirrings of political liberation and economic change that we, in the United States of America, have sought for years to promote through this bill.

Unfortunately what joy some of us feel regarding this progress is tainted by persistent reminders that we cannot afford to support these countries without plundering other needy countries and programs throughout the world. Although $140 million in budget authority is transferred at the President's request from the defense subcommittee allocation to ours, it is not enough to cover the administration's wish list for our bill. In short, we cannot do what the President wants us to do with the sources now available to this subcommittee.

Should events in Central and Eastern Europe continue to require foreign assistance funds at the fiscal year 1990 levels, one of two things will happen. Congress and the President will have to work together to protect our subcommittee priorities, or some of the new democracies in Latin America and other parts of the world are going to have to do with much less help from the United States of America than they have been led to expect that they will receive.

Those are the two choices. I simply want to lay that out. I am hopeful that we will choose point one, that Congress and the President will work together to protect our subcommittee's priorities and recognize what is happening throughout the world and take advantage of these opportunities.

Mr. LEAHY. Mr. President, I ask that the conference report on H.R. 2939, the foreign operations, export financing, and related programs appropriations be agreed to.

The PRESIDING OFFICER. Is there further debate on the conference report?

If not, the question is on agreeing to the conference report.

The conference report was agreed to.

Mr. KASTEN. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. LEAHY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

HOUSE AMENDMENT TO SENATE AMENDMENT IN DISAGREEMENT NO. 17

Mr. LEAHY. Mr. President, I ask unanimous consent to lay aside all amendments in disagreement and take up amendment No. 17.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The clerk will report.

The assistant legislative clerk read as follows:

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 17 to the aforesaid bill, and concur therein with an amendment as follows: At the end of the Senate amendment, insert:

": *Provided further*, That notwithstanding the previous provisos, no funds under this heading shall be made available to the United Nations Population Fund unless the President of the United States certifies that the United Nations Population Fund does not provide support for, or participate in the management of, a program of coercive abortion or involuntary sterilization in the People's Republic of China.".

Mr. LEAHY. I move that the Senate disagree with the House amendment to amendment No. 17, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Is there debate?

Mr. LEAHY. Mr. President, this amendment in disagreement results from the consideration in the other body of an amendment which I support, it was in our bill, proposed by the distinguished Senator from Maryland, Senator MIKULSKI. I mention this because the Senate voted on this issue before. In fact, yesterday, the House upheld our language by 80 votes, then narrowly adopted an amendment which gutted it.

Mr. President, I yield to the distinguished Senator from Maryland, who eloquently and thoroughly debated this issue once before on this floor.

Ms. MIKULSKI. I thank the chairman of the Foreign Operations subcommittee for yielding to me on this item.

Before I go into the discussion on the U.N. Population Fund, I would like to thank him and his ranking minority member, Senator KASTEN, for the leadership that they have provided on the foreign operations bill. No one could have been more stirred by Lech Walesa's remarks today than I, and I am pleased to note that what the foreign operations bill will be appropriating for Poland and Hungary certainly matches, as Lech Walesa asks, our words with our deeds.

Mr. President, here we have an item of disagreement that I would like to discuss and bring to the Senate's attention. We passed an amendment here allowing $15 million to go to the U.N. Population Fund, but we fenced it off and said no money could go to the People's Republic of China and that there had to be a separate account to fence this funding.

When it went over to the House as an item in disagreement, the House affirmed this Senate amendment by a vote of 244 to 178. Then an amendment was offered by Congressman SMITH requiring Presidential certification before the United States can participate in the UNFPA. This language looked innocuous to House Members. It looked benign to House Members because when one asks for a Presidential certification on first blush it is like asking for the Good Housekeeping seal of approval. So the House certainly went along with that and approved this amendment by 17 votes.

I would now say to my colleagues in the Senate, be wise and be wary because Presidential certification is not benign. It is not innocuous and cannot under any circumstances give the Good Housekeeping seal of approval to the U.N. Population Fund.

I am asking that we defeat the Smith amendment requiring Presidential certification because it is not necessary, but even more seriously because it would deny our entrance into the U.N. Population Fund. Why? President Bush and some Members of Congress are determined to keep the United States out of UNFPA whether or not our presence affects the China program. They have made some arguments. I would like to bring them to your attention and then move on.

First, there are those who say we should not aid and abet the abuses which take place in China. I agree. Any possibility of forced sterilization or coerced abortion is repugnant. That is why my amendment says no funds would go to China under any circumstances.

Then there is argument number two that says UNFPA has a presence in China and therefore indirectly is assisting in these abuses. Wrong. The UNFPA does not promote or assist in abortion in China or anywhere else. The UNFPA Program consists of edu-

cation on maternal and child health care, birth control, distribution of traditionally recognized contraceptives, and the training of demographers.

They say, by training demographers, it helps the Chinese track people who are having too many children. Well, that is very hard for a demographer to do. But at the same time, if that is the case why do we have the United States Census Bureau in there helping the Chinese count people? We should pull our census people out if we are not going to support UNFPA.

Then they say that if we withhold the funds it is going to force UNFPA out of China. We have been withholding funds since 1986, and that has not happened.

They say that the money is fungible and the United States will free up other funds that could be channeled to China. UNFPA has already approved an agreement with China. Whatever we do will not matter in that regard. This is not an abortion issue. UNFPA does not promote or assist in abortion in China or anywhere else as a matter of policy, as a matter of mission. Therefore, a U.S. contribution to the fund will not lead to abortion.

We could go on about why we should be contributing to the UNFPA. It helps more countries than our AID program. By passing or agreeing to this Smith amendment, we preclude our participation in the UNFPA. We will preclude our participation in helping deal with population issues around the world through the United Nations in countries where we do not have AID's participation.

Mr. President, I really hope that we would follow the direction of Senator LEAHY and not agree to the Smith provision.

Mr. President, that is all I have to say on the topic at this time.

The PRESIDING OFFICER (Mr. GORE). Is there further debate? If there is no further debate, the question occurs on the motion to disagree.

Mrs. KASSEBAUM. Mr. President, there is further debate.

The PRESIDING OFFICER. The Senator from Kansas is recognized.

Mrs. KASSEBAUM. Mr. President, I would like to speak for a moment in support of Senator MIKULSKI's motion to disagree with the Smith amendment. We know this issue very well, Mr. President, but I think there are a few points worth reiterating.

The Smith amendment calls for Presidential certification. I feel it is inappropriate and unnecessary for the President to have to certify that none of these funds are being used for abortions in China. It is impossible for the President to be able to make that certification, and it is unnecessary because no UNFPA money is being used to fund abortions.

This point has been made by Senator Mikulski. I would like to reiterate it again, Mr. President, by pointing out that the UNFPA does not fund abortions and that the renewal of the United Nations Family Planning Agency funding should not be seen as an abortion issue. We have provided adequate protection against the use of United States funds for anything other than voluntary family planning programs by explicitly excluding China and by segregating our funds.

Second, Mr. President, with the population increasing at a rate of 90 million every year, developing countries are facing grave problems. It is extremely difficult for their struggling economies to meet the health care, education, nutrition and housing needs of an ever-expanding population.

By limiting family planning services in developing countries, we risk an increase in unintended pregnancies and abortions and a deterioration of the health of women and children.

While it is true we have increased funding to other international family planning programs—and that case has been made by the ranking member of the Foreign Operations Subcommittee very effectively in the past—these programs are largely bilateral. By denying funding to the United Nations Family Planning Agency, we lose the reach of the largest multilateral family planning organization in providing assistance to developing nations.

It is true that this amendment does not affect the overall amount of money spent on family planning. However, it has a great impact on the administration and the effectiveness of that funding.

The United States has no well-established presence in many of the approximately 140 countries served by the UNFPA. Without the UNFPA's extensive framework, we are unable to provide effective and efficient funding to many developing nations.

As a former chairman of the Foreign Relations Subcommittee on African Affairs, I am especially concerned about the many African nations which have no well-established United States presence and are in desperate need of assistance.

Mr. President, we live in an increasingly interdependent world, and what happens in foreign countries affects no only the citizens of those countries but ultimately affects all of us as well. We should not deny aid to an organization that has years of experience in this area and a proven capability to make significant progress in alleviating the serious problems of overpopulation.

Mr. President, I reiterate that this is not an abortion vote. This vote is about assisting family planning through a well-established organization with all the restrictions regarding our sensitivities to the issue clearly delineated and established.

I urge support for Senator MIKULSKI's position in not agreeing to the House amendment.

I yield the floor, Mr. President.

The PRESIDING OFFICER. Is there further debate? The Senator from Vermont.

Mr. LEAHY. I am sorry. Is the Senator from New Hampshire seeking recognition?

Mr. HUMPHREY. Yes, but I am not in a hurry.

Mr. LEAHY. I yield to the Senator.

The PRESIDING OFFICER. The Senator from New Hampshire is recognized.

Mr. HUMPHREY. Mr. President, I think it is prudent, first of all, to point out if this House amendment, the Smith amendment, is defeated, the President is going to veto this bill. It is a big bill. It is an important bill. It has a broad constituency.

So this question before us is no small question. It is a question of whether this bill is going to be signed by the President or if he is going to veto it.

The underlying question, of course, is the matter of forced abortion in China. It is not a matter of speculation. They do it. They force women to have abortions in China.

Women are first put under very great emotional duress to have abortions, voluntarily, shall we say. And if that does not work, then physical duress is often applied, physical force is applied. These forced abortions encompass the entire period of gestation.

My colleagues can read the reports. I invite Senators to read the reports about women giving birth, and as the child's head emerges, a syringe full of formaldehyde is injected through the soft spot in the child's cranium to kill the child at birth.

Is that kind of thing something that Senators want the United States to be associated with in a financial sense? I certainly hope not.

Our former position, that upheld by the Senate for a number of years until this year, is a highly principled position and we should uphold it once again by supporting the Smith amendment.

It is an important matter, Mr. President. I recognize there are disagreements.

The assurances which those on the other side offer us, frankly, are not reassuring at all, I say with due respect. They offer us bookkeeping distinctions—that the U.N. Family Planning Agency will segregate these funds on their books so some consciences here in the Senate and in the Congress might be assuaged. But the practical matter is that the money will be spent. If it is not spent on one account, it will be spent on another account. But it all aggregates and it enables the U.N. to

support this grisly, ghastly, despicable program of forced abortion in China.

We should not support that in any way. With every means available to us, we ought to fight against that and resist it. It is a matter of principle. It is a matter of human rights and it is a matter of decency.

I salute Congressman SMITH for his effort in the House and I salute our colleague, Senator KASTEN, for his similar efforts over the years, and I hope they prevail because it is not a matter of their personal prestige. It is a matter of decency and human rights.

I thank the Chair.

The PRESIDING OFFICER. The Senator from Wisconsin.

Mr. KASTEN. Mr. President, I think it is likely debate on this issue will come to a conclusion very shortly. The yeas and nays have been ordered. We are likely to vote within the next several minutes. I simply want to put my colleagues on notice.

Mr. President, I sincerely hope we will accept the compromise that was passed yesterday by the House of Representatives so we can send this legislation to the President for his signature. If we do not pass the compromise legislation that was adopted yesterday in the House of Representatives, the President will veto this bill.

I ask unanimous consent, Mr. President, to have printed at this point in the RECORD, an October 6 letter from the President, with regard to his intention to veto this bill if it does not contain the compromise language.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE WHITE HOUSE,
Washington, October 6, 1989.

Hon. ROBERT W. KASTEN,
Ranking Minority Member, Subcommittee on Foreign Operations, Committee on Appropriations, U.S. Senate, Washington, DC.

DEAR BOB: I have previously expressed my strong support for the Kemp-Kasten Amendment, also known as the Kemp-Inouye-Helms Amendment, which has been part of the foreign operations appropriations bill since 1985. This provision denies U.S. population assistance funds to any organization which, as determined by the President of the United States, supports, or participates in the management of, a program of coercive abortion or involuntary sterilization.

In June, the Agency for International Development, acting on my delegated authority under the Kemp-Kasten Amendment, determined that the United Nations' Fund for Population Activities' continuing support for the coercive population control program of a specified nation makes U.S. support for the UNFPA impermissible under the Kemp-Kasten Amendment.

As you know, on September 20th the Senate narrowly adopted the Mikulski Amendment to the Foreign Operations Appropriations bill for Fiscal year 1990. The Mikulski Amendment would in effect exempt the UNFPA from the requirements of the Kemp-Kasten Amendment, and mandate a resumption of U.S. funding to the UNFPA, so long as U.S. funds are maintained in a segregated account.

I strongly support family planning programs which do not condone or encourage abortion or coercive measures. I believe that the current Kemp-Kasten law, along with the Mexico City Policy, must be maintained without dilution, in order to preserve both the pro-life and pro-human rights character of the population assistance program.

Therefore, if the FY 1990 foreign operations bill as presented to me contains the Mikulski Amendment or any other language which would weaken the current Kemp-Kasten provision, or place the UNFPA or any other organization outside the full application of Kemp-Kasten, I will veto it.

Sincerely,

GEORGE BUSH.

Mr. KASTEN. The other thing I want to point out, Mr. President, regardless of how this amendment is voted, regardless of the outcome of this amendment, the funding level for population planning assistance remains the same. Nowhere in this debate is any effort being made to reduce the level of family planning.

As a matter of fact, one of the things the chairman and I agree with is how important family planning is. I know the Senator from Kansas and the Senator from Maryland also agree. The family planning numbers are above the administration request, and this amendment does not affect total spending for family planning.

If UNFPA does not receive the funding, other family planning organizations will. These organizations include the International Planned Parenthood Federation of the Western Hemisphere, Family Health International of North Carolina, the Population Council of New York, and the Population Services Internship Program of Michigan.

What we have done, in other words, is take the same money that would be spent with the United Nations agency and have simply given it to other international family planning groups who do not fund or who do not participate in the practices in China that are so abhorrent and that we disagree with so much.

The Senator from Maryland and the Senator from Vermont may believe if we vote on this and send it back to the House, their vote will change. In other words, the House votes will change and our position will prevail.

I am not certain if we sent this back to conference we will see this bill again. Given the press of time, we could end up on a continuing resolution that would jeopardize many fine programs, including our hard-won assistance to Poland.

Mr. President, I strongly urge the Senate agree with the compromise developed and adopted yesterday in the House. We should simply vote against the motion to disapprove and, in effect, agree with the compromise yesterday in the House. This bill then can go to the President. It does not have to go back to the House. The bill then goes to the President and it will be signed.

I strongly recommend we go along with the House compromise and get this bill to the President for his signature as soon as possible.

Mr. LEAHY. Mr. President, I see no one else seeking recognition.

Several weeks ago President Bush wrote to me about the UNFPA language. He said, "I strongly support family planning programs which do not condone or encourage abortion or coercive measures." That, Mr. President, is what this amendment says and that is all it says.

This amendment would give the President the sole authority to decide in which countries U.S. funds may be used. U.S. dollars could be used only to support UNFPA programs which do not condone or encourage abortion or any coercive measures.

This is exactly what the President says he wants—voluntary family planning.

Not only does the bill already prohibit any United States funds from going to China, this amendment would also give the President the authority to prevent any United States funds from being used for abortion or any coercive program in any other country.

No U.S. money for abortion. No U.S. money for any coercive measures. Any Senator who supports voluntary family planning should vote for this amendment.

It is a reasonable compromise which will allow us to fund UNFPA's programs so long as they meet the standard set by President Bush himself.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the motion of the Senator from Vermont to disagree to the House amendment to Senate amendment No. 17. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Connecticut [Mr. DODD] and the Senator from Massachusetts [Mr. KENNEDY] are necessarily absent.

I also announce that the Senator from Hawaii [Mr. MATSUNAGA] is absent because of illness.

Mr. SIMPSON. I announce that the Senator from New York [Mr. D'AMATO] is necessarily absent.

The result was announced—yeas 52, nays 44, as follows:

[Rollcall Vote No. 300 Leg.]

YEAS—52

Adams	Bumpers	Daschle
Baucus	Burdick	Fowler
Bentsen	Byrd	Glenn
Bingaman	Chafee	Gore
Bradley	Cohen	Graham
Bryan	Cranston	Hatfield

NOT VOTING—4

D'Amato	Kennedy
Dodd	Matsunaga

So the motion was agreed to.

Mr. LEAHY. Mr. President, I move to reconsider the vote.

Ms. MIKULSKI. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The clerk will report the next amendment in disagreement.

Mr. LEAHY addressed the Chair.

The PRESIDING OFFICER. The Senator from Vermont.

Mr. LEAHY. Mr. President, I ask unanimous consent that the amendments of the House to the amendments of the Senate in disagreement be considered and concurred in en bloc.

The PRESIDING OFFICER. Is there objection?

Mr. KASTEN. Reserving the right to object, did the Senator say all of the amendments in disagreement?

Mr. LEAHY. Yes, with the exception of the one we just excepted out and voted on.

Mr. KASTEN. At this time, I have to ask that amendment 278——

The PRESIDING OFFICER. If the Senator will suspend for a moment. The Senate will be in order. Senators will please cease audible conversations.

The Senator from Wisconsin.

Mr. KASTEN. Mr. President, I have no objection to agreeing to the request of the chairman with the exception of setting aside amendment No. 278 and amendment No. 295.

The PRESIDING OFFICER. Does the Senator from Vermont amend his request?

Mr. LEAHY. I amend my request to concur in the amendments en bloc with the exception of the two excepted by the distinguished Senator from Wisconsin.

The PRESIDING OFFICER. Is there objection? Hearing none, it is so ordered.

The House amendments to the Senate amendments in disagreement agreed to are as follows:

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 3 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter stricken and inserted by said amendment, insert "$24,544,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 6 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter stricken and inserted by said amendment, insert: "*Provided*, That the funds made available under this heading shall be withheld from obligation until the Secretary of the Treasury certifies that the Board of Executive Directors of the Inter-American Development Bank has adopted policies to ensure that all recipients of assistance must agree in writing that in general any procurement of goods or services utilizing Bank funds shall be conducted in a manner that does not discriminate on the basis of nationality against any member country, firm or person interested in providing such goods or services: *Provided further*, That the Secretary of the Treasury shall instruct the United States Executive Director of the Inter-American Development Bank to use the voice and vote of the United States to oppose any assistance by the Bank to any recipient of assistance who refuses to agree in writing that in general any procurement of goods or services utilizing Bank funds shall be conducted in a manner that does not discriminate on the basis of nationality against any member country, firm or person interested in providing such goods or services: *Provided further*".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 8 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert:

CONTRIBUTION TO THE INTERNATIONAL BANK FOR RECONSTRUCTION AND DEVELOPMENT

For payment of the International Bank for Reconstruction and Development by the Secretary of the Treasury, for the United States share of the paid-in share portion of the increases in capital stock, for the General Capital Increase, $50,000,795, to remain available until expended: *Provided*, That no such payment may be made while the United States Executive Director to the Bank is compensated by the Bank at a rate in excess of the rate provided for an individual occupying a position at level IV of the Executive Schedule under section 5315 of title 5, United States Code, or while the alternate United States Executive Director to the Bank is compensated by the Bank at a rate in excess of the rate provided for an individual occupying a position at level V of the Executive Schedule under section 5316 of title 5, United States Code.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 12 to the aforesaid bill, and concur therein with an amendment as follows: Restore the matter stricken by said amendment, amended to read as follows:

CONTRIBUTION TO THE ENHANCED STRUCTURAL ADJUSTMENT FACILITY OF THE INTERNATIONAL MONETARY FUND

For payment to the Interest Subsidy Account of the Enhanced Structural Adjustment Facility of the International Monetary Fund, $140,000,000 to remain available until expended: *Provided*, That such funds are available subject to authorization: *Provided further*, That none of the funds made available by this paragraph shall be available for obligation or disbursement until the Secretary of the Treasury has assured the Committees on Appropriations in writing that the current policy of the International Monetary Fund (IMF) and the United States Government requiring that all congressional inquiries to IMF employees be cleared through the office of the United States Executive Director of the IMF has been reversed thereby allowing unmonitored and unfettered contact between Congress and IMF employees.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 13 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter stricken and inserted by said amendment, insert;

For necessary expenses to carry out the provisions of sections 301 and 103(g) of the Foreign Assistance Act of 1961, and of section 2 of the United Nations Environment Program Participation Act of 1983, $265,115,000; *Provided*, That no funds shall be available for the United Nations Fund for Science and Technology: *Provided further*, That the total amount of funds appropriated under this heading shall be made available only as follows: $109,510,000 for the United Nations Development Program; $65,400,000 for the United Nations Children's Fund, of which amount 75 per centum (less amounts withheld consistent with section 307 of the Foreign Assistance Act of 1961 and section 526 of this Act) shall be obligated and expended no later than thirty days after the date of enactment of this act and 25 per centum of which shall be expended within thirty days from the start of the United Nations Children's Fund fourth quarter of operations for 1990; $980,000 for the World Food Program; $1,500,000 for the United Nations Capital Development Fund; $800,000 for the United Nations Voluntary Fund for the Decade for Women; $200,000 for the United Nations International Research and Training Institute for the Advancement of Women; $100,000 for the Intergovernmental Panel on Climate Change; $2,000,000 for the International Convention and Scientific Organization Contributions; $2,000,000 for the World Meteorological Organization Voluntary Cooperation Program; $22,000,000 for the International Atomic Energy Agency; $12,000,000 for the United Nations Environment Program; $800,000 for the United Nations Educational and Training Program for Southern Africa; $110,000 for the United Nations Institute for Namibia; $500,000 for the United Nations Trust Fund for South Africa; $750,000 for the Convention on International Trade in Endangered Species; $220,000 for the World Heritage Fund; $100,000 for the United Nations Voluntary Fund for Victims of Torture; $245,000 for the United Nations Fellowship Program; $400,000 for the United Nations Center on Human Settlements; $500,000 for the UNIDO Investment Promotion Service; $10,000,000 for the Organization of American States; and $35,000,000 for United

States contributions to the third replenishment of the International Fund for Agricultural Development: *Provided,* That none of the funds appropriated under this heading shall be made available for the International Fund for Agricultural Development until agreement has been reached on the third replenishment of the Fund: *Provided further,* That funds appropriated under this heading may be made available for the International Atomic Energy Agency only if the Secretary of State determines (and so reports to the Congress) that Israel is not being denied its right to participate in the activities of that Agency.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 15 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter stricken and inserted by said amendment, insert:

AGRICULTURE, RURAL DEVELOPMENT, AND NUTRITION, DEVELOPMENT ASSISTANCE

For necessary expenses to carry out the provisions of section 103, $483,715,000: *Provided,* That up to $5,000,000 shall be provided for new development projects of private entities and cooperatives utilizing surplus dairy products: *Provided further,* That not less than $8,000,000 shall be provided for the Vitamin A Deficiency Program: *Provided further,* That, notwithstanding any other provision of law, up to $10,000,000 of the funds appropriated under this heading shall be made available, and remain available until expended, for agricultural activities in Poland which are managed by the Polish Catholic Church or other nongovernmental organizations: *Provided further,* That not less than $1,000,000 shall be available for a Farmer-to-Farmer program for Poland, not withstanding any other provision of law

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 19 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert:

HEALTH, DEVELOPMENT ASSISTANCE

For necessary expenses to carry out the provisions of section 104(c), $125,994,000.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 22 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert:

EDUCATION AND HUMAN RESOURCES DEVELOPMENT, DEVELOPMENT ASSISTANCE

For necessary expenses to carry out the provisions of section 105, $134,541,000: *Provided,* That $1,500,000 of the funds appropriated under this heading shall be made available for the Caribbean Law Institute: *Provided further,* That not less than $67,270,000 of the funds appropriated under this heading and under the heading "Sub-Saharan Africa, Development Assistance" shall be available only for programs in basic primary and secondary education: *Provided further,* That in fiscal year 1990 the Agency for International Development shall initiate three new bilateral projects in basic primary and secondary eduction, at least two of which shall be initiated in Sub-Saharan Africa: *Provided further,* That not less than $20,000,000 of the funds appropriated under this heading shall be made available for the International Student Exchange Program, of which $2,000,000 shall be available, notwithstanding any other provision of law, for students from Poland and Hungary: *Provided further,* That not less than $1,200,000 of the funds appropriated under this heading shall be made available for leadership programs for the Americas that have a demonstrated record of performance: *Provided further,* That not less than $2,000,000 of the funds appropriated under this heading shall be made available, notwithstanding any other provision of law, for technical training for the people of Poland and Hungary in skills which would foster the development of a market economy and the private sector, including training in management and agricultural extension: *Provided further,* That not less than $3,000,000 of the funds appropriated under this heading shall be made available, notwithstanding any other provision of law, for educational and cultural exchanges with Poland and Hungary, which shall be undertaken in cooperation with the United States Information Agency.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 23 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert:

PRIVATE SECTOR, ENVIRONMENT, AND ENERGY, DEVELOPMENT ASSISTANCE

For necessary expenses to carry out the provisions of section 106, $149,209,000: *Provided,* That not less than $7,500,000 shall be made available only for cooperative projects among the United States, Israel and developing countries of which not less than $5,000,000 shall be made available for the Cooperative Development Program, and of which not less than $2,500,000 shall be made available for cooperative development research projects: *Provided further,* That not less than $5,000,000 shall be made available only for the Central American Rural Electrification Support project: *Provided further,* That not less than $2,000,000 of the funds appropriated under this heading or under the heading "Sub-Saharan Africa, Development Assistance", shall be made available for assistance in support of elephant conservation and preservation: *Provided further,* That not less than $3,300,000 of the funds appropriated under this heading shall be made available notwithstanding any other provision of law, for assistance to establish an air quality monitoring network in the Krakow, Poland, metropolitian area, to improve water quality and the availability of drinking water in the Krakow metropolitan area, and to establish and support a regional environmental center in Budapest, Hungary, for facilitating cooperative environmental activities, which activities shall be undertaken in cooperation with the Environmental Protection Agency: *Provided further,* That not less than $10,000,000 of the funds appropriated under this heading shall be made available, notwithstanding any other provision of law, for support for retrofitting a coal-fired commercial plant in the Krakow, Poland region with clean coal technology and for assistance to assess and develop the capability within Poland to manufacture or modify equipment that will enable industrial activities within Poland to use fossil fuels cleanly, which activities shall be undertaken in cooperation with the Department of Energy; *Provided further,* That the Administrator of the Agency for International Development or his designee may vest title in any property acquired under the previous two provisos in an entity other than the United States: *Provided further,* That not less than $1,500,000 of the funds appropriated under this heading shall be made available, notwithstanding any other provision of law, for the provision of technical assistance to Poland and Hungary (1) for the implementation of labor market reforms, and (2) to facilitate adjustment during the period of transition to free labor markets and labor organizations, which activities shall be undertaken in cooperation with the Department of Labor and United States labor and business representatives.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 31 to the aforesaid bill, and concur therein with an amendment as follows: It lieu of the matter inserted by said amendment, insert ": *Provided further,* That not less than $50,000,000 of the funds appropriated under this heading shall be made available only to assist activities supported by the Southern Africa Development Coordination Conference: *Provided further,* That funds appropriated under this heading which are made available for activities supported by the Southern Africa Development Coordination Conference shall be made available notwithstanding section 518 of the Act and section 629(q) of the Foreign Assistance Act of 1961".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 35 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert:

ASSISTANCE FOR VICTIMS OF WAR

Of the aggregate of the funds appropriated by this Act to carry out part I and chapter 4 of part II of the Foreign Assistance Act of 1961, not less than $5,000,000 shall be made available, notwithstanding any other provision of law, for assistance for the provision of prostheses and related assistance for civilians who have been injured as a result of civil strife and warfare: *Provided,* That this amount shall be derived in equal amounts from Part I and from chapter 4 of part II.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 42 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter stricken and inserted by said amendment, insert "$15,000,000 (except that payment may be made under this limitation only for those categories of services for which charges have been made under Foreign Affairs Administrative Support both in prior years and in the current year)."

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 44 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert ": *Provided further,* That section 222(a) of the Foreign Assistance Act of 1961 is amended by striking out "September 30, 1990" and inserting in lieu thereof "September 30, 1991"; *Provided further,* That notwithstanding the prior limitation on total commitments to guarantee loans at not to exceed $125,000,000, during the fiscal year 1990, total commitments to guarantee loans shall not exceed $100,000,000 of contingent liability for loan principal".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 48 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter stricken and inserted by said amendment, insert "and of which sum cash transfer assistance may be provided, with the understanding that Egypt will undertake significant economic

reforms which are additional to those which were undertaken in previous fiscal years, and of which".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 63 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter stricken and inserted by said amendment, insert "treated in accordance with section 592 of this Act".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 69 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert ": *Provided further,* That not less than $200,000,000 of the funds appropriated under this heading shall be available, notwithstanding any other provision of law, for Poland: *Provided further,* That $2,500,000 of the funds appropriated under this heading shall be available, notwithstanding any other provision of law, to support independent, democratic organizations and activities in Poland and Hungary".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 74 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert ": *Provided further,* That the President shall seek to channel through indigenous and United States private voluntary organizations and cooperatives not less than $20,000,000 of the funds appropriated under this heading and of the funds appropriated and allocated for the Philippines to carry out sections 103 through 106 of such Act".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 75 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert ": *Provided further,* That up to a total of $40,000,000 of the funds appropriated to carry out sections 103 through 106 and chapter 4 of part II of such Act may be transferred to and consolidated and merged with the funds appropriated under this heading notwithstanding the limitations on transfers between accounts contained in section 514 of this Act and section 109 and 610 of the Foreign Assistance Act of 1961: *Provided further,* That any funds transferred to carry out the purposes of this heading shall be made available only for projects and activities which are consistent with the purposes of those funds as initially appropriated: *Provided further,* That of the total amount of funds transferred to carry out the purposes of this heading not less than 50 per centum shall be derived from funds appropriated to carry out chapter 4 of part II of the Foreign Assistance Act: *Provided further,* That transfers of any funds to carry out the purposes of this heading shall be subject to the regular notification procedures of the Committees on Appropriations".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 85 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert ": *Provided further,* That of the funds appropriated under this heading not less than $46,000,000 shall be made available for the refugee admission program for first asylum refugees from East Asia: *Provided further,* That section 584(a)(3) of the Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1988 (as contained in section 101(e) of Public Law 100-202), is amended by striking "8 months" and inserting "one year".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 91 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert. ": *Provided further,* That of the funds appropriated under this heading, $250,000 shall be made available, notwithstanding any other provision of law, for food, medicine, medical supplies, medical training, clothing, and other humanitarian assistance for displaced Burmese students at camps on the border with Thailand".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 95 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert ": *Provided further,* That grants provided with funds made available by this paragraph shall be implemented by grant documents which do not include a requirement to repay the United States Government, notwithstanding any requirement in section 23 of the Arms Export Control Act".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 98 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter stricken and inserted by said amendment, insert "$500,000,000 only shall be available for Turkey and $350,000,000 only shall be available for Greece and, if Turkey receives any funds under this heading on a grant basis then not less than $30,000,000 of the funds provided for Greece shall be made available as grants".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 102 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter stricken by said amendment, insert "except through the regular notification procedures of the Committees on Appropriations, not more than".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 103 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the sum inserted by said amendment, insert "$43,000,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 105 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the sum inserted by said amendment, insert "$30,000,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 107 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert ": *Provided further,* That none of the funds appropriated under this heading shall be available for Sudan or Somalia, except through the regular notification procedures of the Committees on Appropriations".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 110 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter stricken and inserted by said amendment, insert "to countries other than Israel and Egypt: *Provided further,* That only those countries for which assistance was justified for the "Foreign Military Sales Financing Program" in the fiscal year 1989 congressional presentation for security assistance programs may utilize funds made available under this heading for procurement of defense articles, defense services or design and construction services that are not sold by the United States government under the Arms Export Control Act".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 112 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert ": *Provided further,* That not more than $39,000,000 of the funds appropriated under this heading may be obligated for necessary expenses, including the purchase of passenger motor vehicles for replacement only for use outside of the United States, for the general costs of administering military assistance and sales".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 117 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert ": *Provided further,* That gross obligations for the principal amount of direct loans pursuant to the medium-term financing program shall not exceed $215,000,000: *Provided further,* That the interest subsidy authority and the tied-aid grants authority provided under this heading are subject to authorization".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 121 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert ": *Provided further,* That loan guarantee authority available to the Export-Import Bank of the United States may be used by the Bank to participate in the financing of commercial sales of defense articles and services destined for greece and Turkey, notwithstanding any other provision of law: *Provided further,* That the authority provided by the previous provision shall not be used for the procurement of defense articles or services for use on Cyprus".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 122 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert: "for Central America and, notwithstanding any other provision of law, not to exceed $200,000,000 of contingent liability for loan principal for Poland pursuant to the authorities of section 224 of the Foreign Assistance Act of 1961: *Provided,* That section 224(c) of the Foreign Assistance Act of 1961 is amended by striking out 'September 30, 1989' and inserting in lieu thereof 'September 30, 1990' "

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 132 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter stricken by said amendment, insert: ": *Provided further,* That, notwithstanding any other provision of this Act, any funds made available for the purposes of chapter 1 of part I and chapter 4 of part II of the Foreign Assistance Act of 1961 which are allocated or obligated for cash disbursements in order to address balance of payments or economic policy reform objectives, shall remain available until expended: *Provided futher,* That the report required by section 653(a) of the Foreign Assistance Act of 1961 shall designate for each country, to the extent known at the time of submission of such report,

those funds allocated for cash disbursement for balance of payment and economic policy reform purposes.".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 133 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert: : *Provided,* That this section and section 620(q) of the Foreign Assistance Act of 1961 shall not apply to funds made available in this Act for any narcotics-related activities in Colombia, Bolivia, and Peru authorized by the Foreign Assistance Act of 1961, as amended, or the Arms Export Control Act".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 164 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert:

"(d) EXPORT-IMPORT BANK.—(1) Of the financing provided by the Export-Import Bank that is utilized for the support of exports for the energy sector, the Bank shall seek to provide not less than 5 per centum of such financing for renewable energy projects.".

(2) The Export-Import Bank shall take all appropriate steps to finance information exchanges and training whose purpose it is to help link United States producers in the renewable energy sector with assistance programs and potential foreign customers.

(3) Beginning on April 15, 1990, the Chairman of the Export-Import Bank shall submit an annual report to the Committees on Appropriations on the Banks's implementation of this subsection.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 169 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter stricken by said amendment, insert: *": Provided,* That the funds appropriated under the heading 'private Sector, Environment, and Energy, Environment, and Energy, Development Assistance', $13,500,000 shall be transferred to 'International Organizations and Programs' and made available only for the United Nations Afghanistan Emergency Trust Fund' ".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 187 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert:

(c)(1) The Congress supports the democratic transition underway in Chile, and intends to assist the new democratically elected government, following its inauguration in March of 1990, with assistance to—

(A) strengthen democratic institutions; and

(B) establish a new relationship with the Chilean armed forces appropriate to a democratic system of government.

(2) Of the funds appropriated by this act under the heading "International Military Education and Training", up to $50,000 may be made available for Chile for fiscal year 1990, subject to the following conditions—

(A) a civilian, democratically elected President is in power in Chile and has requested such funds;

(B) internationally recognized human rights are being respected and the civilian government is exercising independent and effective authority; and

(C) the Government of Chile is making good-faith efforts in attempting to resolve the murders of Orlando Letelier and Ronni Moffitt.

(3) Assistance may be provided under paragraph (2) without regard to the requirements of section 726(b) of the International Security and Development Cooperation Act of 1981.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 197 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert:

(b) Section 506(a) of the Foreign Assistance Act of 1961 is amended by—

(1) inserting "(1)" after "(a)";

(2) striking "(1) and "(2)" and inserting in lieu thereof "(A)" and "(B)", respectively; and

(3) inserting the following new paragraph:

"(2)(A) If the President determines and reports to the Congress in accordance with section 652 of this Act that it is in the national interest of the United States to draw down defense articles from the stocks of the Department of Defense, defense services of the Department of the Defense, and military education and training, he may direct—

"(i) the drawdown of such articles, services, and the provision of such training for the purpose and under the authorities of chapters 8 and 9 of part I, as the case may be; and

"(ii) the drawdown of defense services for the purposes and under tha authorities of the Migration and Refugee Assistance Act of 1962.

"(B) An aggregate value of not to exceed $75,000,000 in any fiscal year of defense articles, defense services, and military education and training may be provided pursuant to subparagraph (A) of this paragraph.".

(c) Drawdowns made pursuant to section 506(a)(2) of the Foreign Assistance Act of 1961 shall be subject to the regular notification procedures of the Committees on Appropriations.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 201 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter stricken and inserted by said amendment, insert: "be obligated and expended notwithstanding section 10 of Public Law 91-672 and section 15 of the State Department Basic Authorities Act of 1956: *Provided,* That of the funds appropriated by this Act for the "Economic Support Fund" and "Foreign Military Financing Program" accounts, not more than 33⅓ percent of the amounts made available by this Act for each such amount excluding amounts made available for Israel, Egypt, Poland and Hungary, may be obligated and expended prior to March 1, 1990, unless an Act authorizing appropriations for such account has been enacted".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 220 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter stricken and inserted by said amendment, insert: "beneficiary countries of the Caribbean Basin Initiative and Bolivia".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 235 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter stricken and inserted by said amendment, insert; "up to $2,000,000, except through the regular notification procedures of the Committee on Appropriations".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 245 to the aforesaid bill, and concur therein with amendments as follows:

In lieu of the first section number named in said amendment, insert: "573".

In lieu of "Section 503" cited in subsection (d), insert: "Section 632(d) of the Foreign Assistance Act of 1961".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 267 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert:

(b) Section 610(a) of the Foreign Service Act of 1980 is amended by inserting the following new paragraphs:

"(3) Notwithstanding the hearing required by this section, or procedures under any other provision of law, where there is reasonable cause to believe that a member has committed a crime for which a sentence of imprisonment may be imposed, and there is a nexus to the efficiency of the Service, the Secretary, or his designee, may suspend such member without pay pending final resolution of the underlying matter, subject to reinstatement with back pay if cause for separation is not established in a hearing before the Board.

"(4) Any member suspended pursuant to subsection (a)(3) of this section shall be entitled to—

"(A) advance written notice of the specific reasons for such suspension, including the grounds for reasonable cause to believe a crime has been committed;

"(B) a reasonable time, not less than seven days, to answer orally and in writing;

"(C) be represented by an attorney or other representative; and

"(D) a final written decision.

"(5) Any member suspended pursuant to subsection (a)(3) of this section shall be entitled to grieve such action in accordance with procedures applicable to grievances under chapter 11. The Board review, however, shall be limited only to a determination of whether there exists reasonable cause to believe a crime has been committed for which a sentence of imprisonment may be imposed, and whether there is a nexus between the conduct and the efficiency of the Service.".

(c) For purposes of the amendments made by subsections (a) and (b) of this section, reasonable cause to believe that a member has committed a crime for which a sentence of imprisonment may be imposed shall be defined as a member of the Service having been convicted of, and sentence of imprisonment having been imposed for, a job-related crime.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 274 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the section number named in said amendment, insert: "591".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 275 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert:

SEPARATE ACCOUNTS

SEC. 592. (a) SEPARATE ACCOUNTS FOR LOCAL CURRENCIES.—(1) If assistance is furnished to the government of a foreign country under chapter 1 of part I (including assistance for sub-Saharan Africa) or chapter 4 of part II of the Foreign Assistance Act of 1961 under arrangements which result in the

generation of local currencies of that country, the Administrator of the Agency for International Development shall—

(A) require that local currencies be deposited in a separate account established by that government;

(B) enter into an agreement with that government which sets forth—

(i) the amount of the local currencies to be generated, and

(ii) the terms and conditions under which the currencies so deposited may be utilized, consistent with this section; and

(C) establish by agreement with that government the responsibilities of the Agency for International Development and that government to monitor and account for deposits into and disbursements from the separate account.

(2) USES OF LOCAL CURRENCIES.—As may be agreed upon with the foreign government, local currencies deposited in a separate account pursuant to subsection (a), or an equivalent amount of local currencies, shall be used only—

(A) to carry out chapter 1 of part I of chapter 4 of part II (as the case may be), or

(B) for the administrative requirements of the United States Government.

(3) PROGRAMMING ACCOUNTABILITY.—The Agency for International Development shall take all appropriate steps to ensure that the equivalent of the local currencies disbursed pursuant to subsection (a)(2)(A) from the separate account established pursuant to subsection (a)(1) are used for the purposes agreed upon pursuant to subsection (a)(2).

(4) TERMINATION OF ASSISTANCE PROGRAMS.—Upon termination of assistance to a country under chapter 1 of part I or chapter 4 of part II (as the case may be), any unencumbered balances of funds which remain in a separate account established pursuant to subsection (a) shall be disposed of for such purposes as may be agreed to by the government of that country and the United States Government.

(b) SEPARATE ACCOUNTS FOR CASH TRANSFERS.—(1) If assistance is made available to the government of a foreign country, under chapter 1 of part I (including assistance for sub-Saharan Africa) or chapter 4 of part II of the Foreign Assistance Act of 1961, as cash transfer assistance or as non-project sector assistance, that country shall be required to maintain such funds in a separate account and not commingle them with any other funds.

(2) APPLICABILITY OF OTHER PROVISIONS OF LAW.—Such funds may be obligated and expended notwithstanding provisions of law which are inconsistent with the nature of this assistance including provisions which are referenced in the Joint Explanatory Statement of the Committee of Conference accompanying House Joint Resolution 648 (H. Report No. 98-1159).

(3) NOTIFICATION.—At least fifteen days prior to obligating any such cash transfer or non-project sector assistance, the President shall submit a notification through the regular notification procedures of the Committees on Appropriations, which shall include a detailed description of how the funds proposed to be made available will be used, with a discussion of the United States interests that will be served by the assistance (including, as appropriate, a description of the economic policy reforms that will be promoted by such assistance).

(4) EXEMPTION.—Non-project sector assistance funds may be exempt from the requirements of subsection (b)(1) only through the notification procedures of the Committees on Appropriations.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 276 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the section number named in said amendment, insert "593".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 277 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert:

INTERNATIONAL MONETARY FUND

SEC. 594. (a) The Secretary of the Treasury shall instruct the United States Executive Director to the International Monetary Fund (IMF) to regularly and vigorously promote the following policy and staffing changes through formal initiatives before the Board and management of the IMF and through bilateral discussions with other member nations:

(1) The addition to the IMF's staff of natural resource experts, and development economists trained in analyzing the linkages between macro-economic conditions and the short- and long-term impacts on sustainable management of natural resources.

(2) In a manner consistent with the purposes of the IMF, the establishment in the IMF of a systematic process to review in advance, and take into account in policy formation, projected impacts of each IMF lending agreement on the long-term sustainable management of natural resources, the environment, public health and poverty.

(3) The creation of criteria to consider concessional and favorable lending terms to promote sustainable management of natural resources. Such capacity should seek the reduction of the debt burden of developing countries in recognition of domestic investments in conservation and environmental management.

(b) The Secretary of the Treasury shall prepare an annual report to the Congress on the progress made by the United States Executive Director to the IMF in implementing the reforms encompassed in this section.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 279 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the section number named in said amendment, insert "596".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 283 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the section number named in said amendment, insert "598".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 284 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert:

LATVIA, ESTONIA, AND LITHUANIA

SEC. 599. (a) The Congress finds that—

(1) the Baltic states of Latvia, Estonia, and Lithuania gained their independence from the Russian Socialist Federative Soviet Republic in 1918, a fact recognized by the government of the Russian Socialist Federative Soviet Republic in 1920;

(2) the governments of the Latvian Democratic Republic and the Russian Socialist Federative Soviet Republic (RSFSR) signed a Treaty of Peace in Riga, Latvia on August 11, 1920, in which the RSFSR "establishes the right of self-determination for all nations, even to the point of total separation from the States with which they have been incorporated" and declares that "Russia unreservedly recognizes the independence, self-subsistency and sovereignty of the Latvian State and voluntarily and forever renounces all sovereign rights over the Latvian people and territory which formerly belonged to Russia",

(3) similar treaties were signed by both the Republic of Estonia and the Republic of Lithuania with the RSFSR on February 2, 1920 and July 12, 1920, respectively";

(4) the independent republics of Latvia, Estonia, and Lithuania swiftly recovered from the ravages of World War I and became active in the World community, gaining membership in the League of Nations on September 22, 1921 and full recognition by the United States on July 28, 1922;

(5) the sovereign rights of the independent states of Latvia, Estonia, and Lithuania were violated by the Union of Soviet Socialist Republics in a Secret Protocol to the Nazi-Soviet Treaty of Nonaggression of August 23, 1939, which divided Eastern Europe into Nazi and Soviet "spheres of influence";

(6) the Union of Soviet Socialist Republics coerced the governments of Latvia, Estonia, and Lithuania to sign Pacts of Mutual Assistance in October 1939, which stipulated that the "contacting parties undertake not to enter into any alliances or to participate in any coalitions directed against one of the contracting parties" and that "the carrying into effect of the present pact must in no way affect the sovereign rights of the contracting parties, in particular their political structure, their economic and social system, and their military measures";

(7) the Union of Soviet Socialist Republics violated not only those bilateral agreements with the independent Baltic states but also international conventions on the changing of international borders by force when the Soviet Union issued ultimatums to the three independent nations on June 15-16, 1940, demanding the formation of governments to their liking, followed by armed invasions of Lithuania, Latvia, and Estonia on June 16-17, 1940;

(8) the occupation of the Baltic states was confirmed on July 14-15, 1940, with the irregular and illegal "election" of new parliaments, which then petitioned for admission into the Soviet Union, and these petitions were accepted by the Soviet Union, as follows: Lithuania's on August 3, 1940, Latvia's on August 4, 1940, and Estonia's on August 5, 1940;

(9) the Government of the United States continues its policy of standing by the 1922 recognition of the de jure independent governments in the Baltic states, and of refusing to recognize the forced incorporation of the Baltic state into the Soviet Union;

(10) the peoples of Lativa, Estonia, and Lithuania have never accepted the occupation of their native lands, and have demonstrated their resolve on numerous occasions since 1940, most notably in the last three years. The most striking demonstration of the desires of the Baltic people took place on August 23, 1989, the fiftieth anniversary of the Nazi-Soviet Treaty of Nonaggression, when nearly 2,000,000 citizens of Latvia, Estonia, and Lithuania joined hands in a 400-mile human chain stretching across the Baltic states from the Estonian capital of Tallinn, through the Latvian capital, Riga, to the Lithuanian capital of Vilninus:

(11) the people of the Baltic states, through their elected representatives in the Popular Front of Latvia, the Popular Front

of Estonia, and the Lithuanian Movement in Support of Perestroika "Sajudis", have declared their desire for the restoration of independence in the Baltic states; and

(12) even the Communist officials and regimes in each of the Baltic states have begun to respond to the drive for more autonomy.

(b) The Congress urges the President—

(1) to raise the issue of the political rights of the Baltic peoples in all diplomatic contacts with the Soviet Union including during the meeting between President Bush and President Gorbachev in December, 1989 and during the Presidential summit scheduled in 1990 between the United States and the Soviet Union; and

(2) to call upon the Soviet Union—

(A) to honor the international agreements it has voluntarily entered into, such as the Final Act of the Helsinki Conference on Security and Cooperation in Europe and the United Nations Declaration of Human Rights, as well as the bilateral agreements it has voluntarily entered into with the independent governments of Latvia, Estonia, and Lithuania,

(B) to allow the people of Latvia, Estonia, and Lithuania their right of self-determination, as guaranteed by the RSFSR in 1920 as well as by the current constitution of the Soviet Union,

(C) to recognize the human rights of all peoples both within the Soviet Union and under Soviet influence, and

(D) to replace the policy of aggressive industrialization in the Baltic states, which has poisoned the land, air, and water of Latvia, Estonia, and Lithuania, with one of environmental responsibility.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 286 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the section number named in said amendment, insert "599".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 287 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the section number named in said amendment, insert "599B".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 289 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert:

ASSISTANCE FOR POLAND AND HUNGARY

SEC. 599C. (a) In addition to amounts appropriated under the heading "Trade and Development Program", there is hereby appropriated $2,000,000, to remain available until expended, to carry out the provisions of section 661 of the Foreign Assistance Act of 1961, notwithstanding any other provision of law.

(b) Notwithstanding any other provision of this Act, any funds made available by this Act for a specific activity for Poland or Hungary instead may be obligated for Poland or Hungary for an activity with a similar purpose. The authority of section 515 of this Act may also be used to deobligate such funds and reobligate them for Poland or Hungary for an activity with a similar purpose: *Provided,* That the authority of this subsection shall be exercised subject to the regular notification procedures of the Committees on Appropriations.

(c) Funds made available by this Act and obligated for the Government of Poland shall not be expended if the President of Poland or any other Polish official, initiates martial law without the consent of the Polish Senate and Sejm, or if members of the Polish Senate or the Sejm are removed from office or are arrested through extra-constitutional processes. *Provided,* That, notwithstanding the restriction on expenditures contained in this subsection, the President of the United States may continue to expend funds made available to Poland if he determines and certifies to Congress that it is in the foreign policy interest of the United States to do so.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 290 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert:

ESTABLISHING CATEGORIES OF ALIENS FOR PURPOSES OF REFUGEE DETERMINATIONS

SEC. 599D. (a) IN GENERAL.—In the case of an alien who is within a category of aliens established under subsection (b), the alien may establish, for purposes of admission as a refugee under section 207 of the Immigration and Nationality Act, that the alien has a well-founded fear of persecution on account of race, religion, nationality, membership in a particular social group, or political opinion by asserting such a fear and asserting a credible basis for concern about the possibility of such persecution.

(b) ESTABLISHMENT OF CATEGORIES.—

(1) For purposes of subsection (a), the Attorney General, in consultation with the Secretary of State and the Coordinator for Refugee Affairs, shall establish—

(A) one or more categories of aliens who are or were nationals and residents of the Soviet Union and who share common characteristics that identify them as targets of persecution in the Soviet Union on account of race, religion, nationality, membership in a particular social group, or political opinion, and

(B) one or more categories of aliens who are or were nationals and residents of Vietnam, Laos, or Cambodia and who share common characteristics that identify them as targets of persecution in such respective foreign state on such an account.

(2)(A) Aliens who are (or were) nationals and residents of the Soviet Union and who are Jews or Evangelical Christians shall be deemed a category of alien established under paragraph (1)(A).

(B) Aliens who are (or were) nationals of the Soviet Union and who are current members of, and demonstrate public, active, and continuous participation (or attempted participation) in the religious activities of, the Ukrainian Catholic Church or the Ukrainian Orthodox Church, shall be deemed a category of alien established under paragraph (1)(A).

(C) Aliens who are (or were) nationals and residents of Vietnam, Laos, or Cambodia and who are members of categories of individuals determined, by the Attorney General in accordance with the "Immigration and Naturalization Service Worldwide Guidelines for Overseas Refugee Processing" (issued by the Immigration and Naturalization Service in August 1983) shall be deemed a category of alien established under paragraph (1)(B).

(3) Within the number of admissions of refugees allocated for fiscal year 1990 for refugees who are nationals of the Soviet Union under section 207(a)(3) of the Immigration and Nationality Act, notwithstanding any other provision of law, the President shall allocate 1,000 of such admissions for such fiscal year to refugees who are within the category of aliens described in paragraph (2)(B).

(c) WRITTEN REASONS FOR DENIALS OF REFUGEE STATUS.—Each decision to deny an application for refugee status of an alien who is within a category established under this section shall be in writing and shall state, to the maximum extent feasible, the reason for the denial.

(d) PERMITTING CERTAIN ALIENS WITHIN CATEGORIES TO REAPPLY FOR REFUGEE STATUS.—Each alien who is within a category established under this section and who (after August 14, 1988, and before the date of the enactment of this Act) was denied refugee status shall be permitted to reapply for such status. Such an application shall be determined taking into account the application of this section.

(e) PERIOD OF APPLICATION.—

(1) Subsections (a) and (b) shall take effect on the date of the enactment of this Act and shall only apply to applications for refugee status submitted before October 1, 1990.

(2) Subsection (c) shall apply to decisions made after the date of the enactment of this Act and before October 1, 1990.

(3) Subsection (d) shall take effect on the date of the enactment of this Act and shall only apply to reapplications for refugee status submitted before October 1, 1990.

(f) GAO REPORTS ON SOVIET REFUGEE PROCESSING.—

(1) The Comptroller General shall submit to the Committees on the Judiciary of the Senate and of the House of Representatives reports on the implementation of this section in Italy and the Soviet Union. Such reports shall include a review of—

(A) the timeliness and length of individual interviews.

(B) the adequacy of staffing and funding by the Department of State, the Immigration and Naturalization Service, and voluntary agencies, including the adequacy of staffing, computerization, and administration of the processing center in Washington,

(C) the sufficiency of the proposed Soviet refugee processing system within the United States,

(D) backlogs (if any) by ethnic or religious groups and reasons any such backlogs exist,

(E) the sufficiency of the means of distributing and receiving applications for refugee status in Moscow,

(F) to the extent possible, a comparison of the cost of conducting refugee processing only in Moscow and such cost of processing in both Moscow and such cost of processing in both Moscow and in Italy, and

(G) an evaluation of efforts to phase out Soviet refugee processing in Italy.

(2) The Comptroller shall submit a preliminary report under paragraph (1) by December 31, 1989, and a final report by March 31, 1990. The final report shall include any recommendations which the Comptroller General may have regarding the need, if any, to revise or extend the application of this section.

ADJUSTMENT OF STATUS FOR CERTAIN SOVIET AND INDOCHINESE PAROLEES

SEC. 599E. (a) IN GENERAL.—The Attorney General shall adjust the status of an alien described in subsection (b) to that of an alien lawfully admitted for permanent residence if the alien—

(1) applies for such adjustment,

(2) has been physically present in the United States for at least 1 year and is physically present in the United States on the

date the application for such adjustment is filed,

(3) is admissible to the United States as an immigrant, except as provided in subsection (c), and

(4) pays a fee (determined by the Attorney General) for the processing of such application.

(b) ALIENS ELIGIBLE FOR ADJUSTMENT OF STATUS.—The benefits provided in subsection (a) shall only apply to an alien who—

(1) was a national of the Soviet Union, Vietnam, Laos, or Cambodia, and

(2) was inspected and granted parole into the United States during the period beginning on August 15, 1988, and ending on September 30, 1990, after being denied refugee status.

(c) WAIVER OF CERTAIN GROUNDS FOR INADMISSIBILITY.—The provisions of paragraphs (14), (15), (20), (21), (25), (28) (other than paragraphs (F)), and (32) of section 212(a) of the Immigration and Nationality Act shall not apply to adjustment of status under this section and the Attorney General may waive any other provision of such section (other than paragraphs (23)(B), (27), (29), or (33)) with respect to such an adjustment for humanitarian purposes, to assure family unity, or when it is otherwise in the public interest.

(d) DATE OF APPROVAL.—Upon the arrival of such an application for adjustment of status, the Attorney General shall create a record of the alien's admission as a lawful permanent resident as of the date of the alien's inspection and parole described in subsection (b)(2).

(a) NO OFFSET IN NUMBER OF VISAS AVAILABLE.—When an alien is granted the status of having been lawfully admitted for permanent residence under this section, the Secretary of State shall not be required to reduce the number of immigrant visas authorized to be issued under the Immigration and Nationality Act.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 291 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert:

REPEAL OF PROVISION

SEC. 599F. (a) The following provision under the heading "Salaries and Expenses, General Legal Activities", contained in the Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriations Act, 1990 (H.R. 2991), as enacted into law, is hereby repealed: "; *Provided further,* That for fiscal year 1990 and hereafter the Attorney General may establish and collect fees to cover the cost of identifying, copying and distributing copies of tax decisions rendered by the Federal Judiciary and that any such fees shall be credited to this appropriation notwithstanding the provisions of 31 U.S.C. 3302".

(b) The provisions of subsection (a) shall take effect upon the date of the enactment into law of the Department of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriations Act, 1990 (H.R. 2991).

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 292 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert:

CONDITIONAL ASSISTANCE FOR EL SALVADOR FOR POLICE TRAINING

SEC. 599G. (a) CONDITIONAL ASSISTANCE.—In order to promote the professional development of the security forces of El Salvador and to encourage the separation of the law enforcement forces from the armed forces of El Salvador, funds made available under chapter 4 of part II of the Foreign Assistance Act of 1961 which are allocated to El Salvador may, notwithstanding section 660 of that Act, be provided to El Salvador for fiscal year 1990 for purposes otherwise prohibited by section 660 of the Act, if the following conditions are met:

(1) The training provided with such assistance is provided by United States civilian enforcement personnel.

(2)(A) The assistance is to be used for the purposes of professional development and training of the security forces of El Salvador in such areas as human rights, civil law, investigative and civilian law enforcement techniques, and urban law enforcement training.

(B) Any such assistance that is made available for equipment for these forces is intended to be used for the purchase of equipment such as communication devices, transportation equipment, forensic equipment, and personal protection gear. No such assistance may be used for the purchase of any lethal equipment, except for small arms ammunition and rifle ammunition solely for training purposes.

(3) At least 30 days before obligating such assistance, the President certifies to the Committee of Foreign Affairs and the Committee on Appropriations of the House of Representatives and the Committee of Foreign Relations and the Committee on Appropriations of the Senate that the Government of El Salvador has made significant progress during the preceding 6 months in eliminating any human rights violations, including torture, incommunicado detention, detention of persons solely for their political views, or prolonged detention without trial. Any such certification shall include a full description of the assistance which is proposed to be provided and of the purposes to which it is to be directed. Any such certification shall also include a report on the status of all investigative action and prosecutions with respect to those responsible for the 1980 murders of Archbishop Oscar Romero and the four American churchwomen, the recent murder of Ana Casanova, and the recent bombings of the headquarters of the FENASTRAS union and the office of COMADRES, a human rights organization.

(4) REPROGRAMMING.—Funds made available under this subsection shall be subject to the regular reprogramming procedures of the Committees on Appropriations.

(b) DEFINITION.—For purposes of this section, the term "civilian law enforcement personnel" means individuals who are not members of the United States Armed Forces.

(c) Not more than $5,000,000 shall be made available in fiscal year 1990 to carry out the provisions of this section. Not less than $7,000,000 of the funds made available to carry out the provisions of chapter 4 of part II of the Foreign Assistance Act of 1961 for fiscal year 1990 shall be made available for the purposes of subsection 534(b)(3) of the Foreign Assistance Act of 1961.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 293 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert:

CORPS IN PERU, BOLIVIA AND JAMAICA

SEC. 599H. Notwithstanding any other provision of law, the President may provide assistance under chapter 1 of part I or chapter 4 of part II of the Foreign Assistance Act of 1961 for Peru, Bolivia and Jamaica to promote the production, processing, or marketing of all crops which can be economically grown in areas of those countries which currently produce crops from which narcotic and psychotropic drugs are derived.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 294 to the aforesaid bill, and concur herein with an amendment as follows: In lieu of the matter inserted by said amendment, insert:

LAND REFORM IN EL SALVADOR

SEC. 599I. (a) It is the sense of the Congress that the success and continuation of land reform in El Salvador is vital to United States policy and to political stability, economic development and maintenance of democratic institutions in that country.

(b) Therefore, when allocating Economic Support Funds to El Salvador, the President shall take into consideration progress in the Salvadoran Land Reform Program.

HOUSE AMENDMENT TO THE SENATE AMENDMENT IN DISAGREEMENT NO. 278

The PRESIDING OFFICER. The clerk will report the first of the two remaining amendments in disagreement.

The assistant legislative clerk read as follows:

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 278 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert:

EL SALVADOR

SEC. 595. With respect to the ongoing political unrest and armed conflict in El Salvador, the Congress hereby—

(1) welcomes the negotiating process set in motion on September 13, 1989 in Mexico City by the Government of El Salvador and the leadership of the Farabundo Marti National Liberation Front and the expressed willingness of both parties to continue this process;

(2) urges the parties to these negotiations to achieve, as quickly as possible—

(A) a cessation of hostilities, and

(B) an overall political settlement of the ten-year old conflict; and

(3) calls upon the Secretary of State to consult frequently with the Congress on the status of the Salvadoran negotiations and on the efforts being undertaken by the President to support these negotiations.

Mr. KASTEN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. McCAIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator from Arizona is recognized.

Mr. McCAIN. Mr. President, I ask unanimous consent to address the Senate for 7 minutes as in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator is recognized for 7 minutes.

MEDICARE CATASTROPHIC COVERAGE ACT OF 1988

Mr. McCAIN. Mr. President, I rise to discuss an issue that has become very tiresome for most Members of this body, including this Member, but one that clearly needs resolution before we adjourn for the holiday period.

Eight days ago Congress agreed that prior to adjourning for the holidays, it would finally fix the Medicare Catastrophic Coverage Act of 1988. The question still remains, however, how will Congress resolve this issue? The conference has been meeting for a week now, and there has been literally no progress. If we are to adjourn any time soon, I think we have to finish the task of fixing this legislation, whether it be total repeal of the act and its benefits like the House proposes, or will it be the proposal adopted by the Senate, which retains the core catastrophic health care benefits but eliminates the highly controversial income tax surcharge known as surtax and several low priority benefits.

Since the passage of the Medicare Catastrophic Coverage Act of 1988, a fire storm of angry opposition mounted among our Nation's seniors, as they learned of the legislation's specifics. This is the very population that must be served by this legislation. They were upset, not because they were greedy malcontents unwilling to pay for health care protection, but because they were being required to pay for things they did not want or need, in a way they did not like.

On October 6, after nearly 11 hours of debate in consideration of numerous amendments, ranging from full repeal, to keeping all of the act's coverage, this body adopted the proposal by unanimous vote of 99 to 0. This came on the heels of the House having acted 2 days earlier to repeal the entire act.

The Senate proposal eliminates the surtax and protects a significant portion of the benefits currently being received and pays for them with a current flat part B premium of $4 a month. The CBO estimates that by 1993, this premium will only rise to $7, instead of $10.20 under current law, with a built-in cushion of 20 percent to protect against cost increases. The Senate proposal keeps the most valued benefits and eliminates the rest. It keeps benefits such as the long term and frequent hospitalization, spousal impoverishment, mammograms, home health and respite.

Blue Cross and Blue Shield told me they would have to charge beneficiaries $5.10 a month just for the hospitalization benefit. Yet, under this proposal, we protect and provide the above-mentioned package and fully fund it for only $4.90 per month.

Mr. President, the Senate's approach is a far better approach than eliminating the program altogether. The House approach would be disastrous to our Nation's elderly. Not only would the surtax be eliminated, but all of the above benefits would be eliminated. This includes benefits seniors have been paying for and receiving all this year—benefits such as extended hospitalization coverage.

What I have been hearing from seniors all over this country is that they want the surtax and low priority benefits eliminated. The Senate bill does that, but while Congress ran amok when first passing the catastrophic act by making seniors pay a surtax for benefits they did not want, the House bill goes to the other extreme by repealing every benefit, regardless of their importance or desirability. Mr. President, we owe the seniors of this Nation more than a blind stampede of political panic.

The Senate bill retains the expanded Medicare coverage, which I just described, and fully pays for these benefits through the existing flat premium.

Mr. President, the most important part of my remarks are that every major national seniors organization in America, from the National Association for Retired Federal Employees, Retired Officers Association, the National Committee to Preserve Social Security and Medicare, to the American Association of Retired Persons, known as AARP, strongly oppose repeal and has strongly endorsed the Senate proposal.

Mr. President, the eyes of our Nation's seniors continue to be on Congress as the conference continues. They want the surtax eliminated. They want low value benefits eliminated. They certainly do not want us to add new benefits and costs.

Mr. President, these are legitimate grievances and we should address them. Beyond that, however, they want us to preserve the core catastrophic benefits I mentioned above, which can be paid for with the existing flat premium.

The time for reasoned and responsible action is upon us.

It will be easier to take the extra minute to explain the Senate health care protection plan than it will to explain abdicating our responsibility to ensure fair affordable health care to 32 million senior Americans. Let us not overreact and repeal the entire act; let us eliminate the surtax and those benefits of low priority and keep the benefits of high priority which the Senate proposal does.

Let me say in conclusion: As my colleagues know, I was planning to offer the Senate plan to the debt limit bill and was prevailed upon by the leadership to not do so. Had I persisted, we might not be in this position. The issue might have been resolved.

I think it is important that we send a message to the conferees that we expect progress and resolution of this issue. Clearly, Mr. President, on the one side is repeal which is an understandably simplistic, in my view, approach. On the other side, there is the Senate version which I repeat again is supported by every major seniors orgnization in America.

Mr. President, I quote from a letter from the National Committee to Preserve Social Security and Medicare to Chairman ROSTENKOWSKI which says, and I partially quote:

While we have strongly endorsed repeal of the surtax, we have not supported total repeal, but have supported retention of benefits which can be financed through the increases in the flat premium already contained in current law. The benefit package contained in the McCain amendment passed in the Senate most closely reflects the benefits our members preferred when we polled them in August.

Mr. President, the National Association of Retired Federal Employees says:

NARFE's position is that repeal of the surtax is essential but as many of the benefits as can be covered by the flat rate premium should be kept.

Mr. President, I ask unanimous consent that both these letters be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

NATIONAL COMMITTEE TO PRESERVE
SOCIAL SECURITY AND MEDICARE,
Washington, DC, November 14, 1989.

Hon. DAN ROSTENKOWSKI,
U.S. House of Representatives, Rayburn House Office Building, Washington, DC.

DEAR CHAIRMAN ROSTENKOWSKI: As you proceed with the conference on the Medicare Catastrophic Coverage Repeal Act, the National Committee to Preserve Social Security and Medicare urges you to support language similar to that passed in the Senate.

While we have strongly endorsed repeal of the surtax, we have not supported total repeal, but have supported retention of benefits which can be financed through the increases in the flat premium already contained in current law. The benefit package contained in the McCain amendment passed in the Senate most closely reflects the benefits our members preferred when we polled them in August.

It is crucial that the Medicare Catastrophic Coverage Repeal conference reach a successful conclusion. Both the House and the Senate have responded to their constituents by voting to repeal the surtax; repeal of the surtax must become a reality before the adjournment of the first session of the 101st Congress.

Sincerely,

MARTHA A. MCSTEEN,
President.

NATIONAL ASSOCIATION
OF RETIRED FEDERAL EMPLOYEES,
Washington, DC, November 14, 1989.

DEAR SENATOR: As a conferee on H.R. 3607, to reform the Medicare Catastrophic Coverage Act of 1988, the National Association of Retired Federal Employees (NARFE) urges

your support for maintaining as many of the benefits as possible like catastrophic hospitalization coverage, mammography screening, Medicaid benefits, spousal impoverishment and hospice and home health expansions.

NARFE's position is that repeal of the surtax is essential but as many of the benefits as can be covered by the flat rate premium should be kept. For this reason we have consistently supported the McCain proposal.

We believe that a common sense approach is particularly important at this time. Congress has made a great deal of progress in resolving the Medicare controversy and this is commendable. The major problem with the legislation was the surtax, which both the House and Senate have agreed to eliminate. It would now be unfortunate to give up all provisions that could benefit so many senior citizens.

We hope House and Senate conferees can quickly resolve this issue and save as many of the catastrophic benefits as is possible.

Sincerely,

H.T. STEVE MORRISSEY,
President.

Mr. McCAIN. Mr. President, finally we need to move and get this issue resolved before we leave for the holidays. It would be a terrible thing after all the activity that has gone on and all the efforts in the direction of solving this problem are abandoned and, frankly, it would be a clear abrogation of our responsibilities to millions and millions of seniors in this country.

I yield the floor.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order to the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

FOREIGN OPERATIONS, EXPORT FINANCING, AND RELATED PROGRAMS APPROPRIATIONS, FISCAL YEAR 1990—CONFERENCE REPORT

The Senate continued with the consideration of the conference report.

Mr. HELMS. Mr. President, a little later on I will be moving that the Senate agree to the amendment of the House to the amendment of the Senate No. 278 with an amendment which I will send to the desk at that time.

What I am proposing is that the Senate, indeed the Congress, permit the President of the United States the necessary flexibility to provide assistance at levels he deems necessary and appropriate within budgetary confines.

Here is the history of it. The administration asked for $97 million in terms of the total budget. This is a pittance; it is a lot of money back in North Carolina, but $97 million around this place is a snap of a finger. The administration asked for the $97 million. The Senate provided $90 million but the conferees approved $85 million.

Obviously events unfolding in El Salvador make it imperative that we not restrict the President's ability to deal with the situation and the way to do that is to provide the necessary military aid.

I submit to the Senate that this Congress should not send a signal of uncertainty and timidity to the valiant people of El Salvador who are fighting for their lives to preserve their fragile democracy against Communist guerrillas, and anybody who has been reading the news or listening to the news in the last 2 or 3 days is obliged to know what is going on down there.

In fact on Monday evening I stood right here to share with the Senate a preliminary report on the Communist offensive in El Salvador. The text of my remarks on Monday evening may be found on page S15431 of Monday's RECORD.

The point I tried to make on Monday and which I reiterate today is that those who looked at the newspapers today, yesterday, and surely tomorrow morning are bound to be aware that the democratically elected Government of El Salvador is fighting for its very survival.

But despite the massive Communist offensive in that country there is some good news: the Communist guerrillas have received no support from the people of El Salvador.

The people of El Salvador are standing up to freedom and a lot of them are losing their lives in the process. Indeed, Salvadoran people have put their support squarely behind the Salvadoran Armed Forces and I am confident that with that support, and unless we flake out on the situation, the armed forces will eventually prevail.

In any case, Mr. President, when I spoke Monday, the details of events in El Salvador were a bit sketchy. I have been in touch almost constantly since then with the Salvadoran Foreign Minister, Manuel Pacas and with the United States Ambassador to El Salvador, William Walker. Let me recap some of the developments in the past 48 hours.

As Senators know, the U.S. Ambassador reported that his residence was fired on late Tuesday night. And early yesterday the Communist guerrillas began new attacks against nearby civilian neighborhoods.

The Foreign Minister reported to me that terrorist guerrillas are driving truckloads of weapons into civilian neighborhoods in an effort to solicit support from the people. But they are having no success. And that is a tribute to the people of El Salvador. The FMLN has been reputiated in the polls and now the FMLN has been repudiated again in this offensive.

Nonetheless, the terrorists are trying to use the urban civilian population as what he called a human shield. And I can think of no worse cruelty than that. These Communist terrorists are forcing their way into private homes and businesses in an effort to infiltrate the city of San Salvador. Many families are being held hostage and the Communist guerrillas are literally jumping from rooftop to rooftop in order to avoid the government authorities.

I should point out, I suppose, that the heaviest fighting is taking place in the neighborhoods inhabited by some of the poorest citizens of San Salvador, the very people for whom the Communist guerrillas claim to be fighting.

Well, they are being unmasked because with all of the weaponry that they have moved in over the past several months and stashed away here and stashed away there along the—nobody can predict how many lives will be lost, how much property will be destroyed and how much damage will be done in general to the people and their cities.

Between 8:30 p.m, Monday night, and 2 o'clock Tuesday morning—and that is Salvadoran time I am talking about—there was heavy guerrilla activity throughout the urban areas. Within 10 blocks of the U.S. Ambassador's residence, there were constant explosions, grenades, automatic weapon fire.

The Communist guerrillas continued to mount heavy attacks on military installations, and the Communist guerrillas also attacked both the private and official residences of President Alfredo Cristiani, as well as the homes of other government officials.

Weapons, ammunition, and guerrillas have been captured in many places throughout the capital city of El Salvador—most notably in the National University, the Central American University, and the Retreat House of the Jesuits. And according to reports—and they are reliable—government forces have captured Soviet-made weapons throughout downtown San Salvador. These captured weapons are clearly offensive weapons. They include, for example, antitank weapons and explosives, and that sort of thing.

Moreover, Mr. President, there is a new and ominous development which I think I mentioned Monday night—the role of Panama in supporting this Communist assault on the people of El Salvador—Panama. And you know who we are talking about when I say Panama. We are talking about Mr. Noriega. Now the connection between Ortega and Noriega and the Communists guerrillas throughout the hemisphere is already well documented. It

should be in the minds of all Senators. But there is even more information about the Ortega-Noriega-FMLN connection. It is worth repeating once more.

My sources, which have been entirely accurate in the past, say that the Salvadoran Communist Party and the FMLN terrorists sent a delegation last week to meet with—guess who—Mr. Noriega. Noriega personally agreed to provide the terrorists with communications equipment, uniforms, medicine and other assistance necessary for the Communists to carry out this offensive against the people of El Salvador and specifically San Salvador, the capital city.

Since their meeting with Noriega last week, the FMLN guerrillas have been acquiring the promised assistance from Cuban-front companies in the Panamanian Free Zone. Noriega has made arrangements to truck the supplies to Chiriqui, that is a city in Panama. Once the supplies arrive in Chiriqui, Noriega is providing airplanes to fly the assistance to Nicaragua, to the Communist insurgents—I call them terrorists; I think that is what they are—in Nicaragua. In Nicaragua, Ricardo Wheelock—who is chief aide to the Minister of Defense—has personally coordinated the shipment of the supplies from Nicaragua on to the Salvadoran Communist terrorists, through the same channels that Nicaraguans use to send military hardware to El Salvador.

Mr. President, I hope it is understood that unless we fail to do the minimal amount of assistance to the people and the Government of El Salvador, this kind of effort by the Communist guerrillas cannot be sustained, despite Mr. Noriega, despite Mr. Castro, despite all the other bums who are festering—and fostering terrorism—through this hemisphere, the southern part of it.

The Communists are well aware that they have in fact lost the guerrilla war. They know that they have lost the election. And they are desperately trying to avoid another defeat at the negotiating table. So that is the reason they killed several hundred people already, causing all sorts of damage, including the United States Embassy in San Salvador.

That is what this is all about. This is one of these times where it is sort of a "put up or shut up" time in the U.S. Senate. Do we mean it when we say we want to help people and countries throw off the shackles of Communist terrorism?

We marched over to the House of Representatives this morning to meet that gallant former electrician, and hear him speak. It was a thrilling experience for me. But even he mentioned how isolated they felt for a long, long time in their efforts.

Are we going to isolate friendly countries in our own hemisphere—and especially now I am talking about El Salvador—for a piddling amount of money, relatively speaking? What we are talking about is how much from a designated amount already appropriated will the President of the United States be allowed to use to help put down the Communist insurgents in El Salvador.

In any case, this Communist activity, this brutal stuff in which they are engaged, discloses and exposes the savage nature of the Communist FMLN. Once again it proves their total lack of regard or respect for human life and their total inability to comprehend the basic elements of democracy.

Mr. President, it seems to me to be a bit ironic that the Congress played games with President Bush's request for military aid to El Salvador at the very time the democracy in El Salvador is under siege. This is one of these imponderables that occur so frequently, and increasingly so, in the Congress of the United States.

This was an unnecessary, in fact, a frivolous micromanagement constraint on the President of the United States which no doubt encouraged the guerrillas in the plan for their brutal and reckless offensive.

The question is this, and this reduces it to the bottom line: How can we expect freedom to survive when we bind and gag the freedom fighters in our own hemisphere, let alone other places in the world? And the concluding question, and I will yield the floor after this: Is it not time to give our full support to those gallant people of El Salvador who have endured so much bloodshed at the hands of Communist terrorism?

AMENDMENT NO. 1132 TO HOUSE AMENDMENT TO SENATE AMENDMENT IN DISAGREEMENT NO. 278

Mr. HELMS. Mr. President, I move that the Senate agree to the amendment of the House to the amendment of the Senate numbered 278 with an amendment which I send to the desk.

The ACTING PRESIDENT pro tempore. The amendment will be stated.

The legislative clerk read as follows:

The Senator from North Carolina [Mr. HELMS] proposes an amendment numbered 1132 to the House amendment to the Senate amendment No. 278, in disagreement.

That the Senate agree to the amendment of the House to the amendment of the Senate number 278, with an amendment as follows:

In the House amendment, add at the end thereof the following:

"Notwithstanding any other provision of this Act, the President is authorized to make available to El Salvador such sums as he determines necessary and appropriate of the amounts appropriated under this Act under the heading 'Foreign Military Financing Program'."

The ACTING PRESIDENT pro tempore. The Senator from Vermont is recognized.

Mr. LEAHY. Mr. President, I ask for the yeas and nays.

The ACTING PRESIDENT pro tempore. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

ORDER OF PROCEDURE

The ACTING PRESIDENT pro tempore. The Chair recognizes the majority leader.

Mr. MITCHELL. Mr. President, for the information of Senators, I am about to propound a unanimous-consent request that would identify the remaining amendments to this bill, establish a time limit for them, and a sequence of voting so Senators might have the opportunity to have a brief period for dinner.

UNANIMOUS-CONSENT REQUEST

Mr. President, I ask unanimous consent that the Senate agree to the House amendment No. 295 and that the only remaining four amendments be Senator HELMS' El Salvador military aid amendment, on which there be 40 minutes of debate equally divided and in the usual form; and Senator SHELBY's amendment on the census counting of illegal aliens, on which there be 40 minutes of debate equally divided and in the usual form.

I further ask unanimous consent that the votes on or in relation to the Helms amendment occur upon the completion of the debate on the Shelby amendment with the vote on or in relation to the Shelby amendment to immediately follow that vote.

The ACTING PRESIDENT pro tempore. Is there objection?

Mr. DOMENICI. Reserving the right to object, and I am not sure I will object.

Will the majority leader clarify for me, again, has he propounded in this request all of the amendments that would be offered, or does he still have some additional ones?

Mr. MITCHELL. I have propounded a request which would limit amendments to this conference report to the two which I have identified, the amendments of Senator HELMS and Senator SHELBY.

Mr. DOMENICI. Mr. President, reserving the right to object.

The ACTING PRESIDENT pro tempore. The Senator from New Mexico.

Mr. DOMENICI. I may object. I would ask if the distinguished majority leader would reserve an amendment for the Senator from New Mexico? I do not want to burden either the managers of the bill, but I have a very small problem. It is very important to me and I think to Senator BINGAMAN. He is not here but he is on this amendment.

Essentially, we have an appropriations bill that has already cleared that

has a technical mistake in it. We need to change the authorization for the Secretary in the Corps of Engineers with reference to $300,000 that is already appropriated and approved and I have no other vehicle with which to correct the mistake.

I am quite positive Senator BENNETT JOHNSTON, who chairs the subcommittee, would approve; Senator HATFIELD has approved. I will call the two conferees and ask them if they object. I will do that before we vote, if I can find them.

I ask that the leader reserve for the Senator from New Mexico 4 minutes equally divided on a Domenici amendment on a soil erosion in the city of Santa Fe. It is not a foreign country, but it is very important.

Mr. LEAHY. Mr. President, I would not object to such a request but, reserving the right to object, I am willing to accept the amendment of the Senator from Alabama provided he is willing to do it on a 3-minute equally divided time period.

Mr. SHELBY. If the Senator would yield, I have agreed to his acceptance. I want to offer the amendment and make a brief statement.

Mr. MITCHELL. Just a moment. There are other Senators who object to the amendment of the Senator from Alabama.

Mr. LEAHY. Then I withdraw my suggestion.

Mr. MITCHELL. The junior Senator from New Mexico [Mr. BINGAMAN] has previously opposed that amendment. I think, whatever our views on the amendment, we have to protect his interests.

Mr. LEAHY. I withdraw my suggestion.

Mr. MITCHELL. Mr. President, I modify my request to include an amendment for the Senator from New Mexico [Mr. DOMENICI] with a 4-minute time limitation equally divided in the usual form.

I also modify my request to reverse the order of voting on the Shelby and Helms amendment because I am advised—and I will state this in the form of a parliamentary inquiry—that because Senator HELM's amendment is already pending, the amendment of Senator SHELBY would ordinarily have to be offered as a second-degree to have something to attach it to?

I believe we can correct this in a unanimous-consent request—I ask the Chair's advice—by merely reversing the order of votes so that the votes occur first on the Shelby amendment and then on the Helms amendment.

The ACTING PRESIDENT pro tempore. The Senator is correct in that interpretation.

Mr. MITCHELL. Therefore, Mr. President, I modify my request to provide for three amendments, as previously stated: The Helms amendment to be debated first for 40 minutes equally divided; the Shelby amendment to be debated second with 40 minutes equally divided; and the Domenici amendment to be debated third in order, with 40 minutes equally divided.

With respect to votes, however, the order of votes would be the Shelby amendment, the Domenici amendment, and the Helms amendment.

The ACTING PRESIDENT pro tempore. Is there objection?

Mr. KASTEN. Reserving the right to object, I am sorry, while the majority leader was going through this, we have received a request for a Murkowski amendment with regard to Taiwan. I cannot determine whether or not the amendment will occur, but I want to get this unanimous-consent request in before we get even more amendments.

Mr. MITCHELL. Until we are aware of what the amendment is about, I do not feel it proper to constrain Senators who may be opposed to it by agreeing to a time limit on it.

I will modify the request to provide that a Murkowski amendment with respect to Taiwan would be preserved without a time limit and to be taken up after the three votes that I have already identified occur.

Mr. KASTEN. And no other amendments would be in order.

Mr. MITCHELL. That is part of the order; that the only amendments which would be in order would be the four I have stated.

But I think in fairness to other Senators, it is not possible to agree to a time limitation on Mr. MURKOWSKI's potential amendment.

I modify my amendment to add a fourth amendment, a Murkowski amendment regarding Taiwan, the only description we have; that it be in order for Senator MURKOWSKI to be recognized after the completion of the three votes previously listed in the agreement; that that be the only other amendment beyond these three with no time limitation on it at this time.

The ACTING PRESIDENT pro tempore. Is there objection to the request by the majority leader as modified?

Mr. HELMS. Reserving the right to object, and I shall not object, can I inquire of the distinguished majority leader where we stand on the Moynihan amendment?

Everytime we look at a piece of legislation, there it is, and the President said he is going to veto any bill on which this amendment or provision appears. We have the State Department authorization bill conference report with it in it, and negotiations are going on right now.

I am a little bit loath to limit the time on anything relating to the Moynihan amendment until I know further how the negotiations are going. Like the majority leader, I would like to avoid a veto and going through all that hassle again.

Will he be willing to remove any reference to the Moynihan amendment?

Mr. MITCHELL. Mr. President, the unanimous-consent request included a request that the Senate agree to House amendment to the Senate amendment No. 295, which is the subject matter to which I believe the Senator is referring.

Mr. HELMS. That is correct.

Mr. MITCHELL. If he objects to that, then I assume he objects.

Mr. HELMS. I do not want to object.

Mr. LEAHY. Mr. President, if the Senators will yield, reserving the right to object, and I shall not, but the fact is there was leveraging language, virtually the same leveraging language, in both the House and Senate bills. That passed this body. It has passed it already. It passed the other body.

Now in the other body, they made modifications to it. My understanding is those modifications make it more acceptable. That is now back there. I am willing to accept the modifications they have made and not insist on our earlier Moynihan language, which was tougher.

But if we are going to try to water that down again, we can play ping-pong, and that will be fine. It really will not be a question of the President having to decide whether to veto something or not. He will not have anything to even act on. It will be a continuing resolution until sometime next summer on the whole foreign operations bill at last year's level. That is the choice.

The fact of the matter is that partially at the administration request, the so-called Moynihan language was modified in the other body in the conference report. That is what I am willing to accept. It is less than what I would have liked. I am willing to accept it.

If they wish to modify it further, they have the authorization bill, which is the appropriate place to do it in. I understand it comes up tomorrow sometime, if we are still not on this bill tomorrow. At the rate we are going, that is not a sure thing. That would be the place to modify it.

I am willing to move this bill along, to accept the modification the House made. I am not willing to accept further modification, nor do I believe they are, especially when they know they have a vehicle where it probably can be done virtually without debate by a voice vote tomorrow.

Mr. HELMS. I will not comment on what the Senator said. I do not understand what the Senator said.

Will the majority leader be willing to modify his unanimous-consent request to provide 295 be left open?

Mr. MITCHELL. If I might say to the distinguished Senator from North Carolina, we have reached one of those points where the effort to save

time appears to be taking more time. It is often the case here. We start out trying to limit things and they expand.

I did this in the effort to accommodate the interests of several Senators on both sides. I think it is obvious I have not been successful.

Accordingly, I think what we should do is simply proceed. The Senator has an amendment. He has agreed to 40 minutes. Let us debate it without any limitation.

Mr. HELMS. I am sorry; I want to know if the majority leader will exclude from his unanimous-consent request amendment in disagreement 295?

Mr. MITCHELL. Mr. President, the problem I have is that there are other Senators who have interests in these matters. I am reluctant to do anything with respect to a matter which another Senator is interested in unless I have some authority from him or her to do so. I am advised by the manager he has no objection to that.

Mr. LEAHY. Provided we cut off everything else.

Mr. MITCHELL. I want it understood, all we are agreeing is to set this aside for now; that this does not dispose of it——

Mr. HELMS. Just leaving it open, and when you get to it, you get to it. It "ain't" over until it is over.

Mr. MITCHELL. I am advised if we do that, it leaves the bill open for amendments anyway. Therefore, we have accomplished nothing.

Mr. President, I think it is clear we are not going to get an agreement. We have wasted quite a bit of time to save time. It is with the best of intentions on all sides. I think Senators should be prepared for a lengthy evening to deal with these matters. I see no alternative.

Let us proceed and debate the issues and vote on them as they occur. I withdraw any request and yield the floor.

The ACTING PRESIDENT pro tempore. Who seeks recognition?

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. HELMS. Mr. President, it is my understanding that the distinguished manager of the bill, Mr. LEAHY, is prepared to table my amendment on which the yeas and nays have been obtained. I suggest he proceed, but I think the Senator wants to hold up on a vote until the window is over.

Mr. LEAHY. Mr. President, if the Senator will yield, as I told the Senator, I do intend to move to table. I was going to speak for about 1 minute. The Senator has known me long enough to know that I was not about to move to table until he had finished whatever he wanted to say.

Mr. HELMS. Yes.

Mr. LEAHY. The reason I will move to table, Mr. President, is this would make the entire $5 billion in United States military aid available to El Salvador if the President wanted to do that. In other words, he could break whatever earmarks are in there. We have earmarks for aid to Israel, Egypt, Turkey, Greece, Pakistan, and so on. He could break those earmarks, take that money and put it into El Salvador. We put a lot of aid in here for El Salvador, and I am not willing to take all our foreign military aid that is available throughout the rest of the world and suddenly make it available to El Salvador, important as it might be. After all, this is a country smaller even than my own State of Vermont receiving $105 million in aid already from the United States. I do not know if the Senator from Wisconsin wishes to say anything or not. As soon as we have finished, I will move to table.

Mr. KASTEN. Mr. President, I simply want to say that our position in the Senate was to provide $90 million. The House position was $85 million. In the process of negotiations having to do with police training in El Salvador, which is very, very important—and we were successful in having the police training language included—we ended up with a complex set of agreements, and I feel bound by that set of agreements.

Notwithstanding the fact that my original position would have been at the higher level—and I clearly support what the Senator is saying with regard to the problems in Central America today—I am going to have to stick with the agreement that we have been able to work out and to vote with my chairman.

I hope this vote, Mr. President, is not interpreted as a vote for or against what is going on in El Salvador. We support in this bill money for El Salvador. We support in this bill military training for El Salvador. We support in this bill, I might say, the leadership of Mr. Cristiani and the present government in El Salvador. So wherever this vote might go, it ought not be interpreted, if it were to lose, as a vote against the government in El Salvador. We support that government. I am bound, however, by a complex set of agreements, and I will vote to support the chairman.

Mr. LEAHY. Mr. President, I hope that the Senators will listen to what the distinguished Senator from Wisconsin has just said. I underscore it. I have been, over the years, quite critical of various aspects of aid to El Salvador, but the United States has made a commitment to support the Cristiani government. It made a commitment to the voting that took place when that government took over. I talked with President Cristiani last week and told him what the committee of conference was putting in based on the votes in the Senate, the votes in the other body, and the request of the President of the United States. I think he was certainly appreciative of the amount of aid that the United States was giving El Salvador.

Mr. President, what we have to understand in voting on this motion, if it were to succeed, we may well end up in a case where the aid to a number of other parts of the world, that are also of vital interest to the United States, would be cut for El Salvador. I do not think that should be the intent of this body.

I also note, Mr. President, that we feel—at least I feel very strongly—that the FMLN makes a serious mistake in the effort they are undertaking in San Salvador. This fight in San Salvador and El Salvador is not something that is eventually going to be won on the battlefield.

There is not a military solution to the situation in that poor, and tragedy-racked country. There is only a negotiated political solution.

It would be my desire certainly as one United States Senator that the parties would be able to get back to the negotiating table and realize that there is not going—after 10 years it should be clear to everybody—to be a military solution. It is going to have to be one in which the parties reach a solution at the negotiating table and not on the battlefield.

Mr. President, I move to table the——

Mr. SHELBY addressed the Chair.

Mr. LEAHY. I withhold, certainly if the distinguished Senator from North Carolina whom I told before if he has something to say I would withhold. I will do that.

The ACTING PRESIDENT pro tempore. The Chair recognizes the Senator from North Carolina [Mr. HELMS].

Mr. HELMS. Let me review what was said; that is, that the President of the United States has no judgment, and he is going to spend the defense budget on El Salvador. Reductio ad absurdum, as the lawyers say.

The point is that the President requested $97 million for the fiscal year 1990 budget. This bill proposes to impose a ceiling on such aid at $85 million. $85 million was last year's—that is to say fiscal year 1989—level of funding.

Nobody knows for certain what the President will need to do under the circumstances. Suppose instead of 350 people killed there are 750 tomorrow

night. How about next week? We can protest all we want to, to say that the Communists are bad boys down there. But I think we ought to send a message, and regardless of what my friend from Wisconsin said, we will be sending a message on this vote. It is a little tough to try to win one when both of the managers apparently do not understand what I am saying.

I do not think and I cannot be persuaded that under the circumstances extant in El Salvador, and specifically San Salvador, the Congress ought to restrict the President's decisionmaking authority in this matter. We certainly should not restrict his ability to respond as circumstances may warrant.

These are not popguns down there. They have the real thing going. They are killing people right and left. They are shooting up the U.S. Embassy and all the rest of it. This Senate voted 82 to 18 on September 20 to allow $90 million in spending from the defense budget for military assistance to El Salvador. In doing so, the Senate rejected specifically, precisely, the $85 million limit placed by the House on military spending for this purpose.

Yet, here comes that $85 million from the House of Representatives again. My only point is that I was hoping that the Senate might stand by that earlier vote in support of El Salvador.

I have to say again how can this Congress be aware of the tragedy going on in El Salvador and yet restrict the President's authority, to tie his hands in the event it becomes necessary. Oh, you can say, well, we will come back and get some more money. How long will that take with this group of people debating?

The point is the Communist guerrillas are trying to disrupt the new government of Freddie Cristiani, a fine man whom most, if not all of us, have met and have agreed that he is a splendid chief executive of El Salvador. He was elected in a free election earlier this year, and the Communists do not like it. That is the reason for all of the killing, the mayhem, and the damage and destruction going on down there right now. The Communists did not win the election. They are mad about it. So they have sought to continue their 10-year-old war against the democratic processes in the country of El Salvador.

The Communists in short are trying to force their will militarily when they have repeatedly failed to at the ballot box, and they are failing now in terms of any support from the people of El Salvador. They have flocked. So they are going hammer and tong to kill everybody in sight, blow up everything in sight, and they are prepared for it.

What will be the response of this Congress.

What will be the response of this Congress; to side with the democratically elected government of El Salvador or hobble that government by restricting President Bush's hand to do a little more if he needs to do it than the $85 million?

I do not know how much he will need. I hope he will not need the $85 million. But this is simply another instance of tying the President's hands in a matter of vital importance, not only to El Salvador but to this hemisphere, because what happens in El Salvador will happen to all of us; will affect all of us.

Finally, I will say it was my intent, if necessary, to work with the managers of this bill, if they objected to the amendment in disagreement now pending. But the distinguished managers of the bill, Mr. LEAHY, moved, got the yeas and nays, obviously calculating to block any modifications. So he just does not want to untie the President's hands beyond the $85 million.

I guess he will win. But I will have to say to Senator KASTEN that whether he wants it to happen or not, the vote on this will send a very clear message to the people of El Salvador, and it will not be a very pleasant one to them.

Mr. SHELBY addressed the Chair.

The ACTING PRESIDENT pro tempore. The Chair recognizes the Senator from Alabama, Senator SHELBY.

AMENDMENT NO. 1134 TO AMENDMENT NO. 1132

Mr. SHELBY. Mr. President, I send an amendment to the desk in behalf of myself, Senators DOLE, HEFLIN, HEINZ, LOTT, COCHRAN, HELMS, SYMMS, GRASSLEY, KASSEBAUM, and STEVENS, and I ask for its immediate consideration.

The ACTING PRESIDENT pro tempore. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Alabama, [Mr. SHELBY], for himself, Mr. DOLE, Mr. HEFLIN, Mr. HEINZ, Mr. LOTT, Mr. COCHRAN, Mr. ADAMS, Mr. SYMMS, Mr. GRASSLEY, Mrs. KASSEBAUM, and Mr. STEVENS, proposes an amendment numbered 1134, to amendment No. 1132.

At the appropriate place in the amendment, insert the following:

"None of the funds appropriated or made available to the Bureau of the Census shall be used to count aliens in the United States in violation of the immigration laws for purposes of subsection (b), of Section 141, of title 13, United States Code."

Mr. LEAHY. Mr. President, I ask for the yeas and nays.

The ACTING PRESIDENT pro tempore. The yeas and nays have been requested. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. SHELBY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. SHELBY. Mr. President, the amendment that I offered, I offered on behalf of myself, and Senators DOLE, HEFLIN, HEINZ, LOTT, COCHRAN, HELMS, SYMMS, GRASSLEY, KASSEBAUM, and STEVENS.

Mr. President, this amendment is similar to two others that the Senate has already adopted on two other occasions this year. It has been debated on the floor of the Senate three times. All Senators are aware of the prevailing arguments. I hope we will not spend a lot of time on it tonight.

Earlier this year the Senate by a vote of 58 to 41 voted in favor of an amendment like this that I offered to S. 358, the legal immigration bill.

Mr. President, the prior Senate-passed amendment would direct the Secretary of Commerce to make such adjustments in total population figures as may be necessary and feasible using such methods and procedures as the Secretary determines appropriate in order that aliens in the United States in violation of the immigration laws not be counted in tabulating population for purposes of reapportionment of the U.S. House of Representatives.

We are not strangers to this. The Senate has gone on record twice already this year by a recorded vote that illegal aliens should not be part of the tabulation of total population figures for purposes of reapportionment of the U.S. House of Representatives.

This position that I am espousing here has withstood a point of order that it was unconstitutional by a vote of 56 to 43. A majority of the Senate here, therefore, has affirmed that it is constitutionally proper to exclude from census figures, for purposes of apportionment, the undocumented or illegal alien. That is what this is all about. It is going to affect a lot of the smaller States all over this country, particularly in the Midwest, perhaps the South, and the upper Midwest.

This may be, Mr. President, one of the last opportunities that this Congress will have concerning this issue this millenium. For over 10 years, Congress has attempted to get a vote on this issue. We have had two votes in the U.S. Senate, and we supported this position overwhelmingly. What we are trying to do here tonight is send this amendment as part of this bill back to the U.S. House of Representatives, so the U.S. House can get a vote on this. This has been denied them, basically, by the leadership of the House.

We know the results of the vote here. This is a question, I believe, Mr. President, of fairness. It goes to the

heart of our form of government. Should legal residents continuously be denied proper and undiluted representation at the Federal level because of the inclusion of illegal aliens in the tabulation of total population figures for purposes of U.S. House of Representatives reapportionment?

That is the central question, Mr. President. That is, the issue, that is the concern. A vote against my amendment can reasonably be interpreted as a vote against the proper representation of individuals at the Federal level. I believe the message is clear, and I believe the majority of the Senate on other occasions here has already said that.

I must reiterate that the offered amendment is not designed to be an anti-immigration proposal. It is not designed implicitly or explicitly to hinder the legal immigration process. However, Mr. President, it is designed to ensure proper apportionment, so that all citizens will receive the opportunity to be heard. The opportunity for active participation in governing through an undiluted ballot box is part and parcel of government in America. Consequently, Mr. President, to realize this opportunity, the undocumented alien must not be counted for reapportionment purposes, dealing with the U.S. House of Representatives.

My proposal does not impede upon the constitutional protections that have been legislatively sanctioned and judicially recognized to apply to undocumented aliens, as well as to citizens and resident aliens. The mere inclusion of illegal aliens, Mr. President, in census figures, for House of Representatives apportionment purposes, violates the notion of self-government and eradicates the communities' process of political self-definition. This occurs when effected States' voting strength is weakened, and qualified voters are placed in an impracticable position, vis-a-vis, qualified voters of States with large undocumented alien populations; thus, improper apportionment deprives citizens of their right of self-determination through the ballot box.

My proposal is simple in structure. It upholds our form of Government. As our Nation prepares for the 1990 census, it is important, Mr. President, that fairness and equity not fall by the wayside. What we are trying to do here, and I reiterate, is get the House of Representatives a fair vote on this same issue like we have done in the Senate. This is an issue that my opponents would say is unconstitutional. What they are afraid of is this being passed, going into law, and being challenged and upheld by the U.S. Supreme Court. I think that is what we ought to do, see what the law is in this area, if we are going to make public policy dealing with this.

Mr. President, I will, at the proper time, engage further in the debate.

Mr. LEAHY addressed the Chair.

The PRESIDING OFFICER (Mr. BRYAN). The Senator from Vermont.

Mr. LEAHY. Mr. President, I know that on the Shelby amendment—it may come back up again tonight—I move to table the underlying motion——

Mr. DODD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. LEAHY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEAHY. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. LEAHY. I am not making this motion. I understand that if there were a motion to table the underlying motion, and if it were successful——

The PRESIDING OFFICER. If the Chair might interrupt, there is in fact a motion to table pending.

Mr. LEAHY. I withdraw the motion.

The PRESIDING OFFICER. The Senator has that right.

The Senator from Vermont is recognized.

Mr. LEAHY. Mr. President, as I explained to my colleagues, the tabling motion was there.

Now a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. LEAHY. If the motion to table the underlying motion were made and was successful, is the Senator from Vermont correct in understanding that that would take down both the motion by the distinguished Senator from North Carolina and the amendment by the distinguished Senator from Alabama?

The PRESIDING OFFICER. The Senator is correct.

Mr. LEAHY. Thank you. Mr. President.

I yield to the Senator from Wisconsin.

The PRESIDING OFFICER. The Senator from Wisconsin is recognized.

Mr. KASTEN. If I could have the attention of the Senator from North Carolina, I would like to point out that section 506 gives the President the kind of special authority which the Senator refers to in his amendment. I would like to point that out.

Mr. HELMS. is the Senator talking about the emergency provision?

Mr. KASTEN. I would like to point out that section 506 of the Foreign Assistance Act allows up to $75 million in emergency drawdown, and I think that the number of the examples which he raised would be an example in which the emergency drawdown authority could be and in fact would be appropriate.

So I would hope, with the Senator's understanding that the legislation here, 506, would deal with a number of the problems, the real problems that he discussed, and I would ask that the Senator would withdrawn his amendment and that we would work with the administration with the existing emergency authority.

Mr. HELMS. I will say to the Senator I will be entirely amenable to that, particularly in light of the discussion that I had with another Senator about how we go at that thing possibly another way tomorrow. It is going to be necessary to vitiate the yeas and nays on my motion, and I ask unanimous consent that that be done.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, in light of what the Senator has said, could we have a gentleman's agreement that we will watch the situation in El Salvador, particularly in San Salvador, and send the word to the people of El Salvador that we are watching it and that we will be prepared to do whatever is necessary to be of help to them?

Mr. DODD. Mr. President will my colleague from Wisconsin yield?

Mr. KASTEN. I yield.

Mr. DODD. I thank my colleague for that. I think he is on the right track. All of us are watching carefully the events down there. I would say, as I said before, I think it is regrettable what the guerrillas have done to increase the violence in that country substantially. I gather over 500 lives have been lost.

I had a conversation with my colleague from North Carolina and the Ambassador and I asked him about the level of assistance they had and he at least expressed comfort to me. He was concerned that the problems might increase. I am confident during the next 48 hours or so we might be able to work language here to send a message that this body anyway supports the efforts to try to bring an end to that violence and get back on track with the negotiations to end the war in the country.

I commend my colleague.

Mr. HELMS. I thank the Senator.

I do not want the people of El Salvador in our own hemisphere, our allies, who are standing up against these Communist guerrillas to think we have left them swinging in the breeze.

With that understanding, Mr. President, I have no objection whatsoever to withdrawing the amendment because I think we have sent a definite message to the people of El Salvador.

The PRESIDING OFFICER. Is the Senator withdrawing the motion in its entirety?

Mr. HELMS. The Chair is absolutely correct. I withdraw my motion.

The PRESIDING OFFICER. The motion is withdrawn, and the Shelby amendment falls.

The Senator from Vermont [Mr. LEAHY] is recoginzed.

Mr. LEAHY. Mr. President, so nobody has any mistake about aid to El Salvador, keep in mind that El Salvador during the last 5 to 10 years has been one of the largest, certainly on a per capita basis, recipients of foreign aid from the United States of any other country in the world.

I do not think that the United States has to prove its bona fides as far as support of El Salvador. It certainly does not in this bill.

Mr. President, I do not know if there are further amendments.

Mr. President, I renew my request that we accept the House amendment to Senate amendment 295 which is the leveraging amendment.

The amendment of the House to the amendment of the Senate No. 295 is as follows:

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 295 to the aforesaid bill, and concur therein with an amendment as follows: Restore the matter stricken by said amendment, amended to read as follows:

Title VI—Funding Adjustments

REDUCTION OF APPROPRIATIONS

SEC. 601. Each appropriation item, direct loan obligation limit, loan guarantee commitment limit, or obligation limit provided by this Act shall be reduced by 0.43 percent: *Provided*, That such reduction shall be applied proportionately to each program, project, and activity as set forth in section 543 of this Act: *Provided further*, That programs and activities exempt from sequestration under Section 255 of the Deficit Control Act of 1985 shall be exempt from the uniform reduction required by this paragraph.

COUNTER-NARCOTICS PROGRAMS

SEC. 602. For expenses necessary to enable the President to carry out the provisions of the Foreign Assistance Act of 1961 and the Arms Export Control Act, $125,000,000, which shall be made available only for counter-narcotics programs: *Provided*, That none of the funds appropriated under this heading shall be made available except as provided through the regular notification procedures of the Committees on Appropriations.

Strike out Sec. 577 of the House bill and insert:

PROHIBITION ON LEVERAGING AND DIVERSION OF UNITED STATES ASSISTANCE

SEC. 582. (a) None of the funds appropriated by this Act may be obligated or expended for the purpose of furthering any military or foreign policy activity which is contrary to United States law.

(b) None of the funds appropriated by this Act may be used to solicit the provision of funds by any foreign government (including any instrumentality or agency thereof), foreign person, or United States person, for the purpose of furthering any military or foreign policy objective which is contrary to United States law.

(c) Nothing in this section shall be interpreted as in any way interfering with assistance being provided for the voluntary reintegration or relocation of members of the Nicaraguan Resistance consistent with the Bipartisan Accord on Central America of March 24, 1989, or pursuant to a regional peace agreement.

(d) DEFINITIONS.—For the purposes of this section the term "any military or foreign policy activity", and "any millitary or foreign policy objective" includes only—

(A) assistance of any kind under the Foreign Assistance Act of 1961;

(B) sales, credits, and guaranties under the Arms Export Control Act; and

(C) export licenses issued under the Arms Export Control Act.

(2) For the purposes of this section the term "contrary to United States law" means those provisions of law which expressly prohibit all United States assistance, or all assistance under a specified United States assistance account, from being provided to any specified region, country, government, group or individual for all or specified activities.

(3) For the purposes of this section, the term "United States assistance account" means an appropriations account contained in this Act.

(e) Nothing in this section shall be construed to limit—

(1) the ability of the President, Vice President, or any official or employee of the United States to make statements or otherwise express his views to any party on any subject;

(2) the ability of an official or employee of the United States to express the policies of the President; or

(3) the ability of an official or employee of the United States to communicate with any foreign country, government, group, or individual, either directly or through a third party, with respect to the prohibitions of this section including the reasons for such prohibitions, and the actions, terms, or conditions which might lead to the removal of the prohibitions of this section.

Mr. HELMS. Reserving the right to object, where does that leave the distinguished Senator from Alabama?

Mr. LEAHY. The distinguished Senator from Alabama is not precluded from anything. He could still bring up his amendment.

Mr. HELMS. That would be on 278?

Mr. LEAHY. Yes, 278 is still open.

Mr. HELMS. Fine. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

HOUSE AMENDMENT TO SENATE AMENDMENT IN DISAGREEMENT NO. 278

The PRESIDING OFFICER. The pending question is the House amendment to the Senate amendment in disagreement No. 278.

The Senator from Alabama is recognized.

AMENDMENT NO. 1135 TO HOUSE AMENDMENT TO SENATE AMENDMENT IN DISAGREEMENT NO. 278

Mr. SHELBY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Alabama [Mr. SHELBY], for himself, Mr. DOLE, Mr. HEFLIN, Mr. HEINZ, Mr. LOTT, Mr. COCHRAN, Mr. HELMS, Mr. SYMMS, Mr. GRASSLEY, Mrs. KASSEBAUM, and Mr. STEVENS proposes an amendment numbered 1135 to the House amendment to the Senate amendment numbered 278.

At the appropriate place in the amendment, insert the following:

"None of the funds appropriated or made available to the Bureau of the Census shall be used to count aliens in the United States in violation of the immigration laws for purposes of subsection (b), of Section 141, of title 13, United States Code."

The PRESIDING OFFICER. The Senator from Alabama [Mr. SHELBY] is recognized.

Mr. SHELBY. Mr. President, on behalf of myself and Senators DOLE, HEFLIN, LOTT, COCHRAN, HELMS, SYMMS, GRASSLEY, KASSEBAUM, and STEVENS, I have sent this amendment to the desk.

Mr. President, this amendment that encompasses the issue here has been debated twice already on the Senate floor this year and we have prevailed twice. What does it deal with? All of the Senators are aware of the prevailing arguments.

Mr. KASTEN. Mr. President, will the Senator yield?

Mr. SHELBY. I yield without losing my time.

Mr. KASTEN. I want to address a question to the Senator.

There are a number of people who asked how long are we going to be debating this amendment? I wonder if we could give them an idea. I happen to be a proponent of the Senator's position. But notwithstanding that, could we work out a vote, say, at 8:30? Would there be an agreement that we could have a vote?

Mr. SHELBY. I have no objection to voting at 8:30.

Mr. BINGAMAN. Mr. President, let me say I do not plan to speak long at all. I prefer we go ahead and have the debate at this point and then go ahead and vote.

Mr. KASTEN. The reason is a number of people have asked when the vote would occur. Could we have 20 minutes equally divided?

Mr. BINGAMAN. No more than that.

Mr. SHELBY. That is fine with me.

Mr. KASTEN. Mr. President, I ask unanimous consent that we have 20 minutes equally divided between the Senator from Alabama and the Senator from New Mexico in charge of the bill and that would mean, I would say to the Senator, we would vote at approximately 20 minutes before 9.

The PRESIDING OFFICER. Is there objection to the request?

Without objection, it is so ordered.

The Senator from Alabama [Mr. SHELBY].

Mr. SHELBY. Mr. President, as I stated, all Senators are aware of the prevailing arguments on this. We have

voted on it. We have debated it at length on the floor of the Senate already this year.

On one vote, by a vote of 58 to 41, the Senate voted in favor of an amendment similar to this that I offered on the legal immigration bill. It was also passed on another piece of legislation. The prior Senate-passed amendment would direct the Secretary of Commerce to make such adjustments in total population figures as may be necessary and feasible, using such methods and procedures as the Secretary determines appropriate, in order that aliens in the United States in violation of the immigration laws not be counted in tabulating population for purposes of reapportionment of the House of Representatives. That is the central issue here.

The Senate has gone on record that illegal aliens should not be part of the tabulation of total population figures for purposes of apportionment. This position has withstood a point of order in the U.S. Senate that is unconstitutional by a vote of 56–43. A majority of the Senate, therefore, has affirmed that it is constitutionally proper to exclude from census figures for purposes of apportionment the undocumented alien.

This may be the last opportunity the Congress will have concerning this issue this millenium. For over 10 years the Congress has attempted to get a vote on the issue in both bodies. Only this year were we able to get votes, two of them, in the U.S. Senate. We all know the results of the votes.

This is a question of fairness. It goes to the heart of our form of Government. Should legal residents continuously be denied proper and undiluted representation at the Federal level because of the inclusion of illegal aliens in the tabulation of total population figures for purposes of U.S. House of Representatives apportionment? That is the question. That is the issue. That is the concern.

A vote against my amendment can reasonably be interpreted as a vote against the proper representation of individuals at the Federal level. I believe the message is clear.

I must reiterate that the proffered amendment is not designed to be an anti-immigration proposal. It is not designed, implicitly or explicitly, to hinder the legal immigration process.

However, it is designed to ensure proper apportionment so that all citizens will receive the opportunity to be heard. The opportunity for active participation in governing through an undiluted ballot box is part and parcel of Government in America. Consequently to realize this opportunity, the undocumented alien, the illegal alien, must not be counted for apportionment purposes.

My proposal does not impede upon the constitutional protections that have been legislatively sanctioned and judicially recognized to apply to undocumented aliens as well as to citizens and resident aliens.

The mere inclusion of illegal aliens in census figures for House of Representatives apportionment purposes violates the notion of self-government and eradicates the community's process of political self-definition. This occurs when affected States voting strength is weakened and qualified voters are placed in an impracticable position vis-a-vis qualified voters of States with a large undocumented alien population. Thus improper apportionment deprives citizens of their right to self-determination through the ballot box.

Mr. President, my proposal is simple in structure. It upholds our form of government. As our Nation prepares for the 1990 census, it is important that fairness and equity not fall by the wayside in our assessment of demographics.

I urge my colleagues to support this amendment as they have already twice, and I believe they will.

Mr. BINGAMAN addressed the Chair.

The PRESIDING OFFICER. The Senator from New Mexico [Mr. BINGAMAN] is recognized.

Mr. BINGAMAN. Mr. President, once again I rise to resist this amendment. This is the third time the Senate has been asked to vote on the subject. Let me repeat some of the arguments that were made earlier and then add some additional ones.

The main three arguments, Mr. President, why this amendment should be defeated by the Senate are: No. 1, it is unconstitutional; No. 2, it is not feasible to ask the Census Bureau to carry out the provisions of the amendment; and No. 3, the amendment, by its requirements, to the extent it was carried out, would undermine the main purpose of conducting the census, which is to get an accurate count of the people resident within our borders.

Let me deal with those three very briefly and then go on to the procedural issues that relate to the way and the time that this amendment is being offered.

First, on unconstitutionality, I think it is clear from the case law that I have cited in previous debates that this amendment is not constitutional. The Founding Fathers established what the census was to count when they wrote the Constitution. And we are not in a position to change that by statute. It is, again, another example of the farsightedness of our Founding Fathers that they anticipated this very type of issue and provided for it in the language where they say that the purpose of a census is to count the "whole number of persons." That is exactly what the census is for and we should not try to tamper with that.

The second argument is that it is not feasible. The Census Bureau is not, very frankly, prepared to, does not have the trained personnel to determine the legal status of the various people that they are going to interview during the census process. That is an enormous additional responsibility. The Census Bureau sees great difficulty in carrying out the responsibilities they have already been given under the law with the limited funds that they have at their disposal, and to add this additional responsibility at this very late stage in the preparations for the 1990 census would clearly give them a burden that they are not prepared to take.

The third argument very simply is that if in fact the Census Bureau were to go around and ask citizens to establish their legal status as a precondition to answering the census form and filling out the census form, responding to questionnaires, it is very clear that the minority outreach programs that the Census has been working to put in place would be totally subverted. One of the main purposes that the Census Bureau has set for itself in 1990 is to get an accurate count of the minority residents within our country.

When you start asking people for their legal status, the suspicions about the purpose for that information increase dramatically and the cooperation of certain minority groups in our population is not to be expected under those circumstances to near the same extent it would be under a fair and open traditional census as we have had in the last 190, now 200 years. So those are the substantive arguments.

The procedural arguments I think are also important, Mr. President. I hope that Members who may have voted otherwise on this amendment in previous votes will consider the procedural arguments. It is very clear that this provision, which directs particular action by the Bureau of the Census, has absolutely nothing to do with foreign operations. We are today debating and considering tonight the foreign operations appropriation bill. This is not relevant in any way.

Also, we have the Secretary of Commerce and the Attorney General who have indicated their strong view that they would recommend a veto to the President if this amendment were adopted. And that needs to be taken into account. In these final days of the session, we should not be flirting with a possibility of a veto of a significant appropriation bill in order to once again deal with this issue.

Third, the House has spoken on this issue. They made it clear in the debate that they were voting on this when they turned down an effort to instruct

conferees to accept this provision. The vote was 232 to 184.

Finally, I indicate the obvious point; this is authorizing legislation on an appropriation bill. It is not appropriate at this time, at this late hour when we are trying to finish the important work of the Congress, to once again be revisiting this issue which the House has repeatedly rejected.

Mr. President, at this time, if there are no additional Senators wishing to speak, I raise a point of order.

The PRESIDING OFFICER. The Senator would have to wait until all time has expired before raising that point of order.

Mr. BINGAMAN. I will do that. Certainly I do not wish to cut off any debate.

The PRESIDING OFFICER. Who yields time?

Mr. SHELBY. I yield as much time to the Senator from Mississippi as he may consume.

The PRESIDING OFFICER. The Senator from Mississippi.

Mr. LOTT. I thank the distinguished Senator from Alabama. I certainly do not wish to draw out this debate, but rather than go into a quorum call, I did have just a couple of thoughts I would like to present to the Senate tonight.

First, I want to congratulate and commend the Senator from Alabama for his persistence and for the fine job he has done in developing this amendment and offering it, not once, not twice, but three times. I think he is clearly right on the issue and it is a classic example where, if he did not persist in it, if he did not keep working on it, then we would not have a chance to have it directly considered and approved.

I listened very carefully to the remarks of the Senator from New Mexico, because I certainly have the highest respect for him. But there were a couple of points he made I would like to touch on.

First of all, as far as the constitutionality or the difficulty with the Census Bureau personnel dealing with this issue, I just hope the people will listen to what we are saying. This amendment would prohibit funds from being used to count illegal aliens.

It seems to me that speaks for itself. We are going to count illegal aliens. There is no question that, if they are counted, it will work to the disadvantage of those areas where we do not have illegal aliens; where we have, in fact, legal aliens. So I hope my colleagues here will just think about that.

I know the American people are thinking about it. When I mention the fact back home in Mississippi that we are going to count illegal aliens and what that will mean in terms of the distribution of funds, they find that very hard to accept.

Just one other point, because I see our leader is here and I do not want to take up any more time than is absolutely required.

The House has not faced this issue directly. It has not.

As a former Member over there, having participated time and time again on these motions to instruct conferees, everybody over there knows, first of all, the motion to instruct is not binding. It is very much a procedural issue. It is not a substantive vote.

I think this one last effort, in view of the circumstances, to get the House to face this issue and vote directly on it, is worthwhile. I certainly urge we adopt this amendment tonight, and I thank the Senator for yielding me that time.

The PRESIDING OFFICER. The Senator from Alabama.

Mr. SHELBY. Mr. President, I yield as much time as I have left to the distinguished Republican leader, the Senator from Kansas.

The PRESIDING OFFICER. The Senator has 3 minutes, under the time agreement, remaining.

Mr. DOLE. Mr. President, I want again to commend the distinguished Senator from Alabama. As was just pointed out by the Senator from Mississippi, he is persistent, and he ought to be persistent. This is an outrage. Talk about one of these programs, "The Outrage of the Week," here is another one.

It seems to me we ought to win again by a vote of 58 to 41. As I recall, that was the vote on it the last time. The House ought to vote. The have not voted on this issue.

We are all familiar with the problem of illegal immigration. We heard all about this problem when we passed the immigration bill under the able leadership of Senators KENNEDY and SIMPSON.

We do not have to compound this problem by mindlessly lumping millions of illegal aliens in the 1990 census. We do not have to compound this problem by ripping off the States, some of whom will lose congressional seats—my State happens to be one of them—because of the inclusion of illegal aliens in the census.

Unfortunately, the established policy of the Census Bureau is to count everybody, every person in this country, without making a single adjustment for illegal aliens.

The Census Bureau wants to continue that policy through 1990. It does not make any sense. It violates the constitutional principle of one man, one vote. And it is not fair to the States who are in jeopardy of losing seats in the House.

We have seen it happen before.

So we had the amendment last July by the distinguished Senator from Alabama, and the Senator from North Carolina, Senator HELMS. They offered the amendment to the immigration bill that provided a simple, straightforward solution to this problem. It was adopted and adopted a second time, in the Commerce Justice, State appropriations bill. It requires the Secretary of Commerce to use tabulating procedures that are both feasible and appropriate to ensure that illegal aliens are not counted in the census for purposes of reapportionment.

This is a sound solution that will restore some basic fairness to the census and reapportionment process. This is our last chance.

Unfortunately, the House has not yet yielded—and time is running out. If we do not act now, Congress will not have the opportunity to correct the census problem until the year 2000. We cannot afford to wait that long.

So I commend Senator SHELBY for offering this amendment. And I urge my colleagues to support it.

The amendment will simply reaffirm the views expressed by the Senate on two previous occasions.

I think the Senator from North Carolina wants to make a comment.

Mr. SHELBY. I yield what time I have left to the Senator from North Carolina.

The PRESIDING OFFICER. The Senator has slightly less than 1 minute.

The distinguished Senator from North Carolina [Mr. HELMS] is recognized.

Mr. HELMS. Mr. President, I am pleased to be an original cosponsor of the amendment by the Senator from Alabama.

The Shelby-Helms amendment instructs the Census Bureau not to include illegal aliens in the census count. For some absurd reason, the Census Bureau has decided to count illegal aliens in the 1990 census.

Mr. President, we passed a similar amendment on two occasions this year: on July 13 and then again on September 29. However, these amendments did not become law. So we have one last chance to avoid a grave injustice.

Mr. President, the Census Bureau policy jeopardizes the constitutional right of North Carolina citizens to fair and equal representation.

If the Census Bureau counts illegal aliens, the citizens of North Carolina risks losing a congressional seat. We lose a congressional representative just because some bureaucrats at the Census Bureau think the Constitution requires them to count illegal aliens.

Mr. President, illegal aliens do not have the right to vote. So why should they have the right to determine the makeup of our Government?

If illegal aliens are counted, States like California will gain a seat at

North Carolina's expense. Therefore, Californians will have proportionally more congressional representation than North Carolina. They will have more votes in Congress thanks to people breaking the law and entering as illegal aliens.

I simply do not believe that our Founding Fathers ever intended to let people who cannot vote and who break the law determine the political makeup of our Government. As Judge Noonan pointed out, if a foreign army invaded our country on census day, we would not count them in the census.

Nothing in the Constitution requires the counting of illegal aliens in the census.

As Senator HATCH explained during the debate in July, the Constitution speaks of "persons" in the sense of legal persons, not illegal. If the Constitution stands for anything it stands for legality—not illegality.

Mr. President, the amendment by the Senator from Alabama makes sense, it is fair and it should be adopted by the Senate.

We have been up and down this road three or four times. There is no point repeating what has been said over and over again. The distinguished minority leader, Mr. DOLE, is absolutely correct. The House has not yet voted on this.

I yield the floor.

Mr. BINGAMAN. Mr. President, I yield 1 minute to the Senator from Florida [Mr. GRAHAM].

The PRESIDING OFFICER. The Senator from Florida [Mr. GRAHAM] is recognized.

Mr. GRAHAM. Mr. President, earlier today we were privileged to hear the stirring words of a great world figure who has placed his life literally at jeopardy, at risk, for democracy.

We are fortunate. Two hundred years ago our forefathers made a similar commitment to establish this Nation in freedom, to overthrow tyranny.

In order to solidify those gains, they wrote a Constitution, a beautiful document, a document which has internal coherence.

Two of the aspects of that coherent document are relevant this evening in this debate. One of those is the very clear statement in the Constitution that it is the responsibility of the Federal Government to control naturalization and immigration policy. It is the responsibility of this Government to determine who gains entry, and to provide the enforcement mechanism to assure that those laws operate.

Second, without regard to classification, all people are counted for purposes of the census, and have been since 1790.

Those two provisions, that it is the Federal Government's responsibility to control who as a person gains entry to the United States, but all those that the Federal Government by action or inaction allows to enter will be counted for purposes of the census, are basic parts of our Constitution.

They are basic parts of essential fairness.

If the Federal Government, by its decisions to act, by its decisions to allow porous borders, causes certain areas of the country to have large numbers of illegal aliens, then the Constitution says that those people should be counted for purposes of representation.

We have accepted that for purposes of allocation of Federal funds because they are people who, by Federal action, are going to be imposing real needs and real obligations of representation on those particular communities.

I strongly urge, Mr. President, as a vote of confidence in Lech Walesa, we vote against this amendment.

The PRESIDING OFFICER. The Senator from New Mexcio.

Mr. BINGAMAN. Mr. President, I yield 1 minute to the Senator from California.

The PRESIDING OFFICER. The Senator from California [Mr. WILSON] is recognized for 1 minute.

Mr. WILSON. Mr. President, this is not a case of first impression. This is a mistake.

However well intentioned, it is unworkable and unenforceable. Can you not just see it?

"Good evening, Madam. I am from the U.S. Bureau of Census. Would you mind telling me how many members of your household are illegal aliens?"

This is not going to work. The effort to try to make it work will set the census back. They are currently preparing for the 1990 census. It is unconstitutional. The Supreme Court thinks so. They have so advised the Secretary of Commerce. He has indicated in the past that this would be the basis for a veto recommendation.

Mr. President, this may be a good intention, but it is a bad idea, an unworkable one. I urge its defeat. Let us get on with important business.

The PRESIDING OFFICER. The Senator's time has expired. Senator BINGAMAN.

Mr. BINGAMAN. Mr. President, I yield 1 minute to the Senator from Illinois.

The PRESIDING OFFICER. The Chair informs the Senator from New Mexico this would be the last minute allocated under his control.

Mr. BINGAMAN. I still have time to make a point of order at the end of that, I assume?

The PRESIDING OFFICER. The Senator is correct.

Mr. BINGAMAN. I yield that minute to the Senator from Illinois.

The PRESIDING OFFICER. The Senator from Illinois [Mr. SIMON] is recognized.

Mr. SIMON. Mr. President, my good friend from Alabama has to amend the Constitution if he wants to do what he is doing. The Constitution is clear. Our history is clear. The second sentence of the 14th amendment talks about the rights of citizens. And then, the next sentence talks about "counting the whole number of persons," not citizens.

Our history is clear. The Constitution is clear.

If my good friend from Alabama wants to amend the Constitution, then he should proceed in that fashion. In the meantime, we should abide by the Constitution.

Mr. SHELBY. Mr. President, how much time do I have left?

The PRESIDING OFFICER. The Senator has 22 seconds.

Mr. SHELBY. Thank you, Mr. President. I will try not to use all of it. I would like to respond to what my good friend from Florida said basically about counting everybody here and what the Constitution says. Under that theory, you would count an invading army. If we had an invading army in southern Florida or New York——

The PRESIDING OFFICER. The Chair informs the Senator that his time under the previous agreement has expired. The Senator from New Mexico is recognized.

Mr. BINGAMAN. Mr. President, I make a point of order that this amendment is legislation on an appropriations bill.

The PRESIDING OFFICER. Under rule XVI, the amendment constitutes legislation on an appropriations bill since it restricts the use of funds provided outside the pending bill. The point of order is sustained.

Mr. SHELBY. Mr. President, I appeal the ruling of the chair and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is, Shall the decision of the Chair stand as the judgment of the Senate? Those supporting the ruling of the Chair will vote yea; those desiring to sustain the appeal will vote nay.

The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Hawaii [Mr. MATSUNAGA] is absent because of illness.

Mr. SIMPSON. I announce that the Senator from New York [Mr. D'AMATO] is necessarily absent.

The ACTING PRESIDENT pro tempore. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 47, nays 51, as follows:

[Rollcall Vote No. 301 Leg.]

YEAS—47

Adams	Glenn	Mack
Bentsen	Gore	McCain
Biden	Gorton	Metzenbaum
Bingaman	Graham	Mikulski
Bradley	Gramm	Mitchell
Bryan	Hatfield	Moynihan
Bumpers	Hollings	Pell
Burdick	Inouye	Reid
Byrd	Johnston	Riegle
Conrad	Kennedy	Rudman
Cranston	Kerrey	Sarbanes
Daschle	Kerry	Sasser
DeConcini	Kohl	Simon
Dixon	Lautenberg	Wilson
Dodd	Leahy	Wirth
Domenici	Lieberman	

NAYS—51

Armstrong	Garn	Nickles
Baucus	Grassley	Nunn
Bond	Harkin	Packwood
Boren	Hatch	Pressler
Boschwitz	Heflin	Pryor
Breaux	Heinz	Robb
Burns	Helms	Rockefeller
Chafee	Humphrey	Roth
Coats	Jeffords	Sanford
Cochran	Kassebaum	Shelby
Cohen	Kasten	Simpson
Danforth	Levin	Specter
Dole	Lott	Stevens
Durenberger	Lugar	Symms
Exon	McClure	Thurmond
Ford	McConnell	Wallop
Fowler	Murkowski	Warner

NOT VOTING—2

D'Amato	Matsunaga

So the ruling of the Chair was overturned.

Mr. COHEN. Mr. President, I have cleared this with both the Democratic and Republican sides. Mr. President, on rollcall vote No. 301, I am recorded as voting "aye." I ask unanimous consent that I may change my vote to "no." It will not affect the outcome of the vote in any way.

The ACTING PRESIDENT pro tempore. Is there objection?

The Chair hears none, and it is so ordered.

(The foregoing tally has been changed to reflect the above order.)

Mr. BYRD. Mr. President, on rollcall vote No. 301, dealing with amendment 1135, Mr. SHELBY's amendment regarding the counting of illegal aliens in the census, I support the substance of that amendment, but I voted to sustain the Chair; and I wanted to make that statement so there will be no misunderstanding as to my vote. I voted for the Shelby amendment, the amendment, on previous occasions. I voted against tabling it on previous occasions. But the Chair was right in ruling as it did on the matter.

My vote was to sustain the ruling of the Chair and should not be interpreted as being against the substance of the amendment.

I thank the Chair. I thank the Senator.

I yield the floor.

Mr. SHELBY. Mr. President, I urge adoption of the amendment.

The ACTING PRESIDENT pro tempore. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Alabama.

The amendment (No. 1135) was agreed to.

Mr. LEAHY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. McCLURE. I move to lay that motion on the table.

The motion to lay on the table was agree to.

Mr. LEAHY addressed the Chair.

The ACTING PRESIDENT pro tempore. The Senator from Vermont.

Mr. LEAHY. Mr. President, I yield to the Senator from New Mexico.

AMENDMENT NO. 1136 TO THE HOUSE AMENDMENT TO THE SENATE AMENDMENT IN DISAGREEMENT NO. 278

Mr. DOMENICI. Mr. President, I send an amendment to the desk and ask for its immediate consideration. This amendment was discussed during the unanimous-consent debate. I understand it is acceptable.

The ACTING PRESIDENT pro tempore. The clerk will report.

The legislative clerk read as follows:

The Senator from New Mexico [Mr. DOMENICI] for himself and Mr. BINGAMAN, proposes an amendment numbered 1136.

At an appropriate place in the amendment add the following:

"Funds appropriated to the Secretary of the Army, acting through the Chief of Engineers, pursuant to Public Law 101-101 for the purposes of Section 14 (Streambank Erosion Control) for the Santa Fe River, New Mexico, shall be made available under the general Investigation authority of the Secretary for the design, including plans and specifications, of an emergency streambank and channel stabilization project on the Santa Fe River, New Mexico, provided that non-Federal interests agree to cost share in such engineering and design activities."

Mr. LEAHY. Mr. President, I have no objection to the amendment.

Mr. KASTEN. I have no objection to the amendment.

The ACTING PRESIDENT pro tempore. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from New Mexico.

The amendment (No. 1136) was agreed to.

Mr. DOMENICI. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. KASTEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. LEAHY. Mr. President, I move to concur in the House amendment to the Senate amendment No. 278.

The ACTING PRESIDENT pro tempore. The question is on the motion.

Mr. DOMENICI. Mr. President, I send a statement explaining the——

Mr. LEAHY. Will the Senator withhold? Is my motion to concur in the House amendment, amendment No. 278, agreed to?

The ACTING PRESIDENT pro tempore. Is there further debate on the motion to concur? If not, the question is on agreeing to the motion.

The motion was agreed to.

Mr. LEAHY. I move to reconsider the vote by which the motion was agreed to.

Mr. KASTEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOMENICI. I thank the managers for accepting the amendment.

The ACTING PRESIDENT pro tempore. Who seeks recognition?

Mr. LEAHY. Mr. President, regular order.

Mr. DECONCINI. Mr. President, it gives me a great deal of satisfaction to urge the Senate to adopt the conference report on the fiscal year 1990 foreign operations appropriations bill. This was a difficult conference and the chairman and the ranking member of the subcommittee, Senators LEAHY and KASTEN, are to be congratulated for their final product. I would also like to thank their staffs for the hard work they have put into this achievement. In particular, Eric Newsom and Jim Bond have put in long hours to help us fashion a constructive compromise with our colleagues in the House. The report before us today meets the country's foreign policy and security interests, while avoiding budget-busting spending levels that would add to the problems of the deficit.

The compromise legislation provides spending of $14.6 billion for the current fiscal year. Frankly, I would have preferred to see a lower level of spending on foreign aid this year. A lower level would have been consistent with the cuts we have had to make in resources available for many important domestic programs. Still, we were able to trim the initial administration request of nearly $15.2 billion, and come in below the total budget ceiling for the foreign aid program. In meeting these stringent budget ceilings, we managed to provide for a new, high priority assistance program for Poland and Hungary, at funding levels well above the President Bush's timid initial proposal.

In appropriating money for foreign aid programs, it is also important to ensure that the taxpayer's dollars are spent wisely and in a manner that ensures the greatest contribution to our foreign policy, security interests, and humanitarian concerns. I believe that the compromise now before us meets that test.

One of the most significant events of the post war period is the assumption of power of a Solidarity-led government in Poland. This fledgling government faces the daunting task of building a truly democratic system of government out of the ruins of its totali-

tarian Communist predecessor while, at the same time, creating a free market economy from the shambles left by the socialist central planners. The Polish people need and deserve our help as they struggle for freedom. I am proud that this bill will provide more than $650 million in funds and credits to assist Poland and Hungary in the coming year.

Another area where I have taken a particular interest is in programs to promote free enterprise in the developing countries. Development in much of the Third World is a vain hope as long as governments stifle the initiative of small entrepreneurs and ignore the needs of the credit starved private sector. This bill provides $75 million for AID's microenterprise loan program which makes credit available to the new businessman or woman by making small loans—ideally under $300 each—to develop new enterprises. This program has already had considerable success and our efforts in this bill will ensure that this important program continues.

Americans have traditionally been a generous people and have responded to those in need. This bill meets the humanitarian concerns of our country. Children are particularly helpless victims of poverty, starvation, and disease. My colleagues and I have ensured that the United Nations Childrens Fund [UNICEF] was protected from the 45-percent cut requested by the administration and that the Child Survival Fund set up by the Congress in 1984 received full funding. These programs have been instrumental in reducing infant mortality rates and increasing the number of children being protected by early immunization against childhood diseases. By preventing drastic cuts in these funds, we will save the lives of tens of thousands of children and give them a better chance to lead healthy and productive lives.

Our country has also long been a haven for those suffering from persecution, oppression, and the ravages of war. Due to continuing tight budgets, we were unable in this bill to supply all the funds necessary to meet the growing needs of the programs serving the world's refugees. This bill, however, is a good first step toward meeting many of these important needs. We provide $10 million to help ethnic Turkish refugees from Bulgaria who are fleeing an orchestrated and oppressive campaign against them in their own country.

I also fought to earmark funds for Iraqi Kurds seeking refuge in Turkey. These are people who have suffered chemical warfare attacks by their own government and who have fled to Turkey to escape the cruel repression to which they had been subjected. Unfortunately, Turkey does not have sufficient resources to care for these refugees and many will die during the harsh winter months if additional help is not made available. While the conferees did not heed my plea to earmark $5 million for the Iraqi Kurds, I did succeed in inserting language in the conference report stating that the administration will make this money available from unearmarked funds. I intend to follow up this request with the State Department.

The conference report also takes important steps to protect our own security. It provides Israel with the military assistance it needs to keep the peace on its vulnerable frontiers and the economic aid needed to sustain its ailing economy. A provision that allows the U.S. military to stock weapons on the soil of key allies gives Israel the assurance that in an emergency, it will have the supplies it needs to respond to aggression.

I am also pleased to see that other U.S. allies will receive needed funds. These include Egypt, a country which has gone so far in promoting peace in the Middle East; Turkey and Greece, key allies on NATO's southern flank; and the newly democratic government of Pakistan. We should remember that these important allied countries are an integral part of our national defense system.

Mr. President, this is not a perfect bill. Foreign aid bills are never perfect bills because they send increasingly scarce resources overseas. I would prefer to see this spending cut even further when we have so many unfulfilled needs at home. I still believe we can eliminate other foreign assistance programs while still meeting our international commitments and foreign policy interests. As a compromise, however, this bill succeeds in staying within our budget limits, in a very tight budget year, and provides fundings for high priority programs such as aid to emerging democracies and humanitarian aid for refugees. I urge my colleagues to support the adoption of this bill.

Mr. DIXON. Mr. President, H.R. 2939, the foreign operations appropriations bill for fiscal year 1990, is, in my view, fatally flawed. It continues a trend in recent foreign assistance bills that I have found increasingly troubling.

Unfortunately, foreign assistance bills, over the last several years, have shifted emphasis from economic assistance to military assistance. This bill maintains that shift, even though around the world there seems to be a diminished security threat. I wish I could say that this legislation is in touch with the real strategic and economic realities we are facing, but it is not. It seems to look backward, toward past threats that are now diminishing, instead of toward today's needs that are not being met.

The sad fact is that this bill is not fashioned in a way that properly balances military and economic assistance needs. The way it handles a relatively minor program, the international military education and training assistance program, illustrates the point. The Senate committee report severely criticizes this program, yet the conference committee continued it with very minor changes. Given the budgetary situation we are facing; given our strong national security, foreign policy, and trade policy interests in trying to help Third World nations meet their serious economic problems, I do not understand why we are paying to have so many nation's soldiers trained here in the United States. For example, while I am perfectly prepared to support training members of the Korean Armed Forces here, I do not understand why we should have to pay for that training. Korea has a substantial trade surplus with the United States, and the Korean economy is expanding rapidly. The truth is that the Koreans could well afford to bear this burden themselves, yet it is American taxpayers that are being asked to pay.

Let there be no mistake. I think providing military assistance is vital to our national interests. Given the situation in the Middle East, for example, I fully support the funding level provided for Israel, an amount that I want to note was not increased by even $1 from the fiscal 1989 level. What I cannot support is a bill that provides more military assistance than is required in other parts of the world where the military threat is clearly diminishing, and which sacrifices desperately needed economic assistance to our poorest neighbors in order to do so.

I regret having to oppose this bill. It contains funding for Israel, for Poland, and for our war on drugs that I strongly support. I also have no illusions that my opposition is a minority view. I strongly believe, however, that we need to fundamentally reassess our economic and military assistance programs. Because we have not done so, I would have had to vote "no" should this bill have required a rollcall vote.

NIFTAL PROJECT

Mr. INOUYE. Mr. President, today I would like to congratulate and recognize the University of Hawaii for the receipt of a recently approved grant from the Agency for International Development for a biological nitrogen fixation/legume management outreach project with a consortium of private voluntary organizations, Peace Corps and the University of Hawaii's nitrogen fixation by tropical agricultural legumes [NifTAL] project.

Biological nitrogen fixation in agricultural legumes is an environmentally sound and renewable natural resource

of low-cost nitrogen. This technology overrides the need to buy and transport industrial nitrogen fertilizer. The project involves the transfer of readily available technology for the application of biological nitrogen fixation techniques to small-scale farmers in four developing countries: Uganda, Senegal, Haiti and Nepal. The pilot project will increase the use and production of nitrogen fixing legumes, increase farm incomes and develop enterprises in legume management.

This watershed union of NifTAL, the Peace Corps and the consortium of PVO's represents a hallmark in collaboration linking together technical expertise to outreach. Technology developed by NifTAL has been adopted by the Peace Corps and PVO's for delivery to small farmers throughout the developing world.

While this effort is quite modest, overall international development needs will be met through this collaborative effort. Farm families will be exposed to an important component of sustainable agricultural technology. Soils will be richer in nitrogen, a major nutrient commonly in short supply. The crops grown on these soils will be more robust, thereby reducing the need for pest control and increasing their value for human food and animal feed. The economies of these agricultural-based countries will be strengthened. Eventually, the countries will be more receptive to other developmental efforts and their citizens will escape a bit more from the grip of international debt, environmental degradation, hunger and disease.

Mr. President, I congratulate the Agency for International Development for their grant to the University of Hawaii for the implementation of this project with NifTAL, the Peace Corps and the consortium of private voluntary organizations.

Mr. BINGAMAN. Mr. President, I am pleased to see that the conference committee on the foreign operations appropriations bill has agreed to accept my provision expressing the sense of the Congress on the renewal of the International Coffee Agreement, which expires this year. As I stated earlier this year I believe that the International Coffee Agreement is an important part of our international economic development policy and should be an important factor in our antidrug strategy. I think that by including this provision in the conference report, the conferees agree with that statement. I thank the conferees.

As a result of my concern, I wrote President Bush urging that the administration do all it can to break the seeming impasse over renewal of the agreement. Recently, I received a letter from Janet Mullins, Assistant Secretary for Legislative Affairs at the Department of State, regarding the events at the London meeting of the International Coffee Council.

I would like to quote from Ms. Mullins' letter:

> We share your concern that instability in the international coffee market may well contribute to political and economic instability in developing countries and hamper the effects of countries such as Colombia to control drug trafficking. It is thus encouraging that the recent International Coffee Council meeting in London resulted in a mandate to pursue a path toward negotiation of a new International Coffee Agreement.
>
> The ICO Council recognized that the political will exists to negotiate rapidly a new agreement that avoids the problems encountered with the 1983 ICA. All ICO members have agreed to continue intensive informal consultations leading toward negotiations. As soon as a consensus is formed on the framework of a new Agreement, the Council Chairman will convene a negotiating session.
>
> The United States is actively seeking solutions to the problems of the International Coffee Agreement and is willing to explore all options and consider any form of Agreement that has the potential to work effectively. We are using every opportunity to pursue consultations with coffee producing and consuming countries so that a new Agreement may be brought into operation as soon as possible.

I am encouraged by the events in London and by the administration's interest in a renewal of the International Coffee Agreement as outlined in Assistant Secretary Mullins' letter. However, we still have a long way to go. We have a process to continue discussions, not an agreement. We must continue to work vigorously toward a renewal of the agreement.

It is my understanding that the administration has formulated a package of trade initiatives with the Andean nations. Included in this package is a call for the renegotiation for the Coffee Agreement. I believe that this is the most important part of the package. While lowering duties on other goods may be important, coffee is one of the largest exports for nations such as Colombia. Thus, a stable coffee market is essential to stable Colombian export earnings.

Mr. President, in summary, I hope the administration will continue its efforts toward concluding a successful negotiation on the coffee agreement. And I look forward to working with the administration on their Andean trade initiative. For the sake of the future of all of our Nation, we must continue our efforts toward a positive economic development and trade strategy with Colombia and other nations now in the grip of a drug producing economy.

MOYNIHAN PROVISION ON BURMA

Mr. MOYNIHAN. As the sponsor of the provision earmarking $250,000 in humanitarian aid to displaced Burmese on the border between Thailand and Burma, I wish to make certain that the aid provision will be interpreted by the administration in a manner consistent with my intent in drafting it, which was to provide assistance to displaced Burmese on both sides of the border between Thailand and Burma.

The provision calls for humanitarian assistance to "displaced Burmese students in camps on the border with Thailand," and the conference report explains that aid can be directed to students in camps on both sides of the Thai-Burma border. By specifying that assistance can be directed to the Thai as well as the Burmese side of the border, the conference report reflects a desire—and one that I strongly hold—to ensure that needy Burmese students in Thailand might be eligible for assistance. However, by specifying that such assistance to Thailand go to Burmese students "in camps," the conference report could be construed to imply that none of the funds under this provision can be directed to students in Thailand unless they are in camps. If this were the case, then no funds at all could be directed to Thailand, as there are no camps as such on the Thai side of the border. However, given the clear and stated intention to assist students on both sides of the border, it cannot be the conferees intention to prevent the administration from directing some of this assistance to Burmese students in Thailand if such aid is deemed necessary.

I would also like to say something about the use of the word "students" in the provision. This is a term that has been used to describe a wide variety of Burmese who have had to flee their homes since early 1988 as a result of political repression in Burma. Again, it cannot be the conferees intention to require the administration to impose a restrictive definition of this term in making determinations regarding humanitarian assistance under this provision. Are my views consistent with those of the chairman and ranking member of the subcommittee?

Mr. LEAHY. The Senator is correct.

Mr. KASTEN. That is also my understanding.

SECTION 512

Mr. HEFLIN. I have a constituent who has been supplying ductile iron pipe and accessories for use in several Iraq cities for civil water supply. In order to continue the supply under several contracts which have been negotiated and agreed upon, they must have Eximbank financing. Does this bill prohibit Eximbank from approving such financing?

Mr. INOUYE. What we have been concerned about are subjects involving piping for oil. We have given the President authority under this bill to permit a finding that it is not in the national interest to preclude pipe for civil water purposes. I would presume

that in the circumstances the Senator has mentioned that he would exercise that discretion favorably and permit these civil projects to proceed with Eximbank financing.

Mr. KERREY. Mr. President, all Americans have been stunned by the events of this year. The revolution of the social, economic and political order in the Soviet Union and Communist Eastern Europe has been shocking.

All of us are struggling to come to grips with these changes. All of us are asking questions about possible changes in our conventional and nuclear force structures.

Critical to our being able to answer these questions is to ascertain whether the Soviet Union's actions correspond with their promises to reduce military expenditures. Many of us have grown up distrusting the promises made by Soviet leaders which makes us dependent upon accurate assessments by our own government.

Therefore, I was shocked to learn of the administration's lack of candor in presenting the American people with an accurate assessment of the Soviet Union's intent and their actions. President Bush, Vice President Quayle, and Defense Secretary Cheney have on separate speaking engagements told the American people the Soviet Union's threat is greater not less. Yesterday, however, administration representatives finally acknowledged, for the first time, that the Soviet Union appears to be reducing its overall defense budget.

The CIA's most recent estimates reveal that Soviet military spending has declined this year by 5 percent. Some projections indicate that next year Soviet defense spending will be cut as much as 7 percent.

In a story this week the Joint Economic Committee reportedly has evidence of a real reduction in Soviet military expenditures for 1989. Their ability to make this statement at the 10-month mark is further evidence the administration should have been able to provide the American people with this vital information.

I understand the difficulty of making accurate assessments of intelligence. Had disclaimers of doubt been made with the statements I would have been willing to place them into this category.

However, in this case it is more likely the momentum of the cold war which carries the administration into making such pessimistic statements. It is more likely their own fear of needing to propose risky new agreements between the superpowers which causes them and us to retreat behind old and comfortable beliefs.

I believe the next 60 days will be unlike most recesses which this Congress has taken in the past. I believe Americans will be considering what changes we can afford in our conventional and strategic defenses. As political leaders Congress and the President will be called upon for a response.

Now more than ever the President needs to challenge the American people to debate our defense policy. The debate should be based upon accurate representations of facts. If we are to avoid appropriation reductions which would place us at risk, such a debate must go forward. If we ignore the dramaic changes taking place in the world as we discuss our defense strategy and budget we will weaken rather than strengthen our national security.

Mr. President, Solidarity leader Lech Walesa addressed a joint session of Congress this morning. In his remarkable message was a history of a people who never gave up in their pursuit of freedom. Walesa said Solidarity's success was achieved through nonviolent means because "we knew what we wanted and our power prevailed in the end."

To make the correct decisions about America's defenses we need the same sense of purpose and determination. This is only possible if we begin with the same facts.

AID—EDUCATION AND HUMAN RESOURCES DEVELOPMENT

Mr. JOHNSTON. I am pleased to note that the conferees have provided $1.2 million in the AID Education and Human Resources Development account to support an innovative program begun in fiscal year 1988 to acquaint future leaders of the Caribbean Basin and Latin America with the American democratic system and the role private enterprise plays in this system. Although this program has been in operation for only 1 year, it has received substantial private sector support and AID has noted that in the first year it has already achieved modest, yet noteworthy success.

I note that the language approved in conference differs from the language recommended by the Senate Appropriations Committee and which was approved in both the fiscal year 1988 and fiscal year 1989 appropriations acts. In these two acts and the recommendations of the Senate Appropriations Committee, bill language was included which provided funds to the Leadership Center of the Americas, an umbrella group composed of some 40 universities and colleges located throughout the United States, for this program. The conference agreement however omits all reference to the leadership center and instead provides funds to support leadership programs for the Americas which have a demonstrated record of performance.

As the managers of the bill know, this wording change was the subject of considerable debate during the conference. To avoid any misunderstanding about the future implementation of this provision, I believe it is important to clarify what the Senate conferees' understanding of this provision is.

As I read this language, I believe the practical effect is the same as that of the Senate appropriations Committee's original recommendation. That is, since the only leadership training program which has a demonstrated record of performance is the program run by the Leadership Center of the Americas, the Leadership Center is the only organization which qualifies for these funds. AID should therefore be able to negotiate a grant agreement for the use of the funds with the Leadership Center quickly and in the same manner as was done in fiscal year 1988 and in fiscal year 1989.

Is this the understanding of the two managers?

Mr. LEAHY. I agree with the Senator from Louisiana that the practical effect of the conference agreement is the same as that provided by the language recommended by the Senate Appropriations Committee. AID should be able to implement this provision quickly, and negotiate a grant agreement with the leadership center to continue this important program.

As the Senator knows, the language in the conference agreement was carefully crafted to meet two objectives: that of the Senate conferees in continuing the leadership center program and that of the House which was to not earmark funds for any single institution. The compromise language developed accomplishes this and provides for the continuation of the successful program run by the leadership center, but does so without providing funds in bill language specifically to the leadership center. The way this is accomplished is indirect, but this was necessary to satisfy the House. In any event, I am satisfied that the conference agreement will allow this important program to continue in the same manner as it has in the past—through the leadership center.

Mr. KASTEN. I also concur with the understanding of the Senator from Louisiana. The language in the conference agreement has the same practical effect as the language recommended by the Senate Appropriations Committee and the language adopted in both fiscal year 1988 and in fiscal year 1989. It may be rather convoluted, but I too am satisifed that the conference agreement will allow this worthwhile program to continue in the same manner as it has in the past 2 years. AID should quickly negotiate a grant agreement with the leadership center as it has in the past 2 years since the leadership center is the only organization which has a demonstrated record of performance. It is not intended that the language change disrupt the program in any way, or change the manner in which the program is ad-

ministered. Instead the language change provides indirectly what the Senate Appropriations Committee language provided directly.

Mr. JOHNSTON. I thank the two managers for this clarification, and appreciate their willingness to take the time today to discuss this matter. This is an important program which has already begun to build a notable record, and I wanted to make sure that the language change recommended by the conferees will not in any way disrupt the orderly implementation of it.

U.N. POPULATION FUND

Mr. LEAHY. Mr. President, in 1971 then U.S. Ambassador to the United Nations George Bush said that the rate of population growth in the Third World is "a prescription for tragedy and chaos."

He urged that the U.N. Population Fund "should grow rapidly * * * to a point where it will be making an important impact on world population."

He was right. Today the world is growing by 90 million people a year. Almost all of those births are occurring in countries that cannot even feed their own people today. The U.N Population Fund can play a crucial role in controlling this growth and the devastating effects it is having on the environment.

Now President Bush, afraid of angering the far right, opposes any U.S. contribution to the most important family planning organization in the world.

This is a disgrace. The United States was instrumental in creating UNFPA. UNFPA does not support abortion. It provides alternatives to abortion, like contraceptives, maternal and child health, and education and information about family planning.

These are activities we should wholeheartedly support. By doing so we will help reduce the number of abortions and alleviate some of the suffering in the poorest countries.

I ask that a New York Times op-ed article on this subject by Richard Gardener, professor of law at Columbia University, be printed in the RECORD in full.

[From the New York Times, Sept. 22, 1989]

BUSH, THE U.N. AND TOO MANY PEOPLE

(By Richard N. Gardener)

When President Bush addresses the General Assembly on Monday, he will not call the U.N. "an unreal place * * * torn by tensions" as he did during the 1988 campaign. Now he is likely to praise U.N. peacekeeping forces in regional trouble spots and call for stronger U.N. measures to protect the global environment.

But for domestic political reasons, there will almost certainly be a major omission: world population growth. This will threaten international order and the world's life support systems in the decades ahead.

The world population, which stood at 1.5 billion in 1900, is 5 billion today and expected to grow to 6.2 billion in the year 2000 and to 8.5 billion in 2025. It may reach 10 billion before it levels off toward the end of the next century, with nearly 9 out of 10 persons living in developing countries.

These are the U.N.'s median projections, based on the assumption that fertility in the developing world will drop by a third in 30 to 40 years. If fertility declines at today's slow pace, world population could reach 14 billion or more before stabilizing.

To grasp the gravity of the challenge consider the U.N.'s median projections for third world countries in the year 2025. Egypt would grow from 51 million to 94 million; Nigeria, from 105 million to 301 million; Mexico, from 85 million to 150 million; India, from 819 million to 1.446 billion.

Incredibly, the Reagan Administration held that "population growth is, of itself, a neutral phenomenon. It is not necessarily good or ill."

But no government, no academic expert, has the faintest idea of how to provide adequate food, housing, health care, education and gainful employment to such exploding numbers of people, particularly as they crowd into megacities such as Mexico City, Calcutta and Cairo.

Moreover, the growing numbers of desperate poor implied in these figures will accelerate the ferocious assault on the environment under way in Africa, Asia and Latin America.

Unless these population trends are altered, our descendants will witness misery, mass migrations and violence born of desperation on a scale we can scarcely imagine.

We should call for an international effort to make information and means of family planning available to all persons in the child-bearing years. (At present, contraceptives are used by only 30 percent of couples in developing countries outside of China.)

Achieving this goal would substantially reduce the ominous U.N. population projections, but would require a tripling of the resources devoted to family planning in the developing countries. Such increased efforts would need to be accompanied by strengthened programs of health care and education and measure to enhance the rights of women.

In 1962, under our first Roman Catholic President, John F. Kennedy, we told the General Assembly we would support international family planning programs. We became a leader in these efforts under later Presidents. But Ronald Reagan, deferring to the right-to-life movement, cut off all aid to the International Planned Parenthood Federation and the U.N. Fund for Population Activities.

One reason given for this reversal was to discourage abortion as a population control measure. But the multilateral programs we have defunded do not finance abortions. The denial of family planning assistance to poor people in developing countries increases the number of abortions, putting at risk the lives of women without access to medical care.

Another reason given was that China, a U.N. fund receipt, sought to control population growth by coercive means. Recent assessments by Congress' confirm that Beijing's population policy is not coercive. If the U.S. wishes to maintain its reservations about China's program, U.N. fund population aid to China can be held at current levels and U.S. contributions can be earmarked for other countries.

Let us hope that by his second address to the U.N., Mr. Bush will be ready to say, as he did as U.N. Ambassador in 1971, that population trends in developing countries are "a prescription for tragedy and chaos" and that the U.N. fund "should grow rapidly . . . to a point where it will be making an important impact on world population."

POPULATION-UNFPA

Mr. LEAHY. Mr. President, this bill contains the usual provision prohibiting U.S. support for any organization which "participates in the management of a program of coercive abortion or involuntary sterilization." This has been construed by the administration to bar any funding for the U.N. Population Fund, because it has a program in China where there have been reports of coercion, even though no one claims UNFPA supports coercive practices itself. Rather, UNFPA, which has programs in 130 other countries too, funds alternatives to abortion—contraceptives, education about birth-spacing, maternal and child health.

The Senate, by a vote of 52 to 48, agreed to Senator MIKULSKI's amendment which does not change that provision but exempts UNFPA from its coverage. It allows the U.S. to fund UNFPA, but requires that United States funds be kept in a separate account and that no United States funds go to China.

The House voted to recede to the Senate and refund UNFPA by a vote of 246 to 176, but then immediately turned around and voted 219 to 203 for an amendment which gutted the Mikulski provision by requiring that before any United Stated funds can go to UNFPA the President must certify that China does not have a coercive family planning policy.

I have now moved to strike the House amendment, thereby insisting on the Senate language. The opponents argue that this will ensure a veto and cause a delay possibly necessitating another CR.

Mr. President, the Senate has already voted on this issue, but yesterday the House, after first upholding our language by 80 votes, then narrowly passed an amendment which gutted it. My motion will only preserve the original Senate language. This means no United States funds will go to China.

Nor will this delay final action on this bill. If the President vetoes it we can be back in the House for an override vote as early as late tomorrow or early next week.

This is far too important as issue for the Senate not to insist on its position. I urge Senators to vote yes on my motion.

Mr. SIMPSON. Mr. President, I rise to add some clarifying legislative history to this conference report on the foreign operations appropriations bill for fiscal year 1990. In particular, I wish to discuss the Lautenberg amendment, which establishes categories of refugee applicants.

First, the Lautenberg amendment, as modified by the conference committee, allows certain refugee groups to qualify for refugee status by asserting a fear of presecution and then asserting a credible basis for concern about the possibility of such persecution. I wish to clarify that the initial fear is a subjective matter, but the credible basis for concern is an objective matter to be established by the refugee applicant. This is consistent with the normal approach under the Refugee Act of 1980. In no way does this language create a presumption that the applicant is a refugee: the burden remains on the refugee applicant.

Second, the joint explanatory statement of the committee of conference notes:

> Once a credible basis for concern about the possibility of persecution has been established, the burden of disproving eligibility for refugee status will fall upon the government.

Mr. President, that language was not cleared by the minority member of the Senate Immigration Subcommittee, nor would it have been, had I been alerted to it before the conference was completed and the conference report signed. This language is nonbinding, I strongly disagree with it, and I encourage the executive branch to disregard it, if they feel in any way it would adversely affect their ability to properly administer our refugee laws.

The ACTING PRESIDENT pro tempore. The Chair is informed that all action has been completed on this measure.

Mr. MITCHELL addressed the Chair.

The ACTING PRESIDENT pro tempore. The Chair recognizes the majority leader.

ORDER OF PROCEDURE

Mr. MITCHELL. Mr. President, earlier this evening the House overwhelmingly approved House Joint Resolution 435, a 5-day extension of the continuing resolution.

Unless we pass this bill before midnight tonight, large segments of the Government may be forced to cease operations. The House has adjourned for the day. Therefore, we have no choice but to approve the extension and send it to the President for his consideration.

If we fail for any reason to approve the House action, the Department of Defense, the Department of Agriculture, the activities of our intelligence agencies, the Federal judiciary, and other departments or agencies have neither the funds nor the authority to continue their action.

So I strongly urge Senators to permit us to proceed to enact the continuing resolution.

Mr. President, President Bush has signed into law 5 of the 13 appropriations measures. Congress has concluded action on two additional measures which await his consideration. They are Commerce, Justice, State and the Judiciary, and Department of Transportation.

The legislative branch appropriations bill will be sent to the White House tonight. We must therefore act finally on five other such measures, Agriculture, foreign assistance, Department of Defense, and the two bills previously vetoed, Labor-HHS and D.C. appropriations.

Mr. President, I am about to propound a unanimous-consent request that we be able to proceed to the continuing resolution, it is for 5 days, that there be no amendments, and that there be 10 minutes equally divided.

If this agreement is reached, and consent is granted, then there will be no further rollcall votes this evening, and the Senate will complete action on this, and we will resume on other appropriations bills in the morning. If, however, there are to be any amendments to this continuing resolution, which I hope very much will not be the case, then we simply will have to stay here until such time as all amendments are resolved.

I emphasize that since the House has already adjourned. The effect of that will be to create the possibility if not the likelihood of a cessation of operation by several agencies of the Government.

So, Mr. President, I ask unanimous consent that the Senate now proceed to the immediate consideration of House Joint Resolution 435, a continuing resolution, through November 20, and that no amendments or motions be in order, and that there be 10 minutes equally divided on the joint resolution.

Mr. DOLE addressed the Chair.

The ACTING PRESIDENT pro tempore. The Republican leader is recognized.

Mr. DOLE. Reserving the right to object—and I hope it will not be necessary to do that—as I indicated earlier, there were at least two Members on this side who might have amendments. But I think if there can be some assurance given that those amendments can be offered maybe to an appropriations bill or some other vehicle that is going to be leaving the Senate before we adjourn, it might be possible to obtain this agreement.

The Senator from North Carolina has an amendment that is important to him and, I think, a great majority of this body, and Senator MCCLURE has an important amendment dealing with rural referral centers, which is important to everybody in this Chamber who has any rural areas in his or her particular State.

I think both the amendments, if offered on the CR, would be accepted by the House. As the Senate stated, if the CR is not passed by midnight, when Government employees go to work, all nonessential employees will be sent home, and that would create confusion, and it would be at some cost.

I would be happy to yield to the two principals if the majority leader can accommodate them.

Mr. MITCHELL. Mr. President, tomorrow morning, it is my intention to take up the Labor-HHS appropriations measure. We still have to do the Department of Agriculture appropriations measure and the Department of Defense appropriations measure. Of course, as the two Senators know better than I, they have every right to offer to one or more of those measures.

Mr. McCLURE. Mr. President, reserving the right to object, I, too, hope it will not be necessary to object. I understand the problems that the majority leader has in trying to manage the Senate, which is largely unmanageable at best. I am really very concerned about——

The ACTING PRESIDENT pro tempore. The Senate is not in order. Senator MCCLURE.

Mr. McCLURE. I am concerned about one of the provisions in the reconciliation matter, when it was passed in the Senate, and it was very overwhelmingly approved in the House. It is not a controversial matter within the Senate or within the Senate or within the House or between the bodies. It is also something that the administration recognizes will be changed by this Congress.

The problem we have is that, as of October 1, new regulations which would deny reimbursement rates to rural referral centers went into effect. They are withholding money from those hospitals today; every day that we delay, they lose money. The only cure for that is for us, at some later time, to mandate that that regulation be nullified as of October 1, and we will go through the process of giving them the money they should have been getting during this period of time. Every day we wait on that, we just create a bigger problem for the rural hospitals that are in every one of our States.

I am certain that this has overwhelming support here in the Senate, and we need to deal with it. I know that the Senator from Texas is trying to work out something; the distinguished chairman of the Finance Committee is trying to work out something, and he is at an impasse on other matters between himself and the other body. This is the kind of thing that might get lost in all this translation, if we do not deal with the subject. I do not wish to cause any problem. I hope to be able to cooperate, but I am very concerned with the passage of time and no resolution.

Mr. MITCHELL. I understand the Senator's concern, and share it, coming as I do from a largely rural State, being a member of the committee which worked up the legislation to which the Senator is referring. It is my understanding—and I will ask staff to advise me if I state it incorrectly—that we already are aware that there are going to be amendments to the Labor-HHS appropriation bill tomorrow. That is my understanding. Therefore, another amendment to that obviously would be within the Senator's right.

Mr. McCLURE. Mr. President, if the distinguished majority leader will yield, as I understand what he is saying, majority leader sees no procedural impediment to offering it to that bill, and it is his intention to offer that bill here on the floor tomorrow, so that it would be available on tomorrow?

Mr. MITCHELL. With respect to the latter question, the answer is yes. It is my intention to seek, tonight, to gain approval to lay that down to begin the business of the Senate tomorrow morning. As to any procedural impediment, it would obviously be subject to whatever rules the Senate applies. I do not wish to represent anything other than that.

Mr. McCLURE. Mr. President, I think I also understood the distinguished majority leader to say that, indeed, he is aware of this problem, and that he shares with the Senator from Idaho a desire to fix it. I think that is overwhelmingly shared across this body.

Mr. President, with that understanding, and with the understanding that we are going to have that vehicle available, it would be germane to that bill, I believe, I would not then have to object or offer that amendment tonight.

Mr. MITCHELL. I am making no representation as to germaneness.

Mr. McCLURE. I understand that. It was my statement. I was not trying to——

Mr. MITCHELL. I really wish to state that my intention is to try to bring up the Labor-HHS measure tomorrow morning when the Senate begins its business, and I do not believe there will be any objection to that occurring. My further representation is that it is my understanding—I have been advised by staff on both sides—that there will be amendments offered to that legislation. I do not now know what the amendment will be or what the number will be, but that there are some amendments being offered. I am going to ask the staff on both sides to confirm that, and they are all modding, so I think I am right in that regard.

Mr. McCLURE. Mr. President, with that understanding, and in the desire not to be obstructive of what I know is a very difficult task here, I will not object to the unanimous-consent request.

Mr. MITCHELL. I thank the Senator.

The ACTING PRESIDENT pro tempore. It there objection?

Mr. HELMS. Mr. President, reserving the right to object—and I shall not object—I am in the same boat Senator McCLURE is in. I do not want to obstruct the passage of the continuing resolution tonight. So with the understanding that the majoirty leader has given Senator McCLURE, I am sure it applies to me, as well, we will deal with it tomorrow.

The ACTING PRESIDENT pro tempore. Is their objection to the unanimous-consent request propounded by the majority leader?

Without objection, it is so ordered.

Mr. MITCHELL. Mr. President, there will be no further rollcall votes this evening, and we will proceed to the continuing resolution, unless someone requests a rollcall vote.

Mr. STEVENS. One question on that, Mr. President. If the Senator will yield.

The ACTING PRESIDENT pro tempore. The Senator from Alaska.

Mr. STEVENS. Has the Senator decided whether we will call up the Defense appropriations bill tomorrow after this other one?

Mr. MITCHELL. I have made no decision in that regard. As is my practice, I wanted to consult with the Republican leader before making a decision. We had discussed going to Labor-HHS next. Indeed, we originally thought we would be able to do it tonight. We obviously cannot do that.

FURTHER CONTINUING APPROPRIATIONS FOR FISCAL YEAR 1990

The ACTING PRESIDENT pro tempore. The clerk will report House Joint Resolution 435.

The legislative clerk read as follows:

A joint resolution (H.J. Res. 435) making further continuing appropriations for the fiscal year 1990, and for other purposes.

The Senate proceeded to consider the joint resolution.

The ACTING PRESIDENT pro tempore. Who yields time?

Mr. MITCHELL. Mr. President, I know of no Senator who wishes to address this subject. I previously addressed it in my remarks prior to seeking unanimous consent.

Mr. HATFIELD addressed the Chair.

Mr. MITCHELL. Mr. President, I yield to the distinguished Senator from Oregon.

The ACTING PRESIDENT pro tempore. The Chair recognizes the Senator from Oregon.

Mr. HATFIELD. I thank the majority leader.

I was going to comment I know of no amendments or no desire on any Senator's part on this side of the aisle to speak on this subject.

Mr. MITCHELL. Accordingly, Mr. President, I urge adoption of the joint resolution.

The ACTING PRESIDENT pro tempore. All time is yielded back.

The question is on the third reading of the joint resolution.

The joint resolution was read the third time.

The ACTING PRESIDENT pro tempore. The joint resolution having been read the third time, the question is, shall it pass?

The joint resolution (H.J. Res. 435) was passed.

Mr. MITCHELL. Mr. President, I move to reconsider the vote.

Mr. HATFIELD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MITCHELL. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The absence of a quorum has been suggested. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. CRANSTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

MORNING BUSINESS

Mr. CRANSTON. Mr. President, I ask unanimous consent that there now be a period for morning business with Senators permitted to speak therein.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

THE CRUMBLING OF THE COLD WAR

Mr. BYRD. Mr. President, this past week, the television has been filled with an extraordinary sight: Citizens of East and West Berlin clambering to the top of the Berlin Wall to dance, embrace, and celebrate the announcement that East Germans are now free to travel and migrate to the West. Some of those on top of the wall even used small hammers and chisels to chip away at the wall. Over the weekend, 4 million East Germans crossed into the West to marvel at the sights and view the once forbidden fruits of Western capitalism.

Today, Lech Walesa, the leader of Solidarity, the catalyst for change in Poland, addressed a joint meeting of the two Houses of Congress. Poland, now with a non-Communist govern-

ment, is where the crumbling of the cold war began.

What has happened in Eastern Europe these last few months is nothing short of extraordinary. Those of us who have witnessed in our lifetime the establishment of satellite Communist States in Eastern Europe and the advent of the cold war are now seeing the crumbling of that cold war.

We must not forget, however, that in permitting the liberalization of the East bloc, Mr. Gorbachev is acting to further the interests of the Soviet Union. In liberalizing the East bloc and in reducing tensions with the West, Mr. Gorbachev hopes he will be able to transfer resources from defense to the civilian economy.

For the heart of Mr. Gorbachev's dilemma is the need to transform the economy. Communism has failed to live up to what theory said it would do for the masses. It has not truly equalized the differences between social classes. Instead, it has doomed the Russian citizen to a dreary standard of living, where even bare necessities are hard to come by, and has permitted the development of a highly privileged elite who want for little and obtain much of what they have through corruption.

In the years since the erection of the Iron Curtain in the late 1940's, America led the world by virtue of its technological and economic capacity, its cultural ingenuity, and its powers of social resilience. But the main reason much of the world often deferred to the United States is that we keep the key to the Western arsenal.

Yet, it is not our military might which has tantalized our East European comrades. It is the flame of democracy which has ignited Eastern Europe and the Soviet States. It is our lifestyle, our values, our very freedoms which the people once locked under communism are now seeking.

Since the spring, we have seen the outburst for democracy in China, which was brutally suppressed by the Chinese State, a free election in Poland and the establishment of a Solidarity-led government there, the repudiation of communism by Hungary's ruling party and its transformation into the Hungarian Socialist Party. Now East Germans and Czechoslovakians have the right to travel freely and Bulgaria's hard-line leader has been replaced. Pressure for reform has not been stifled by the opening of the East. Demonstrations for further reform still continue in East Germany.

Truly, the world has changed.

So, how are we to deal with this momentous change in a once bipolar world? It cannot be dealt with by ignoring it or simply by throwing money at it. While I would not claim that these changes are a harbinger of the demise of communism, it is clear that communism is evolving—that it is being required to be responsive, in ways it never has had to be, to the people—to their desire for much of what we take for granted.

The beacon of democracy has been lit and now is shining so brightly that it is doubtful it can be extinguished. But America and the West must develop a concrete, coordinated plan of action to draw these countries—Poland, Hungary, East Germany, Czechoslovakia, Bulgaria, and maybe someday, even the hardline Rumania—into the economic mainstream of the world.

At the end of World War II, with the Marshall Plan, we embarked on a massive assistance plan to rebuild Europe economically so that it could stand alone as a bulwark against communism. But all that was needed then was the money—which only the United States had—to reestablish industrial production in countries that already had much industrial experience.

The situation today is infinitely more complicated. America is not the only country with wealth and anything we do to resuscitate Eastern Europe, should be done as part of a coordinated effort with the other wealthy countries of the world, including Japan. The economies of Eastern Europe have been stagnant and isolated from the world economy virtually since before World War II and resuscitating them will be difficult, costly, and time-consuming.

In addition, possible German reunification looms over the entire process. If the two Germanys are to reunify, it must be done in a way that will not rekindle fears of German militarism or put obstacles in the way of West European unity and East European democratization.

All Americans can unite in pride that we stuck it out, that we fulfilled our commitments to Western Europe during the worst days of the cold war, that we ignited the rebuilding of Western Europe through the Marshall plan, that we led the formation and nurtured the growth and health of the most successful alliance of modern history, NATO.

Mr. President, we do not have to fill the atmosphere up with ideas and plans radical just for the sake of being radical. A momentum is coursing through Central Europe, its direction is toward the values we have stood for, the great values of human freedom, dignity and space to grow, and away from fear from oppression and from the shackles of false and phoney ideologies.

But, Mr. President, let us not allow our euphoria to cloud our judgment about the need to be watchful. We should be cautious about the summit in Malta. We should be prepared for a major Soviet arms initiative. With our allies we should know before we go to a summit, what our long-term objectives need to be. We do not need another Reykjavik. And I do not believe we will have one.

Let us hold in our memories forever, the image of Germans—from both the East and the West—dancing on the top of the wall. But let us not forget that the Soviet Union continues to pour weapons into Afghanistan and Nicaragua. Let us not forget Soviet support for El Salvador's rebels and the billions the U.S.S.R. spends to prop up the unregenerate Cuba.

And let us not forget that the Soviet Government has been more responsive to dissent in the satellite states than to dissent inside the Soviet Union. In bringing perestroika and glasnost to the Soviet Union, Mr. Gorbachev lifted the lid on domestic discontent. The Soviet Union has been racked with strikes, riots, demonstrations, and protests from ethnic minority groups, from the Baltic Sea to Central Asia, who want greater political autonomy.

Mr. President, we cannot continue to sit on the sidelines and merely watch the changing parade. It is time for the Congress to work with the President, time for the U.S. Government to sit down with our allies, and develop a concrete plan so that these historic events do not sweep by us, leaving America in its wake.

While we must be cautious and not overreact with hasty disarmament, we must begin to recognize that in a world less worried about war, the owner of the Western arsenal cannot expect the old deference it has grown used to receiving.

Our economic preeminence has been challenged in the 1980's as our trade deficit has soared and American consumers have increasingly come to buy foreign goods, believing they are of higher quality. Yet it is the economic vigor and vitality of the West which has so tantalized the Communist bloc. There is much we must do to regain America's competitive edge and recognize our changing world provides us with unparalleled opportunities to reinvigorate our economic system. The East is looking to us for economic leadership. We cannot let them down.

I am sure that President Bush does not want the writers of the histories of the 1990's to say that America ended up as just a straphanger on the caboose of history. And we will not. There are ventures to be undertaken and new dreams to be realized if we will but entertain them.

ARNOLD SALTZMAN'S PROPOSAL FOR A MARSHALL PLAN FOR EASTERN EUROPE

Mr. PELL. Mr. President, former Ambassador Arnold A. Saltzman recently sent to me a very imaginative proposal designed to provide substance

to Secretary of State Baker's recent statement that the United States has a stake in the success of perestroika in the Soviet Union and similar reforms in Eastern Europe. He proposes a Marshall plan for these countries in concern with our Western European allies.

Ambassador Saltzman makes a very persuasive case for helping the Soviet Union, Poland, Hungary, and other so-called socialist nations to enter the Western economic system. As he puts it:

The two divergent economic systems prevent us from living in relative political harmony, and theirs does not work. Eastern Europe is ready to enter our world; we cannot afford not to help them.

Ambassador Saltzman is uniquely placed to comment on developments in the Soviet Union and Eastern Europe. He has carried out diplomatic and economic assignments under four Presidents. He has negotiated with Communist governments and has also dealt with them as an unofficial "honest broker," helping to exchange viewpoints between Communist leaders and the United States. As a businessman, Ambassador Saltzman has engaged in joint venture projects in Communist countries. As a result, he brings an insider's perspective to both an analysis of developments in those countries as well as what the West's response should be.

Ambassador Saltzman's views are timely in light of the Senate's consideration this week of legislation to provide assistance to Poland and Hungary. I am pleased to share these views with my colleagues, and I ask unanimous consent that the text of Ambassador Saltzman's proposal be printed at this point in the RECORD.

There being no objection, the proposal was ordered to be printed in the RECORD, as follows:

PERESTROIKA VIEWED FROM THE INSIDE

It is long past the time when our Government should have instituted a "policy" for dealing with the earth-shaking events of Eastern Europe. Foremost of these events is the revolutionary change occurring in the Soviet Union, since who can argue that none of what has come to pass in Poland, Hungary and even in East Germany would have been possible had the old regime in the U.S.S.R. held sway. The limited agreements on armaments and more polite relations do not add up to a "policy". Rather we are reacting to events in East Europe without a grand plan other than a desire to see those countries become democratic capitalist nations, but with no strategy to help bring that about.

I do not refer to meddling in other nations' internal affairs. But the U.S. having been invited to play a role—either directly by Poland and Hungary or obliquely by the Soviet Union—ought to have determined for ourselves "do we or don't we". Also on what basis, in what manner, at what cost and with which partners do we influence events in these countries. At the same time we must decide what is the risk to us and what is the cost to us if these East Europe nations fail and could the U.S. have prevented such failure by actions we might take.

After such analysis perhaps a calculated decision might be made that we should not get too involved. I would doubt that could be the wise outcome, but at least it would be purposeful instead of the serendipitous course we now follow. Furthermore, it would help us realize how fragile all the Polish and Hungarian revolutionary changes are if Gorbachev's efforts fail.

Circumstances have placed me in a position to make such an analysis based on events in which I have personally participated. Since the early 60's the Russians, Poles and Czechs have known me as a businessman and periodic diplomat. I have negotiated with them on behalf of my country and sometimes for my own private interests. I have monitored events which brought Gorbachev to power, been invited by him and his ministers for frequent conversations and, since 1987, have myself participated in activities of Perestroika. Thus, I am in a position to share my views from the inside. To a lesser degree this is true of Poland and Czechoslovakia as well.

As background let me first state that Gorbachev and his ideas did not instantly materialize. His philosophical father and patron was Chairman Andropov who realized that radical economic reforms were necessary but died too soon to implement them. The tired do-nothing Chernenko caretaker administration allowed conditions to further deteriorate while his heir apparent waited in the wings. Gorbachev while waiting did not fully grasp the full extent of Russia's problems but did know that they must abort the arms race with the U.S. and also get more initiative into his economy. How to achieve this was not yet clear but would evolve.

Since 1984 I have visited the Soviet Union regularly at the invitation of that government. I have had intimate personal conversations with Ministers, members of the Central Committee, Prime Minister and Deputy Prime Minister, and several Politburo members including Gorbachev himself. The inside of the Kremlin, both the business side and ceremonial areas, are familiar to me as is the inside of the Communist Party headquarters.

Our discussions involved economic, political and military issues vis a vis the United States and the Soviet Union and also East/West relations generally. I was known to Soviet officials as a businessman and former diplomat with whom they could be candid and direct and in turn receive my own candid assessments. Since 1985 they have stated their positions and intentions while soliciting my opinions and reactions. Some were intended to better understand the climate in my country, some were trial balloons they hoped I would float and some were expressions of their actual intentions they understood I would report to my country. But it would be unofficial and thus deniable. An unofficial "honest broker" is helpful to nations seeking to bridge chasms of mutual mistrust. Intentions are revealed, philosophies explained, questions asked, in a way not possible with a sitting Ambassador. They trusted me not to make mischief in my reporting since my own philosophy was in favor of better relations between the U.S. and Eastern Europe and particularly the Soviet Union. My capitalist background did not deter them, in fact it was helpful since we never engaged in polemics or attempts at brainwashing.

What was told to me came from responsible Central Committee members, Politburo members and even Gorbachev himself. Now much of it is history. At the time it was revolutionary. For example:

(1) I was the first to bring the news in early 1985, that the Soviets would accept on site inspections that were reciprocal. They challenged the U.S. by telling me they would accept any level of inspection the U.S. would accept.

(2) They told me eight months before Reykjavik, and I so reported in Washington that they would propose a mutual 50% cut in nuclear missiles. Thus I could not understand why President Reagan said this proposal to him Reykjavik caught him by surprise.

(3) Gorbachev himself told me he sought an understanding with the U.S. especially in armaments. He was concerned that the USSR would enter the 21st century industrially and technologically far behind the great Western capitalist nations. He said if the U.S. and USSR continued their arms race Japan could clobber both of us. He meant as a world force not militarily.

(4) In 1985 I met with the head of Gosplan who gave me much detail of the new five-year plan months before it was due to be presented to the upcoming plenary session. The first elements of moves toward a partially market oriented economy were in the new "Plan"; a bombshell and sign post of where they were heading.

(5) Even though Glasnost appeared to antedate Perestroika it was the handmaiden. In order for the new economic policies of decentralized decision making, and production relating to the needs of the market to become reality, Gorbachev had to smash the entrenched bureaucracy. He unleashed writers, intellectuals, newspaper editors, to pour out torrents of Glasnost attacking the status quo. These former Gulag candidates were now "the enemies of Gorbachev's enemies".

(6) The United States has found it difficult to assimilate let alone to understand the degree of change in the USSR. Suddenly that bastion of communist belief is trying to accommodate to the needs of the market, allowing people to open personal businesses for profit, urging farmers to rent land and equipment from the state and produce crops for private sale and profit—and having real elections for legislative office in a legislature that has some degree of power. But it was not only the capitalist West that needed re-orientation to Soviet change. The Russians had a lot of explaining to do to reorient themselves.

Early in 1987 I met privately with an old acquaintance, an ideological spokesman in the Central Committee of the USSR, and we had an unbelievable conversation. This was the verbatim exchange.

Question. "How do you equate Leninism with the radical changes now being made in the Soviet economy?"

Answer. "Lenin would favor such governmental actions as would benefit the people and these changes are necessary and desirable."

Question. "As you liberalize the economy eliminating much bureaucratic central control will you not be confronted by demands for political liberalization and decentralization as well?"

Answer. "There is no other way, and there is no turning back".

(7) In 1987 a Politburo member asked to meet with me. He said, based on new laws, the USSR was going to engage in joint ventures with foreigners who could own holdings and machinery in the USSR, employ

workers, make profits, (repatriate profits) together with Soviet partners in existing enterprises or set up new ones. He urged me to come to Moscow for the purpose of doing business in the USSR. He promised to personally shake up the bureaucracy and secure a speedy result. Two weeks later I was in Moscow.

Within a week I had signed two protocols of intent with two different Ministries having been shepherded by my Politburo patron and the Deputy Prime Minister. The Bureaucrats negotiated in good faith, worked night and day with me, obstructed nothing. We finished two agreements for two projects, one in Central Russia, one near the border of Afghanistan. Thus first hand I know how Perestroika works, how the internal system works, for in fact I have been part of the process.

Over the next year, as I began to flesh out the detail of the tentative agreements with my Soviet partners, the Moscow bureaucracy's decision-making authority gradually passed to the Republics and even to the local partners. Moscow was no longer calling the shots reflecting Gorbachev's decision to diminish the political and economic control of the Communist Party' central committee and pass it to the 15 Republics. The Republics in turn were to pass decision-making increasingly to individual enterprises and with greater "power to the people." Enterprises were told to improvise and to be self-financing, managers and workers to develop initiative. "Business" became the new buzz word, the magic password signifying economic sophistication.

Almost two years have now gone by and I have done some business with my intended partners but we are not any closer to achieving the end result objectives. The individual enterprises have no idea how to be self-financing in creating new ventures, the bureaucracies of the individual Republics are less experienced, less knowledgeable, generally far less capable than the previously entrenched central Moscow bureaucracy. My Soviet partners' Perestroika is stuck in a mire of confusion going nowhere.

The USSR today finds its economy in shambles. They are neither a planned economy as before nor are they an economy relating to market forces. Shortages of all kinds abound, many for no good reason.

They have fallen between the cracks economically. A typical example is the recent fiasco on soap, the shortage of which was a serious complaint of the recently striking miners. Thus they purchased millions of pounds of soap from the West. Soap is very easy to make even in the USSR if one has tallow. Instead of buying tallow they paid a greater amount of hard currency to buy soap from the West. Previously, the "Plan" would not have permitted such a result, nor would it have been necessary.

Critics like Yeltsin have been pushing Gorbachev to run faster than he can, faster than the system can absorb. Yeltsin's motives are open to question, and in any case, he is not helping. Goaded by pressures to improve the economy, Gorbachev smashed what they had without a sound foundation on which to build the new structure. He did not feel the entrenched power structure would cooperate in moving at a sensible rapid pace but would still be hanging on obstructing progress.

Individual enterprises are engaged in ill-conceived barter with foreign companies. Each of the fifteen Republics are striking out economically and politically on self-proclaimed courses often counter-productive with each other as well as national purposes.

Instead of one entrenched bureaucracy in Moscow which at least was somewhat capable and experienced, there are now fifteen, less experienced, less knowledgeable, with less sensitivity, potentially more venal and militantly jealous of their own narrow interests. I am reminded of the days of our nation's beginning, of the Nullification Acts of Virginia and Kentucky, of the individual states tearing the fabric of our nation, before Chief Justice Marshall's decision knit us together.

With the living standard of people the worst in years, with both the making and distributing of things people need every day in disarray, Glasnost pours kerosene on the fire. All the buried and half-buried gripes are vented. Deep-seated ethnic and geographical antagonisms long suppressed now boil the pot and further impede transition to the new political and economic more democratic societal arrangements Gorbachev has pushed. In a country in part forcibly pasted together with different languages, customs, religions and philosophies, passing "power to the people" in a period of economic distress could tear their "Union" apart. We see these signs not only in the Baltic states the U.S. press reports on, but in Muslim areas where 50,000,000 Muslims have been absorbing Khomeini's teachings.

Gorbachev needs a breather, he needs to regroup and get back on track. But how? He is running out of time by his own admission and there is nothing on the horizon to help him get healthy.

People in or outside the U.S.S.R. might debate how they got to this pass but there would be little disagreement as to where they are. I believe there would also be small disagreement that a Soviet internal debacle would augur nothing good for the efforts of Poland and Hungary. Conversely, if Russia succeeds, would not the same tide engulf Czechoslovakia and East Germany who are now sitting out this dance watching events unfold?

Thus we are drawn to my original premise that long since the U.S. should have made a strategic decision as to our role in this drama. It is not sufficient to state the problems. I would now propose solutions—urgent, because we are late in addressing events that level little time for amelioration.

A PROGRAM FOR PROGRESS

Our Secretary of State has just now stated it is in the interest of the U.S. that Gorbachev succeed. How, or when, that favorable intention should be implemented is still undetermined. Thus, on the same day we see the United States vetoing a desire by our Western allies to supply more sophisticated tools to East Europe nations, such as the U.S.S.R., to improve their industrial capability. This vacillation points up the need for a plan for concerted action. By concerted I mean, first of all, within the United States government itself so that Defense, State, Commerce, Treasury, National Security Advisor, Chief of Staff and President are all marching to the same music. Second, we must plan with our Allies for concerted assistance with burdens and advantages shared by agreement. Last, most important, it requires acting in concert with Gorbachev to foster what is not only necessary but also what is possible within the Soviet Union in the light of their present condition.

Unhappily, month by month as we hung back requiring Gorbachev to prove and reprove the truth of his purposes, the difficulty of helping him succeed has become ever more difficult and more costly. Daily it grows more costly in financial terms because as their economy deteriorates it is more expensive to fix it. But in political terms, it is also more difficult not on our side but theirs. Gorbachev now has a society each day more fragmented economically, racially, geographically, ideologically. The cap is off the bottle and the genies are out. His problems are not manifest in the Politburo or even the Central Committee but in the people themselves. While many grow ever more shrill with Glasnost slogans, more voices are heard that Stalin's predictability and order were better.

What we do for Poland or Hungary will be looked upon with gratitude. In the U.S.S.R. there will be gratitude but laced with suspicion as well. We will therefore have to create policies of assistance that will be cast in the form of a partnership for progress. This will take great ingenuity and sensitivity on our part, not easy to sell in our country or within the U.S.S.R. either. Achieve it we must because there is an opportunity for the entire world to get a lot healthier if we succeed. The alternatives if Gorbachev goes down either in chaos or the past rigidities are ominous for the West.

If Secretary Baker indeed represents our desire to help Gorbachev succeed, we need a blueprint for action—not piece by piece too little and too late assistance. Events in the Soviet Union dictate action now.

A BLUEPRINT FOR ACTION—A MARSHALL PLAN FOR EASTERN EUROPE

(For reasons of sensitivity, particularly in the U.S.S.R., let's not call it that; perhaps Partners in Progress might be better)

In July 1948, Congress passed legislation creating what was generally called the Marshall Plan (named for General George Marshall) designed to rescue Western European nations from the danger of being engulfed by rigid, doctrinaire Communist control. These nations, industrially and economically beggared by the War and with their political foundations shaky, were brought back to economic and political stability. With the Marshall Plan's assistance, they escaped Stalinist Communist control.

In 1989, Eastern European countries—particularly Poland, Hungary and the USSR are endeavoring to move away from the rigidities of doctrinaire Communist economic and political philosophy. Czechoslovakia and East Germany would perforce allow shortly should the efforts of the others appear to be succeeding. Thus, a Marshall Plan to rescue Eastern Europe from that same doctrinaire philosophy is as vital today as it was for Western Europe 40-odd years ago.

The Marshall Plan was a cooperative voluntary arrangement whereby the United States supplied money and expertise which was used and administered within the countries for predetermined purposes. We purposely did not run the show but assisted the locals to develop their industries and their own expertise. They also used the money primarily internally to get the biggest economic "bang for the buck".

The U.S. should lead and garner support from other Western allies, who themselves were saved after the war, in proposing and supporting such a new East European Marshall Plan. Poland needs $10 billion, Hungary $6 billion and the USSR $30 billion in grants and no-interest loans. They also need just as urgently an infusion of Western business, administrative and industrial

know-how to be able to operate in a free-market economy and to participate in Western economic institutions such as the IMF, World Bank, GATT, etc. Money alone won't do it.

I have just returned from meeting with the heads of Poland's various economic ministries and their Foreign Minister. The Communists I spoke with were ready to accept a new kind of socialism resembling Scandinavia more than Romania. Also, in my meetings with leaders of the Central Committee and members of the Politburo in the USSR, they redefined Leninism in startling fashion. They have been moving more rapidly away from what they recently embraced than the U.S. has understood or accepted.

But without a combination of financial assistance and expertise from the West—and soon—Poland, the USSR and Hungary will not succeed. If so, the hard-liners, who detest this flight from Marxist ideology, would reemerge and this window of opportunity could bang shut.

Today, we see one of the rare moments in history where a number of forces converge to make fundamental change in geopolitical arrangements possible. The price is minimal; the potential reward for an undivided and more peaceful world is enormous. And even if the experiment fails, our loss is small; relatively few dollars that we an our allies can afford.

Businessmen would characterize this opportunity as a most favorable risk/reward ratio.

In the case of Poland, $5 billion of the $10 billion is available directly from their own people. In my meetings with their ministries, we sketched a plan whereby Poland would issue $5 billion of long-term dollar denominated bonds guaranteed by the United States and sold internally in Poland. This would bring out the "under-the-mattress" dollars hoarded by Poles and help the immediate financing of the $10 billion of new money they require.

It would be a mistake to concentrate on just Poland, which at the moment is highest on our horizon. If the Russian effort to reconstruct their economy along more liberal "free-market" lines fails, and the "tough guys" take back control in Russia, then Poland, Hungary and others will not sleep well. Conversely, success gets fence sitters, Czechoslovakia and East Germany, to join the parade.

I reiterate that money alone cannot rescue the economic malaise in the USSR (or Poland either) since Perestroika, without new administrative and management institutional arrangements, is doomed. These now have to come from the outside but as part of a cooperative program in order to be accepted by elements in their society suspicious of Western motives. Simultaneously, recommendations on armaments can be expedited, further relieving economic pressures for mutual betterment.

Thus, let us announce our new "Marshall Plan" for Eastern Europe. Let us help the USSR, Poland, and other Socialist countries enter the West's international economic fraternity. The two divergent economic systems prevent us from living in relative political harmony, and theirs does not work. Eastern Europe is ready to enter our world; we cannot afford not to help them.

AMBASSADOR PICKERING SPEAKS TO NATIONAL CONFERENCE ON THE UNITED STATES AND THE UNITED NATIONS

Mr. PELL. Mr. President, Ambassador Thomas R. Pickering, the career Foreign Service officer who is the U.S. Representative to the United Nations, gave an eloquent address on "The United States and the United Nations: The Decade Ahead" at the National Conference on the United States and the United Nations sponsored by the United Nations Association in Washington, November 9, 1989.

Ambassador Pickering, who holds the highest rank of Career Ambassador in our Foreign Service, is providing intelligent, vigorous leadership on behalf of our policies at the United Nations. It is rare that we have a career Foreign Service officer as our Ambassador in New York: the last previous one, I recall, was the late Ambassador Charles Yost, who set a high standard that Ambassador Pickering is continuing.

In his talk in Washington, Ambassador Pickering said there is now "more realism in the way the members of the United Nations see the organization, and in their treatment of United Nations issues. As we look to the decade ahead, we are using this new realism to set a positive agenda for the United States in working with the United Nations."

Just a few weeks ago the United Nations celebrated its 44th birthday, as Ambassador Pickering notes. I had the honor of participating in the founding meetings in San Francisco as a very junior member of the Secretariat. I am glad to note that, as we approach the United Nations' half century mark, there are fresh signs of vigor and accomplishment with each passing year. Perhaps the organization will at last line up to the high expectations of its founders.

Ambassador Pickering was introduced at the United Nations Conference by Ambassador Max M. Kampelman, our former top negotiator at the nuclear missile talks in Geneva which brought us the greatest single step forward in arms control, the INF Treaty. I am proud to count Max Kampelman and Tom Pickering as personal friends, and I ask unanimous consent that the texts of Ambassador Kampleman's introduction and Ambassador Pickering's speech at the United Nations Conference November 9 be printed in the CONGRESSIONAL RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

INTRODUCTION OF THOMAS R. PICKERING BY MAX M. KAMPELMAN, UNITED NATIONS ASSOCIATION

The United States is fortunate to have Tom Pickering as our Ambassador and Permanent Representative to the United Nations. He is a wise man of principle and integrity. His person and record represent the highest aspirations of the United States for peace with dignity.

We are witnessing a communications revolution of astounding proportions. Regrettably, along with its many implications for greater freedom and human dignity, that revolution is bringing with it an "Age of Imagery" as well. How things and people and events appear take on an importance greater than the reality of what they are. This new technology is understandably being used to sell and not just to communicate. This contributes to a distortion which has its effect on language, as well.

I just made reference to our country's aspirations for "peace". This proud word "peace" has also been the victim of verbal distortion. There is the "peace" of the grave; the "peace" that reigns in a well-disciplined prison or gulag; and the "peace" that may plant, with its terms, the seeds of a future war. Certainly those are not what our dreamers and philosophers have yearned for. It is peace with dignity and liberty that we seek. Tom Pickering's extensive diplomatic accomplishments identify him with those aspirations.

Tom and I first met in 1984. I was asked by the President to co-chair an American delegation to monitor the Presidential elections in El Salvador and he was our Ambassador to that country. Our delegation was a diverse one, but much of the conversation en route to El Salvador centered around the respect and admiration for our Ambassador there—his steadiness, his strength, his judgment.

On election day, he and I found ourselves together in a small helicopter flying to a number of rural areas to witness the electoral process. Indeed, it was he who informed me, in the midst of one dramatic moment when our plane went into a sudden lurch and tailspin, that we were being shot at by guerrilla forces and the pilot was taking evasive action. To end your suspense, we made it.

I was next in El Salvador as a member of our delegation to the inauguration of President Duarte. The head of our delegation was Secretary of State George Schultz. Our delegation ran the gamut from the far right to the near left. Once again, there was unanimous respect and admiration for Ambassador Thomas R. Pickering. Indeed, I can tell you that since then, whenever people were sought for highly responsible positions of leadership in the State Department, there was Tom Pickering's name.

Ambassador Pickering holds the personal rank of Career Ambassador, the highest in the United States Foreign Service. He has served as Ambassador to Israel, Ambassador to Jordan, and Ambassador to Nigeria. He was also Assistant Secretary of State for Oceans and International Environment and Scientific Affairs. His fields of expertise also include arms control, political military affairs and international intelligence. He has been awarded the Distinguished Presidential Award. Tom speaks Spanish, Swahili, Arabic and Hebrew. We have never had a more qualified leader in the United Nations.

It is said that a diplomat is one who sees to it that you always have his way. Tom and his wife, Alice, are superb diplomats.

Abba Eban, Israel's distinguished diplomat, once said in a moment of temporary discouragement. "I have confidence that man and nations will act wisely—when they have exhausted all alternatives." We may be

entering such a period today. We are pleased that Tom Pickering is on the scene at this opportune moment in history. It is my privilege to introduce him to you. He will speak in English. Tom Pickering.

SPEECH BY AMBASSADOR THOMAS R. PICKERING TO THE NATIONAL CONFERENCE ON THE UNITED STATES AND THE UNITED NATIONS—"THE U.S. AND UN: THE DECADE AHEAD"

We meet at a time of dramatic change in the world, and a time of change in the United Nations itself. This change has become more and more apparent as events have proceeded over the last two years. It is a change which has been characterized by more realism in the way the members of the United Nations see the organization, and in their treatment of United Nations issues. As we look to the decade ahead, we are using this new realism to set a positive agenda for the United States in working with the United Nations.

President Bush put forward the administration's interest in and approach to the United Nations clearly in his address of September 25th. His return to the United Nations and his speech set the tone for the Administration of constructive United States participation in the body. His specific suggestions in the area of disarmament and the attention which he gave to environmental and narcotics issues helped to establish the new United States agenda for the United Nations.

Two weeks ago, the United Nations celebrated its 44th birthday. This is thus an appropriate opportunity to think about some of the recent developments at the United Nations, the important issues facing us now, and what lies ahead as we realize that the United Nations' 50th anniversary in 1995 is not so far off.

RECENT DEVELOPMENTS

We have seen in the last two years a very notable change in the record of the United Nations and in how the United Nations is perceived. I want to review with you for a few moments the reasons for this change and then discuss our future agenda. To a large extent, this change is due to some rather dramatic successes which the organization has enjoyed. Recent successes in enhancing regional peace and security, a major task for which the United Nations was created, have done much to burnish its image.

PEACEKEEPING

Afghanistan is a prominent example. The United Nations played an instrumental role in helping to bring about the evacuation in February 1989 of all Soviet troops from Afghanistan. But the fight for freedom and self determination in Afghanistan continues. The United Nations is in touch with all parties to the conflict. It is dedicated to bringing about a peaceful solution—a solution based on the exercise by the people of Afghanistan of their full rights of self determination. The United Nations, acting through the Secretary-General's Special Representative on the scene, is helping to ensure that the Geneva accords, which guarantee these rights, are being carried out.

For the second consecutive year, agreement has been reached on the terms and text of a resolution on Afghanistan adopted by consensus in the General Assembly last week. Admittedly, there is more work to be done in Afghanistan. But certainly, having gotten as far as we have under present circumstances is due in no small measure to the constructive role of the U.N.

The cease fire in the Persian Gulf is another of the United Nations' recent successes. With the intense cooperation of its five Permanent Members, the Security Council, in over a year of negotiations, put together a peace plan for ending the war between Iran and Iraq. When that effort was started, few gave it much chance for success. The fact that Security Council Resolution 598, the product of that effort, was able to bring about a cease-fire is a remarkable accomplishment. More important, the resolution sets forth the framework for a more permanent peace in the Persian Gulf—a process in which the United Nations is deeply engaged.

A U.N. peace-keeping force is also maintained in this area to help solve problems that could otherwise lead to a resumption in the fighting.

After ten years of hard negotiating effort, led principally by the United States, but ably assisted by the United Nations, Namibia is emerging as a newly independent state. It will become the one hundred sixtieth member of the world organization when it achieves its independence. Cuban troops are withdrawing from Angola, monitored by a United Nations observer force while South African withdrawal from Namibia is observed by a multi-faceted United Nations force. A new government for Namibia is being formed around an electoral process managed and supervised by the United Nations. The effort has run a rocky course. But in the last year it has been kept on track with the assistance of the United States and the Soviet Union and by the cooperation of the members of the Security Council as well as of those who were the original parties to the conflict—states as disparate in their points of view as Cuba and Angola on the one side, and South Africa on the other. Elections in Namibia began three days ago and so far are on course and moving ahead well.

UNITED NATIONS REFORM

In addition to these U.N. peacemaking and peacekeeping efforts, over the last year or two—in large measure as a result of United States and Soviet cooperation and prodding—we have seen very positive changes on the issue of United Nations internal reform.

For the first time the United Nations has adopted consensus budgeting, which means that all of the members—principally the major donors—have a key role in ensuring that the budget stays within control. It has adopted for the next year a budget no larger than the last year. It has set a targeted 15-percent personnel reduction, and has already reduced some 1,350 United Nations employees—some 12.1%—against that target. These reforms show a new seriousness of purpose at the United Nations—a realization that priorities must be set, and that some sacrifices must be made for the sake of efficiency.

The U.S. was pleased to note that the U.N. has adopted in principle the policy that secondment of individuals from a government of the U.N. for short periods of time is not compatible with the United Nations Charter. The Charter, the U.S. has long noted, insists that international civil servants have their first loyalty to the organization and not to a foreign government. The Soviet Union, which has been the principal abuser of secondment has now accepted this idea. That acceptance in principle has been followed by a slow, but we hope progressive, adoption on a case-by-case basis of long-term contracts by Soviet citizens.

Another reason for U.N. success and its unusual image is the Secretary-General, Javier Perez de Cuellar. He has played a major role in this effort. His own performance, his wisdom, his diplomatic skills, his fine exercise of judgment, and his personal dedication are very much responsible for the improving image of the United Nations. Perhaps even more than in other parts of the world, positive regard for the United Nations has been on the rise in this country, where polls show an increasing degree of American public support for the organization. The United Nations' improved status could also be seen in the general debate in this year's 44th General Assembly which boasted a rather impressive array of international dignitaries who felt the event was of enough importance to warrant their presence. Two dozen heads of state and prime ministers and 105 foreign ministers added some lustre to the opening days of the debate.

POLITICAL CHANGES

What is happening in the Soviet Union? Soviet attitudes toward the United Nations itself and improving U.S.-Soviet relations play a large role in the changing fortunes of the organization and the changing perspectives toward it.

A good bit of my time at the United Nations has been spent working with the Security Council. During this period it has been possible with the Soviets to get agreement on a fairly consistent basis on issues as diverse as Namibia, Lebanon, hostage-taking, and the marking of plastic explosives so that we can find ways to defeat attacks against civil aircraft. On the perennial challenge to the credentials of the State of Israel, we saw a positive advance in Soviet policy, changing what has been historically a "yes" on the vote to exclude Israel to an abstention. We would have preferred that the Soviet Union had joined us in voting "no" to the challenge to Israel's credentials thereby upholding four square the principle of universality at the United Nations, but we did see their abstention as another move in the right direction.

Another indication of a new Soviet approach was the agreement last week with the U.S. to strengthen the United Nations. The new joint resolution focuses on more effective utilization of the existing charter and the U.N. framework. It marks the end of the discussion of the theme of "comprehensive security" which in our view was an unnecessarily vague and distracting concept.

It hasn't been all splendid and rosy, we do still have differences on issues like Afghanistan and Cambodia. For years the organization was dominated by polemics, by resolutions which had as their objective the isolation of the United States, of Israel, and of other countries when they attempted to support us. Resolutions with polemical ends did not inspire consensus or compromise.

This polemical character of United Nations activity has not totally disappeared—this lingering neuralgia and one-sidedness in large measure has made it very difficult for the United Nations to become an effective actor in such regional disputes of great importance to us as the Middle East.

Indeed, on the Middle East, the voting machine characteristic of the United Nations has made it—in the eyes of many—a partisan only of the Arab position. As a result particularly of the resolution equating Zionism with racism, which the United States is committed to see repealed, the United Nations has become marginalized in

dealing with that conflict. Despite such long-standing rigidities, looking ahead, the contrast with the past is still evident.

NEW BEGINNINGS

We have not forgotten and have not let go unnoticed the fact that the non-aligned states, recently meeting in Belgrade, have begun to change their rhetoric when they refer to development and to debt. President Bush took the step of sending a message to the joint meeting welcoming these changes. The non-aligned have become more moderate, more focused, more direct, and less adversarial. And this, too, may have a part in making the current General Assembly a more productive and cooperative body as the process goes ahead.

In the general debate at the U.N. discussion has been decidedly more pragmatic than in the past and less acrimonious. Countries resorted less often than in the past to rights of reply, which are formal retorts when a delegation feels that another delegation has misspoken. The polemics, the soapboxes, and the sanctimony have not disappeared from the General Assembly, but there has surely been an improvement.

The United States is also contributing to this change—a contribution in more than just a rhetorical sense. As many of you know, President Reagan decided at the end of his administration, and President Bush has upheld in his budget proposals, a new approach. The United States hopes to pay its full assessment for the regular United Nations budget, its full assessment for the peace-keeping budget, and will attempt to begin a process of repaying arrearages over the next five or six years.

Moreover, this year the United States undertook special responsibility for an additional emergency assistance program of $130 million to support peace-keeping in Namibia. This was achieved in what was known in Washington as the Dire (Emergency) Supplemental this summer. In September we had an opportunity to deliver the first check of $40 million for this peacekeeping effort.

As you might expect, funds for arrearages are more difficult to obtain than for regular assessments and it appears we have taken some hard hits on the Hill on both, with no funds this year for arrearages and cuts in our regular assessments. Nevertheless, the administration stands behind its request. And the prospects are good that this year's funding for United Nations activity will be some $200 plus million dollars ahead of last year's contribution of $530 million—a nearly 40% increase.

THE DECADE AHEAD

Against this background of recent successes and important changes, we can get a better idea of the possibilities for the decade ahead.

I would like to touch briefly on a number of possibilities in our agenda for the United Nations, and to discuss them as a way of illustrating what the capacity of the organization might be—for our own national interest, and in the world interest.

Let me turn first to the issue of regional peacemaking and peacekeeping. We can look at a number of areas of the world where the U.N. can and ought to play a significant and important role. Now there is a wider measure of unanimity among the permanent members of the Security Council than ever before to build on.

Close to home is Central America. Many of you who follow the news will have noticed that within recent weeks the Secretary-General of the U.N. cooperating closely with the Secretary General of the Organization of American States (OAS), has dispatched three U.N. missions to the region to prepare for the work of three new U.N. peacekeeping and observation groups.

One such mission is observing the Nicaraguan electoral process. It reports back frequently to inform the world as to how the elections are being managed and conducted.

A second will provide for a United Nations force to come to the region to monitor an agreement to cease interference in the internal affairs of the other Central American countries. This includes an agreed halt to the transfer of arms across national boundaries in support of insurgent forces worked out by the Central American Presidents. Two days ago this group was approved by the Security Council.

The third group is a new support and verification body. It is to be established as a result of recent agreements among the Central American presidents at Tela, Honduras, to deal with the interlinked process of the voluntary demobilization of insurgent forces and their return and reintegration into their own societies. This concerns not only the Nicaraguan national resistance, the Contras, but also the FMLN (Faribundo Marti National Liberation Front), the leftist guerrillas in El Salvador.

These are important tasks. They must be based on full agreement of the parties. The Secretary-General and the OAS have begun the process of building this structure so that it can be in place when the peace accords are ready to be implemented. Unfortunately, recent Nicaraguan decisions to end the ceasefire and to restart the fighting now threaten the entire peace process in Central America.

Another area which will call for United Nations peacekeeping efforts is Cambodia. The results of the Paris Peace Conference fell short of the hopes and expectations of its participants, but important gains were achieved in several areas. One of the positive steps undertaken by the conference was the dispatch of a United Nations exploratory fact-finding mission to Cambodia to begin the complex task of analyzing the situation with an eye towards the possible formulation of a new United Nations force to safeguard and promote peace and self-determination in Cambodia. We remain concerned by the impasse among the Cambodian parties on the question of an internal settlement for the future governance of the country. We firmly support the resolution on Cambodia now before the General Assembly that calls for an early and comprehensive political settlement.

Beyond Cambodia, and beyond Central America, the problems of Cyprus and of the Western Sahara have been of concern at the United Nations. It is hoped that here too that the United Nations will find a way to aid in reaching peaceful settlements.

Let me now turn to several other issues which will be part of the United Nations agenda for the 1990s.

Addressing global or transnational issues will be a major task of the United Nations and form the centerpiece of the agenda for the decade ahead. With continued exponential progress in science and technology, the world community has now become aware of man's capacity to influence his own environment. The same scientific developments which now permit man to change his environment also lie at the center of the search for solutions.

Damage to our global environment, possibly through climate change and warming, will have to be addressed on a multilateral basis. Climate change can bring a host of problems and a complex feedback process. We are reminded on a regular basis of the possibilities for a rise in the level of the sea, more desertification and deforestation, loss in biological diversity, increases in air and water pollutants, depletion of the ozone layer, and increased releases of CO_2. The trend overall is aggravated by population growth. The earth's population reached 2 billion from the beginning of time to 1910. By the early 1970s it was 4 billion. Today it is 5.1 billion, and by 2010, for the first time, half the world's population will be living in cities.

Each of these major problem areas requires an increasing measure of global cooperation and coordination if we are to deal successfully with the pitfalls and problems they present. It is in this area of major environmental problems that we have some of the greatest opportunities for international cooperation in the decade ahead. These issues do not represent an area of east-west conflict, but do offer potential for cooperation between East and West as well as North and South if we work hard at it.

As a result, we are coming to recognize that global environment problems can only be solved through the full cooperation of a wide range of countries in different stages of development and with different outlooks and ideologies. This is true because solutions will have to involve both the major producers of greenhouse gases and those countries with a major store of tropical forest area capable of absorbing increased carbon dioxide. There will have to be something of a global arrangement which can bring all sides on board.

The United Nations is dealing with the global warming or global climate-change issue. Within the past year the Intergovernmental Panel on Climate Control, created by the World Meteorological Organization and the United Nations Environmental Program, has begun to work. It is composed of three working groups: one to look at the scientific conclusions; a second to tell us about the impact on our planet of these scientific conclusions; and a third to prepare response strategies in many fields. Gathering this knowledge is the beginning of a long vital international effort to protect the planet. We are committed to using this work to develop a framework convention to deal with climate change as early as the autumn of next year, 1990.

In addition the United Nations is planning a world environmental conference for 1992, twenty years after the seminal Stockholm meeting of 1972. The conference will address a wide range of environmental issues and their relationships to national development and help to set further the U.N. environmental agenda for the 1990's.

Another transnational problem of significant proportion and importance is that of narcotics. President Bush, in his September 5 speech, singled out at least one aspect of the United Nations role when he urged all countries to ratify the recently agreed-upon convention. This agreement will increase our capacity in law enforcement, in exchange of information, and the applications of new doctrines, including the confiscation of assets of people engaged in drug activities.

This will be an important boost to control of the drug problem, and the convention is now before the Senate for ratification. Several countries have already ratified the convention; some 80 have signed, and we hope

that very soon the U.S. and others will complete the ratification process.

There is another important set of activities in the fight against narcotics which the U.N. has put to use. Since the days of the League of Nations, there has been an international exchange of technical information among countries, both on narcotic drugs and on law enforcement. This process, in my belief, can be strengthened and improved. The United States over the last several years has fought hard to keep budget cuts in the United Nations from directly affecting the role of the organziation in dealing with narcotics.

There's much more: This year's General Assembly will also be addressing the question of terrorism; it will be addressing the questions of development and the Third World debt, of Human Rights and of a host of other issues of great interest to us.

I mentioned previously U.S. approval of recent internal reforms at the United Nations, I believe there is still room for a great deal of further improvement. The United Nations system suffers from an enormous amount of duplication and overlap. Increased coordination is sorely needed. Modernization and a unified approach are clearly required as we face new issues for the future. I don't mean this simply as a budget cutting exercise. The United Nations would benefit greatly from innovative changes in management and organization—something we believe that we do well in this country and something we should quite rightly advocate for this international organization. These can include fewer meetings, consolidation of subsidiary bodies and committees, linking and integrating elements of the U.N. system, cross cutting budget and improved administrative mechanisms.

The remarkable thing is that today we see more clearly than ever the possibilities of fulfilling some of the goals which inspired us at the end of the Second World War. At no time in the past have the five Permanent Members of the Security Council worked more closely together, thereby fulfilling the basic premise of the organization in maintaining international peace and security.

More important, we also see clearly the possibility of avoiding the pitfalls, which have at times threatened to end the process of international cooperation. Multilateral solutions are no longer just foreign policy choices for the United States, but are clearly becoming national imperatives. If there were no United Nations we would have had to invent something like it to do the job. The challenge is real. It is one being faced with intelligence, creativity, and enthusiasm by the new administration. I am deeply pleased to be a part of it.

Thank you very much.

HELEN SUZMAN—AN ADMIRABLE OPPONENT OF APARTHEID

Mr. PELL. Mr. President, in the last 5 years, apartheid in South Africa has become one of the major issues on the American foreign policy agenda. During this time, the American people and Congress have not only become more educated about the injustices and inhumanity of apartheid, but also better acquainted with those South Africans—black and white—who have fought courageously and persistently to bring apartheid to an end. One of these is the Honorable Helen Suzman, a member of the opposition Progressive Federal Party who recently retired after 36 years in Parliament.

Mrs. Suzman is well known here and in South Africa for her steadfast opposition to apartheid and her deep personal commitment to freedom and justice for all South Africans, regardless of race. During the course of her long and distinguished career in Parliament, Mrs. Suzman consistently spoke out against the apartheid policies and the repressive actions of the ruling National Party and its leaders. Often, hers was a sole voice. Now retired from Parliament, she continues to speak out forcefully, at home and abroad, against apartheid and in favor of a nonracial, democratic South Africa in which all South Africans can exercise basic fundamental freedoms and human rights.

Last month, during a visit to Washington, Mrs. Suzman did an interview with the "MacNeil/Lehrer NewsHour." In the course of this interview, she offered some very interesting insights into the present South African situation and particularly the new administration of President de Klerk.

Mr. President, I ask unanimous consent that the text of the interview be printed in the RECORD at this point.

There being no objection, the interview was ordered to be printed in the RECORD, as follows:

MACNEIL: One woman who has spent her life fighting for a dialogue is Helen Suzman. As leader of the Liberal Party for more than 30 years, she was often the only voice in Parliament speaking out against apartheid. But she's been criticized recently by some people in the anti-apartheid movement for her opposition to sanctions. Mrs. Suzman retired from Parliament this year at the age of 71.

I spoke with her on Friday in New York.

Mrs. Suzman, thank you for joining us.

How important do you think how signficant are the changes President De Klerk has instituted so far?

HELEN SUZMAN: Well, I think they're quite significant, in that I think they mean to show a real change of direction, away from police toughness to an understanding that people want to protest and protest peacefully, particularly if they don't have the vote. The important thing, too, is that he has allowed the Johannesburg City Council, which is National Party-controlled, to desegregate all public facilities. I'm sure they couldn't have done that without asking his permission.

And then, too, he has signified that he's prepared to speak to the leaders that the people themselves have chosen, rather than the leaders that have been elected through the system. And I think, therefore, his talks with Archbishop Tutu and the Reverend Chikane and the Reverend Boesak are quite significant, as well.

MACNEIL. Do you regard these as sort of tactical maneuvers, or as demonstrating the first steps in a real change of strategy and direction?

Mrs. SUZMAN. Well, I think he's trying to win confidence. He's trying to win the confidence of black people in South Africa who feel they have been frustrated, they have been ignored in the party political and parliamentary political system. And that's one thing he's trying to do, is to create a climate for negotiation.

I think the fact that he's released Walter Sisulu and several other leading African National Congress people who were sentenced to imprisonment together with Nelson Mandela, I think that's important as well.

MACNEIL. Why not Mandela at this stage? What do you read into that?

Mrs. SUZMAN. Well, I would think the release of Walter Sisulu and the others is a tryout to see just what the result will be, what the effect will be, what the reaction will be among the mass of the people. There's a very large Mass Democratic Movement in South Africa, and I've no doubt that they will organize huge rallies to welcome the people who've been released, and no doubt they want to see if they can control that, that there'll be no violence. Because Nelson Mandela is, of course, the folk hero who will, I'm sure, result in much more of a public demonstration even then Walter Sisulu and the other members of the ANC.

MACNEIL. Some observers of the South African scene are suggesting that De Klerk may be making some of these moves now in order to head off the pressure for tougher sanctions against South Africa which some countries want to raise at the British Commonwealth Prime Ministers meeting in Kuala Lumpur later this month.

Do you believe that it is—that he is—that De Klerk is doing that?

Mrs. SUZMAN. Well, I think he probably realizes that Mrs. Thatcher, who's been a lone voice against sanctions at Commonwealth conferences, needed something to take with her to Kuala Lumpur when she goes later this month. And this is probably something that he is at least providing. It's not enormously significant, but it certainly, as I say, shows a change of direction. And it is something which Mrs. Thatcher can say, "Look, this man is different. It's a new policy a new direction. Give him a chance. Let's wait and see. Let's not impose further sanctions."

MACNEIL. You have, for all your years in Parliament, been an opponent of apartheid, the system of segregating the races. Do you believe this new man, De Klerk, is serious about dismantling it?

Mrs. SUZMAN. Well, he is a Nationalist. He's a politician. He's a pragmatist. He's not a starry-eyed liberal, as some people have called me. But he, I think, realizes change has got to come. I think he also, however, has got his own particular bottom line, and he does represent a party which is intent on maintaining group identity.

So, I don't think he's going to go as far as my party, for instance, would like him to go, or as far as the Mass Democratic Movement would like him to go. But he's going to go further than his predecessor, and he's going to try and create a climate for negotiation.

MACNEIL. So, when he says that he wants to create a new constitutional democracy in which no race can dominate the other, that is still qualified by having each separate group governing itself separately, but the whites fundamentally governing the country. Is that . . .

Mrs. SUZMAN: Well, I think he will stick to the present system, whereby there are separate group identities protected by law, by the separate voters rolls; and probably some different constitutional mechanism, whereby he can see that the three groups that are not white are not able to vote together in order to out-vote the wishes of the white minority.

MACNEIL: People of mixed blood and the people of Indian origin.

Mrs. SUZMAN: Yes, the Indian. Yes. There are a million Indians and about three million people of mixed blood and about 27 million blacks.

MACNEIL: With the removal, starting now, of—and in the past year or so—of so much of what was called petty apartheid, the things that the restricted blacks moving and eating in restaurants, and an agreement recently to negotiate an end to the housing rent boycott, all those things, is that going to take some of the steam out of the black movement, of the ANC movement?

Mrs. SUZMAN: I think that is the—that's the intention.

MACNEIL: And is it going to do——

Mrs. SUZMAN: To try and defuse it, the anger and the frustration.

I think it will to a certain extent among people who, in any case, are not really politically active. I don't think it's going to make any difference to the activists. And it's certainly not going to make a difference to the radical left among the black people

MACNEIL: Can Mr. De Klerk, given the political realities around him, can he meet the conditions that Archbishop Tutu and the others have set for entering real negotiations with the government?

Mrs. SUZMAN: Yes, I think he can do that immediately.

MACNEIL: He can release all the leaders, lift the state of emergency? You think he can do that?

Mrs. SUZMAN: Yes, he could. He could do that immediately. And I think he's going to probably consider doing it.

MACNEIL: So you think it's within political possibility for De Klerk to do it, and that that would—and that therefore there will be real negotiations beteen Tutu and the other leaders and De Klerk and his government?

Mrs. SUZMAN: Well, it would have to be between a wider circle than just the people you've mentioned. I think the ANC would have to be unbanned and allowed to come into the negotiations, the African National Congress, who do really represent the politically active blacks in South Africa, I have no doubt.

But then you also have to bring in people like Chief Minister Buthelezi whose nation of Zulus consists of over six million people. You certainly can't leave him out of the negotiations. There are the other leaders of the other nonindependent homeland states. And there are the trade unionists, the members of the urban community. All of these people, I think, would have to send representatives to the negotiating table to thrash out a new constitution for South Africa. And it will take some time. It's not going to be done overnight.

MACNEIL: You've been criticized by some of the more militant African, South African nationalists and by some people in this country in your—or, for your opposition to sanctions. Just tell me briefly why you have opposed sanctions.

Mrs. SUZMAN: Well, for economic reasons. I don't believe that reducing the economy to a wasteland and causing massive unemployment in South Africa is a positive step. I think.

First of all, it undermines the strongest weapon that black people, presently, anyway, can use in South Africa to overcome the differences in privilege and power and wealth in South Africa; and that is strong trade unionism, where the demands will go well beyond the workplace, but only if the trade unions are strong, if people are employed, and indeed if the majority of skilled workers in South Africa are black people.

Now, any undermining of that, I believe, is counterproductive.

MACNEIL. But hasn't it been the sanctions that have already been voted by the United States and other Western countries and the threat of further or more extreme sanctions which has brought the Nationalists and De Klerk to making the concessions they've just made?

Mrs. SUZMAN. Well, it's been an ongoing process. I mean there have been many changes in South Africa over the last ten years, long before sanctions were applied. And there's no doubt international pressures certainly play their part. No country likes to be considered a pariah by the rest of the Western World.

MACNEIL. But that's just a moral question. I mean . . .

Mrs. SUZMAN. Well, it is a moral question.

MACNEIL. On the economic grounds, are you satisfying the sanctions have had no effect and have only had a negative effect?

Mrs. SUZMAN. I think the effect that they've had is negative because it's created more unemployment. And that's a serious matter in a country like South Africa, which has a minimal safety net of social security. There's no dole. There are no food stamps. So it's a pretty dire experience for a man to lose his job.

And I believe to try and render one of the few countries on the continent of Africa that is economically viable into a non-viable state is counterproductive.

MACNEIL. What was your reaction, personally, when you found that position this week, when you spoke at Wesleyan University in Middletown, Connecticut, you found yourself being booed by some of the students?

Mrs. SUZMAN. Well, "booing" is going a bit far.

MACNEIL. Well, heckled and . . .

Mrs. SUZMAN. No, not even heckled. They gave an absolutely silent and courteous hearing. Nobody barracked, nobody booed, nobody interjected.

But undoubtedly when the questions were put by the members of the audience, those members who were part of the picket, they were hostile questions. There's no question about that. But I take that as it comes. You know, I'm pretty used to being in the minority, as far as certain opinions are concerned.

MACNEIL. But do you think they have misunderstood your role and your position?

Mrs. SUZMAN. I think they were aware of the fact that I've been anti-apartheid all these years. But they're very angry with me for taking a stand against sanctions and against disinvestment and also divestment, which they feel are major weapons against the government of South Africa. And as you know, I disagree. I think it's counterproductive. But also, they want to take this moral stand. They feel it's a moral statement, and they don't want anybody to in any way to undermine the influence which they feel that moral stand would have.

To me, I know the government perhaps better than they do, the government in South Africa. They are influenced by outside pressures, but they are certainly not going to change their policy fundamentally simply because people outside, in the United States and elsewhere, are pressurizing them to do so. There is in fact a reverse reaction, very often. You often find the whites becoming extremely irritated by this. And I think it's quite significant that the government, which lost 30 seats in the last election, in September, lost 17 of those 30 seats to the far-right party, the Conservative Party, and 13 seats to the liberal Democratic Party.

MACNEIL. After all those years in Parliament as a voice, sometimes a lone voice, often a lone voice, against apartheid, are you a bit sorry now that you resigned last spring and aren't there, as the battle begins to turn, at least in tone, a little bit your way?

Mrs. SUZMAN. In a way, yes. I haven't yet had proper withdrawal symptoms. I think those will come when Parliament starts again at the end of January. Then I will probably miss it. I shall certainly miss the challenge of debate. And I'll miss, I think, studying bills and participating in the very interesting period which is coming up in South Africa. But I've always felt it's a good thing to leave when people still think you should stay, and not wait until they say, "How are we going to get rid of the old girl?" And I think that time had come. I'd had 36 years. And there are other people now who can carry on.

MACNEIL. Well, Mrs. Suzman, thank you very much for joining us.

EASTERN BAND OF CHEROKEE INDIANS

Mr. HELMS. Mr. President, one of my many pleasures as a Senator from North Carolina is representing the Eastern Band of Cherokee Indians. As Senators know, the fine Cherokee people form one of the oldest and proudest communities on the North American continent.

The Cherokees have long prospered in western North Carolina. Their varied activities contribute to the healthy business and tourist industries of my State. But on November 14, the Cherokees contacted me because an 1834 Federal law stood in the way of their ability to conduct business for the benefit of the tribe.

The Cherokees have owned the Carolina Mirror Co. in Wilkes County, NC, and in Harris County, TX, for a number of years. This year they began to negotiate the sale of this company. All of the financing and paperwork on the sale had been worked out before the Cherokees discovered that they could not sell off any of their land interests without prior approval of the Congress.

Mr. President, due to the limited time left in this session of the Congress swift action is required to clear the way for the Cherokees to conduct the important business matters affecting their people. I am happy to say that thanks to the cooperation of the distinguished chairman of the Select Committee on Indian Affairs, —— Mr. INOUYE, and the distinguished ranking member, Mr. MCCAIN, the Cherokees' needs were addressed in H.R. 498, the Indian Law Enforcement Act. The sale of the Carolina Mirror Co. can now go through. I appreciate the efforts of the committee on behalf of the Chero-

kees and the people of Western North Carolina.

THE 50TH ANNIVERSARY OF THE LUTHERAN IMMIGRATION AND REFUGEE SERVCE

Mr. HATFIELD. Mr. President, today marks the 50th anniversary of the Lutheran Immigration and Refugee Service [LIRS]. I am pleased to participate in commemorating this special occasion and wish the LIRS many more years of success in assisting refugees throughout the world.

With the world's refugee population estimated at 14 million, the work of organizations such as the LIRS assumes an ever-increasng significance. While the LIRS does not seek recognition for their humanitarian efforts, I rise today to commend them and to urge my colleagues to do likewise.

In their 50 years of existence, the LIRS has resettled more than 155,000 refugees from every region of the world. In addition to providing refugee resettlement services, the LIRS also offers immigration assistance services for refugee children and a program to preserve first asylum.

Mr. President, I ask unanimous consent that a summary of the accomplishments and activities of the LIRS be printed in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

LUTHERAN IMMIGRATION AND REFUGEE SERVICE: OPENING DOORS FOR 50 YEARS

This fall marks the 50th anniversary of Lutheran Immigration and Refugee Service (LIRS), the national agency of Lutheran churches in the U.S. for ministry with uprooted people.

Officially, LIRS is an inter-Lutheran cooperative agency that represents 95 percent of all Lutherans in the United States. The church bodies its serves are the Evangelical Lutheran Church in America (ELCA) and Latvian Evangelical Lutheran Church (LELBA), both based in Chicago, and the Lutheran Church-Missouri Synod (LCMS), based in St. Louis.

Since 1939, LIRS has resettled more than 155,000 refugees through partnership with Lutheran social ministsry organizations, congregations and community people. More than 6,000 congregational sponsors were mobilized for this work, to foster the well-being and sufficiency of refugees and their integration into American life.

The total number resettled includes more than 3,000 unaccompanied refugee children placed in foster care since 1978. LIRS is one of just two national voluntary agencies that resettles unaccompanied minors.

LIRS is structured as a three-tiered partnership of national administration, professional regional support, and private sector sponsorships. Through this unique agency-and-church partnership, newcomers have access to a wide range of community resources in addition to basic material and emotional support. The most recent newcomers include Europeans, Armenians, Evangelical Christians from the Soviet Union, and Amerasian young people. And LIRS continues to resettle refugees from Southwest Asia, Africa, and the Near East.

With the help of the ELCA and Lutheran World Federation World Service, LIRS ministers with undocumented people in the United States by supporting 42 social service, advocacy and legal service community-based projects that address their needs. Matching private funds offered by the Ford Foundation are distributed in like manner—$500,000 over the next three years. The LCMS coordinates with LIRS with respect to the grants it makes through its own World Relief program of the Board for Social Ministry Services to these and other such projects, as well.

Recently in Guatemala, LIRS representatives took part in an international conference on effects of the peace talks and the plans to assist the one million refugees there or from there. LIRS also helped organize an ecumenical delegation to Washington, DC about Central Americans on the Southwest Texas border. That delegation made it clear that the policy of massive detention and lack of due process for Central Americans was in need of change.

At one point this summer, as many as 5,000 refugees were being detained in camps on the Rio Grande Valley area. The ELCA responded to an emergency appeal to the churches for funds for legal services to help them. LIRS is also organizing help for refugee children who are being kept in detention centers because of their lack of legal status in this country.

In June 1989 the LIRS executive director was the LIRS' and therefore the churches' representative in an international conference in Geneva concerning Southeast Asian refugees. These talks reaffirmed commitments by governments not to push back refugees; to expand programs of direct departure from Vietnam; and to continue resettlement, especially for those 52,000 who have spent years of their lives in camps. It was tough. Most countries wanted to end asylum now.

Vietnam has just agreed with the U.S. to allow former political prisoners to move again. Most will want to rejoin their families and will require special help on arrival. Two government departments and the national voluntary agencies, including LIRS, are discussing the where and how of that effort.

In mid-September, LIRS co-sponsored a major conference in Washington, DC on ministry to and with African and Haitian refugees. Several ELCA churchwide units were intimately involved in this one, especially the Commission on Multicultural Ministries.

LIRS is also well known for foster care ministry, helping refugee young people who come to the United States without their parents and who need support until they reach adulthood. Only LIRS is able to function as a Protestant agency with such services through Lutheran Social Service agencies matching the other functioning agency, the Roman Catholic effort through Catholic Charities in its dioceses. One Protestant agency, Bethany Children's Home of Grand Rapids, Michigan, receives its cases through LIRS.

LIRS maintains an office in Washington, DC, in close collaboration with the ELCA Office on Governmental Affairs, where it is housed near Capitol Hill.

As a member of the American Council for Voluntary International Action (InterAction), the LIRS staff works with 130 other private agencies in joint strategy and action efforts. The LIRS executive director is currently concluding two years as chair of the InterAction Committee on Migration and Refugee Affairs.

LIRS PROGRAMS

The past year has seen both growth and diversification in LIRS's national ministries to immigrants and refugees.

The importance of the *First Asylum Concerns* (FAC) program was underscored in 1989 by the devastating effects of the employer sanction provisions of the Immigration Reform and Control Act of 1986. The provisions make it illegal for employers to hire undocumented workers. The result is that undocumented refugees from Central America and elsewhere who cannot return home are increasingly subjected to exploitation or are sinking deeper into extreme poverty.

One important objective of LIRS's FAC program is to advocate for fair and humane first asylum policies, and to seek administrative and legislative relief for refugees already here who are threatened with deportation. LIRS has advocated for passage of legislation such as the DeConcini-Moakley bill to suspend deportation of Salvadorans and Nicaraguans.

LIRS has also been instrumental in forming a coalition of national voluntary agencies, legal advocacy organizations, local direct service projects, and refugee community groups. This coalition, called the Committee for U.S. Action on Asylum Concerns (CUSAAC), serves as a collaborative mechanism for sharing information and developing common perspectives on promoting and expanding protection for persons seeking safe haven in the United States. It also relates to counterpart organizations in other countries around the world.

Another important aspect of FAC's work is the provision of legal and basic social services directly to asylum seekers through its small grants program. These grants are provided to local projects that provide direct assistance to refugees in their communities.

LIRS and the people it serves are particularly indebted to the ELCA for its continued priority support of this critical program. This support amounted to $100,000 this year; and together with a grant of $40,000 from the Lutheran World Federation, it made possible the renewal and increase of a matching grant from the Ford Foundation. This grant will total $500,000 over a three-year period, of which $425,000 is for direct grants to local projects, and $75,000 is for technical assistance to these projects in the areas of organizational management and fund raising.

In 1989, a total of $290,000 was available for project grants. Requests coming to LIRS from 55 projects totalled $877,000. A staff review panel awarded grants to 41 projects.

LIRS *Children's Services* program continued its work of placing refugee children admitted to the United States into foster homes. This work is carried out under a contract with the U.S. Department of State, and is done in partnership with 23 Lutheran Social Ministry Organizations. In FY 88–89, 298 refugee children were placed.

An exciting prospect for the future is the possibility of implementing a special unaccompanied minors project for border children. This project would develop alternative living situations for refugee children from Central America who are being held in detention facilities by the INS. LIRS would use its relationships with border projects to

identify and screen the eligible children, and then link them with the existing network of LIRS unaccompanied refugee minor programs.

At this point, the LIRS board has given authorization for a consultant to be retained to research the project and develop an operational plan. Funding would be sought first from foundations, and perhaps later from federal or other private sources. This project enjoys wide support from the bishop/presidents of most of the affected synods/districts of the LC-MC and the ELCA.

June 1989 saw the launching of LIRS' new *Immigration Services* program, staffed by an experienced immigration attorney. This program aims to assist Lutheran Social Ministry Organizations, individual congregations and others to develop the technical capacity for responsible immigration counseling. The goal is to establish a national network of Lutheran affiliated immigration counseling sites. Already, a needs assessment has been distributed nationally and training workshops have been conducted for the upper midwest in October. Training for the southwest is scheduled for November.

The *Refugee Resettlement Program* continues to be LIRS's largest program. In FY 88-89, more than 8,000 refugees were resettled in the U.S. through 26 affiliated regional programs. This 33% increase over the same period last year is largely attributable to the increasing numbers of Evangelical Christians that have been leaving the Soviet Union. This unplanned increase has had positive effects on the financial position of that program, although they will be temporary.

Additional congregational sponsorship for added numbers of refugees are still required, although the Department of State restricts the agency as to where such refugees may be resettled. Encouragement from the bishops and other national leaders is needed for this largely agency and/or congregationally centered ministry of resettlement. Other ways for congregations to assist are described in a new LIRS brochure.

LIRS' heavy involvement in resettling Amerasians has also led to securing $35,000 supplementary federal grants for its seven Amerasian cluster sites. In addition, LIRS helped obtain a $50,000 grant for a special Hmong project in Wisconsin, and renewed participation with the federal match grant program for four other affiliates.

THE FIFTIETH ANNIVERSARY

While past achievements will be commemorated, LIRS's 50th aniversary celebration will be geared toward strengthened ministry for the future. The theme is "Opening Doors—Yesterday and Tomorrow."

The "kickoff" event, in honor of past servants of LIRS ministry, will be held in conjunction with the LIRS National Conference in November in Washington, D.C. Garrison Keillor of Lake Wobegon fame will be master of ceremonies at a special dinner.

Other planned events include an interagency-governmental seminar at the United Nations; as series of 10 symposiums at Lutheran theological seminaries; an oral history based on interviews of staff and others involved since 1939; a video program; a 50th anniversary report; and other informational materials. Plans are being coordinated and expanded through partnership with Lutheran Social Service agency affiliates as well as the ELCA and LCMS churchwide offices.

INTERNATIONAL BAN ON DRIFT NET FISHING ON THE SEAS

Mr. HATFIELD. Mr. President, I am here today to voice my support for legislation introduced by my colleague from Alaska, Senator MURKOWSKI. The bill, S. 1684, would speed the demise of drift net fishing practices. It requires the Secretary of State to secure an international ban on large-scale drift net fishing on the seas. It also calls for the Secretary of State to report annually to Congress on his progress toward that goal.

As my colleagues well know, we are not alone in our grave concern over the impact of large-scale drift net fishing. While this method of fishing is having a direct effect upon our west coast fisheries, it has also grown to become a problem of international concern.

Drift nets have been employed by Japanese, South Korean and Taiwanese fishing fleets to catch squid in the central North Pacific since the early 1980's. These fleets now include over 700 fishing vessels. Each boat drops a monofilament net that is approximately 30-feet deep and extends to 15 to 35 miles in length. These curtains of death are allowed to drift through the night. It has been estimated that they drift through 30,000 to 40,000 miles of deep ocean each day, indiscriminately entangling whatever marine life might come in their way.

The intended catch is supposedly squid, but in practice, the catch includes marine mammals, seabirds, albacore immature steelhead and salmon, and other deep ocean fish. Furthermore, over 600 miles of net each year are lost or discarded. These so-called ghost nets, do not deteriorate, but continue to drift and kill for months and, sometimes, years.

The Magnuson Fishery Conservation and Management Act of 1976, which this bill would amend, establishes that salmon and steelhead belong to their country of origin. This is an internationally accepted principle. Squid fishing boats are allowed to take a few salmon as an incidental catch. The large number of salmon showing up on the world market, however, indicates that this catch has become more than an incidental take.

There is some evidence that squid fishing vessels may be a front for an illegal, directed salmon fishery. This illegal fishery is not only depressing worldwide salmon prices, it is depleting our own valuable resources. West coast fisherman have seen drastically reduced fish runs that may be connected with high seas drift netting. At a hearing I held on this issue last July, I heard testimony from seafood processors and commercial fishermen indicating that an enourmous impact is being felt in my state.

Since that time, Ore Aqua, an Oregon aquaculture firm documented a return rate of coho salmon at one-third the expected rate. Oregon Albacore catches have dropped from 3,512 metric tons in 1980 to an expected 450 tons this year. In addition, Oregon albecore trollers Herb Goblirsch and Mike Shedore inform me that this past summer, 50 to 60 percent of their catch was netmarked from contact with drift nets. Mr. President, clearly, this is unacceptable.

The depletion of North American anadromous fish is tragic, in and of itself. This loss, and the loss of value to U.S. commercial and recreational fishermen become even more distressing when one considers the large investment that we have made in our fisheries. As a nation, we have invested money in fish hatcheries, in scientific research, in screens and fish ladders for dams, and in mitigating damage to fish habitat from logging, grazing or mining. When immature salmon and steelhead are illegally caught before they can return to their spawning grounds, our efforts are made futile.

The framework exists for controlling high seas drift netting and protecting North American fisheries, but it has become impossible to implement and enforce this framework. By international agreement, drift net fishing is restricted to certain seasons and certain areas that are supposedly distant from salmon grounds. The first problem is that the known distribution of North American salmon and steelhead overlaps the authorized squid fishing area. Second, Japanese, Korean, and Taiwanese boats have been found fishing beyond the established boundaries, and often with disrespect to the established season. For example, the Coast Guard has spotted 25 Taiwanese vessels north of the designated boundary thus far this year.

While some of these nations have made efforts to regulate their own fleets, U.S. enforcement has been limited. The U.S. Coast Guard has significantly increased our surveillance of the high seas, but we simply have not been able to give the Coast Guard the resources it needs to adequately enforce fishing boundaries.

Because of the sheer number of vessels involved, the problem of monitoring is formidable, and we have not been able to place an adequate number of observers on foreign ships. While treaties recently negotiated in accordance with the Drift Net Control Act of 1987 may help some, increased observers stand only to verify what we already know: that, in addition to illegal taking, drift net fishing results in tremendous devastation to our fishery and marine mammal resources.

The ecological effects on our global oceans have become a cause for international concern. Drift netting has been described as the biological strip-

mining of the ocean. The most vivid example of this description has been the senseless trapping of marine mammals—porpoises, seals, and whales. Less visible, but probably even more foreboding, is the possible long-term effect on the food chain of the deep ocean. We do not know how drift nets are impacting the ecological processes of the ocean. This lack of knowledge and the possibility of extensive damage is disturbing.

Given the improbable task of effectively regulating drift netting, and in light of the irresponsible nature of this fishing method, the only realistic long-term solution to this problem is the elimination of drift net fishing on the high seas. Senator MURKOWSKI's initiative is well-advised. It is imperative that we secure an international ban on large-scale drift net fishing.

Mr. President, this is a responsible and much needed initiative for the management of our Nation's marine resources. As evidenced by the recently passed U.N. resolution on drift netting, there is tremendous worldwide sympathy for a ban to drift netting. Just as the wall in Berlin has been torn down in recent days, so should these moving walls of death be removed from the seas. S. 1684 would help accomplish this goal and I would urge my colleagues to join me in supporting it.

EXECUTIVE SESSION

DEPARTMENT OF TRANSPORTATION

Mr. CRANSTON. Mr. President, I ask unanimous consent that the Senate proceed to executive session to consider the following nomination: Calendar Order No. 326, Brian W. Clymer, to be Urban Mass Transportation Administrator.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. CRANSTON. Mr. President, I ask unanimous consent that the nominee be confirmed, that any statements appear in the RECORD as if read, that the motion to reconsider be laid upon the table, that the President be immediately notified of the Senate's action, and that the Senate return to legislative session.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The nomination considered and confirmed is as follows:

DEPARTMENT OF TRANSPORTATION

Brian W. Clymer, of Pennsylvania, to be Urban Mass Transportation Administrator.

LEGISLATIVE SESSION

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will now return to legislative session.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Kalbaugh, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

ENROLLED BILLS SIGNED

At 10:15 a.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the Speaker has signed the following enrolled bills:

S. 931. An act to protect a segment of the Genesee River in New York;

H.R. 215. An act to amend title 5, United States Code, with respect to the method by which premium pay is determined for irregular unscheduled overtime duty by a Federal employee; and

H.R. 3544. An act to authorize the transfer of a specified naval landing ship dock to the Government of Brazil under the leasing authority of chapter 6 of the Arms Export Control Act.

The enrolled bills were subsequently signed by the Acting President pro tempore [Mr. ROBB].

At 10:27 am, a message from the House of Representatives delivered by Mr. Hayes, one of its reading clerks, announced that the House agrees to the report of the Committee of Conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 2939) making appropriations for foreign operations, export financing, and related programs for the fiscal year ending September 30, 1990, and for other purposes; that the House recedes from its disagreement to the amendments of the Senate numbered 4, 20, 21, 24, 25, 26, 33, 49, 51, 52, 54, 55, 64, 65, 66, 67, 76, 79, 83, 86, 87, 89, 97, 111, 113, 115, 120, 124, 126, 127, 128, 131, 134, 135, 136, 139, 140, 142, 146, 149, 154, 156, 160, 161, 162, 163, 167, 168, 179, 180, 185, 211, 215, 216, 221, 224, 233, 234, 250, 252, 253, 257, 259, 260, 262, 263, 266, 270, and 281 and concurs therein; and that the House recedes from its disagreement to the amendments of the Senate numbered 3, 6, 8, 12, 13, 15, 17, 19, 22, 23, 31, 35, 42, 44, 48, 63, 69, 74, 75, 85, 91, 95, 98, 102, 103, 105, 107, 110, 112, 117, 121, 122, 132, 133, 164, 169, 187, 197, 201, 220, 235, 245, 267, 274, 275, 276, 277, 278, 279, 283, 284, 286, 287, 289, 290, 291, 292, 293, 294, and 295 and concurs therein each with an amendment in which it requests the concurrence of the Senate.

The message also announced that the House has passed the bill (S. 1793) the make technical and correcting changes in agriculture programs; with an amendment, in which it request the concurrence of the Senate.

The message further announced that the House has passed the bill (S. 1390) to authorize funds to be appropriated for the construction of a mouse research laboratory, and for other purposes; with amendments, in which it request the concurrence of the Senate.

The message also announced that the House insists upon its amendments to the bill (S. 737) to authorize the Secretary of the Interior to acquire certain lands adjacent to the boundary of Rocky Mountain National Park in the State of Colorado.

The message further announced that the Speaker appoints Mr. KASTENMEIER as a manager on the part of the House to the amendment of the Senate to the bill (H.R. 2717) to facilitate the adjustment or change of status of Chinese nationals in the United States by waiving the 2-year foreign residence requirement for "J" nonimmigrants, vice, Mr. BROOKS, resigned.

The message also announced that the House has passed the following bills and joint resolutions, in which it requests the concurrence of the Senate:

H.R. 1. An act to amend Federal laws to reform housing, community and neighborhood development, and related programs, and for other purposes;

H.R. 1602. An act to amend the Public Health Service Act to improve emergency medical services and trauma care, and for other purposes;

H.R. 3482. An act to provide disaster assistance to private timber producers for the reestablishment of timber stands necessitated by Hurricane Hugo.

H.R. 3550. An act to amend section 524 of title 28, United States Code, with respect to the Special Forfeiture Fund, to amend section 511 of the Controlled Substances Act to make technical, clarifying, and administrative changes, and for other purposes;

H.R. 3611. An act to combat international narcotics production and trafficking;

H.R. 3614. An act to amend the Drug-Free Schools and Communities Act of 1986 to revise certain requirements relating to the provision of drug education and prevention program in elementary and secondary schools, and for other purposes;

H.R. 3620. An act to clarify the Food Security Act of 1985;

H.R. 3630. An act to amend the Public Health Service Act with respect to the prevention and treatment of substance abuse, including, establishing separate block grants with respect to substance abuse and mental health;

H.J. Res. 357. Joint resolution providing for the reappointment of Samuel Curtis Johnson as a citizen regent of the Board of Regents of the Smithsonian Institution; and

H.J. Res. 358. Joint resolution providing for the reappointment of Jeannine Smith Clark as a citizen regent of the Board of Regents of the Smithsonian Institution.

At 5:30 p.m., a message from the House of Representatives, delivered by Mr. Hays, one of its reading clerks, announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 150. An act to amend the Immigration and Nationality Act to provide a procedure for an alien who dies while serving on active-duty with the United States armed forces during certain periods of hostilities to be considered a citizen of the United States at the time of the alien's death;

H.R. 525. An act to provide for the naturalization of natives of the Philippines through active-duty service in the Armed Forces of the United States during World War II;

H.R. 639. An act to amend the Immigration and Nationality Act to provide for special immigrant status for certain aliens who have served honorably (or are enlisted to serve) in the Armed Forces of the United States for at least 12 years;

H.R. 1011. An act to provide for the establishment of the National Commission on Wildlife Disasters, to provide for increased planning and cooperation with local firefighting forces in the event of forest fires, and for other purposes;

H.R. 2134. An act to amend the Federal Meat Inspection Act and the Poultry Products Inspection Act to authorize the distribution of wholesome meat and poultry products for human consumption that are not in compliance with the Acts to charity and public agencies;

H.R. 2809. An act to provide for the transfer of certain lands to the State of California, and for other purposes;

H.R. 3033. An act to control the export, to countries pursuing or expanding the ability to produce or deliver chemical or biological weapons, of items that would assist such countries in acquiring such ability, to impose sanctions against companies which have aided in the proliferation of chemical or biological weapons, to provide for sanctions against countries which use or prepare to use chemical or biological weapons in violation of international law, and for other purposes;

H.R. 3046. An act to reduce the number of Commissioners on the Copyright Royalty Tribunal, to change the salary classification rates for members of the Copyright Tribunal and the United States Parole Commission, and for the Deputy and Assistant Commissioners of Patents and Trademarks, and for other purposes;

H.R. 3532. An act to extend the United States Commission on Civil Rights;

H.R. 3566. An act making appropriations for the Departments of Labor, health and Human Services, and Education, and related agencies for the fiscal year ending September 30, 1990, and for other purposes;

H.R. 3589. An act to amend the Disaster Assistance Act of 1989 to provide assistance to agricultural producers suffering from earthquakes;

H.R. 3610. An act making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1990, and for other purposes; and

H.R. 3629. An act extending the authority of the Secretary of Commerce to conduct the quarterly financial report program under section 91 of title 13, United States Code, through September 30, 1993.

At 5:52 p.m., a message from the House of Representatives, delivered by Mr. Hays, one of its reading clerks, announced that the House has passed the following joint resolution, in which it requests the concurrence of the Senate:

H.J. Res. 435. Joint resolution making further continuing appropriations for the fiscal year 1990, and for other purposes.

ENROLLED BILLS AND JOINT RESOLUTION SIGNED

At 7:15 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the Speaker has signed the following enrolled bills and joint resolution:

H.R. 2642. An act granting the consent of the Congress to amendments to the Southeast Interstate Low-Level Radioactive Waste Management Compact;

H.R. 3014. An act making appropriations for the Legislative Branch for the fiscal year ending September 30, 1990, and for other purposes; and

H.J. Res. 278. Joint resolution to designate the period commencing on November 20, 1989, and ending on November 26, 1989, as "National Adoption Week".

The enrolled bills and joint resolutions were subsequently signed by the Acting President pro tempore [Mr. ROBB].

ENROLLED JOINT RESOLUTION SIGNED

At circa 9:40 p.m., a message from the House of Representatives announced that the Speaker has signed the following enrolled joint resolution:

H.J. Res. 435. Joint resolution making further continuing appropriations for the fiscal year 1990, and for other purposes.

The enrolled joint resolution was subsequently signed by the President pro tempore [Mr. BYRD].

MEASURES REFERRED

The following bills were read the first and second times by unanimous consent, and referred as indicated:

H.R. 150. An act to amend the Immigration and Nationality Act to provide a procedure for an alien who dies while serving on active-duty with the United States armed forces during certain periods of hostilities to be considered a citizen of the United States at the time of the alien's death; to the Committee on the Judiciary.

H.R. 639. An act to amend the Immigration and Nationality Act to provide for special immigrant status for certain aliens who have served honorably (or are enlisted to serve) in the Armed Forces of the United States for at least 12 years; to the Committee on the Judiciary.

H.R. 1011. An act to provide for the establishment of the National Commission on Wildlife Disasters, to provide for increased planning and cooperation with local firefighting forces in the event of forest fires, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

H.R. 2134. An act to amend the Federal Meat Inspection Act and the Poultry Products Inspection Act to authorize the distribution of wholesome meat and poultry products for human consumption that are not in compliance with the Acts to charity and public agencies; to the Committee on Agriculture, Nutrition, and Forestry.

H.R. 2809. An act to provide for the transfer of certain lands to the State of California, and for other purposes; to the Committee on Energy and Natural Resources.

H.R. 3046. An act to reduce the number of Commissioners on the Copyright Royalty Tribunal, to change the salary classification rates for members of the Copyright Tribunal and the United States Parole Commission, for the Register and Associate Registers of Copyrights, and for the Deputy and Assistant Commissioners of Patents and Trademarks, and for other purposes; to the Committee on the Judiciary.

MEASURES PLACED ON THE CALENDAR

The following bills were read the first and second times by unanimous consent, and placed on the calendar:

H.R. 1. An act to amend Federal laws to reform housing, community and neighborhood development, and related programs, and for other purposes.

H.R. 525. An act to provide for the naturalization of natives of the Philippines through active-duty service in the Armed Forces of the United States during World War II.

H.R. 3033. An act to control the export, to countries pursuing or expanding the ability to produce or deliver chemical or biological weapons, of items that would assist such countries in acquiring such ability, to impose sanctions against companies which have aided in the proliferation of chemical or biological weapons, to provide for sanctions against countries which use or prepare to use chemical or biological weapons in violation of international law, and for other purposes.

H.R. 3482. An act to provide disaster assistance to private timber producers for the reestablishment of timber stands necessitated by Hurricane Hugo.

H.R. 3629. An act extending the authority of the Secretary of Commerce to conduct the quarterly financial report program under section 91 of title 13, United States Code, through September 30, 1993.

MEASURES READ THE FIRST TIME

The following bill was read the first time:

H.R. 3532. An act to extend the United States Commission on Civil Rights.

MEASURES PASSED

Pursuant to the order of the Senate of yesterday, the following bills having been received from the House for concurrence; all after the enacting clause is stricken, the text of S. 1735, as passed by the Senate, inserted in lieu thereof, the bills deemed read the third time, and passed, and that the Senate insist upon its amendment to the bills, ask a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. KENNEDY, Mr. DODD, Mr. PELL, Mr.

HOLLINGS, Mr. INOUYE, Mr. BIDEN, Mr. SARBANES, Mr. HATCH, Mr. COATS, Mr. DANFORTH, Mr. THURMOND, Mr. HELMS, and Mr. GRAMM as managers of the conference on the part of the Senate:

H.R. 3550. An act to amend section 524 of title 28, United States Code, with respect to the Special Forfeiture Fund, to amend section 511 of the Controlled Substances Act to make technical, clarifying, and administrative changes, and for other purposes;

H.R. 3611. An act to combat international narcotics production and trafficking;

H.R. 3614. An act to amend the Drug-Free Schools and Communities Act of 1986 to revise certain requirements relating to the provision of drug abuse education and prevention programs in elementary and secondary schools, and for other purposes; and

H.R. 3630. An act to amend the Public Health Service Act with respect to the prevention and treatment of substance abuse, including establishing separate block grants with respect to substance abuse and mental health.

ENROLLED BILL AND JOINT RESOLUTION PRESENTED

The Secretary of the Senate reported that he had presented to the President of the United States the following enrolled bill and joint resolution:

On November 9, 1989:

S.J. Res. 215. Joint resolution acknowledging the sacrifices that military families have made on behalf of the Nation and designating November 20, 1989, as "National Military Families Recognition Day".

On November 15, 1989:

S. 931. An act to protect a segment of the Genesee River in New York.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-1949. A communication from the Secretary of the Senate, transmitting, pursuant to law, a full and complete statement of the receipts and expenditures of the Senate, showing in detail the items of expense under proper appropriations, the aggregate thereof, and exhibiting the exact condition of all public moneys received, paid out, and remaining in my possession from April 1, 1989 through September 30, 1989; ordered to lie on the table.

EC-1950. A communication from the Deputy Under Secretary of Agriculture (International Affairs and Commodity Progams), transmitting, pursuant to law, the first quarterly commodity and country allocation table showing current programming plans for commodity assistance for fiscal year 1990; to the Committee on Agriculture, Nutrition, and Forestry.

EC-1951. A communication from the Director of the Office of Management and Budget, Executive Office of the President, transmitting, pursuant to law, a cumulative report on budget rescissions and deferrals dated November 1, 1989; pursuant to the order of January 30, 1975, as modified, referred jointly to the Committee on Appropriations and the Committee on the Budget.

EC-1952. A communication from the Acting Assistant Secretary of the Army (Installations, Logistics, and Environment), transmitting, pursuant to law, notification of the recent discovery of one M-134 chemical bomblet at Dugway Proving Grounds, Utah; to the Committee on Armed Services.

EC-1953. A communication from the Assistant Secretary of Defense (Production and Logistics), transmitting, pursuant to law, the Strategic and Critical Materials Report for the period April through September 1988; to the Committee on Armed Services.

EC-1954. A communication from the Secretary of Housing and Urban Development, transmitting a draft of proposed legislation to amend Federal laws to reform housing, community and neighborhood development, and related programs, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

EC-1955. A communication from the Executive Director of the Resolution Trust Corporation, transmitting, pursuant to law, the semiannual report on activities and efforts of the Corporation, the Federal Deposit Insurance Corporation, and the Oversight Board for the periods ending March 31 and September 30, 1989; to the Committee on Banking, Housing, and Urban Affairs.

EC-1956. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Financial Audit: Federal Financing Bank's Fiscal Year 1988 Financial Statements"; to the Committee on Banking, Housing, and Urban Affairs.

EC-1957. A communication from the Secretary of Energy, States, transmitting, pursuant to law, the annual report of the Department of Energy on efforts to assist the homeless; to the Committee on Banking, Housing, and Urban Affairs.

EC-1958. A communication from the Chairman of the Nuclear Regulatory Commission, transmitting, pursuant to law, the report on nondisclosure of safeguards information by the Nuclear Regulatory Commission for the quarter ended September 30, 1989; to the Committee on Environment and Public Works.

EC-1959. A communication from the Inspector General, Department of Energy, transmitting, pursuant to law, a report entitled "Superfund Costs Claimed by the Department of Energy Under Interagency Agreements with the Environmental Protection Agency—Fiscal Year 1988"; to the Committee on Environment and Public Works.

EC-1960. A communication from the Chairman of the Federal Election Commission, transmitting, pursuant to law, a report on actions taken by the Commission to implement the Inspector General Act of 1978; to the Committee on Governmental Affairs.

EC-1961. A communication from the Chairman of the National Labor Relations Board, transmitting, pursuant to law, a report on the efforts of the Board to implement the Inspector General Act of 1978; to the Committee on Governmental Affairs.

EC-1962. A communication from the Assistant Secretary for Administration, Smithsonian Institution, transmitting, pursuant to law, the annual pension reports of the Smithsonian Institution, the Woodrow Wilson International Center for Scholars, and Reading is Fundamental; to the Committee on Governmental Affairs.

EC-1963. A communication from the Secretary of Housing and Urban Development, transmitting a draft of proposed legislation to amend provisions of the Bankruptcy Code governing the powers of a bankruptcy court and the effect of automobile stays as they relate to certain multifamily liens insured or held by the Secretary of Housing and Urban Development or the Secretary of Agriculture; to the Committee on the Judiciary.

EC-1964. A communication from the Chairman of the Federal Election Commission, transmitting, pursuant to law, an update of the information previously submitted concerning the status of the Presidential Election Campaign Fund; to the Committee on Rules and Administration.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. KENNEDY, from the Committee on Labor and Human Resources, with an amendment in the nature of a substitutes:

S. 1824: A bill to reauthorize the Education of the Handicapped Act, and for other purposes (Rept. No. 101-204.

By Mr. INOUYE, from the Select Committee on Indian Affairs, with an amendment in the nature of a substitute:

S. 1270: A bill to provide an Indian mental health demonstration grant program (Rept. No. 101-205).

By Mr. BENTSEN, from the Committee on Finance, with an amendment in the nature of a substitute:

H.R. 3275: A bill to implement the steel trade liberalization program (Rept. No. 101-206).

By Mr. INOUYE, from the Select Committee on Indian Affairs, with an amendment:

S. 1813: A bill to ensure that funds provided under section 4213 of the Indian Alcohol and Substances Abuse Prevention and Treatment Act of 1986 may be used to acquire land for emergency shelters (Rept. No. 101-207).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. BENTSEN, from the Committee on Finance:

Catalina Vasquez Villalpando, of Texas, to be Treasurer of the United States; and

Donald E. Kirkendall, of Maryland, to be Inspector General, Department of the Treasury.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. CRANSTON, from the Committee on Veterans' Affairs:

Ronald E. Ray, of Florida, to be an Assistant Secretary of Veterans Affairs (Human Resources and Administration);

Edward G. Lewis, of Virginia, to be an Assistant Secretary of Veterans Affairs (Information Resources Management); and

David E. Lewis, of Florida, to be an Assistant Secretary of Veterans Affairs (Acquisition and Facilities).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. GRAHAM (for himself and Mr. MACK):

S. 1878. A bill to amend title XIX of the Social Security Act to allow for State matching payments through voluntary contributions and State taxes; to the Committee on Finance.

By Mr. HARKIN:

S. 1879. A bill to amend the Agricultural Trade Development and Assistance Act of 1954 to increase the amount of food assistance that is provided to foreign countries, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. DANFORTH (for himself, Mr. MCCAIN, Mr. HATCH, Mr. GORE, Mr. FORD, Mr. LIEBERMAN, Mr. LOTT, Mr. WARNER, Mr. BURDICK, Mr. PRYOR, Mr. GORTON, Mr. BURNS, Mr. METZENBAUM, Mr. BUMPERS, and Mr. PRESSLER):

S. 1880. A bill to amend title VI of the Communications Act of 1934 to ensure carriage on cable television of local news and other programming and to restore the right of local regulatory authorities to regulate cable television rates, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. HEFLIN:

S. 1881. A bill to provide assistance to the George C. Wallace Community College in Hanceville, Alabama in the construction of a fitness training facility; to the Committee on Labor and Human Resources.

By Mr. LEVIN (for himself and Mr. RUDMAN):

S. 1882. A bill to ensure ethics in Government and for other purposes; to the Committee on Governmental Affairs.

By Mr. KENNEDY:

S. 1883. A bill to amend the Public Service Act to establish a center for tobacco products, to inform the public hazards of tobacco use, to disclose and restrict additives to such products, and to require labeling of such products to provide information concerning such products to the public, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. GORE:

S. 1884. A bill to promote the use of recycled materials derived from municipal refuse, and for other purposes; to the Committee on Commerce, Science, and Transportation.

S. 1885. A bill relating to the financing of certain solid waste disposal facilities, and for other purposes; to the Committee on Finance.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. CRANSTON (for Mr. KERREY):

S. Res. 209. Resolution to authorize the use of the Hart Building atrium for a holiday concert by the Congressional Chorus; considered and agreed to.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. HARKIN:

S. 1879. A bill to amend the Agricultural Trade Development and Assistance Act of 1954 to increase the amount of food assistance that is provided to foreign countries, and for other purposes; to the Committee on Commerce, Science, and Transportation.

CARGO PREFERENCE REFORM

● Mr. HARKIN. Mr. President, I rise to introduce legislation that will increase the quantity of U.S. commodities that may be shipped to foreign countries as food aid while maintaining support for our U.S. merchant marine fleet. The legislation will relieve USDA of costs of complying with existing cargo preference laws which require a portion of U.S. foreign food aid to be shipped on U.S. vessels.

For various reasons, U.S. flag shipping rates are generally—but by no means always—higher than foreign flag rates. The difference between United States and foreign flag rates is not nearly as great as some would suggest. Nevertheless, to the extent USDA pays higher shipping charges for U.S. flag vessels a smaller quantity of commodities may be shipped with the limited USDA food aid budget.

Under my legislation the Department of Transportation will reimburse USDA for any charges for shipping foreign food assistance that are above the prevailing world rates. By reducing the amount of transportation costs borne by USDA, my legislation will allow USDA to spend less of its funds for shipping charges and a larger share of its funds on food. Hence more U.S. agricultural commodities can be shipped as food aid with the limited funds available to USDA for foreign food aid.

Under the Food Security Act of 1985, 75 percent of U.S. food aid shipments must be transported on U.S.-flag vessels. Prior to that act, 50 percent of U.S. food aid was required to be shipped on U.S. vessels. The Food Security Act also requires that DOT reimburse USDA for any increase in shipping costs caused by changing the share of food aid shipments subject to cargo preference from 50 percent to 75 percent. Thus, DOT now covers a portion of any higher charges for shipping food aid on U.S.-flag vessels.

Under my legislation, DOT would reimburse USDA for all food aid shipping charges to the extent they exceed the charges that would apply in the absence of cargo preference laws. The legislation employs the same reimbursement mechanism as is now used by DOT to reimburse USDA for a portion of any higher costs of using U.S. ships.

This legislation will put the cost of complying with cargo preference laws where it belongs: with DOT, not USDA. It is important to support our merchant marine as a matter of national security, and cargo preference laws are the best system we have been able to work out to provide that support. But supporting the U.S. merchant fleet should not diminish the quantity of agricultural commodities that USDA can ship as food aid.

Unfortunately, the debate over cargo preference has pitted agricultural interests against maritime interests. In order to meet the stiff challenges from foreign competition, though, we need far more cooperation, not antagonism, among our basic American industries. This legislation will resolve a perennial source of conflict between agriculture and the maritime industry while enhancing the ability of USDA to meet the need for food aid to foreign peoples.

I ask unanimous consent that the text of the bill appear in the RECORD following my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1879

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. FOOD ASSISTANCE TO FOREIGN COUNTRIES.

Section 403 of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1733) is amended by adding at the end the following new subsection:

"(d)(1) Notwithstanding any other provision of law, the Secretary of Transportation shall finance any ocean freight charges for food assistance incurred in any fiscal year, to the extent that such charges are higher than would otherwise be the case by reason of a requirement of law that agricultural commodities be transported in United States-flag vessels.

"(2) Subsections (c), (d), and (e) of section 901d of the Merchant Marine Act, 1936 (46 U.S.C. App. 1241h) shall apply to reimbursements required under paragraph (1).

"(3) As used in this subsection:

"(A) The term 'agricultural commodity' has the same meaning as is given to such term by section 402.

"(B) The term 'food assistance' means any export activity described in section 901b(b) of the Merchant Marine Act, 1936 (46 U.S.C. App. 1241f(b))."●

By Mr. DANFORTH (for himself, Mr. MCCAIN, Mr. HATCH, Mr. GORE, Mr. FORD, Mr. LIEBERMAN, Mr. LOTT, Mr. WARNER, Mr. BURDICK, Mr. PRYOR, Mr. GORTON, Mr. BURNS, Mr. METZENBAUM, Mr. BUMPERS, and Mr. PRESSLER):

S. 1880. A bill to amend title VI of the Communications Act of 1934 to ensure carriage on cable television of local news and other programming and to restore the right of local regulatory authorities to regulate cable television rates, and for other purposes; to the Committee on Commerce, Science, and Transportation.

CABLE TELEVISION CONSUMER PROTECTION ACT

● Mr. DANFORTH. Mr. President, the Cable Communications Policy Act of 1984 largely deregulated the cable television industry. In the 5 years that have passed since deregulation, however, consumers, cities, broadcasters, small cable operators, microwave distributors of video programming—which are known as "wireless cable" companies—satellite dish owners, and others have come to Congress asking for help.

That is why, Mr. President, several of my colleagues and I are introducing the Cable Television Consumer Protection Act of 1989. This bill addresses the complaints, and builds a coalition, of many of the constituencies who have asked for cable legislation. It is designed to place some check on what is now an unregulated monopoly.

You do not have to have an advanced degree in economics to know that where there is no competition, there is no check on prices. Unregulated monopolies are known for charging high prices. Therefore, cable rates are the first problem addressed in this bill. Cable rates have increased because of the deregulation of the 1984 Cable Act. Under that law franchising authorities—cities and States—are barred from regulating the rates for cable if there is "effective competition." Effective competition, however, is defined by regulation today as three over-the-air broadcast stations. In other words, if there are three broadcast signals in an area, the cable operator is deemed to have effective competition and his rates are deregulated.

Despite the fact that there are very few examples of two cable systems competing head to head, the current rules have led to rate deregulation for 97 percent of the cable systems. Not surprisingly, rates have increased dramatically in many cases. According to the U.S. General Accounting Office, rates for the lowest priced basic service increased by 40 percent or more for 28 percent of cable subscribers in the nation in the first 2 years after rate deregulation.

The Cable Television Consumer Protection Act defines effective competition as the existence of another multichannel video provider in the cable franchise area. The competing multichannel video provider might be a "wireless cable" operator, for instance.

The advantages of redefining effective competition as another multichannel video provider are twofold. First, it protects consumers from monopoly pricing unless there is a true alternative to the cable system operator. Rates for basic cable services, that is, the service tier on which local broadcast signals are retransmitted, can be regulated if there is no true competition. Second, it provides an incentive for the cable industry to allow competition to develop: if there is a second provider, the cable operator's rates are deregulated.

The second major provision of this bill limits cable operators' discretion regarding the carriage and channel placement of local broadcast stations on their cable systems. In the industry's terms, this provision addresses the "must carry" and "channel positioning" problems of local broadcasters. This bill does not go so far as to require payment to broadcasters when their signals are retransmitted, but I think that is an idea worth exploring.

Today, despite industry negotiations, no must carry or channel positioning rules are in place. Today, cable operators are free to act as gatekeepers who decide what local broadcast programming cable subscribers will be able to see on the cable system. This bill codifies must carry rules to ensure that cable subscribers have access to local broadcasting stations. It also requires cable companies to carry broadcasters on the channels they were on under the old must carry rules, on their over-the-air channel numbers, or on other channels by mutual agreement. The bill lets the franchising authorities resolve disputes over channel positioning. I think this bill strikes a fair balance. And, I believe it has already advanced the negotiations between broadcasters and cable operators.

The must carry and channel positioning rules in this bill promote three longstanding, substantial governmental interests: First, the public's first amendment right of access to diverse sources of information; second, the preservation of vigorous competition among communications services; and third, the promotion of a nationwide broadcasting service built upon local outlets—one of the statutory obligations of the Federal Communications Commission.

Must carry and channel positioning rules necessary because cable systems can act as gatekeepers of information. Cable subscribers rarely have a choice of cable operators, and many cable subscribers need cable service to receive local television signals. Geographical and manmade obstructions may block the signals of local broadcast stations. And, outdoor antennas are not available to some viewers, such as apartment dwellers. Further, cable-ready TV's, remote controls, and VCR's make switching back and forth between cable and over-the-air reception cumbersome or impossible.

Local television stations are licensed by the Federal Government and are obligated to serve their local communities. Given that over 56 percent of all households subscribe to cable, the only way these local stations are able to reach a substantial portion of their communities is to be carried on the local cable system. Cable operators should not have unfettered discretion to drop broadcasters or assign them to channels that are rarely viewed, or cannot be seen on many television sets wired for cable.

The third major provision of this bill responds to complaints from franchising authorities that they have little leverage over cable operators who raise rates, give poor service, or fail to carry programming that consumers want. Mr. President, if a cable operator isn't serving the community well, the city should be able to find an operator who will.

The bill would make it less burdensome for a franchising authority to revoke, or deny renewal of, a franchise. It would also grant franchising authorities immunity from monetary damages for first amendment claims brought as a result of franchise decisions. Injunctive relief would still be available to plaintiffs, however. The bill would also allow franchising authorities to enforce tougher technical standards.

The fourth major provision of this bill is a response to the small cable operators, home satellite dish owners, "wireless cable" operators, and other potential distributors of video programming who complain that they are denied programming or are charged more for programming than the large, vertically integrated cable operators. This is a nondiscrimination provision.

Mr. President, the cable industry has become vertically integrated—cable operators and cable programmers often have common ownership. As a result, cable programmers have the incentive and ability to favor their affiliated cable operators over other distributors of video programming. This bill addresses that problem by barring programmers affiliated with cable operators from discriminating against nonaffiliates in the price, terms, conditions or availability of their programming.

Mr. President, as Oliver Wendell Holmes recognized 70 years ago, competition and first amendment values are closely linked. Policies aimed at promoting competition and preventing market abuses simultaneously advance diversity in the marketplace of ideas. Therefore, the fifth and final major provision of this bill addresses market power and market structure.

The cable industry has become highly concentrated. A few "multiple system operators" [MSO's] dominate the industry. The large MSO's have the market power to determine what programming services can make it on cable. Concentration in the cable industy also means a reduction in the number of media voices available to consumers. This bill addresses the problem by capping the size of MSO's to 15 percent of the Nation's cable subscribers. In other words, to encourage diversity and lower the barriers to entry to new programmers, this bill

says that we want to have at least seven cable systems in the country.

Mr. President, this is a proconsumer bill that addresses many of the issues that have been examined in the Commerce Committee concerning the cable industry. I urge my colleagues to support this measure.●

● Mr. McCAIN. Mr. President, today I am joining Senator DANFORTH to sponsor the Cable Television Consumer Protection Act of 1989, and I'd like a minute to discuss the bill. I have cosponsored this legislation out of concern for the rising number of complaints about cable television rates and business practices.

Since 1986, when basic service rate deregulation took effect under the Cable Communications Policy Act, cable rates nationwide have been reported as increasing an average of over 29 percent, more than four times faster than the rate of inflation. While the average number of basic channels has increased over the past 2 years, some areas have been hit with very high rate increases. In Tucson, AZ, for example, basic cable rates have risen around 68 percent since deregulation took effect in 1986 and nearly 120 percent since passage of the Cable Act in 1984.

Also, since deregulation, the growing concentration of ownership in the cable television marketplace has led to charges of unfair competition. These difficulties in the cable television industry, if left unchecked, could seriously limit the diversity of news, information and entertainment programming available to the American public. Television is an enormously powerful force in our society: More homes have television than have indoor plumbing. And cable television now has captured over half of America's 90 million television watching households.

The purpose of deregulating cable in the 1984 Cable Act was to promote the diversity of information sources reaching American households. At that time, there was the promise of a wide variety of television technologies in addition to cable—information age technologies like direct broadcast satellites, wireless cable and backyard satellite dishes. Cable was deregulated with the expectation that this competition would flourish. But the competition has never really materialized. Many, including consumers, broadcasters, satellite dish owners, wireless cable operators, and the cities complain that there is no competition because the anticompetitive behavior of the cable industry has choked it off.

Despite Congress' predictions of competition, the vast majority of the 9,500 cable systems in this country today remain local monopolies. And most of these local monopolies are owned by a handful of companies. After the rash of recent mergers, the top two parent companies control over 16 million cable subscribers in this country and have an equity interest in at least 26 programming services. This gives cable operators monopoly power over rates and subscribers as well as control over dozens of channels. They decide which programmers shall have access to them, and what types of programming entire cities can view.

Of course, no one is forced to take cable service and cable operators argue that this provides "competitive discipline." However, this argument misses or obscures the point altogether. Most consumer goods and services are optional in the sense that consumers are not required to purchase them. But we have antitrust laws to "bust trusts" and prevent companies from restraining competition in the sale or distribution of all goods and services, regardless of whether they are essential. In the case of cable, the 1984 Cable Act's obvious shortcoming is that Congress conferred an unregulated monopoly status on cable operators, in the hope that competition would materialize and that consumers would benefit in rates and programming. Unfortunately, while there has been some good expansion in programming, neither competition nor its benefits have truly materialized.

Rates have increased dramatically over the last several years. There are now over 50 million subscribers to cable service across the country. And analysts predict that 70 percent of American TV-viewing homes will rely on cable by the turn of the century. Some argue this is nothing more than good marketing. But when the number of subscribers appears unaffected by increasing rates and the only competitive force is "take it or leave it," the laws of economics force one to wonder whether the industry is able to take advantage of a captive market. Furthermore, more and more programming that people desire is being offered exclusively on cable and programming that previously was available on over-the-air television for free is being synoned off to cable.

Serious allegations of cable's abuse of concentrated ownership have been raised. At recent hearings before the Commerce Committee, we heard from companies that are trying to provide alternatives to cable for distributing video programming. They charge that the cable industry has cut off, or significantly restricted, the supply of desirable programming to competitors. Such control is a significant barrier to new companies entering the field of business.

Independent programmers complain that some cable operators control so many millions of subscribers and cover so many of the major markets that they can put a programmer out of business by refusing to carry its programming. Such power is of great concern, Mr. President, as it could threaten the diversity of programs and the sources of information that can reach the American public. While one must analyze all these complaints carefully and closely, they do deserve our consideration.

This bill checks the potential for abuse inherent in such vertical and horizontal concentration. It does so in three ways.

First, it prohibits programmers affiliated with cable operators from unreasonably discriminating against any distributor in the price, terms, conditions or availability of their programming. This provision attempts to remove the incentive and ability of programmers to favor their affiliated cable operators over other distributors of video programming.

Second, the bill caps the size of cable operators to 15 percent of cable subscribers nationwide. This provision aims to encourage diversity and lower the barriers to entry to new programmers.

Third, it restores to local officials the authority to regulate basic cable service in the absence of effective competition. Effective competition has been defined as the existence of another multichannel video provider in the cable franchise area.

These are not perfect solutions, Mr. President, but we must look for the best way to correct serious flaws in the cable marketplace. My preference is to promote competition. The price discipline of the competitive marketplace is superior to price-setting by Government regulation. Competition would not only lower rates, but also give consumers more choice and would be more likely to bring the public new and different services. Service quality would improve with competition and responses to customer complaints would be more rapid.

It is difficult to determine whether competition in this industry has been thwarted by the anticompetitive behavior of cable operators, but the use of limited franchises, by regulatory lag in granting competitive licenses, by economical and technological restraints, or a combination of these factors. But it has been thwarted. Head to head competition between cable companies does exist in a few areas of the country, however. The city of Mesa, AZ, for example, recently licensed a second cable company that will be providing service throughout the franchise area. In such a case, this bill's rate regulation would not apply because the consumer would have real choice. This is an important point. Once competition exists, regulation does not.

Competition from other video distributors, such as wireless cable operators, hopefully will become more viable with the availability of more programming promised by this legislation.

Many argue that additional competition could be provided by the telephone companies although they are currently prohibited from doing so by the 1984 Cable Act and Judge Greene's modified final judgment. Allowing telephone company entry into the cable market raises a host of complicated issues, including the need for safeguards to prevent any unfair advantage over competitors or harm to telephone ratepayers. There is little advantage in my mind to replacing an exclusive cable franchise with an exclusive telephone company franchise. I believe, however, that some form of telephone company entry into the cable market will certainly be part of the congressional debate on this issue.

Mr. President, cable television has greatley enriched the video landscape of this country. This legislation will help ensure that American consumers continue to reap the benefits, while we strive for even more effective ways to make the industry a competitive one. Testimony and debate on legislation will certainly result in proposed changes to this bill and I am sure it can be improved and changed. But we want this bill to be a real starting point of discussion, because there are too many complaints to ignore.●

● Mr. LIEBERMAN. Mr. President, when I was attorney general of Connecticut, the Congress passed the 1984 Cable Communications Policy Act of 1984, which effectively deregulated cable television. I predicted at that time that consumers would end up paying a steep price for deregulating an industry that had no competition.

Now, several years after implementation of the 1984 Act, it is clear that consumers have paid the price. Rates for basic cable service have increased nearly 30 percent since December 1986; 18 percent of subscribers—more than 8 million people—have suffered rate increases of 50 percent or more. Relatively few cable operators offer a discount for low-income or elderly customers, yet these are the people who depend most on cable television for information and entertainment and who are least able to afford such price increases. The escalating price of cable television is the direct result of monopoly power enjoyed by cable companies, coupled with the absence of rate regulation.

No regulation and no competition. Contrary to what cable companies claim, the availability of a few over-the-air broadcast channels or VCR's do not provide effective competition to a local monopoly that offers 30 or 40 channels. And potential competitors cannot compete on an equal footing because they do not have access to cable programming on fair and equal basis. For the cable industry to claim that competition exists is like a railroad baron claiming competition from the Pony Express.

The time has come to redress the mistakes made in 1984 and to put consumer protection back into cable television. Earlier this year, Congressman CHRISTOPHER SHAYS and I introduced legislation that would allow States and localities to regulate cable television rates again.

Momentum is clearly building in the Senate to do something about cable TV in the 101st Congress. Look at the events of this week alone. Yesterday, I testified at a Judiciary Committee hearing about the siphoning off of sports programming by cable television. Tomorrow, the Commerce Committee conducts hearings to review the 1984 Cable Act.

And today, Senator DANFORTH, along with a substantial portion of the Commerce Committee, introduces legislation that would, among other things, authorize reregulation of cable television by State and local government. I am pleased to be a cosponsor of Senator DANFORTH's bill, and I pledge to work with him to move cable reform through the Commerce Committee and to final passage next year.●

● Mr. METZENBAUM. Mr. President, I'm delighted with the bill introduced today by the ranking Republican member of the Senate Commerce Committee.

It's gratifying to see the emergence of this broad bipartisan consensus in support of protecting consumers from abuses caused by the cable monopolies. It is now absolutely clear that reforming the Cable Act is not a partisan ideological, or philosophical issue: It's simply the right thing to do.

Consumers are being ripped off by the cable monoploy. Since deregulation, basic cable prices have increased at more than four times the rate of inflation. Milions of consumers have suffered rate hikes exceeding 50 percent since deregulation. At a hearing held in my Antitrust Subcommittee last spring, the Consumer Federation of America testified that cable subscribers are being overcharged by as much as $6 billion per year.

For nearly 2 years, I've been saying that cable deregulation has been a monumental mistake. During that time, my Antitrust Subcommittee has held three hearings on cable issues. Just yesterday, my subcommittee held a hearing on the movement of sports programming from free television to cable, a trend which threatens to make access to sports solely dependent on an individual's ability to pay.

I've also been urging the Justice Department to scrutinize closely the horizontal consolidation and vertical integration that's taking place in the cable industry. I was pleased to read that Jim Rill, the Justice Department's antitrust chief, plans to take a much harder look at concentration and vertical integration in cable. The TCI-Showtime deal is a good place for him to start, but there may be other opportunities as well.

The introduction of this bill sends a strong and clear signal that there is a broad cross-section of support for passing legislation to protect cable consumers.

I'm pleased to see that two of the sections in the bill being introduced today—regarding rate regulation and vertical integration—are quite similar to provisions in my cable bills, S. 833 and S. 834.

The bill being introduced today permits local authorities to regulate cable rates unless the community is served by another cable system or some other viable multichannel provider, such as wireless cable. It also promotes competition by requiring vertically integrated cable programmers to make their programmatic available to small cable operatotrs and competing technologies at fair terms and nondiscriminatory prices.

In addition I strongly support the provisions in this bill regarding horizontal concentration and carriage of local broadcast signals. My cable antitrust bill, S. 834, also caps horizontal concentration, and I have been a cosponsor of "must carry" legislation in each of the last two Congresses.

Finally, the provisions granting cities more authority to deny cable franchise renewals are necessary to promote cable operator accountability.

Again I want to commend Senator DANFORTH for taking this action. I urge the Commerce Committee to move quickly on cable legislation, and I would suggest that if the FCC and the cable industry want to play a role, they should develop some proposals very soon. The train is leaving the station.●

Mr. PRESSLER. Mr. President, I would like to speak in support of legislation introduced today by Senator DANFORTH, myself, and 13 other Members of the Senate. The Cable Television Consumer Protection Act is a good comprehensive approach to the problems encountered by consumers as a result of the monopoly system in place today.

From October 1986 to October 1988 basic cable rates have increased 29 percent nationally and an average of 59 percent in South Dakota. This increase is unwarranted and was made possible because of the lack of both competition and regulation. One or the other must be present or there is nothing to hold rates down. We created an unregulated monopoly and this is the result.

I am particularly pleased that this legislation includes the essential elements of S. 168, a bill I introduced in January of this year. My legislation, which has been incorporated into this new bill, bars cable television programmers from discriminating among cable

operators, or other multichannel video programming distributors, in price, terms, conditions, or availability of programming.

Satellite television distributors, wireless cable operators, and small, independent cable operators all have had to compete against the large multisystem operators [MSO's] for cable television programming. But they have not been able to compete on a level playing field. But they have not been able to compete on a level playing field. The MSO's and the programmers are so corporately intertwined that outsiders in the business have found themselves paying much more for the same programming. In some cases they have found that they could not get the programming they wanted at any price.

This legislation also contains a must-carry provision, which I support. Right now, a cable system can refuse to carry any programming it chooses. We need to ensure that local broadcast channels, including public broadcasting, are carried on cable.

South Dakotans are concerned about rising cable rates. That was one of the most common complaints I heard as I traveled through the State this summer. And when rates in some South Dakota communities have increased as much as 100 percent over a 2-year period, those complaints appear to be justified.

Rural South Dakotans have an additional and more fundamental problem—availability of programming. In the smallest towns and on the farms and ranches in my State, people cannot get traditional cable television. They must rely on backyard satellite dishes or wireless cable. Consumers using these technologies must also be assured of quality programming at reasonable rates. This bill contains the technology-neutral provisions of my legislation, making it illegal to discriminate in price, terms, conditions, or availability of programming among cable operators or any of cable's competing technologies.

This bill is not perfect. Modifications will be made. Some additions may even be made. But it provides a very good framework for reasonable rates and fair competition in the cable television industry. The hearings the Communications Subcommittee will hold tomorrow and Friday should help clarify some of the remaining areas of contention.

I urge my colleagues to support our efforts to increase competition and restrain rates in the cable television industry. Legislation such as this is necessary to correct the unregulated monopoly situation we have today.

By Mr. LEVIN (for himself and Mr. RUDMAN):

S. 1882. An act to ensure ethics in Government, and for other purposes; to the Committee on Governmental Affairs.

ETHICS REFORM ACT

Mr. LEVIN. Mr. President, I am pleased to introduce the Ethics Reform Act of 1989 on behalf of myself and my colleague, Senator RUDMAN. This would be the first comprehensive reform of the ethics laws in more than a decade. The bill imposes tough standards on Members and staff of Congress and strengthens ethics laws that apply to the judicial and legislative branches. It addresses key ethics issues ranging from post-employment lobbying restrictions to financial disclosure to gifts and travel restrictions. As the first comprehensive reform of the ethics laws in more than a decade, it contains numerous reforms and clarifications that are long overdue.

The Ethics Reform Act of 1989 is the product of months of review conducted by a Democratic Ethics Task Force, which I chaired, and a Republican Ethics Task Force, which was chaired by Senator RUDMAN. As always, working with Senator RUDMAN has been rewarding and stimulating. He is an extraordinary legislator, with a sure sense of ethics and common sense. Senator RUDMAN and I have had many productive meetings over the last months, and I am pleased that we have been able to address these issues on a bipartisan and cooperative basis. The issue of ethics is one on which we should all be able to agree, and I am pleased that we have been able to do so.

Let us look at what this bill does.

First, for the first time we are bringing Members of Congress and top congressional staff under the post-employment lobbying restrictions of 18 U.S.C. 207. Members will not be able, for 1 year after they leave Congress, to lobby anywhere in the legislative branch. Top congressional staff will be barred from lobbying their former offices and key people with whom they worked.

We are tightening the Senate travel rule. For the first time, we are imposing a limit on the length of travel a Member can take. Senators would be limited to 2 nights and 3 days for domestic trips and 6 nights and 7 days for foreign trips, excluding travel time. Of course, Mr. President, this is other than official trips. Moreover, we are making clear that a Member may take only a spouse or a Senate aide on such an unofficial trip that is paid for by other for the length of time which I have indicated. Any other family member would be treated separately.

We are tightening the Senate gift rule. Right now, there is no limit to the amount of entertainment a Senator can receive from anybody, since we do not treat entertainment as a gift. The rule change we are proposing would bring gifts of entertainment under the restrictions of all other gifts. Another change would address the amount of gifts a Senator can receive in any one year. Under the current rule, we are prohibited from taking more than $100 from a person with a direct interest in legislation in any one year. The change this bill makes would be to set a cap—a $300 cap—on what a Member can take from anyone else, excluding relatives. We do increase the de minimis amount, below which gifts are acceptable, in order to adjust for inflation over the last 10 years. We would adjust the current $35 figure to $75.

We are increasing our responsibilities for financial disclosure and bringing all three branches of Government under the same provisions for the first time. Currently the top category for disclosing income and assets is $250,000 and above. This bill provides for additional categories for disclosure of income and assets. We impose a $200 penalty for late filing. We narrow the disclosure exemption for loans from family members. We increase the civil penalties for false filings and failure to file. We require Members and staff of Congress to file termination reports—that is a financial disclosure form when they leave. We expand the number of congressional staff required to file, down to the GS-15 level. Like the change in the gift rule, we adjust the de minimis amount for disclosure from $35 to $75 for inflation.

The bill also establishes a new statutory prohibition on the receipt by a lobbyist of a lobbying fee which is contingent upon action by the Federal Government. This is an issue that Senator THURMOND and I had discussed in a bill introduced earlier this year, and I am pleased we are able to include it in this package.

In addition, we clarify a number of provisions in the criminal ethics laws and enhance enforcement by providing a number of alternative remedies.

Mr. President, I would like to extend my thanks to the majority leader and the Republican leader, and particularly on our side to Senator MITCHELL, who named me back in April to head the Democratic task force, for the high priority that he has given to ethics issues and for the encouragement and support he has given us, just as Senator DOLE has done on the Republican side, in our efforts to put this reform package together. I would also like to thank my colleagues on the Task Force, Senators BUMPERS, FORD, FOWLER, GLENN, GRAHAM, and METZENBAUM, for the extraordinary effort they made in considering these issues over the past 6 months.

I would also like to thank Senators THURMOND and METZENBAUM for their work on the postemployment lobbying section. The provisions in this bill come from the previous effort made

by these Senators on this issue during the last Congress, an effort which reached fruition in a bill that the Senate passed. They deserve credit and thanks for identifying and seeking to close a major gap in our ethics laws.

I ask unanimous consent, Mr. President, that the text of the section-by-section analysis of the bill, and the bill be printed in full, in that order, in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1882

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Ethics Reform Act of 1989".

SEC. 2. TABLE OF CONTENTS.

Sec. 2. Table of contents.

TITLE I—POST EMPLOYMENT RESTRICTIONS ON THE EXECUTIVE AND LEGISLATIVE BRANCHES

Sec. 101. Restrictions on postemployment activities.
Sec. 102. Effective date.
Sec. 103. Severability.

TITLE II—FINANCIAL DISCLOSURE OF FEDERAL PERSONNEL

Sec. 201. Repeal of titles II and III of the Ethics in Government Act of 1978.
Sec. 202. Financial disclosure requirements of Federal personnel.
Sec. 203. Transmittal of financial disclosure reports.
Sec. 204. President's commission on the Federal appointment process.

TITLE III—GIFTS AND TRAVEL

Sec. 301. Gifts to superiors.
Sec. 302. Travel acceptance authority.
Sec. 303. Gifts to Federal employees.
Sec. 304. Amendments to the Senate Rules.

TITLE IV—AMENDMENTS TO TITLE 18 OF THE UNITED STATES CODE

Sec. 401. Amending title 18, United States Code Sec. 202.
Sec. 402. Amending 18 U.S.C. 203.
Sec. 403. Amending 18 U.S.C. 204.
Sec. 404. Amending 18 U.S.C. 205.
Sec. 405. Amending 18 U.S.C. 208.
Sec. 406. Amending 18 U.S.C. 209.
Sec. 407. Penalties and injunctions.
Sec. 408. Prohibition on contingency fees for lobbyists of the executive and legislative branches.

TITLE V—OTHER ETHICS REFORMS

Sec. 501. Referral of ethics violations by the Senate Ethics Committee to the General Accounting Office for Investigation.
Sec. 502. Deferral of capital gains for individuals divesting assets to avoid a conflict of interest.
Sec. 503. Prohibiting members of congress from converting excess campaign funds.
Sec. 504. Amendment to 2 U.S.C. 441i.
Sec. 505. Repeal of certain obsolete provisions.

TITLE VI—RULEMAKING POWER OF THE CONGRESS.

Sec. 601. Rulemaking power of the Congress.

TITLE I—POST EMPLOYMENT RESTRICTIONS ON THE EXECUTIVE AND LEGISLATIVE BRANCHES

SEC. 101. RESTRICTIONS ON POSTEMPLOYMENT ACTIVITIES.

(a) RESTRICTIONS.—Section 207 of title 18, United States Code, is amended to read as follows:

"§ 207. Restrictions on former officers, employees, and elected officials of the executive and legislative branches

"(a) RESTRICTIONS ON ALL OFFICERS AND EMPLOYEES OF THE EXECUTIVE BRANCH AND CERTAIN OTHER AGENCIES.—

"(1) PERMANENT RESTRICTIONS ON REPRESENTATION ON PARTICULAR MATTERS.—Any person who is an officer or employee of the executive branch of the United States Government (including any independent agency of the United States and any special Government employee), or of the District of Columbia, who, after the termination of his or her service or employment with the United States Government or the District of Columbia, as the case may be, makes, with the intent to influence, any communication to or appearance before any officer or employee of any department, agency, court, court-martial, or commission of the United States or the District of Columbia, as the case may be, on behalf of any other person (except the United States) in connection with a particular matter—

"(A) in which the United States is a party or has a direct interest,

"(B) in which the person participated personally and substantially as such officer or employee, and

"(C) which involved a specific party or specific parties at the time of such participation,

shall be punished as provided in subsection (l).

"(2) TWO-YEAR RESTRICTIONS CONCERNING PARTICULAR MATTERS UNDER OFFICIAL RESPONSIBILITY.—Any person subject to the restrictions contained in paragraph (1) who, within 2 years after the termination of his or her service or employment with the United States Government makes, with the intent to influence, any communication to or appearance before any officer or employee of any department, agency, court, court-martial, or commission of the United States or the District of Columbia, on behalf of any other person (except the United States) in connection with a particular matter—

"(A) in which the United States is a party or has a direct interest,

"(B) which such person knows or reasonably should know was actually pending under his or her official responsibility as such officer or employee with a period of 1 year before the termination of his or her service or employment with the United States Government or the District of Columbia, and

"(C) which involved a specific party or specific parties at the time it was so pending,

shall be punished as provided in subsection (l).

"(b) TWO-YEAR RESTRICTIONS ON AIDING OR ADVISING.—Any person who is a former officer or employee subject to the restrictions contained in subsection (a)(1) and who personally and substantially participated in any trade or treaty negotiation on behalf of the United States within the 2-year period preceding the date on which his or her service or employment with the United States terminates, shall not represent, aid, or advise any other person (other than the United States) concerning such trade or treaty negotiation for 2 years after his or her service or employment with the United States Government terminates. Any person who violates this subsection shall be punished as provided in subsection (l).

"(c) ONE-YEAR RESTRICTIONS ON CERTAIN SENIOR PERSONNEL OF THE EXECUTIVE BRANCH AND INDEPENDENT AGENCIES.—

"(1) RESTRICTIONS.—In addition to the restrictions set forth in subsections (a) and (b), any person who is an officer or employee of the executive branch or (including an independent agency) who is referred to in paragraph (2), and who, within 1 year after the termination of his or her service or employment as such officer or employee, makes, with the intent to influence, any communication to or appearance before any officer or employee of the department or agency in which such person served within 1 year before such termination, on behalf of anyone other than the United States in connection with any matter which is pending before such department or agency, or any matter on which such person seeks official action by any officer or employee of such department or agency, shall be punished as provided in subsection (l).

"(2) PERSONS TO WHOM RESTRICTIONS APPLY.—(A) Paragraph (1) shall apply to a person (other than a person subject to the restrictions of subsection (d))—

"(i) employed at a rate of pay fixed according to subchapter II of chapter 53 of title 5, or a comparable or greater rate of pay under other authority,

"(ii) employed in a position which is not referred to in clause (i) and for which the basic rate of pay is equal to or greater than the basic rate of pay payable for GS-17 of the General Schedule,

"(iii) is appointed by the President to a position under section 105(a)(2)(B) of title 3 or by the Vice President to a position under section 106(a)(1)(B) of title 3,

"(iv) employed in a position which is established within the Senior Executive Service pursuant to the Civil Service Reform Act of 1978, or

"(v) employed in a position which is held by an active duty commissioned officer of the uniformed services who is serving in a grade or rank for which the pay grade (as specified in section 201 of title 37) is pay grade O-7 or above.

"(B) Paragraph (1) shall not apply to a special Government employee who serves less than 60 days in the 1 year period before his or her service or employment as such employee terminates.

"(d) RESTRICTIONS ON VERY SENIOR PERSONNEL OF THE EXECUTIVE BRANCH AND INDEPENDENT AGENCIES.—

"(1) RESTRICTIONS.—In addition to the restrictions set forth in subsection (a) and (b), any person who—

"(A) serves in the position of President or Vice President of the United States,

"(B) is appointed to a position in the executive branch or an independent agency which is listed in section 5312 or 5313 of title 5, or

"(C) is appointed by the President to a position under section 105(a)(2)(A) of title 3 or by the Vice President to a position under section 106(a)(1)(A) of title 3,

and who, within 1 year after the termination of that person's service in that position, makes, with the intent to influence, any communication to or appearance before any person described in paragraph (2), on behalf of anyone other than the United States in

connection with any matter which is pending before any department, agency, or other entity of the United States Government, or any matter on which such person seeks official action by the United States Government or any officer or employee thereof, shall be punished as provided in subsection (l).

"(2) ENTITIES TO WHICH RESTRICTIONS APPLY.—The departments, agencies, and persons referred to in paragraph (1) with respect to appearances or communications by a person in a position described in subparagraph (A), (B), (C), or (D) of paragraph (1) are—

"(A) any officer or employee of any department or agency in which such person served in such position within a period of 1 year before such person's service or employment with the United States Government terminated,

"(B) any other person appointed to a position in the executive branch which is listed in section 5312, 5313, 5314, 5315, or 5316 of title 5, and

"(C) in the case of a former President, any officer or employee of any department or agency in the executive branch of the United States Government, including any independent agency.

"(e) RESTRICTIONS ON MEMBERS OF CONGRESS AND OFFICERS AND EMPLOYEES OF THE LEGISLATIVE BRANCH.—

"(1) MEMBERS OF CONGRESS AND ELECTED OFFICERS.—(A) Any person who is a Member of Congress or an elected officer of either House of Congress and who, within 1 year after that person leaves office makes, with the intent to influence, any communication to or appearance before any of the persons described in subparagraph (B), on behalf of anyone other than the United States in connection with any matter which is pending before the Congress or any matter on which such former Member of Congress or elected officer seeks action by the Congress or by a Member or an officer or employee of either House of Congress, in his or her official capacity, shall be punished as provided in subsection (l).

"(B) The persons referred to in subparagraph (A) with respect to appearances or communications by a former Member of Congress are any Member of Congress, elected officer, or employee of either House of Congress, or employee of any legislative branch office.

"(C) The persons referred to in subparagraph (A) with respect to appearances or communications by a former elected officer are any Member or elected officer or employee of the House of Congress in which the elected officer served.

"(2) PERSONAL STAFF.—(A) Any person who is an employee of a Senator or an employee of a Member of the House of Representatives and who, within 1 year after the termination of that employment makes, with the intent to influence, any communication to or appearance before any of the persons described in subparagraph (B), on behalf of anyone other than the United States in connection with any matter which is pending before the Congress or any matter on which such former employee seeks action by the Congress or by a Member or an officer or employee of either House of Congress, in his or her official capacity, shall be punished as provided in subsection (l).

"(B) The persons referred to in subparagraph (A) with respect to appearances or communications by a person who is a former employee are the following:

"(i) the Senator or Member of the House of Representatives for whom that person was an employee;

"(ii) any employee of that Senator or Member of the House of Representatives; and

"(iii) any employee of the committees and subcommittees on which the Member or Senator serves as either Chairman or Ranking Minority Member.

"(3) COMMITTEE STAFF.—Any person who is an employee of a committee of Congress and who, within 1 year after the termination of that person's employment as such employee, makes, with the intent to influence, any communication to or appearance before any person who is a Member or an employee of that committee of Congress or any employee of such Member, or who was a Member of the committee at the time such employee was employed by the committee, on behalf of anyone other than the United States in connection with any matter which is pending before the Congress or any matter on which such former employee seeks action by the Congress or by a Member of Congress, in his or her official capacity, shall be punished as provided in subsection (l).

"(4) LEADERSHIP STAFF.—(A) Any person who is an employee on the leadership staff of the House of Representatives or an employee on the leadership staff of the Senate and who, within 1 year after the termination of that person's employment on such staff, makes, with the intent to influence, any communication to or appearance before any of the persons described in subparagraph (B), on behalf of anyone other than the United States in connection with any matter on which such former employee seeks action by the Congress or by a Member of Congress, or an officer or employee of either House of Congress, in his or her official capacity, shall be punished as provided in subsection (l).

"(B) The persons referred to in subparagraph (A) with respect to appearances or communications by a former employee are the following:

"(i) in the case of a former employee on the leadership staff of the House of Representatives, those persons are any Member of the leadership of the House of Representatives, and any employee of such Member, and any employee on the leadership staff of the House of Representatives; and

"(ii) in the case of a former employee on the leadership staff of the Senate, those persons are any Member of the leadership of the Senate, and any employee of such Member, and any employee on the leadership staff of the Senate.

"(5) OTHER LEGISLATIVE OFFICES.—(A) Any person who is an employee of any other office in the legislative branch and who, within 1 year after the termination of that person's employment on such staff, makes, with the intent to influence, any communication to or appearance before any of the persons described in subparagraph (B), on behalf of anyone other than the United States in connection with any matter which is pending before such office or any matter on which such former employee seeks action by any officer or employee of such office in his or her official capacity shall be punished as provided in subsection (l).

"(B) The persons referred to in subparagraph (A) with respect to appearances or communications by a former employee are employees and officers of the legislative office of the employee.

"(6) LIMITATION ON RESTRICTIONS.—The restrictions contained in paragraphs (2), (3), (4), and (5) apply only to acts by a former employee who, for at least 60 days, in the aggregate, during the 1-year period before that former employee's service as such employee terminated, was paid for such service at a basic rate of pay equal to or greater than the basic rate of pay payable for GS-17 of the General Schedule under section 5332 of title 5.

"(7) DEFINITIONS.—As used in this subsection—

"(A) the term 'committee of Congress' includes standing committees, joint committees, and select committees;

"(B) a person is an employee of a House of Congress if that person is an employee of the Senate or an employee of the House of Representatives;

"(C) the term 'employee of the House of Representatives' means an employee of a Member of the House of Representatives, an employee of a committee of the House of Representatives, an employee of a joint committee of the Congress whose pay is disbursed by the Clerk of the House of Representatives, and an employee on the leadership staff of the House of Representatives;

"(D) the term 'employee of the Senate' means an employee of a Senator, an employee of a committee of the Senate, an employee of a joint committee of the Congress whose pay is disbursed by the Secretary of the Senate, and an employee on the leadership staff of the Senate;

"(E) a person is an employee of a Member of the House of Representatives if that person is an employee of a Member of the House of Representatives under the clerk hire allowance;

"(F) a person is an employee of a Senator if that person is an employee in a position in the office of a Senator;

"(G) the term 'employee of any other legislative office of the Congress' means an officer or employee of the Architect of the Capitol, the United States Botanic Garden, the General Accounting Office, the Government Printing Office, the Library of Congress, the Office of Technology Assessment, the Congressional Budget Office, the Copyright Royalty Tribunal, the United States Capitol Police, and any other agency, entity or office in the legislative branch not covered by paragraph (1), (2), (3), or (4) of this subsection;

"(H) the term 'employee on the leadership staff of the House of Representatives' means an employee of the office of a Member of the leadership of the House of Representatives described in subparagraph (K), and any elected minority employee of the House of Representatives;

"(I) the term 'employee on the leadership staff of the Senate' means an employee of the office of a Member of the leadership of the Senate described in subparagraph (L);

"(J) the term 'Member of Congress' means a Senator or a Member of the House of Representatives;

"(K) the term 'Member of the House of Representatives' means a Representative in, or a Delegate or Resident Commissioner to, the Congress;

"(L) the term 'Member of the leadership of the House of Representatives' means the Speaker, majority leader, minority leader, majority whip, minority whip, chief deputy majority whip, chief deputy minority whip, Democratic Steering Committee, chairman and vice chairman of the Democratic Caucus, chairman, vice chairman, and secretary of the Republican Conference, chairman of the Republican Research Committee, and chairman of the Republican Policy

Committee, of the House of Representatives or any similar position created after the effective date of this section; and

"(M) the term 'Member of the leadership of the Senate' means the Vice President, and the President pro tempore, Deputy President pro tempore, majority leader, minority leader, majority whip, minority whip, chairman and secretary of the Conference of the Majority, chairman and secretary of the Conference of the Minority, chairman and co-chairman of the Majority Policy Committee, and chairman of the Minority Policy Committee, of the Senate (or any similar position created after the effective date of this section).

"(f) AGENTS COMMUNICATING ON BEHALF OF A FORMER OFFICER OR EMPLOYEE.—It shall be unlawful for any person knowingly, in the course of representing any other person other than the United States, by any oral or written communication to any Member, officer, or employee of any department, agency, commission, court, or legislative entity of the United States, to communicate to such Member, officer, or employee that such communication is on behalf of a former Member, officer, or employee covered under subsection (a), (c), (d), or (e) of this section if such a communication by the former Member, officer, or employee is prohibited by subsection (a), (c), (d), or (e).

"(g) RESTRICTIONS RELATING TO FOREIGN ENTITIES.—

"(1) RESTRICTIONS.—Any person who is subject to the restrictions contained in subsection (c), (d), or (e) and who knowingly, within 1 year after leaving the position, office, or employment referred to in subsection (c), (d), or (e), as the case may be—

"(A) represents the interests of a foreign entity before any officer or employee of any department or agency of the Government of the United States with the intent to influence a decision of such officer or employee in carrying out his or her official duties, or

"(B) aids or advises a foreign entity with the intent to influence a decision of any officer or employee of any department or agency of the Government of the United States, in carrying out his or her official duties,

shall be punished as provided in subsection (l).

"(2) DEFINITIONS.—For purposes of this subsection—the term 'foreign entity' means the government of a foreign country as defined in section 1(e) of the Foreign Agents Registration Act of 1938 or a foreign political party as defined in section 1(f) of the Foreign Agents Registration Act of 1938.".

"(h) SPECIAL RULES FOR DETAILEES.—For purposes of this section, a person covered by this section who is detailed from one department, agency, or other entity to another department, agency, or other entity shall, during the period such person is detailed, be deemed to be an officer or employee of both departments, agencies, or such entities.

"(i) DESIGNATIONS OF SEPARATE STATUTORY AGENCIES AND BUREAUS.—

"(1) DESIGNATIONS.—For purposes of subsection (c) and except as provided in paragraph (2), whenever the Director of the Office of Government Ethics determines that a separate statutory agency or bureau within a department or agency in the executive branch exercises functions which are distinct and separate from the remaining functions of the department or agency, the Director shall by rule designate such agency or bureau as a separate department or agency.

"(2) INAPPLICABILITY OF DESIGNATIONS.—No agency or bureau within the Executive Office of the President may be designated under paragraph (1) as a separate department or agency. Such designation shall not apply to persons referred to in subsection (c)(2)(A).

"(j) DEFINITIONS.—For purposes of this section—

"(1) The term 'intent to influence' means the intent to affect any official action by a Government entity of the United States through any officer or employee of the United States including Members of Congress.

"(2) The term 'officer or employee' includes the President and Vice President.

"(3) The term 'participated personally and substantially' means an action taken as an officer or employee, through decision, approval, disapproval, recommendation, the rendering of advice, investigation or other such action.".

"(4) The term 'particular matter' includes any investigation, application, request for a ruling or determination, rulemaking, contract, controversy, claim, charge, accusation, arrest, judicial or other proceeding.

"(k) EXCEPTIONS.—

"(1) OFFICIAL GOVERNMENT DUTIES.—The restrictions contained in subsections (a), (c), (d), and (e) shall not apply to acts done in carrying out official duties as an officer or employee of the United States Government or as an elected official of a State or local government.

"(2) STATE AND LOCAL GOVERNMENTS AND INSTITUTIONS, HOSPITALS, AND ORGANIZATIONS.—The restrictions contained in subsections (c), (d), and (e) shall not apply to acts done in carrying out official duties as an employee of—

"(A) an agency or instrumentality of a State or local government if the appearance, communication, or representation is on behalf of such government, or

"(B) an accredited, degree-granting institution of higher education, as defined in section 1201(a) of the Higher Education Act of 1965, or a hospital or medical research organization described in section 501(c)(3) of the Internal Revenue Code of 1986 and exempt from tax under section 501(a) of such Code, if the appearance, communication, or representation is related to an effort to secure a grant or award through a competitive bidding process.

"(3) INTERNATIONAL ORGANIZATIONS.—The restrictions contained in subsections (c), (d), and (e) shall not apply to an appearance or communication on behalf of, or advice or aid to, an international organization of which the United States is a member.

"(4) PERSONAL MATTERS AND PUBLIC SPEECHES AND APPEARANCES.—The restrictions contained in subsections (c), (d), and (e) shall not apply to appearances or communications by a former officer or employee concerning matters of a personal and individual nature, such as personal income taxes or pension benefits; nor shall the prohibition of that subsection prevent a former officer or employee from making or providing a statement, which is based on the former officer's or employee's own special knowledge in the particular area that is the subject of the statement, provided that no compensation is thereby received, other than that regularly provided for by law or regulation for witnesses.

"(5) EXCEPTION FOR SCIENTIFIC OR TECHNOLOGICAL INFORMATION.—The restrictions contained in subsections (a), (c), (d), and (e) shall not apply with respect to the making of communications solely for the purpose of furnishing scientific or technological information, if such communications are made under procedures acceptable to the department or agency concerned or if the head of the department or agency concerned with the particular matter, in consultation with the Director of the Office of Government Ethics, makes a certification, published in the Federal Register, that the former officer or employee has outstanding qualifications in a scientific, technological, or other technical discipline, and is acting with respect to a particular matter which requires such qualifications, and that the national interest would be served by the participation of the former officer or employee.

"(6) EXCEPTION FOR TESTIMONY.—Nothing in this section shall prevent a former Member of Congress or officer or employee of the executive or legislative branch or an independent agency (including the President, the Vice President and any special Government employee) from giving testimony under oath, or from making statements required to be made under penalty of perjury. Notwithstanding the preceding sentence, a former officer or employee subject to the restrictions contained in subsection (a)(1) with respect to a particular matter may not, except pursuant to court order, serve as an expert witness for anyone other than the United States in that matter.

"(l) PENALTIES AND REMEDIES FOR VIOLATIONS.—Any person who engages in conduct prohibited by this section shall be subject to the penalties provided in section 216.".

(b) CONFORMING AMENDMENT.—The item relating to section 207 in the table of sections at the beginning of chapter 11 of title 18, United States Code, is amended to read as follows:

"207. Restrictions on former officers, employees, and elected officials of the executive and legislative branches.".

SEC. 102. EFFECTIVE DATE.

(a) IN GENERAL.—Subject to subsection (b), this Act and the amendments made by this Act take effect 9 months after the date of the enactment of this Act.

(b) EFFECT ON EMPLOYMENT.—(1) The amendments made by this Act apply only to persons whose service as a Member of Congress or an officer or employee to which such amendments apply terminates on or after the effective date of such amendments.

(2) With respect to service as an officer or employee which terminates before the effective date of this Act, section 207 of title 18, United States Code, as in effect at the time of the termination of such service, shall continue to apply, on and after such effective date, with respect to such service.

TITLE II—FINANCIAL DISCLOSURE OF FEDERAL PERSONNEL

SEC. 201. REPEAL OF TITLES II AND III OF THE ETHICS IN GOVERNMENT ACT OF 1978.

Titles II and III of the Ethics in Government Act of 1978 (5 U.S.C. App.; 28 U.S.C. App.) are repealed.

SEC. 202. FINANCIAL DISCLOSURE REQUIREMENTS OF FEDERAL PERSONNEL.

Title I of the Ethics in Government Act of 1978 (2 U.S.C. 701 et seq.) is amended to read as follows:

"TITLE I—FINANCIAL DISCLOSURE REQUIREMENTS OF FEDERAL PERSONNEL

"PERSONS REQUIRED TO FILE

"SEC. 101. (a) Within thirty days of assuming the position of an officer or employee described in subsection (f), an individual shall file a report containing the information described in section 102(b) unless the individual has left another position described in subsection (f) within thirty days prior to assuming such new position or has already filed a report under this title with respect to nomination for the new position or as a candidate for the position.

"(b)(1) Within five days of the transmittal by the President to the Senate of the nomination of an individual (other than an individual nominated for appointment to a position as a Foreign Service Officer or a grade or rank in the uniformed services for which the pay grade prescribed by section 201 of title 37, United States Code, is O-6 or below) to a position, appointment to which requires the advice and consent of the Senate, such individual shall file a report containing the information described in section 102(b). Such individual shall, not later than the date of the first hearing to consider the nomination of such individual, make current the report filed pursuant to this paragraph by filing the information required by section 102(a)(1)(A) with respect to income and honoraria received as of the date which occurs five days before the date of such hearing. Nothing in this Act shall prevent any Congressional committee from requesting, as a condition of confirmation, any additional financial information from any Presidential nominee whose nomination has been referred to that committee.

"(2) An individual whom the President or the President-elect has publicly announced he intends to nominate to a position may file the report required by paragraph (1) at any time after that public announcement, but not later than is required under the first sentence of such paragraph.

"(c) Within thirty days of becoming a candidate in a calendar year for nomination or election to the office of President, Vice President, or Member of Congress as determined by the Federal Election Commission, or on or before May 15 of that calendar year, whichever is later, and on or before May 15 of each successive year an individual continues to be a candidate, an individual other than an incumbent President, Vice President, or Member of Congress shall file a report containing the information described in section 102(b). Notwithstanding the preceding sentence, in any calendar year in which an individual continues to be a candidate for any office but all elections for such office relating to such candidacy were held in prior calendar years, such individual need not file a report unless he becomes a candidate for another vacancy in that office or another office during that year.

"(d) Any individual who is an officer or employee described in subsection (f) during any calendar year and performs the duties of his position or office for a period in excess of sixty days in that calendar year shall file on or before May 15 of the succeeding year a report containing the information described in section 102(a).

"(e) Any individual who occupies a position described in subsection (f) shall, on or before the thirtieth day after termination of employment in such position, file a report containing the information described in section 102(a) covering the preceding calendar year if the report required by subsection (d) has not been filed and covering the portion of the calendar year in which such termination occurs up to the date the individual left such office or position, unless such individual has accepted employment in another position described in subsection (f).

"(f) The officers and employees referred to in subsections (a), (d), and (e) are—

"(1) the President;

"(2) the Vice President;

"(3) each officer or employee in the executive branch, including a special Government employee as defined in section 202 of title 18, United States Code, whose position is classified at GS-16 or above of the General Schedule prescribed by section 5332 of title 5, United States Code, or the rate of basic pay for which is fixed (other than under the General Schedule) at a rate equal to or greater than the minimum rate of basic pay fixed for GS-16; each member of a uniformed service whose pay grade is at or in excess of O-7 under section 201 of title 37, United States Code; and each officer or employee in any other position determined by the Director of the Office of Government Ethics to be of equal classification;

"(4) each employee appointed pursuant to section 3105 of title 5, United States Code;

"(5) any employee not described in paragraph (3) who is in a position in the executive branch which is excepted from the competitive service by reason of being of a confidential or policymaking character, except that the Director of the Office of Government Ethics may, by regulation, exclude from the application of this paragraph any individual, or group of individuals, who are in such positions, but only in cases in which the Director determines such exclusion would not affect adversely the integrity of the Government or the public's confidence in the integrity of the Government;

"(6) the Postmaster General, the Deputy Postmaster General, each Governor of the Board of Governors of the United States Postal Service and each officer or employee of the United States Postal Service or Postal Rate Commission whose basic rate of pay is equal to or greater than the minimum rate of basic pay fixed for GS-16;

"(7) the Director of the Office of Government Ethics and each designated agency official; and

"(8) any employee not described in paragraph (3), employed in the Executive Office of the President who holds a commission of appointment from the President;

"(9) a Member of Congress as defined under section 109(12);

"(10) an officer or employee of the Congress as defined under section 109(13);

"(11) a judicial officer as defined under section 109(10); and

"(12) a judicial employee as defined under section 109(8).

"(g) Reasonable extensions of time for filing any report may be granted under procedures prescribed by the supervising ethics office for each branch, but the total of such extensions shall not exceed ninety days.

"(h) The provisions of subsections (a), (b), and (e) shall not apply to an individual who, as determined by the designated agency official or Secretary concerned (or in the case of a Presidential appointee under subsection (b), the Director of the Office of Government Ethics), the congressional ethics committees, or the Judicial Ethics Committee, is not reasonably expected to perform the duties of his office or position for more than sixty days in a calendar year, except that if such individual performs the duties of his office or position for more than sixty days in a calendar year—

"(1) the report required by subsections (a) and (b) shall be filed within fifteen days of the sixtieth day, and

"(2) the report required by subsection (e) shall be filed as provided in such subsection.

"(i) The supervising ethics office for each branch may grant a publicly available request for a waiver of any reporting requirement under this section for an individual who is expected to perform or has performed the duties of his office or position less than one hundred and thirty days in a calendar year, but only if the supervising ethics office determines that—

"(1) such individual is not a full-time employee of the Government,

"(2) such individual is able to provide services specially needed by the Government,

"(3) it is unlikely that the individual's outside employment or financial interests will create a conflict of interest, and

"(4) public financial disclosure by such individual is not necessary in the circumstances.

"CONTENTS OF REPORTS

"SEC. 102. (a) Each report filed pursuant to section 101(d) and (e) shall include a full and complete statement with respect to the following:

"(1)(A) The source, type, and amount or value of income (other than income referred to in subparagraph (B)) from any source (other than from current employment by the United States Government), and the source, date, and amount of honoraria from any source, received during the preceding calendar year, aggregating $200 or more in value.

"(B) The source and type of income which consists of dividends, rents, interest, and capital gains, received during the preceding calendar year which exceeds $200 in amount or value, and an indication of which of the following categories the amount or value of such item of income is within:

"(i) not more than $1,000,

"(ii) greater than $1,000 but not more than $2,500,

"(iii) greater than $2,500 but not more than $5,000,

"(iv) greater than $5,000 but not more than $15,000,

"(v) greater than $15,000 but not more than $50,000,

"(vi) greater than $50,000 but not more than $100,000,

"(vii) greater than $100,000 but not more than $1,000,000, or

"(viii) greater than $1,000,000.

"(2)(A) The identity of the source and a brief description of any gifts of transportation, lodging, food, or entertainment aggregating $250 or more in value received from any source other than a relative of the reporting individual during the preceding calendar year, except that any food, lodging, or entertainment received as personal hospitality of any individual need not be reported, and any gift with a fair market value of $75 or less need not be aggregated for purposes of this subparagraph.

"(B) The identity of the source, a brief description, and the value of all gifts other than transportation, lodging, food, or entertainment aggregating $100 or more in value received from any source other than a relative of the reporting individual during the preceding calendar year, except that any gift with a fair market value of $75 or less need not be aggregated for purposes of this subparagraph.

"(C) The identity of the source and a brief description of reimbursements received

from any source aggregating $250 or more in value and received during the preceding calendar year.

"(D) In an unusual case, a gift need not be aggregated under subparagraph (A) or (B) if a publicly available request for a waiver is granted.

"(3) The identity and category of value of any interest in property held during the preceding calendar year in a trade or business, or for investment or the production of income, which has a fair market value which exceeds $1,000 as of the close of the preceding calendar year, excluding any personal liability owed to the reporting individual by a spouse, parent, brother, sister, or child or any deposits aggregating $5,000 or less in a personal savings account. For purposes of this paragraph, a personal savings account shall include any certificate of deposit or any other form of deposit in a bank, savings and loan association, credit union, or similar financial institution.

"(4) The identity and category of value of the total liabilities owed to any creditor other than a relative which exceed $10,000 at any time during the preceding calendar year, excluding—

"(A) any mortgage secured by real property which is a personal residence of the reporting individual or his spouse; and

"(B) any loan secured by a personal motor vehicle, household furniture, or appliances, which loan does not exceed the purchase price of the item which secures it.

With respect to revolving charge accounts, only those with an outstanding liability which exceeds $10,000 as of the close of the preceding calendar year need be reported under this paragraph.

"(5) Except as provided in this paragraph, a brief description, the date, and category of value of any purchase, sale or exchange during the preceding calendar year which exceeds $1,000—

"(A) in real property, other than property used solely as a personal residence of the reporting individual or his spouse; or

"(B) in stocks, bonds, commodities futures, and other forms of securities.

Reporting is not required under this paragraph of any transaction solely by and between the reporting individual, his spouse, or dependent children.

"(6)(A) The identity of all positions held on or before the date of filing during the current calendar year (and, for the first report filed by an individual, during the two-year period preceding such calendar year) as an officer, director, trustee, partner, proprietor, representative, employee, or consultant of any corporation, company, firm, partnership, or other business enterprise, any nonprofit organization, any labor organization, or any educational or other institution other than the United States. This subparagraph shall not require the reporting of positions held in any religious, social, fraternal, or political entity and positions solely of an honorary nature.

"(B) If any person, other than the United States Government, paid a nonelected reporting individual compensation in excess of $5,000 in any of the two calendar years prior to the calendar year during which the individual files his first report under this title, the individual shall include in the report—

"(i) the identity of each source of such compensation; and

"(ii) a brief description of the nature of the duties performed or services rendered by the reporting individual for each such source.

The preceding sentence shall not require any individual to include in such report any information which is considered confidential as a result of a privileged relationship, established by law, between such individual and any person nor shall it require an individual to report any information with respect to any person for whom services were provided by any firm or association of which such individual was a member, partner, or employee unless such individual was directly involved in the provision of such services.

"(7) A description of the date, parties to, and terms of any agreement or arrangement with respect to (A) future employment; (B) a leave of absence during the period of the reporting individual's Government service; (C) continuation of payments by a former employer other than the United States Government; and (D) continuing participation in an employee welfare or benefit plan maintained by a former employer.

"(b) Each report filed pursuant to subsections (a), (b), and (c) of section 101 shall include a full and complete statement with respect to the information required by—

"(1) paragraph (1) of subsection (a) for the year of filing and the preceding calendar year,

"(2) paragraphs (3) and (4) of subsection (a) as of the date specified in the report but which is less than thirty-one days before the filing date, and

"(3) paragraphs (6) and (7) of subsection (a) as of the filing date but for periods described in such paragraphs.

"(c) In the case of any individual described in section 101(e), any reference to the preceding calendar year shall be considered also to include that part of the calendar year of filing up to the date of the termination of employment.

"(d)(1) The categories for reporting the amount or value of the items covered in paragraphs (3), (4), and (5) of subsection (a) are as follows:

"(A) not more than $15,000;

"(B) greater than $15,000 but not more than $50,000;

"(C) greater than $50,000 but not more than $100,000;

"(D) greater than $100,000 but not more than $250,000;

"(E) greater than $250,000 but not more than $500,000;

"(F) greater than $500,000 but not more than $1,000,000; and

"(G) greater than $1,000,000.

"(2) For the purposes of paragraph (3) of subsection (a) if the current value of an interest in real property (or an interest in a real estate partnership) is not ascertainable without an appraisal, an individual may list (A) the date of purchase and the purchase price of the interest in the real property, or (B) the assessed value of the real property for tax purposes, adjusted to reflect the market value of the property used for the assessment if the assessed value is computed at less than 100 percent of such market value, but such individual shall include in his report a full and complete description of the method used to determine such assessed value, instead of specifying a category of value pursuant to paragraph (1) of this subsection. If the current value of any other item required to be reported under paragraph (3) of subsection (a) is not ascertainable without an appraisal, such individual may list the book value of a corporation whose stock is not publicly traded, the net worth of a business partnership, the equity value of an individually owned business, or with respect to other holdings, any recognized indication of value, but such individual shall include in his report a full and complete description of the method used in determining such value. In lieu of any value referred to in the preceding sentence, an individual may list the assessed value of the item for tax purposes, adjusted to reflect the market value of the item used for the assessment if the assessed value is computed at less than 100 percent of such market value, but a full and complete description of the method used in determining such assessed value shall be included in the report.

"(e)(1) Except as provided in the last sentence of this paragraph, each report required by section 101 shall also contain information listed in paragraphs (1) through (5) of subsection (a) of this section respecting the spouse or dependent child of the reporting individual as follows:

"(A) The source of items of earned income earned by a spouse from any person which exceed $1,000, except that if the spouse is self-employed in business or a profession, only the nature of such business or profession need be reported.

"(B) All information required to be reported in subsection (a)(1)(B) with respect to income derived by a spouse or dependent child from any asset held by the spouse or dependent child and reported pursuant to subsection (a)(3).

"(C) In the case of any gifts received by a spouse or dependent child which are not received totally independent of the relationship of the spouse or dependent child to the reporting individual, the identity of the source and a brief description of gifts of transportation, lodging, food, or entertainment and a brief description and the value of other gifts.

"(D) In the case of any reimbursements received by a spouse or dependent child which are not received totally independent of the relationship of the spouse or dependent child to the reporting individual, the identity of the source and a brief description of each such reimbursement.

"(E) In the case of items described in paragraphs (3) through (5), all information required to be reported under these paragraphs other than items (i) which the reporting individual certifies represent the spouse's or dependent child's sole financial interest or responsibility and which the reporting individual has no knowledge of, (ii) which are not in any way, past or present, derived from the income, assets, or activities of the reporting individual, and (iii) from which the reporting individual neither derives, nor expects to derive, any financial or economic benefit.

Reports required by subsections (a), (b), and (c) of section 101 shall, with respect to the spouse and dependent child of the reporting individual, only contain information listed in paragraphs (1), (3), and (4) of subsection (a), as specified in this paragraph.

"(2) No report shall be required with respect to a spouse living separate and apart from the reporting individual with the intention of terminating the marriage or providing for permanent separation; or with respect to any income or obligations of an individual arising from the dissolution of his marriage or the permanent separation from his spouse.

"(f)(1) Except as provided in paragraph (2), each reporting individual shall report the information required to be reported pursuant to subsections (a), (b), and (c) of this section with respect to the holdings of and the income from a trust or other financial

arrangement from which income is received by, or with respect to which a beneficial interest in principal or income is held by, such individual, his spouse, or any dependent child.

"(2) A reporting individual need not report the holdings of or the source of income from any of the holdings of—

"(A) any qualified blind trust (as defined in paragraph (3));

"(B) a trust—

"(i) which was not created directly by such individual, his spouse, or any dependent child, and

"(ii) the holdings or sources of income of which such individual, his spouse, and any dependent child have no knowledge of; or

"(C) an entity described under the provisions of paragraph (8),

but such individual shall report the category of the amount of income received by him, his spouse, or any dependent child from the trust or other entity under subsection (a)(1)(B) of this section.

"(3) For purposes of this subsection, the term "qualified blind trust" includes any trust in which a reporting individual, his spouse, or any dependent child has a beneficial interest in the principal or income, and which meets the following requirements:

"(A)(i) The trustee of the trust and any other entity designated in the trust instrument to perform fiduciary duties is a financial institution, an attorney, a certified public accountant, a broker, or an investment advisor who—

"(I) is independent of and not associated with any interested party so that the trustee or other person cannot be controlled or influenced in the administration of the trust by any interested party; and

"(II) is not and has not been an employee of or affiliated with any interested party and is not a partner of, or involved in, any joint venture or other investment with, any interested party; and

"(III) is not a relative of any interested party.

"(ii) Any officer or employee of a trustee or other entity who is involved in the management or control of the trust—

"(I) is independent of and not associated with any interested party so that such officer or employee cannot be controlled or influenced in the administration of the trust by any interested party;

"(II) is not or has not been a partner of any interested party and is not a partner of, or involved in any joint venture or other investment with any interested party; and

"(III) is not a relative of any interested party.

"(B) Any asset transferred to the trust by an interested party is free of any restriction with respect to its transfer or sale unless such restriction is expressly approved by the supervising ethics office of the reporting individual.

"(C) The trust instrument which establishes the trust provides that—

"(i) except to the extent provided in subparagraph (B) of this paragraph, the trustee in the exercise of his authority and discretion to manage and control the assets of the trust shall not consult or notify any interested party;

"(ii) the trust shall not contain any asset the holding of which by an interested party is prohibited by any law or regulation;

"(iii) the trustee shall promptly notify the reporting individual and his supervising ethics office when the holdings of any particular asset transferred to the trust by any interested party are disposed of or when the value of such holding is less than $1,000;

"(iv) the trust tax return shall be prepared by the trustee or his designee, and such return and any information relating thereto (other than the trust income summarized in appropriate categories necessary to complete an interested party's tax return), shall not be disclosed to any interested party;

"(v) an interested party shall not receive any report on the holdings and sources of income of the trust, except a report at the end of each calendar quarter with respect to the total cash value of the interest of the interested party in the trust or the net income or loss of the trust or any reports necessary to enable the interested party to complete an individual tax return required by law or to provide the information required by subsection (a)(1)(B) of this section, but such report shall not identify any asset or holding;

"(vi) except for communications which solely consist of requests for distributions of cash or other unspecified assets of the trust, there shall be no direct or indirect communication between the trustee and an interested party with respect to the trust unless such communication is in writing and unless it relates only (I) to the general financial interest and needs of the interested party (including, but not limited to, an interest in maximizing income or long-term capital gain), (II) to the notification of the trustee of a law or regulation subsequently applicable to the reporting individual which prohibits the interested party from holding an asset, which notification directs that the asset not be held by the trust, or (III) to directions to the trustee to sell all of an asset initially placed in the trust by an interested party which in the determination of the reporting individual creates a conflict of interest or the appearance thereof due to the subsequent assumption of duties by the reporting individual (but nothing herein shall require any such direction); and

"(vii) the interested parties shall make no effort to obtain information with respect to the holdings of the trust, including obtaining a copy of any trust tax return filed or any information relating thereto except as otherwise provided in this subsection.

"(D) The proposed trust instrument and the proposed trustee is approved by the reporting individual's supervising ethics office.

"(E) For purposes of this subsection, 'interested party' means a reporting individual, his spouse, and any dependent child; 'broker' has the meaning set forth in section 3(a)(4) of the Securities and Exchange Act of 1934 (15 U.S.C. 78c(a)(4)); and 'investment adviser' includes any investment adviser who, as determined under regulations prescribed by the supervising ethics office, is generally involved in his role as such an adviser in the management or control of trusts.

"(F) Any trust qualified by a supervising ethics office before the effective date of this section shall continue to be governed by the law and regulations in effect immediately before such effective date.

"(4)(A) An asset placed in a trust by an interested party shall be considered a financial interest of the reporting individual, for the purposes of any applicable conflict of interest statutes, regulations, or rules of the Federal Government (including section 208 of title 18, United States Code), until such time as the reporting individual is notified by the trustee that such asset has been disposed of, or has a value of less than $1,000.

"(B)(i) The provisions of subparagraph (A) shall not apply with respect to a trust created for the benefit of a reporting individual, or the spouse, dependent child, or minor child of such a person, if the supervising ethics office for such reporting individual finds that—

"(I) the assets placed in the trust consist of a well-diversified portfolio of readily marketable securities;

"(II) none of the assets consist of securities of entities having substantial activities in the area of the reporting individual's primary area of responsibility;

"(III) the trust instrument prohibits the trustee, notwithstanding the provisions of paragraphs (3)(C)(iii) and (iv) of this subsection, from making public or informing any interested party of the sale of any securities;

"(IV) the trustee is given power of attorney, notwithstanding the provisions of paragraph (3)(C)(v) of this subsection, to prepare on behalf of any interested party the personal income tax returns and similar returns which may contain information relating to the trust; and

"(V) except as otherwise provided in this paragraph, the trust instrument provides (or in the case of a trust established prior to the effective date of this Act which by its terms does not permit amendment, the trustee, the reporting individual, and any other interested party agree in writing) that the trust shall be administered in accordance with the requirements of this subsection and the trustee of such trust meets the requirements of paragraph (3)(A).

"(ii) In any instance covered by subparagraph (B) in which the reporting individual is an individual whose nomination is being considered by a congressional committee, the reporting individual shall inform the congressional committee considering his nomination before or during the period of such individual's confirmation hearing of his intention to comply with this paragraph.

"(5)(A) The reporting individual shall, within thirty days after a qualified blind trust is approved by his supervising ethics office, file with such office a copy of—

"(i) the executed trust instrument of such trust (other than those provisions which relate to the testamentary disposition of the trust assets), and

"(ii) a list of the assets which were transferred to such trust, including the category of value of each asset as determined under subsection (d) of this section.

This subparagraph shall not apply with respect to a trust meeting the requirements for being considered a qualified blind trust under paragraph (7) of this subsection.

"(B) The reporting individual shall, within thirty days of transferring an asset (other than cash) to a previously established qualified blind trust, notify his supervising ethics office of the identity of each such asset and the category of value of each asset as determined under subsection (d) of this section.

"(C) Within thirty days of the dissolution of a qualified blind trust, a reporting individual shall—

"(i) notify his supervising ethics office of such dissolution, and

"(ii) file with such office a copy of a list of the assets of the trust at the time of such dissolution and the category of value under subsection (d) of this section of each such asset.

"(D) Documents filed under subparagraphs (A), (B), and (C) of this paragraph and the lists provided by the trustee of

assets placed in the trust by an interested party which have been sold shall be made available to the public in the same manner as a report is made available under section 105 and the provisions of that section shall apply with respect to such documents and lists.

"(E) A copy of each written communication with respect to the trust under paragraph (3)(C)(vi) shall be filed by the person initiating the communication with the reporting individual's supervising ethics office within five days of the date of the communication.

"(6)(A) A trustee of a qualified blind trust shall not knowingly or negligently (i) disclose any information to an interested party with respect to such trust that may not be disclosed under paragraph (3) of this subsection, (ii) acquire any holding the ownership of which is prohibited by the trust instrument; (iii) solicit advice from any interested party with respect to such trust, which solicitation is prohibited by paragraph (3) of this subsection or the trust agreement; or (iv) fail to file any document required by this subsection.

"(B) A reporting individual shall not knowingly or negligently (i) solicit or receive any information with respect to a qualified blind trust of which he is an interested party that may not be disclosed under paragraph (3)(C) of this subsection or (ii) fail to file any document required by this subsection.

"(C)(i) The Attorney General may bring a civil action in any appropriate United States district court against any individual who knowingly and willfully violates the provisions of subparagraph (A) or (B) of this paragraph. The court in which such action is brought may assess against such individual a civil penalty in any amount not to exceed $10,000.

"(ii) The Attorney General may bring a civil action in any appropriate United States district court against any individual who negligently violates the provisions of subparagraph (A) or (B) of this paragraph. The court in which such action is brought may assess against such individual a civil penalty in any amount not to exceed $5,000.

"(7) Any trust may be considered to be a qualified blind trust if—

"(A) the trust instrument is amended to comply with the requirements of paragraph (3) or, in the case of a trust instrument which does not by its terms permit amendment, the trustee, the reporting individual, and any other interested party agree in writing that the trust shall be administered in accordance with the requirements of this subsection and the trustee of such trust meets the requirements of paragraph (3)(A); except that in the case of any interested party who is a dependent child, a parent or guardian of such child may execute the agreement referred to in this subparagraph;

"(B) a copy of the trust instrument (except testamentary provisions) and a copy of the agreement referred to in subparagraph (A), and a list of the assets held by the trust at the time of approval by the supervising ethics office, including the category of value of each asset as determined under subsection (d) of this section, are filed with such office and made available to the public as provided under paragraph (5)(D) of this subsection; and

"(C) the supervising ethics office determines that approval of the trust arrangement as a qualified blind trust is in the particular case appropriate to assure compliance with applicable laws and regulations.

"(8) A reporting individual shall not be required to report the financial interests held by a widely held investment fund (whether such fund is a mutual fund, regulated investment company, pension or deferred compensation plan, or other investment fund), if—

"(A)(i) the fund is publicly traded; or

"(ii) the assets of the fund are widely diversified; and

"(B) the reporting individual exercises no control over the financial interests held by the fund.

"(g) Political campaign funds, including campaign receipts and expenditures, need not be included in any report filed pursuant to this title.

"(h) A report filed pursuant to subsection (a), (d), or (e) of section 101 need not contain the information described in subparagraphs (A), (B), and (C) of subsection (a)(2) with respect to gifts and reimbursements received in a period when the reporting individual was not an officer or employee of the Federal Government.

"FILING OF REPORTS

"SEC. 103. (a) Except as otherwise provided in this section, the reports required under this title shall be filed by the reporting individual with the designated agency official at the agency by which he is employed (or in the case of an individual described in section 101(e), was employed) or in which he will serve. The date any report is received (and the date of receipt of any supplemental report) shall be noted on such report by such official.

"(b) The President, the Vice President, and independent counsel and persons appointed by independent counsel under chapter 40 of title 28, United States Code, shall file reports required under this title with the Director of the Office of Government Ethics.

"(c) Copies of the reports required to be filed under this title by the Postmaster General, the Deputy Postmaster General, the Governors of the Board of Governors of the United States Postal Service, designated agency officials, employees described in section 105(a)(2)(A) or (B), 106(a)(1)(A) or (B), or 107(a)(1)(A) or (b)(1)(A)(i), of title 3, United States Code, candidates for the office of President or Vice President and officers and employees in (and nominees to) offices or positions which require confirmation by the Senate or by both Houses of Congress other than those referred to in subsection (f) shall be transmitted to the Director of the Office of Government Ethics. The Director shall forward a copy of the report of each nominee to the congressional committee considering the nomination.

"(d) Reports required to be filed under this title by the Director shall be filed in the Office of Government Ethics and, immediately after being filed, shall be made available to the public in accordance with this title.

"(e) Each individual identified in section 101(c) shall file the reports required by this title with the Federal Elections Commission.

"(f) Reports required of members of the uniformed services shall be filed with the Secretary concerned.

"(g) The Office of Government Ethics shall develop and make available forms for reporting the information required by this title.

"(h)(1) The reports required under this title shall be filed by a reporting individual with—

"(A)(i) the appropriate congressional ethics committee with regard to a Member of Congress, officer or employee of the Congress described under paragraphs (9) and (10) of section 101(f) (including individuals terminating service in such office or position under section 101(e) or immediately preceding service in such office or position); and

"(ii) in the case of an officer or employee of the Congress as described under section 101(f)(10) who is employed by an agency or commission established in the legislative branch after the date of the enactment of the Ethics Reform Act of 1989—

"(I) the congressional ethics committee designated in the statute establishing such agency or commission; or

"(II) if such statute does not designate such committee, the Senate Select Committee on Ethics for agencies and commissions established in even numbered calendar years, and the Standards of Official Conduct Committee of the House of Representatives for agencies and commissions established in odd numbered calendar years; and

"(B) the Judicial Ethics Committee with regard to a judicial officer or employee described under paragraphs (11) and (12) of section 101(f) (including individuals terminating service in such office or position under section 101(e) or immediately preceding service in such office or position).

"(2) The date any report is received (and the date of receipt of any supplemental report) shall be noted on such report by such committee.

"FAILURE TO FILE OR FILING FALSE REPORTS

"SEC. 104. (a) The Attorney General may bring a civil action in any appropriate United States district court against any individual who knowingly and willfully falsifies or who knowingly and willfully fails to file or report any information that such individual is required to report pursuant to section 102. The court in which such action is brought may assess against such individual a civil penalty in any amount, not to exceed $10,000.

"(b) The head of each agency, each Secretary concerned, the Director of the Office of Government Ethics, each congressional ethics committee, or the Chairman of the Judicial Ethics Committee, as the case may be, shall refer to the Attorney General the name of any individual which such official or committee has reasonable cause to believe has willfully failed to file a report or has willfully falsified or willfully failed to file information required to be reported.

"(c) The President, the Vice President, the Secretary concerned, the head of each agency, the Office of Personnel Management, a congressional ethics committee, and the Judicial Ethics Committee, may take any appropriate personnel or other action in accordance with applicable law or regulation against any individual failing to file a report or falsifying or failing to report information required to be reported.

"(d)(1) Any individual who files a report required to be filed under this title more than 30 days after such report is required to be filed pursuant to the provisions of this title and the rules and regulations promulgated thereunder (and after the expiration of any extensions of time granted under subsection 101(g)), shall pay a filing fee of $200 to the miscellaneous receipts of the General Treasury.

"(2) The supervising ethics office may waive the filing fee under this subsection in extraordinary circumstances.

"CUSTODY OF AND PUBLIC ACCESS TO REPORTS

"SEC. 105. (a) Each agency and each supervisory ethics office shall make each report filed with it under this title available to the public in accordance with the provisions of subsection (b) of this section, except that this section does not require public availability of a report filed by—

"(1) any individual in the Central Intelligence Agency, the Defense Intelligence Agency, or the National Security Agency, or any individual engaged in intelligence activities in any agency of the United States, if the President finds that, due to the nature of the office or position occupied by such individual, public disclosure of such report would, by revealing the identity of the individual or other sensitive information, compromise the national interest of the United States. In addition, such individuals may be authorized, notwithstanding section 104(a), to file such additional reports as are necessary to protect their identity from public disclosure if the President first finds that such filing is necessary in the national interest; or

"(2) an independent counsel or person appointed by independent counsel under chapter 40 of title 28, United States Code, whose identity has not otherwise been disclosed.

"(b)(1) Each agency and each supervising ethics office shall, within thirty days after any report is received by such agency or office under this title, permit inspection of such report by or furnish a copy of such report to any person requesting such inspection or copy. The agency or office may require a reasonable fee to be paid in any amount which is found necessary to recover the cost of reproduction or mailing of such report excluding any salary of any employee involved in such reproduction or mailing. A copy of such report may be furnished without charge or at a reduced charge if it is determined that waiver or reduction of the fee is in the public interest.

"(2) Notwithstanding paragraph (1), a report may not be made available under this section to any person nor may any copy thereof be provided under this section to any person except upon a written application by such person stating—

"(A) that person's name, occupation and address;

"(B) the name and address of any other person or organization on whose behalf the inspection or copy is requested; and

"(C) that such person is aware of the prohibitions on the obtaining or use of the report.

Any such application shall be made available to the public throughout the period during which the report is made available to the public.

"(c)(1) It shall be unlawful for any person to obtain or use a report—

"(A) for any unlawful purpose;

"(B) for any commercial purpose, other than by news and communications media for dissemination to the general public;

"(C) for determining or establishing the credit rating of any individual; or

"(D) for use, directly or indirectly, in the solicitation of money for any political, charitable, or other purpose.

"(2) The Attorney General may bring a civil action against any person who obtains or uses a report for any purpose prohibited in paragraph (1) of this subsection. The court in which such action is brought may assess against such person a penalty in any amount not to exceed $10,000. Such remedy shall be in addition to any other remedy available under statutory or common law.

"(d) Any report filed with or transmitted to an agency or supervising ethics office pursuant to this title shall be retained by such agency or office, as the case may be. Such report shall be made available to the public for a period of six years after receipt of the report. After such six-year period the report shall be destroyed unless needed in an ongoing investigation, except that in the case of an individual who filed the report pursuant to section 101(b) and was not subsequently confirmed by the Senate, or who filed the report pursuant to section 101(c) and was not subsequently elected, such reports shall be destroyed one year after the individual either is no longer under consideration by the Senate or is no longer a candidate for nomination or election to the Office of President, Vice President, or as a Member of Congress, unless needed in an ongoing investigation.

"REVIEW OF REPORTS

"SEC. 106. (a)(1) Each designated agency official or Secretary concerned shall make provisions to ensure that each report filed with him under this title is reviewed within sixty days after the date of such filing, except that the Director of the Office of Government Ethics shall review only those reports transmitted to him under this title within sixty days after the date of transmittal.

"(2) Each congressional ethics committee and the Judicial Ethics Committee shall make provisions to ensure that each report filed under this title is reviewed within sixty days after the date of such filing.

"(b)(1) If after reviewing any report under subsection (a), the Director of the Office of Government Ethics, Secretary concerned, designated agency official, or a person designated by the congressional ethics committee, or the Chairman of the Judicial Ethics Committee, as the case may be, is of the opinion that on the basis of information contained in such report the individual submitting such report is in compliance with applicable laws and regulations, he shall state such opinion on the report, and shall sign such report.

"(2) If the Director of the Office of Government Ethics, Secretary concerned, designated agency official or a person designated by the congressional ethics committee, or the Chairman of the Judicial Ethics Committee, after reviewing any report under subsection (a)—

"(A) believes additional information is required to be submitted, he shall notify the individual submitting such report what additional information is required and the time by which it must be submitted, or

"(B) is of the opinion, on the basis of information submitted, that the individual is not in compliance with applicable laws and regulations, he shall notify the individual, afford a reasonable opportunity for a written or oral response, and after consideration of such response, reach an opinion as to whether or not, on the basis of information submitted, the individual is in compliance with such laws and regulations.

"(3) If the Director of the Office of Government Ethics, Secretary concerned, designated agency official, a congressional ethics committee, or the Judicial Ethics Committee, reaches an opinion under paragraph (2)(B) that an individual is not in compliance with applicable laws and regulations, the official or committee shall notify the individual of that opinion and, after an opportunity for personal consultation (if practicable), determine and notify the individual of which steps, if any, would in the opinion of such official or committee be appropriate for assuring compliance with such laws and regulations and the date by which such steps should be taken. Such steps may include, as appropriate—

"(A) divestiture,

"(B) restitution,

"(C) the establishment of a blind trust,

"(D) request for an exemption under section 208(b) of title 18, United States Code, or

"(E) voluntary request for transfer, reassignment, limitation of duties, or resignation.

The use of any such steps shall be in accordance with such rules or regulations as the supervising ethics office may prescribe.

"(4) If steps for assuring compliance with applicable laws and regulations are not taken by the date set under paragraph (3) by an individual in a position (other than in the uniformed services), appointment to which requires the advice and consent of the Senate, the matter shall be referred to the President for appropriate action.

"(5) If steps for assuring compliance with applicable laws and regulations are not taken by the date set under paragraph (3) by a member of the uniformed services, the Secretary concerned shall take appropriate action.

"(6) If steps for assuring compliance with applicable laws and regulations are not taken by the date set under paragraph (3) by any other officer or employee the matter shall be referred to the head of the appropriate agency, the congressional ethics committee, or the Judicial Ethics Committee, for appropriate action; except that in the case of the Postmaster General or Deputy Postmaster General, the Director of the Office of Government Ethics shall recommend to the Governors of the Board of Governors of the United States Postal Service the action to be taken.

"(7) Each supervising ethics office may render advisory opinions interpreting this title within its respective jurisdiction. Notwithstanding any other provision of law, the individual to whom a public advisory opinion is rendered in accordance with this paragraph, and any other individual covered by this title who is involved in a fact situation which is indistinguishable in all material aspects, and who acts in good faith in accordance with the provisions and findings of such advisory opinion shall not, as a result of such act, be subject to any penalty or sanction provided by this title.

"CONFIDENTIAL REPORTS AND OTHER ADDITIONAL REQUIREMENTS

"SEC. 107. (a)(1) Each supervising ethics office may require officers and employees under its jurisdiction (including special Government employees as defined in section 202 of title 18, United States Code) to file confidential financial disclosure reports, in such form as the supervising ethics office may prescribe. The information required to be reported under this subsection by the officers and employees of any department or agency shall be set forth in rules or regulations prescribed by the supervising ethics office, and may be less extensive than otherwise required by this title, or more extensive when determined by the supervising ethics office to be necessary and appropriate in light of sections 202 through 209 of title 18, United States Code, regulations promulgated thereunder, or the authorized activities of such officers or employees. Any individual required to file a report pursuant to section 101 shall not be required to file a confi-

dential report pursuant to this subsection, except with respect to information which is more extensive than information otherwise required by this title. Subsections (a), (b), and (d) of section 105 shall not apply with respect to any such report.

"(2) Any information required to be provided by an individual under this subsection shall be confidential and shall not be disclosed to the public.

"(3) Nothing in this subsection exempts any individual otherwise covered by the requirement to file a public financial disclosure report under this title from such requirement.

"(b) The provisions of this title requiring the reporting of information shall supersede any general requirement under any other provision of law or regulation with respect to the reporting of information required for purposes of preventing conflicts of interest or apparent conflicts of interest. Such provisions of this title shall not supersede the requirements of section 7342 of title 5, United States Code.

"(c) Nothing in this Act requiring reporting of information shall be deemed to authorize the receipt of income, gifts, or reimbursements; the holding of assets, liabilities, or positions; or the participation in transactions that are prohibited by law, Executive order, rule, or regulation.

"AUTHORITY OF COMPTROLLER GENERAL

"SEC. 108. (a) The Comptroller General shall have access to financial disclosure reports filed under this title for the purposes of carrying out his statutory responsibilities.

"(b) No later than November 30, 1991, and regularly thereafter, the Comptroller General shall conduct a study to determine whether the provisions of this title are being carried out effectively.

"DEFINITIONS

"SEC. 109. For the purposes of this title, the term—

"(1) 'congressional ethics committees' means the Senate Select Committee on Ethics and the Standards of Official Conduct Committee of the House of Representatives;

"(2) 'dependent child' means, when used with respect to any reporting individual, any individual who is a son, daughter, stepson, or stepdaughter and who—

"(A) is unmarried and under age 21 and is living in the household of such reporting individual; or

"(B) is a dependent of such reporting individual within the meaning of section 152 of the Internal Revenue Code of 1986;

"(3) 'designated agency official' means an officer or employee who is designated to administer the provisions of this title within an agency;

"(4) 'executive branch' includes each Executive agency (as defined in section 105 of title 5, United States Code) and any other entity or administrative unit in the executive branch;

"(5) 'gift' means a payment, advance, forbearance, rendering, or deposit of money, or any thing of value, unless consideration of equal or greater value is received by the donor, but does not include—

"(A) bequest and other forms of inheritance;

"(B) suitable mementos of a function honoring the reporting individual;

"(C) food, lodging, transportation, and entertainment provided by a foreign government within a foreign country or by the United States Government;

"(D) food and beverages consumed at banquets, receptions, or similar events; or

"(E) communications to the offices of a reporting individual including subscriptions to newspapers and periodicals;

"(6) 'honoraria' has the meaning given such term in the Federal Election Campaign Act of 1971 (2 U.S.C. 431 et seq.);

"(7) 'income' means all income from whatever source derived, including but not limited to the following items: compensation for services, including fees, commissions, and similar items; gross income derived from business (and net income if the individual elects to include it); gains derived from dealings in property; interest; rents; royalties; dividends; annuities; income from life insurance and endowment contracts; pensions; income from discharge of indebtedness; distributive share of partnership income; and income from an interest in an estate or trust;

"(8) 'judicial employee' means any employee of the judicial branch of the Government, of the Tax Court, or of the United States Court of Military Appeals who is not a judicial officer and who is authorized to perform adjudicatory functions with respect to proceedings in the judicial branch, or who receives compensation at a rate at or in excess of the minimum rate prescribed for grade 16 of the General Schedule under section 5332 of title 5, United States Code;

"(9) 'Judicial Ethics Committee' means the committee established and maintained by the Judicial Conference of the United States under section 112 (b) of this title;

"(10) 'judicial officer' means the Chief Justice of the United States, the Associate Justices of the Supreme Court, and the judges of the United States courts of appeals, United States district courts, including the district courts in the Canal Zone, Guam, and the Virgin Islands, Court of Claims, Court of Appeals for the Federal Circuit, Court of International Trade, Tax Court, United States Court of Military Appeals, and any court created by Act of Congress, the judges of which are entitled to hold office during good behavior;

"(11) 'legislative branch' includes—

"(A) the Architect of the Capitol;

"(B) the Botanic Gardens;

"(C) the Congressional Budget Office;

"(D) the General Accounting Office;

"(E) the Government Printing Office;

"(F) the Library of Congress;

"(G) the United States Capitol Police;

"(H) the Office of Technology Assessment; and

"(I) any other agency, entity, office, or commission established in the legislative branch;

"(12) 'Member of Congress' means a United States Senator, a Representative in Congress, a Delegate to Congress, or the Resident Commissioner from Puerto Rico;

"(13) 'officer or employee of the Congress' means—

"(A) any individual described under subparagraph (B), other than a Member of Congress or the Vice President, whose compensation is disbursed by the Secretary of the Senate or the Clerk of the House of Representatives;

"(B)(i) each officer or employee of the legislative branch who is compensated for 60 consecutive days at a rate equal to or in excess of the annual rate of basic pay in effect for grade GS-15 of the General Schedule; and

"(ii) at least one principal assistant designated for purposes of this paragraph by each Member who does not have an employee compensated at a rate equal to or in excess of the annual rate of basic pay in effect for grade GS-15 of the General Schedule;

"(14) 'personal hospitality of any individual' means hospitality extended for a nonbusiness purpose by an individual, not a corporation or organization, at the personal residence of that individual or his family or on property or facilities owned by that individual or his family;

"(15) 'reimbursement' means any payment or other thing of value received by the reporting individual, other than gifts, to cover travel-related expenses of such individual other than those which are—

"(A) provided by the United States Government;

"(B) required to be reported by the reporting individual under section 7342 of title 5, United States Code; or

"(C) required to be reported under section 304 of the Federal Election Campaign Act of 1971 (2 U.S.C. 434);

"(16) 'relative' means an individual who is related to the reporting individual, as father, mother, son, daughter, brother, sister, uncle, aunt, great aunt, great uncle, first cousin, nephew, niece, husband, wife, grandfather, grandmother, grandson, granddaughter, father-in-law, mother-in-law, son-in-law, daughter-in-law, brother-in-law, sister-in-law, stepfather, stepmother, stepson, stepdaughter, stepbrother, stepsister, half brother, half sister, or who is the grandfather or grandmother of the spouse of the reporting individual, and shall be deemed to include the fiance or fiancee of the reporting individual;

"(17) 'Secretary concerned' has the meaning set forth in section 101(8) of title 10, United States Code, and, in addition, means—

"(A) the Secretary of Commerce, with respect to matters concerning the National Oceanic and Atmospheric Administration; and

"(B) the Secretary of Health and Human Services, with respect to matters concerning the Public Health Service;

"(18) 'supervising ethics office' means—

"(A) the Select Committee on Ethics of the Senate, for Senators and officers and employees of the Senate;

"(B) the Committee on Standards of Official Conduct of the House of Representatives, for Members and officers and employees of the House of Representatives;

"(C) the Judicial Ethics Committee for judicial officers and judicial employees; and

"(D) the Office of Government Ethics for all executive branch employees; and

"(19) 'value' means a good faith estimate of the dollar value if the exact value is neither known nor easily obtainable by the reporting individual.

"OUTSIDE EARNED INCOME

"SEC. 110. (a) Except where the employee's agency or department shall have more restrictive limitations on outside earned income, all executive branch officers and employees covered by this title—

"(1) who are compensated at a pay grade in the General Schedule of grade GS-16 or above and who occupy nonjudicial full-time positions, appointments to which are required to be made by the President by and with the advice and consent of the Senate, or

"(2) who are employees of the White House Office and are compensated at rates equivalent to level II of the Executive

Schedule under section 5313 of title 5, United States Code,

may not have in any calendar year outside earned income attributable to such calendar year which is in excess of 15 percent of their salary.

"(b)(1) No Member of Congress or officer or employee covered by this title, other than a special Government employee, may serve on the board of directors of—

"(A) any for-profit corporation or commercial enterprise; or

"(B) any nonprofit corporation or unincorporated nonprofit entity, if such officer or employee is receiving compensation for services.

"(2) Such an officer, employee, or Member of Congress may serve on the board of directors of a nonprofit corporation or unincorporated nonprofit entity, if such officer or employee is not receiving compensation for services.

"(3) The supervising ethics office for each branch may grant exemptions to the provisions of this subsection for individuals or categories of individuals, if such office or such a committee determines that there is an insignificant potential for conflicts of interests.

"(4) Nothing in this section shall preclude the supervising ethics office for any branch from prescribing more restrictive rules to prevent conflicts of interest.

"NOTICE OF ACTIONS TAKEN TO COMPLY WITH ETHICS AGREEMENTS

"SEC. 111. (a) In any case in which an individual agrees with that individual's designated agency official, the Office of Government Ethics, a Senate confirmation committee, a congressional ethics committee, or the Judicial Ethics Committee, to take any action to comply with this Act or any other law or regulation governing conflicts of interest of, or establishing standards of conduct applicable with respect to, officers or employees of the Government, that individual shall notify in writing the designated agency official, the Office of Government Ethics, the appropriate committee of the Senate, the congressional ethics committee, or the Judicial Ethics Committee, as the case may be, of any action taken by the individual pursuant to that agreement. Such notification shall be made not later than the date specified in the agreement by which action by the individual must be taken, or not later than three months after the date of the agreement, if no date for action is so specified.

"(b) If an agreement described in subsection (a) requires that the individual recuse himself or herself from particular categories of agency or other official action, the individual shall reduce to writing those subjects regarding which the recusal agreement will apply and the process by which it will be determined whether the individual must recuse himself or herself in a specific instance. An individual shall be considered to have complied with the requirements of subsection (a) with respect to such recusal agreement if such individual files a copy of the document setting forth the information described in the preceding sentence with such individual's designated agency official or the appropriate supervising ethics office within the time prescribed in the last sentence of subsection (a).

"ADMINISTRATION OF PROVISIONS

"SEC. 112. (a) The provisions of this title shall be administered by—

"(1) the Director of the Office of Government Ethics, the designated agency official, or the Secretary concerned, as appropriate, with regard to officers and employees described in paragraphs (1) through (8) of section 101(f);

"(2) the Senate Select Committee on Ethics and the Standards of Official Conduct Committee of the House of Representatives, as appropriate, with regard to officers and employees described in paragraphs (9) and (10) of section 101(f); and

"(3) the Judicial Ethics Committee and clerk of the applicable court, as appropriate, in the case of an officer or employee described in paragraphs (11) and (12) of section 101(f).

"(b) The Judicial Conference of the United States shall establish and maintain a Judicial Ethics Committee which shall be responsible for developing the forms for reporting the information required by this title and for receiving and making available the reports described under this title.

"EFFECTIVE DATE

"SEC. 113. The provisions made by this title shall take effect on January 1, 1990, and shall be applicable to information included in reports filed under this title for calendar year 1990 and subsequent years.".

SEC. 203. TRANSMITTAL OF FINANCIAL DISCLOSURE REPORTS.

Rule XXXIV of the Standing Rules of the Senate is amended—

(1) by inserting "1." before "For purposes of this rule"; and

(2) by adding at the end thereof the following:

"2. (a) The Select Committee on Ethics shall transmit a copy of each report filed with it under title I of the Ethics in Government Act of 1978 (other than a report filed by a Member of Congress) to the head of the employing office of the individual filing the report.

"(b) For purposes of this rule, the head of the employing office shall be—

"(i) in the case of an employee of a Member, the Member by whom that person is employed;

"(ii) in the case of an employee of a Committee, the chairman and ranking minority member of such Committee;

"(iii) in the case of an employee on the leadership staff, the Member of the leadership on whose staff such person serves; and

"(iv) in the case of any other employee of the legislative branch, the head of the office in which such individual serves.".

SEC. 204. PRESIDENT'S COMMISSION ON THE FEDERAL APPOINTMENT PROCESS.

(a) ESTABLISHMENT.—There shall be established an advisory commission in the executive branch to study the best means of simplifying the Presidential appointment process, in particular by reducing the number and complexity of forms to be completed by nominees. The Commission shall be known as the President's Commission on the Federal Appointment Process.

(b) MEMBERSHIP.—The Commission shall be composed of ten members who shall serve until the expiration of the Commission, unless they are removed, resign, or die. Six members shall be appointed by the President, two members shall be appointed by the majority leader of the Senate, and two members shall be appointed by the minority leader of the Senate. Five members shall constitute a quorum and vacancies shall be filled in the same manner as initial appointments.

(c) APPOINTMENTS.—Members shall be chosen by the President from among those officers and employees of the three branches of the Federal Government. Members shall receive no additional salary for service on the Commission, but shall receive reimbursement for actual expenses incurred.

(d) REPORT.—The Commission shall present its report to the President no later than ninety days after its first meeting.

TITLE III—GIFTS AND TRAVEL

SEC. 301. GIFTS TO SUPERIORS.

Section 7351 of title 5, United States Code, is amended by—

(1) adding "(a)" before "An employee may not"; and

(2) striking the final sentence and inserting the following:

"(b) An employee who violates this section shall be subject to appropriate disciplinary action by the employing agency or entity under chapter 75 of this title.

"(c) The Office of Government Ethics is authorized to issue regulations implementing this section, including regulations exempting voluntary gifts or contributions that are given or received for special occasions such as marriage or retirement or under other similar circumstances.".

SEC. 302. TRAVEL ACCEPTANCE AUTHORITY.

Subchapter III of chapter 13 of subtitle 2 of title 31, United States Code is amended by adding at the end thereof the following:

"§ 1352. Travel acceptance authority

"(a) Notwithstanding any other provision of law, in accordance with uniform regulations which the Administrator, General Services Administration, in consultation with the Office of Government Ethics, shall prescribe to prevent conflicts of interest, the head of any executive branch agency is authorized to accept payment and reimbursement, in cash or in kind, from non-Federal agencies, organizations, and individuals for travel, subsistence and other necessary expenses incurred by its employees in traveling to attend meetings, conferences, training, public speaking engagements, and similar functions concerning or related to the functions or activities of the agency or entity. Except as provided in subsections (d) and (e) hereof, any payment or reimbursement accepted shall be credited to the appropriated funds of the agency or entity. Subject to limitations provided in regulations issued by the Administrator, General Services Administration, the amount of travel, subsistence, and other necessary expenses for employees paid or reimbursed under this subsection may exceed per diem amounts established in official travel regulations. In addition, no payment or reimbursement may be accepted—

"(1) that attaches conditions inconsistent with applicable laws or regulations, or

"(2) that is conditioned upon or will require the expenditure of appropriated funds unless such expenditure has been authorized by Act of Congress.

"(b) For purposes of this section, the term—

"(1) 'executive branch' means any executive agency, as defined in section 105 of title 5, and any other entity or administrative unit in the executive branch.

"(2) 'employee' means:

"(A) an officer or employee of the executive branch;

"(B) an expert or consultant who is under contract under section 3109 of title 5 with an executive branch agency or entity as defined in this section, including in the case of an organization performing services under such section, any individual involved in the performance of such services; and

"(C) the spouse of an individual described in paragraphs (A) and (B) when the spouse has been invited to accompany the employee while that employee is performing services for the agency as described in subsection (a).

"(c) Except as provided in section 4111 of title 5 this section shall be the only authority for the acceptance by executive branch employees, of payment or reimbursement for travel expenses for the activities outlined in subsection (a).

"(d) Any executive branch agency that fails to follow the procedures prescribed by or approved by the General Services Administration under this section shall transfer any payment or reimbursement received for such travel expenses to the General Fund of the Treasury. The value of any in-kind services accepted under such circumstances by the traveling employee shall be paid from the appropriated funds of the agency to the General Fund of the Treasury or shall be paid to the donor, whichever is most appropriate under the circumstances.

"(e) An executive branch employee who personally accepts payment or reimbursement or accepts in-kind services for official travel expenses from a source other than the United States Government, in disregard of the requirements of this section and the regulations promulgated thereunder, may, in addition to any other penalty imposed by law, be required to pay the full amount of the payment or reimbursement of the fair market value of the in-kind services, whichever was accepted, to the General Fund of the Treasury and shall receive no offsetting payments from the United States Government.".

"(f)(1) Each executive branch agency which accepts payment or reimbursement under this section shall report to the Office of Government Ethics the amount of each payment or reimbursement received in excess of $250, the names of the payor and the employees involved, the date and places of the travel, and the nature of the expenses paid or reimbursed.

"(2) The reports required by paragraph (1) shall be transmitted to the Office of Government Ethics on October 1 and April 1 of each year and shall cover payments and reimbursements received in the previous 6 months. The Office of Government Ethics shall make each such report available for public inspection and copying.".

SEC. 303. GIFTS TO FEDERAL EMPLOYEES.

(a) IN GENERAL.—Subchapter V of chapter 73 of title 5, United States Code, is amended by adding at the end thereof the following new section:

"§ 7353. Gifts to Federal employees

"(a) Except as permitted by subsection (b), no Member of Congress or officer or employee of the executive, legislative, or the judicial branches shall solicit or accept anything of value from a person seeking official action from, doing business with, or conducting activities regulated by the individual's employing agency, or whose interests may be substantially affected by the performance or nonperformance of the individual's official duties.

"(b)(1) Each supervising ethics office is authorized to issue rules or regulations implementing the provisions of this section and providing for such reasonable exceptions as may be appropriate.

"(2)(A) Subject to subparagraph (B), a Member, officer, or employee may accept a gift pursuant to rules or regulations established by such individual's supervising ethics office pursuant to paragraph (1).

"(B) No gift may be accepted pursuant to subparagraph (A) in return for being influenced in the performance of any official act.

"(3) Nothing in this section precludes a Member, officer, or employee from accepting gifts on behalf of the United States Government or any of its agencies in accordance with statutory authority.

"(c) An employee who violates this section shall be subject to appropriate disciplinary and other remedial action in accordance with any applicable laws, Executive orders, and rules or regulations.

"(d) For purposes of this section, the term 'supervising ethics office' means—

"(1) the Committee on Standards of Official Conduct of the House of Representatives or the House of Representatives as a whole, for Members and employees of the House of Representatives;

"(2) the Select Committee on Ethics of the Senate, or the Senate as a whole, for Senators and employees of the Senate;

"(3) the Judicial Ethics Committee for judges and judicial branch employees; and

"(4) the Office of Government Ethics for all executive branch employees.".

(b) AMENDMENT TO TABLE OF CONTENTS.—The table of contents for chapter 73 of title 5, United States Code, is amended by adding at the end thereof the following new item:

"7353. Gifts to Federal employees.".

SEC. 304. AMENDMENTS TO THE SENATE RULES.

(a) GIFTS.—Paragraph 1(a) of rule XXXV of the Standing Rules of the Senate is amended by—

(1) inserting "(1)" before "No Member" in the first sentence;

(2) adding the following new paragraph after the first sentence:

"(2) No Member, officer, or employee of the Senate, or the spouse or dependent thereof, shall knowingly accept, directly or indirectly, any gift or gifts having an aggregate value exceeding $300 during a calendar year from any person, organization, or corporation unless, in an unusual case, a waiver is granted by the Select Committee on Ethics.";

(3) inserting "(3)" before "In determining";

(4) striking "whether an individual has accepted any gift or gifts having an aggregate value exceeding $100" and inserting "the aggregate value of any gift or gifts accepted by an individual"; and

(b) CHANGE OF DOLLAR AMOUNTS.—Paragraph 1(c)(2) of rule XXXV is amended by striking "$35" and inserting "$75".

(c) INCLUSION OF ENTERTAINMENT WITHIN THE DEFINITION OF A GIFT.—Paragraph 2(a)(6) of rule XXXV of the Standing Rules of the Senate is amended by striking "meals, beverages, or entertainment" both places it appears and inserting "meals or beverages".

(d) LIMITS ON DOMESTIC AND FOREIGN TRAVEL BY MEMBERS AND STAFF OF THE SENATE.—Paragraph 2 of rule XXXV of the Standing Rules of the Senate is amended by adding at the end thereof the following:

"(c) For purposes of this paragraph, the term 'necessary expenses' means reasonable expenses for food, lodging, or transportation which are incurred by a Member, officer, or employee of the Senate in connection with services provided to (or participation in an event sponsored by) the organization which provides reimbursement for such expenses or which provides the food, lodging, or transportation directly. Necessary expenses do not include the provision of food, lodging, or transportation, or the payment for such expenses, for a continuous period in excess of 3 days (and 2 nights) exclusive of travel time within the United States or 7 days (and 6 nights) exclusive of travel time outside of the United States unless such travel is approved by the Committee on Ethics as necessary for participation in a conference, seminar, meeting or similar matter. Necessary expenses do not include the provision of food, lodging, or transportation, or the payment for such expenses, for anyone accompanying a Member, officer, or employee of the Senate, other than the spouse of a Member, officer, or employee of the Senate or one Senate employee acting as an aide to a Member.".

TITLE IV—AMENDMENTS TO TITLE 18 OF THE UNITED STATES CODE

SEC. 401. AMENDING TITLE 18, UNITED STATES CODE SEC. 202.

Section 202 of title 18, United States Code, is amended by adding at the end thereof the following new subsections:

"(c) Except as otherwise provided in such sections, the terms 'officer' and 'employee' in sections 203, 205, 207, 208 and 209 of this title, mean those individuals defined in sections 2104 and 2105 of title 5. The terms 'officer' and 'employee' shall not include the President, the Vice President, a Member of Congress or a Federal judge.

"(d) The term 'Member of Congress' in sections 204 and 207 shall include:

"(1) a United States Senator;

"(2) a Member of the United States House of Representatives;

"(3) a Delegate to the United States Congress; and

"(4) a Resident Commissioner to the United States Congress.

"(e) As used in this chapter, the term—

"(1) 'executive branch' means any executive agency, as defined in title 5, United States Code, and any other entity or administrative unit in the executive branch;

"(2) 'judicial branch' means the Supreme Court of the United States; the United States Court of Appeals; the United States District Courts; the Court of International Trade; and the United States Bankruptcy Courts; any court created pursuant to article I of the United States Constitution, including the Court of Military Appeals, the United States Claims Court, and the United States Tax Court, but not including a court of a territory or possession of the United States; the Federal Judicial Center; and any other agency, office or entity in the judicial branch; and

"(3) 'legislative branch' means—

"(A) a Member of the United States Senate or the United States House of Representatives, or any officer or employee of the United States Senate or United States House of Representatives; and

"(B) an officer or employee of the Architect of the Capitol, the United States Botanic Garden, the General Accounting Office, the Government Printing Office, the Library of Congress, the Office of Technology Assessment, the Congressional Budget Office, the United States Capitol Police, and any other agency, entity, office, or commission established in the legislative branch.".

SEC. 402. AMENDING 18 U.S.C. 203.

Section 203 of title 18, United States Code, is amended by—

(1) striking "services" the first time it appears in subsection (a)(1) and inserting "representational services, as agent or attorney or otherwise,";

(2) striking "shall be fined under this title or imprisoned for not more than two years,

or both; and shall be incapable of holding any office of honor, trust, or profit under the United States" in subsection (a) and inserting "shall be subject to the penalties set forth in section 216 of this title,";

(3) inserting "representational" before "services" in subsection (a)(2);

(4) inserting "Member Elect" after "Member" in subsection (a)(2);

(5) inserting "Delegate Elect" after "Delegate" in subsection (a)(2);

(6) striking "including the District of Columbia" in subsection (a)(1)(B);

(7) striking "or" at the end of subsection (a) and adding the following new paragraph (b):

"(b) Whoever, otherwise than as provided by law for the proper discharge of official duties, directly or indirectly demands, seeks, receives, accepts, or agrees to receive or accept any compensation for any representational services as agent or attorney or otherwise rendered or to be rendered either personally or by another at a time when such person is an officer or employee of the District of Columbia in relation to any proceeding, application, request for a ruling or other determination, contract, claim, controversy, charge, accusation, arrest, or other particular matter in which the District of Columbia is a party or has a direct and substantial interest, before any department, agency, court martial, officer, or any civil, military, or naval commission; or";

(8) redesignating subsection (b) as subsection (c);

(9) inserting at the end, new subsections as follows:

"(d) Nothing in this section prevents an officer or employee, including a special Government employee, from acting, with or without compensation, as agent or attorney for or otherwise representing his parents, spouse, child, or any person for whom, or for any estate for which, he is serving as guardian, executor, administrator, trustee, or other personal fiduciary except—

"(1) in those matters in which he has participated personally and substantially as a Government employee, through decision, approval, disapproval, recommendation, the rendering of advice, investigation, or otherwise; or

"(2) in those matters that are the subject of his official responsibility.

"(e) Nothing in this section prevents a special Government employee from acting as agent or attorney for another person in the performance of work under a grant by, or a contract with or for the benefit of, the United States provided that the head of the department or agency concerned with the grant or contract shall certify in writing that the national interest so requires and publishes such certification in the Federal Register.".

SEC. 403. AMENDING 18 U.S.C. 204.

Section 204 of title 18, United States Code, is amended to read as follows:

"§ 204. Practice in United States Claims Court or the United States Court of Appeals for the Federal Circuit by Members of Congress

"Whoever, being a Member of Congress or Member of Congress-elect, practices in the United States Claims Court or the United States Court of Appeals for the Federal Circuit shall be subject to the penalties set forth in section 216 of this title.".

SEC. 404. AMENDING 18 U.S.C. 205.

Section 205 of title 18, United States Code, is amended to read as follows:

"§ 205. Activities of officers and employees in claims against and other matters affecting the Government

"(a) Whoever, being an officer or employee of the United States in the executive, legislative, or judicial branch of the Government or in any agency of the United States, other than in the proper discharge of his official duties—

"(1) acts as agent or attorney for prosecuting any claim against the United States, or receives any gratuity, or any share of or interest in any such claim in consideration of assistance in the prosecution of such claim; or

"(2) acts as agent or attorney for anyone before any department, agency, court, court-martial, officer, or any civil, military or naval commission in connection with any covered matter in which the United States is a party or has a direct interest;

shall be subject to the penalties set forth in section 216 of this title.

"(b) Whoever, being an officer or employee of the District of Columbia or an officer or employee of the Office of the United States Attorney for the District of Columbia, otherwise than in the proper discharge of official duties—

"(1) acts as agent or attorney for prosecuting any claim against the District of Columbia, or receives any gratuity, or any share of or interest in any such claim in consideration of assistance in the prosecution of such claim; or

"(2) acts as agent or attorney for anyone before any department, agency, court, officer, or any commission in connection with any covered matter in which the District of Columbia is a party or has a direct interest;

shall be subject to the penalties set forth in section 216 of this title.

"(c) A special Government employee shall be subject to subsection (a) only in relation to a covered matter involving a specific party or parties—

"(1) in which he has at any time participated personally and substantially as a Government employee or special Government employee through decision, approval, disapproval, recommendation, the rendering of advice, investigation or otherwise; or

"(2) which is pending in the department or agency of the Government in which he is serving.

Paragraph (2) shall not apply in the case of a special Government employee who has served in such department or agency no more than sixty days during the immediately preceding period of three hundred and sixty-five consecutive days.

"(d) Nothing in subsection (a) or (b) prevents an officer of employee, if not inconsistent with the faithful performance of his duties, from acting without compensation as agent or attorney for, or otherwise representing, any person who is the subject of disciplinary, loyalty, or other personnel administration proceedings in connection with those proceedings.

"(e) Nothing in subsection (a) or (b) prevents an officer or employee, including a special Government employee, from acting, with or without compensation, as agent or attorney for, or otherwise representing, his parents, spouse, child, or any person for whom, or for any estate for which, he is serving as guardian, executor, administrator, trustee, or other personal fiduciary except—

"(1) in those matters in which he has participated personally and substantially as a Government employee or special Government employee through decision, approval, disapproval, recommendation, the rendering of advice, investigation or otherwise, or

"(2) in those matters which are the subject of his official responsibility,

subject to approval by the Government official responsible for appointment to his position.

"(f) Nothing in subsection (a) or (b) prevents a special Government employee from acting as agent or attorney for another person in the performance of work under a grant by, or a contract with or for the benefit of the United States providing that the head of the department or agency concerned with the grant or contract shall certify in writing that the national interest so requires and publish such certification in the Federal Register.

"(g) Nothing in this section prevents an officer or employee from giving testimony under oath or from making statements required to be made under penalty for perjury or contempt.

"(h) For the purpose of this section the term 'covered matter' means any judicial or other proceeding, application, request for a ruling or other determination, contract, claim, controversy, investigation, charge, accusation, arrest or other particular matter.".

SEC. 405. AMENDING 18 U.S.C. 208.

Section 208 of title 18, United States Code, is amended—

(1) in subsection (a) by striking "Shall be fined not more than $10,000, or imprisoned not more than two years, or both." and inserting "Shall be subject to the penalties set forth in section 216 of this title."; and

(2) in subsection (b)—

(A) by striking "or" at the end of paragraph (1);

(B) by inserting after "general rule or regulation" in paragraph (2) the following: "issued by the Office of Government Ethics applicable to all or a portion of the officers or employees covered by this section and"; and

(C) by striking the final sentence and inserting the following:

"(3) in the case of a special Government employee serving on an advisory committee within the meaning of the Federal Advisory Committee Act, 5 U.S.C. App. 2 (including an individual being considered for an appointment to such a position), the official responsible for the employee's appointment, after review of a financial disclosure report filed pursuant to section 207 of the Ethics in Government Act, as amended, certifies in writing that the need for the individual's services outweighs the potential for a conflict of interest created by the financial interest involved; or

"(4) the financial interest that would be affected is that resulting solely from the interest of such officer or employee, his or her spouse, or minor child in birthrights in a federally recognized Indian tribe, Pueblo, or Alaska Native corporation established pursuant to the Alaska Native Claims Settlement Act or in an individual or tribal allotment or claims fund, provided that the covered matter does not involve the tribe, Pueblo, or Alaska Native corporation as a specific party or parties.

"(c)(1) For the purpose of paragraph (1) of subsection (b), in the case of class A and B directors of Federal Reserve Banks, the Board of Governors of the Federal Reserve System shall be deemed the Government official responsible for appointment.

"(2) The potential availability of an exemption under any particular paragraph of

subsection (b) does not preclude an exemption being granted pursuant to another paragraph of subsection (b).

"(d)(1) A copy of any determination by other than the Director of the Office of Government Ethics granting an exemption pursuant to subsection (b)(1) or (b)(3) shall be submitted to the Director, who shall make all determinations available to the public pursuant to section 205 of the Ethics in Government Act. For determinations pursuant to subsection (b)(3), the information from the financial disclosure report of the covered person describing the asset or assets that necessitated the waiver shall also be made available to the public. This subsection shall not apply, however, if the head of the agency or his or her designee determines that the determination involves classified information.

"(2) The Office of Government Ethics after consultation with the Attorney General shall issue uniform regulations for the issuance of waivers and exemptions under subsection (b) which shall—

"(A) list and describe exemptions; and

"(B) provide guidance with respect to the types of interests that are too remote or inconsequential to be conflicts of interest.".

SEC. 406. AMENDING 18 U.S.C. 209.

Section 209(a) of title 18, United States Code, is amended by striking "Shall be fined not more than $5,000 or imprisoned not more than one year, or both." and inserting "shall be subject to the penalties set forth in section 216 of this title.".

SEC. 407. PENALTIES AND INJUNCTIONS.

(a) IN GENERAL.—Chapter 11 of title 18, United States Code, is amended by adding the following new section:

"§ 216. Penalties and injunctions

"(a) The punishment for an offense under sections 203, 204, 205, 207, 208, 209, and 220 of this title is the following—

"(1) whoever engages in the conduct constituting the offense shall be imprisoned for not more than one year or fined in the amount set forth in this title, or both; or

"(2) whoever willfully engages in the conduct constituting the offense shall be imprisoned for not more than five years or fined in the amount set forth in this title, or both.

"(b) The Attorney General may bring a civil action in the appropriate United States district court against any person who engages in conduct constituting an offense under sections 203, 204, 205, 207, 208, 209, and 220 of this title and, upon proof of such conduct by a preponderance of the evidence, such person shall be subject to a civil penalty of not more than $50,000 for each violation or the amount of compensation which the person received or offered for the prohibited conduct, whichever amount is greater. The imposition of a civil penalty under this subsection does not preclude any other criminal or civil statutory, common law, or administrative remedy, which is available by law to the United States or any other person.

"(c) Whenever it appears that any person is engaged or is about to engage in any conduct that constitutes or will constitute an offense under section 203, 204, 205, 207, 208, 209, or 220 of this title, the Attorney General may initiate a proceeding in a district court of the United States to enjoin such conduct. The court shall proceed as soon as practicable to the hearing and determination of such an action and may, at any time before final determination, enter such a restraining order or prohibition, or take such other action, as is warranted to prevent a continuing and substantial injury to the United States or to any person for whose protection the action is brought. A proceeding under this section is governed by the Federal Rules of Civil Procedure, except that, if an indictment has been returned against the respondent, discovery is governed by the Federal Rules of Criminal Procedure.".

(d) TABLE OF SECTIONS.—The section heading for chapter 11 of title 18, United States Code, is amended by inserting after the item relating to section 215 the following:

"216. Penalties and injunctions.".

SEC. 408. PROHIBITION ON CONTINGENCY FEES FOR LOBBYISTS OF THE EXECUTIVE AND LEGISLATIVE BRANCHES.

(a) IN GENERAL.—Chapter 11 of title 18, United States Code, is amended by—

(1) inserting between sections 219 and 223, the following new section:

"§ 220. Contingency fees in lobbying

"(a)(1) It shall be unlawful for any person knowingly to be employed as an agent or attorney for or otherwise represent any person other than the United States, or with intent to influence, to be employed to make any oral or written communication on behalf of any other person other than the United States to any department, agency, court, or commission of the United States, or any officer or employee for compensation if such compensation is dependent in any way—

"(A) upon any action of Congress, including but not limited to actions of either the House of Representatives or the Senate, or any committee or member thereof, or the passage or defeat of any proposed legislation;

"(B) upon the securing of an award, or upon the denial of an award, of a contract or grant by establishment of the Federal Government; or

"(C) upon the securing, or upon the denial, of any Federal financial assistance or any other Federal contract or grant.

"(2) The provisions of paragraph (1) shall not apply in any case involving the collection of any amount owed on a debt owed to a person by the Federal Government or a contract or tort claim against the Federal Government.

"(b) Any person who violates the provisions of this section shall be subject to the penalties set forth in section 216 of this title."; and

(2) amending the table of sections by striking out the item between the item relating to section 219 and the item relating to section 224 and inserting in lieu thereof the following:

"220. Contingency fees in lobbying.".

(b) EFFECTIVE DATE.—This section and the amendments made by this section shall become effective on the date of enactment of this Act and shall apply to any contract entered into on or after such date of enactment.

TITLE V—OTHER ETHICS REFORMS

SEC. 501. REFERRAL OF ETHICS VIOLATIONS BY THE SENATE ETHICS COMMITTEE TO THE GENERAL ACCOUNTING OFFICE FOR INVESTIGATION.

If the Committee on Ethics of the Senate determines that there is a reasonable basis to believe that a Member, officer, or employee of the Senate may have committed an ethics violation, the committee may request the Office of Special Investigations of the General Accounting Office to conduct factfinding and an investigation into the matter. The Office of Special Investigations shall promptly investigate the matter as directed by the committee.

SEC. 502. DEFERRAL OF CAPITAL GAINS FOR INDIVIDUALS DIVESTING ASSETS TO AVOID A CONFLICT OF INTEREST.

(a) IN GENERAL.—Part III of subchapter O of chapter 1 of the Internal Revenue Code of 1986 is amended by adding at the end thereof the following new section:

"SEC. 1043. SALE OF PROPERTY TO COMPLY WITH CONFLICT-OF-INTEREST REQUIREMENTS.

"(a) NONRECOGNITION OF GAIN OR LOSS FROM SALES OR OTHER DISPOSITIONS.—No gain or loss shall be recognized on the sale or other disposition of property held for productive use in a trade or business or for investment by an eligible person pursuant to a certificate of divestiture if the proceeds of sale are reinvested in an approved neutral investment within the period prescribed in subsection (e).

"(b) GAIN FROM PARTIAL REINVESTMENTS.—If any proceeds of a sale or other disposition described in subsection (a) are not reinvested in an approved neutral investment within the period prescribed in subsection (e), then the gain, if any, to the taxpayer shall be recognized, but in an amount not in excess of the amount of such proceeds.

"(c) LOSS FROM PARTIAL REINVESTMENTS.—If any proceeds of a sale or other disposition described in subsection (a) are not reinvested in an approved neutral investment within the period prescribed in subsection (e), then no loss shall be recognized.

"(d) DEFINITIONS.—For purposes of this section—

"(1) ELIGIBLE PERSON.—The term 'eligible person' means—

"(A) an officer or employee of the executive branch (other than a special Government employee as defined in section 202 of title 18, United States Code); and

"(B) a spouse or minor or dependent child, who holds property, the ownership of which is attributed, pursuant to any Federal conflict of interest statute, regulation, or rule, to a person described in subparagraph (A).

"(2) CERTIFICATE OF DIVESTITURE.—The term 'certificate of divestiture' means a written determination that—

"(A) divestiture of specific property is reasonably necessary to comply with section 208 of title 18, United States Code, or any other Federal conflict of interest statute, regulation, or rule;

"(B) has been issued by the Director of the Office of Government Ethics; and

"(C) identifies the specific property of which divestiture is required.

"(3) APPROVED NEUTRAL INVESTMENT.—The term 'approved neutral investment' means obligations of the United States Treasury or a diversified investment fund which is approved by the Office of Government Ethics pursuant to regulations issued by the Director of the Office of Government Ethics.

"(e) REINVESTMENT PERIOD.—Subsection (a) shall apply to reinvestments in an approved neutral investment made within 60 days after the later of—

"(1) the date of the sale or other disposition, or

"(2) the date of the certificate of divestiture.

"(f) SALE OR OTHER DISPOSITION PRIOR AND SUBSEQUENT TO ISSUANCE OF CERTIFICATE OF DIVESTITURE.—Subsection (a) shall apply to all sales or other dispositions of property identified in a certificate of divestiture that

are made by an eligible person and that occur within the period beginning on the date of the issuance of the certificate of divestiture and ending 60 days subsequent to the issuance of such certificate.

"(g) BASIS.—The basis of an approved neutral investment acquired in a transaction described in this section shall be the same as that of the property sold or otherwise disposed of, decreased by the amount of any proceeds received by the taxpayer which was not reinvested in an approved neutral investment within the period prescribed in subsection (e), and increased by the amount of gain to the taxpayer recognized in the transaction. If more than one approved neutral investment is made, the basis determined under this subsection shall be allocated to the approved neutral investments in proportion to their respective costs.

"(h) REGULATIONS.—The Director of the Office of Government Ethics shall prescribe such regulations as may be appropriate to carry out the purposes of this section. Certificates of divestiture shall be issued pursuant to such regulations and shall be made available for public inspection.".

(b) AMENDMENT TO TABLE OF CONTENTS.—The table of sections for part III of subchapter O of chapter 1 of the Internal Revenue Code of 1986 is amended by adding at the end thereof the following new item:

"Sec. 1043. Sale of property to comply with conflict-of-interest requirements.".

SEC. 503. PROHIBITING MEMBERS OF CONGRESS FROM CONVERTING EXCESS CAMPAIGN FUNDS.

Section 313 of the Federal Election Campaign Act of 1971 (2 U.S.C. 439a) is amended by striking all beginning with "with respect to" through "January 8, 1980,".

SEC. 504. AMENDMENT TO 2 U.S.C. 441i.

Section 323 of the Federal Election Campaign Act of 1971 (2 U.S.C. 441i) is amended—

(1) by amending subsection (d) to read as follows:

"(d) For purposes of determining the time of acceptance of an honorarium, an honorarium shall be treated as accepted only in the year in which that honorarium is earned.".

(2) by adding at the end the following new subsection:

"(e) This section shall be administered by the supervising ethics office of each branch of Government, as defined in section 109(18) of the Ethics in Government Act, for employees of such branch.".

SEC. 505. REPEAL OF CERTAIN OBSOLETE PROVISIONS.

(a) RESTRICTION ON PAYMENT TO CERTAIN RETIRED MILITARY OFFICERS.—Subsection (a) of section 801 of title 37, United States Code, is repealed.

(b) INTERIOR APPROPRIATIONS.—Section 319 of the Act of September 27, 1988 (Interior Department Appropriations, Fiscal Year 1988) (Public Law 100-446, 102 Stat. 1774, 1826) is repealed.

TITLE VI—RULEMAKING POWER OF THE CONGRESS.

SEC. 601. RULEMAKING POWER OF THE CONGRESS.

The provisions of this Act that are applicable to Members, officers, or employees of the legislative branch are enacted by the Congress—

(1) as an exercise of the rulemaking power of the House of Representatives and the Senate, respectively, and as such they shall be considered as part of the rules of each House, respectively, or of that House to which they specifically apply, and such rules shall supersede other rules only to the extent that they are inconsistent therewith; and

(2) with full recognition of the constitutional right of either House to change such rules (so far as relating to such House) at any time, in the same manner, and to the same extent as in the case of any other rule of such House.

LEVIN-RUDMAN ETHICS BILL: SECTION-BY-SECTION ANALYSIS

TITLE I—POST EMPLOYMENT LOBBYING PROHIBITIONS

Title I of the bill revises the current post-employment lobbying statute, by expanding the coverage to Members and top staff of Congress, by barring the very top Executive Branch officials from lobbying all other top Executive Branch officials in addition to their own agency, and by making other changes. Title I is similar to a bill passed by the Congress and sent to the President in the last Congress.

Section 101. Post Employment Restrictions.

207(a)(1). Similar to current law. Bars all Executive Branch employees from lobbying anywhere in the federal government (and District of Columbia employees from lobbying anywhere in the District of Columbia), on behalf of another person, on a particular matter involving specific parties in which they were personally and substantially involved and in which the United States (or the District of Columbia) has a direct interest. This is a lifetime ban.

207(a)(2). Similar to current law. Bars all Executive Branch employees from lobbying anywhere in the federal government (and District of Columbia employees from lobbying anywhere in the District of Columbia) on behalf of another person, on a particular matter involving specific parties, which the employees know or should know was under their official responsibility within the year preceding termination of government service and in which the United States (or the District of Columbia) has a direct interest. This is a 2 year ban.

207(b). Change to current law. Prohibits any Executive Branch employee who was personally and substantially involved in a trade or treaty negotiation on behalf of the United States within the 2 year period preceding termination, from representing, aiding or advising any other person concerning such negotiation. This is a 1 year ban.

207(c). Similar to current law. Bars Executive Branch employees who are paid at or above the GS-17 level and comparable military officers (current law applies only to certain designated GS-17's, members of the Senior Executive Service and comparable military officers) from lobbying their former agency on behalf of another person, on any matter which is pending before such agency or on which such person seeks official action by such agency. This is a 1 year ban.

207(d). Change to current law. Bars all Executive Branch employees who are Executive Level I's and II's from lobbying not only their former agency on behalf of another person on any matter which is pending before such agency or on which such person seeks official action by such agency, as in (c), above, but also bars such employees from lobbying any employee at Executive Levels I through V in any agency. The President would be barred from lobbying anywhere in the Executive Branch. This is a 1 year ban.

207(e). Change to current law. Legislative Branch prohibitions. These are 1 year bans and apply to lobbying on behalf of another person in connection with a matter on which official action is sought.

(1) Bars Members of Congess from lobbying anywhere in the Legislative Branch. Elected officers of each house are barred from lobbying their respective houses.

(2) Personal staff to a Senator or Representative are barred from lobbying their former Member, their former offices and the employees of the Committees and Subcommittee on which their Member served as either Chairman or Ranking Minority Member.

(3) Committee staff are barred from lobbying the Members and staff of their former committee, Members who were on the committee at the time the former staff was employed by the committee, and the personal staffs of the Member who had employed them.

(4) Leadership staff are barred from lobbying the Members and employees of the leadership for the house in which they served and the personal staff of the Member who employed them.

(5) Employees of the other Legislative Branch agencies, such as GAO and the Library of Congress are barred from lobbying their former agencies.

(6) The prohibitions for Legislative Branch employees apply to those employees compensated at a rate equal to or greater than that paid to a GS-17.

(7) Definitions of Congressional Members and staff.

207(f). Change to current law. Bars any person from representing that they are lobbying on behalf of a person who is barred form such lobbying.

207(g). Change to current law. Bars any former employee of the Executive or Legislative Branch who was paid at a rate of GS-17 or above, including the President and Vice President, from representing, aiding or advising a foreign government or foreign political party in a matter before any department or agency of the United States. This is a 1 year ban.

207(h). Requires that any person who is detailed from one agency to another agency shall be deemed, for purposes of this Section as an officer or employee of both agencies.

207(i). Similar to current law. Allows the Office of Government Ethics to designate separate statutory agencies or bureaus within a department or agency in the Executive Branch for purposes of 207(c). Unlike current law, however, it explicitly prohibits any agency or bureau within the Executive Office of the President from being so designated and does not allow any designation to apply to persons employed in Executive Levels III, IV and V.

207(j). Definitions. Some of the terms that are used throughout the Section in current law, have been placed in the definitions section for easier reading.

207(k). Exceptions. Similar to current law.

(1) Excludes any person serving as an officer or employee of the United States or as an elected official of a state or local government from coverage of the lobbying restrictions.

(2) Excludes employees of State or local governments from the one-year lobbying bans if the lobbying is on behalf of such government and excludes employees of an accredited, degree-granting institution or a tax-exempt hospital or medical research organization from the one-year lobbying bans

if the lobbying is related to an effort to obtain a grant through a competitive process.

(3), (4) Makes exceptions of the 1 year ban in (c), (d) and (e) for a communication or appearance on behalf of an international organization of which the United States is a member, personal matters such as income taxes or pension benefits, and making a statement as a witness.

(5) Makes an exception of all the lobbying bans for communications made solely to supply scientifc or technological information, provided the information is provided in the prescribed manner.

(6) Makes an exception of all the restrictions in this Section for giving testimony under oath or penalty of perjury.

207(1). Change to current law. Penalties. The penalties are the same as those for violations of other sections of the criminal ethics laws. See the description of Section 216, below.

Section 102. Effective date. The effective date for this section is 9 months after the date of enactment. For persons who terminate their employment with the federal government prior to the effective date, the provisions of current law apply.

TITLE II—FINANCIAL DISCLOSURE OF FEDERAL PERSONNEL

Title II of the bill would revise the financial disclosure provisions for legislative, executive, and judicial employees that are currently included in three separate titles of the Ethics in Government Act. Under the bill these provisions would be merged into a single title, covering all three branches of government. Section 201 of the bill would repeal Titles II and III of the Ethics in Government Act. Section 202 would amend Title I of the Act to cover all three branches.

New Section 101 of the amended disclosure provisions would take the filing requirements in Section 201 of existing law (applicable to the executive branch) and extend them to the legislative and judicial branches. The supervising ethics office for each branch would be responsible for prescribing appropriate rules and regulations and for granting extensions and waivers. This would not be a substantive change to the filing requirements for any of the three branches.

In addition, Section 101 would:

(a) require financial disclosure by employees in the Executive Office of the President who hold commissions of appointment from the President;

(b) clarify the requirement for financial disclosure by persons subject to Senate confirmation to exempt foreign service officers who are compensated at less than a GS-15 rate (a similar exemption already exists for military officers);

(c) eliminate the financial disclosure requirement for advisory committee staff members who are compensated at less than a GS-16 rate; and

(d) extend financial disclosure requirements to congressional staff who are paid at a GS-15 level or higher (this is done through a new definition of "officer or employee of Congress" in section 109).

New Section 102 states what must be included in financial disclosure reports. Section 102 would change current law by:

(a) creating a new category of disclosure for income in excess of $1,000,000 and raising the de minimis level below which income need not be disclosed from $100 to $200;

(b) raising the de minimis level below which gifts need not be reported from $35 to $75;

(c) narrowing the disclosure exception for loans from family members to cover only loans from spouses, parents, brothers, sisters, or children;

(d) creating two new categories of disclosure for assets from $500,000 to $1,000,000 and assets in excess of $1,000,000 and changing the bottom category to not more than $15,000;

(e) requiring disclosure of gifts received by a dependent child which are not received independent of the relationship to the reporting individual; and

(f) raising civil penalties from $1,000 and $5,000 to $5,000 and $10,000.

New Section 102 would also change the rules governing qualified blind trusts by clarifying the requirement that the trustee be independent of the reporting individual; extending the existing disclosure exemption for widely diversified trust assets to qualified blind trusts created by individuals in all three branches of government; and creating a new disclosure exemption for financial interests held by a widely held and widely diversified investment fund over which the reporting individual exercises no control. Nothing in this section is intended to preclude a supervising ethics office for a branch of government from adopting more restrictive requirements applicable to blind trusts created by officers or employees of such branch.

New Section 103 states with whom reporting individuals would be required to file. Under this provision, officers and employees of each branch would continue to file financial disclosure reports with the supervising ethics office for their own branch.

New Section 104 addresses failure to file and filing of false reports. This provision would increase the civil monetary penalty for knowing and willful failure to file to $10,000. In addition, the section would create a new late filing fee of $200 for individuals who file disclosure reports more than 30 days after such reports are due (including applicable extensions). The supervising ethics office for each branch would be authorized to waive this late filing fee in extraordinary circumstances.

New Section 105 addresses public access to reports. This section would change current law by allowing 30 days before financial disclosure reports are made public. In addition, it would clarify that reports filed by independent counsels whose identity has not otherwise been disclosed to the public are not required to be made public.

New Section 106 establishes procedures for the review of reports. This section would not change review procedures applicable to the executive branch. Financial disclosure statements filed by officers and employees of the Senate, House, and the judicial branch would be reviewed by the Senate Ethics Committee, the House Committee on Standards of Conduct, and the Judicial Ethics Committee, respectively. Each of these supervising ethics offices would be responsible for determining if additional information is required; notifying filing individuals if they are not in accordance with applicable laws and regulations; and determining what additional steps are necessary to assure such compliance. Each supervising ethics office is authorized to issue advisory opinions interpreting financial disclosure requirements for its branch.

New Section 107 would authorize the supervising ethics offices to require officers and employees within its jurisdiction to file confidential financial disclosure reports, in addition to the statutorily required public reports. Nothing in this section is intended to exempt any individual from the requirement to file a public financial disclosure report, if the individual is otherwise covered by the requirement.

New Section 108 would require the Comptroller General to conduct regular studies to determine whether the financial disclosure requirements are effectively carried out.

New Section 109 contains applicable definitions, including new definitions of "Member of Congress", "officer or employee of Congress", "judicial officer", "judicial employee", "congressional ethics committees", "Judicial Ethics Committee", "legislative branch", and "supervising ethics office."

New Section 110 would retain the existing restriction on outside earned income for executive branch officers or employees and add a new prohibition against individuals in all three branches (a) serving on the board of directors of any for-profit corporation or (b) serving for pay on the board of a nonprofit corporation or entity. The new prohibition could be waived by the supervising ethics office for each branch of government, which would also be free to impose more restrictive rules.

New Section 111 would extend to all three branches of government a provision that currently requires executive branch officials to notify the Office of Government Ethics and appropriate congressional committees of actions taken to comply with ethics agreements made with such committees. If no ethics agreement is made with OGE, a congressional committee, or the judicial ethics committee, no action is required under this section.

New Section 112 is a new provision which would clarify that each branch of government continues to be responsible for the administration of financial disclosure requirements with respect to its own officers and employees.

New Section 113 makes the new financial disclosure provisions applicable to reports containing information for calendar year 1990.

Title II of the bill contains two additional provisions. Section 203 of the bill would change the Senate rules to require the Ethics Committee to transmit a copy of each financial disclosure report filed with it to the head of the employing office of the individual filing the report. Section 204 of the bill would create a new Presidential Commission on the federal appointment process, as requested by the President. Six members of this commission would be appointed by the President, and two each by the Majority and Minority leaders of the Senate.

TITLE III—GIFTS AND TRAVEL

Title III of the bill addresses the acceptance of gifts and travel by federal employees.

Section 301 would amend Section 7351 of Title 5, which prohibits executive branch employees from giving anything of value to his superiors. The amendment would authorize the Office of Government Ethics to issue regulations exempting certain categories of gifts from the statue and would subject employees who violate the section to appropriate disciplinary action.

Section 302 would create a new provision, 31 U.S.C. 1352, authorizing executive branch agencies to accept payment or reimbursement from non-federal entities for travel and other expenses incurred by employees in attending meetings, conferences

and similar functions. Regulations implementing this section would be prescribed by the General Services Administration in consultation with the Office of Government Ethics. The provision would require the public disclosure of all payments and reimbursements so accepted (in excess of $250) through the Office of Government Ethics.

Section 303 would create a new provision, 5 U.S.C. 7353, prohibiting officers and employees of all three branches from soliciting or accepting anything of value from a person seeking official action, doing business with, or conducting activities regulated by the individual's employing agency. The provision authorizes each supervising ethics office to issue implementing rules or regulations providing for such reasonable exceptions as may be appropriate. Employees who violate this provision (as implemented by rules and regulations applicable to his or her branch) are subject to appropriate disciplinary action. Nothing in this section is intended to create any exemption or exclusion from the criminal bribery statute, 18 U.S.C. 201(b).

Section 304 would amend the Senate rule XXXV on gifts and travel to make the following changes:

(a) Delete the exception in the existing rule which permits unlimited gifts of entertainment;

(b) Limit necessary travel expenses that may be paid or reimbursed by a private source to 3 days of domestic travel or 7 days of foreign travel (exclusive of travel time) for a Member, officer or employee, a spouse, and one Senate employee acting as an aide;

(c) Raise the de minimis level for gifts from $35 to $75; and

(d) Retain existing restrictions on gifts from persons with a direct interest in legislation and add a new restriction limiting gifts from any other source (other than a relative) to an aggregate value of $300.

The restrictions contained in the amended Senate gifts rules are intended to be interpreted broadly, and the exceptions are intended to be interpreted narrowly. The amended gifts rules are intended as a rule or regulation implementing 5 U.S.C. 7353, as provided in Section 303 of the bill.

TITLE IV—AMENDMENTS TO TITLE 18, UNITED STATES CODE

Title IV of the bill would amend the criminal ethics laws in Title 18 of the U.S. Code.

Section 401 would amend 18 U.S.C. 202 to add new definitions of the statutory terms "officer", "Member of Congress", "executive branch", "judicial branch" and "legislative branch". These new definitions are consistent with existing law, except that the definition of "Member of Congress" is revised to include all Delegates and Resident Commissioners to the Congress.

Section 402 would amend 18 U.S.C. 203, which prohibits Members, officers and employees in all three branches from accepting compensation for services in any proceeding in which the United States is a party or has a direct and substantial interest. The amendment would make the following changes:

(a) Clarify that the "services" prohibited are "representational services as agent or attorney or otherwise";

(b) Replace existing criminal penalties with the alternative felony, misdemeanor, and civil penalties provided in new Section 216;

(c) Treat employees of the District of Columbia separately from other federal employees; and

(d) Clarify the section by placing certain provisos, which are currently codified in 18 U.S.C. 205, directly in the provision itself.

Section 403 would amend 18 U.S.C. 204, which prohibits Members of Congress from practicing before the U.S. Claims Court and the Court of Appeals for the Federal Circuit to replace existing criminal penalties with the alternative felony, misdemeanor, and civil penalties provided in new Section 216.

Section 404 would amend 18 U.S.C. 205, which prohibits officers and employees of the executive, legislative, and judicial branches from acting as agent or attorney in claims against the United States, or in which the United States is a party or has a substantial interest. The amendment would:

(a) Replace existing criminal penalties with the alternative felony, misdemeanor, and civil penalties provided in new Section 216;

(b) Treat employees of the District of Columbia separately from other federal employees; and

(c) Clarify certain provisos in the section by deleting references to separate prohibitions in 18 U.S.C. 203.

Section 405 would amend 18 U.S.C. 208, which prohibits conflicts of interest for executive branch employees. The amendment would create new statutory exceptions for (a) certain special Government employees serving on advisory committees and (b) certain conflicts of interest that result solely from the birth rights of native Americans. The amendment would also clarify that regulations excepting certain categories of employees or certain types of financial interests from the rule may be issued only by the Office of Government Ethics and would require that all waivers granted pursuant to such regulations be made available to the public. Finally, the amendment would replace existing criminal penalties with the alternative felony, misdemeanor, and civil penalties provided in new Section 216.

Section 406 would amend 18 U.S.C. 209, which prohibits the supplementation of the salary of an executive branch officer or employee to replace existing criminal penalties with the alternative felony, misdemeanor, and civil penalties provided in new Section 216.

Section 407 would create a new section of the criminal code, 18 U.S.C. 216, which would create alternative felony, misdemeanor, and civil penalties for Sections 203, 204, 205, 207, 208, 209, and 220, and authorize the Attorney General to seek an injunction against ongoing conduct that violates these sections.

The new misdemeanor penalty for violations of the enumerated sections is a sentence of not more than one year. The new felony penalty, which applies to willful violations, is a sentence of not more than five years. The civil penalty is a fine of up to $50,000. The civil penalty is not intended to be exclusive of any other form of relief otherwise available to the United States or any other party.

Section 408 would add a new section of the criminal law, 18 U.S.C. 220, which would prohibit contingency fees for lobbying federal officials. Subsection (a)(2) exempts contingency fees paid in connection with litigation. Alternative criminal, misdemeanor, and civil penalties are provided in new Section 216.

TITLE V—OTHER ETHICS REFORMS

Section 501 of the bill would authorize the Senate Ethics Committee to refer matters to the Office of Special Investigations of the General Accounting Office, whenever there is a reasonable basis to believe that a Member, officer, or employee of the Senate has committed an ethics violation.

Section 502 would amend the Internal Revenue Code to provide a tax deferment to executive branch appointees who are required to divest capital assets as a condition of taking office.

Section 503 would amend the Federal Election Campaign Act of 1971 by deleting the "grandfather clause" which permits Members elected before January 9, 1980 to convert excess campaign funds to personal use.

Section 504 would amend 2 U.S.C. 441i to clarify that honoraria are treated as accepted in the year in which they are earned (not the year in which they are received) and that the supervising ethics office of each branch of government is responsible for administering this provision.

Section 505 would repeal 37 U.S.C. 801(a) (restricting payment to certain retired military officers) and Section 319 of the Interior Department Appropriations Act for Fiscal Year 1988 (which is no longer necessary in light of the bill's amendment to 18 U.S.C. 208 dealing with Indian birthrights).

Mr. RUDMAN. Mr. President, let me first just say something about my friend from Michigan, Senator LEVIN. This is not the first time we have worked together over the last 9 years on a number of issues. He brings an extraordinarily keen legal mind, a highly developed sense of ethics, and an important desire to accomplish the things that need to be accomplished. It has been a pleasure working with him and, I might add, working with those on the House side.

I was kind of interested, Mr. President, to see in one of the local newspapers, the Washington Post, this morning a story that said we had "cobbled together"—that is a quote—this ethics bill in the last day or two. It goes to show you how much attention that reporter pays to what goes on around here. This was a 7-month ongoing effort with the House to try to come up with an agreed consensus and a bipartisan bill. It is bipartisan in every sense.

Mr. President, Senator LEVIN and I are today introducing the Government Ethics Reform Act of 1989. This measure is the most comprehensive overhaul of Government ethics statutes and Senate ethics rules in over a dozen years. It is a strong measure which will help ensure both the actuality and appearance of high ethical standards in Government. At the same time, it recognizes that ethics rules and regulations must be clear, easy to obey, and cannot be so intrusive that the most qualified individuals become unwilling to accept Government employment.

This measure is the product of 11 months of work. It builds on the report of the Commission on Federal Ethics Law Reform, which President Bush created in January, and the Governmentwide Ethics Act of 1989 that he proposed on April 12.

The Senate majority and minority leaders followed up on the President's action by appointing special ethics task forces to review the many complicated issues that fall within the area of ethics reform. Senator LEVIN and I had the fortune, maybe misfortune, to be named as the respective chairmen. We have been working with our task forces, the administration, the House, and each other since then, and today's bill is the product.

The reason it took so much work to produce this bill, and the reason both sides had to appoint task forces to address the subject, is because of the wide-ranging nature of the issues that fall under the label of ethics. That is evidenced by this bill; it contains provisions within the jurisdiction of the Governmental Affairs, Judiciary, Rules, Finance, and Ethics Committees.

Title I of this bill extends the post-employment contact prohibitions to Congress, and strengthens the law for all three branches. It builds on the legislation which Congress passed in 1988, sponsored by Senators THURMOND and METZENBAUM, but which unfortunately failed to become law.

Title II of the measure establishes uniform financial disclosure requirements for all three branches, and make some important reforms in those requirements. These include requiring termination reports in the legislative branch as is already required for the executive and the judiciary, creating new categories for asset valuation to help better identify serious conflicts of interest, requiring disclosure of loans from nonimmediate relatives, and strengthening the process for review of financial disclosure reports to identify conflicts of interest. This title also includes new restrictions on Board service applicable to the entire government.

Title III of the bill imposes new gift and travel limits on the Senate to ensure that there is no appearance of impropriety when Senators and staff accept gifts or travel. The key provisions are elimination of the provision in the Senate rule which permits unlimited acceptance of entertainment and the imposition of a new ceiling on the size of gifts from individuals without a direct interest in legislation, including friends and acquaintances. The existing $100 ceiling on gifts from so-called "prohibited sources"—that is, lobbyists, individuals running a political action committee, and officers and directors of organizations which employ a lobbyist or maintain a PAC—remains in effect. Title III also imposes limits on all non-Government paid travel where the Senator is receiving reimbursement for his expenses. The limit would be 3 days for domestic trips and 7 days for foreign travel. This new restriction is in addition to the restrictions which already exist in Senate rules. Finally, this title includes language requested by President Bush relating to the acceptance of gifts and reimbursements for travel relating to the executive branch.

Title IV includes a number of clarifying and technical provisions to the criminal ethics laws found in sections 201 to 209 of title 18 of the United States Code. We would also strengthen the enforcement of these laws by authorizing civil and misdemeanor penalties and permitting the Attorney General to seek injunctions to stop the offensive behavior.

Finally, title V includes a number of miscellaneous reforms. These include the repeal of the grandfather clause which permits retiring Members to convert excess campaign funds to personal use, and a tax rollover provison requested by the administration to enable officials to defer tax payments resulting from capital gains when the official is required to sell property to avoid conflicts of interest.

To answer the most common question before it is asked, there is nothing in this measure relating to congressional pay, honoraria, or campaign finance reform. These are three extremely important issues which are being worked on by other Members. They are not within the jurisdiction of the task forces headed by Senator LEVIN and me.

In closing, Mr. President, I would like to express my appreciation to Senator LEVIN for his hard work and excellent counsel in developing this bill. This is a truly bipartisan bill, which reflects the fact that ethics is not a partisan issue. I would also like to commend the Republican Ethics Task Force for their work and assistance in developing the measure. The counsel and advice of Senator THURMOND, Senator STEVENS, Senator ROTH, Senator DANFORTH, Senator WALLOP, and Senator LOTT, with their extensive experiences in this area, has been truly invaluable.

Finally, I would urge all my colleagues to carefully review this measure immediately. This is an important bill which affects the entire Government, including the Senate, is likely to be brought before the Senate for consideration prior to adjournment, and Members should be familiar with it.

Let me also pay tribute to the majority leader, Senator MITCHELL, and the minority leader, Senator DOLE, who mandated these two task forces to come together and work for the agreed solution which we have.

I wish to point out that there was one thing not incuded in this particular package of legislation, and that, of course, relates to congressional pay, honoraria, or campaign reform. Those three issues were not assigned to this task force. They are being handled by the leadership or by other committees with primary jurisdiction.

I hope that the House will act on this fairly promptly and that when it gets to the Senate, we will have discussion, debate, and an overwhelming vote for this package, which truly is substantial reform in the area of ethics.

By Mr. KENNEDY:

S. 1883. A bill to amend the Public Health Service Act to establish a center for tobacco products, to inform the public concerning the hazards of tobacco use, to disclose and restrict additives to such products, and to require labeling of such products to provide information concerning such products to the public, and for other purposes; to the Committee on Labor and Human Resources.

TOBACCO PRODUCT EDUCATION AND HEALTH PROTECTION ACT OF 1990

● Mr. KENNEDY. Mr. President, we are here today to announce the introduction of legislation proposing a new national effort to reduce smoking and tobacco use in our society.

In the past quarter century, we have learned a great deal about the harmful effects of smoking, but our response has consistently been inadequate. The power and influence of the private tobacco industry have overwhelmed the public interest.

People across the country are ahead of Congress on this issue. Encouraged by the success of local initiatives, the Senate and the House have begun to take more effective action such as Senator LAUTENBERG's measure to ban smoking on airplanes.

We believe that the time is ripe for far reaching additional antismoking legislation. If the town of Greensboro, NC, can successfully challenge the tobacco lobby, so can Congress.

In the past quarter century, we have learned a great deal about the harmful effects of smoking. Tobacco use is public health enemy No. 1 in America today.

It is the leading preventable cause of death. One out of every six Americans who die this year will die from tobacco use—390,000 deaths a year, 1,000 funerals a day. Smoking causes 87 percent of lung cancer and 33 percent of all cancers. It causes 40 percent of heart disease, 18 percent of strokes, and 10 percent of infant mortality.

We cannot win the battle against these diseases unless we win the battle against tobacco use.

One of the most ominous aspects of the problem is that smoking starts so early. Cigarette manufacturers cynically claim that their lavish advertising campaigns are aimed at young adults—but they often hook young children too.

Ninety percent of all smokers begin before age 20. Forty percent begin between 15 and 19, 25 percent between 12 and 14, and 25 percent before age

12. These children and teenagers are making a choice they do not understand and are likely to regret.

Once young citizens begin to smoke, it is difficult to stop. By graduation, 53 percent of high school students who smoke half a pack a day have tried to stop and found that they can't. Ninety-five percent of daily smokers believe they will not be smoking in 5 years—but only 25 percent achieve that goal.

Cigarettes are also the gateway to illegal drugs. Virtually all children involved in hard drug use and drug abuse began with cigarettes.

It is just as difficult for adults to stop. Eighty percent of current smokers express a desire to do so—but two-thirds have made a serious effort and failed.

The purpose of the legislation we are introducing today is to help people stop smoking before they start, and to assist smokers who wish to stop. State health directors across the country have already made these objectives a high priority, and it is time for Congress to support this effort.

A key part of our approach is reliance on counteradvertising—and we have a lot to counter.

Congress banned radio and television advertising of tobacco in 1971, but it is still one of the most heavily advertised products in America today. In 1981, it was the most heavily advertised product. In 1986, the industry spent $2.5 billion on advertising and promotion.

Advertisements in magazines which appeal to youth and sponsorship of sports events, rock concerts, and similar entertainment demonstrate the intended focus on the young. Strategic placement of tobacco product names and logos at such events are used to circumvent the ban on broadcast advertising.

Women are also a special target. The unprecedented marketing of a cigarette intended solely for women, the sponsorship of events geared to women such as the Virginia Slims Tennis Tournament in New York City this week, and heavy advertising in women's magazines have had their intended effect. Women under 23 are the only population group where smoking is on the rise.

The tobacco industry piously pretends that its advertising is intended solely to entice smokers to switch brands. I say, nonsense.

To see tobacco ads is to understand that they are also intended to encourage Americans to smoke. Most smokers stay with the brand they started with as a teenager. Only 10 percent of smokers switch brands annually. The industry must recruit 6,000 new users a day to replace smokers lost because they stop or die.

The industry also claims that additional public education is unnecessary. They say that everyone already knows the danger, and that 52 million Americans still choose to smoke.

My response is, we shall see. Surveys show that many Americans are still ignorant about the dangers of tobacco:

Thirty-four percent of high school seniors don't believe that smoking a pack a day causes great risk of harm.

Thirty-two percent of women of childbearing age don't know that smoking causes stillbirths.

Another 30 percent of smokers don't know that smoking causes heart disease.

Nearly 30 percent disagree that most deaths from lung cancer are caused by cigarettes.

The 25th anniversary report of the Surgeon General provides impressive evidence that education works. The rate of smoking by the most educated Americans is less than half the rate by the least educated. We intend to target our counteradvertising to reach this segment of the population.

The minimum effort the Federal Government has made so far has been entirely inadequate. This year's budget for the Office of Smoking and Health is less than $3.5 million. The resources of the major voluntary organizations that provide information about smoking have never exceeded 2 percent of industry expenditures for advertising.

The bill we are proposing today is intended to protect public health by educating the public about tobacco. It establishes a new Center for Tobacco Products at the Federal Centers for Disease Control in the Public Health Service to carry out the following major responsibilities.

First, the new center will oversee a $50 million a year counteradvertising campaign to educate the public and get the antismoking message to the Nation. The amount is only 2 percent of the industry budget. It is still a David-and-Goliath battle, but at least we are providing enough to pay for David's slingshot.

Second, the center will have authority over tobacco product additives, just as the Food and Drug Administration has for many other the products that affect the public health. It is time to end the disgraceful abdication of Federal responsibility that makes tobacco the only consumer product today that has serious consequences for public health but that is essentially uncontrolled. Additives to food are strictly regulated by the FDA, and it is time to stop permitting the industry to treat additives to tobacco as trade secrets.

Third, the center will provide $50 million in incentive grants to assist the States in enforcing local laws that ban the sale of cigarettes to minors. Forty-three States have such laws today—but none are adequately enforced. Most of these laws were passed in a different era, when smoking was a moral issue, but not yet a public health issue. As more States seek effective means to enforce their laws, it is appropriate for the Federal Government to help.

Fourth, the center will implement a $5 million program of grants to 10 to 20 States to support antismoking efforts targeted on high risk individuals such as school dropouts, minorities, pregnant women, and blue collar workers.

Fifth, the center will implement a $5 million Workplace Intervention Program of grants to labor organizations and other groups that work with employers to reduce the incidence of smoking on the job.

The legislation also repeals the Federal preemption of State regulation of local tobacco advertising. Across the country, citizens are prepared to take more effective action against advertising and promotion in their communities. This provision will allow them to go ahead.

Finally, the legislation provides $25 million in assistance to elementary and secondary schools to encourage them to address tobacco use among students and create smoke free environments. It also adds tobacco to the mandate of the drug free schools legislation enacted in 1986.

This legislation will be controversial, but I intend to give it high priority, and I hope that it can be enacted before Congress adjourns next year for the 1990 elections.

It is no coincidence that virtually all major medical and public health groups in the Nation are united in support of this initiatve. Many of them are represented here today. I commend them for their lonely leadership in the past, and I look forward to their assistance in this effort.

I ask unanimous consent that the full text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1883

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Tobacco Product Education and Health Protection Act of 1990".

SEC. 2. FINDINGS AND PURPOSES.

(a) FINDINGS.—Congress finds that—

(1) despite a steady decline in tobacco consumption, 52,000,000 Americans still use tobacco products annually;

(2) tobacco use causes nearly 400,000 deaths each year in the United States, the equivalent of over 1,000 deaths a day;

(3) tobacco use is the most important cause of death and illness in the United States today, causing one sixth of all deaths annually;

(4) in 1985, the private and public sectors in the United States spent approximately $22,000,000,000 on smoking-related illnesses

and absorbed $43,000,000,000 in economic losses from such illnesses;

(5) 50 percent of all smokers begin using tobacco by the age of 14, and 90 percent of all smokers begin using tobacco before the age of 20;

(6) nicotine-containing tobacco products are addictive;

(7) most young people initiate tobacco use and become addicted before they are sufficiently informed or mature enough to make an informed choice concerning such use;

(8) the tobacco industry contributes significantly to the experimentation with tobacco and the initiation of regular tobacco use by children and young adults through its' advertising and promotion practices;

(9) in 1986 the tobacco industry spent $2,400,000,000 on the advertising and promotion of tobacco products, ranking such products among the most heavily advertised and promoted products in the United States;

(10) the tobacco industry claims that the purpose of advertising is to influence consumer brand selection, but only 10 percent of tobacco users switch brands each year;

(11) convincing evidence demonstrates that advertising is predominantly directed at market expansion;

(12) the tobacco industry must attract 6,000 new smokers daily to replace those who stop smoking or die of smoking-related diseases and other causes, or quit;

(13) tobacco product advertising and promotion are intended to capture the youth market and seek to do so through advertisements that suggest a strong association between smoking and physical fitness, attractiveness, success, adventure, and independence and are designed to have the greatest impact on minors, who are more vulnerable to image-based advertising;

(14) serious gaps in knowledge about the harmful effects of tobacco products use persist in both minors and the adult population, with surveys showing that large numbers of citizens are unaware that smoking causes lung cancer, heart disease and still births in pregnancy;

(15) education is effective in preventing and halting the use of tobacco products;

(16) the proportion of smokers among the most educated adults is less than half that among the least educated adults, blue-collar workers, high school drop-outs and minorities;

(17) among those individuals with the least amount of education who have the highest prevalence of smoking are young citizens, blue-collar workers, high school drop-outs and minorities;

(18) the total resources of the major voluntary organizations that sponsor educational activities on smoking have never exceeded 2 percent of tobacco industry expenditures for the promotion of tobacco;

(19) children and teenagers should be informed about the dangers of smoking and be discouraged from initiating the use of tobacco products;

(20) the American public and groups with the highest prevalence of tobacco use should be informed about the dangers of tobacco products;

(21) although most States prohibit sales of tobacco products to minors, these laws are not enforced;

(22) in recent years, there have been efforts in some States to improve the enforcement of existing laws which prohibit the sale of tobacco products to minors;

(23) a program of Federal assistance will encourage and enable States to provide more effective enforcement of their existing laws particularly on the sale of tobacco products to minors; and

(24) as part of such lack of regulation, no Federal agency requires public disclosure or restricts the use of numerous additives in tobacco products.

(b) PURPOSES.—It is the purpose of this Act to—

(1) help educate young citizens to prevent initiation and encourage cessation of tobacco use;

(2) inform the public about the harmful effects of tobacco products;

(3) support State efforts to improve educational programs for the prevention and cessation of tobacco use;

(4) strengthen laws limiting the sale of tobacco products to minors;

(5) establish Federal regulatory authority over tobacco products and additives in such products;

(6) ensure the disclosure of accurate information to the public; and

(7) analyze additives and determine the risk of such additives to individual health.

SEC. 3. CENTER FOR TOBACCO PRODUCTS.

The Public Health Service Act is amended by inserting after title VIII (42 U.S.C. 296k et seq.) the following new title:

"TITLE IX—CENTER FOR TOBACCO PRODUCTS

"SUBTITLE A—CENTER FOR TOBACCO PRODUCTS

"SEC. 901. ESTABLISHMENT OF CENTER.

"(a) IN GENERAL.—In assuming the responsibility of the Secretary to the American public to promote and protect the health of the public, the Secretary shall establish within the Public Health Service, at the Centers For Disease Control, a Center for Tobacco Products.

"(b) PURPOSE.—It shall be the purpose of the Center to—

"(1) educate the public concerning the health consequences of using tobacco products and provide outreach services to youth;

"(2) support research efforts concerning patterns of tobacco use and cessation;

"(3) inform the public regarding constituents of, and additives to, tobacco products;

"(4) restrict the use of additives that represent a significant health risk to the public;

"(5) provide assistance to States to enhance their efforts to enforce existing State laws concerning the sale of tobacco products within the State to minors; and

"(6) coordinate the education and research activities of the Federal government with regard to tobacco products.

"SEC. 902. FUNCTIONS OF CENTER.

"(a) IN GENERAL.—The Center shall perform functions that shall include—

"(1) determining the existence of all additives contained in tobacco products to ascertain the number, type, and amount of all such additives to disclose such to the public and to determine whether such additives represent a significant added health risk to consumers of such products;

"(2) presenting information to the public through labels or package inserts concerning—

"(A) the harmful tobacco smoke constituents; and

"(B) the additives contained in tobacco products;

"(3) conducting reviews of the effectiveness of information required to be contained in rotating warning labels and the undertaking of research directed towards improving the effectiveness of such labels;

"(4) the establishment of a program to award incentive grants to States to promote better enforcement of State laws concerning the sale of tobacco products to minors; and

"(5) the establishment of a program to assist 10 selected model States that request assistance and desire to improve their enforcement of State laws concerning the sale of tobacco products within the State to minors.

"(b) OFFICE OF REGULATORY AFFAIRS.—In carrying out paragraphs (3), (4) and (5) of section 901(b) and sections 941 through 946, the Center shall establish an Office of Regulatory Affairs that shall administer the enforcement authorities and provisions of this title and coordinate its work with other offices and agencies of the Federal government.

"(c) CONTRACTS.—The Center may enter into contracts with agencies within and outside of the Public Health Service in the exercise of its functions.

"(d) AUTHORITY OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this section, $50,000,000 for fiscal year 1991, and such sums as may be necessary in each of the fiscal years 1992 and 1993.

"SEC. 903. EDUCATIONAL AND RESEARCH ACTIVITIES.

"(a) IN GENERAL.—The Center shall carry out educational and research activities that shall include—

"(1) the preparation and distribution of materials to educate the public concerning the health effects of using tobacco products;

"(2) the preparation of public service announcements and the preparation and conduct of paid advertising campaigns to inform targeted populations, including youth and the general population, of the health effects of using tobacco products and the opportunities for prevention and cessation of such use;

"(3) coordinating with film makers, broadcast media managers, and others regarding the impact of the media on tobacco use behavior;

"(4) research on patterns of tobacco product use, initiation and cessation, and effective methods for disseminating such information; and

"(5) plans to effectively provide outreach services to high risk groups and youth with such information.

"(b) FEDERAL INTERAGENCY COMMITTEE ON SMOKING AND HEALTH.—

"(1) TRANSFER OF FUNCTIONS.—The functions and duties of the Federal Interagency Committee on Smoking and Health shall be transferred to and be the responsibility of the Center.

"(2) COORDINATION.—The Center, acting through the Federal Interagency Committee on Smoking and Health, shall coordinate educational and research activities with other Federal agencies and seek to minimize duplication of tobacco related activity.".

SEC. 4. SMOKING EDUCATION AND INFORMATION.

Section 3 of the Comprehensive Smoking Education Act (15 U.S.C. 1341) is amended—

(1) in paragraph (5), by striking out "and" after the semicolon;

(2) in paragraph (6), by striking out the period and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following new paragraph:

"(7) establish a comprehensive outreach program to inform individuals under the age

of 18 about the health consequences of smoking.".

SEC. 5. ANTI-SMOKING PROGRAMS.

Title IX of the Public Health Service Act (as added by section (3)) is amended by adding at the end thereof the following new subtitle:

"SUBTITLE B—ANTI-SMOKING PROGRAMS

"CHAPTER 1—PUBLIC INFORMATION CAMPAIGNS

"SEC. 911. GRANTS FOR PUBLIC INFORMATION CAMPAIGNS.

"(a) IN GENERAL.—The Center shall make grants to, or enter into contracts with entities that meet the requirements of subsection (b) to conduct public information campaigns concerning the use of tobacco products.

"(b) ENTITIES.—Entities eligible to receive grants under this section shall—

"(1) be public, private or nonprofit private entities; and

"(2) provide public information campaigns regarding tobacco use and health, through the use of—

"(A) public service announcements;

"(B) paid advertising messages; and

"(C) counter advertising to provide the public with information to counter the messages in tobacco advertisements that promote tobacco use;

that are designed for television, radio and print media, billboards, and public transit advertising that shall warn youth and other individuals, specifically those in the groups of highest tobacco use, concerning the health and safety risks of tobacco use.

"SEC. 912. GRANT APPLICATION.

"(a) REQUIREMENT.—No grant or contract shall be made or entered into under this chapter unless an application that meets the requirements of subsection (b) has been submitted to, and approved by, the Center.

"(b) CONTENTS.—An application submitted under subsection (a) shall provide such agreements, assurances, and information, be in such form and submitted in such manner as the Center shall prescribe, and shall contain—

"(1) a complete description of the plan of the applicant for the development of a public information campaign that shall include advertising, and—

"(A) shall focus on specific tobacco uses (such as persuasional programs to deter nontobacco users, especially youth, from using tobacco products and the cessation of the use of tobacco products by tobacco users, as well as the type of tobacco use);

"(B) an identification of the specific audiences that shall be targeted which shall include those communities and groups with the highest prevalence of tobacco use and high health risks from tobacco use, specifically, to include youth, school dropouts, minorities, blue collar workers, pregnant women, and low and no income individuals;

"(C) an identification of the media to be used in the campaign;

"(D) an identification of the geographic distribution of the campaign;

"(E) an identification of the type and scope of the intended activities of the campaign;

"(F) plans to test market the development plan with a relevant population group and geographic area and an assurance that effectiveness criteria will be implemented prior to the completion of the final plan;

"(G) an evaluation component to measure the effectiveness of the campaign; and

"(H) such other information as the Center may require; and

"(2) a complete description of the kind, amount, distribution, and timing of advertising and such other information as the Center may require, and an assurance that the media organizations with which such advertisements are placed will not lower the current frequency of public service announcements.

"SEC. 913. GRANT ACTIVITIES AND CRITERIA.

"(a) ACTIVITIES.—Grants made under this chapter shall be used for the development of a public information campaign that may include public service announcements, paid advertisements for television, radio, and print media as well as billboards, public transit advertising, and any other mode of advertising that the Center determines to be appropriate to meet the requirements of section 912, and such activities shall—

"(1) focus on seeking to discourage the initiation of use of tobacco products by youth and nonusers; and

"(2) encourage cessation of tobacco use by those who currently use tobacco products;

with a focus on the specific groups identified in subsection (b).

"(b) CRITERIA.—The Center shall include in the criteria used for awarding grants under this chapter evidence that the applicant—

"(1) will conduct activities that target communities and groups with the highest prevalence of tobacco use and the highest health risk from tobacco use, specifically youth, school dropouts, pregnant women, minorities, blue collar workers, and low and no income people.

"(2) has a record of high quality campaigns of a comparable type; and

"(3) has a record of high quality campaigns that target the population groups specified in paragraph (1).

"(c) PREFERENCE.—In awarding grants or contracts under this chapter, the Center shall give a preference to those applicants that will conduct activities that will most likely encompass an audience that includes a high concentration of the groups identified in subsection (b)(1).

"(d) TARGETING.—In awarding grants or contracts under this chapter, the Center shall attempt to award such grants and contracts so that all target groups identified in subsection (b)(1) are reached with diverse media. Single contracts or grants shall not require that all groups are targeted or that all media must be used.

"SEC. 914. AUTHORIZATION OF APPROPRIATIONS.

"There are authorized to be appropriated to make grants under this chapter, $50,000,000 for fiscal year 1991, and such sums as may be necessary in each of the fiscal years 1992 and 1993.

"CHAPTER 2—STATE LEADERSHIP IN ANTI-TOBACCO USE INTERVENTION

"SEC. 915. GRANT PROGRAM.

"The Center shall award grants to States and, in consultation with State health authorities, to political subdivisions of States, to assist such States in meeting the costs of improving State leadership concerning activities that—

"(1) will prevent the initial use of tobacco products by minors; and

"(2) encourage the cessation of the use of tobacco products;

among the youth and other residents of the State, with particular attention directed towards those individuals in groups who are at the highest risk and suffer the highest prevalence of tobacco use, including school dropouts, minorities, low-income individuals, pregnant women and blue collar workers.

"SEC. 916. APPLICATIONS.

"(a) REQUIREMENT.—No grant shall be awarded under this chapter unless an application that meets the requirements of subsection (b) has been submitted to, and approved by, the Center.

"(b) CONTENTS.—An application submitted under subsection (a) shall be in such form, be submitted in such manner as the Center shall prescribe, and shall contain—

"(1) a complete description of the type of programs that will be established or assisted by or through the applicant, that shall include—

"(A) a statement of the goals and objectives of such programs or activities that are consistent with the purpose of section 915;

"(B) a description of the activities that the State shall develop to establish an ongoing anti-tobacco initiative within the State Department of Health that shall involve the coordination, by such Department of Health, of such initiative with existing anti-tobacco use programs;

"(C) an assurance that the activities developed pursuant to subparagraph (B) will involve a concentration of effort by the State to change tobacco use behavior in groups identified in section 915, that shall include one or more of the activities described under section 917; and

"(D) a timetable for implementation or completion of the proposed activities;

"(2) an assurance by the State that it will make an ongoing commitment to support the anti-tobacco initiative described in paragraph (1)(B) subsequent to the termination of the grant period;

"(3) an assurance satisfactory to the Center that the programs established or assisted with funds under a grant awarded under this subpart will be established or assisted in a manner consistent with the State health plan in effect under section 1524(c); and

"(4) such other information as the Secretary may by regulation prescribe.

"SEC. 917. GRANT ACTIVITIES AND CRITERIA.

"(a) NUMBER OF GRANTS.—The Center shall award grants to at least 10 but not more than 20 States.

"(b) USE OF GRANT.—Grants awarded under this chapter shall be used—

"(1) for activities that promote and enforce a minimum age that is at least 18 years for the purchase of tobacco products;

"(2) for activities that will enhance the ability of the State Department of Health to implement comprehensive planning, and intervention activities for anti-tobacco use;

"(3) to assist in the provision of training and technical assistance by appropriate Federal government entities to enhance the development of State leadership capabilities in anti-tobacco use;

"(4) for education, training, and clinical skills improvement activities to educate teachers, community workers, and health professionals (including physicians, dentists, and allied health personnel) in anti-tobacco use intervention strategies; and

"(5) for the collection of information and data to support State legislative efforts concerning anti-tobacco use.

"(c) CRITERIA.—The Center shall include in the criteria used for awarding grants under this chapter—

"(1) evidence that the applicant has made efforts to discourage smoking and other tobacco use among the youth residing in such applicant's State;

"(2) evidence that the applicant has made efforts to enforce the law concerning the

minimum age requirements for the purchase of tobacco products;

"(3) evidence of the need of the applicant for the assistance that is requested by the applicant, as reflected in the prevalence of the use of tobacco within the applicant's State, especially among the populations that are described under section 915;

"(4) evidence of the need of the applicant for the assistance that is requested by the applicant, as reflected in the necessity for the development of Statewide expertise in the planning of, and intervention in, anti-tobacco use situations;

"(5) the potential for the success of proposed activities that will be established or assisted under the grant;

"(6) evidence of cooperative arrangements that the applicant has, or will enter into with other entities that will participate in the activities established or assisted under the grant; and

"(7) evidence that the applicant intends to concentrate its efforts on the populations identified under section 915.

"SEC. 918. AUTHORIZATION OF APPROPRIATIONS.

"There are authorized to be appropriated to make grants under this chapter, $5,000,000 for fiscal year 1991, $7,500,000 for fiscal year 1992, and $10,000,000 for fiscal year 1993.

"SEC. 919. INCENTIVE GRANTS TO STATES TO LIMIT YOUTH ACCESS TO TOBACCO PRODUCTS.

"(a) AUTHORIZATION OF APPROPRIATION.—There is authorized to be appropriated $50,000,000 for fiscal year 1991, and such sums as may be necessary in each of the fiscal years 1992 and 1993 to enable the Secretary of Health and Human Services to make incentive grants to States.

"(b) LEGISLATIVE REQUIREMENT.—To receive a grant under this section, a State shall enact legislation that—

"(A) prohibits the sale of a tobacco product to a minor;

"(B) improves the enforcement of such an existing prohibition; and

"(C) prohibits the sale of a tobacco product in a vending machine unless the presence of minors is not allowed on the premises where such machine is located.

"(c) CRITERIA FOR INCENTIVE GRANT AWARD.—To receive a grant under this section a State shall—

"(1) certify that the legislative requirements of subsection (b) have been met;

"(2) provide a description of such legislative changes to the Center;

"(3) provide a plan for the implementation of such legislative changes to the Center; and

"(4) describe the intended use of the grant funds.

"(d) PURPOSE OF GRANTS.—Funds made available under a grant under this section may be used for—

"(1) the dissemination of information regarding the changes in State law required under this section;

"(2) planning, establishing and implementing State procedures to implement such changes;

"(3) education concerning the need for such changes;

"(4) other purposes as determined appropriate by the Center.

"(e) DISTRIBUTION OF FUNDS.—Funds shall be distributed under this section so that no State shall receive more that $2,000,000 in each fiscal year under this section.

"(f) ENFORCEMENT AND COMPLIANCE.—

"(1) BY STATE.—A State receiving a grant under subsection (a) shall ensure that the legislation referred to in subsection (b) is effectively enforced to achieve substantial compliance, as determined by the Assistant Secretary for Health of the Department of Health and Human Services, or the designee of such Assistant Secretary.

"(2) REGULATIONS.—The Assistant Secretary or designee referred to in paragraph (1) shall promulgate regulations necessary to implement this section.

"(g) ADDITIONAL RESTRICTIONS.—A State receiving a grant under subsection (a) may place restrictions on the sale or distribution of tobacco products to minors in addition to the requirements referred to in subsection (b).

"SEC. 920. MODEL STATE PROGRAM

"(a) CENTER FOR TOBACCO PRODUCTS.—The Center for Tobacco Products established under subtitle A shall provide assistance to not more than 10 States that desire to limit or prohibit the sale of tobacco products to minors who are under the age of 18.

"(b) NUMBER OF MODEL STATES.—The Center shall designate not more than 10 States as model States for the purpose of providing assistance under subsection (a).

"(c) CRITERIA FOR MODEL STATE DESIGNATION.—To be designated as a model State under subsection (b), a State shall—

"(1) have in effect a law that prohibits the sale of tobacco products to individuals under the age of 18;

"(2) seek to improve the enforcement of the law referred to in paragraph (1); and

"(3) have in effect a law or regulation that is intended to reduce the use of, or access to, cigarette vending machines by minors who are under the age of 18.

"(d) APPLICATION FOR MODEL STATE DESIGNATION.—To be eligible to be designated as a model State under subsection (b), a State shall submit an application that shall include a designation of a lead agency that will work in conjunction with the Center. Such agency shall—

"(1) have experience in matters that affect the public health;

"(2) have expertise regarding the health effects and use of tobacco products;

"(3) provide direct services or referrals for services for smoking cessation;

"(4) administer activities intended to prevent the initiation of use of tobacco products by minors who are under the age of 18 and other individuals; and

"(5) have a lead office or department that will be chiefly responsible for such functions.

"(e) STATE ASSURANCES.—To be eligible to be designated as a model State under subsection (b), a State shall provide assurances that it will—

"(1) provide personnel sufficient to staff the lead office or department referred to in subsection (d)(5);

"(2) establish a mechanism for the reporting of citizen or other complaints to the designated office or department concerning retailers that sell tobacco products to minors who are under the age of 18 in defiance of State law;

"(3) establish a program to make the public aware of the office or department referred to in subsection (d)(5) and a mechanism for reporting complaints regarding retailers who sell tobacco products to minors who are under the age of 18 in defiance of State law;

"(4) seek to further restrict the access of minors who are under the age of 18 to vending machines that sell tobacco products;

"(5) establish a procedure by which the lead State agency may make a finding or a presumption that a retailer or distributor has a pattern or practice of selling tobacco products to minors in defiance of State law; and

"(6) establish a procedure for lead State agencies to report findings or presumptions under paragraph (5) to the Center and for requesting assistance from the Center.

"(f) ASSISTANCE TO MODEL STATES.—The Center shall provide States designated as model States with—

"(1) printed materials for distribution to retailers concerning the illegality of the sale of tobacco products to minors;

"(2) support for, and assistance in, the planning of meetings, conferences, and conventions to educate retailers concerning the health hazards associated with tobacco products, the addictive nature of tobacco products, and State laws that prohibit the sale of tobacco products to minors;

"(3) assistance in the development of reporting systems to identify specific retailers and retail chains that consistently sell tobacco products to minors in defiance of State law;

"(4) assistance in the development of notification systems to make specific retailers aware that such retailers are acting consistently in defiance of State law; and

"(5) notices to be distributed to retailers concerning the awareness of Federal authorities of the retailers continued sale of tobacco products to minors in defiance of State law.

"CHAPTER 3—ANTI-TOBACCO USE INTERVENTION IN THE WORKPLACE

"SEC. 921. PURPOSE.

"The Center shall provide funds under this chapter to attempt to reduce the incidence of smoking and other tobacco use among workers with the highest prevalence of smoking through demonstration grants to public and private entities, including unions and other organizations.

"SEC. 922. GRANTS.

"The Center, shall make grants to assist in meeting the costs of activities that will prevent the initiation, and encourage the cessation, of the use of tobacco products among workers and their families, especially those individuals with the highest prevalence of tobacco use.

"SEC. 923. APPLICATION.

"(a) REQUIREMENT.—No grant may be made under this chapter unless an application therefor has been submitted to, and approved by, the Center.

"(b) CONTENTS.—An application submitted under subsection (a) shall be in such form and submitted in such manner as the Center shall by regulation prescribe, and shall contain

"(1) a complete description of the type of the program that is to be provided by or through a grant awarded under this chapter, that shall include—

"(A) a statement of goals and objectives of the program that shall be consistent with the purpose of this title;

"(B) a description of the activities to be carried out with the assistance provided under the grant that are designed to establish an ongoing anti-tobacco program that may include working cooperatively with existing anti-tobacco programs in the community or State;

"(C) an assurance that activities conducted under subparagraph (B) will show a concentration of effort to change tobacco use behavior in those groups identified in sec-

tion 922 and will include one or more of the activities described in section 924; and

"(D) a timetable for the proposed activities;

"(2) such agreements, assurances, and information as the Center determines to be necessary to carry out this section.

"(3) an assurance by the applicant of its ongoing commitments to support the anti-tobacco use activities after the grant period has expired;

"(4) such other information as the Secretary may by regulation prescribe.

"SEC. 924. GRANT ACTIVITIES AND CRITERIA.

"(a) ACTIVITIES.—Assistance provided through a grant awarded under this chapter shall be used for—

"(1) education and other intervention strategies to promote the cessation of tobacco use among workers who have the highest prevalence of tobacco use;

"(2) anti-smoking programs that are designed to assist workers in making a behavior change to cease using tobacco products;

"(3) education and other intervention strategies that will serve to prevent initiation of smoking and other tobacco use among children of workers who have the highest prevalence of tobacco use;

"(4) activities to provide family members with education concerning the health consequences of tobacco use;

"(5) the development of audio visual or print materials that will facilitate any of the activities described in this subsection when such appropriate audio or visual materials are not otherwise available; and

"(6) training and education to develop the expertise of a health educator or other personnel who will perform the activities described in this subsection for workers and their families.

"(b) CRITERIA.—The Center shall include in the criteria for awarding of grants under this chapter—

"(1) the potential for success of the proposed plan of the applicant;

"(2) evidence of any cooperative arrangements with other entities that will participate in the proposed plan;

"(3) evidence of the intent of the applicant to concentrate efforts toward blue collar workers and other groups identified in section 922;

"(4) evidence that the activity is implemented with the cooperation of the employer; and

"(5) any other criteria as the Center shall specify.

"SEC. 925. AUTHORIZATION OF APPROPRIATIONS.

"There are authorized to be appropriated to make grants under this chapter, $5,000,000 for each of the fiscal years 1991 through 1993.".

SEC. 6. DRUG-FREE SCHOOLS AND COMMUNITIES ACT OF 1986.

(a) STATE PROGRAMS.—Section 5122(a)(1) of the Drug-Free Schools and Communities Act of 1986 (hereafter in this section referred to as the "Act") is amended by striking "drug" and inserting "drug, tobacco".

(b) STATE APPLICATIONS.—Section 5123(b)(7) of the Act is amended by striking "drug" and inserting "drug, tobacco, and alcohol".

(c) LOCAL DRUG ABUSE EDUCATION PREVENTION PROGRAMS.—Section 5125 of the Act is amended—

(1) in subsection (a) by striking "drug and alcohol abuse prevention" and inserting "drug, tobacco, and alcohol abuse prevention";

(2) in subsection (a)(9) by striking "drug" and inserting "drug, tobacco";

(3) in subsection (a)(11) by striking "drug" and inserting "drug, tobacco"; and

(4) in subsection (a)(12) by striking "drug" and inserting "drug, tobacco".

(d) LOCAL APPLICATIONS.—Section 5126(a)(2) of the Act is amended—

(1) in subparagraph (B) by striking "drug" and inserting "drug, tobacco";

(2) in subparagraph (E) by—

(A) striking "applicants drug" and inserting "applicants drug, tobacco";

(B) striking "and" at the end of clause (i);

(C) inserting "and" at the end of clause (ii); and

(D) inserting at the end thereof the following new clause (iii):

"(iii) how it will discourage use of tobacco products by students;"; and

(3) in subparagraph (I) by striking "conduct drug" and inserting "conduct drug, tobacco".

(e) FEDERAL ACTIVITIES.—Section 5132(b) of the Act is amended—

(1) in paragraph (1) by inserting "and for dissemination pursuant to section 3 of the Comprehensive Smoking Education Act of 1984" at the end thereof; and

(2) in paragraph (2) by striking "drug" and inserting "drug and tobacco".

(f) DEFINITIONS.—Section 5141(b)(1) of the Act is amended by striking "alcohol" and inserting "alcohol and tobacco,".

SEC. 7. NATIONAL COMMISSION ON DRUG-FREE SCHOOLS.

Section 5051(i) of the Anti Drug Abuse Act of 1988 (20 U.S.C. 3172 note) is amended—

(1) in paragraph (1)—

(A) by inserting ", including anti-tobacco education" after "program" in subparagraph (A);

(B) by inserting "or tobacco products" after "drugs" in subparagraph (C); and

(C) by inserting "and tobacco" after "drug" in subparagraph (D); and

(2) in paragraph (3), by inserting "and smoke-free" after "drug-free".

SEC. 8. TOBACCO EDUCATION AND INFORMATION REGARDING CIGARETTE SMOKING.

Subtitle B of title IX of the Public Health Service Act (as added by section 5) is amended by adding at the end thereof the following:

"CHAPTER 4—TOBACCO USE AND EDUCATION IN SCHOOLS

"SEC. 926. INCENTIVE GRANTS TO ESTABLISH SMOKE FREE SCHOOLS.

"(a) IN GENERAL.—There is authorized to be appropriated $25,000,000 for fiscal year 1991, and such sums as may be necessary for each of the fiscal years 1992 and 1993 to enable the Secretary of Education to make incentive grants, to be distributed in accordance with part F of title IV of the Augustas F. Hawkins, Robert T. Stafford Elementary and Secondary School Improvement Amendments of 1988 with respect to the Secretary's fund for innovation and education.

"(b) LEGISLATIVE REQUIREMENT.—To receive a grant under this section, a State shall enact legislation that—

"(1) creates smoke-free elementary and secondary school buildings and grounds;

"(2) prohibits smoking by minors in school buildings and on school grounds and school buses;

"(3) requires schools to establish smoking areas for adults that are separate from students, and to ensure adequate safeguards exist to protect students from exposure to passive smoke; and

"(4) provides technical assistance to schools and other assistance to implement the provision of this section.

"(c) ENFORCEMENT AND COMPLIANCE.—

"(1) BY STATE.—A State receiving a grant under subsection (a) shall ensure that the legislation referred to in subsection (b) is effectively enforced to achieve substantial compliance, as determined by the Secretary of Education in consultation with the Secretary of Health and Human Services.

"(2) REGULATIONS.—The Secretary of Education, in consultation with the Secretary of Health and Human Services shall promulgate regulations necessary to implement this section.

"(d) ADDITIONAL RESTRICTIONS.—A State receiving a grant under subsection (a) may place restrictions on the use of tobacco products in schools in addition to the requirements referred to in subsection (a). A State receiving funds under this section shall provide assistance under this section only to schools that are subject to State laws of the type described in subsection (b).

"CHAPTER 5—INFORMATION AND PROMOTION REGARDING CIGARETTE SMOKING

"SEC. 927. DEFINITIONS.

"As used in this chapter:

"(1) COMMITTEE.—The term 'Committee' means the committee established under section 928(c), or the committee established under section 3(b) of the Comprehensive Smoking Education Act (15 U.S.C. 1341(b)) as such section existed before the date of enactment of this section.

"(2) UNITED STATES.—The term 'United States', when used in a geographical sense, includes the several States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, the Virgin Islands, American Samoa, Wake Island, Midway Islands, Kingman Reef, Johnston Island, and the installations of the Armed Forces.

"SEC. 928. SMOKING RESEARCH, EDUCATION, AND INFORMATION IN GENERAL.

"(a) ESTABLISHMENT OF PROGRAM.—The Secretary shall establish and carry out a program to inform the public of any dangers to human health presented by cigarette smoking.

"(b) ADMINISTRATION OF PROGRAM.—In carrying out the program established under subsection (a), the Secretary shall—

"(1) conduct and support research on the effects of cigarette smoking and of passive smoke on human health and develop materials for informing the public of such effect;

"(2) coordinate all research and educational programs and other activities within the Department of Health and Human Services that relate to the effect of cigarette smoking and passive smoke on human health and coordinate, through the Interagency Committee on Smoking and Health (established under subsection (c)), such activities with similar activities of other Federal agencies and of private agencies;

"(3) establish and maintain a liaison with appropriate private entities, other Federal agencies, and State and local public agencies concerning activities relating to the effect of cigarette smoking and passive smoke on human health;

"(4) collect, analyze, and disseminate (through publications, bibliographies, and otherwise) information, studies, and other data relating to the effect of cigarette smoking and passive smoke on human health, and develop standards, criteria, and methodologies for improved information programs related to smoking and health;

"(5) compile and make available information on State and local laws relating to the use and consumption of cigarettes; and

"(6) undertake any other additional information and research activities that the Secretary determines necessary and appropriate to carry out this section.

"(c) COMMITTEE.—

"(1) ESTABLISHMENT.—To carry out the activities described in paragraphs (2) and (3) of subsection (b), the Secretary shall establish an Interagency Committee on Smoking and Health.

"(2) COMPOSITION.—The Committee established under paragraph (1) shall be composed of—

"(A) members appointed by the Secretary from appropriate institutes and agencies of the Department, that may include the National Cancer Institute, the National Heart, Lung, and Blood Institute, the National Institute of Child Health and Human Development, the National Institute on Drug Abuse, and Health Resources and Services Administration, and the Centers for Disease Control;

"(B) at least one member appointed from the Federal Trade Commission, the Department of Education, the Department of Labor, and any other Federal agency designated by the Secretary, the appointment of whom shall be made by the head of the entity from which the member is appointed; and

"(C) five members appointed by the Secretary from physicians and scientists who represent private entities involved informing the public about the health effects of smoking.

"(3) CHAIRPERSON.—The Secretary shall designate the chairperson of the Committee established under paragraph (1).

"(4) EXPENSES.—While away from their homes or regular places of business in the performance of services for the Committee established under paragraph (1), members of such Committee shall be allowed travel expenses, including per diem in lieu of subsistence, in the manner provided by sections 5702 and 5703 of title 5 of the United States Code.

"(5) OTHER INFORMATION.—The Secretary shall make available to the Committee established under paragraph (1) such staff, information, and other assistance as it may require to carry out its activities effectively.

"(d) REPORT.—Not later than January 1, 1990, and biennially thereafter, the Secretary shall prepare and submit, to the appropriate Committees of Congress, a report that shall contain—

"(1) an overview and assessment of Federal activities undertaken to inform the public of the health consequences of smoking and passive smoke and the extent of public knowledge of such consequences;

"(2) a description of the activities of the Secretary and the Committee under subsection (a);

"(3) information regarding the activities of the private sector taken in response to the effects of smoking on health; and

"(4) such recommendations as the Secretary may consider appropriate.

"SEC. 928. PUBLIC EDUCATION REGARDING SMOKELESS TOBACCO.

"(a) DEFINITION.—As used in this section and section 929, the term 'smokeless tobacco' means any finely cut, ground, powdered, or leaf tobacco that is intended to be placed in the oral cavity.

"(b) DEVELOPMENT.—

"(1) IN GENERAL.—The Secretary shall establish and carry out a program to inform the public of any dangers to human health resulting from the use of smokeless tobacco products.

"(2) DUTIES OF SECRETARY.—In carrying out the program established under paragraph (1) the Secretary shall—

"(A) develop educational programs and materials and public service announcements respecting the dangers to human health from the use of smokeless tobacco;

"(B) make such programs, materials, and announcements available to States, local governments, school systems, the media, and such other entities as the Secretary determines appropriate to further the purposes of this part;

"(C) conduct and support research on the effect of smokeless tobacco and health.

"(3) CONSULTATION.—In developing programs, materials, and announcements under paragraph (2), the Secretary shall consult with the Secretary of Education, medical and public health entities, consumer groups, representatives of manufacturers of smokeless tobacco products, and other appropriate entities.

"(c) ASSISTANCE.—The Secretary may provide technical assistance and make grants to States—

"(1) to assist in the development of educational programs and materials and public service announcements respecting the dangers to human health from the use of smokeless tobacco;

"(2) to assist in the distribution of such programs, materials, and announcements through the States; and

"(3) to establish 18 as the minimum age for the purchase of smokeless tobacco.

"SEC. 929. REPORTS.

"Not later than January 1, 1990, and biennially thereafter, the Secretary shall prepare and submit, to the appropriate Committees of Congress, a report containing—

"(1) a description of the effects of health education efforts on the use of smokeless tobacco products;

"(2) a description of the use by the public of smokeless tobacco products;

"(3) an evaluation of the health effects of smokeless tobacco products and the identification of areas appropriate for further research; and

"(4) such recommendations for legislation and administrative action as the Secretary considers appropriate.

"CHAPTER 6—GENERAL PROVISIONS

"SEC. 935. DEFINITIONS.

"As used in this subtitle:

"(1) RECIPIENT.—The term 'recipient' means any entity or individual that has received a grant under this subtitle.

"(2) TOBACCO USE.—The term 'tobacco use' means the use of any tobacco product that is used through smoking, inhalation, or mastication, and such term shall include the use of nasal and oral snuff.

"(3) UNITS OF LOCAL GOVERNMENT.—The term 'units of local government' shall include Federally recognized Indian tribes.

"SEC. 936. ADMINISTRATIVE PROVISIONS.

"(a) AMOUNT AND METHOD OF PAYMENT.—

"(1) AMOUNT.—The Secretary shall determine the amount of a grant awarded under this title.

"(2) METHOD.—Payments under grants awarded under this subtitle may be made in advance, on the basis of estimates, or by way of reimbursement, with necessary adjustments because of underpayments or overpayments, and in such installments and on such terms and conditions as the Secretary determines necessary to carry out the purposes of such grants.

"(b) MAINTENANCE OF EFFORT.—No grant shall be made under this subtitle unless the Secretary determines that there is satisfactory assurance that Federal funds made available under such a grant for any period will be so used as to supplement and, to the extent practical, increase the level of State, local, and other non-Federal funds that would, in the absence of such Federal funds, be made available for the program for which the grant is to be made and will in no event supplant such State, local and other non-Federal funds.

"(c) SUPPLIES, EQUIPMENT, AND EMPLOYEE DETAIL.—

"(1) IN GENERAL.—The Secretary, at the request of a recipient of a grant under this subtitle, may reduce the amount of such a grant by—

"(A) the fair market value of any supplies or equipment furnished to the recipient by the Secretary;

"(B) the amount of pay, allowances, and travel expenses incurred by any officer or employee of the Federal government when such officer or employee has been detailed to the recipient;

"(C) the amount of any other costs incurred in connection with the detail of an officer or employee as described in subparagraph (B);

when the furnishing of such supplies or equipment or the detail of such an officer or employee is for the convenience, and at the request, of such recipient and for the purpose of carrying out activities under the grant.

"(2) USE OF AMOUNT OF REDUCTION.—The amount by which any grant awarded under this subtitle is reduced under this subsection shall be available for payment by the Secretary of the costs incurred in furnishing the supplies or equipment, or in detailing the personnel, on which the reduction of such grant is based, and such amount shall be considered as part of the grant that has been paid to the recipient.

"(d) RECORDS.—Each recipient of a grant under this subtitle shall keep such records as the Secretary determines appropriate, including records that fully disclose—

"(1) the amount and disposition by such recipient of the proceeds of such grant;

"(2) the total cost of the activity for which such grant was made;

"(3) the amount of the cost of the activity for which such grant was made that has been received from other sources; and

"(4) such other records as will facilitate an effective audit.

"(e) AUDIT AND EXAMINATION OF RECORDS.—The Secretary and the Comptroller General of the United States shall have access to any books, documents, papers, and records of the recipient of a grant under this part, for the purpose of conducting audits and examinations of such recipient that are pertinent to such grant.

"SUBTITLE C—GENERAL PROVISIONS

"SEC. 941. PROHIBITED ACTS.

"The following acts and the causing thereof are prohibited:

"(1) ADULTERATION OR MISBRANDING.—The adulteration or misbranding of any tobacco product.

"(2) ADULTERATION OR MISBRANDING IN A TERRITORY.—The adulteration or misbranding within any Territory of any tobacco product.

"(3) TRADE SECRET.—The using by any person to the advantage of such person, or revealing, other than to the Secretary or officers or employees of the Department, or to the courts when relevant in any judicial proceeding under this title, any information acquired under authority of this title concerning any method or process that as a trade secret is entitled to protection. This paragraph shall not be construed to prohibit disclosure of information to Congress.

"(4) MISREPRESENTATION OF COMPLIANCE WITH TITLE.—The using, on the labeling of any tobacco product of any representation or suggestion that approval of an application with respect to such product is in effect under this title.

"(5) REFERENCES.—The using, in labeling, of any reference to any report or analysis furnished in compliance with this title.

"(6) COPIES OF MATERIAL.—The failure of the manufacturer of a tobacco product to maintain for transmittal, or to transmit, to any individual who makes a written request for information as to such product, true and correct copies of all printed matter that are required to be included in any package of a tobacco product or such other printed matter as is approved by the Secretary. Nothing in this paragraph shall be construed to exempt any person from any labeling requirement imposed by or under other provisions of this title.

"(7) REPORTS, RECORDS, REQUIREMENTS.—The failure to make the reports required, the failure to retain the records required, or the failure to meet the requirements prescribed, under this title.

"SEC. 942. INJUNCTIONS AND PENALTIES.

"(a) INJUNCTION PROCEEDINGS.—

"(1) IN GENERAL.—The district courts of the United States shall have jurisdiction, for cause shown, and subject to the provisions of section 381 (relating to notice to opposite party) of title 28, United States Code, to restrain violations of section 941.

"(2) VIOLATIONS.—In case of violation of an injunction or restraining order issued under this section, which also constitutes a violation of this title, trial shall be by the court, or, upon demand of the accused, by a jury. Such trial shall be conducted in accordance with the practice and procedure applicable in the case of proceedings subject to the provisions of Rule 42(b), Federal Rules of Criminal Procedure.

"(b) PENALTIES.—

"(1) FINE AND IMPRISONMENT.—Any person who violates a provision of section 941 shall be imprisoned for not more than 1 year or fined in a manner consistent with the Criminal Fine Enforcement Act of 1984, or both.

"(2) SUBSEQUENT VIOLATIONS.—Notwithstanding the paragraph (1), if any person commits such a violation after a prior conviction of such person under this section has become final, or commits such a violation intentional to defraud or mislead, such person shall be imprisoned for not more than 3 years or fined in a manner consistent with the Criminal Fine Enforcement Act of 1984, or both.

"(c) DENIAL OF DELIVERY.—With regard to a model State designated as such under section 920, any retailer for whom a State makes a finding that such retailer is selling tobacco products to minors in violation of State law may be denied delivery of tobacco products by all distributors of such products within that State for a period not to exceed 60 days, if such retailer has been notified that such a finding has been made. Such 60 day period shall begin on the date that such retailer is notified by the State of such finding.

"SEC. 943. SEIZURE.

"(a) TIME FOR INITIATION OF PROCEEDINGS.—

"(1) INTRODUCTION TO INTERSTATE COMMERCE.—

"(A) IN GENERAL.—Any tobacco product that is adulterated or misbranded may be proceeded against on libel of information and condemned in any district court of the United States or United States court of a Territory within the jurisdiction of which the product is found.

"(B) REMOVAL.—

"(i) STIPULATION.—Any proceeding pending or instituted under subparagraph (A) shall, on application of the claimant, seasonably made, be removed for trial to any district agreed on by stipulation between the parties.

"(ii) FAILURE TO STIPULATE WITHIN REASONABLE TIME.—In the case of a failure to stipulate within a reasonable time under clause (i), the claimant may apply to the court of the district in which the seizure has been made, and such court (after giving the United States attorney for such district reasonable notice and opportunity to be heard) shall by order, unless good cause to the contrary is shown, specify a district of reasonable proximity to the claimant's principal place of business to which the case shall be removed for trial.

"(2) MODEL STATES.—In the case of tobacco products, within a State that has been designated a model State by the Center, where sale of such products is in violation of State law, and where there is a finding that a retailer is, or has been, engaged in a pattern or practice of sale to minors, the Secretary—

"(A) may place a temporary ban on the shipping of tobacco products to such retailer by distributors in that State, or the tobacco products of such retailer may be seized by the Secretary in accordance with section 943;

"(B) shall inform the appropriate distributor in that State that supplies the tobacco products to such retailer, that a temporary ban exists on the shipping of such products to such retailer, and the distributor shall not continue to distribute to such retailer, or the Secretary may seize such products from the distributor;

"(C) shall notify the retailer described in subparagraph (B) and its distributor of the impending penalties to be applied under this subsection and the date on which such penalties may be implemented;

"(D) shall, not later than 60 days after the notification and implementation of the penalties as provided for in this section, provide the penalized retailer with the opportunity for an informal hearing; and

"(E) may assess additional penalties or impose a further forfeiture, as provided in this section, to a penalized retailer or distributor if such retailer or distributor violates the bar on shipping to such retailer as provided for in subparagraphs (A) and (B).

"(b) PROCEDURE.—

"(1) IN GENERAL.—The tobacco product, equipment, or other thing proceeded against under this section shall be liable to seizure by process pursuant to the libel, and the procedure in cases under this section shall conform, as nearly as possible, to the procedure in admiralty, except that on the demand of either party any issue of fact joined in any such case shall be tried by jury.

"(2) CONSOLIDATION.—

"(A) IN GENERAL.—When libel for condemnation proceedings under this section, involving the same claimant and the same issues of adulteration or misbranding, are pending in two or more jurisdictions, such pending proceedings, on application of the claimant seasonably made to the court of one such jurisdiction, shall be consolidated for trial by order of such court, and be tried in—

"(i) any district selected by the claimant where one of such proceedings is pending; or

"(ii) a district agreed on by stipulation between the parties.

"(B) OTHER PLACE OF JURISDICTION.—If no order for consolidation is made under subparagraph (A) within a reasonable time, the claimant may apply to the court of one such jurisdiction, and such court (after providing the United States attorney for such district with reasonable notice and an opportunity to be heard) shall by order, unless good cause to the contrary is shown, specify a district of reasonable proximity to the principal place of business of the claimant, in which all such pending proceedings shall be consolidated for trial and tried.

"(C) FIXED TRIAL DATE AND NOTIFICATION.—Orders of consolidation under this paragraph shall not apply so as to require the removal of any case in which the date for trial has been fixed. The court granting such order shall give prompt notification thereof to the other courts having jurisdiction of the cases covered thereby.

"(c) DISPOSAL OF CONDEMNED PROPERTY.—

"(1) METHOD.—Any tobacco product condemned under this section shall, after the entry of the condemnation decree, be disposed of by destruction or sale as the court may, in accordance with the provisions of this section, direct and if such products are sold the proceeds from such sale, less the legal costs and charges, shall be paid into the Treasury of the United States.

"(2) LIMITATION.—

"(A) IN GENERAL.—Tobacco products shall not be sold under decrees issued under this section contrary to the provisions of this title or the laws of the jurisdiction in which such products are sold.

"(B) EXCEPTION.—After the entry of the decree of condemnation and on the payment of the costs of such proceedings and the execution of a good and sufficient bond conditioned on such tobacco products not being sold or disposed of contrary to the provisions of this title or the laws of any State or Territory in which sold, the court may, by order, direct that such product be delivered to the owner thereof to be destroyed or brought into compliance with the provisions of this title under the supervision of an officer or employee duly designated by the Secretary.

"(C) EXPENSES.—The expenses of any supervision under subparagraph (B) shall be paid by the person obtaining release of the tobacco product under bond.

"(d) EXPENSES.—When a decree of condemnation is entered against the tobacco product under this section, court costs and fees, and storage and other proper expenses, shall be awarded against the person, if any, intervening as claimant of the product.

"(e) DUTIES AND POWERS OF COURT.—In the case of removal for trial of any case as provided by this section—

"(1) the clerk of the court from which removal is made shall promptly transmit to the court in which the case is to be tried all records in the case necessary in order that such court may exercise jurisdiction; and

"(2) the court to which such case was removed shall have the powers and be subject to the duties for purposes of such case, which the court from which removal was made would have had, or to which such court would have been subject, if such case had not been removed.

"SEC. 944. HEARING BEFORE REPORT OF CRIMINAL VIOLATION.

"Prior to the reporting of any violation of this title by the Secretary to any United States attorney for the institution of a criminal proceeding, the person against whom such proceeding is contemplated shall be given appropriate notice and an opportunity to present such person's views, either orally or in writing, with regard to such contemplated proceeding.

"SEC. 945. REPORT OF MINOR VIOLATIONS.

"Nothing in this title shall be construed as requiring the Secretary to report for prosecution, or for the institution of libel or injunction proceedings, for minor violations of this title whenever such person believes that the public interest will be adequately served by a suitable written notice or warning.

"SEC. 946. PROCEEDINGS IN NAME OF UNITED STATES; PROVISION AS TO SUBPOENAS.

"All proceedings for the enforcement, or to restrain violations, of this title shall be by and in the name of the United States. Subpoenas for witnesses who are required to attend a court of the United States, in any district, may run into any other district in any such proceeding.

"SUBTITLE D—MISBRANDED AND ADULTERATED TOBACCO PRODUCTS

"SEC. 951. MISBRANDED TOBACCO PRODUCTS.

"(a) IN GENERAL.—A tobacco product shall be considered to be misbranded for not disclosing certain information to the public—

"(1) if the manufacturer, importer, or packager of the product does not provide the Center with the list of tobacco additives contained in the product by brand name for education of the public in accordance with section 953(a) or (b); or

"(2) if it does not disclose to the public, tar, nicotine, carbon monoxide, and other harmful constituents in the tobacco and tobacco smoke, and smokeless tobacco, as required under section 954.

"(b) ADDITIONAL INFORMATION CLARIFICATION AND MODIFICATIONS.—

"(1) ADDITIONAL INFORMATION.—Nothing in this title the Federal Cigarette Labeling and Advertising Act (15 U.S.C. 1333 et seq.), or the Comprehensive Smokeless Tobacco Health Education Act of 1986 (15 U.S.C. 4401 et seq.) shall prohibit a manufacturer of tobacco products from providing consumers with information concerning tobacco product constituents, tobacco smoke, and the adverse effects of tobacco use in addition to the information that such manufacturers are required to provide pursuant to this chapter and the Federal Cigarette Labeling and Advertising Act (15 U.S.C. 1333 et seq.) and the Comprehensive Smokeless Tobacco Health Education Act of 1986 (15 U.S.C. 4401 et seq.).

"(2) EFFECT ON LIABILITY LAW.—Nothing in this title shall relieve any person from liability at common law or under State statutory law to any other person.

"SEC. 952. ADULTERATED TOBACCO PRODUCTS.

"A tobacco product shall be considered to be adulterated—

"(1) if the level of any tobacco additive contained in the product is in violation of a requirement under section 953(b);

"(2) if the nicotine, tar, carbon monoxide, or other harmful constituent level has not been established under section 954;

"(3) if it contains any additive or any substance that is considered to be poisonous or render it significantly injurious to health;

"(4) if it contains in whole or in part any filthy, putrid, or decomposed substance; or

"(5) if it has been prepared, packed, or held under unsanitary conditions where it may have become contaminated with filth or where it may have been rendered more injurious to health.

"SEC. 953. TOBACCO ADDITIVES.

"(a) IN GENERAL.—It shall be unlawful for any person to manufacture, import, or package, any tobacco product unless such person has provided to the Center a complete list of each tobacco additive used in the manufacture of each tobacco product brand name and the quantity of such additive.

"(b) DISCLOSURE REQUIREMENTS.—

"(1) PRESCRIPTION.—The Secretary shall by regulation prescribe disclosure requirements for information on packages of tobacco products or in package inserts that are provided with such products, or by any other means so that the public will be adequately informed of the tobacco additives contained in any brand or variety of tobacco products.

"(2) REDUCTIONS AND PROHIBITIONS ON USE OF ADDITIVES.—If the Center determines that any tobacco additive in a tobacco product, either by itself or in conjunction with any other additive, presents unnecessary increased risks to health, the Center may require that such levels of the tobacco additive in the tobacco product be reduced or that it be prohibited from use.

"SEC. 954. NICOTINE, TAR, CARBON MONOXIDE, AND OTHER CONSTITUENTS.

(a) LISTING OF BRANDS.—It shall be unlawful for any person to manufacture, import, or package any tobacco product unless such person has provided the Center with a complete list of all brands of such tobacco products that includes the levels of the tar, nicotine, carbon monoxide, and other constituent (as determined by the Center) for each brand as determined by the manufacturer, importer, or their representatives. Data necessary to verify such levels shall be made available to the Center on the request of the Center.

"SEC. 955. REPEAL OF FEDERAL PREEMPTION ON STATE REGULATION OF LOCAL ADVERTISERS

"Nothing in this subtitle, section 5 of the Federal Cigarette Labeling and Advertising Act (15 U.S.C. 1332, et seq.), or the Comprehensive Smokeless Tobacco Health Education Act (15 U.S.C. 4401 et seq.) shall prevent any State or local government from enacting additional restrictions on the advertising, promotion, sale, or distribution of tobacco products to persons under the age of 18, or on the placement or location of advertising for tobacco products that is displayed solely within the geographic area governed by the applicable State or local government, such as advertising on billboards or on transit vehicles, as long as the restrictions are consistent with and no less restrictive than the requirements of this subtitle and Federal law.

"SEC. 956. EXAMINATIONS AND INVESTIGATIONS.

"(a) AUTHORITY.—

"(1) IN GENERAL.—The Center is authorized to conduct examinations and investigations for the purposes of this title through officers and employees of the Department or through any health officer or employee of any State, Territory, or political subdivision thereof, duly commissioned by the Secretary as an officer of the Department.

"(2) PUERTO RICO AND THE TERRITORIES.—In the case of tobacco products packed in the Commonwealth of Puerto Rico or a Territory the Center shall attempt to make inspection of such products at the first point of entry within the United States, when in the opinion of the Center and with due regard to the enforcement of all the provisions of this title, the facilities at the disposal of the Center will permit of such inspection.

"(3) DEFINITION.—As used in this subsection the term 'United States' means the States and the District of Columbia.

"(b) SAMPLES.—Where a sample of a tobacco product is collected for analysis under this title the Center shall, on request, provide a part of such official sample for examination or analysis by any person named on the label of the product, or the owner thereof, or the attorney or agent of such persons, except that the Secretary may, by regulation, make such reasonable exceptions from, and impose such reasonable terms and conditions relating to, the operation of this subsection as the Secretary finds necessary for the proper administration of the provisions of this title.

"(c) INSPECTION OF RECORDS.—For purposes of enforcement of this title, records of any department or independent establishment in the executive branch of the Federal Government shall be open to inspection by any official of the Department of Health and Human Services duly authorized by the Center to make such inspection.

"SEC. 957. NONTOBACCO NICOTINE CONTAINING PRODUCTS.

"Any product that contains nicotine but that is not a tobacco product as defined in section 961, shall be considered to be a drug under section 201(g)(1)(C) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(g)(1)(C)).

"SUBTITLE E—MISCELLANEOUS PROVISIONS

"SEC. 961. DEFINITIONS.

"As used in this title:

"(1) ADVERTISEMENT.—The term 'advertisement' means—

"(A) all newspaper and magazine advertisements and advertising inserts, billboards, posters, signs, decals, banners, matchbook advertising, point-of-purchase display material (except price information), and all other printed or other material used for promoting the sale or consumption of tobacco products to consumers; and

"(B) any other means used to promote the purchase of tobacco products.

"(2) CENTER.—The term 'Center' means the Center for Tobacco Products Control and Education established under section 901.

"(3) CONSTITUENT.—The term 'constituent' means any element of a tobacco product that is not an additive.

"(4) DEPARTMENT.—The term 'Department' means the Department of Health and Human Services.

"(5) IMMEDIATE CONTAINER.—The term 'immediate container' does not include package liners.

"(6) INFORMAL HEARING.—The term 'informal hearing' means a hearing which is not subject to section 554, 556, or 557 of title 5 of the United States Code and which provides that—

"(A) the presiding officer in the hearing shall be designated by the Secretary from officers and employees of the Department who have not participated in any action of

the Secretary that is the subject of the hearing and who are not directly responsible to an officer or employee of the Department who has participated in any such action;

"(B) each party to the hearing shall have the right at all times to be advised and accompanied by an attorney;

"(C) prior to the hearing, each party to the hearing shall be given reasonable notice of the matters to be considered at the hearing, including a comprehensive statement of the basis for the action taken or proposed by the Secretary that is the subject of the hearing and a general summary of the information that will be presented by the Secretary at the hearing in support of such action;

"(D) at the hearing the parties to the hearing shall have the right to hear a full and complete statement of the action of the Secretary that is the subject of the hearing together with the information and reasons supporting such action, to conduct reasonable questioning, and to present any oral or written information relevant to such action, including the calling of witnesses;

"(E) the presiding officer in such hearing shall prepare a written report of the hearing to which shall be attached all written material presented at the hearing;

"(F) the participants in the hearing shall be given the opportunity to review and correct or supplement the presiding officer's report of the hearing; and

"(G) the Secretary may require the hearing to be transcribed, or a party to the hearing shall have the right to have the hearing transcribed at such party's expense. Any transcription of a hearing shall be included in the presiding officer's report of the hearing.

"(7) LABEL.—The term 'label' means a display of written, printed, or graphic matter on the immediate container of any tobacco product, the outside container or wrapper, if such exists, of the retail package of such product, or is easily legible through the outside container or wrapper.

"(8) LABELING.—The term 'labeling' means all labels and other written, printed, or graphic matter—

"(A) on any tobacco product or any of its containers or wrappers; or

"(B) accompanying such products.

"(9) MINOR.—The term 'minor' means any individual who is under the age of 18 years.

"(10) PERSON.—The term 'person' includes individual, partnership, corporation, and association.

"(11) PROMOTION.—The term 'promotion' means any marketing communication method that informs, persuades or reminds consumers of a tobacco product or the attributes, image, or brand name of such product or, motivates consumers to sample or try that product.

"(12) SECRETARY.—The term 'Secretary' means the Secretary of Health and Human Services.

"(13) STATE.—The term 'State' means any State or Territory of the United States, the District of Columbia, and the Commonwealth of Puerto Rico.

"(14) TAR.—The term 'tar' means mainstream total particulate matter minus nicotine and water.

"(15) TOBACCO ADDITIVE.—The term 'tobacco additive' means any ingredient that is added to a tobacco product in the process of manufacturing or producing a tobacco product.

"(16) TOBACCO PRODUCT.—The term 'tobacco product' means cigarettes, cigars, little cigars, pipe tobacco, smokeless tobacco, snuff, and chewing tobacco, and other products that contain tobacco that are intended for human use.

"SEC. 962. CONSTRUCTION.

"Nothing in this title shall be construed to repeal any requirement of the Federal Cigarette Labeling and Advertising Act (15 U.S.C. 1331 et seq.), and the Comprehensive Smokeless Tobacco Health Education Act (15 U.S.C. 4401 et seq.).".

SEC. 9. TECHNICAL AMENDMENTS.

(a) COMPREHENSIVE SMOKING EDUCATION ACT.—Section 2 of the Comprehensive Smoking Education Act (15 U.S.C. 1331) is repealed.

(b) COMPREHENSIVE SMOKELESS TOBACCO HEALTH EDUCATION ACT OF 1986.—Sections 2, 4, 5, and 8 of the Comprehensive Smokeless Tobacco Health Education Act of 1986 (15 U.S.C. 4401, 4403, 4404, and 4407) are repealed.

SEC. 10. MISCELLANEOUS PROVISIONS.

(a) CONFIDENTIALITY.—Section 7(b) of the Federal Cigarette Labeling and Advertising Act (15 U.S.C. 1335a(b)) is amended by striking out paragraph (2).

(b) WARNING LABELS.—Section 4(a) of the Federal Cigarette Labeling and Advertising Act (15 U.S.C. 1333(a)) is amended by striking out "SURGEON GENERAL'S WARNING: Cigarette Smoke Contains Carbon Monoxide," each place such occurs in paragraphs (1), (2), and (3), and inserting in lieu thereof the following: "SURGEON GENERAL'S WARNING: Smoking is Addictive. Once you start you may not be able to stop.".

SEC. 11. CONSTRUCTION.

Nothing in this Act, or an amendment made by this Act, shall be construed to limit, restrict, expand, or otherwise affect the authority of the Federal Trade Commission.●

By Mr. GORE:

S. 1884. A bill to promote the use of recycled materials derived from municipal refuse, and for other purposes; to the Committee on Commerce, Science, and Transportation; and

S. 1885. A bill relating to the financing of certain solid waste disposal facilities, and for other purposes; to the Committee on Finance.

NATIONAL RECYCLABLE COMMODITIES ACT OF 1989 AND NATIONAL RECYCLABLE COMMODITIES ACT OF 1989

Mr. GORE. Mr. President, I rise today to introduce a pair of bills, the National Recyclable Commodities Act of 1989 and the National Recyclable Commodities Act of 1989. These two bills in tandem are designed to address a critical issue in solid waste management and recycling; that is, the lack of markets for recycled materials.

On this same day, similar legislation is being introduced in the other body by Representatives JIM FLORIO, HENRY WAXMAN, GERRY SIKORSKI, and FRANK GUARINI.

Mr. President, right now there is a train in Mississippi filled with solid waste on a siding. Nobody knows what to do with it.

Last year, we saw a garbage barge leave New York City and take an 18-month tour of the Caribbean. It had to go right back to where it started from.

In my own State of Tennessee, there are 95 counties, and right now 85 of them are in the middle of a big political controversy over a new landfill or a new incinerator, or both. All over the United States, we are seeing the creation of mountains of garbage and solid waste with nowhere to put it.

Somebody says, let us recycle, and, of course, we have to recycle. Old timers tell us the real problem is we have to stop making so much of this garbage in the first place and what we can reuse, we have to reuse it and recycle it. That is fine. But in order to recycle something, you have to use it and then bring it all the way back into commerce and use it a second time. That means there has to be a market for the product or container that is recycled. That is what the two bills I am introducing today will do.

Mr. President, according to EPA, almost three-fourths of all municipal solid waste landfills will close within 15 years, and 45 percent of these are expected to close within 5 years. The average tipping fee that waste haulers pay to unload at landfill sites doubled from $10 per ton in 1982 to $20 per ton in 1986, a high price to pay for the 130 million tons of waste we deposit in landfills each year. In the Northeast, average tipping fees in 1987 were $39 per ton. Incineration can reduce waste volumes by as much as 70 pecent, but emits air pollution and leaves behind heavy metals. Both the Office of Technology Assessment and the EPA have stated that the best way to deal with our solid problem is to reduce the amount of waste we generate. We can do this by recycling.

Recycling not only reduces the amount of waste we must dispose of, but has economic and environmental benefits in the production of materials. Substituting recycled paper for virgin paper uses 75 percent less energy and reduces air pollution by 74 percent and water pollution by 35 percent. Because papermills that reprocess secondary paper fiber can be located close to the markets that use the paper, they can save significant amounts in transportation costs over paper made from virgin pulp. A secondary paper company with mills near New York City, Chicago, and Atlanta currently offers its customers a savings of $30 to $40 per ton in transportation costs over its Canadian competitors.

But even though recycling makes sense, it faces other hurdles. As I stated before, a major problem is the lack of existing markets to absorb the substantial increase of recyclable materials being collected. Many municipalities are instituting recycling programs in response to the closing of landfills and backlash against inciner-

ation, only to find themselves unable to get rid of these materials, even at negative prices, because there are simply too few markets. The town of Islip, NY, for example, must truck 22 percent of the materials it collects in its recycling program to a landfill because it cannot get rid of them any other way. Individual efforts are suffering as well. I recently received a letter from a church group in Sevierville, TN, informing me that they were being forced to end the recycling program they had started only a year ago. The recycling center to which they sold the 7 tons of paper they collected each week announced it would no longer pick up their paper, as the mills that it relied on to accept the paper could no longer handle the quantities being shipped to them.

As entire regions institute recycling programs, the problem will only become worse. Some experts feel that unless something is done to stimulate these markets, the recycling effort will collapse within 2 years.

A problem related to the lack of markets is the lack of standards and criteria for recyclable materials. A myriad of different definitions and standards for recyclable materials are being adopted among the States and communities developing recycling programs. Industry, however, cannot readily adapt itself to differences defined by political boundaries, and is thus finding it very difficult to respond to the varying requirements placed on it. There is a great need for national standards that communities can adopt and industry can follow.

The legislation I am introducing today addresses these problems. It would direct the Federal Government to promote recycling and markets for recyclable commodities. The principle behind the legislation is simple: Help industry and policymakers find out what works and allow them to build on these efforts.

The bills stress three factors essential in the development of markets for recyclable commodities: Readily available, credible information; clarity and consistency in material specifications and standards; and the ability of these materials to compete with virgin materials.

Let me just describe the legislation, and I might say, Mr. President, it has been developed over an extended period of time with the help and cooperation of a whole series of national groups that have been active in this field. Let me describe the key parts of it.

It will direct the Federal Government to promote recycling and markets for recyclable commodities.

It will require, first of all, the Department of Commerce to establish a national recycling clearinghouse for the dissemination of data on recyclable commodities. It will require aggressive procurement by the Federal Government of goods made from postconsumer commodities. It will standardize the classification of postconsumer commodities. It will require the Department of Commerce to conduct a national advertising campaign promoting recycling and the purchase of recycled goods. It will require the Department of Commerce, in cooperation with the State Department, to develop a program to promote the export of recyclable commodities for recycling by foreign industry.

It will create university centers for research and development efforts on recycling. It will require the labeling of packaging containers and nondurable goods as to their recyclability. It will also amend the Internal Revenue Code to provide for a 15-percent investment tax credit for manufacturers relying on postconsumer recyclables and amend the Tax Code to include qualified recycling facilities as facilities that may be financed by tax-exempt bonds.

The agency charged with carrying out these requirements is the Department of Commerce, which currently undertakes many similar activities. The Commerce Department has vast experience and capabilities in data collection and market analysis through the Census Bureau, the National Technical Information Service, and the Bureau of Economic Analysis. Under the auspices of the National Institute of Standards and Technology, formerly known as the National Bureau of Standards, it has developed measurement standards and test methods. The Economic Development Administration, the International Trade Administration, and the Minority Business Development Agency provide the Commerce Department with substantial industrial and commodity promotion capabilities. Finally, the regulatory programs administered by the Bureau of Export Administration provide the Department with the expertise to administer the regulatory provisions of these bills.

This legislation mandates the creation of a new office within the Department of Commerce, the Bureau of Recyclable Commodities, to pull into one place the varied experience and expertise of the entire department.

Little information is currently available on recyclable commodities and markets. Requiring the Department of Commerce to collect statistics on materials in municipal refuse, materials being collected for recycling, and markets for these materials will ensure that credible information is readily available to all industries and the public. Market analyses, intended to accompany the statistics and other information on recyclable commodities, will provide the public and industry information about opportunities and niches in recyclable commodities on an ongoing basis. Finally, reports to Congress on the current and future recyclable commodities markets will make available indepth information and will provide an indication as to the need for other steps to assist market development.

The legislation requires the Commerce Department to designate, with the assistance of an advisory committee of public officials and industry and public representatives, types and grades of recyclable commodities and standards and test methods for these. This will ensure that uniform standards for recyclable commodities are available for adoption across the Nation. In order for indusry to adopt machinery to all States and commodities, one body must set standards for recyclable commodities that can be accepted by everyone. The Federal Government, which is responsible for ensuring the free movement of goods in interstate commerce, is the appropriate entity for this task. Let me stress that the standards will be developed in partnership with the public.

This legislation creates a labeling program intended to provide consumers with information through which they may choose goods that are recyclable over those that are nonrecyclable. In doing so, it recognizes that consumers play a significant role in bringing goods to the market. In effect, this is a consumer right-to-know requirement, allowing the consumer to decide the extent to which recyclable commodities markets will develop.

Congress recognized the role of Government procurement in expanding the markets for recyclable materials in its passage of the Resource Conservation and Recovery Act. Unfortunately, very little has been done. To date, EPA's effort to develop guidelines for procurement of recycled goods by Federal, State, and local agencies has moved extremely slowly, with only five guidelines being developed since the passage of the 1984 RCRA amendments. Many feel that the slowness is due to EPA's lack of expertise in markets and commodities. A further problem has been the lack of response by agencies; EPA has little experience in the promotion of goods. Shifting the entire procurement program over to the Department of Commerce should help solve both problems, as its strength is knowledge of commodities and their promotion in interstate commerce. Furthermore, shifting the procurement program to the Department of Commerce will allow it to be incorporated into the overall recyclable commodities promotion program this legislation creates.

Because domestic markets for recycled products are developing so slowly, promoting the export of recycled products will also expand the current markets for recyclable commodities. It will

remove some of the surplus from U.S. markets and will provide less developed nations with new industries to promote growth. Ultimately, a great deal of the manufacture of goods that require a fairly pure feedstock; that is, single-resin plastics, may be most efficiently done in countries with a low labor cost, as separation by hand is often the best available technology. A number of pilot projects for manufacturing goods from recycled materials are currently being established in parts of Asia with some degree of success. This legislation supports these efforts.

To assist in the research and development efforts to find innovative uses for recycled materials, this legislation creates a series of research centers at our universities. Universities have always been sources of industrial innovation, as they are a huge pool of skilled engineers and scientists. In areas where private industries can fund research and development efforts, they will frequently fund programs at universities to investigate new or alternative manufacturing processes and will work with the universities in creating these processes. In areas where there are not yet industries with sufficient funds to devote to these programs, this partnership does not occur, and research and development lags. Recycling is such an area. Because the recycling industry is not yet strong enough to support reseach and development efforts, the Federal Government must provide this support. Establishing these university reseach centers will provide a vehicle to do this.

Finally, the legislation extends two tax credit programs to help promote recycling and stimulate specific markets that are in dire need of support. The first of these programs include municipal recycling facilities among those facilities able to be funded by tax-exempt bonds. Establishing a recycling program has often been seen by municipalities as a less desirable solid waste disposal option than incineration, as building an incineration facility is viewed as simply a capital expenditure with few collection problems. A recycling program, on the other hand, can represent a significant collection problem, as all the material must be sorted. Allowing recycling facilities to be funded by tax-free municipal bonds will place them on equal footing with or stronger footing than incinerators when funding is considered, making recycling a more attractive waste management option.

The second program provides invesment tax credits to two markets that are suffering from severely depressed prices: secondary paper fiber and recycled rubber. Although other markets can use similar assistance, these two are most in need of help. Tax incentives have been instituted in several States, and thus far have proven effective in stimulating markets. This measure is very narrowly defined and is carefuly aimed only at these two industries to avoid problems of market distortion. It simply provides a gentle boost to two areas where a boost is very much needed.

Mr. President, the bills I am introducing are actually quite modest. The Federal Government has long helped monitor the grain, timber, and dairy markets. I simply propose to extend a helping hand to another group of markets, the recyclable commodities markets. Given the urgency with which we must solve our solid waste disposal problems, and the economic benefits of recycling, these measures may be thought by some to be barely adequate. I hope, however, that they will provide enough of a push to the recyclable commodities markets that the markets will become self-supporting, and our recycling efforts will continue to advance.

Mr. President, we have to move toward recycling. We have to encourage the reuse of containers and packaging and products that can be reused again and again. We cannot continue to send garbage barges on tours of the Caribbean and solid waste trains to Mississippi and fill up good land with landfills and burn waste in ways that create health problems for people who live near the incinerators. Some of these techniques will have to be used, of course, because the problem is not going to disappear overnight. But the real answer is recycling and reducing the amount of waste generated in the first place. I call upon my colleagues to support this legislation. I invite their attention to it. I hope they will sign on as cosponsors.

I ask unanimous consent that the text of the bill as well as a summary and two letters appear in the RECORD.

There being no objection, the bills and material were ordered to be printed in the RECORD, as follows:

S. 1884

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "National Recyclable Commodities Act of 1989".

SEC. 2. FINDINGS.

The Congress finds the following:

(1) Each year, millions of tons of municipal refuse materials are recycled into consumer and other goods which are sold or distributed in interstate commerce. Refuse materials already being recycled include waste paper and paperboard, plastic scrap, discarded tires and other rubber scrap, waste glass, aluminum scrap, spent automotive batteries and other nonferrous scrap, steel scrap, and yard waste. Much greater quantities of these same refuse materials are not currently being recycled, and are instead incinerated, landfilled, or otherwise made unavailable to industries in the United States for the production of consumer and other goods.

(2) Segregation of recyclable materials from the municipal waste stream does not, by itself, guarantee successful recycling. Effective recycling is critically dependent on the existence of adequate regional, national, and international markets for each type of material collected.

(3) By virtue of its significant Constitutional interest in facilitating interstate commerce and its ability to influence the economic climate for business investment in the United States, the Federal Government can and should play a key role in encouraging the expansion of industrial capacity for the manufacture of recycled consumer and other goods, and stimulating and strengthening available markets for recycled goods.

(4) Increased recycling of municipal refuse materials will necessitate the building of new recycling plants such as secondary paper mills, plastics recycling plants, steel minimills, rubber reclamation facilities, and secondary aluminum and lead smelters. Construction and operation of these industrial facilities will contribute to the expansion of the Nation's manufacturing base, create new employment opportunities for the United States labor force, and enhance the tax bases of Federal, State, and local governments.

(5) By displacing goods and raw materials presently imported, domestic production of recycled goods can reduce the Nation's dependence on foreign supplies of these materials and improve the Nation's balance of trade.

(6) Manufacture of recycled goods is often substantially more energy-efficient than production of comparable goods from virgin materials and feedstocks. As a result, increased recycling will reduce the Nation's energy consumption and lessen the Nation's dependence on foreign energy supplies.

SEC. 3. BUREAU OF RECYCLABLE COMMODITIES.

The Secretary shall establish within the Department of Commerce a separate office to be called the Bureau of Recyclable Commodities. The principal purpose of the office shall be to promote the use of recycled materials derived from municipal refuse. Unless otherwise specified, the office, at the direction of the Secretary, shall carry out the functions enumerated by this Act.

SEC. 4. ANNUAL STATISTICS ON MUNICIPAL REFUSE AND OTHER MATERIALS.

(a) MATERIALS COVERED.—The Secretary shall gather statistics in accordance with this section for municipal refuse, preconsumer refuse materials, and the following types of materials contained in municipal refuse:

(1) Aluminum scrap.
(2) Lead scrap.
(3) Other nonferrous scrap.
(4) Ferrous scrap.
(5) Plastic scrap.
(6) Rubber scrap.
(7) Waste glass.
(8) Waste paper and paperboard.
(9) Yard waste.
(10) Food waste.

(b) STATISTICS ON REFUSE MATERIALS.—For municipal refuse, preconsumer refuse materials, and for those materials listed in subsection (a), the Secretary shall collect statistics and information on the following:

(1) Quantities of durable goods, nondurable goods, containers, packaging, and other items that are sold or distributed in commerce and that are likely to become municipal refuse.

(2) Quantities of municipal refuse annually generated by households, office establishments, commercial establishments, and institutional establishments.

(3) Quantities of preconsumer refuse materials annually generated by industrial facilities.

(4) Quantities of materials annually managed using techniques other than recycling, including incineration and landfilling.

(5) Inventories of materials being stockpiled for possible recycling.

(6) Quantities of materials annually recycled.

(c) RECYCLING STATISTICS.—For materials being recycled (as determined under subsection (b)(6)), the Secretary shall collect statistics and information on the following:

(1) Specific recycling techniques employed by industries, and quantities of materials annually recycled using these techniques.

(2) Available markets (including domestic and export markets) for recycled goods, and quantities of recycled goods annually sold or distributed in commerce.

(3) Existing industrial capacity for the manufacture of recycled goods.

(4) Specific techniques employed by households, local governments, and industries to source-separate, collect, transport, stockpile, process, or upgrade these materials for the purpose of recycling, and quantities of materials annually handled using these techniques.

(d) ANNUAL STATISTICS.—The Secretary shall collect and publish the statistics and information required under this section not later than 6 months after the date of the enactment of this Act. At a minimum, the Secretary shall update and publish such statistics and information on an annual basis.

(e) MULTI-STATE REGIONS.—After consultation with the States, the Secretary shall designate not fewer than 6, and no more than 10, multi-State regions within the United States for the purpose of regional data collection. The Secretary shall collect and compile statistics for each of the designated regions.

(f) S.I.C. REVISION.—The Secretary shall revise the standard industrial classification system as necessary to facilitate the collection of statistics and other information on recycling and other related activities, including source-separation, collection, transport, stockpiling, processing, and upgrading of materials for the purpose of recycling. To the extent practicable and useful, the Secretary shall integrate necessary data collection activities required under this section with periodic surveys of industry or government conducted by the Department of Commerce.

SEC. 5. IDENTIFICATION OF GRADES, SPECIFICATIONS, AND TEST METHODS FOR RECYCLABLE COMMODITIES.

(a) COMMODITY TYPES AND GRADES.—Not later than 9 months after the date of the enactment of this Act, and after consultation with appropriate recycling industries and other potentially affected parties, the Secretary shall identify municipal refuse materials covered under section 4(a) that qualify as recyclable commodities and identify, and, to the extent practicable, standardize the types and grades of those commodities. The Secretary may revise such types and grades from time to time as the Secretary considers necessary.

(b) GRADE DETERMINATION.—To the extent practicable, identification under subsection (a) of suitable grades of recyclable commodities shall be based on—

(1) material grades traded on commodity exchanges or markets;

(2) material grades used as raw materials or feedstocks in the manufacture of recycled goods; or

(3) material grades purchased or accepted for eventual recycling after further source-separation, collection, transport, stockpiling, processing, upgrading, or other handling.

(c) MULTIPLE TYPES AND GRADES.—In identifying the types and grades of municipal refuse materials that qualify as recyclable commodities, the Secretary may assign municipal refuse materials to multiple types and grades.

(d) SPECIFICATIONS.—Not later than 9 months after the date of the enactment of this Act, and after consultation with appropriate recycling industries and other potentially affected parties, the Secretary shall identify and, to the extent practicable, standardize the technical specifications applying to the use of each individual recyclable commodity as a raw material or feedstock for recycling. These specifications shall be revised periodically to ensure continuing conformance to industry standards for recycling.

(e) TEST METHODS.—Not later than 9 months after the date of the enactment of this Act, and after consultation with appropriate recycling industries and other potentially affected parties, the Secretary shall identify and, to the extent practicable, standardize the test methods employed in determining whether refuse materials meet the specifications that apply to each individual recyclable commodity. These test methods shall be revised periodically to ensure continuing conformance to industry standards for recycling.

(f) ADVISORY PANEL.—To support the identification of specifications and test methods for each individual recyclable commodity or class of commodities, the Secretary shall establish an advisory panel consisting of the following:

(1) Representatives of industries currently engaged in recycling of the commodity or class of commodities.

(2) Representatives of other public or private organizations that set specifications or test methods for recycling of the commodity or class of commodities.

(3) Representatives of industries and local governments currently engaged in the collection, transport, stockpiling, processing, or upgrading of the commodity or class of commodities.

(4) Representatives of State governments, consumer organizations, and environmental organizations.

(g) REVISIONS.—Industries or local governments engaged in the collection, transport, stockpiling, processing, upgrading, or recycling of recyclable commodities may petition the Secretary for revision of applicable commodity grades, specifications, or test methods as necessary to prevent or minimize interference with current recycling techniques. Not later than 90 days after receipt of the petition, the Secretary shall either deny the petition or approve the petition and make appropriate revisions to the applicable specifications or test methods. In making the determination of denial or approval, and in making any revisions resulting from an approval, the Secretary shall consult with the advisory panel established under subsection (c).

(h) RECYCLING ADVISORY.—(1) If the Secretary finds that a physical or chemical property, or contaminant, of a recyclable commodity is interfering with (A) current recycling techniques; (B) marketing of recycled goods manufactured from the commodity; or (C) handling of the recyclable commodity prior to recycling; and is not adequately addressed by applicable specifications or test methods, the Secretary shall issue a recycling advisory to States, local governments, industries engaged in the collection, transport, stockpiling, processing, upgrading, or recycling of the commodity, and other potentially affected parties.

(2) A recycling advisory issued under paragraph (1) shall—

(A) describe the physical or chemical property, or contaminant, contributing to interference with recycling, marketing, or handling of the commodity; and

(B) identify any precautions or measures that may be taken to eliminate or minimize the interference.

SEC. 6. PERIODIC MARKET ANALYSES.

(a) PRICE INFORMATION.—The Secretary shall prepare and make available to the public, on at least a quarterly basis, a report on prevailing market prices for recyclable commodities. The first such report shall be made available not later than one year after the date of the enactment of this Act. The report shall include price information for both domestic and export markets and for each of the regions designated by the Secretary under section 4(e) of this Act.

(b) RECYCLING RATES.—On at least an annual basis, the Secretary shall determine and make available to the public a report on the prevailing national recycling rate for each recyclable commodity. To the extent practicable, the Secretary shall determine and include in this report the prevailing recycling rates for each of the regions designated by the Secretary under section 4(e) of this Act. The first such report shall be made available not later than one year after the date of the enactment of this Act. For the purpose of making the determinations, materials exported for recycling in foreign nations shall be considered to be recycled. The Secretary shall also consider the extent of commodity stockpiling in determining the recycling rate.

(c) PERIODIC MARKET ANALYSES.—On at least an annual basis, the Secretary shall prepare and make available to the public a report analyzing the technical and economic factors that may influence future foreign and domestic markets for recyclable commodities. To the extent practicable, the Secretary shall also evaluate the factors influencing markets in each of the regions designated by the Secretary under section 4(e) of this Act. The first such report shall be made available not later than one year after the date of the enactment of this Act. The analyses should consider the following:

(1) Future supplies of recyclable commodities.

(2) Available production capacity of recycling industries.

(3) Strength of existing markets for commodities and potential for development of new markets.

(4) Potential competition from substitute factors of production.

(5) Other market factors identified by the Secretary.

(d) MARKET INDICES.—The Secretary may develop appropriate indices to measure and project market trends for recyclable commodities.

SEC. 7. REPORTS ON RECYCLING CAPACITY

(a) REPORTS REQUIRED.—The Secretary shall prepare and submit to Congress the following reports:

(1) A report evaluating the potential for expanded recycling of waste paper and paperboard, rubber scrap, plastic scrap, ferrous scrap, and lead scrap.

(2) A report evaluating the potential for expanded recycling of aluminum scrap, other nonferrous scrap, waste glass, and yard and food waste.

(b) CONTENT OF REPORTS.—Each report required by subsection (a) shall include an analysis of the following:

(1) Techniques and systems used by industries and local governments to source separate, collect, process, or upgrade the materials covered in the report, and supplies of materials generated by such techniques and systems.

(2) Adequacy of existing and planned industrial capacity for the manufacture of recycled goods from the materials covered in the report, and opportunities for expanding such capacity nationally and regionally by retrofitting existing industrial plants or building new recycling plants.

(3) Adequacy of existing equipment and facilities for transport of materials covered by the report to recycling plants and markets, and economic and technical barriers to the transport of such materials.

(4) Opportunities for the stockpiling of materials covered by the report that are not immediately remanufactured or reused.

(5) The extent of Federal subsidies (including tax expenditures) and other incentives provided for the manufacture of goods made from virgin materials that compete with goods made from materials covered by the report.

(6) Available options for influencing the timing and extent of private and government investment in—

(A) expanded industrial capacity for the manufacture of recycled goods;

(B) new equipment and facilities for the transport of materials covered by the report and recycled goods to recycling plants and markets; and

(C) new equipment and facilities for the stockpiling of materials covered by the report before remanufacture or reuse.

(c) DEADLINES.—The report required by subsection (a)(1) shall be submitted to Congress not later than 9 months after the date of the enactment of this Act. The report required by subsection (a)(2) shall be submitted to Congress not later than 18 months after such date.

SEC. 8. LABELING OF NONDURABLE GOODS.

(a) IN GENERAL.—The Secretary shall, after notice and opportunity for public hearing, promulgate regulations requiring labeling on recyclability and composition of nondurable goods in accordance with this section.

(b) ITEMS COVERED; DEADLINES FOR REGULATIONS.—(1) Such regulations shall be promulgated not later than 2 years after the date of the enactment of this Act for containers and packaging used to hold food, beverages, soaps, detergents, cleaning preparations, personal care products, and other items sold in food stores (SIC code 54), liquor stores (SIC code 5921), and drug stores (SIC code 5912). At a minimum, the regulations for such items shall require labels for—

(A) liquids containers holding in excess of 4 fluid ounces; and

(B) other containers and packaging holding materials in excess of 8 ounces by weight.

(2) Such regulations shall be promulgated not later than 3 years after the date of the enactment of this Act for paper and paperboard products sold to office, commercial, and industrial establishments and households by paper and paperboard manufacturers (SIC 26), wholesale suppliers (SIC 51), and retail suppliers (SIC 5943). Such regulations shall require that labels describing the recyclability of paper and paperboard products may be affixed either to the paper or paperboard product, or to the container or packaging in which the product is distributed or sold.

(3) Such regulations shall be promulgated not later than 4 years after the date of the enactment of this Act for other containers, packaging, and nondurable goods, or classes of such items, as determined by the Secretary. In making such a determination, the Secretary shall consider—

(A) quantities of the materials in the items that are present in municipal refuse;

(B) whether labeling will facilitate additional recycling of the materials; and

(C) the feasibility and cost of labeling to manufacturers.

(4) Regulations promulgated under this section shall take effect not later than 6 months after the date of promulgation.

(c) DETERMINATION OF RECYCLABILITY.—For purposes of determining the type of label to be required on items covered under the regulations, the Secretary shall determine the recyclability of such items, taking into consideration the following:

(1)(A) The demonstrated recyclability of the principal constituent material of such an item. For purposes of this section, the term "demonstrated recyclability" means that—

(i) the principal constituent material of the item is recycled at a rate of at least 10 percent nationwide or across two or more of the regions designated by the Secretary under section 4(e); or

(ii)(I) recyclability of the principal constituent material of the item has been demonstrated by a successful full scale or pilot scale recycling operation; and

(II) programs for the source separation, collection, transport, stockpiling, processing, upgrading, and recycling of the principal constituent material from such item are planned to be implemented as necessary to achieve a 10 percent recycling rate across two or more of the regions designated by the Secretary under section 4(e) within 3 years after the date of the determination of recyclability under this subsection.

(B) In determining the demonstrated recyclability of items covered under the regulations, the Secretary shall give priority to making such determinations first to items covered by subsection (b)(1), second to items covered by subsection (b)(2), and third to items covered by subsection (b)(3). The Secretary may determine the recycling rate for any individual item (or class of items), but shall not include such item (or class) in more than a single recycling rate determination.

(C) For purposes of identifying the constituent materials used in the manufacture of containers, packaging, and nondurable goods, the Secretary shall distinguish between types of materials based on their physical and chemical properties. For purposes of evaluating the recyclability of items composed of plastic, the Secretary shall treat each type of plastic resin as a separate constituent material.

(2) The potential presence of contaminants which may interfere with existing recycling techniques. The Secretary may consider contaminants originally contained in the item, or contaminants introduced during normal use or handling of the item. If the item is composed of multiple materials, the Secretary shall evaluate the separability of the materials. If the materials are found to be nonseparable, the Secretary shall evaluate the recyclability of the item in its entirety.

(3) The need for consistency with grades of recyclable commodities designated by the Secretary under section 5.

(d) LABEL REQUIREMENTS.—(1) Except as provided in paragraph (3), for an item (or class of items) determined by the Secretary to be recyclable under subsection (c), the label shall read "RECYCLABLE _____", with the blank space filled in with the principal constituent material used in manufacturing the item. The label also shall, to the maximum extent feasible, provide information that will assist in the identification of recyclable commodity grades (designated under section 5) potentially produced from the item (or class).

(2) Except as provided in paragraph (3), for an item (or class of items) determined by the Secretary to be nonrecyclable under subsection (c), the label shall read "NONRECYCLABLE BY FEDERAL STANDARDS".

(3) The Secretary may establish an alternative label requirement for an item (or class of items), such as a system of codes or symbols, if such alternative requirement conveys information on recyclability and composition of the item (or class) that is substantially equivalent to the information conveyed by labels otherwise required under this section.

(e) EXEMPTION.—An item (or class of items) may be exempted from labeling requirements if the Secretary determines that labeling will interfere with normal use or handling of the packaging, container, or nondurable good. The Secretary shall not exempt an item (or class) under this section if the trade name of the manufacturer or distributor is included on the packaging, container, or nondurable good.

(f) PETITION TO REVISE.—Industries or local governments engaged in the collection, transport, stockpiling, processing, upgrading, or recycling of recyclable items may petition the Secretary for revision of applicable labeling requirements as necessary to prevent or minimize interference with current recycling techniques. Not later than 90 days after receipt of such a petition, the Secretary shall either deny the petition or approve the petition and make appropriate revisions to the applicable labeling requirements. In making the determination of denial or approval, the Secretary shall consult with the appropriate advisory panel established under section 6(c).

(g) VOLUNTARY RECYCLABILITY SEAL.—Not later than 2 years after the date of the enactment of this Act, the Secretary shall design and publish a standardized, national recyclability seal or symbol to provide further assistance to purchasers in the identification of recyclable packaging, containers, and nondurable goods. Such seal or symbol may be used voluntarily by any manufacturer of an item or class of items determined by the Secretary to be recyclable under subsection (c). The seal or symbol shall be distinct from the label requirements under subsection (d).

(h) ENFORCEMENT.—(1) Whenever on the basis of any information the Secretary determines that any person has violated or is in violation of any requirement of this section, or regulations promulgated under this section, the Secretary may—

(A) issue a recall order requiring the removal of the item from sale or distribution in commerce immediately or within a specified time period; or

(B) commence a civil action in the United States district court in the district in which the violation occurred for appropriate relief, including a temporary or permanent injunction.

(2) Any recall order issued under this subsection shall become final unless, not later than 30 days after the order is served, the person (or persons) named in the order requests a public hearing. Upon such request, the Secretary shall promptly conduct a public hearing. In connection with any proceeding under this subsection, the Secretary may issue subpoenas for the attendance and testimony of witnesses and the production of relevant papers, books, and documents, and may promulgate rules for discovery procedures.

(3) If a violator fails to take corrective action within the time specified in a recall order, the Secretary may assess a civil penalty of not more than $25,000 for each day of continued noncompliance with the order.

(i) MINIMUM CONTENT REQUIREMENTS FOR RECYCLED ITEMS.—Not later than 2 years after the date of the enactment of this Act, the Secretary shall promulgate regulations defining minimum content requirements for packaging, containers, or nondurable goods labeled "RECYCLED" (or words to that effect).

SEC. 9. FEDERAL PROCUREMENT.

(a) GUIDELINES.—(1) The Secretary, after consultation with the Administrator of General Services and the Public Printer, shall issue, and from time to time revise, guidelines for the use of procuring agencies in complying with the requirements of this section. Such guidelines shall—

(A) designate those items which are or can be produced with recycled content and whose procurement by procuring agencies will carry out or support the objectives of this section;

(B) set forth practices and procedures with respect to the procurement of recycled content and items containing such content and with respect to certification by vendors of the percentage of recycled content used;

(C) provide information as to the availability, relative price, and performance of such content and items; and

(D) establish minimum content standards pursuant to subsection (c) and, where appropriate, pursuant to subsection (d), specifying the level of recycled content to be contained in the procurement item.

(2) In making the designation under paragraph (1)(A), the Secretary shall consider, but is not limited in his consideration, to—

(A) the availability of such items;

(B) the impact of the procurement of such items by procuring agencies on the volume of municipal refuse which must be handled through nonrecycling management methods;

(C) the economic and technological feasibility of producing and using such items;

(D) other uses for such recycled content; and

(E) the impact of the procurement of such items by procuring agencies on recycling and procurement practices of nongovernment entities.

(b) REQUIRED GUIDELINES.—At a minimum, the Secretary shall—

(1) no later than 180 days after the date of the enactment of this Act, modify existing guidelines for the procurement of recycled paper and paperboard goods to include minimum content standards at least as stringent as those specified in subsection (c);

(2) no later than one year after the date of the enactment of this Act, issue guidelines for the procurement and use of waste glass in the construction of highways, roadways, and other paved surfaces;

(3) no later than one year after the date of the enactment of this Act, issue guidelines for the procurement and use of discarded tires and other rubber scrap in the construction of highways, roadways, and other paved surfaces;

(4) no later than one year after the date of the enactment of this Act, issue guidelines for the procurement and use of compost, fertilizers, and other soil amendments made from yard waste and food waste;

(5) no later than 540 days after the date of the enactment of this Act, issue guidelines for the procurement and use of automotive batteries made from lead scrap;

(6) no later than 540 days after the date of the enactment of this Act, issue guidelines for the procurement and use of containers and packaging made from aluminum scrap, ferrous scrap, plastic scrap, and waste glass; and

(7) no later than 2 years after the date of the enactment of this Act, issue guidelines for at least three additional categories of items.

(c) MINIMUM CONTENT STANDARDS FOR PAPER; TARGETS AND SCHEDULES.—(1) The Secretary shall establish standards for the level of recycled material that must be contained in recycled paper and paperboard goods purchased by procuring agencies. Procuring agencies shall meet such standards in accordance with the following targets and schedules:

(A) For fiscal year 1990, at least 30 percent of paper and paperboard goods purchased shall have a recycled content of at least 25 percent.

(B) For fiscal year 1991, at least 40 percent of paper and paperboard goods purchased shall have a recycled content of at least 35 percent.

(C) For fiscal year 1992 and each year thereafter, at least 50 percent of paper and paperboard goods purchased shall have a recycled content of at least 50 percent.

(2) The Secretary may, at any time, establish more stringent targets and schedules for procurement of recycled paper and paperboard goods. In addition, for classes of goods consisting of fine writing and printing paper, the targets and schedules shall allow for the procurement of recycled goods containing manufacturing residues, forest residues, and other preconsumer refuse materials. For all other classes of paper products, the targets and schedules shall require the procurement of recycled goods containing waste paper and paperboard.

(3) For purposes of this section—

(A) the term "manufacturing residues, forest residues, and other preconsumer refuse materials" includes—

(i) dry paper and paperboard waste generated after completion of the papermaking process, including envelope cuttings, bindery trimmings, and other paper and paperboard wastes resulting from printing, cutting, forming, and other converting operations; bag, box, and carton manufacturing wastes; and butt rolls, mill wrappers, and rejected unused stock;

(ii) finished paper and paperboard from obsolete inventories of paper and paperboard manufacturers, merchants, wholesalers, dealers, printers, converters, or others;

(iii) fibrous byproducts of harvesting, manufacturing, extractive, or wood-cutting processes;

(iv) flax, straw, linters, bagasse, slash, and other forest residues;

(v) wastes generated by the conversion of goods made from fibrous materials; and

(vi) fibers recovered from waste water which otherwise would enter the waste stream;

(B) the term "papermaking process" (as used in subparagraph (A)(i)) means those manufacturing operations up to and including the cutting and trimming of the paper machine reel into smaller rolls or rough sheets; and

(C) the term "fibrous materials" (as used in subparagraph (A)(v)) means waste rope from cordage manufacture, textile mill waste, and cuttings.

(d) OTHER STANDARDS.—The Secretary may establish minimum content standards for other items as may be necessary to implement the requirements of this section.

(e) GENERAL REQUIREMENTS FOR PROCURING AGENCIES.—

(1) After the date specified in applicable guidelines issued pursuant to subsection (a) or (b), each procuring agency which procures any items designated in such guidelines shall procure such items composed of the highest percentage of recycled content practicable. In the case of items for which minimum content standards have been established by the Secretary pursuant to subsection (c) or (d), the term "practicable" means that the items procured are, at a minimum, in conformance with the minimum content standards that apply to such items.

(2) The decision not to procure such items shall be based on a determination that such procurement items—

(A) are not reasonably available within a reasonable period of time;

(B) fail to meet the performance standards set forth in the applicable specifications or fail to meet the reasonable performance standards of the procuring agencies; or

(C) are only available at an unreasonable price.

(3) For purposes of paragraph (2)(C), an unreasonable price is one which exceeds by more than 10 percent the price of alternative items.

(4) After the date specified in any applicable guidelines issued pursuant to subsection (a) or (b), contracting offices at each procuring agency shall require that vendors—

(A) certify that the percentage of recycled content used in the performance of the contract will be at least the amount required by applicable specifications or other contractual requirements established by the procuring agency; and

(B) estimate the percentage of the total material used in the performance of the contract which is recycled content.

(5) This subsection applies to the procurement of procurement items designated in the guidelines issued pursuant to subsection (a) or (b) in any case in which the procurement is carried out under a contract in which the purchase price of the item (or group of identical or functionally equivalent items) exceeds $10,000.

(f) PROCUREMENT PROGRAMS.—

(1) Not later than one year after the date of issuance of applicable guidelines under subsections (a) and (b), each procuring agency shall develop an affirmative procurement program which will assure that items composed of recycled materials will be purchased to the maximum extent practicable.

(2) Each affirmative procurement program required under this subsection shall, at a minimum, contain—

(A) a recycled content preference program;

(B) an agency promotion program to promote the preference program adopted under subparagraph (A);

(C) a program for requiring estimates of the total percentage of recycled content used in the performance of a contract; certification of minimum recycled content actually used, where appropriate; and reasonable verification procedures for such estimates and certifications; and

(D) annual review and monitoring of the effectiveness of the agency's affirmative procurement program.

(3) In developing the preference program, the procuring agency shall adopt practices and procedures which are substantially equivalent to those specified in guidelines issued under subsections (a) and (b). The procuring agency shall establish minimum recycled content specifications which are set in such a way as to assure that the recycled content of the item meets minimum content standards established by the Secretary under subsections (c) and (d), and is the maximum available without jeopardizing the intended end use of the item or violating the limitations of subparagraphs (A) through (C) of subsection (e)(1).

(4) Each procuring agency shall maintain records on types, quantities, and percentages of items made from recycled content which are purchased or contracted for by the agency. The procuring agency shall annually report these statistics to the Secretary.

(g) IMPLEMENTATION.—The Secretary, in cooperation with the Administrator for Federal Procurement Policy, shall implement the requirements of this section. It shall be the responsibility of the Office of Federal Procurement Policy to assist the Secretary in coordinating this policy with other policies for Federal procurement, in such a way as to maximize the use of recycled content.

(h) ANNUAL REPORTS.—The Secretary shall annually report to Congress on actions taken by Federal agencies and the progress made in the implementation of this section.

(i) CONFORMING AMENDMENT.—Section 6002 of the Solid Waste Disposal Act (42 U.S.C. 6962) is hereby repealed.

(j) LEGISLATIVE CONSTRUCTION.—

(1) SAVINGS PROVISIONS FOR REGULATIONS.—A regulation, rule, guideline, or order in effect under section 6002 of the Solid Waste Disposal Act (42 U.S.C. 6962) on the date before the date of enactment of this Act shall continue in effect under the corresponding provision enacted by this section until repealed, amended, or superseded.

(2) GENERAL SAVINGS PROVISION.—An action taken under a provision of section 6002 of the Solid Waste Disposal Act (42 U.S.C. 6962) as in effect on the day before the date of enactment of this Act shall be treated as having been taken under the corresponding provision enacted by this section.

SEC. 10. PROMOTION OF EXPORT MARKETS.

(a) PROGRAM DEVELOPMENT.—In cooperation with the Department of State, the Secretary shall develop a program to promote the export of recyclable commodities for recycling by foreign industries. As part of this program, the Secretary shall gather, and make available to the public, information identifying potential foreign buyers of recyclable commodities.

(b) EXPORT STATISTICS.—To assist local governments and industries seeking to export recyclable commodities, the Secretary shall compile, and make available to the public, statistics and information on the following:

(1) Specific recycling techniques employed by foreign industries.

(2) Available export markets for recyclable commodities.

(3) Specifications and test methods employed by foreign industries to assess commodity quality.

(4) Prevailing prices in foreign markets for recyclable commodities.

(5) Other information on export markets collected by the Secretary under the provisions of this Act.

(c) In cooperation with the Department of State, the Secretary shall develop a program to promote the export of recycled goods produced in the United States, and to the extent practicable and useful, the Secretary shall integrate this program with other existing programs that promote the export of goods manufactured in the United States.

SEC. 11. PUBLICATION OF INFORMATION.

The Secretary shall publish and make available to the public all statistics, market analyses, and other information on recycling or related activities collected pursuant to this Act on a cost-reimbursable basis.

SEC. 12. NATIONAL ADVERTISING CAMPAIGN.

The Secretary shall develop and conduct a national advertising campaign that promotes recycling and the purchasing of recycled goods. As part of this campaign, the Secretary is authorized to publish or publicize recycling rates for specific refuse materials or recyclable commodities, and for specific types and classes of containers, packaging, nondurable goods, or durable goods sold or distributed in commerce.

SEC. 13. UNIVERSITY RECYCLING RESEARCH CENTERS.

(a) RESEARCH GRANTS.—The Secretary shall make grants to accredited institutions of higher education to establish and operate not fewer than 4, and not more than 6, recycling research centers in the United States. The Secretary shall establish these research centers equitably among the regions of the United States.

(b) RESPONSIBILITIES.—(1) The responsibilities of each recycling research center established under this section shall include, but are not limited to, the conduct of basic research relating to—

(A) innovative recycling processes to be employed in the manufacture of recycled goods;

(B) innovative processes to facilitate recycling, including techniques for source separation, collection, transport, stockpiling, processing, or upgrading of recyclable commodities or refuse materials;

(C) specifications and test methods to be employed in assessing commodity quality;

(D) potential end markets for the sale or distribution of recycled goods; and

(E) composition of municipal refuse.

(2) Each research center shall publish and disseminate the results of such research.

(3) Each research center shall carry out at least one project relating to research on the composting of yard waste, food waste, or waste paper and paperboard.

(c) CONTRACTING AUTHORITY.—(1) As necessary to conduct the research identified under subsection (b), the research center may enter into contracts with any of the following:

(A) Persons involved in the recycling, upgrading, processing, transport, stockpiling, collection, or source separation of recyclable commodities or refuse materials, or persons qualified to perform such functions.

(B) State and local governments.

(C) Nonprofit private entities which are exempt from tax under section 501(c)(3) of the Internal Revenue Code of 1986.

(2) Any institution awarding a contract for outside research shall do so in accordance with such procedures and guidelines as the Secretary may require by regulation.

(d) FEDERAL SHARE.—The Federal share of a grant under this section shall not exceed 80 percent of the costs of establishing and operating the recycling research center.

(e) FUNDING PROVISIONS.—(1) No funds made available to carry out this section shall be used for acquisition of real property (including buildings) or construction of any building.

(2) The Secretary shall allocate funds made available to carry out this section equitably among the research centers established pursuant to this section.

(3) Not less than 40 percent of the funds made available to each research center under this section shall be allocated to research projects to be performed jointly by the research center and one or more local governments with demonstrated expertise in areas critical to the conduct of the research.

(f) APPLICATION.—Any institution of higher education interested in receiving a grant under this section shall submit to the Secretary an application in such form and containing such information as the Secretary may require by regulation.

(g) SELECTION CRITERIA.—The Secretary shall select grant recipients under this section on the basis of the following criteria:

(1) The grant recipient shall be located in a State or region that has experienced difficulties with municipal refuse management.

(2) There is available to the grant recipient for carrying out this section demonstrated research resources.

(3) The grant recipient shall have the capability of providing national and regional leadership in promoting recycling as a long-term solution to municipal refuse management problems.

(4) The grant recipient shall have interdisciplinary staff with demonstrated expertise in areas critical to the conduct of research on recycling.

(5) The grant recipient shall have a demonstrated ability to disseminate results of research on recycling.

(6) The projects which the grant recipient proposes to carry out under the grant are innovative and appropriate.

SEC. 14. FEDERAL OFFICE SOURCE SEPARATION PROGRAM.

(a) GUIDELINES.—In coordination with the Administrator for General Services, the Public Printer, and other Federal agencies, the Secretary shall establish a program for the source separation and collection of materials contained in refuse from office facilities of Federal departments, agencies, and instrumentalities. The Secretary shall issue guidelines that—

(1) identify the materials to be segregated and collected;

(2) specify source separation and collection procedures necessary to produce high quality materials; and

(3) establish recordkeeping procedures necessary to determine the quantities of materials collected, and cost savings that result from collection and recycling of these materials.

(b) DESIGNATED MATERIALS.—To the extent practicable, the material types identified by the Secretary under subsection (a)(1) shall be consistent with grades of recyclable commodities designated by the Secretary under section 5 of this Act. Materials segregated and collected by Federal office facilities shall include—

(1) waste paper and paperboard;

(2) waste glass;

(3) aluminum scrap; and

(4) any other material identified by the Secretary.

(c) APPLICABILITY.—Each Federal department, agency, and instrumentality shall carry out a source separation and collection program in accordance with guidelines issued by the Secretary under subsection (a). The guidelines shall apply to each Federal office facility with more than 25 office workers.

(d) SAVINGS.—Any funds received from the sale of collected materials, and any savings in refuse disposal costs resulting from implementation of the program under this section, shall be retained by the Federal department, agency, or instrumentality carrying out the program. Any savings retained from refuse disposal costs pursuant to this subsection shall remain available to the retaining department, agency, or instrumentality for 5 years from the date the savings were realized.

SEC. 15. REVIEW OF PRODUCT SPECIFICATIONS AND STANDARDS.

(a) INDEPENDENT ASSESSMENT.—The Secretary may conduct an independent technical assessment of any product specification or standard set by a Federal, State, or local governmental agency, industry trade association, or other standard-setting group that may—

(1) disfavor the use of a recyclable commodity as a substitute for comparable virgin feedstocks or raw materials in the manufacture of the product; and

(2) have a substantial adverse impact on existing or potential markets for the recyclable commodity.

(b) REQUIREMENTS.—In conducting an assessment, the Secretary shall—

(1) determine whether the product specification or standard has the effect of disfavoring the use of the recyclable commodity in the manufacture of the product;

(2) identify those technical aspects of the specification or standard which operate to restrict use of the recyclable commodity; and

(3) evaluate the technical basis for the specification or standard, including those aspects of the specification or standard which operate to restrict use of the recyclable commodity.

(c) CONSULTATION.—In conducting an assessment, the Secretary shall consult with the governmental agency or industry group which established the specification or standard, and other appropriate Federal agencies.

(d) LIMITATION ON REVIEW.—The Secretary may not review specifications or standards established by individual private firms or persons.

(e) PUBLIC FINDINGS.—The Secretary shall publish, and make available to the public, the findings and results from its independent technical assessment.

(f) PETITION.—Industries or local governments engaged in the collection, transport, stockpiling, processing, upgrading, or recycling of recyclable commodities may petition the Secretary for an independent technical assessment of a product specification or standard that satisfies the conditions identified under subsection (a). Not later than 90 days after receipt of such a petition, the Secretary shall either deny the petition or approve the petition and conduct the assessment.

SEC. 16. INTERAGENCY WORKING GROUP.

To ensure that the regulations and guidelines developed under this Act are consistent with actions taken by the Environmental Protection Agency and other Federal agencies, the Secretary shall establish an interagency working group to assist in the development of regulations and guidelines and the collection of information required by this Act. Such interagency working group shall consist of representatives appointed by the Secretary and representatives appointed by the Administrator of the Environmental Protection Agency, and the Secretaries of Agriculture, Treasury, Transportation, Interior, Energy, and other appropriate departments, agencies, and instrumentalities.

SEC. 17. CITIZEN SUITS.

(a) IN GENERAL.—(1) Except as provided in subsection (b), any person may commence a civil action on his or her own behalf—

(A) against any person (including (i) the United States, and (ii) any other governmental instrumentality or agency, to the extent permitted by the eleventh amendment to the Constitution) who is alleged to be in violation of any regulation, guideline, standard, requirement, or order that has become effective pursuant to this Act; or

(B) against the Secretary if there is alleged a failure of the Secretary to perform any act or duty under this Act that is not discretionary with the Secretary.

(2) Any action brought under paragraph (1)(B) may be brought in the district court for the district in which the alleged violation occurred or in the District Court of the District of Columbia. In any action brought under paragraph (1), the district court shall have jurisdiction, without regard to the amount in controversy or the citizenship of the parties, to enforce the regulation, guideline, standard, requirement, or order referred to in paragraph (1)(A), to order such person to take such other action as may be necessary, or both, or to order the Secretary to perform the act or duty referred to in paragraph (1)(B), as the case may be.

(b) NOTICE AND OTHER REQUIREMENTS.—(1) No action may be commenced under subsection (a)(1)(A)—

(A) prior to 60 days after the plaintiff has given notice of the violation to the Secretary; or

(B) if the Secretary has commenced and is diligently prosecuting a civil action in a court of the United States to require compliance with such regulation, guideline, standard, requirement, or order.

(2) No action may be commenced under subsection (a)(1)(B) prior to 60 days after the plaintiff has given notice to the Secretary that he will commence such action.

(3) Notice under this subsection shall be given in such manner as the Secretary shall prescribe by regulation.

(c) INTERVENTION.—(1) In any action under subsection (a)(1)(A) in a court of the United States, any person may intervene as a matter of right.

(2) In any action under this section, the Secretary, if not a party, may intervene as a matter of right.

(d) COSTS.—The court, in issuing any final order in any action brought pursuant to this section, may award costs of litigation (including reasonable attorney and expert witness fees) to the prevailing or substantially prevailing party, whenever the court determines such an award is appropriate. The court may, if a temporary restraining order or preliminary injunction is sought, require the filing of a bond or equivalent security in accordance with the Federal Rules of Civil Procedure.

SEC. 18. JUDICIAL REVIEW.

(a) IN GENERAL.—Any judicial review of final regulations promulgated pursuant to this Act shall be in accordance with chapter 7 of title 5, United States Code, except as provided in subsection (b).

(b) EXCEPTIONS.—(1) A petition for review of action of the Secretary in promulgating any regulation or requirement under this Act may be filed only in the United States Court of Appeals for the District of Columbia. Such petition shall be filed not later than 90 days after the date of such promulgation (or after such date if such petition is for review based solely on grounds arising after such 90th day). Any action of the Secretary with respect to which such a review could have been obtained under this subsection shall not be subject to judicial review in civil or criminal proceedings for enforcement.

(2) In any judicial proceeding brought under this section in which review is sought of a determination under this Act required to be made on the record after notice and opportunity for hearing, if a party seeking review under this Act applies to the court for leave to adduce additional evidence, and shows to the satisfaction of the court that the information is material and that there were reasonable grounds for the failure to adduce such evidence in the proceeding before the Secretary, the court may order such additional evidence (and evidence in rebuttal thereof) to be taken before the Secretary, and to be adduced upon the hearing in such manner and upon such terms and conditions as the court may deem proper. The Secretary may modify his findings as to the facts, or make new findings, by reason of the additional evidence so taken, and he shall file with the court such modified or new findings and his recommendation, if any, for the modification or setting aside of his original order, with the return of such additional evidence.

SEC. 19. DEFINITIONS.

As used in this Act:

(1) The term "Secretary" means the Secretary of Commerce.

(2) The term "recycling" means the use of materials derived from municipal refuse as raw materials or feedstocks in the remanufacture of goods sold or distributed in interstate commerce, or the reuse of materials derived from municipal refuse as direct substitutes for other goods sold or distributed in interstate commerce, but does not include use of such materials for energy recovery, or sale or distribution of such materials as fuels or fuel substitutes. Such term does not include source separation, collection, transport, stockpiling, processing, upgrading, or other activities antecedent to, and not integral to, the remanufacturing process used to produce recycled goods or the reuse of such materials.

(3) The term "recycled good" means any material or good remanufactured using materials derived from municipal refuse and sold or distributed in interstate commerce, or reused as a direct substitute for other goods sold or distributed in interstate commerce.

(4) The term "municipal refuse" means any durable good, nondurable good, contain-

er, packaging, material, or other item which has served its intended end use, and has been diverted for recycling or discarded by a consumer, a household, or an office, commercial, or institutional establishment. The term includes aluminum scrap, lead scrap, other nonferrous scrap, ferrous scrap, plastic scrap, rubber scrap, waste glass, waste paper and paperboard, yard waste, and food waste, but does not include sewage, septage, sewage sludge, incinerator ash, used oils, or any mixtures containing these wastes. The term does not include wastes generated by industrial manufacturing processes, or preconsumer refuse materials.

(5) The term "preconsumer refuse material" means any manufacturing scrap or other industrial waste that is similar in composition to municipal refuse and that is diverted for recycling or discarded by an industrial establishment.

(6) The term "aluminum scrap" means any discarded beer, soft drink, or other beverage can, food can, foil or closure, automobile scrap, construction scrap, or other postconsumer refuse material composed of aluminum.

(7) The term "other nonferrous scrap" means any household battery, wire, household appliance, furniture, construction scrap, or other post-consumer refuse material composed of a nonferrous metal besides aluminum or lead.

(8) The term "ferrous scrap" means any discarded beer, soft drink, or other beverage can, food can, automobile, household appliance, furniture, construction scrap, or other post-consumer refuse material composed of iron or steel.

(9) The term "plastic scrap" means any food or beverage container or packaging, automobile scrap, construction scrap, or other post-consumer refuse material composed of plastic.

(10) The term "rubber scrap" means any discarded automotive tire, or other post-consumer refuse material composed of rubber.

(11) The term "waste glass" means any discarded beer or soft drink bottle, wine or liquor bottle, food bottle or jar, construction scrap, or other post-consumer refuse material composed of glass.

(12) The term "waste paper and paperboard" means post-consumer refuse materials composed of paper, such as discarded newspapers, books, magazines, printing and writing papers, other commercial printing papers, tissue paper, napkins and towels, corrugated boxes, other paperboard, paper packing, and other refuse materials composed of paper or related types of cellulosic material containing not more than 10 percent by weight or volume of noncellulosic material such as laminates, binders, coatings, or saturants.

(13) The term "yard waste" means any discarded leaves, grass clippings, tree or shrubbery trimmings, gardening residues, or other similar refuse material composed of vegetative matter.

(14) The term "food waste" means any discarded material composed of food, but does not include any such material discharged to a public or private sewage system.

(15) The term "durable good" means any automobile, household appliance, furniture, equipment, or other item that in normal use is likely to last longer than 3 years.

(16) The term "nondurable good" means any item that in normal use is likely to last 3 years or less, including any paper or paperboard product.

(17) The terms "container" and "packaging" mean any material which holds, wraps, or otherwise encloses a good sold or distributed in interstate commerce.

(18) The term "procuring agency" means any Federal agency that procures goods or services; any agency of a State or a political subdivision of a State that uses appropriated Federal funds to procure goods or services; or any person contracting with any such agency with respect to work performed under a procurement contract.

(19) The term "procurement item" means any device, good, substance, material, product, or other item whether real or personal property which is the subject of any purchase, barter, or other exchange made to procure the item.

(20) The term "lead scrap" means any discarded automotive battery, construction scrap, or other post-consumer refuse material composed of lead.

(21) The term "reuse" means any cleaning, sterilizing, recharging, retreading, or other reprocessing for use in a similar function by the original manufacturer or distributor, or class of manufacturers or distributors.

SEC. 20. SEPARABILITY.

If any provision of this Act, or the application of any provision of this Act to any person or circumstance, is held invalid, the application of such provision to other persons or circumstances, and the remainder of this Act, shall not be affected thereby.

SEC. 21. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated to the Secretary of Commerce $100,000,000 for each of fiscal years 1990, 1991, 1992, 1993, and 1994 to carry out the purposes of this Act.

S. 1885

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "National Recyclable Commodities Financing Act of 1989".

SEC. 2. RECYCLING FACILITIES TREATED LIKE SOLID WASTE DISPOSAL FACILITIES UNDER TAX-EXEMPT BOND RULES.

(a) TREATMENT AS EXEMPT FACILITY BOND.—Subsection (a) of section 142 of the Internal Revenue Code of 1986 (defining exempt facility bond) is amended by striking "or" at the end of paragraph (10), by striking the period at the end of paragraph (11) and inserting ", or", and by adding at the end thereof the following new paragraph:

"(12) qualified recycling facilities."

(b) QUALIFIED RECYCLING FACILITIES DEFINED.—Section 142 of such Code is amended by adding at the end thereof the following new subsection:

"(j) QUALIFIED RECYCLING FACILITIES.—

"(1) IN GENERAL.—For purposes of subsection (a)(12), the term 'qualified recycling facilities' means any facility used exclusively—

"(A) to sort and prepare municipal refuse for recycling, or

"(B) in the recycling of qualified refuse.

"(2) QUALIFIED REFUSE.—For purposes of paragrapoh (1), the term 'qualified refuse' means—

"(A) yard waste and food waste,

"(B) waste paper and paperboard,

"(C) plastic scrap, and

"(D) rubber scrap.

"(3) CERTAIN EQUIPMENT NOT INCLUDED.—The term 'qualified recycling facility' does not include—

"(A) Any equipment used in a process after the first marketable product is produced, or

"(B) any equipment which is used in the conversion of municipal waste into a fuel or into useful energy.

"(4) SPECIAL RULE.—Refuse shall not fail to be treated as waste merely because it has a market value at the place it is located only by reason of its value for recycling."

(c) EXEMPTION FROM VOLUME CAP WHERE FACILITY OWNED BY GOVERNMENTAL UNIT.—Subsection (h) of section 146 of such Code (relating to exception for government-owned solid waste disposal facilities) is amended—

(1) by striking "section 142(a)(6)" and inserting "paragraph (6) or (12) of section 142(a)", and

(2) by inserting "OR QUALIFIED RECYCLING FACILITIES" after "SOLID WASTE DISPOSAL FACILITIES" in the heading.

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to bonds issued after the date of the enactment of this Act.

SEC. 3. INVESTMENT TAX CREDIT FOR CERTAIN REMANUFACTURING EQUIPMENT.

(a) IN GENERAL.—Subsection (a) of section 46 of the Internal Revenue Code of 1986 (relating to amount of credit) is amended by striking "and" at the end of paragraph (2), by striking the period at the end of paragraph (3) and inserting ", and", and by adding at the end thereof the following new paragraph:

"(4) in the case of qualified remanufacturing equipment, the remanufacturing percentage."

(b) 15 PERCENT CREDIT.—Subsection (b) of section 46 of such Code is amended by adding at the end thereof the following new paragraph:

"(5) REMANUFACTURING PERCENTAGE.—The remanufacturing percentage is 15 percent."

(c) QUALIFIED REMANUFACTURING EQUIPMENT DEFINED.—Section 48 of such Code is amended by redesignating subsection (t) as subsection (u) and by inserting after subsection (s) the following new subsection:

"(t) QUALIFIED REMANUFACTURING EQUIPMENT.—For purposes of this subpart—

"(1) IN GENERAL.—The term 'qualified remanufacturing equipment' means new section 38 property which is an integral part of a qualified remanufacturing process.

"(2) QUALIFIED REMANUFACTURING PROCESS.—For purposes of this subsection, the term 'qualified remanufacturing process' means any remanufacturing or production process to produce—

"(A) secondary paper fiber,

"(B) paper or paperboard from secondary paper fiber,

"(C) crumb rubber, reclaimed rubber, or other recycled rubber materials from rubber scrap (as defined in such section 116) or

"(D) rubber products from items described in subparagraph (C).

"(3) LIMITATION ON USE OF VIRGIN MATERIALS.—Subparagraphs (B) and (D) of paragraph (2) shall apply only if at least 60 percent (by weight) of the material components are materials described in subparagraph (A) or (C) of paragraph (2), respectively, which are produced at or adjacent to the site at which the items described in such subparagraph (B) or (D) are produced.

"(4) CERTAIN EQUIPMENT INELIGIBLE.—The following equipment shall be treated as not an integral part of a qualified remanufacturing process:

"(A) Any equipment for sorting waste to recover waste paper or paperboard or rubber scrap or clean such items prior to other processing.

"(B) Any equipment related to the mixing of materials described in paragraph (2)(C) with asphalt or other building materials.

"(C) Any equipment related to tire retreading.

"(D) Any equipment related to the production of any fuel or other energy."

(d) RECAPTURE RULE.—Subsection (a) of section 47 of such Code is amended by adding at the end thereof the following new paragraph:

"(10) RECAPTURE WHERE PROPERTY CEASES TO BE QUALIFIED REMANUFACTURING EQUIPMENT.—For purposes of this section, at the time property ceases to be qualified remanufacturing property, the property shall be treated as ceasing to be section 38 property."

(e) EFFECTIVE DATE.—The amendments made by this section shall apply to periods after December 31, 1989, under rules similar to the rules of section 48(m) of the Internal Revenue Code of 1986.

SUMMARY OF THE NATIONAL RECYCLABLE COMMODITIES ACT AND THE NATIONAL RECYCLABLE COMMODITIES FINANCING ACT

NATIONAL RECYCLABLE COMMODITIES ACT

Sec. 3. Bureau of Recyclable Commodities.

Establishes a Bureau of Recyclable Commodities in DOC to handle the requirements of this act.

Sec. 4. Annual Statistics.

Requires the collection of statistics on municipal refuse, pre-consumer refuse materials, and other materials contained in municipal refuse, statistics on the generation, sources, quantities, disposal, and recycling of these materials, and statistics on the techniques, available markets, and existing industrial capacity for recycling.

Requires the establishment of multi-state regions for collecting regional statistics and the revision of the SIC system as necessary to facilitate data collection.

Sec. 5. Identification of Grades, Specifications, and Test Methods for Recyclable Commodities.

Requires the DOC to identify municipal refuse materials that qualify as recyclable commodities and designate types and grades of those commodities.

Requires DOC to identify, and to the extent possible, standardize the technical specifications applying to the use of recyclable commodities as a raw material or feedstock for recycling.

Requires the establishment of test methods for meeting these specifications, and creates an advisory panel to assist in determining these. Allows for the revision of standards and tests upon petition and requires the issuance of recycling advisories on a finding that a physical or chemical property, or contaminant, of a recyclable commodity is interfering with recycling.

Sec. 6. Periodic Market Analyses.

Requires DOC to prepare periodic market reports, including price information, recycling rates, and market analyses. Authorizes the development of market indices as appropriate.

Sec. 7. Reports on Recycling Paper Capacity.

Requires DOC to prepare, within 9 months of enactment, a report to Congress evaluating the potential for expanding recycling of plastic scrap, ferrous scrap, and lead scrap, including policy options for market incentives. Within 18 months of enactment, a similar report on aluminum scrap, other non-ferrous scrap, waste glass, and yard and food waste must be submitted.

Sec. 8. Labeling of Packing, Containers, and Non-Durable Goods.

Requires DOC to promulgate regulations for the labeling on the recyclability and composition of packaging, containers, and non-durable goods. Items covered and deadlines for promulgation are:

Containers and packaging used to hold food, beverages, soaps, detergents, cleaning preparations, personal care products, liquor stores, and drug stores—2 years;

Paper and paperboard products—3 years;

Other containers, packaging, and non-durable goods as determined by the Secretary—4 years.

The goods are to be labeled as either recyclable or non-recyclable. DOC must promulgate regulations defining minimum content requirements for goods labeled "recycled."

Requires the development of a seal that manufacturers may place on recyclable containers, packaging, and non-durable goods on a voluntary basis if they meet certain minimum standards established by DOC.

Sec. 9. Federal Procurement.

Requires agencies procuring items designated in procurement guidelines developed by DOC to procure items composed of the highest precentage of recycled materials practicable, consistent with maintaining a satisfactory level of competition.

Requires each agency to develop an affirmative procurement program that will assure that items composed of recycled materials will be purchased to the maximum extent practicable.

Requires DOC to establish guidelines for procurement, including designating items made of recycled materials that can be procured by agencies, setting forth practices and procedures for procurement, providing information about availability, relative price and performance, and minimum contents standards where appropriate. The guidelines must include at a minimum, guidelines for the procurement of paper and paperboard goods, the procurement and use of waste glass for road construction, the procurement and use of discarded tires and other rubber scrap for road construction, and other categories. By 1990, 30 percent of paper and paperboard goods must have a recycled material content of at least 25 percent; by 1991, 40 percent must have a recycled material content of at least 35 percent, and, by 1992, 50 percent must have a recycled material content of at least 50 percent.

Repeals Section 6002 of the Solid Waste Disposal Act and authorizes the review and revision of guidelines issued under this section. All guidelines, rules, and regulations developed thus far remain effective, and are authorized by this section.

Sec. 10. Promotion of Export Markets.

Requires DOC, in cooperation with the Department of State, to devleop programs for the export of recyclable commodities for recycling by foreign industries and the export for goods made from recycled materials, and requires he compilation of statistics and information on foreign recycling techniques, markets, commodity quality specifications, prices, and other information.

Sec. 11. National Advertising Campaign.

Requires DOC to develop and conduct a national advertising campaign that promotes recycling and the purchasing of recycled goods. As part of this campaign, the secretary is authorized to publish or publicize recycling rates for specific refuse materials or recyclable commodities, and for specific types and classes of containers, packaging, non-durable goods, or durable goods sold or distributed in commerce.

Sec. 12. Publication of Information.

Requires DOC to publish and make available to the public all statistics and other information collected under this act.

Sec. 13. University Recycling Research Centers.

Creates a grant program for accredited institutions of higher education to establish and operate up to a total of six recycling research center for, among other things, research relating to innovative recycling processes to be employed in the manufacture of recycled goods and innovative processes to facilitate recyling. The Federal share for these grants is limited to 80 percent of establishment and operating costs of the centers.

Sec. 14. Federal Office Source Separation Program.

Requires DOC to establish a program for the source separation and collection of materials contained in refuse from office facilities of Federal department, agencies, and instrumentalities. Any savings from this program are to be retained by the organization carrying out the program.

Sec. 15. Review of Product Specifications.

Provides DOC with the authority to conduct an independent technical assessment of any product specification or standard set by a Federal, State, or local government agency, industry trade association, or other standard-setting group that may disfavor recycled materials or otherwise adversely impact markets for recycled materials and publish the results of this review. DOC may not review specifications or standards established by individual private firms of persons.

Sec. 16. Interagency Working Group.

Requires DOC to establish an interagency working group consisting of representatives of DOC, EPA, and other agencies to assist in the development of rules and guidelines required by the act.

NATIONAL RECYCLABLE COMMODITIES FINANCING ACT

Sec. 2. Recycling Facilities treated like Solid Waste Disposal Facilities under Tax-exempt Bond Rules

Amends section 142 of the Internal Revenue Code of 1986 to include qualified recycling facilities as facilities that may be financed by an exempt facility bond. Qualified recycling facilities do not include equipment to refine marketable material or equipment used in the conversion of municipal waste into fuel or energy (i.e., incinerators).

Sec. 3. Investment Tax Credit for Certain Remanufacturing Equipment.

Amends section 46 of the Internal Revenue Code of 1986 to provide for a 15 percent investment tax credit for qualified remanufacturing equipment. Qualified remanufacturing eqipment includes any equipment used to produce secondary paper fiber, crumb rubber, reclaimed rubber, or other recycled rubber materials from rubber scrap. Also included is equipment used to manufacture paper or paperboard from secondary paper fiber and rubber products from crumb rubber, reclaimed rubber, or other recycled rubber materials if these products contain at least 60 percent of the recycled materials and the recycled materials are produced on the same or an adjacent site. Not included are equipment used to sort waste, materials used to mix recycled rubber material with asphalt or other building materials, equipment related to tire retreading, and equip-

ment related to the production of any fuel or other energy.

NATURAL RESOURCES,
DEFENSE COUNCIL,
New York, NY, November 15, 1989.

Hon. ALBERT GORE,
U.S. Senate, Russell Senate Office Building, Washington, DC.

DEAR SENATOR GORE: The Natural Resources Defense Council strongly supports the National Recyclable Commodities Act that you are introducing today. In our opinion, the Act constitutes the single most important tool this nation can now employ to address the solid waste crisis in an efficient and profitable fashion.

In particular, NRDC believes that the bill's emphasis on promoting long-term economic development of recycling-based industries through use of the tax code, export incentives, and specific government procurement requirements make it perhaps the most important legislative initiative we can now support to help solve this country's staggering solid waste crisis. Passage of the National Recyclable Commodities Act will be at the top of NRDC's legislative priorities for promoting solid waste recycling and creating markets for recycled goods.

NRDC greatly appreciates your leadership in championing enactment of this urgently-needed measure.

Yours truly,

JACQUELINE M. WARREN.
ALLEN HERSHKOWITZ, Ph.D.
DONALD S. STRAIT.

STATEMENT OF SUPPORT FOR THE NATIONAL RECYCLABLE COMMODITIES ACT BY THE ENVIRONMENTAL DEFENSE FUND, ENVIRONMENTAL ACTION, INC., AND PUBLIC CITIZEN, NOVEMBER 15, 1989

The Environmental Defense Fund, Environmental Action. Inc., and Public Citizen are pleased to support the introduction today of the National Recyclable Commodities Act (NRCA) of 1989. This important legislation lays the groundwork for transforming our solid waste crisis into economic opportunity, through active involvement by the Federal government in the development and promotion of markets for recycled materials.

We view the NRCA as providing a critical missing link in the Federal government's efforts to promote sound solid waste management. Initiatives at all levels of government and the private sector are making rapid strides in the collection and processing of recyclable components of our our municipal waste. For example, more than 1,000 communities across the country have already put in place curbside collection programs that can provide a reliable and abundant supply of source-separated glass, aluminum, ferrous metal, newsprint, plastics, and other materials, However, successful recycling depends on our ability to "close the loop," by re-introducing these materials back into commerce as feedstocks for industries leading to the manufacture of new products with appreciable recycled content.

The NRCA will provide much-needed Federal leadership in market development for recycled materials. By assigning primary responsibility for this task to a new office to be created in the U.S. Department of Commerce (DOC), the NRCA explicitly recognizes and gives direct support to the promotion of recycling as an element of sound economic development. The NRCA would logically incorporate recycled materials into the existing functions already being carried out by DOC—including the identification and standardization of commodities, collection and maintenance of date on industrial capacity and commodity markets, and promulgation of product labeling requirements. The NRCA would also utilize existing DOC expertise in promoting export markets for recyclable materials.

Finally, the NRCA would take several important steps to strengthen domestic recycling markets. These include expansion of government procurement of recycled goods, allowance for recyclers to access tax-exempt facility bonds to ensure that recycling can compete on a level playing field with other solid waste options, and investment tax credits to promote private sector investment in recycling capacity.

We cannot overstate the importance of expeditious Federal action to promote recycling through market development. These efforts will not only serve as the cornerstone of any effective solid waste management strategy, they will also provide the additional benefits that accrue from viewing recycling as an opportunity for economic development, including substantial energy and materials savings and job creation.

RICHARD A. DENISON, PH.D,
Environmental Defense Fund.

ANNE BLOOM,
Public Citizen.

ADDITIONAL COSPONSORS

S. 110

At the request of Mr. KENNEDY, the name of the Senator from West Virginia [Mr. ROCKEFELLER] was added as a cosponsor of S. 110, a bill to revise and extend the programs of assistance under title X of the Public Health Service Act.

S. 511

At the request of Mr. INOUYE, the name of the Senator from Washington [Mr. GORTON] was added as a cosponsor of S. 511, a bill to recognize the organization known as the National Academies of Practice.

S. 513

At the request of Ms. MIKULSKI, the name of the Senator from Louisiana [Mr. JOHNSTON] was added as a cosponsor of S. 513, a bill to amend chapters 83 and 84 of title 5, United States Code, to extend certain retirement provisions of such chapters which are applicable to law enforcement officers to inspectors of the Immigration and Naturalization Service, inspectors and canine enforcement officers of the U.S. Customs Service, and revenue officer of the Internal Revenue Service.

S. 619

At the request of Mr. SARBANES, the name of the Senator from Indiana [Mr. COATS] was added as a cosponsor of S. 619, a bill to authorize the Alpha Phi Alpha Fraternity to establish a memorial to Martin Luther King, Jr., in the District of Columbia.

S. 714

At the request of Mr. MCCLURE, the names of the Senator from Oklahoma [Mr. BOREN] and the Senator from North Carolina [Mr. HELMS] were added as cosponsors of S. 714, a bill to extend the authorization of the Water Resources Research Act of 1984 through the end of fiscal year 1993.

S. 878

At the request of Mr. WILSON, the name of the Senator from Hawaii [Mr. INOUYE] was added as a cosponsor of S. 878, a bill to grant a Federal charter to the Michael Jackson International Research Institute.

S. 1068

At the request of Mr. GORE, the names of the Senator from Arkansas [Mr. BUMPERS] and the Senator from Missouri [Mr. DANFORTH] were added as cosponsors of S. 1068, a bill to require actions to improve competition in the delivery of television programming, to prohibit discrimination by cable programmers, and to permit telephone companies to provide video programming.

S. 1226

At the request of Mr. MCCONNELL, the name of the Senator from Kansas [Mrs. KASSEBAUM] was added as a cosponsor of S. 1226, a bill to provide a cause of action for victims of sexual abuse, rape, and murder, against producers and distributors of pornographic material.

S. 1277

At the request of Mr. FORD, the name of the Senator from Ohio [Mr. GLENN] was added as a cosponsor of S. 1277, a bill to amend the Federal Aviation Act of 1958 to prohibit the acquisition of a controlling interest in an air carrier unless the Secretary of Transportation has made certain determinations concerning the effect of such acquisition on aviation safety.

S. 1310

At the request of Mr. SIMON, the names of the Senator from Louisiana [Mr. BREAUX] and the Senator from West Virginia [Mr. ROCKEFELLER] were added as cosponsors of S. 1310, A bill to eliminate illiteracy by the year 2000, to strengthen and coordinate literacy programs, and for other purposes.

S. 1543

At the request of Mr. ROBB, the name of the Senator from Virginia [Mr. WARNER] was added as a cosponsor of S. 1543, A bill to authorize the Colonial Dames at Gunston Hall to establish a memorial to George Mason in the District of Columbia.

S. 1651

At the request of Mr. MCCAIN, the names of the Senator from California [Mr. WILSON] and the Senator from Rhode Island [Mr. CHAFEE] were added as cosponsors of S. 1651, A bill to require the Secretary of the Treas-

ury to mint coins in commemoration of the 50th anniversary of the United States Organization.

S. 1684

At the request of Mr. MURKOWSKI, the name of the Senator from Oregon [Mr. HATFIELD] was added as a cosponsor of S. 1684, A bill to promote an international ban on large scale driftnet fishing on the high seas.

S. 1690

At the request of Mr. DODD, the names of the Senator from Washington [Mr. ADAMS] and the Senator from New Jersey [Mr. BRADLEY] were added as cosponsors of S. 1690, A bill to establish programs to improve foreign language instruction, and for other purposes.

S. 1696

At the request of Mr. KENNEDY, the name of the Senator from Wisconsin [Mr. KOHL] was added as a cosponsor of S. 1696, A bill to amend title 28 of the United States Code to prohibit racially discriminatory capital sentencing.

SENATE JOINT RESOLUTION 140

At the request of Mr. GLENN, the names of the Senator from Florida [Mr. MACK] and the Senator from Ohio [Mr. METZENBAUM] were added as cosponsors of Senate Joint Resolution 140, A joint resolution designating November 19-25, 1989, as "National Family Caregivers Week."

SENATE JOINT RESOLUTION 218

At the request of Mr. INOUYE, the names of the Senator from Oklahoma [Mr. NICKLES], the Senator from Kansas [Mr. DOLE], the Senator from Virginia [Mr. WARNER], and the Senator from Montana [Mr. BAUCUS] were added as cosponsors of Senate Joint Resolution 218, a joint resolution to designate the week of December 3, 1989, through December 9, 1989, as "National American Indian Heritage Week."

SENATE JOINT RESOLUTION 223

At the request of Mr. GARN, the name of the Senator from Washington [Mr. ADAMS] was added as a cosponsor of Senate Joint Resolution 223, a joint resolution to authorize and request the President to issue a proclamation designating May 1990 as "Neurofibromatosis Awareness Month."

SENATE JOINT RESOLUTION 226

At the request of Mr. HEINZ, the name of the Senator from Pennsylvania [Mr. SPECTER] was added as a cosponsor of Senate Joint Resolution 226, a joint resolution to designate the year 1990 as the "Bicentennial Anniversary of the legacy of Benjamin Franklin."

SENATE CONCURRENT RESOLUTION 56

At the request of Mr. MCCAIN, the name of the Senator from Alabama [Mr. SHELBY] was added as a cosponsor of Senate Concurrent Resolution 56, a concurrent resolution relating to the establishment of new comprehensive national aviation policy for the United States.

SENATE RESOLUTION 209—AUTHORIZING USE OF THE HART BUILDING ATRIUM FOR A CONCERT BY THE CONGRESSIONAL CHORUS

Mr. CRANSTON (for Mr. KERREY) submitted the following resolution; which was considered and agreed to:

S. RES. 209

Resolved, That the atrium of the Senate Hart Office Building may be used from 12:00 noon until 1:00 p.m. on December 5, 1989, for a concert of holiday music presented by the Congressional Chorus.

AMENDMENTS SUBMITTED

TECHNICAL CORRECTIONS IN THE ENROLLMENT OF H.R. 2461

NUNN AMENDMENT NO. 1130

Mr. NUNN submitted an amendment to the concurrent resolution (H. Con. Res. 225) directing the Clerk of the House of Representatives to make technical corrections in the enrollment of the bill H.R. 2461, as follows:

At the end of the resolution, add the following new paragraphs:

(4) In section 5—

(A) strike out the section heading and insert in lieu thereof the following (and conform the table of contents in section 2(b) accordingly):

"SEC. 5. ANNUAL OUTLAY REPORT";

(B) strike out subsections (a) through (h);

(C) redesignate subsection (i) as subsection (a) and in paragraph (3) of such subsection strike out subparagraph (C);

(D) redesignate subsection (j) as subsection (b); and

(E) redesignate subsection (k) as subsection (c) and strike out the period at the end of such subsection and insert in lieu thereof "unless the budget resolution is accompanied by a report that describes the difference between the budget authority and outlays for National Defense (function 050) in the President's budget and the budget resolution.".

(5) In the first sentence of paragraph (2) of section 121(c), strike out "using fiscal year 1990 funds".

(6) In section 1641—

(A) strike out the heading and insert in lieu thereof the following (and conform the table of contents in section 2(b) accordingly):

"SEC. 1641. ANNUAL DEPARTMENT OF DEFENSE CONVENTIONAL STANDOFF WEAPONS MASTER PLAN AND REPORT ON STANDOFF MUNITIONS"; and

(B) in subsection (a), strike out "Joint Standoff" and insert in lieu thereof "Department of Defense Conventional Standoff".

TRUCKEE-CARSON-PYRAMID LAKE WATER RIGHTS SETTLEMENT ACT

REID AMENDMENT NO. 1131

(Ordered referred to the Committee on Energy and Natural Resources.)

Mr. REID submitted an amendment intended to be proposed by him to the bill (S. 1554) to ratify and implement water settlements involving the Pyramid Lake Paiute Tribe, the States of California and Nevada and other parties regarding the waters of the Truckee and Carson Rivers and Lake Tahoe in Nevada and California, to provide for the enhancement of endangered species, and to preserve valuable wetlands, and for other purposes, as follows:

On page 16, line 17, strike the period and insert in lieu thereof: ": *Provided,* That all transfers of water rights authorized under the paragraph shall be made in accordance with State law."

Mr. REID. Mr. President, today I am submitting a technical amendment to S. 1554 in order to clarify the intent of section 401(a) of the bill. It has always been my intent that the transfer of any water rights authorized under this section be made in accordance with State law. In order eliminate any possible misunderstanding of this point, I am modifying the bill by adding additional language mandating that any transfers under this section be made in accordance with Nevada State law.

FOREIGN OPERATIONS, EXPORT FINANCING, AND RELATED PROGRAMS APPROPRIATIONS, FISCAL YEAR 1990

HELMS AMENDMENT NO. 1132

Mr. HELMS proposed an amendment to the amendment of the House to the amendment of the Senate numbered 278 to the bill (H.R. 2939) making appropriations for foreign operations, export financing, and related programs for the fiscal year ending September 30, 1990, and for other purposes, as follows:

That the Senate agree to the amendment of the House to the amendment of the Senate number 278, with an amendment as follows:

In the House amendment, add at the end thereof the following:

"Notwithstanding any other provision of this Act, the President is authorized to make available to El Salvador such sums as he determines necessary and appropriate of the amounts appropriated under this Act under the heading 'Foreign Military Financing Program'."

NATIONAL AFFORDABLE HOUSING ACT

PRESSLER AMENDMENT NO. 1133

(Ordered referred to the Committee on Banking, Housing, and Urban Affairs.)

Mr. PRESSLER submitted an amendment intended to be proposed by him to the bill (S. 566) to authorize a new corporation to support State and local strategies for achieving more affordable housing; to increase homeownership; and for other purposes, as follows:

At the appropriate place strike entire section captioned "Targeting of Community Development Block Grants for Low- and Moderate-Income Beneficiaries" and which reads "Section 104(b)(3) of the Housing and Community Development Act of 1974 (U.S.C. 5304(b)(3) is amended by striking '60 percent' in clause (A) and inserting '75 percent'."

FOREIGN OPERATIONS, EXPORT FINANCING, AND RELATED PROGRAMS APPROPRIATIONS, FISCAL YEAR 1990

SHELBY (AND OTHERS) AMENDMENT NO. 1134

Mr. SHELBY (for himself, Mr. DOLE, Mr. HEFLIN, Mr. HEINZ, Mr. LOTT, Mr. COCHRAN, Mr. HELMS, Mr. SYMMS, Mr. GRASSLEY, Mrs. KASSEBAUM, and Mr. STEVENS) proposed an amendment to amendment No. 1132 proposed by Mr. HELMS to the amendment of the House to the amendment of the Senate numbered 278 to the bill H.R. 2939, supra, as follows:

At the appropriate place in the amendment, insert the following:

"None of the funds appropriated or made available to the Bureau of the Census shall be used to count aliens in the United States in violation of the immigration laws for purposes of subsection (b), of section 141, of title 13, United States Code."

SHELBY (AND OTHERS) AMENDMENT NO. 1135

Mr. SHELBY (for himself, Mr. DOLE, Mr. HEFLIN, Mr. HEINZ, Mr. LOTT, Mr. COCHRAN, Mr. HELMS, Mr. SYMMS, Mr. GRASSLEY, Mrs. KASSEBAUM, and Mr. STEVENS) proposed an amendment to the amendment of the House to the amendment of the Senate No. 278 to the bill H.R. 2939, supra, as follows:

At the appropriate place in the amendment, insert the following:

"None of the funds appropriated or made available to the Bureau of the Census shall be used to count aliens in the United States in violation of the immigration laws for purposes of subsection (b), of section 141, of title 13, United States Code."

DOMENICI (AND BINGAMAN) AMENDMENT NO. 1136

Mr. DOMENICI (for himself and Mr. BINGAMAN) proposed an amendment to the amendment of the House to the amendment of the Senate numbered 278 to the bill H.R. 2939, supra, as follows:

At an appropriate place in the amendment add the following:

"Funds appropriated to the Secretary of the Army, acting through the Chief of Engineers, pursuant to Public Law 101-101 for the purposes of Section 14 (Streambank Erosion Control) for the Santa Fe River, New Mexico, shall be made available under the general Investigation authority of the Secretary for the design, including Plans and specifications, of an emergency streambank and channel stabilization project on the Santa Fe River, New Mexico, provided that non-Federal interests agree to cost share in such engineering and design activities."

PREVENTING UNINTENDED LICENSING OF CERTAIN HYDROELECTRIC PROJECTS

MATSUNAGA AMENDMENT NO. 1137

Mr. CRANSTON (for Mr. MATSUNAGA) proposed an amendment to the bill S. 635, a bill to prevent the unintended licensing of federally nonjurisdictional pre-1935 unlicensed hydroelectric projects, as follows:

S. 635 is amended by adding the following new provision at the end thereof:

"SEC. 3. Section 4(e) of the Federal Power Act (16 U.S.C. 791a et seq.) is amended by adding the following at the end thereof:

"'The Commission is prohibited from issuing an original license for proposed project works for which a license is not required by section 23(b)'.".

ACQUISITION OF CERTAIN LAND ADJACENT TO ROCKY MOUNTAIN NATIONAL PARK

WIRTH AMENDMENT NO. 1138

Mr. CRANSTON (for Mr. WIRTH) proposed an amendment to the amendment of the House bill (S. 737) to authorize the Secretary of the Interior to acquire certain lands adjacent to the boundary of Rocky Mountain National Park in the State of Colorado, as follows:

At the end of the House amendment, add the following new subsection:

"(c) AGREEMENT.—The Secretary is authorized to enter into an agreement with the owner of the lands identified as Tract 1127 and 1127B4, Section 23, Township 3 North, Range 73, Boulder County, Colorado, within the boundaries of Rocky Mountain National Park, to ensure the right of use as a single family residence, unless said property is being developed or is officially proposed to be developed by the owners in a manner which would substantially change its use."

CONSERVING NORTH AMERICAN WETLAND ECOSYSTEMS AND WATERFOWL

MITCHELL AMENDMENT NO. 1139

Mr. CRANSTON (for Mr. MITCHELL) proposed an amendment to the bill S. 804, a bill to conserve North American Wetland ecosystems and waterfowl and other migratory birds and fish and wildlife that depend upon such habitats, as follows:

1. On page 4, line 2, immediately after "Conventions" insert "and the Convention on Nature Protection and Wildlife Preservation in the Western Hemisphere".

2. On page 4, line 16, strike "ducks, geese, and other".

3. On page 4, line 21, strike the period and insert in lieu thereof "; and".

4. On page 4, after line 21 insert the following new paragraph: "(15) the treaty obligations of the United States under the Convention on Wetlands of International Importance especially as Waterfowl Habitat requires promotion of conservation and wise use of wetlands.".

5. On page 4, line 23, strike "private" and insert in lieu thereof "other".

6. On page 6, line 25, strike the period and insert ", which shall be construed to mean any department, or any division of any department of another name, of a State that is empowered under its laws to exercise the functions ordinarily exercised by a State fish and wildlife agency.".

7. On page 7, line 4, strike "from willing sellers or donors" and insert in lieu thereof ", including water rights,".

8. On page 7, line 11, strike "and".

9. On page 7, line 19, strike the period and insert in lieu thereof "; and".

10. On page 7, after line 19, insert the following new subparagraph:

"(C) in the case of projects undertaken in Mexico, includes technical training and development of infrastructure necessary for the conservation and management of wetlands and studies on the sustainable use of wetland resources.".

11. On page 7, line 22, strike "COMMISSION" and insert in lieu thereof "COUNCIL".

12. On page 7, line 23, strike "COMMISSIONERS" and insert in lieu thereof "COUNCIL MEMBERSHIP".

13. On page 7, line 24, strike "Commission" and insert in lieu thereof "Council (hereinafter in this Act referred to as the "Council")".

14. On page 8, line 1, strike "Commissioners" and insert in lieu thereof "members".

15. On page 8, strike the text on line 2 and insert in lieu thereof "compensation as members of the Council. Of the Council members—".

16. On page 8, line 13, insert a semicolon after "agency" and strike all that follows through line 18.

17. On page 9, lines 1 and 2, strike "Commissioner" and insert in lieu thereof "member of the Council".

18. On page 9, line 4, strike "Commissioner" and insert in lieu thereof "Council member".

19. On page 9, strike the text on line 10 and insert in lieu thereof "a member from any meeting of the Council.".

20. On page 9, lines 12 and 13, strike "Commissioners" and insert in lieu thereof "a member of the Council".

21. On page 9, line 14, strike "six" and insert in lieu thereof "three".

22. On page 9, line 15, strike "Commissioners" and insert in lieu thereof "Council members".

23. On page 9, line 18, strike "three years" and insert in lieu thereof "one year".

24. On page 9, line 19, strike "four" and insert "two" and strike all that follows after the comma through line 21 and insert in lieu thereof "and two shall be appointed for a term of three years.".

25. On page 9, lines 22, strike "Commissioners" and insert in lieu thereof "Council members".

26. On page 9, line 25, strike "two years" and insert in lieu thereof "one year", and strike "four" and insert in lieu thereof "two".

27. On page 10, line 1, strike "six" and insert in lieu thereof "three".

28. On page 10, lines 3 and 4, strike "Commissioners" and insert in lieu thereof "members of the Council".

29. On page 10, line 9, strike "COMMISSION" and insert in lieu thereof "COUNCIL".

30. On page 10, line 23, strike "Native" and insert in lieu thereof "nonprofit charitable organizations and native".

31. On page 11, strike the text on line 4 and insert in lieu thereof "Council from its members for a three-year term, except that the first elected chairman may serve a term of less than three years".

32. On page 11, lines 6, 8, and 11, strike "Commission" each place it appears and insert in lieu thereof in each case "Council".

33. On page 11, lines 9 and 10, strike "Nonexecutive sessions of Commission" and insert in lieu thereof "Council".

34. On page 11, line 14, strike "from the Commission and fill that vacancy".

35. On page 11, strike subsection (g) on lines 16 through 22 and redesignate the following subsection accordingly.

36. On page 11, lines 24 and 25, strike "designate an employee of the Service" and insert in lieu thereof "appoint an individual who shall serve at the pleasure of the Director and".

37. On page 12, lines 4 and 5, strike "administration of this Act" and insert in lieu thereof "facilitating consideration of wetlands conservation projects by the Council and otherwise assisting the Council in carrying out its responsiblities under this Act".

38. On page 12, line 10, strike "COMMISSION" and insert in lieu thereof "COUNCIL" and on lines 10 and 11, strike "Commission" and insert in lieu thereof "Council".

39. On page 12, line 12, strike "Secretary" and insert in lieu thereof "Migratory Bird Conservation Commission".

40. On page 12, after line 12, insert the following paragraph: "(1) the extent to which the wetlands conservation project fulfills the purposes of this Act, the Plan or the Agreement;" and re-number the subsequent paragraphs accordingly.

41. On page 12, line 16, strike "sections 8(b) and 8(c)" and insert in lieu thereof "section 8(b)".

42. On page 13, strike paragraph (4) on lines 1 through 3 and re-number the subsequent paragraphs accordingly.

43. On page 13, line 18, strike "SECRETARY" and insert in lieu thereof "MIGRATORY BIRD CONSERVATION COMMISSION".

44. On page 13, line 19, strike "Commission" and insert in lieu thereof "Council", and strike "Secretary" and insert in lieu thereof "Migratory Bird Conservation Commission".

45. On page 13, line 20, strike "March 30" and insert in lieu thereof "January 1".

46. On page 13, line 22, strike "Commission" and insert in lieu thereof "Council".

47. On page 13, line 24, strike "Secretary" and insert in lieu thereof "Migratory Bird Conservation Commission".

48. On page 14, line 2, strike "50 Stat. 917, as amended;".

49. On page 44, line 4, strike "COMMISSION" and "Commission" and insert in lieu thereof "COUNCIL" and "Council", respectively.

50. On page 14, line 8, strike "Commission" and insert in lieu thereof "Council".

51. On page 14, line 11, strike "Commission" and insert in lieu thereof "Council".

52. On page 14, after line 13, insert the following new subsections:

"(d) COUNCIL REPRESENTATION ON MIGRATORY BIRD CONSERVATION COMMISSION.—The Chairman of the Council shall select one Council member of United States citizenship to serve with the Chairman as ex officio members of the Migratory Bird Conservation Commission for the purposes of considering and voting upon wetlands conservation projects recommended by the Council.

"(e) APPROVAL OF COUNCIL RECOMMENDATIONS BY THE MIGRATORY BIRD CONSERVATION COMMISSION.—The Migratory Bird Conservation Commission, along with the two members of the Council referred to in subsection (d) of this section, shall approve, reject or reorder the priority of any wetlands conservation projects recommended by the Council based on, to the greatest extent practicable, the criteria of subsection (a) of this section. If the Migratory Bird Conservation Commission approves any wetlands conservation project, Federal funding shall be made available under this Act and section 3(b) of the Act of September 2, 1937 (16 U.S.C. 669b(b)), as amended by this Act. If the Migratory Bird Conservation Commission rejects or re-orders the priority of any wetlands conservation project recommended by the Council, the Migratory Bird Conservation Commission shall provide the Council and the appropriate Committees with a written statement explaining its rationale for the rejection or the priority modification.".

53. On page 14, strike the text on lines 23 through 25 and on page 15, strike the text on lines 1 through 9.

54. On page 15, line 16, strike "(e)" and insert in lieu thereof "(f)".

55. On page 15, line 17, strike "Secretary" and insert in lieu thereof "Migratory Bird Conservation Commission".

56. On page 15, line 19, strike "Secretary" and insert in lieu thereof "Migratory Bird Conservation Commission".

57. On page 15, line 24, immediately after the semicolon, strike "and".

58. On page 15, line 25, strike "Commission" and insert in lieu thereof "Council".

59. On page 16, line 1, strike "Secretary" and insert in lieu thereof "Migratory Bird Conservation Commission".

60. On page 16, line 2, strike the period after "funding" and insert in lieu thereof "; and a justification for any rejection or re-ordering of the priority of wetlands conservation projects recommended by the Council that was based on factors other than the criteria of section 5(a) of this Act.".

61. On page 16, line 7, strike "section 3(c)" and insert in lieu thereof "section 8(b)".

62. On page 16, line 10, strike "under section 5(d) and insert in lieu thereof "by the Migratory Bird Conservation Commission".

63. On page 16, line 13 and lines 19 and 20, strike "50 Stat. 917, as amended;" each place it appears.

64. On page 17, line 15, strike "The" and insert in lieu thereof "In lieu of including in the National Wildlife Refuge System any lands or waters or interests therein acquired under this Act, the", and after "may insert", with the concurrence of the Migratory Bird Conservation Commission,".

65. On page 17, line 17, strike "50 Stat. 917, as amended;".

66. On page 17, line 21, strike "private entity approved by a State" and insert in lieu thereof "other entity upon a finding by the Secretary that the real property interests should not be included in the National Wildlife Refuge System".

67. On page 17, lines 23 and 24, strike "Commission" and insert in lieu thereof "Council" and strike "Secretary" and insert in lieu thereof "Migratory Bird Conservation Commission".

68. On page 17, line 24 and continuing through line 7 on page 18, strike the second sentence of paragraph (3) and insert in lieu thereof the following sentence:

"The Secretary shall not convey any such interest to a State, another public agency or other entity unless the Secretary determines that such State, agency or other entity is committed to undertake the management of the property being transferred in accordance with the objectives of this Act, and the deed or other instrument of transfer contains provisions for the reversion of title to the property to the United States if such State, agency or other entity fails to manage the property in accordance with the objectives of this Act.".

69. On page 18, lines 11, 12, and 13, strike the final sentence of paragraph (3).

70. On page 19, line 11, strike "50 Stat. 917, as amended;".

71. On page 19, line 13, strike "private" and insert in lieu thereof "other".

72. On page 19, lines 15 and 16, strike "under section 5(d)" and insert in lieu thereof "by the Migratory Bird Conservation Commission".

73. On page 19, line 18, strike "Commission" and insert in lieu thereof "Council".

74. On page 19, line 19, strike "Secretary" and insert in lieu thereof "Migratory Bird Conservation Commission".

75. On page 20, line 3, after the period insert the following sentence:

"Acquisitions of real property and interests in real property carried out pursuant to this subsection shall not be subject to any provision of Federal law governing acquisitions of property for inclusion in the National Wildlife Refuge System.".

76. On page 20, lines 7 and 8, strike "50 Stat. 917, as amended;".

77. On page 21, lines 14 and 15, strike "50 Stat. 917, as amended;".

78. On page 22, line 8, strike, "1990," and "and 1993" and insert "1993, and 1994" after "1992,".

79. On page 22, lines 13 and 14, strike "50 Stat. 917, as amended;".

80. On page 22, after line 8, insert the following new subsection:

"(d) AVAILABILITY OF FUNDS.—Sums made available under this section shall be available until expended.".

81. On page 22, line 17, after "Secretary," insert "which can be matched with non-Federal moneys in accordance with the requirements of subsection (b) of this section,".

82. On page 23, line 3, after "thereof)" insert ", which can be matched with non-Federal moneys in accordance with the requirements of subsection (b) of this section,".

83. On page 23, strike the text on lines 7 through 24, insert the following and re-des-

ignate the subsequent subsection accordingly:

"(b) FEDERAL CONTRIBUTION FOR PROJECTS.—The Federal moneys allocated under subsection (a) of this section for any fiscal year to carry out approved wetlands conservation projects shall be used for the payment of not to exceed 50 per centum of the total United States contribution to the costs of such projects, or may be used for payment of 100 per centum of the costs of such projects located on Federal lands and waters, including the acquisition of inholdings within such lands and waters.".

84. On page 24, line 8, strike "or (c)".

85. On page 25, beginning on line 20 and continuing through line 12 on page 26, strike section 11 of the bill and insert in lieu thereof the following section:

"SEC. 11. REPORT TO CONGRESS.

The Secretary shall report to the appropriate Committees on the implementation of this Act. The report shall include:

"(1) a biennial assessment of—

"(A) the estimated number of acres of wetlands and habitat for waterfowl and other migratory birds that were restored, protected, or enhanced during such two-year period by Federal, State, and local agencies and other entities in the United States, Canada, and Mexico;

"(B) trends in the population size and distribution of North American migratory birds; and

"(C) the status of efforts to establish agreements with nations in the western hemisphere pursuant to section 17 of this Act.

"(2) an annual assessment of the status of wetlands conservation projects, including an accounting of expenditures by Federal, State, and other United States entities, and expenditures by Canadian and Mexican sources to carry out these projects.".

86. On page 27, lines 2 and 3, strike "Federal Aid in Wildlife Restoration Act (50 Stat. 917, as amended;" and insert in lieu thereof "Act of September 2, 1937 (".

87. On page 27, after line 8, insert the following new sections:

"SEC. 14. ADDITION OF EPA ADMINISTRATOR TO MIGRATORY BIRD CONSERVATION COMMISSION.

"Section 2 of the Migratory Bird Conservation Act (16 U.S.C. 715a) is amended by striking "the Secretary of Transportation," and inserting in lieu thereof "the Administrator of the Environmental Protection Agency,".

"SEC. 15. LIMITATION ON ASSESSMENTS AGAINST MIGRATORY BIRD CONSERVATION FUND.

"Notwithstanding any other provision of law, only those personnel and administrative costs directly related to acquisition of real property shall be levied against the Migratory Bird Conservation Account.

"SEC. 16. TECHNICAL AND CONFORMING AMENDMENTS TO THE MIGRATORY BIRD TREATY ACT.

"Section 2 of the Migratory Bird Treaty Act (16 U.S.C. 703) is amended—

"(1) by striking "and" after "1936,"; and

"(2) by inserting after "1972" the following: "and the convention between the United States and the Union of Soviet Socialist Republics for the conservation of migratory birds and their environments concluded November 19, 1976.".

"SEC. 17. OTHER AGREEMENTS.

"(a) The Secretary shall undertake with the appropriate officials of nations in the western hemisphere to establish agreements, modeled after the Plan or the Agreement, for the protection of migratory birds identified in section 13(a)(5) of the Fish and Wildlife Conservation Act of 1980 (16 U.S.C. 2912(a)). When any such agreements are reached, the Secretary shall make recommendations to the appropriate Committees on legislation necessary to implement the agreements.

"(b) Section 13(a) of the Fish and Wildlife Conservation Act (16 U.S.C. 2912(a)) is amended by striking "and" after "U.S.C. 1531 to 1543);" and striking "necessary." and inserting "necessary; and" and adding at the end the following:

"'(5) identify lands and waters in the United States and other nations in the western hemisphere whose protection, management or acquisition will foster the conservation of species, subspecies and population of migratory non-game birds, including those identified in paragraph (3).'.".

MITCHELL AMENDMENT NO. 1140

Mr. CRANSTON (for Mr. MITCHELL) proposed an amendment to the bill S. 804, supra, as follows:

On page 25, lines 14 through 19, strike the following sentence: "In the consideration of land disposal alternatives, the head of each such agency shall give priority to the transfer of real property interests for conservation purposes that would contribute to furtherance of the purposes of this Act and the goals of the Plan and the Agreement.".

JOHNSTON AMENDMENT NO. 1141

Mr. CRANSTON (for Mr. JOHNSTON) proposed an amendment to the bill S. 804, supra, as follows:

At the end of the bill add the following new section:

SEC. . TO EXPAND THE BOGUE CHITTO NATIONAL WILDLIFE REFUGE.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Act entitled "An Act to establish the Bogue Chitto National Wildlife Refuge" (Public Law 96-288; 94 Stat. 604) is amended by—

(1) striking the period at the end of subsection 3(b) and inserting in lieu thereof: ", and within an area approximately 10,000 acres as depicted upon a map entitled "Bogue Chitto NWR Expansion", dated September, 1989 and on file with the United States Fish and Wildlife Service."; and

(2) by deleting "$10,000,000" in subsection 5(a) and inserting in lieu thereof "such sums as may be necessary".

STEVENS AMENDMENT NO. 1142

Mr. LOTT (for Mr. STEVENS) proposed an amendment to the bill S. 804, supra, as follows:

At the end of the bill add the following new section:

"SEC. 18. WETLANDS ASSESSMENTS.

"Section 401(a) of the Emergency Wetlands Resources Act of 1986 (16 U.S.C. 3931(a)) is amended by adding the following new paragraph:

"(5) produce, by April 30, 1990, a report that provides:

"(A) an assessment of the estimated total number of acres of wetland habitat as of the 1780's in the areas that now comprise each state; and

"(B) an assessment of the estimated total number of acres of wetlands in each state as of the 1980's, and the percentage of loss of wetlands in each state between the 1780's and the 1980's.".

PROVIDING 5-YEAR, STAGGERED TERMS FOR FEDERAL ENERGY REGULATORY COMMISSION MEMBERS

McCLURE AMENDMENT NO. 1143

Mr. LOTT (for Mr. MCCLURE) proposed an amendment to the bill S. 388, a bill to provide for 5-year, staggered terms for members of the Federal Energy Regulatory Commission, and for other purposes, as follows:

On page 4, strike section 4.

NOTICES OF HEARINGS

SELECT COMMITTEE ON AGING

Mr. PRYOR. Mr. President, I ask unanimous consent that the Senate Special Committee on Aging, be authorized to meet during the session of the Senate on Wednesday, November 15, 1989, at 1:30 p.m. to hold a hearing on how the drug crisis is affecting the elderly, particularly poor and minority elderly in both urban and rural setting.

AUTHORITY FOR COMMITTEES TO MEET

SUBCOMMITTEE ON TOXIC SUBSTANCES, ENVIRONMENTAL OVERSIGHT, RESEARCH AND DEVELOPMENT

Mr. ADAMS. Mr. President, I ask unanimous consent that the Subcommittee on Toxic Substances, Environmental Oversight, Research and Development, Committee on Environment and Public Works, be authorized to meet during the session of the Senate on Wednesday, November 15, beginning at 9:30 a.m., to conduct a hearing to review EPA's enforcement program.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. ADAMS. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on November 15, 1989, at 2 p.m., to hold a hearing on the nominations of Edward W. Nottingham to be U.S. District Judge for the District of Colorado, Edward J. Lodge to be U.S. District Judge for the District of Idaho and Arthur D. Spatt to be U.S. District Judge for the Eastern District of New York.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ARMED SERVICES

Mr. ADAMS. Mr. President, I ask unanimous consent that the Committee on Armed Services be authorized to meet on Wednesday, November 15,

1989, at 9 a.m., to consider the nomination of Victor Stello, Jr., to be the Assistant Secretary of Energy for Defense programs.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON EAST ASIAN AND PACIFIC AFFAIRS

Mr. ADAMS. Mr. President, I ask unanimous consent that the Subcommittee on East Asian and Pacific Affairs of the Committee on Foreign Relations be authorized to meet during the session of the Senate on Wednesday, November 15, at 3 p.m., to hold a hearing on U.S policy toward China.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. ADAMS. Mr. President, I ask unanimous consent that the Committee on Agriculture, Nutrition, and Forestry be authorized to meet during the session of the Senate on Wednesday, November 15, 1989, at 2:15 a.m., to hold a hearing on pending nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. ADAMS. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Wednesday, November 15, at 9 a.m., to hold a hearing on Montreal Aviation Protocols Nos. 3 and 4; Ex. B, 95-1.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON WATER RESOURCES, TRANSPORTATION, AND INFRASTRUCTURE

Mr. ADAMS. Mr. President, I ask unanimous consent that the Subcommittee on Water Resources, Transportation, and Infrastructure, Committee on Environment and Public Works, be authorized to meet during the session of the Senate on Wednesday, November 15, beginning at 2 p.m., to hold a hearing on S. 1804, the Drug Offender's Driving Privileges Suspension Act of 1989.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON SMALL BUSINESS

Mr. ADAMS. Mr. President, I ask unanimous consent that the Small Business Committee be authorized to meet during the session of the Senate on Wednesday, November 15, 1989, at 1:30 p.m. The committee will hold a hearing on the nomination of Kyo R. Jhin to be chief counsel for advocacy for the Small Business Administration.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

Mr. ADAMS. Mr. President, I ask unanimous consent that the Committee on Banking, Housing, and Urban Affairs be allowed to meet during the session of the Senate Wednesday, November 15, 1989, at 9 a.m., to conduct hearings on whether the American economy is in decline relative to our major competitors, and, if so, the implications this has for America's position in the world.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

QUALITY DAY CARE

● Ms. MIKULSKI. Mr. President, I ask that an article from the Baltimore Sun, November 1, 1989, be included in the RECORD.

This article deals with a problem we have long struggled with in the Congress—quality day care for our Nation's children. We are not attracting and retaining the people we need in the field to take proper care of our kids, and this article discusses the reasons why. I urge my colleagues to join me in thinking long and hard about the issues raised in this piece.

The article follows:

THEY CAN'T AFFORD TO CARE

(By Abby Karp)

Once upon a time, Richetta Fields had visions of becoming a school teacher. So after she graduated from high school, she studied early childhood education at the Community College of Baltimore. A few months later, she took a job caring for other people's children at the Midtown Children's Center.

Her starting pay as a day-care aide was $3.75 an hour. Two and a half years later, she'd gotten a raise—10 cents more an hour. She had no health insurance for herself or her 5-month-old son. She had no car. And, she figured out, when her son turned 2, she wouldn't be able to afford to place him in the day-care center at St. Paul Street and North Avenue where she worked.

Yesterday the 21-year-old said goodbye to her class of 2- and 3-year-olds. Today she begins a new job, photographing children at a Sears portrait studio. Although she knows nothing about taking pictures, her starting pay is $5.50 an hour. She will have health insurance, life insurance, paid leave.

Much as she loves working with children, Ms. Fields has no plans to return to a profession where Play-Doh's a given but real dough's rarely found.

"I had to leave," she says, after living as a single parent on $500 a month. "I said, 'it's time to find a job with more money.' "

Like Ms. Fields, four out of 10 day-care workers abandoned the profession last year, mostly because of low salaries. The paltry pay extends up the day-care ladder: Ms. Fields' boss, director Carolyn Iwata, makes only $13,000, 17 years after she began working at the non-profit center.

Kathy Chapman, director of Red Balloon Day Care Center in Waverly, still lives at home with her parents.

"I've never felt I could live someplace nice on my own," says Ms. Chapman, 31, who has worked in day-care since graduating third in her class from Coppin State University in 1981.

Low pay leads to turnover in day-care centers and that, in turn, diminishes the quality of care and education children receive, according to a national study of such centers released last month.

Children in centers with frequent turnover are slower to develop language and social skills than those in more stable environments, the National Child Care Staffing Study found. Researcher Carollee Howes, an education professor at University of California in Los Angeles, said. "Children in America are in jeopardy because their child-care teachers are poorly paid."

Most day-care workers find it easy to improve on their pay—a national average of $5.35 an hour—when they leave, becoming public school teachers, store clerks, receptionists, real estate agents.

Ironically, the job so many leave is the only one they love.

They bristle at comparisons with baby sitters, likening their work to teaching and parenting. More than half have studied early childhood education or development and one in five has a bachelor's degree, according to the national study.

What they like best, day-care workers say, is the informality, the lack of bureaucracy, the feeling of making a difference, the readily offered affection.

"What other job do you go to where someone says every day, 'I love you,' " asks Mary Dickson, a teacher of 2-year olds at Downtown Baltimore Children's Center. "You feel very special to be here."

The center's director tries to retain staff like Ms. Dickson by paying far more than the national average, as much as $20,000 to senior teachers with bachelor's degrees.

"I can't stand to see people with four-year degrees having to go out and waitress at night to make car payments. That really burns people out very quickly," says the director, Nancy L. Kramer. "I hate to think this is a field where someone can work a few years and then she has to go out and get a 'real' job."

Yet, she adds, "I just don't know the solution to it all: You get so caught between the needs of the parents and the needs of the staff."

The only route to change, daycare operators agree, is for governments and employers to begin contributing to the day care's tuition costs, which average $317 a month in Maryland.

"I'm confronted over and over with people saying, 'Can't you do [day care] cheaper?' " says Anita Prentice, president of the DBCC board of directors. "Early childhood education hasn't been understood as a separate profession because a lot of women do it for free as mothers."

Ms. Prentice hopes the federal government may soon put more money in child care. The House of Representatives recently approved a $22.7 billion child-care package, which includes income tax credits for poor families and subsidies for those who provide day care to children of low- or moderate-income families. House and Senate members are meeting to match efforts.

"So far, the cost of day care is being paid by parents and by staff accepting low wages," agrees Barbara Willer, public affairs director for the National Association for the Education of Young Children, an advocacy group for educators. "We've got to understand that good early education benefits all society, and the cost should be shared by all aspects of society."

Day-care directors see an urgent need for government and private-sector intervention: Not only is it becoming harder to hire qualified staff, but they see children in day care suffering because of the high teacher turn-

over, which has jumped from 15 percent a year in 1977 to 41 percent in 1988.

"You can't expect a 3-year-old to adjust to three different teachers in a year," says Marilyn Carlisle, director of Faith Creative Day Care Center in Northeast Baltimore. "They start getting nervous when a teacher leaves early for a doctor's appointment is she coming back? They regress, become clingy or whiny."

When children are away from home eight hours a day, "It's important for them to have something that's almost never changing," adds Bridgette Wells, an assistant teacher at DBCC.

When staff members leave, replacements are hard to find, directors agree. Competition for day-care workers has increased as the numbers of young children and working mothers grow. In Maryland, there are almost three times as many day-care centers as in 1976. And school systems—also faced with burgeoning enrollments—are taking a larger share of people trained in early childhood education.

"You don't even try to hire people with four-year [college] degrees," says Susan Bartz, owner of the Children's Learning Experience in Baltimore. "They won't stay with you anyway. You get calls over Labor Day weekend that they got jobs in public schools, won't be coming back."

Young women who enter the work force—and most day-care workers are female—need higher paychecks and better benefits than in the past, when a woman's income often was an insignificant addition to a husband's salary.

But even as their needs grow, day-care salaries have dropped nearly 20 percent in the past decade in inflation-adjusted dollars, according to the national study, which was sponsored by the Child Care Employee Project.

Besides salaries, other reasons people give for leaving day-care jobs include the fear of being accused of sexual abuse and the poor working conditions in some centers, where teachers and aides do janitor's work or must buy supplies themselves.

And then there's the exhaustion factor. As any parent can imagine, chasing 10 2-year-olds around for 40 hours a week can wear a person out.

"When you first start in day-care, an eight-hour day is like a 15-hour day," says Ms. Wells. And Margo Shayne, DBCC program director, says she gets laughed at when she asks former day-care teachers to return.

"I ask them to come work here and they say, 'Are you crazy? I would never go back to day care. It's too stressing, to demanding, and you don't get respect from people for teaching in day-care center.' "●

HELPING RESETTLE REFUGEES

● Mr. SIMON. Mr. President, November 15 is a golden anniversary day for the Lutheran Immigration and Refugee Service.

This year marks the 50th anniversary of the Lutheran Immigration and Refugee Service, a national agency of Lutheran churches in the United States for ministry with uprooted people.

LIRS is an inter-Lutheran cooperative agency that represents 95 percent of all Lutherans in the United States. The church bodies it serves are the Evangelical Lutheran Church in America and Latvian Evangelical Lutheran Church, both based in Chicago, and the Lutheran Church—Missouri Synod, based in St. Louis.

Since 1939, LIRS has resettled more than 155,000 refugees through partnerships with Lutheran ministry organizations, congregations, and community people. More than 6,000 congregational sponsors were mobilized for this work, to foster the well-being of refugees and their integration into American life.

The total number resettled includes more than 3,000 unaccompanied refugee children placed in foster care since 1978. LIRS is one of just two national voluntary agencies that resettles unaccompanied minors.

The LIRS is not resting on its laurels. Their ministry is expected to expand significantly in the years ahead.

I commend the people who have made the Lutheran Immigration and Refugee Service such a vibrant organization for 50 years and wish them well as they meet the challenges of the nineties.●

NAMING OF NEW YORK UNIVERSITY'S ROBERT F. WAGNER GRADUATE SCHOOL OF PUBLIC SERVICE

● Mr. MOYNIHAN. Mr. President, as we approach the final decade of the 20th century, our Nation faces a daunting array of challenges. If they are to be met, we will require the best educated men and women we can produce. We will need first-class leaders with rigorous training and a keen dedication to public service if they are to meet the great challenges of governing that will be thrust upon them.

With these concerns in mind, I am pleased to inform my colleagues of an important development at one of the Nation's leading institutions of higher education, New York University. Tomorrow night, a distinguished group will gather to celebrate the naming of the Robert F. Wagner Graduate School of Public Service in honor of the former New York City Mayor Robert F. Wagner. Dr. John Brademas, himself a distinguished public servant and former colleague in Congress, announced this grand news in late September.

The naming of the Wagner School, formerly called the Graduate School of Public Administration, is part of an ongoing campaign to strengthen the school's resources. Part of the endowment income will be directed to fellowships for students, many of whom already work in the public sector, who could not otherwise afford to leave their jobs for graduate education. New funds will also be used to attract tenured and visiting professors and speakers with wide experience in both national and local politics.

Mr. President, Robert F. Wagner served as mayor of New York City for 12 years, from 1953 to 1965, and governed with imagination, compassion, and integrity. If I may, I note my own work as a volunteer for Mayor Wagner's successful campaign in 1953. I also had the great privilege of working with Mayor Wagner on New York City's poverty program while I was an assistant to Gov. Averell Harriman. Mayor Wagner also served as United States Ambassador to Spain and Presidential Envoy to the Vatican.

For much of this century, the Wagner family has been dedicated to public service. Mayor Wagner's father, Robert, served as New York State Assemblyman, Democratic leader in the New York State Senate, and State Supreme Court Justice of the Appellate Division. A U.S. Senator from 1927 to 1949, he introduced much of the legislation of the New Deal.

Mayor Wagner's son, Robert, Jr., a former deputy mayor of New York City and today president of the Board of Education of the City of New York, continues this family tradition.

Mr. President, it is an especially appropriate time to associate Mayor Wagner's name with a school of public service so uniquely situated—both geographically and intellectually—to address the problems of urban America. The name of Robert F. Wagner will symbolize the dedication and commitment needed to address those problems.

If I may, I send my warm congratulations to the entire Wagner family, to Dr. Brademas, and to all who will gather for this auspicious event.

I also ask that the statements of Dr. Brademas and Mayor Wagner upon the occasion of the naming of the Robert F. Wagner Graduate School of Public Service be printed in the RECORD.

The statements follow:

STATEMENT OF MAYOR ROBERT F. WAGNER

Over the years, I've been lucky enough to receive a number of honors. None means more than today's.

To have a school named after me at New York University, one of the great universities of the world, is very special. To have my name associated with a school dedicated to public service, has a particular meaning.

My father used to say to me that he would not be able to leave me a lot of money. What he would leave me is a name and a heritage of which I would be proud. And I am proud—for all my father did, for this country, and for my chance to serve, for my family's continued commitment, in all sorts of different ways, to the idea that the public good is the highest good.

It is the highest good, and when done honorably and well, the most rewarding.

In recent years, public service has not received the same level of attention from universities as the law, business, or medicine. But if there were a time for trained, knowledgeable, public managers, it is now.

Whether you think about the problems of AIDS, crack and homelessness in New York City, the fiscal problems of the State, or the complex choices about social policy, defense, and debt faced by the Federal Government, the importance of preparing the best and the brightest for the government service, is absolutely compelling.

My hope is that the naming of this school, through the generosity of my friends Marshall Manley, George Scharffenberger, Raymond Chambers and Ambassador Walter Annenberg—will signal a renewed sense that government can make a difference and that those who enter it represent our future.

What NYU is proposing today—and I thank Larry and Bob Tisch, John Brademas, Naomi Levine, George Heyman, the entire NYU Board, and especially the one board member to whom I'm related, Phyllis Cerf Wagner, and the "Wagner" School's Advisory Board, and Dean Howard Newman, for making it possible to say that here in New York a major university is prepared to take the lead, to make it clear that what happens in government, what happens in the nonprofit world will determine the quality of our society.

I'd like to believe that dedication to public service is what my life has been about, what my father's was about, and what my family's is about. I thank you for this extraordinary honor. I look forward to working with you and others, to make this the model public service school, not just for the city or state but for the Nation.

STATEMENT OF DR. JOHN BRADEMAS

As president of New York University, I am pleased to welcome you all to our campus for an exciting announcement. For today marks a significant moment in the 158-year history of NYU. New York University today names the Robert F. Wagner Graduate School of Public Service in honor of the distinguished former Mayor of the City of New York, United States Ambassador to Spain, and Presidential Envoy to the Vatican, Robert F. Wagner.

This naming is made possible by a series of gifts which are part of an ongoing campaign to endow the School, formerly known as the Graduate School of Public Administration. I am delighted to tell you that three generous benefactors have already pledged $9 million to recognize, in this wonderful way, Mayor Wagner for his many contributions to our city, state and nation.

I know I need not stress for an audience of New Yorkers what a great honor it is to have the name Wagner—a name synonymous with public service and dedication to the highest aims of government—asociated so intimately with New York University. The name of Wagner lends new resonance to the longstanding motto of New York University: "A private university in the public service."

THE ROBERT F. WAGNER GRADUATE SCHOOL OF PUBLIC SERVICE

The Wagner School is one of the oldest and largest public service graduate schools in the United States. Founded in 1938, it ranks among the leading schools of its kind based on the quality of its faculty, students and programs. The School offers graduate programs in three major areas: Public Administration, Urban Planning, and Health Policy and Management. It also supports a Health Research Program and houses the Urban Research Center, a focal point for the study of the problems of cities.

With the support we announce today, we are confident that the Robert F. Wagner Graduate School of Public Service will become one of the premier graduate centers in the Nation for public policy research and for preparing men and women for service in government at every level, nonprofit organizations and health services administration.

MAJOR GIFTS

The major donors to the school's endowment campaign—so far—are: Marshall Manley, president and chief executive officer of AmBase Corp., who, together with the AmBase Foundation, Inc., has pledged $5 million; Raymond Chambers, chairman of Wesray Capital Corp. who has pledged $2 million; and The Hon. Walter H. Annenberg, publisher and distinguished former Ambassador to Great Britain, who is also contributing $2 million.

On behalf of the entire NYU community, I want to express our deep gratitude to Marshall Manley, Ray Chambers and Ambassador Annenberg—all men of accomplishment whose generosity and desire to pay tribute to a leading figure in American life have made this day possible.

I must also single out for special mention one of the leading ladies of this institution and, indeed, this city. A successful businesswoman, she is also a member of the University Board of Trustees and chairs the Board's University Life Committee. Her great spirit and energy make her one of New York University's most valuable assets. I speak, of course, of Phyllis Wagner.

Let me put these gifts in the larger perspective of what we as a university are striving to achieve. They will help endow a leading school for education and research in public policy and urban affairs at a time when we must develop new and effective solutions to the problems afflicting the country's cities.

THE IMPORTANCE OF PUBLIC SERVICE

As someone who spent a quarter of a century in public life—who knows its rigors and yet cherishes its rewards—I feel strongly that we, as a Nation, must rekindle among our young people a sense of the purpose and the privilege of serving in the public arena. Through the great generosity of our donors and their strong support of public service, New York University can prepare men and women equipped to serve in government and other nonprofit arenas and to do so with intelligence and integrity.

There is one other point I want to make: As the country's major domestic problems become increasingly centered in urban areas, people look to local leaders for solutions to issues that Federal resources no longer address. And as New York City prepares to elect its next mayor, we are all aware of the daunting range of challenges facing our metropolitan centers.

The gifts we announce today will advance the work of The Wagner School in confronting such critical issues as care for AIDS patients, health services for the poor and elderly, homelessness, school dropouts, public transportation and the impact of telecommunications on urban economies.

The list of participants in today's event should also underscore one final point: public service knows no partisan boundaries. Persons of differing political backgrounds and viewpoints have united in support of The Robert F. Wagner Graduate School of Public Service. And what finer inspiration for our students and faculty than to pursue their studies and conduct their research in a graduate school named for our honored guest today.

THE WAGNER LEGACY

Mayor from 1953 to 1965, Robert Wagner gave New York City its first code of ethics, put into effect local laws to bar discrimination in housing and pressed balanced economic development with neighborhood cooperation.

The Wagner family has been a prominent force in government at all levels for much of this century. Our guest's father, Robert, served in the New York State Assembly and Senate and on the State Supreme Court. As a U.S. Senator, he helped write much of the New Deal legislation of the 1930's and 40's.

Continuing this tradition is the mayor's son, Robert, Jr., a former deputy mayor and now president of the New York City Board of Education. And as we meet today on a university campus, it is fitting to take note of this important figure in the educational life of New York City. He deserves our gratitude, in particular, for his leadership over the past several months in selecting the new chancellor of the city's public schools.

I am also pleased to note that the ties of the Wagner family to NYU are several and deep. For many years, Mayor Wagner was chairman of the Graduate School's Executive Council. Robert, Jr. is a member of the School's Board of Overseers and a senior fellow and member of the Advisory Council of its Urban Research Center. The mayor's wife, Phyllis, as I have said, is a valued member of the University's Board of Trustees.

The naming of a school is not just a matter of changing signs on a building. It is a gesture that touches the intellectual core of an institution. The Robert F. Wagner Graduate School of Public Service is meant to be an ongoing embodiment of the ideas and commitment to a wider community represented by one of the Nation's most talented public servants.

By conducting research in areas of pressing public concern and by preparing the next generation of policymakers and planners, The Wagner School seeks to live up to its splendid new name.●

TITLE V OF S. 1802

● Mr. JOHNSTON. Mr. President, I rise today to provide further explanation of the intent of title V of S. 1802, legislation to enhance nuclear safety, research, and cleanup by the Department of Energy.

Title V of this bill, entitled "Monitoring of Health and Radiological Conditions in the Northern Marshall Islands," would require that the Secretary of Energy continue to maintain a comprehensive program of radiological activities in the Northern Marshall Islands. The Department of Energy has repeatedly attempted to phase down this program despite the need to maintain our Government's capability to conduct radiological monitoring and research, and to support United States' assistance to the people and Government of the Republic of the Marshall Islands.

Two atolls in the Northern Marshall Islands, Enewetak and Bikini, were the sites of advanced weapons testing in the late 1940's and early 1950's. As a result of this testing, the atolls became contaminated with radionu-

clides. In 1954, two other atolls, Rongelap and Utrik were contaminated by fallout from the "Bravo" thermonuclear test at Bikini.

The United States has accepted full responsibility for the contamination of these atolls and a final settlement of claims arising from the testing was concluded in 1986 as a part of Public Law 99-239.

The Department of Energy has played the principal role in monitoring radiological conditions on the atolls, conducting research on mitigation/cleanup strategies, and in making dose assessments of persons affected by the testing. In addition, Congress has provided for other committees and individuals to oversee and review the work of the Department in order to assure the validity of their work.

Because there is a continued interest in these issues by Congress and the people and Government of the Marshall Islands, there is a continued need for the Department's activities. For example, the people of Bikini are currently undertaking a cleanup effort on Bikini Island which is based on research conducted by the Department of Energy. It is important that the Department continue its monitoring activities to verify the effectiveness of the cleanup effort. In addition, it is hoped that the people of Rongelap will soon be returning to their homeland now that the Rongelap reassessment project has confirmed DOE's findings regarding the habitability of Rongelap Island. The Department can assist in reassuring the people of the safety in returning to their island by continuing to monitor conditions, and by making their data and expertise available to the Rongelap community, and to the Government of the Marshall Islands. Unfortunately, the Department has been all too eager to phase down its activities in the Marshalls.

Mr. President, I want to specifically state that this title of S. 1802 is not intended to suggest any disagreement with the findings of the Department's monitoring and research activities in the Northern Marshall Islands. The Department's scientific work in the islands has been reviewed by many outside experts and it has been found to be accurate. The intent of title V of this bill is to require that the Department continue this important work.

Radioactivity is a highly controversial subject, and it is an important issue in our relations with the people of the Marshall Islands. The data and expertise provided by the Department of Energy, and reviewed by independent experts, have been important to myself and to members of congressional committees when considering these issues. In general, the Department's activities are essential to Congress in making policy decisions regarding the Northern Marshall Islands. Title V of S. 1802 underscores the importance of the Department's activities and requires their continuation.●

SECOND ANNIVERSARY OF THE BRASOV WORKERS' UPRISING

● Mr. DECONCINI. Mr. President, today, November 15, marks the second anniversary of the workers' uprising in Brasov, Romania. In comparison with the startling changes that have swept through Eastern Europe in the past few months, this quickly extinguished uprising would appear to be but a footnote to a history of repression in Romania.

But its significance goes far beyond those few hours when the workers of Romania spoke their minds, and the harsh, years-long prison and labor sentences that were meted out to some of the participants. It was the first stirring of widespread dissent in Romania in a decade, and it sparked a crescendo of protest that has been carried into this past year.

The most spectacular sign of dissent to appear in Romania this year was the open letter to President Nicolae Ceausescu written by six prominent, veteran members of the Romanian Communist Party—Silviu Brucan, Constantin Pirvulescu, Corneliu Manescu, Alexandru Birladeanu, Gheorghe Apostol, and Ion Raceanu. Their letter criticized the destruction of the country his policies have caused and called for an immediate renunciation of the systematization program, restoration of constitutional guarantees on civil rights, and an end to food exports "which are threatening the biological existence of our Nation." "You must admit, Mr. President, that a society cannot function if the authorities, starting from the top, show disrespect for the law," they wrote.

With Bulgarian President Zhivkov's exit last week, as well as GDR leader Honecker's quick fall from power, President Ceausescu is virtually the last holdout from the old guard East European Communist leaders. His regime's policies have isolated Romania, and set it on a backward course when most of the rest of Eastern Europe is moving forward. But they have also isolated him, and he stands alone.

That isolation has nowhere been more apparent than in the 35-nation Conference on Security and Cooperation in Europe. In January of this year, the regime gave its agreement to the Vienna Concluding Document, then announced that it would abide only by those commitments it did not find objectionable. These so-called unacceptable commitments include pledges to respect human rights. It has rejected outright the attempts of seven participating CSCE states to use the new human dimension mechanism to address several human rights cases. In the face of criticism at two recent meetings held under the aegis of the 35-country Conference on Security and Cooperation in Europe, in London and in Paris, Romania has returned to the time-worn and untenable defense of its abysmal record by claiming that outsiders have no right to interfere in a sovereign country's internal affairs. Most recently, alone among the 35 participating states, Romania refused to give consensus to the draft concluding document of the CSCE Environmental Forum held in Sofia, Bulgaria. That decision provoked deep disappointment and frustration from East as well as West.

Between its repressive human rights policies and provocative foreign policy stands, the Romanian state has quickly lost what friends it once had. But we must not foresake the Romanian people. Let us continue to offer our strongest moral support to the forces of democracy and reform, silenced as they are in today's Romania.●

"OPENING DOORS FOR 50 YEARS": THE 50TH ANNIVERSARY OF THE LUTHERAN IMMIGRATION AND REFUGEES SERVICE

● Mr. BOSCHWITZ. Mr. President, today is an important day for those of us who take an active role in bringing refugees and immigrants into our country. Today marks the 50th anniversary of the Lutheran Immigration and Refugee Service. Their theme for the anniversary celebration, "Opening Doors—Yesterday and Tomorrow," is certainly an appropriate one.

The Lutheran Immigration and Refugee Service [LIRS] is the national agency of Lutheran churches in the United States for ministry with uprooted people. LIRS is an inter-Lutheran cooperative agency that represents about 95 percent of all Lutherans in the United States.

LIRS is to be commended for its dedication and commitment to meeting the needs of immigrants and refugees who enter our country. Since 1939, LIRS has resettled more than 155,000 refugees and immigrants through partnerships with Lutheran social ministry organizations, congregations, and community people. Among those who've been resettled by LIRS are Europeans, Armenians, Evangelical Christians from the Soviet Union, Amerasian young people, Southeast Asians, Africans, and refugees from the Near East.

LIRS serves as an important voice for refugees at all levels—from local to international. More than 6,000 congregational sponsors have taken part in this resettlement process, welcoming thousands of newcomers to our country and helping to integrate them into American life. These local groups also deserve praise for their untiring work

in accepting newcomers with open arms and hearts.

As the only refugee serving in the U.S. Senate, the plight of refugees and immigrants is a deep concern of mine. I have worked closely with LIRS in the past, and look forward to a continued close working relationship.

With more than 14 million refugees throughout the world, those of us who are committed to resettling refugees and immigrants recognize that we still face many challenges. I am confident that LIRS will continue to be a leader in speaking out on behalf of refugees and immigrants worldwide and will continue working to meet the needs of all refugees and immigrants.

Once again, I am proud to have the opportunity today to recognize the 50th anniversary of the Lutheran Immigration and Refugee Service.●

THE IMPEACHMENT OF WALTER L. NIXON, JR.

● Mr. BIDEN. Mr. President, the House of Representatives exhibited three articles of impeachment against Judge Walter L. Nixon, Jr. Articles I and II each alleged a single, discrete false statement before a grand jury. Article III, the so-called omnibus article, alleged that Judge Nixon deliberately concealed certain conversations by knowingly making one or more false statements before the grand jury and one or more false statements in an interview with Federal investigators.

I voted to convict Judge Nixon on articles I and II, and to acquit Judge Nixon on article III. In addition, I voted in favor of granting Judge Nixon's motion to dismiss article III. I make this statement to briefly explain the reasons for my votes on article III.

First, article III cumulated 14 alleged false statements in such a way as to effectively bypass the requirement in article I, section 3, clause 6 of the Constitution that "no Person shall be convicted without the concurrence of two thirds of the Members present." In order to convict under article III, it was necessary to find only that Judge Nixon made one or more false statements to the grand jury and one or more false statements to the Federal investigators. It was possible, therefore, for Judge Nixon to be convicted under article III even though two-thirds of the Members present did not agree that he made any one of the alleged false statements. Put another way, Judge Nixon could have been convicted on article III even though he would have been acquitted were each of the 14 alleged false statements voted on separately. This, in my view, the Constitution forbids.

Second, article III unfairly repeated the alleged false statements in articles I and II. It was clear from the language of article III that Judge Nixon could have been acquitted on articles I and II but then convicted on article III—on the basis of the very same facts that were the foundation of articles I and II. Subsection II(A), (D), (E), (F), and (G) alleged essentially the same facts that were alleged in articles I and II. In my view, Judge Nixon should not have been subject to liability for the allegations in those subsections of article III were he to have been acquitted on articles I and II.

BUD STALEY: A MAN FOR ALL SEASONS

● Mr. COATS. Mr. President, America has many heroes. They have fought our country's wars, pioneered new frontiers in science, won gold medals at the Olympics and saved the lives of our citizens. We honor them for their courageous deeds, and their names become part of our country's legacy.

Most often, we recognize heroism only when such acts are spectacular or worthy or front page news. But there are many Americans who, in the normal course of daily life, make the world a better place for everyone. They dedicate their time and resources to their communities, to philanthropic organizations, and to those less fortunate than themselves. They do this not for personal gain, but because they believe that their contributions can improve the lives of others.

Bud Staley is one of those people.

A son of America's heartland, this Hammond, IN, native represents the classical American success story. From his beginnings as a telephone installer for Illinois Bell Telephone in the 1940's, Bud rose through the ranks of the Bell System to become chairman of the board of NYNEX Corp., a position from which he retired this year. During those years, he helped to guide the telecommunications industry through an era of dramatic evolution—an era marked by both rapid technological development and the breakup of the Bell System.

But it is not Bud's career achievements, numerous though they are, that tell the real story about this man. Rather, it is his devotion to his family and to civic and community causes that reveals more about his character. For instance, Bud's tireless efforts with the New York City Partnership's Task Force on Youth Employment led to the establishment of thousands of jobs for disadvantaged youth. Over the years, he has given countless hours of service as chairman of the American Red Cross of Greater New York, the United Way of Tri-State—New York—and the Greater New York Savings Bond Committee. Most recently, he has been a major force in fundraising efforts to aid the victims of Hurricane Hugo and the San Francisco earthquake.

Many of those who have benefited from Bud Staley's efforts will never know his name. What they do know, and what is most important, is that charitable organizations are there to provide them with assistance and comfort in times of need. And it is the "behind the scenes" activities of dedicated American citizens like Bud Staley that make it possible for those organizations to be there.

As President Bush stated, "Prosperity with a purpose means taking your idealism and making it concrete by certain acts of goodness." If a man's prosperity is measured by the acts of goodness he bestows on others, then Bud Staley is truly a wealthy man.●

THE 50TH ANNIVERSARY OF LUTHERAN IMMIGRATION AND REFUGEE SERVICE

● Mr. METZENBAUM. Mr. President, I rise today to congratulate the Lutheran Immigration and Refugee Service as it celebrates its 50th anniversary.

The Lutheran Immigration and Refugee Service [LIRS] represents the Evangelical Lutheran Church in America and Latvian Evangelical Lutheran Church, both based in Chicago, as well as the Lutheran Church—Missouri Synod, based in St. Louis. It is an organization dedicated to the welfare of displaced persons—the victims of war, oppression and upheaval.

Through its network of social ministries and congregations, LIRS has helped to resettle more than 155,000 refugees since 1939. Refugees from around the world have benefited from LIRS's good work. Most recently, LIRS has made its mark in the refugee crises afflicting Southeast Asia, Africa, and the Soviet Union.

LIRS performs a particularly important service as one of only two organizations that resettles unaccompanied children. LIRS has succeeded in placing more than 3,000 children in foster care over the past decade.

With the world's population of refugees swelling to more than 13 million, the services of groups like LIRS are critical. On both the local and international level, private/voluntary organizations help governments grapple with the growing refugee problem. Indeed, it is the PVO's like LIRS which are truly on the front lines of refugee policy.

LIRS works for just and humane public policies and practices regarding refugees and immigrants. LIRS helps ensure fair treatment of refugees seeking asylum in the United States, and stands behind them through the application process.

As the number of refugees seeking entry into the United States reaches overwhelming proportions, the Lutheran Immigration and Refugee Serv-

ice will face its toughest challenges ever. I know that LIRS's record of service over the past 50 years will be matched and exceeded during the next 50 years. LIRS deserves our thanks, our congratulations, and our request to keep up the good work on this milestone, 50th anniversary.●

ALBANIAN INDEPENDENCE DAY

● Mr. RIEGLE. Mr. President, today I join Albanians all over the world in celebrating the 77th anniversary of Albanian Independence Day. To mark this important event, I would like to pay tribute to all those individuals who have devoted their lives to fight for democracy and freedom for all people in the world. The Albanian National Front will be holding their annual Albanian Independence Day celebration on November 25, 1989 in my home State, Michigan.

On November 28, 1912, Ismail Qemal with the support of his countrymen, proclaimed Albania a democratic and independent nation, freeing itself from the Ottoman Empire. Unfortunately, this independence was short-lived due to the upheaval created by the First World War.

Albania was then thrust into a period of instability under warring factions of various tyrants. The onslaught of the Second World War disrupted Albanian efforts to gain independence when the country forcibly occupied, this time by the Italian Fascists.

The voice of democracy within the Albanian people was organized through the establishment of Balli Kombetar—the "National Front." The main goal of this organization was to liberate the country and form a democratic government.

The Balli Kombetar fought courageously and dauntlessly against both the occupying forces and the Communists. With the fall of Italy and Germany, and the support and aid supplied by Tito's Yugoslavian Communists, the Communists within Albania gained control. The Balli Kombetar was forced to disband and continue its battle for a free and democratic Albania abroad.

Mr. President, by repeatedly demonstrating our support for people struggling for their rights to live as free individuals, we give renewed meaning to the democratic principles on which our own Nation was founded.

Today's commemoration of the ongoing struggle for a free and democratic Albania is an important part of the effort, and I am proud to support it.●

REFERRAL OF A NOMINATION

Mr. CRANSTON. Mr. President, as in executive session, I ask unanimous consent that the nomination of Donald E. Kirkendall, of Maryland, to be Inspector General at the Department of the Treasury, reported today by the Committee on Finance, be referred to the Committee on Governmental Affairs for not to exceed 20 days.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

CIVIL RIGHTS COMMISSION REAUTHORIZATION

Mr. CRANSTON. Mr. President, I understand that the Senate has received from the House H.R. 3532, the Civil Rights Commission reauthorization bill. Am I correct?

The ACTING PRESIDENT pro tempore. The Senator is correct.

Mr. CRANSTON. Mr. President, I ask unanimous consent that the bill be placed on the calendar.

Mr. LOTT. Mr. President, I object on behalf of the minority.

Mr. CRANSTON. Mr. President, I then ask the bill be read for the first time.

The ACTING PRESIDENT pro tempore. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 3532) to extend the United States Commission on Civil Rights.

Mr. CRANSTON. Mr. President, I ask the bill be read for a second time.

The ACTING PRESIDENT pro tempore. Is there objection?

Mr. LOTT. I object.

The ACTING PRESIDENT pro tempore. Objection is heard.

Mr. CRANSTON. The bill will now lay on the table until the next legislative day?

The ACTING PRESIDENT pro tempore. The Senator is correct.

HYDROELECTRIC FAIRNESS ACT

Mr. CRANSTON. Mr. President, I ask unanimous consent the Senate proceed to the immediate consideration of Calendar Order No. 247, S. 635, a bill to prevent the unintended licensing of federally nonjurisdictional pre-1935 unlicensed hydroelectric projects.

The ACTING PRESIDENT pro tempore. The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 635) to prevent the unintended licensing of federally nonjurisdictional pre-1935 unlicensed hydroelectric projects.

The ACTING PRESIDENT pro tempore. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Energy and Natural Resources, with an amendment to strike all after the enacting clause and insert in lieu thereof the following:

SEC. 2. Part I of the Federal Power Act (16 U.S.C. 791a et seq.) is amended by adding the following new section at the end thereof:

"SEC. 32. (a) The Commission is prohibited from issuing an original license to any person, State or municipality, other than the owner of the project works, for any project works:

"(1) on which there has been no construction within the meaning of section 23(b) since August 26, 1935; or

"(2) for which a declaration of intention was filed under section 23 and the Commission did not find within one year of the filing that the project works would affect the interests of interstate or foreign commerce.

"(b) The Commission is prohibited from requiring an original license for project works on which there has been no construction within the meaning of section 23(b) since August 26, 1935 if:

"(1) the stream, or part thereof, over or in which such project works have been constructed, was not navigable before the time of such construction; or

"(2) a declaration of intention was filed under section 23 and the Commission found that the interests of interstate or foreign commerce would not be affected by the construction of such project works.".

Mr. McCLURE. Mr. President, as the sponsor of the Hydroelectric Fairness Act of 1989, S. 635, I rise in strong support of this legislation and urge my colleagues to support its passage. S. 635 was reported unanimously by the Committee on Energy and Natural Resources on September 15, and it is cosponsored by Senators JOHNSTON, GARN, NICKLES, BRADLEY, MURKOWSKI, LAUTENBERG, FORD, and D'AMATO.

The purpose of this legislation is to remedy ambiguities in the 1935 Federal Power Act which inadvertently enable nonowners to acquire by hostile means unlicensed hydroelectric projects owned by others—"claim jumping" in the vernacular. As reported by the committee, S. 635 also addresses several other associated problems which were brought to our attention.

The approximately 350 hydroelectric projects this legislation seeks to protect from "claim jumping" are vulnerable because they don't have the protection of a Federal license; and the reason they don't have a Federal license is because when Congress wrote the Federal Power Act in 1935, it intentionally exempted them from the act's requirement to obtain a license.

Generally speaking, these licensing-exempt hydroelectric projects fall into two categories. First, there are those projects which were built before 1935 on a nonnavigable waterway and which have not since been improved. The bulk of unlicensed projects fall into this category. Second, there are those projects which were built after 1935 on a nonnavigable waterway and which were found by FERC to not affect the interests of interstate and foreign commerce. Neither of these categories of projects are required to obtain a Federal license, they are in-

stead subject to State jurisdiction and regulation.

For more than 50 years, the owners of unlicensed projects did not fear that they were at risk of being "claim jumped." But that ended recently when someone spotted, and put to use ambiguities in the Federal Power Act which makes "claim jumping" possible. Let me take a moment to describe these ambiguities which appear in sections 4(e) and 23(b) of the act.

First, section 4(e) of the Federal Power Act was recently interpreted by FERC—subsequently upheld by the Federal courts—in a completely new and novel way as allowing the voluntary licensing of an unlicensed project. Reviewing and upholding FERC's interpretation, a Federal court stated that:

> Pre-1935 project owners [are] at risk because volunteer applicants need not be project owners. *Thus, the owner of a project not requiring a license may find himself the target of a license application by strangers. Cooley v. FERC,* 843 F.2d 1464, 1470 (D.C. Cir., 1988) italic added.

Because Congress did not envision this possibility when writing the Federal Power Act back in 1935, the act does not contain a provision which precludes nonowners from voluntarily applying for a license on someone else's unlicensed project. Thus, as a result of FERC's new interpretation of section 4(e), nonowners can now "claim jump" unlicensed projects simply by volunteering for a license for the other person's project. In fact, under this interpretation even you or I could do so.

Second, although section 23(b) of the Federal Power Act makes it mandatory to obtain a Federal license for a pre-1935 unlicensed project if post-1935 construction is to be undertaken, the act does not say that only the owner can undertake the new construction. Under the act, any person can file for a Federal license to do so. Although this ambiguity has been around since the Federal Power Act was created back in 1935, until recently it had not been put to use by nonowners to "claim jump" projects.

Once a license is obtained by a nonowner, be it by using section 4(e) or section 23(b), the licensee can exercise the Federal Power Act's power of eminent domain to condemn the project and force the owner to sell—whether or not he wants to.

Mr. President, I have no doubt that had Congress foreseen these possibilities back in 1935 when it wrote the Federal Power Act, it would have included safeguards to prevent them from occurring; but Congress didn't, and that is why we today need to legislate.

The problem is sizable. At risk are an estimated 350 unlicensed hydroelectric projects which are located in 38 States and Puerto Rico. These projects are owned by electric utilities, municipalities, irrigation districts and private industry. For the benefit of the Senate, included in the committee report on S. 635 is the best list available of these project, but it is by no means exhaustive. Several projects located in the States of Michigan, New Jersey, and Massachusetts are already under siege by "claim jumpers," and if those efforts are successful other projects on the list will surely be next.

For electric utilities, project loss translates directly into higher electricity prices for its customers. In just one ongoing case for example, the utility has estimated that if they lose the project their customers' electric bill will be increased by $50 million over the next 30 years through the purchase of replacement power. Add adding insult to injury, if the lost project can obtain "QF" status under PURPA, the utility would be required to purchase the power back from the "claim jumper" at full avoided cost.

For nonutility owners such as paper mills, project loss would be a direct financial blow to the firm, weakening is ability to compete domestically and internationally.

Now one might reasonably ask the question: "Why don't the owners of these unprotected projects simply apply for a Federal license; after all, wouldn't they be protected from "claim jumping" if they had a license?" the answer is yes they would be protected if they had a license, but there are a number of substantial factors which discourage them from seeking a license.

First, they might not get the license. Applying for in is a direct invitation for others to file a competing application, which is allowed by the Federal Power Act. The act does not guarantee that an owner-applicant will obtain a license for its project; the license might instead by issued to someone else. And that obviously poses a great financial risk, for these projects constructed many years ago are today worth many millions of dollars.

Moreover, there is a virtual certainty of project loss if it turns out that the competitor is a municipality, because under the Federal Power Act municipalities are given preference in original licensing when competing against a utility for an original license. With preference, the only thing the municipality needs to do win is to match the electric utility's license application; it need not be the first to file, nor does it even need to propose a better project. In fact, as a practical matter about the only thing the municipality would have to do is copy the utility's license application and turn it in.

When Congress enacted the Electric Consumers Protection Act of 1986 to remove municipal preference for existing licensed projects, it did not do so for unlicensed projects; at the time there was no expectation that these projects would ever face "claim jumping" by municipalities, which is in fact now occurring. Had we foreseen this problem developing, I have no doubt that we would have fixed it.

Second, filing for a license is expensive. It costs thousands of dollars, and often many hundreds of thousands of dollars, to prepare the necessary documents and studies. For a smaller project, that cost alone might make the facility uneconomic and result in its being shut down, thereby depriving the economy of low-cost energy and costing consumers through higher priced replacement power. Or if the project stays on line, the licensing costs—paperwork costs plus the expenses of whatever project modifications the Federal Government would require as a condition of the license—would simply be passed on to consumers through higher electricity prices. And if the project were not owned by an electric utility, these costs would either be taken out of stockholders equity or passed on to consumers through higher retail prices.

Third, if licensed, the FERC would like impose substantial new operational requirements on the project, which would also significantly increase operational costs. And that, too, could either make the project uneconomic, or result in higher electricity prices to the utility's customers.

And fourth, once licensed the project would be taken out of State jurisdiction; the Federal Government would instead dictate how the project is to be operated and maintained, which may or may not be consistent with what the State views as being appropriate or necessary. This aspect is particularly troublesome to me as a result of the ninth circuit's Rock Creek decision which upheld FERC's assertion that it had exclusive jurisdiction over water rights, not the State in which the project resides. While I disagree with that decision and the corresponding body of case law, the fact is that until it is overturned, FERC will be free to usurp State water authority for federally licensed projects, a result which I think is unacceptable to Western States. Thus, unless the Supreme Court overturns the FERC, Federal licensing of these projects will only worsen the problem by expanding the number of rivers over which FERC will assert jurisdiction over water rights.

In summary, Mr. President, the pending legislation, which would enable the owners of unlicensed projects to hold onto them without having to bear the expense and burden of obtaining a Federal license, is not only fair and equitable, it is exactly the result Congress intended when it created the Federal Power Act back in 1935. Moreover, there is no

overriding Federal interest in stripping States of their jurisdiction over unlicensed projects; State authorities have proven that they can adequately oversee these projects, both in terms of safety and operations, and they should be allowed to continue to do so. In essence that is exactly what this legislation would do.

For the benefit of the Senate and as part of the legislative history, let me now take a moment to explain some aspects of S. 635, which may warrant some further amplification or explanation.

First, the limitations on licensing established by S. 635 obviously do not apply to non-power-producing hydrofacilities. The Federal Power Act does not give the Commission jurisdiction over nonpower hydroprojects or facilities. For example, non-power-producing dams, diversion structures and irrigation facilities are not licensed by the FERC. And, parenthetically, not all hydroelectric facilities are even within Federal jurisdiction. The term "project" is defined in existing section 3(11) of the Federal Power Act and the term "project works" is defined in existing section 3(12), both of which relate to hydroelectric projects. Thus, reading new section 32 along with existing sections 3(11) and 3(12), as well as the committee report and my comments on the introduction of S. 635, makes it perfectly clear that the limitations on licensing created by section 32 does not apply to non-power-producing hydrofacilities.

Second, new section 32(a)(1) prohibits the Commission from issuing an original license to anyone other than the owner of unlicensed hydroelectric project works—on which there has been no construction since August 26, 1935, within the meaning of section 23(b). Obviously, this prohibition applies even if the owner of the project works seeks a license proposing new construction, because such construction cannot take place until after the license is issued and final. Thus, new section 32(a)(1) will not discourage unlicensed project works owners from seeking to improve or upgrade their facilities out of a fear that such application would stimulate competition for the license; until construction within the meaning of 23(b) actually occurs, and not just is proposed or authorized by license, the limitation that the license can be issued only to the owner remains in effect. Restated, the limitation imposed by section 32(a)(1) applies unitl post-1935 section 23(b) construction actually takes place; and obviously such construction cannot take place until license is issued and final.

Third, while new section 32(a) limits who can obtain a license for certain hydroelectric projects, this limitation does not relieve the owner of project works of any applicable obligation to obtain a license if it is so required pursuant to existing section 23(b) of the Federal Power Act; the only limitation of section 32(a) is on who may obtain the license.

Fourth, in some instances the committee report on S. 635, Senate Report No. 101-133, may have inadvertently used the terms "project" and "project works" interchangeably, although they are clearly defined terms in the Federal Power Act. Accordingly, in any interpretation of S. 635 these terms should be viewed in the context in which they appear in the report, and not necessarily strictly as defined in the Federal Power Act.

Fifth, new section 32(a)(2) references the filing of a declaration of intention. That is the same declaration of intention as is required by section 23(b)(1) of the Federal Power Act, whereby a declaration of intention must be filed with the Commission by anyone intending to construct project works on any nonnavigable commerce clause water. The 1920 Federal Water Power Act—1920 act—contained section 23 which permitted, at the sole discretion of the filing party, the filing of a declaration of intention to construct a dam or project works. The 1920 act required the Federal Power Commission [FPC], the predecessor to the Federal Energy Regulatory Commission, to "cause immediate investigation of such proposed construction to be made." If, as a result of such investigation, the FPC did not find the dam or project works to be within its statutory jurisdiction, the 1920 act further provided that "permission of the Congress is hereby granted to construct such dam or other project works in such stream upon compliance with State laws." Thus, the device of a declaration of intention allowed a decision as to jurisdiction of the FPC—and therefore, the need for a license—before the expense of construction was undertaken. The FPC, by order, issued its response to the person filing the declaration and, further, published that decision in its annual report.

The courts have reviewed and upheld the declaration of intention procedure; for example, in *Farmington River Power Co.* v. *Federal Power Commission*, 455 F.2d 86(1972) the court explains the history of section 23 as having its origin as a Senate amendment and its purpose as:

> This amendment seeks to prescribe how a stream of doubtful navigability may be determined as within the provisions of the law * * *. 455 F.2d 86, 89. (footnote omitted)

The court goes on to say:

> There has long been wide acceptance by the courts, the commentators and the Commission itself of the conclusion that Section 23 was designed merely to provide a discretionary method whereby a person could determine whether or not his proposed construction was on navigable waters and therefore subject to the provisions of the Rivers and Harbors Act of 1899. 455 F.2d 86, 89. (footnote omitted)

The Congress changed and expanded section 23 in 1935 when creating the Federal Power Act. The changed provision required all persons intending to construct a dam or project works to file a declaration of intention with the FPC. Thus, the 1920 act, the Federal Power Act, court cases, and the various Commission annual reports all make perfectly clear what is a declaration of intention.

Sixth, section 32(b)(1) does not change, alter, or amend in any way the definition of what is and what is not "navigable waters;" it only limits the Commission's licensing powers where "the stream, or part thereof, over or in which such project works have been constructed, was not navigable before the time of such construction * * *." Obviously, if the stream was navigable before the time of construction, the limitation of this section does not attach.

The committee report states that the provisions of section 32(b) has the effect of "excluding consideration of any events that occur after project construction or that occur away from the portion of a waterway where a project is located, for purposes of determining the navigability of pre-1935 projects." (p. 8) This part of the report does not fully explain section 32(b). Section 32(b) does not change, affect, alter, modify, or speak in any way about how navigability is determined. The phrase cited above from the committee report should be interpreted as referring to section 32(b)(1) and meaning instead that physical events subsequent to the project's construction which affect navigability are not to be considered as retroactively affecting navigability "before the time of such construction." Moreover, the word "events" is not to be construed as including any change in case law.

Seventh, this legislation is prospective only in application; new section 32 does not apply to any project works for which an order issuing license is final as of the date of enactment. It only applies to those project works on which a license is not final as of the date of enactment.

The amendment offered by Senator MATSUNAGA is also prospective only in application. It would prevent persons from volunteering for and receiving from the Commission an original hydroelectric license in instances in which licensing is not required.

Mr. President, it is clear that this legislation is needed, and it is evident that it would be in the overall public interest. Failure to enact this bill would allow serious economic damage to befall industry and consumers, and we must not allow that to happen. It is for these reasons that I support this legislation and I urge my colleagues to also support it.

AMENDMENT NO. 1137

(Purpose: To clarify the Commission's authority to issue a license)

Mr. CRANSTON. Mr. President, on behalf of Mr. MATSUNAGA I send an amendment to the desk and ask for its immediate consideration.

The ACTING PRESIDENT pro tempore. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from California [Mr. CRANSTON], for Mr. MATSUNAGA, proposes an amendment numbered 1137.

Mr. CRANSTON. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

SEC. 3. Section 4(e) of the Federal Power Act (16 U.S.C. 791a et seq.) is amended by adding the following at the end thereof: "The Commission is prohibited from issuing an original license for proposed project works for which a license is not required by section 23(b).".

The ACTING PRESIDENT pro tempore. If there be no further debate, the question is on agreeing to the amendment of the Senator from Hawaii.

The amendment (No. 1137) was agreed to.

The ACTING PRESIDENT pro tempore. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on agreeing to the commitment amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The ACTING PRESIDENT pro tempore. The question is on the engrossment and the third reading of the bill.

The bill (S. 635) was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 635

Be it enacted by the Senate and House of Representatives of the United States of America in Congres assembled, That this Act may be referred to as the "Hydroelectric Fairness Act of 1989".

SEC. 2. Part I of the Federal Power Act (16 U.S.C. 791 et seq.) is amended by adding the following new section at the end thereof:

"SEC. 32. (a) The Commission is prohibited from issuing an original license to any person, State, or municipality other than the owner of the project works, for any project works:

"(1) on which there has been no construction within the meaning of section 23(b) since August 26, 1935; or

"(2) for which a declaration of intention was filed under section 23 and the Commission did not find within one year of the filing that the project works would affect the interests of interstate or foreign commerce.

"(b) The Commission is prohibited from requiring an original license for project works on which there has been no construction within the meaning of section 23(b) since August 26, 1935, if—

"(1) the stream, or part thereof, over or in which such project works have been constructed, was not navigable before the time of such construction; or

"(2) a declaration of intention as filed under section 23 and the Commission found that the interests of interstate or foreign commerce would not be affected by the construction of such project works.".

SEC. 3. Section 4(e) of the Federal Power Act (16 U.S.C. 791a et seq.) is amended by adding the following at the end thereof: "The Commission is prohibited from issuing an original license for proposed project works for which a license is not required by section 23(b).".

The title was amended so as to read "A bill to prevent the unintended licensing of federally jurisdictional, unlicensed hydroelectric projects."

Mr. CRANSTON. Mr. President, I move to reconsider the vote.

Mr. LOTT. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

BILL PLACED ON CALENDAR—H.R. 525

Mr. CRANSTON. Mr. President, I ask unanimous consent that H.R. 525, a bill to naturalize certain Filipino war veterans, received today from the House, be placed on the calendar.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

AUTHORIZING THE USE OF THE HART BUILDING ATRIUM FOR A HOLIDAY CONCERT BY THE CONGRESSIONAL CHORUS

Mr. CRANSTON. Mr. President, on behalf of Senator KERREY, of Nebraska, I send a resolution to the desk and ask for its immediate consideration.

The ACTING PRESIDENT pro tempore. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 209) to authorize the use of the Hart Building atrium for a holiday concert by the Congressional Chorus.

The ACTING PRESIDENT pro tempore. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the resolution.

The resolution (S. Res. 209) was agreed to.

The resolution reads as follows:

S. RES. 209

Resolved, That the atrium of the Senate Hart Office Building may be used from 12:00 noon until 1:00 p.m. on December 5, 1989, for a concert of holiday music presented by the Congressional Chorus.

Mr. CRANSTON. Mr. President, I move to reconsider the vote.

Mr. LOTT. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CONSENT OF CONGRESS TO THE QUAD CITIES INTERSTATE METROPOLITAN AUTHORITY COMPACT

Mr. CRANSTON. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar Order No. 354, S. 1485, the Quad Cities interstate compact bill.

The ACTING PRESIDENT pro tempore. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 1485) to grant the consent of Congress to the Quad Cities Interstate Metropolitan Authority Compact entered into between the States of Illinois and Iowa.

The ACTING PRESIDENT pro tempore. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

The bill was considered, ordered to be engrossed for a third reading, read the third time, and passed; as follows:

S. 1485

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. CONGRESSIONAL CONSENT.

The Congress hereby consents to the Quad Cities Interstate Metropolitan Authority Compact entered into between the States of Illinois and Iowa, which compact is substantially as follows:

ARTICLE 1—SHORT TITLE

This compact may be cited as the "Quad Cities Interstate Metropolitan Authority Compact".

ARTICLE 2—AUTHORIZATION

The states of Illinois and Iowa authorize the creation of the quad cities interstate authority to include the territories of Scott county in the state of Iowa and Rock Island county in the state of Illinois.

ARTICLE 3—PURPOSES

The purposes of the authority are to provide facilities and to foster cooperative efforts, all for the development and public benefit of its territory. This compact shall be liberally interpreted to carry out these purposes.

ARTICLE 4—CREATION

The authority is created when the secretary of state of Iowa certifies to the secretary of state of Illinois that a majority of the electors of Scott county voting on the proposition voted to approve creation of the authority and the secretary of state of Illinois certifies to the secretary of state of Iowa that a majority of the electors of Rock Island county voting on the proposition voted to approve creation of the authority. A referendum approving creation of the authority must be held before January 1, 1993.

ARTICLE 5—BOARD MEMBERS

The authority shall be governed by a board of not more than sixteen members, one-half of whom are residents of Rock

Island county, Illinois, and one-half of whom are residents of Scott county, Iowa. Iowa members shall be chosen in the manner and for the terms fixed by the law of Iowa. Illinois members shall be chosen in the manner and for the terms fixed by the law of Illinois.

ARTICLE 6—BOARD OFFICERS

The board shall elect annually from its members a chairperson, a vice chairperson, a secretary, and other officers it determines necessary.

ARTICLE 7—BOARD OPERATION

The board shall adopt bylaws governing its meetings, fiscal year, election of officers, and other matters of procedure and operation.

ARTICLE 8—BOARD EXPENSES AND COMPENSATION

(a) Members shall be reimbursed for reasonable expenses incurred while carrying out official duties.

(b) Members shall be compensated as authorized by substantially identical laws of the states of Illinois and Iowa.

ARTICLE 9—EMPLOYEES

(a) The board shall hire an executive director, a treasurer, and other employees it determines necessary and shall fix their qualifications, duties, compensation, and terms of employment.

(b) The executive director, treasurer, and other employees shall have no pension benefits or rights of collective bargaining other than those authorized by substantially identical laws of the states of Iowa and Illinois.

ARTICLE 10—GENERAL POWERS

The authority has the following general powers:

(1) To sue and be sued.

(2) To own, operate, manage, or lease facilities within the territory of the authority. "Facility" means an airport, port, wharf, dock, harbor, bridge, tunnel, terminal, industrial park, waste disposal system, mass transit system, parking area, road, recreational area, conservation area, or other project beneficial to the territory of the authority as authorized by substantially identical laws of the states of Iowa and Illinois, together with related or incidental fixtures, equipment, improvements, and real or personal property.

(3) To fix and collect reasonable fees and charges for the use of its facilities.

(4) To own or lease interests in real or personal property.

(5) To accept and receive money, services, property, and other things of value.

(6) To disburse funds for its lawful activities.

(7) To enter into agreements with political subdivisions of the state of Illinois or Iowa or with the United States.

(8) To pledge or mortgage its property.

(9) To perform other functions necessary or incidental to its purposes and powers.

(10) To exercise other powers conferred by substantially identical laws of the states of Iowa and Illinois.

ARTICLE 11—EMINENT DOMAIN

(a) The authority has the power to acquire real property by eminent domain.

(b) Property in the state of Iowa shall be acquired under the laws of the state of Iowa. Property in the state of Illinois shall be acquired under the laws of the state of Illinois.

ARTICLE 12—INDEBTEDNESS

(a) The authority may incur indebtedness subject to debt limits imposed by substantially identical laws of the states of Illinois and Iowa.

(b) Indebtedness of the authority shall not be secured by the full faith and credit or the tax revenues of the state of Iowa or Illinois, or a political subdivision of the state of Iowa or Illinois other than the authority or as otherwise authorized by substantially identical laws of the states of Iowa and Illinois.

(c) Bonds shall be issued only under terms authorized by substantially identical laws of the states of Illinois and Iowa.

ARTICLE 13—TAXES

(a) The authority shall have no independent power to tax.

(b) A political subdivision of the state of Iowa or Illinois shall not impose taxes to fund the authority or any of the authority's projects except as specifically authorized by substantially identical laws of the states of Illinois and Iowa.

ARTICLE 14—REPORTS

The authority shall report annually to the governors and legislatures of the states of Iowa and Illinois concerning its facilities, activities, and finances and may make recommendations for state legislation.

ARTICLE 15—PENALTIES

The states of Illinois and Iowa may provide by substantially identical laws for the enforcement of the ordinances of the authority and for penalties for the violation of those ordinances.

ARTICLE 16—SUBSTANTIALLY IDENTICAL LAWS

Substantially identical laws of the states of Iowa and Illinois which are in effect before the authority is created shall apply unless the laws are contrary to or inconsistent with the provisions of this compact. A question of whether the laws of the states of Iowa and Illinois are substantially identical may be determined and enforced by a federal district court.

ARTICLE 17—DISSOLUTION

The authority may be dissolved by independent action of a political subdivision of the state of Iowa or the state of Iowa as authorized by law of the state of Iowa or by independent action of a political subdivision of the state of Illinois or the state of Illinois as authorized by law of the state of Illinois.

ARTICLE 18—SUBJECT TO LAWS AND CONSTITUTIONS

This compact, the enabling laws of the states of Iowa and Illinois, and the authority are subject to the laws and Constitution of the United States and the Constitutions of the states of Illinois and Iowa.

ARTICLE 19—CONSENT OF CONGRESS

The attorneys general of the states of Iowa and Illinois shall jointly seek the consent of the Congress of the United States to enter into or implement this compact if either of them believes the consent of the Congress of the United States is necessary.

ARTICLE 20—BINDING EFFECT

This compact and substantially identical enabling laws are binding on the states of Illinois and Iowa to the full extent allowed without the consent of Congress. If the consent of Congress is necessary, this compact and substantially identical enabling laws are binding on the states of Iowa and Illinois to the full extent when consent is obtained.

ARTICLE 21—SIGNING

This compact shall be signed in duplicate by the speakers of the houses of representatives of the states of Illinois and Iowa. One signed copy shall be filed with the secretary of state of Iowa and the other with the secretary of state of Illinois.

SEC. 2. RESERVATION OF RIGHTS.

The right to alter, amend, or repeal this Act is expressly reserved.

Mr. CRANSTON. Mr. President, I move to reconsider the vote.

Mr. LOTT. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ACQUISITION OF CERTAIN LAND ADJACENT TO ROCKY MOUNTAIN NATIONAL PARK

Mr. CRANSTON. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S.737.

The ACTING PRESIDENT pro tempore laid before the Senate the following message from the House of Representatives:

Resolved, That the House insist upon its amendments to the bill (S. 737) entitled "An Act to authorize the Secretary of the Interior to acquire certain lands adjacent to the boundary of Rocky Mountain National Park in the State of Colorado.".

Mr. CRANSTON. Mr. President, I move the Senate recede from its disagreement to the House amendment and concur in the House amendment with an amendment which I send to the desk on behalf of Senator WIRTH.

AMENDMENT NO. 1138

The ACTING PRESIDENT pro tempore. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from California [Mr. CRANSTON], for Mr. WIRTH proposes an amendment numbered 1138.

Mr. CRANSTON. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

At the end of the House amendment, add the following new subsection:

"(c) AGREEMENT.—The Secretary is authorized to enter into an agreement with the owner of the lands identified as Tract 1127 and 1127B4, Section 23, Township 3 North, Range 73, Boulder County, Colorado, within the boundaries of Rocky Mountain National Park, to ensure the right of use as a single family residence, unless said property is being developed or is officially proposed to be developed by the owners in a manner which would substantially change its use."

The ACTING PRESIDENT pro tempore. The question is on agreeing to the motion.

The motion was agreed to.

Mr. CRANSTON. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. LOTT. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NORTH AMERICAN WETLANDS CONSERVATION ACT

Mr. CRANSTON. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 289, S. 804, the Wetlands Conservation bill.

The ACTING PRESIDENT pro tempore. The clerk will report.

The legislative clerk read as follows:

A bill (S. 804) to conserve North American wetland ecosystems and waterfowl and other migratory birds and fish and wildlife that depend upon such habitats, which had been reported from the Committee on Environment and Public Works, with amendments as follows:

(The parts of the bill intended to be stricken are shown in boldface brackets, and the parts of the bill intended to be inserted are shown in italic.)

S. 804

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "North American Wetlands Conservation Act".

SEC. 2. FINDINGS AND STATEMENT OF PURPOSE.

(a) FINDINGS.—The Congress finds and declares that—

(1) the maintenance of healthy populations of migratory birds in North America is dependent on the protection, restoration, and management of wetland ecosystems and other habitats in Canada, as well as in the United States and Mexico;

(2) wetland ecosystems provide essential and significant habitat for fish, shellfish, and other wildlife of commercial, recreational, scientific, and aesthetic values;

(3) almost 35 per centum of all rare, threatened, and endangered species of animals are dependent on wetland ecosystems;

(4) wetland ecosystems provide substantial flood and storm control values and can obviate the need for expensive manmade control measures;

(5) wetland ecosystems make a significant contribution to water availability and quality, recharging groundwater, filtering surface runoff, and providing waste treatment;

(6) wetland ecosystems provide aquatic areas important for recreational and aesthetic purposes;

(7) more than 50 per centum of the original wetlands in the United States alone have been lost;

(8) wetlands destruction, loss of nesting cover, and degradation of migration and wintering habitat have contributed to long-term downward trends in populations of migratory bird species such as pintails, American bitterns, and black ducks;

(9) the migratory bird treaty obligations of the United States with Canada, Mexico, and other countries require protection of wetlands that are used by migratory birds for breeding, wintering, or migration and are needed to achieve and to maintain optimun population levels, distributions, and patterns of migration;

(10) the 1988 amendments to the Fish and Wildlife Conservation Act of 1980 require the Secretary of the Interior to identify conservation measures to assure that nongame migratory bird species do not reach the point at which measures of the Endangered Species Act are necessary;

(11) protection of migratory birds and their habitats requires long-term planning and the close cooperation and coordination of management activities by Canada, Mexico, and the United States within the framework of the 1916 and 1936 Migratory Bird Conventions;

(12) the North American Waterfowl Management Plan, signed in 1986 by the Minister of Environment for Canada and the Secretary of the Interior for the United States, provides a framework for maintaining and restoring an adequate habitat base to ensure perpetuation of populations of North American waterfowl and other migratory bird species;

(13) a tripartite agreement signed in March 1988, by the Director General for Ecological Conservation of Natural Resources of Mexico, the Director of the Canadian Wildlife Service, and the Director of the United States Fish and Wildlife Service, provides for expanded cooperative efforts in Mexico to conserve wetlands for ducks, geese, and other migratory birds that spend the winter there; and

[(13)] *(14)* the long-term conservation of migratory birds and habitat for these species will require the coordinated action of governments, private organizations, landowners, and other citizens.

(b) PURPOSE.—The purposes of this Act are to encourage partnership among public agencies and private interests—

(1) to protect, enhance, restore, and manage an appropriate distribution and diversity of wetland ecosystems and other habitats for migratory birds and other fish and wildlife in North America;

(2) to maintain current or improved distributions of migratory bird populations; and

(3) to sustain an abundance of waterfowl and other migratory birds consistent with the goals of the North American Waterfowl Management Plan and the international obligations contained in the migratory bird treaties and conventions *and other agreements* with Canada, Mexico, and other countries.

SEC. 3. DEFINITIONS.

For the purposes of this Act:

(1) The term "Agreement" means the Tripartite Agreement signed in March 1988, by the Director General for Ecological Conservation of Natural Resources of Mexico, the Director of the Canadian Wildlife Service, and the Director of the United States Fish and Wildlife Service.

[(1)] *(2)* The term "appropriate Committees" means the Committee on Environment and Public Works of the United States Senate and the Committee on Merchant Marine and Fisheries of the United States House of Representatives.

[(2)] *(3)* The term "flyway" means the four administrative units used by the United States Fish and Wildlife Service and the States in the management of waterfowl populations.

(4) The term "Migratory Bird Conservation Commission" means that commission established by section 2 of the Migratory Bird Conservation Act (16 U.S.C. 715a).

[(3)] *(5)* The term "migratory birds" means all wild birds native to North America that are in an unconfined state and that are protected under the Migratory Bird Treaty Act, including ducks, geese, and swans of the family Anatidae, species listed as threatened or endangered under the Endangered Species Act (16 U.S.C. 1531 et seq.), and species defined as nongame under the Fish and Wildlife Conservation Act of 1980 (16 U.S.C. 2901-2912).

[(4)] *(6)* The term "Plan" means the North American Waterfowl Management Plan signed by the Minister of the Environment for Canada and the Secretary of the Interior for the United States in May 1986.

[(5)] *(7)* The term "Secretary" means the Secretary of the Interior.

[(6)] *(8)* The term "State" means the State fish and wildlife agency.

[(7)] *(9)* The term "wetlands conservation project" means—

(A) the obtaining of a real property interest in lands or waters from willing sellers or donors if the obtaining of such interest is subject to terms and conditions that will ensure that the real property will be administered for the long-term conservation of such lands and waters and the migratory birds and other fish and wildlife dependent thereon; [and that will provide for appropriate public access;] *and*

(B) the restoration, management, or enhancement of wetland ecosystems and other habitat for migratory birds and other fish and wildlife species if such restoration, management, or enhancement is conducted on lands and waters that are administered for the long-term conservation of such lands and waters and the migratory birds and other fish and wildlife dependent thereon. [and that are available for appropriate public access.]

SEC. 4. ESTABLISHMENT OF NORTH AMERICAN WETLANDS CONSERVATION COMMISSION.

(a) COMMISSIONERS.—(1) There shall be established a North American Wetlands Conservation Commission which shall consist of nine Commissioners who may not receive compensation as Commissioners. Of the Commissioners—

(A) one shall be the Director of the United States Fish and Wildlife Service;

(B) one shall be the Secretary of the Board of the National Fish and Wildlife Foundation appointed pursuant to section 3(2)(B) of the National Fish and Wildlife Foundation Establishment Act (16 U.S.C. 3702); and

(C) four shall be individuals who shall be appointed by the Secretary, who shall reside in different flyways and who shall each be a Director of the State fish and wildlife agency [directly responsible for conservation of fish, wildlife, and wetlands;] *which shall be construed to mean any department, or any division of any department of another name, of a State that is empowered under its laws to exercise the functions ordinarily exercised by a State fish and wildlife agency;*

(D) three shall be individuals who shall be appointed by the Secretary and who shall each represent a different charitable and nonprofit organization which is actively participating in [implementation of the Plan.] *carrying out wetlands conservation projects under this Act, the Plan, or the Agreement.*

(2) The Secretary shall appoint an alternate Commissioner who shall be knowledgeable and experienced in matters relating to fish, wildlife, and wetlands conservation and who shall perform the duties of a Commissioner appointed under subsection (a)(1)(C) or subsection (a)(1)(D) of this section—

(A) until a vacancy referred to in subsection (b)(4) of this section is filled; or

(B) in the event of the anticipated absence of such a Commissioner from any meeting of the Commission.

(b) APPOINTMENT AND TERMS.—(1) Except as provided in paragraphs (2) and (3), the

term of office of Commissioners appointed under subsections (a)(1)(C) and (a)(1)(D) of this section is six years.

(2) Of the Commissioners first appointed under subsection (a)(1)(C) of this section after the date of enactment of this Act, one shall be appointed for a term of three years, one shall be appointed for a term of four years, one shall be appointed for a term of five years, and one shall be appointed for a term of six years.

(3) Of the Commissioners first appointed under subsection (a)(1)(D) of this section after the date of enactment of this Act, one shall be appointed for a term of two years, one shall be appointed for a term of four years, and one shall be appointed for a term of six years.

(4) Whenever a vacancy occurs among Commissioners appointed under subsection (a)(1)(C) or subsection (a)(1)(D) of this section, the Secretary shall appoint an individual in accordance with either such subsection to fill that vacancy for the remainder of the applicable term.

(c) EX OFFICIO COMMISSION MEMBERS.—The Secretary is authorized and encouraged to include as ex officio nonvoting members of the Commission representatives of—

(1) the Federal, provincial, territorial, or State government agencies of Canada and Mexico, which are participating actively in carrying out one or more wetlands conservation projects under [this Act or the Plan;] *this Act, the Plan, or the Agreement;*

(2) the Environmental Protection Agency and other appropriate Federal agencies, in addition to the United States Fish and Wildlife Service, which are participating actively in carrying out one or more wetlands conservation projects under [this Act or the Plan;] *this Act, the Plan, or the Agreement;* and

(3) Native American interests, including tribal organizations, which are participating actively in one or more wetlands conservation projects under [this Act or the Plan.] *this Act, the Plan, or the Agreement.*

(d) CHAIRMAN.—The Chairman shall be elected by the Commission from its members for a two-year term.

(e) QUORUM.—A majority of the current membership of the Commission shall constitute a quorum for the transaction of business.

(f) MEETINGS.—The Commission shall meet at the call of the Chairman at least once a year. Nonexecutive sessions of Commission meetings shall be open to the public. If a Commission member appointed under subsection (a)(1)(C) or (a)(1)(D) of this section misses three consecutive regularly scheduled meetings, the Secretary may remove that individual from the Commission and fill that vacancy in accordance with subsection (b)(4).

(g) REIMBURSEMENT OF EXPENSES.—Members of the Commission appointed under subsection (a)(1)(C) or subsection (a)(1)(D) of this section shall serve without pay, but be reimbursed by the Secretary with the funds available under section 8(a)(1) for administering this Act for the actual and necessary traveling and subsistence expenses incurred by them in the performance of the duties of the Commission.

(h) COORDINATOR.—The Director of the United States Fish and Wildlife Service shall designate an [individual] *employee of the Service*—

(1) who shall be educated and experienced in the principles of fish, wildlife, and wetlands conservation;

(2) who shall be responsible, with assistance from the United States Fish and Wildlife Service, for administration of this Act; and

(3) who shall be compensated with the funds available under section 8(a)(1) for administering this Act.

SEC. 5. APPROVAL OF WETLANDS CONSERVATION PROJECTS.

(a) CONSIDERATION BY THE COMMISSION.—The Commission shall recommend wetlands conservation projects to the Secretary based on consideration of—

(1) the availability of sufficient non-Federal moneys to carry out any wetlands conservation project and to match Federal contributions in accordance with the requirements of sections 8(b) and 8(c) of this Act;

(2) the extent to which any wetlands conservation project represents a partnership among public agencies and private entities;

(3) the consistency of any wetlands conservation project in the United States with the National Wetlands Priority Conservation Plan developed under section 301 of the Emergency Wetlands Resources Act (16 U.S.C. 3921);

(4) the extent to which the wetlands conservation project fulfills the purposes of this Act and the goals of the Plan *and the Agreement*;

(5) the extent to which any wetlands conservation project would aid the conservation of migratory nongame birds, other fish and wildlife and species that are listed, or are candidates to be listed, as threatened and endangered under the Endangered Species Act (16 U.S.C. 1531 et seq.);

(6) the substantiality of the character and design of the wetlands conservation project; and

(7) the recommendations of any partnerships among public agencies and private entities in Canada, Mexico, or the United States which are participating actively in carrying out one or more wetlands conservation projects under [this Act or the Plan.] *this Act, the Plan, or the Agreement.*

(b) RECOMMENDATIONS TO THE SECRETARY.—The Commission shall submit to the Secretary [and the appropriate Committees] by March 30 of each year, a description, including estimated costs, of the wetlands conservation projects which the Commission has considered under subsection (a) of this section and which it recommends, in order of priority, that the Secretary approve for Federal funding under this Act and section 3(b) of the [Federal Aid in Wildlife Restoration Act (16 U.S.C. 669b(b)),] *Act of September 2, 1937 (50 Stat. 917, as amended; 16 U.S.C. 669b(b))*, as amended by this Act.

(c) COMMISSION PROCEDURES.—The Commission shall establish practices and procedures for the carrying out of its functions under subsections (a) and (b) of this section. The procedures shall include requirements that—

(1) a quorum of the Commission must be present before any business may be transacted; and

(2) no recommendations referred to in subsection (b) of this section may be adopted by the Commission except by the vote of two-thirds of all members present and voting.

[(d) APPROVAL OF COMMISSION RECOMMENDATIONS BY THE SECRETARY.—The Secretary shall approve the Federal funding available under this Act and section 3(b) of the Federal Aid in Wildlife Restoration Act (16 U.S.C. 669b(b)), as amended by this Act, for the wetlands conservation projects in the order of priority recommended by the Commission unless the Secretary finds that any such projects should not have been recommended based on consideration of the factors in subsection (a) of this section.]

(d) APPROVAL OF COMMISSION RECOMMENDATIONS BY THE SECRETARY.—The Secretary, in consultation with the Migratory Bird Conservation Commission, shall approve the Federal funding available under this Act and section 3(b) of the Act of September 2, 1937 (50 Stat. 917, as amended; 16 U.S.C. 669(b)), as amended by this Act, for the wetlands conservation projects in the order of priority recommended by the Commission unless the Secretary determines, based on review of the factors in subsection (a) of this section, that any such projects should not receive such Federal funding or that the order of priority for such Federal funding of recommended projects should be modified.

[(e) REJECTION OR MODIFICATION OF RECOMMENDATIONS.—If the Secretary makes a finding under subsection (d) of this section with respect to any wetlands conservation project recommended by the Commission, the Secretary shall provide the Commission and the appropriate Committees with a justification, in writing, for such finding.]

(e) NOTIFICATION OF APPROPRIATE COMMITTEES.—The Secretary shall submit annually to the appropriate Committees a report including a list and description of the wetlands conservation projects approved by the Secretary for Federal funding under subsection (d) of this section in order of priority; the amounts and sources of Federal and non-Federal funding for such projects; a justification for the approval of such projects and the order of priority for funding such projects; and a list and description of the wetlands conservation projects which the Commission recommended, in order of priority that the Secretary approve for Federal funding.

SEC. 6. CONDITIONS RELATING TO WETLANDS CONSERVATION PROJECTS.

(a) PROJECTS IN THE UNITED STATES.—(1) Subject to the allocation requirements of section 8(a)(2) and the limitations on Federal contributions under section 8(c) of this Act, the Secretary shall assist in carrying out wetlands conservation projects in the United States, which have been approved under section 5(d), with the Federal funds made available under this Act and section 3(b) of the [Federal Aid in Wildlife Restoration Act (16 U.S.C. 669b(b)),] *Act of September 2, 1937 (50 Stat. 917, as amended; 16 U.S.C. 669b(b))*, as amended by this Act.

(2) Except as provided in paragraph (3), any lands or waters or interests therein acquired in whole or in part by the Secretary with the Federal funds made available under this Act and section 3(b) of the [Federal Aid in Wildlife Restoration Act (16 U.S.C. 669b(b)),] *Act of September 2, 1937 (50 Stat. 917, as amended; 16 U.S.C. 669b(b))*, as amended by this Act, to carry out wetlands conservation projects shall be included in the National Wildlife Refuge System.

[(3) The Secretary may convey without cost to a State, or to another public agency or private entity approved by a State, any real property interest acquired in whole or in part with the Federal funds made available under this Act and section 3(b) of the Federal Aid in Wildlife Restoration Act (16 U.S.C. 669b(b)), as amended by this Act, except that no real property interest acquired in whole or in part, or enhanced, managed, or restored with such Federal funds shall, without the approval of the Secretary, be converted for uses other than conservation of migratory birds, other fish and wildlife and the wetland ecosystems

upon which such species depend. The Secretary shall approve such conversion only if the Secretary finds that it is in accord with the Plan and only upon such conditions as the Secretary deems necessary to assure the substitution of comparable wetland ecosystems or other habitat, of at least equal fair market value, for migratory birds and other fish and wildlife species.]

(3) The Secretary may grant or otherwise provide the Federal funds made available under this Act and section 3(b) of the Act of September 2, 1937 (50 Stat. 917, as amended; 16 U.S.C. 669b(b)), as amended by this Act or convey any real property interest acquired in whole or in part with such funds without cost to a State or to another public agency or private entity approved by a State: Provided, That any grant recipient shall have been so identified in the project description accompanying the recommendation from the Commission and approved by the Secretary. The Secretary shall not convey any such interest to a private entity unless the approving State is committed to undertake management of the property being transferred to the private entity if such entity fails to manage the property in accordance with the objectives of this Act or voluntarily abandons it, and the deed or other instrument of transfer shall contain provisions for the transfer of title to the property to such State under such circumstances. Any real property interest conveyed pursuant to this paragraph shall be subject to such terms and conditions that will ensure that the interest will be administered for the long-term conservation and management of the wetland ecosystem and the fish and wildlife dependent thereon. The Secretary shall issue regulations for the implementation of this paragraph.

[(b) PROJECTS IN CANADA OR MEXICO.—Subject to the allocation requirements of section 8(a)(1) and the limitations on Federal contributions under section 8(b) of this Act, the Secretary shall grant or otherwise provide the Federal funds made available under this Act and section 3(b) of the Federal Aid in Wildlife Restoration Act (16 U.S.C. 669b(b)), as amended by this Act, to public agencies and private entities for purposes of assisting such entities and individuals in carrying out wetlands conservation projects in Canada or Mexico that have been approved under section 5(d). The Secretary may only grant or otherwise provide Federal funds if the grant or provision is subject to terms and conditions that will ensure that any real property interest acquired in whole or in part, or enhanced, managed, or restored with such Federal funds will be administered for the long-term conservation and management of fish and wildlife and in a manner that will provide for appropriate public access and use.]

(b) PROJECTS IN CANADA OR MEXICO.—Subject to the allocation requirements of section 8(a)(1) and the limitations on Federal contributions under section 8(b) of this Act, the Secretary shall grant or otherwise provide the Federal funds made available under this Act and section 3(b) of the Act of September 2, 1937 (50 Stat. 917, as amended; 16 U.S.C. 669b(b)), as amended by this Act, to public agencies and private entities for the purpose of assisting such entities and individuals in carrying out wetlands conservation projects in Canada or Mexico that have been approved under section 5(d): Provided, That the grant recipient shall have been so identified in the project description accompanying the recommendation from the Commission and approved by the Secretary. The Secretary may only grant or otherwise provide Federal funds if the grant is subject to the terms and conditions that will ensure that any real property interest acquired in whole or in part, or enhanced, managed, or restored with such Federal funds will be administered for the long-term conservation and management of such wetland ecosystem and the fish and wildlife dependent thereon. Real property and interests in real property acquired pursuant to this subsection shall not become part of the National Wildlife Refuge System.

SEC. 7. AMOUNTS AVAILABLE TO CARRY OUT THIS ACT.

(a) AID IN WILDLIFE RESTORATION.—(1) Section 3 of the Act [commonly known as the "Federal Aid in Wildlife Restoration Act" (16 U.S.C. 669b)] of September 2, 1937 (50 Stat. 917, as amended; 16 U.S.C. 669b), is amended—

(A) by inserting "(a)" before "An amount" in the first sentence thereof; and

(B) by adding at the end thereof the following:

"(b)(1) The Secretary of the [Interior] *Treasury* shall invest in interest-bearing obligations of the United States such portion of the fund as is not, in his judgment, required for meeting a current year's withdrawals. For purposes of such investment, the Secretary of the [Interior] *Treasury* may—

"(A) acquire obligations at the issue price and purchase outstanding obligations at the market price; and

"(B) sell obligations held in the fund at the market price.

"(2) The interest on obligations held in the fund—

"(A) shall be credited to the fund;

["(B) are not available for apportionment under this Act before December 31, 2000;

["(C) constitute the sums available for allocation by the Secretary under section 8 of the North American Wetlands Conservation Act; and

["(D) shall become available for apportionment upon satisfying the goals and objectives of the Plan.".]

"(B) constitute the sums available for allocation by the Secretary under section 8 of the North American Wetlands Conservation Act; and

"(C) shall become available for apportionment under this Act at the beginning of fiscal year 2006.".

(2) Section 4(a) of the [Federal Aid in Wildlife Restoration Act (16 U.S.C. 669c(a))] *Act of September 2, 1937 (50 Stat. 917, as amended; 16 U.S.C. 669c(a))*, is amended by inserting "(excluding interest accruing under section 3(b))" after "revenues" in the first sentence thereof.

(3) The amendments made by this subsection of this Act take effect October 1, 1989.

(b) MIGRATORY BIRD FINES, PENALTIES, FORFEITURES.—The sums received under section 6 of the Migratory Bird Treaty Act (16 U.S.C. 707) as penalties or fines, or from forfeitures of property are authorized to be appropriated to the Department of the Interior for purposes of allocation under section 8 of this Act. *This subsection shall not be construed to require the sale of instrumentalities.*

(c) AUTHORIZATION OF APPROPRIATIONS.—In addition to the amounts made available under subsections (a) and (b) of this section, there are authorized to be appropriated to the Department of the Interior for purposes of allocation under section 8 of this Act not to exceed $15,000,000 for each of fiscal years 1990, 1991, 1992, and 1993.

SEC. 8. ALLOCATION OF AMOUNTS AVAILABLE TO CARRY OUT THIS ACT.

(a) ALLOCATIONS.—Of the sums available to the Secretary for any fiscal year under this Act and section 3(b) of the Federal Aid in Wildlife Restoration Act (*50 Stat. 917, as amended;* 16 U.S.C. 669b(b)), as amended by this Act—

(1) such percentage of that sum (but at least 50 per centum and not more than 70 per centum thereof) as is considered appropriate by the Secretary, less such amount (but not more than 4 per centum of such percentage) considered necessary by the Secretary to defray the costs of administering this Act during such fiscal year, shall be allocated by the Secretary to carry out approved wetlands conservation projects in Canada and Mexico in accordance with section 6(b) of this Act; and

(2) the remainder of such sum after paragraph (1) is applied (but at least 30 per centum and not more than 50 per centum thereof) shall be allocated by the Secretary to carry out approved wetlands conservation projects in the United States in accordance with section 6(a) of this Act.

(b) FEDERAL CONTRIBUTION FOR PROJECTS IN CANADA OR MEXICO.—The Federal moneys allocated under subsection (a)(1) of this section for any fiscal year to carry out approved wetlands conservation projects in Canada and Mexico shall be used for the payment of not to exceed 75 per centum of the total United States contribution to the costs of such projects. The non-Federal share of the United States contribution to the costs of such projects may not be derived from Federal grant programs.

(c) FEDERAL CONTRIBUTION FOR PROJECTS IN THE UNITED STATES.—The Federal moneys allocated under subsection (a)(2) of this section for any fiscal year to carry out approved wetlands conservation projects in the United States shall be used for the payment of not to exceed 50 per centum of the total United States contribution to the costs of such projects, or for payment of 100 per centum of the costs of such projects located on Federal lands and waters, including the acquisition of inholdings within such lands and waters. The non-Federal share of the United States contribution to the costs of such projects may not be derived from Federal grant programs.

(d) PARTIAL PAYMENTS.—(1) The Secretary may from time to time make payments to carry out approved wetlands conservation projects as such projects progress, but such payments, including previous payments, if any, shall not be more than the Federal pro rata share of any such project in conformity with subsection (b) or (c) of this section.

(2) The Secretary may enter into agreements to make payments on an initial portion of an approved wetlands conservation project and to agree to make payments on the remaining Federal share of the costs of such project from subsequent allocations if and when they become available. The liability of the United States under such an agreement is contingent upon the continued availability of funds for the purposes of this Act.

SEC. 9. REFUGE REVENUE SHARING.

No payment of any money allocated under section 8(a)(2) may be made by the Secretary for any fiscal year to acquire lands and waters for inclusion in the National Wildlife Refuge System under this Act, except as provided under section 6(a)(3), unless there are appropriated under section 401(d) of the Act of June 15, 1935 (commonly referred to

as the "Refuge Revenue Sharing Act"; 16 U.S.C. 715s(d)), for such fiscal year an amount equal to the difference between the total amount of net receipts and the aggregate amount of payments required to be made for such fiscal year to counties.

SEC. 10. RESTORATION, MANAGEMENT, AND PROTECTION OF WETLANDS AND HABITAT FOR MIGRATORY BIRDS ON FEDERAL LANDS.

The head of each Federal agency responsible for acquiring, managing, or disposing of Federal lands and waters shall, to the extent consistent with the mission of such agency and existing statutory authorities, cooperate with the Director of the United States Fish and Wildlife Service to restore, protect, and enhance the wetland ecosystems and other habitats for migratory birds, fish, and wildlife within the lands and waters of each such agency. In the consideration of land disposal alternatives, the head of each such agency shall give priority to the transfer of real property interests for conservation purposes that would contribute to furtherance of the purposes of this Act and the goals of the Plan *and the Agreement.*

SEC. 11. REPORTS TO CONGRESS.

(a) ASSESSMENT.—The Secretary shall report to the appropriate Committees every two years with an assessment of the following:

(1) the estimated number of acres of wetlands and habitat for waterfowl and other migratory birds that were restored, protected, or enhanced during such two-year period by Federal, State, and local agencies and private entities in the United States, Canada, and Mexico; and

(2) trends in the population size and distribution of North American migratory birds.

(b) PROJECT STATUS AND COSTS.—The Secretary shall report annually to the appropriate Committees concerning the status of wetlands conservation projects, including an accounting of Federal, State, and private expenditures and expenditures by Canadian and Mexican sources to carry out these projects.

SEC. 12. REVISIONS TO THE PLAN.

The Secretary shall, in 1991 and at five-year intervals thereafter, undertake with the appropriate officials in Canada [and Mexico] to revise the goals and other elements of the Plan in accordance with the information required under section 11 and with the other provisions of this Act. *The Secretary shall invite and encourage the appropriate officials in Mexico to participate in any revisions of the Plan.*

SEC. 13. RELATIONSHIP TO OTHER AUTHORITIES.

(a) ACQUISITION OF LANDS AND WATERS.—Nothing in this Act affects, alters, or modifies the Secretary's authorities, responsibilities, obligations, or powers to acquire lands or waters or interests therein under any other statute.

(b) MITIGATION.—The Federal funds made available under this Act and section 3(b) of the Federal Aid in Wildlife Restoration Act (*50 Stat. 917, as amended;* 16 U.S.C. 669b(b)), as amended by this Act, may not be used for fish and wildlife mitigation purposes under the Fish and Wildlife Coordination Act (16 U.S.C. 661 et seq.) or the Water Resources Development Act of 1986, Public Law 99-662 (1986), 100 Stat. 4235.

The ACTING PRESIDENT pro tempore. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. MITCHELL. Mr. President, this legislation initiates a major new public and private effort to conserve North American wetlands and waterfowl and the other migratory birds and fish and wildlife that depend on these habitats.

The wetlands of this continent are libraries of nature which contain volumes of priceless genetic information. They are North America's most biologically productive areas, and roughly a third of the continent's endangered species of animals are dependent on them.

And like the tropical forests of Central and South America, they have been subjected to much destruction.

From 1955 to 1975, 9 million acres of wetlands in the 48 contiguous States were drained, filled, and cleared. Less than half of the original 200 million acres remain, and the destruction continues today at a rate of half a million acres per year—an area 12 times the size of the District of Columbia.

Total wetlands loss in the Canadian prairie provinces of Alberta, Saskatchewan, and Manitoba is estimated to be 40 percent of the original wetlands acreage.

The destruction of wetlands in North America, where many migratory bird species breed, spells disaster for these species just as surely as the destruction of forests in Central and tropical South America, where they winter.

The average number of North American ducks in recent years has been lower than any comparable period on record.

There have been fewer black ducks, a species prized by people in Maine and elsewhere in the Eastern United States and Canada, than at any time during the previous three decades.

Of the 30 species of migratory nongame birds that are currently of management concern to the U.S. Fish and Wildlife Service because of their uncertain status, nearly one half are dependent upon coastal and freshwater wetlands.

Thirteen of some of our most abundant and widespread songbirds, like the American goldfinch and the eastern meadowlark, have declined at an average rate of nearly 3 percent per year over the past 20 years.

Wetlands provide essential and significant habitat for fish, shellfish, and other wildlife of commercial, recreational, scientific, and aesthetic value.

Wetlands provide substantial flood and storm control values and can obviate the need for expensive man-made control measures. They make a significant contribution to water quality by recharging ground water, filtering surface runoff, and treating waste, and they provide natural areas important for recreational and aesthetic purposes.

In 1936, at a time of severe crisis in the Nation's natural resources, the great conservationist Ding Darling bluntly warned that "whatever we may have been doing is not wildlife conservation, since we continue to have less instead of more."

Unfortunately, the same could be said today with respect to the job we have been doing in conserving the continent's wetlands and migratory birds.

We have got to do better.

Enactment of the North American Wetlands Conservation Act will help us reverse this steady downward trend in wetlands area and migratory bird numbers.

The legislation encourages partnerships among public agencies and private interests to protect, enhance, restore, and manage wetlands ecosystems and other habitats for migratory birds and other fish and wildlife in North America and to maintain or increase migratory bird populations consistent with the goals of the North American waterfowl management plan and the international obligations of the migratory bird treaties and other agreements with Canada, Mexico, and other countries.

One of the principal goals of this legislation will be to begin a long-term commitment to work with Canada and Mexico in implementation of the North American waterfowl management plan.

According to the U.S. Secretary of the Interior and the Canadian Minister of the Environment, the plan is "the best opportunity we will ever have" to halt the decline of many species of ducks, geese, and other migratory birds.

The goal, which it is hoped will be achieved within 15 years, is to restore the continent's waterfowl not to the numbers that existed in the 1950's but only to the lower levels of a decade ago.

The extent of habitat destruction has been so great that even achieving this modest target will require an unprecedented cooperative strategy to conserve nearly 2 million acres of wetland ecosystems in the United States and almost 4 million acres of these habitats in Canada.

The key to the success of this understanding will be the participation not only of the national governments of our countries, but also the involvement of State, provincial, territorial, and local governments, and private individuals, conservation organizations, and businesses.

The North American wetlands Conservation Act will provide Federal funding to encourage these public and private partnerships for wetlands conservation projects in Canada and Mexico as well as in the United States.

To achieve this objective, the bill establishes a structure to carry out the

plan; requires the plan to be revised to broaden its focus and the membership of those involved in its implementation; and commits the United States to providing the Federal matching funds essential to encouraging public and private partnerships for wetlands conservation projects in Canada and Mexico.

As approved by the Environment and Public Works Committee, the bill establishes a nine-member North America Wetlands Conservation Commission to recommend wetlands conservation projects to the Secretary of the Interior for Federal funding based on criteria provided under the legislation.

The reported bill authorizes the Secretary to match federally appropriated funds with non-Federal funds for these projects in Canada, Mexico, and the United States. Funding is provided from the interest through short-term investment of any Federal excise tax revenues in the Pittman-Robertson fund that are not needed to meet a current year's withdrawals—from $4 million to $8 million annually; from authorization to appropriate the penalties or fines, or funds from forfeitures of property under the Migratory Bird Treaty Act—about $1 million annually; and from authorization or appropriate an additional $15 million annually.

The bill prohibits the Secretary from acquiring lands and waters for inclusion in the National Wildlife Refuge System with the funds under the legislation unless full funding is provided under the Refuge Revenue Sharing Act for payments in lieu of taxes to counties with U.S. Fish and Wildlife Service lands.

Under the committee-approved bill, Federal matching funds are made available for acquisition, restoration, management, or enhancement of wetlands. Acquisition of wetlands includes purchase of easements and must be administered for the long-term conservation of the wetlands and fish and wildlife. Restoration, management, and enhancement must be conducted on areas that are administered for the long-term conservation of wetlands and fish and wildlife.

Restoration projects are those that rehabilitate a naturally occurring but degraded wetland ecosystem. Enhancement projects are those that modify a wetland ecosystem to improve its value for migratory birds and other fish and wildlife.

It is not intended that approval of Federal funds for wetlands conservation projects under this legislation be interpreted as exempting or requiring favorable consideration of such projects under section 404 of the Clean Water Act of any other Federal or State requirements or constraints related to the alteration of wetlands. Nor is this legislation intended to encourage the modification of existing, naturally functioning wetlands to provide narrow benefits, such as waterfowl production, if such benefits are achieved at the expense of broader benefits for conservation of fisheries and wildlife and wetland ecosystems.

In the acquisition of lands authorized by this legislation, the Fish and Wildlife Service should continue its present land acquisition policy of obtaining lands or waters or interests therein from willing sellers or donors.

Where possible, wetlands conservation projects should preserve habitat in perpetuity for fish and wildlife conservation. Easements to conserve wetland ecosystems for 25 years or more, while less desirable than perpetual easements, also would be consistent with the legislation's requirement for long-term conservation. In some cases, purchase of easements to conserve habitat for less than 25 years, or even for 10 years or less, may be appropriate if the purchase is likely to result in the landowner agreeing to a longer term conservation agreement at the expiration of the initial easement.

Wetlands conservation projects should allow for public access to the extent that allowing such access does not interfere with the acquisition, restoration, management, or enhancement of the wetland ecosystems and other habitat, and to the extent that allowing such access is compatible with the long-term conservation of the wetlands ecosystem, other habitat and the fish and wildlife dcependent thereon.

In some cases, habitat conservation may preclude public access. When access is provided to land acquired in fee using Federal funds, it should not be discriminatory based on membership to a club or otherwise. However, limitations on the number of people permitted access or the time of year at which access is permitted may be appropriate.

The term "migratory birds" as used in the legislation means all wild birds native to North America that are in an unconfined state and that are protected under the Migratory Bird Treaty Act. The definition of this term in the bill states specifically that it includes species listed under the Endangered Species Act and species defined as nongame under the Fish and Wildlife Conservation Act of 1980 in order to emphasize that the term "migratory birds" as used in the legislation is not intended to be a synonym for waterfowl.

Recommendations on, and approval of, funding for wetlands conservation projects is to be based on: First, the extent to which any project fulfills the purposes of the Act, the plan, or the agreement; second, the availability of sufficient non-Federal money; third, the extent to which any project represents a public-private partnership; fourth, the consistency of any project in the United States with the national wetlands priority conservation plan developed under the Emergency Wetlands Resources Act; fifth, the extent to which any project would aid the conservation of migratory nongame birds, other fish and wildlife and species that are listed, or are candidates to be listed, as threatened and endangered under the Endangered Species Act; sixth, the recommendations of any partnerships among public agencies and private entities in Canada, Mexico, or the United States, which are participating actively in carrying out any projects under the Act or the plan; and seventh, the substantiality of the character and design of any project.

It is intended that wetlands conservation projects funded under this legislation provide the broadcast benefits to the conservation of such ecosystems and the fish and wildlife dependent thereon. Therefore, priority should be given to funding those projects that best satisfy all seven criteria. Projects that rank highly with respect to one or two of the criterion but only minimally satisfy the other criteria should receive lower priority for funding under this legislation. Projects to convert a valuable wetland ecosystem that provides broad benefits for fisheries and wildlife and the public to a type of wetland area that provides narrow benefits for relatively few species and a small segment of the public should receive lower priority for funding under this Act than projects that protect existing wetland ecosystems or projects that restore or enhance degraded wetlands ecosystems.

A principal purpose of this legislation is to ensure that the Federal Government, fulfills its commitment under the North American waterfowl management plan to assist in the conservation of wetland ecosysterms in Canada. Therefore, under section 8(a) of the bill, up to 70 percent, but not less than 50 percent, of each year's funds must be allocated by the Secretary to carry out approved wetlands conservation projects in Canada and Mexico. The range in the percentage of funds that must be allocated to projects in Canada and Mexico is intended to provide some flexibility in a given year with respect to whether projects are funded in the United States or in Canada and Mexico. However, consistent with the plan's recommendations that the United States provide 75 percent of the amount needed to improve waterfowl habitat on 3.6 million acres in prairie Canada, it is intended that amounts allocated for projects outside the United States should approach 70 percent over time.

Up to 4 percent of each fiscal year's funds may be used for administrative expenses. To the extent that these

funds are not needed for this purposes, the Secretary of the Interior should make them available to conduct, in conjunction with the States and other entities, evaluations of the efficacy of the wetlands conservation projects carried out under this legislation with respect to their effect on the production and survival of migratory birds and other fish and wildlife.

Another key purpose of this legislation is to encourge revisions to the North American waterfowl managment plan in a manner consistent with the provisons of this legislation, in particular to broaden the focus of that plan with respect to conservation of wetlands ecosystems and the other migratory birds and other fish and wildlife dependent thereon.

Section 12 of the bill, therefore, requires the Secretary, in 1991 and every 5 years thereafter, with the appropriate officials in Canada, to revise the goals and other elements of the plan in accordance with the information required under section 11 and with the other provisions of the legislation. The provisons of this legislation apply to Mexico in the same fashion as they apply to Canada even though the plan does not include Mexico.

The Secretary is required to invite and encourage the appropriate officials in Mexico to participate in any revisions to the plan. It is expected, therefore, that the Secretary will do everything possible to encourage Mexican participation in the plan when it is revised. If such efforts by the Secretary prove unsuccessful, then it is expected that the Secretary will reach a separate agreement with Mexico that will enable this legislation to be implemented fully with respect to that country.

On November 2, Interior Secretary Lujan wrote the distinguished chairman of the Environment and Public Works Committee, Senator BURDICK, to express "the administration's strong support for the concept of this bill" and to emphasize that "the President has expressed a strong desire to sign this legislation this year."

I welcome the President's interest in signing this measure.

I hope that my colleagues will join me and the bill's 17 bipartisan cosponsors in agreeing to this legislation so that the President will have that opportunity.

Mr. BURDICK. Mr. President, the majority leader has been in the forefront of efforts to protect North American waterfowl and waterfowl habitat. He has worked very hard, along with Senators BAUCUS and CHAFEE, in developing this legislation.

It is a good bill that will help rebuild waterfowl numbers. It takes a new, more flexible approach to wetlands conservation that I think will be more effective than the way we do things now.

The bill encourages cooperative efforts between the Federal Government on the one hand and State and local governments and private groups on the other. As a result, it is likely that much of the habitat purchased under this bill will end up in State, local or private ownership. Not only that, the bill gives equal emphasis to restoration and enhancement projects to conserve wetlands without further acquisition.

Finally, the bill ensures that no new Federal lands will be purchased under its provisions unless the Government provides 100 percent of the payments in lieu of taxes owed to counties with U.S. Fish and Wildlife Service lands. This will not solve the in lieu of tax payment problem, but it guarantees that we won't make it any worse.

Section 9 of the bill prohibits the Secretary from acquiring lands and waters for inclusion in the National Wildlife Refuge System with the funds under the act unless full funding is provided under the Refuge Revenue Sharing Act for payments in lieu of taxes to counties with U.S. Fish and Wildlife Service lands.

Under the Refuge Revenue Sharing Act, the U.S. Fish and Wildlife Service makes payments to counties in which Service lands are located, based on their fair market value, in order to compensate these local jurisdictions for the loss of tax revenues that results from Federal acquisition of private lands. Refuge revenue sharing funding is derived partially from net revenues on the sale of products—such as timber, oil and gas, and minerals—from refuge lands. If net revenues are insufficient to provide full payment to counties, then under the Refuge Revenue Sharing Act the balance is to be made up by direct appropriation.

Unfortunately, since 1980 the President has not requested and Congress has not appropriated sufficient funds to provide 100 percent of the entitlement under the act. The decline in the percent of entitlement paid to counties over the past decade has been dramatic because, while revenues and appropriations have remained fairly constant, the value and amount of Service lands have increased substantially.

The large and growing shortfall in the National Wildlife Refuge Fund is an increasingly serious problem. Some counties in which refuges are located are losing a substantial amount of revenue for support of schools and other services. This lost revenue has an especially negative impact in States where the amount and value of refuge lands are significant.

In addition, the deficit also harms the National Wildlife Refuge System as a whole by causing some States and counties to oppose having lands withdrawn from their tax rolls for conservation purposes. In the eyes of local governments, the Federal Government has broken the promise it made to counties in which refuge lands are located. Therefore, the bill ensures that the legislation does not aggravate the in lieu of tax payment shortfall. The provision also is intended to call attention to and increase pressure to secure full refuge revenue sharing payments so that our promise to counties is fulfilled and our National Wildlife Refuge System is protected and enhanced.

In addition, as a member of the Appropriations Committee I offered an amendment earlier this year to increase the amount paid to counties with National Wildlife Refuge lands. That amendment was supported by the distinguished chairman of the Appropriations Committee, Senator BYRD, and other members of the committee. As a result, there will be sufficient funding to provide between 75 percent and 80 percent of the full entitlement to counties for this fiscal year, rather than the 60 percent of entitlement under the President's budget.

Mr. BAUCUS. Mr. President, I am pleased today to join the majority leader, Senator MITCHELL, in supporting Senate passage of the North American Wetlands Conservation Act.

This legislation would commit the United States to the protection of migratory bird habitat—not just in this country—but throughout this continent.

It would provide—for the first time—the structure and funding needed to carry out the North American waterfowl management plan.

The plan, signed in 1986 by the Minister of Environment for Canada and the Secretary of the Interior for the United States, calls for saving and restoring 5.5 million acres of waterfowl habitat by the turn of the century.

Ducks, geese, and swans are the most prominent and economically important group of migratory birds in North America, generating a direct expenditure in excess of several billions of dollars annually.

Each year in Montana, more than 20,000 people spend tens of millions of dollars hunting waterfowl. Nearly three Montanans out of every five enjoy watching and photographing waterfowl and other wildlife species.

Unfortunately, the recreation and jobs provided by waterfowl are in serious jeopardy.

The average number of ducks in North America in recent years has been the lowest ever recorded. There are half as many breeding ducks now as there were in the 1970's.

The alarming decline in our continent's waterfowl is not a mystery. It is the inevitable result of wetlands destruction.

Montana, for instance, has lost roughly 20 percent of its wetlands in just the past 20 years.

It is clear that existing public and private wetland protection efforts have been inadequate.

Successful rebuilding of waterfowl numbers, according to the North American waterfowl management plan, will require the restoration, protection, and improvement of almost 6 million acres of habitat in the United States and Canada by the turn of the century.

The plan sets forth an unprecedented cooperative strategy to protect this habitat and restore waterfowl numbers by enlising the support of the national governments of the United States and Canada; the State, provincial, territorial, and local governments; and private individuals, conservation organizations, and businesses.

Unfortunately, the plan fails to back up its ambitious goals with any commitment for funding. Indeed, the plan fails to lay out any strategy for implementation.

The North American Wetlands Conservation Act under consideration today will correct that shortcoming and ensure that there is a long-term effort to achieve the plan's goals.

The Act provides a structure and funding to encourage partnerships among public agencies and private interests to protect, enhance, restore, and manage habitats for migratory birds and other fish and wildlife in North America.

This legislation recognizes that the long-term conservation of migratory birds and habitat for these species will require the coordinated action and support of governments at all levels, private organizations, landowners, and other citizens.

The North American Wetlands Conservation Act, under consideration here today, would use public-private partnership to protect habitat without setting up a major new Federal program to buy private lands.

Instead, the Act would allow a more flexible approach to support not only acquisition but also management and restoration of wetlands. And it would encourage these efforts to be undertaken by the States and private organizations in addition to the U.S. Fish and Wildlife Service.

I hope my colleagues will join Senator MITCHELL and I in supporting this legislation and starting us on the road to protecting the habitats needed to bring waterfowl populations back to the level we once enjoyed.

President Bush has said that the thrust of the legislation is sound and that he would like to sign a bill this year. I join the Nation's waterfowl hunters and bird watchers in looking forward to providing him with that opportunity.

Mr. CHAFEE. Mr. President, I strongly support S. 804, the wetlands legislation before the Senate.

The Environment and Public Works Committee has worked with the administration, the States, and private conservation groups to make this legislation an effective means of protecting wetland habitats in North America. The cooperative wetlands conservation projects implemented through this Act will provide long-term benefits to migratory waterfowl and other species of fish and wildlife which depend on these habitats.

I would like to make reference to my previous remarks on this legislation as they present a more in-depth description of S. 804. My statement is printed in the November 1, 1989, CONGRESSIONAL RECORD.

I am pleased to join Senators MITCHELL, BAUCUS, and others in sponsoring S. 804. I applaud the majority leader and the chairman of the Subcommittee on Environmental Protection for their hard work, and urge my colleagues to join us in supporting this important environmental bill.

Mr. GRASSLEY. Mr. President, I rise to support S. 804—The North American Wetlands Conservation Act—a bill that seeks to conserve North American wetland ecosystems as well as the waterfowl, migratory birds, fish, and wildlife that depend upon such habitat.

Mr. President, many of my fellow colleagues have spoken most eloquently on the need for legislation such as this.

The protection of migratory birds should be an ongoing concern of all Americans. This body is reflecting that concern today by acting on S. 804, and I agree wholeheartedly with this action.

I support this legislation because it addresses wetland conservation in the way that makes the most sense—through acquisition and good management by all levels of government and private organizations.

The final report of the National Wetlands Policy Forum spoke to this point when it said "The acquisition of wetlands, either by government or by private groups, is usually the most secure method of ensuring their continued protection."

I agree, Mr. President.

My State of Iowa has a marvelous network of county conservation commissions that acquire and manage wetlands, greenbelts, prairie preserves, and other ecosystems that contribute to the preservation of a wide array of aquatic, avian, and terrestrial wildlife.

These commissions work closely with the State Department of Natural Resources every step of the way.

As I understand S. 804, the State and county entities in Iowa will participate, not only with our national Government, but with those of Canada and Mexico as well as private nonprofit groups across the North American Continent.

Mr. President, this makes sense.

It makes sense because it creates a fair and open program of wetland acquisition.

I say fair and open, Mr. President, because it is important that this Nation's precious ecosystems be preserved through open negotiation and through willing and just compensation.

There is no place in wetland preservation for punitive action or forced mitigation of cropland to wetland, either by bureaucratic interpretation or overzealous executive action.

Mr. President, I have seen this latter approach to so-called wetland preservation.

I have seen it attempted under the guise of the swampbuster provisions of the Food Security Act of 1985.

This sort of wrong-headed and prejudiced environmentalism was never the intent of Congress nor of the Secretary of Agriculture when the legislation was written and the regulations promulgated.

Mr. President, farmers in my State have seen the consulting role of the Fish and Wildlife Service become a veritable veto power in determinations and actions to carry out the wetland provisions in title 12 of the 1985 Food Security Act.

This misuse of a supporting and advisory role, in an overt attempt to convert cropland to wetland, has been painful and counterproductive for many farm owners and tenants in my State of Iowa.

Mr. President, my experience with this miscarriage of congressional intent has convinced me that clear language in a law is not always enough, when a determined and dedicated bureaucracy wishes to acquire new turf and power—most especially when this dedication can be cloaked in an aura of commitment to the preservation of wetlands and wildlife.

I see this legislation we have before us as unencumbered with penalties or punitive action.

It moves to unite public and private action in a funded and innovative partnership, the goal of which is to restore disappearing wetlands and declining waterfowl populations.

Mr. President, I heartily endorse these goals and I wish to acknowledge the generous attention the majority leader and his committee staff have granted me in excising some language in this bill that was bothersome to me.

The particular section the majority leader agreed to remove from this legislation would have granted priority status to the U.S. Fish and Wildlife Service in the transfer of real property interests held by each Federal agency.

This would have included any farmland acquired by the Department of Agriculture, including those acquired

through foreclosure or defaulted loans.

Mr. President, this would have been in direct conflict with section 610 of the Agriculture Credit Act of 1987, which allows prior owners, operators, and other family-sized farm interests the opportunity to acquire those lands administered by the Secretary of Agriculture.

I also was concerned that the majority leader's original language would have unduly restricted the Secretary of Agriculture's authority under section 616 of the Agricultural Credit Act.

Section 616 deals with the transfer of property, of marginal value for agricultural production, on which the borrower rights granted under section 610 had expired.

I ask unanimous consent that the language from the Agriculture Credit Act of 1987 that pertains to the transfer of property be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SEC. 610. DISPOSITION AND LEASING OF FARMLAND.

(a) CLASSIFICATION OF PROPERTY—Section 335(c) (7 U.S.C. 1985(c)) is amended—

(1) inserting "(1)" after the subsection designation;

(2) by inserting after the first sentence the following new sentence: "The County Committee shall classify or reclassify real property (including real property administered by the Secretary on the date of the enactment of this sentence) that is farmland, as being suitable for farming operation for such disposition unless the property, including property subdivided in accordance with subsection (e)(5), cannot be used to meet any of the purposes of section 303 (including being used as a start-up or add-on parcel of farmland)."; and

(3) by adding at the end thereof the following new paragraph:

"(2) Notwithstanding any other provision of law, the Secretary shall sell suitable farmland administered under this subtitle to operators (as of the time immediately after such contract for sale or lease is entered into) of not larger than family sized farms, as determined by the county committee. In selling such land, the county committee shall—

"(A) grant a priority to persons eligible for loans under subtitle A, including individuals approved for, but who, as of the date of the enactment of this paragraph, have not yet received, such loans;

"(B) offer suitable land at a price not greater than that which reflects the appraised market value of such land;

"(C) select from among qualified applicants the applicant who has the greatest need for farm income and best meets the criteria for eligibility to receive loans under subtitle A; and

"(D) publish or caused to be published three consecutive weekly announcements at least twice annually of the availability of such farmland, in at least one newspaper that is widely circulated in the county in which the land is located until the property is sold.".

(b) DISPOSITION AND LEASING.—Section 335(e) (7 U.S.C. 1985(e)) is amended—

(1) by striking out paragraph (1) and inserting in lieu thereof the following new paragraph:

"(1)(A)(i) During the 180-day period beginning on the date of acquisition, or during the applicable period under State law, the Secretary shall allow the borrower from whom the Secretary acquired real property used to secure any loan made to the borrower under this title (hereinafter referred to in this paragraph as the 'borrower-owner') to purchase or lease such property.

"(ii) The period for the purchase or lease of real property described under clause (i), by a person described in clauses (i) or (ii) of subparagraph (C), shall expire 190 days after the date of acquisition, or after the applicable period under State law.

"(iii) The rights regarding the purchase or lease of real property provided by this paragraph and accorded a person descibed in subparagraph (C) may be freely and knowingly waived by such person.

"(B) Any purchase or lease under subparagraph (A) shall be on such terms and conditions as are established in regulations promulgated by the Secretary.

"(C) The Secretary shall give preference in the sale or lease, with option to purchase, of property that has been foreclosed, purchased, redeemed, or otherwise acquired by the Secretary to persons in the following order:

"(i) The immediate previous borrower-owner of the acquired property.

"(ii) If actively engaged in farming—

"(I) the spouse or child of the previous borrower-owner; or

"(II) a stockholder in the corporation, if the borrower-owner is a corporation held exclusively by members of the same family.

"(iii) The immediate previous family size farm operator of such acquired property.

"(iv) Operators (as of the time immediately after such sale or lease is entered into) of not larger than family-size farms.

Mr. GRASSLEY. Mr. President, to correct these matters, I submitted the following amendment. I ask unanimous consent that the text of my amendment be printed in the RECORD.

There being no objection, the text was ordered to be printed in the RECORD as follows:

On page 25, line 19, strike the period and insert ", when such a transfer can be made without prejudice to a right of first refusal or right to occupy under section 335 or 352 of the Consolidated Farm and Rural Development Act (7 U.S.C. 1985, 2000) or similar right under Federal or State law that a prior owner of land may have.".

Mr. GRASSLEY. Mr. President, after consultation with the majority leader regarding the merits of my amendment, we agreed on a more suitable course to correct this problem.

The majority leader has graciously agreed to withdraw the language within section 10 that places a priority on the transfer of real property interests to the Director of the Fish and Wildlife Service.

For all of his efforts, I want to thank the majority leader for his cooperation and his willingness to clarify these inconsistencies.

It will help prevent the sort of bureaucratic power grabs that have materialized in the administration of the swampbuster provisions of the 1985 Food Security Act.

S. 804 is a bill with worthy goals and I look forward to seeing it achieve the goals it promises.

AMENDMENT NO. 1139

Mr. CRANSTON. Mr. President, on behalf of Mr. MITCHELL I send an amendment to the desk and ask for its immediate consideration.

The ACTING PRESIDENT pro tempore. The clerk will report.

The legislative clerk read as follows:

The Senator from California (Mr. CRANSTON) for Mr. MITCHELL, proposes an amendment numbered 1139.

Mr. CRANSTON. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

1. On page 4, line 2, immediately after "Conventions" insert "and the Convention on Nature Protection and Wildlife Preservation in the Western Hemisphere".

2. On page 4, line 16, strike "ducks, geese, and other".

3. On page 4, line 21, strike the period and insert in lieu thereof "; and".

4. On page 4, after line 21 insert the following new paragraph: "(15) the treaty obligations of the United States under the Convention on Wetlands of International Importance especially as Waterfowl Habitat requires promotion of conservation and wise use of wetlands.".

5. On page 4, line 23, strike "private" and insert in lieu thereof "other".

6. On page 6, line 25, strike the period and insert ", which shall be construed to mean any department, or any division of any department of another name, of a State that is empowered under its laws to exercise the functions ordinarily exercised by a State fish and wildlife agency.".

7. On page 7, line 4, strike "from willing sellers or donors" and insert in lieu thereof ", including water rights,".

8. On page 7, line 11, strike "and".

9. On page 7, line 19, strike the period and insert in lieu thereof "; and".

10. On page 7, after line 19, insert the following new subparagraph:

"(C) in the case of projects undertaken in Mexico, includes technical training and development of infrastructure necessary for the conservation and management of wetlands and studies on the sustainable use of wetland resources.".

11. On page 7, line 22, strike "COMMISSION" and insert in lieu thereof "COUNCIL".

12. On page 7, line 23, strike "COMMISSIONERS" and insert in lieu thereof "COUNCIL MEMBERSHIP".

13. On page 7, line 24, strike "Commission" and insert in lieu thereof "Council (hereinafter in this Act referred to as the "Council")".

14. On page 8, line 1, strike "Commissioners" and insert in lieu thereof "members".

15. On page 8, strike the text on line 2 and insert in lieu thereof "compensation as members of the Council. Of the Council members—".

16. On page 8, line 13, insert a semicolon after "agency" and strike all that follows through line 18.

17. On page 9, lines 1 and 2, strike "Commissioner" and insert in lieu thereof "member of the Council".

18. On page 9, line 4, strike "Commissioner" and insert in lieu thereof "Council member".

19. On page 9, strike the text on line 10 and insert in lieu thereof "a member from any meeting of the Council.".

20. On page 9, lines 12 and 13, strike "Commissioners" and insert in lieu thereof "a member of the Council".

21. On page 9, line 14, strike "six" and insert in lieu thereof "three".

22. On page 9, line 15, strike "Commissioners" and insert in lieu thereof "Council members".

23. On page 9, line 18, strike "three years" and insert in lieu thereof "one year".

24. On page 9, line 19, strike "four" and insert "two" and strike all that follows after the comma through line 21 and insert in lieu thereof "and two shall be appointed for a term of three years.".

25. On page 9, lines 22, strike "Commissioners" and insert in lieu thereof "Council members".

26. On page 9, line 25, strike "two years" and insert in lieu thereof "one year", and strike "four" and insert in lieu thereof "two".

27. On page 10, line 1, strike "six" and insert in lieu thereof "three".

28. On page 10, lines 3 and 4, strike "Commissioners" and insert in lieu thereof "members of the Council".

29. On page 10, line 9, strike "COMMISSION" and insert in lieu thereof "COUNCIL".

30. On page 10, line 23, strike "Native" and insert in lieu thereof "nonprofit charitable organizations and native".

31. On page 11, strike the text on line 4 and insert in lieu thereof "Council from its members for a three-year term, except that the first elected chairman may serve a term of less than three years".

32. On page 11, lines 6, 8, and 11, strike "Commission" each place it appears and insert in lieu thereof in each case "Council".

33. On page 11, lines 9 and 10, strike "Non-executive sessions of Commission" and insert in lieu thereof "Council".

34. On page 11, line 14, strike "from the Commission and fill that vacancy".

35. On page 11, strike subsection (g) on lines 16 through 22 and redesignate the following subsection accordingly.

36. On page 11, lines 24 and 25, strike "designate an employee of the Service" and insert in lieu thereof "appoint an individual who shall serve at the pleasure of the Director and".

37. On page 12, lines 4 and 5, strike "administration of this Act" and insert in lieu thereof "facilitating consideration of wetlands conservation projects by the Council and otherwise assisting the Council in carrying out its responsiblities under this Act".

38. On page 12, line 10, strike "COMMISSION" and insert in lieu thereof "COUNCIL" and on lines 10 and 11, strike "Commission" and insert in lieu thereof "Council".

39. On page 12, line 12, strike "Secretary" and insert in lieu thereof "Migratory Bird Conservation Commission".

40. On page 12, after line 12, insert the following paragraph: "(1) the extent to which the wetlands conservation project fulfills the purposes of this Act, the Plan or the Agreement;" and re-number the subsequent paragraphs accordingly.

41. On page 12, line 16, strike "sections 8(b) and 8(c)" and insert in lieu thereof "section 8(b)".

42. On page 13, strike paragraph (4) on lines 1 through 3 and re-number the subsequent paragraphs accordingly.

43. On page 13, line 18, strike "SECRETARY" and insert in lieu thereof "migratory bird conservation commission".

44. On page 13, line 19, strike "Commission" and insert in lieu thereof "Council", and strike "Secretary" and insert in lieu thereof "Migratory Bird Conservation Commission".

45. On page 13, line 20, strike "March 30" and insert in lieu thereof "January 1".

46. On page 13, line 22, strike "Commission" and insert in lieu thereof "Council".

47. On page 13, line 24, strike "Secretary" and insert in lieu thereof "Migratory Bird Conservation Commission".

48. On page 14, line 2, strike "50 Stat. 917, as amended;".

49. On page 44, line 4, strike "COMMISSION" and "Commission" and insert in lieu thereof "COUNCIL" and "Council", respectively.

50. On page 14, line 8, strike "Commission" and insert in lieu thereof "Council".

51. On page 14, line 11, strike "Commission" and insert in lieu thereof "Council".

52. On page 14, after line 13, insert the following new subsections:

"(d) COUNCIL REPRESENTATION ON MIGRATORY BIRD CONSERVATION COMMISSION.—The Chairman of the Council shall select one Council member of United States citizenship to serve with the Chairman as ex officio members of the Migratory Bird Conservation Commission for the purposes of considering and voting upon wetlands conservation projects recommended by the Council.

"(e) APPROVAL OF COUNCIL RECOMMENDATIONS BY THE MIGRATORY BIRD CONSERVATION COMMISSION.—The Migratory Bird Conservation Commission, along with the two members of the Council referred to in subsection (d) of this section, shall approve, reject or reorder the priority of any wetlands conservation projects recommended by the Council based on, to the greatest extent practicable, the criteria of subsection (a) of this section. If the Migratory Bird Conservation Commission approves any wetlands conservation project, Federal funding shall be made available under this Act and section 3(b) of the Act of September 2, 1937 (16 U.S.C. 669b(b)), as amended by this Act. If the Migratory Bird Conservation Commission rejects or re-orders the priority of any wetlands conservation project recommended by the Council, the Migratory Bird Conservation Commission shall provide the Council and the appropriate Committees with a written statement explaining its rationale for the rejection or the priority modification.".

53. On page 14, strike the text on lines 23 through 25 and on page 15, strike the text on lines 1 through 9.

54. On page 15, line 16, strike "(e)" and insert in lieu thereof "(f)".

55. On page 15, line 17, strike "Secretary" and insert in lieu thereof "Migratory Bird Conservation Commission".

56. On page 15, line 19, strike "Secretary" and insert in lieu thereof "Migratory Bird Conservation Commission".

57. On page 15, line 24, immediately after the semicolon, strike "and".

58. On page 15, line 25, strike "Commission" and insert in lieu thereof "Council".

59. On page 16, line 1, strike "Secretary" and insert in lieu thereof "Migratory Bird Conservation Commission".

60. On page 16, line 2, strike the period after "funding" and insert in lieu thereof "; and a justification for any rejection or re-ordering of the priority of wetlands conservation projects recommended by the Council that was based on factors other than the criteria of section 5(a) of this Act.".

61. On page 16, line 7, strike "section 3(c)" and insert in lieu thereof "section 8(b)".

62. On page 16, line 10, strike "under section 5(d) and insert in lieu thereof "by the Migratory Bird Conservation Commission".

63. On page 16, line 13 and lines 19 and 20, strike "50 Stat. 917, as amended;" each place it appears.

64. On page 17, line 15, strike "The" and insert in lieu thereof "In lieu of including in the National Wildlife Refuge System any lands or waters or interests therein acquired under this Act, the", and after "may" insert, "with the concurrence of the Migratory Bird Conservation Commission,".

65. On page 17, line 17, strike "50 Stat. 917, as amended;".

66. On page 17, line 21, strike "private entity approved by a State" and insert in lieu thereof "other entity upon a finding by the Secretary that the real property interests should not be included in the National Wildlife Refuge System".

67. On page 17, lines 23 and 24, strike "Commission" and insert in lieu thereof "Council" and strike "Secretary" and insert in lieu thereof "Migratory Bird Conservation Commission".

68. On page 17, line 24 and continuing through line 7 on page 18, strike the second sentence of paragraph (3) and insert in lieu thereof the following sentence:

"The Secretary shall not convey any such interest to a State, another public agency or other entity unless the Secretary determines that such State, agency or other entity is committed to undertake the management of the property being transferred in accordance with the objectives of this Act, and the deed or other instrument of transfer contains provisions for the reversion of title to the property to the United States if such State, agency or other entity fails to manage the property in accordance with the objectives of this Act.".

69. On page 18, lines 11, 12, and 13, strike the final sentence of paragraph (3).

70. On page 19, line 11, strike "50 Stat. 917, as amended;".

71. On page 19, line 13, strike "private" and insert in lien thereof "other".

72. On page 19, lines 15 and 16, strike "under section 5(d)" and insert in lieu thereof "by the Migratory Bird Conservation Commission".

73. On page 19, line 18, strike "Commission" and insert in lieu thereof "Council".

74. On page 19, line 19, strike "Secretary" and insert in lieu thereof "Migratory Bird Conservation Commission".

75. On page 20, line 3, after the period insert the following sentence:

"Acquisitions of real property and interests in real property carried out pursuant to this subsection shall not be subject to any provision of Federal law governing acquisitions of property for inclusion in the National Wildlife Refuge System.".

76. On page 20, lines 7 and 8, strike "50 Stat. 917, as amended;".

77. On page 21, lines 14 and 15, strike "50 Stat. 917, as amended;".

78. On page 22, line 8, strike, "1990," and "and 1993" and insert "1993, and 1994" after "1992,".

79. On page 22, lines 13 and 14, strike "50 Stat. 917, as amended;".

80. On page 22, after line 8, insert the following new subsection:

"(d) AVAILABILITY OF FUNDS.—Sums made available under this section shall be available until expended.".

81. On page 22, line 17, after "Secretary," insert "which can be matched with non-Federal moneys in accordance with the requirements of subsection (b) of this section,".

82. On page 23, line 3, after "thereof)" insert ", which can be matched with non-Federal moneys in accordance with the requirements of subsection (b) of this section,".

83. On page 23, strike the text on lines 7 through 24, insert the following and re-designate the subsequent subsection accordingly:

"(b) FEDERAL CONTRIBUTION FOR PROJECTS.—The Federal moneys allocated under subsection (a) of this section for any fiscal year to carry out approved wetlands conservation projects shall be used for the payment of not to exceed 50 per centum of the total United States contribution to the costs of such projects, or may be used for payment of 100 per centum of the costs of such projects located on Federal lands and waters, including the acquisition of inholdings within such lands and waters.".

84. On page 24, line 8, strike "or (c)".

85. On page 25, beginning on line 20 and continuing through line 12 on page 26, strike section 11 of the bill and insert in lieu thereof the following section:

"SEC. 11. REPORT TO CONGRESS.

The Secretary shall report to the appropriate Committees on the implementation of this Act. The report shall include:

"(1) a biennial assessment of—

"(A) the estimated number of acres of wetlands and habitat for waterfowl and other migratory birds that were restored, protected, or enhanced during such two-year period by Federal, State, and local agencies and other entities in the United States, Canada, and Mexico;

"(B) trends in the population size and distribution of North American migratory birds; and

"(C) the status of efforts to establish agreements with nations in the western hemisphere pursuant to section 17 of this Act.

"(2) an annual assessment of the status of wetlands conservation projects, including an accounting of expenditures by Federal, State, and other United States entities, and expenditures by Canadian and Mexican sources to carry out these projects.".

86. On page 27, lines 2 and 3, strike "Federal Aid in Wildlife Restoration Act (50 Stat. 917, as amended;" and insert in lieu thereof "Act of September 2, 1937 (".

87. On page 27, after line 8, insert the following new sections:

"SEC. 14. ADDITION OF EPA ADMINISTRATOR TO MIGRATORY BIRD CONSERVATION COMMISSION.

"Section 2 of the Migratory Bird Conservation Act (16 U.S.C. 715a) is amended by striking "the Secretary of Transportation," and inserting in lieu thereof "the Administrator of the Environmental Protection Agency,".

"SEC. 15. LIMITATION ON ASSESSMENTS AGAINST MIGRATORY BIRD CONSERVATION FUND.

"Notwithstanding any other provision of law, only those personnel and administrative costs directly related to acquisition of real property shall be levied against the Migratory Bird Conservation Account.

"SEC. 16. TECHNICAL AND CONFORMING AMENDMENTS TO THE MIGRATORY BIRD TREATY ACT.

"Section 2 of the Migratory Bird Treaty Act (16 U.S.C. 703) is amended—

"(1) by striking 'and' after '1936,'; and

"(2) by inserting after '1972' the following: 'and the convention between the United States and the Union of Soviet Socialist Republics for the conservation of migratory birds and their environments concluded November 19, 1976.'.

"SEC. 17. OTHER AGREEMENTS.

"(a) The Secretary shall undertake with the appropriate officials of nations in the western hemisphere to establish agreements, modeled after the Plan or the Agreement, for the protection of migratory birds identified in section 13(a)(5) of the Fish and Wildlife Conservation Act of 1980 (16 U.S.C. 2912(a)). When any such agreements are reached, the Secretary shall make recommendations to the appropriate Committees on legislation necessary to implement the agreements.

"(b) Section 13(a) of the Fish and Wildlife Conservation Act (16 U.S.C. 2912(a)) is amended by striking 'and' after 'U.S.C. 1531 to 1543);' and striking 'necessary.' and inserting 'necessary; and' and adding at the end the following:

"'(5) identify lands and waters in the United States and other nations in the western hemisphere whose protection, management or acquisition will foster the conservation of species, subspecies and population of migratory non-game birds, including those identified in paragraph (3).'.".

Mr. MITCHELL. Mr. President, these amendments to S. 804, the North American Wetlands Conservation Act, reconcile minor differences between this legislation and the H.R. 2587, the House-passed counterpart to S. 804, in a manner that hopefully will be acceptable to our colleagues in the other body.

The amendments rename the North American Wetlands Conservation Commission in S. 804 the "North American Wetlands Conservation Council."

The principal change made by the amendments, however, is to adopt the approach taken in the H.R. 2587 of requiring wetlands conservation projects to be approved by the Migratory Bird Conservation Commission. The Senate bill, as approved by the Environment and Public Works Committee, entrusts this responsibility solely to the Secretary of the Interior.

The Migratory Bird Conservation Commission presently consists of the Secretaries of the Interior, Transportation, and Agriculture and two members each from the House of Representatives and the Senate. The House bill and these amendments to S. 804 would replace the Secretary of Transportation with the Administrator of the Environmental Protection Agency.

Under section 5(e) of S. 804, as amended by these amendments, the Migratory Bird Conservation Commission is required to approve, reject, or reorder the priority of any wetlands conservation projects recommended by the North American Wetlands Conservation Council, based to the greatest extent practicable, on the criteria of section 5(a) of the bill. Consideration of wetlands conservation projects by the Commission is intended to be conducted in a manner that is in accordance with the provisions of the North American Wetlands Conservation Act and not simply in a manner similar to the consideration of projects for funding from the Migratory Bird Conservation Fund. Consequently, it is expected that the Commission will give great deference to the recommendations made by the North American Wetlands Conservation Council.

Section 5(f) of S. 804, as amended by these amendments, requires an annual report to Congress from the Migratory Bird Conservation Commission that includes: First, a description of the projects approved by the Commission for funding, in the order of priority approved by the Commission; second, a justification for these actions; third, a list and description of the projects which the Council recommended, in order of priority, that the Commission approve; and fourth, a justification for any rejection or reordering of the priority of wetlands conservation projects recommended by the Council that was based on factors other than the criteria in this legislation.

The intent of this provision is to allow the appropriate committees in the House and Senate to review decisions by the Council and the Commission with respect to compliance with the criteria under section 5(a) in recommending and approving funding of projects.

To minimize disagreement among the Council, the Commission and the committees with respect to compliance of projects with the criteria under section 5(a), it is recommended that the Council and the Commission, in consultation with the committees, reach an agreement on interpretation of the criteria and method of establishing the order of priority for funding consistent with the criteria.

The amendments change the term "private entities" in S. 804 to "other entities" to ensure that native American interests and tribal organizations qualify for matching funds to carry out approved wetlands conservation projects under this legislation.

Finally, the amendments incorporate provisions from the House bill to carry migratory bird conservation efforts in the Caribbean and Central and South America and to begin carrying out the habitat protection provisions of the migratory bird treaty with the Soviet Union.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment (No. 1139) was agreed to.

Mr. CRANSTON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LOTT. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1140

Mr. CRANSTON. Mr. President, I send an amendment on behalf of Senator MITCHELL to the desk and ask for its immediate consideration.

The ACTING PRESIDENT pro tempore. The clerk will report.

The legislative clerk read as follows:

The Senator from California [Mr. CRANSTON], for Mr. MITCHELL, proposes an amendment numbered 1140.

Mr. CRANSTON. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

On page 25, lines 14 through 19, strike the following sentence:

"In the consideration of land disposal alternatives, the head of each such agency shall give priority to the transfer of real property interests for conservation purposes that would contribute to furtherance of the purposes of this Act and the goals of the Plan and the Agreement.".

The ACTING PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment (No. 1140) was agreed to.

Mr. CRANSTON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LOTT. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1141

(Purpose: To expand the Bogue Chitto National Wildlife Refuge)

Mr. CRANSTON. Mr. President, I send an amendment to the desk on behalf of Senator JOHNSTON and ask for its immediate consideration.

The ACTING PRESIDENT pro tempore. The clerk will report.

The legislative clerk read as follows:

The Senator from California [Mr. CRANSTON], for Mr. JOHNSTON, proposes an amendment numbered 1141.

Mr. CRANSTON. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill and the following new section:

SEC. —. TO EXPAND THE BOGUE CHITTO NATIONAL WILDLIFE REFUGE.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Act entitled "An Act to establish the Bogue Chitto National Wildlife Refuge" (Public Law 96-288; 94 Stat. 604) is amended by—

(1) striking the period at the end of subsection 3(b) and inserting in lieu thereof: ", and within an area approximately 10,000 acres as depicted upon a map entitled "Bogue Chitto NWR Expansion", dated September, 1989 and on file with the United States Fish and Wildlife Service."; and

(2) by deleting "$10,000,000" in subsection 5(a) and inserting in lieu thereof "such sums as may be necessary".

Mr. JOHNSTON. Mr. President, today I am offering an amendment to S. 804 to expand the Bogue Chitto National Wildlife Refuge acquisition boundary by approximately 10,000 acres.

Very briefly, earlier this year the Fish and Wildlife Service was in the process of purchasing 4,845 acres of this land from the Louisiana Nature Conservancy with funds appropriated last year when it was realized that the area extended outside the authorized boundary of the refuge. I understand that a purchase agreement had been signed and the Service had already written the check for the purchase when it realized it did not have authority to purchase the land. Furthermore, since Bogue Chitto NWR was created by legislation, the Service will not administratively alter the boundaries of the refuge without explicit direction from Congress.

The expansion area, if acquired, would move the refuge boundary south along the west side of the Pearl River, and connect the refuge with the State-owned Pearl River Wildlife Management Area. This would provide contiguous public ownership for the lower 35 miles of the Pearl River Basin, an area of valuable wildlife habitat.

The area is particularly threatened by sand and gravel mining operations, which would severely degrade habitat quality. Several active sand and gravel pits are operated near the extension area, and some of the property within the area has been test drilled. Residential development and livestock grazing are also threats to habitat quality within the proposed expansion boundary.

I have been advised that this boundary extension is supported by the Fish and Wildlife Service and I ask that the amendment be agreed to by the Senate.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment (No. 1141) was agreed to.

Mr. CRANSTON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LOTT. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1142

Mr. LOTT. Mr. President, I send an amendment to the desk on behalf of Senator STEVENS and ask for its immediate consideration.

The ACTING PRESIDENT pro tempore. The clerk will report.

The legislative clerk read as follows:

The Senator from Mississippi [Mr. LOTT], for Mr. STEVENS, proposes an amendment numbered 1142.

Mr. LOTT. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill add the following new section:

"SEC. 18. WETLANDS ASSESSMENTS.

"Section 401(a) of the Emergency Wetlands Resources Act of 1986 (16 U.S.C. 3931(a)) is amended by adding the following new paragraph:

"(5) produce, by April 30, 1990, a report that provides:

"(A) an assessment of the estimated total number of acres of wetland habitat as of the 1780's in the areas that now comprise each state; and

"(B) an assessment of the estimated total number of acres of wetlands in each state as of the 1980's, and the percentage of loss of wetlands in each state between the 1780's and the 1980's.".

Mr. STEVENS. Mr. President, I am offering an amendment to the bill before the Senate, S. 804, which will require an assessment of the extent of loss of wetlands in this Nation. The wetland issue is quite important to my State. By some estimates over 50 percent of Alaska is wetlands.

With an increasing national interest in protecting wetland habitat, I believe that we need data in hand to identify historically where wetlands have been lost in our country and the amount of wetlands habitat remaining.

My amendment requires reporting of such information by the Secretary of the Interior. The Secretary would be required to estimate the total area of wetlands originally existing approximately 200 years ago in what is now each State. It would also require an estimate of wetlands in each State as of the 1980's.

This information should be available in the future as we forge a national policy on wetlands. It will also be useful in identifying areas where waterfowl, fish, and wildlife conservation projects should be slated.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment (No. 1142) was agreed to.

Mr. CRANSTON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LOTT. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HEINZ. Mr. President, I rise to engage my colleagues in a brief colloquy. Several days ago I filed an amendment to S. 804. This amendment deals with ground water safety and is identical to legislation passed by the Senate last year, H.R. 791. The measure was introduced again this year by the distinguished chairman of the Environment and Public Works Committee, Senator BURDICK.

I filed these provisions as an amendment because I believe they are sound. I support this measure very strongly and want the Senate to take action again soon.

H.R. 791, the Ground Water Research, Management, and Education Act of 1988, passed the Senate unanimously on October 7, 1988. But, H.R. 791 was never sent to conference and died without final action. We have not been able to address ground water in the 101st Congress, and I am very concerned that matters—as far as ground water is concerned—are quickly worsening.

Mr. President, ground water is essential to our lives. We consume nearly 95 billion gallons of it per day. Ground water represents 25 percent of our fresh water and nearly all of the drinking water for rural America. Yet as the U.S. Geological Survey and the National Academy of Sciences have repeatedly pointed out, ground water is a very threatened resource. Hazardous and solid waste disposal sites, leaking underground storage tanks, pesticide contamination, and more threaten not only the purity of our ground water, but the health of those who have no alternative source of drinking water.

There is no truly effective and certain method to clean up ground water once it is contaminated; what is needed—and the hour is growing late—is a plan to prevent ground water contamination and not just cope with it later on.

State and local governments, by default, have primary responsibility for ground water management and protection. Ground water research has tended to be a Federal responsibility—but it is uncoordinated and often burdensome on State and local governments. Last year Senator SASSER and I held 2 days of hearings on this very subject. One witness told us that accessing Federal ground water assistance is at best a hit-or-miss proposition. Another witness stated that when asked how well the existing ground water management and research system works, he must reply—"What system?"

Other witnesses pointed out that the EPA and the Geological Survey use different criteria for ground water research and analysis, have data bases that cannot be cross-checked, and often require States to work at cross-purposes to satisfy the demands of the two conflicting agencies.

To develop management, protection, and research strategies, the following offices must generally be consulted: The EPA Offices of Radiation Programs, Water Programs, Water Regulation Standards, Water Enforcement Permits, Solid Waste, Drinking Water, Emergency and Remedial Response, Pesticide Programs, Toxic Substances, Ground Water Research and Development; the Department of Agriculture's Soil Conservation Service, Forest Service, FHA; the Department of the Interior's Bureau of Reclamation, Bureau of Indian Affairs, Park Service, USGS, OSM BLM, and the Fish and Wildlife Service; the Tennessee Valley Authority, the Department of Commerce, the Corps of Engineers, the U.S. Coast Guard, the National Science Foundation, the NRC, the DOE, and even the Department of Transportation.

State and local governments are further hampered by the conflicting and overlapping mandates of a host of Federal laws. These include FIFRA, the Atomic Energy Act, the Clean Water Act, Superfund, NEPA, RCRA, the Safe Drinking Water Act, the Surface Mining Control and Reclamation Act, and more.

Last year Senator SASSER and I produced legislation, S. 1992, which is similar to title I of this amendment. S. 1992 required a coordinated research policy and would improve interagency cooperation in the field of ground water protection. That legislation, S. 1992, was endorsed by the American Farm Bureau Federations, the American Mining Congress, the Chemical Manufacturers Association, the Clean Water Action Project, the Environmental Defense Fund, the Environmental Policy Institute, the National Coal Association, the Natural Resources Defense Council, the U.S. Public Interest Research Group as well as the State governments of Tennessee, Pennsylvania, Delaware, and Wisconsin and the Interstate Conference on Water Policy and also the Western States Water Resources Council.

The amendment I have filed, Mr. President, establishes an interagency ground water task force to identify research needs and priorities and to coordinate interagency and intergovernmental activity. A ground water clearninghouse will be established to assure coordination of ground water data and information. The clearninghouse would provide the public with information concerning ground water and contamination problems. The amendment authorizes new research programs and studies at the USDA, EPA, and USGS and provides a cost-shared Federal-State grant program for State ground water management programs.

Mr. President, in filing my amendment to S. 804 I in no way wish to imply any lack of support for S. 804. The conversion of wetlands has a devastating impact on the environment, and their loss also harms ground water quality.

Because I understand that my colleagues on the Environment and Public Works Committee intend to address ground water issues, and because I do not want to hold another valuable bill—S. 804—hostage, I would be willing to drop my ground water amendment provided my colleagues are able to provide some assurance that similar provisions will be acted upon in committee as early as possible in the coming session and that it is the distinguished Senator's intention to bring a measure before the Senate during the 101st Congress in time for both Senate consideration and the necessary action in the other Chamber.

Mr. LAUTENBERG. Mr. President, I understand the Senator from Pennsylvania's concerns and his interest in ground water legislation. His intent has been to assist States faced with the problem of developing protection programs on their own while the information and assistance needed from USGS and EPA could not be coordinated and necessary ground water data could not be cross-referenced because these agencies use conflicting data bases.

Legislation is needed to address this problem, among many others in the ground water area.

The chairman of the Environment and Public Works Committee and I have a strong interest in legislation to expand and strengthen programs for research and protection of the ground water resource.

As a first step in considering needed actions to protect ground water, I chaired a hearing of my Subcommittee on Superfund, Ocean and Water Protection addressing ground water issues in August of this year.

It is my present intention to introduce ground water legislation complementing the legislation introduced by Senator BURDICK and to schedule hearings and markup on ground water legislation as early as possible in the next session and have it ready for full committee action in a timely fashion.

Mr. BURDICK. Mr. President, I share the concern of the distinguished Senator from Pennsylvania concerning protection of the quality of our ground water resources.

Ground water is a natural resource of tremendous value and importance. Over half the population of the country relies on ground water for drinking water. In my home State of North Dakota, over 62 percent of the population relies on ground water for drinking water. In many rural areas, ground water is the only readily available source of safe drinking water.

As the Senator from Pennsylvania has indicated, there is growing evidence that the quality of ground water

is threatened by a wide range of pollution sources including solid and hazardous waste facilities, underground storage tanks, septic systems, and other activities and practices. A number of existing statutes, developed in the Environment and Public Works Committee, which I chair, address specific sources of ground water contamination. These statutes include the Clean Water Act, Superfund, the Resource Conservation and Recovery Act.

I have been increasingly concerned, however, that ground water research and assessment activities at the Federal and State levels need to be expanded and strengthened. Last year, I introduced the Ground Water Research Act, which was reported by the committee and passed by the full Senate. Unfortunately, there was not sufficient time to iron out differences with the House-passed bill prior to the end of the last Congress.

I have reintroduced this important legislation again in this Congress, and I am pleased that the committee has made progress in consideration of ground water research and protection issues. Senator LAUTENBERG chaired a hearing on this topic in August in his Subcommittee on Superfund, Ocean and Water Protection and I know that he is working on complementary ground water protection legislation.

I want to assure the Senator from Pennsylvania that it would be my intention to bring about committee consideration of ground water legislation as quickly as possible once action by the subcommittee is completed.

Prompt action is essential if we are to protect the quality of ground water and drinking water supplies now and for future generations.

Mr. HEINZ. Mr. President, I am very pleased by my colleagues' determination to address the issue and am very reassured by their obvious concern for water quality. I want to thank them for their statements and I look forward to working with them next year.

Mr. CONRAD. Mr. President, I would like to engage the chairman of the Subcommittee on Environmental Protection for the Committee on Environment and Public Works, Senator BAUCUS, in a colloquy about S. 1150, my bill concerning payments-in-lieu-of-taxes under the Refuge Revenue Sharing Act.

As the distinguished chairman of the subcommittee knows, I introduced this measure this year to ensure that local units of government receive all of the money that they are entitled to under the Refuge Revenue Sharing Act for lands withrawn from their tax base for wildlife refuges. The bill uses undedicated receipts collected by the Department of the Interior for this purpose, and has 13 cosponsors.

As the chairman also knows, appropriations under the Refuge Revenue Sharing Act have fallen significantly short of full funding since 1980, and this has created critical problems for local units of government with refuge lands within their boundaries. The shortfalls have also made it difficult for us to acquire additional wetlands habitat because local units of government are understandably reluctant to jeopardize their tax base in relinquishing acreage for refuges if the Federal Government is unwilling to meet its obligations.

I compliment the distinguished chairman of the Appropriations Committee, Senator BYRD, and the other members of that panel, for providing additional money under the Refuge Revenue Sharing Act for fiscal year 1990. I know that he is sensitive to this problem. S. 1150 would provide a permanent solution to the problem, however, and I believe that local units of government deserve that commitment from the Federal Government.

I considered offering S. 1150 as an amendment to S. 804, but have decided not to do so because I do not want to delay S. 804. I would, however, like to obtain the assurance of the chairman of the subcommittee that his panel will schedule a hearing on the bill in the near future.

Mr. BAUCUS. Mr. President, the Senator from North Dakota is correct; payments in lieu of taxes to counties with U.S. Fish and Wildlife Service lands under the Refuge Revenue Sharing Act have been inadequate, and the shortfall in these payments has hindered efforts to protect and restore the wetlands of this country. I understand and appreciate the problems created by the partial payments to counties under the Refuge Revenue Sharing Act. Montana's counties receive about $100,000 less each year than they are entitled to under that law.

This also is a matter of continuing interest to the chairman of the Environment and Public Works Committee, Senator BURDICK, and I know that through his position on the Appropriations Committee he was instrumental in securing a level of funding that will provide between 75 and 80 percent of the full entitlement to counties for this fiscal year. So this is a matter that is very much appreciated by the members of our committee.

The Subcommittee on Environmental Protection expects to hold hearings early next year on administration of the National Wildlife Refuge System, including funding and implementation of the Refuge Revenue Sharing Act, and I assure the Senator that there will be an opportunity to consider S. 1150 in that context.

Mr. CRANSTON. Mr. President, I believe there are no further amendments.

The ACTING PRESIDENT pro tempore. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on agreeing to the committee amendment, as amended.

The committee amendment, as amended, was agreed to.

The ACTING PRESIDENT pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 804

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "North American Wetlands Conservation Act".

SEC. 2. FINDINGS AND STATEMENT OF PURPOSE.

(a) FINDINGS.—The Congress finds and declares that—

(1) the maintenance of healthy populations of migratory birds in North America is dependent on the protection, restoration, and management of wetland ecosystems and other habitats in Canada, as well as in the United States and Mexico;

(2) wetland ecosystems provide essential and significant habitat for fish, shellfish, and other wildlife of commercial, recreational, scientific, and aesthetic values;

(3) almost 35 per centum of all rare, threatened, and endangered species of animals are dependent on wetland ecosystems;

(4) wetland ecosystems provide substantial flood and storm control values and can obviate the need for expensive manmade control measures;

(5) wetland ecosystems make a significant contribution to water availability and quality, recharging ground water, filtering surface runoff, and providing waste treatment;

(6) wetland ecosystems provide aquatic areas important for recreational and aesthetic purposes:

(7) more than 50 per centum of the original wetlands in the United States alone have been lost;

(8) wetlands destruction, loss of nesting cover, and degradation of migration and wintering habitat have contributed to long-term downward trends in populations of migratory bird species such as pintails, American bitterns, and black ducks;

(9) the migratory bird treaty obligations of the United States with Canada, Mexico, and other countries require protection of wetlands that are used by migratory birds for breeding, wintering, or migration and are needed to achieve and to maintain optimun population levels, distributions, and patterns of migration;

(10) the 1988 amendments to the Fish and Wildlife Conservation Act of 1980 require the Secretary of the Interior to identify conservation measures to assure that nongame migratory bird species do not reach the point at which measures of the Endangered Species Act are necessary;

(11) protection of migratory birds and their habitats requires long-term planning and the close cooperation and coordination of management activities by Canada, Mexico, and the United States within the framework of the 1916 and 1936 Migratory Bird Conventions and the Convention on Nature Protection and Wildlife Preservation in the Western Hemisphere;;

(12) the North American Waterfowl Management Plan, signed in 1986 by the Minister of Environment for Canada and the Sec-

retary of the Interior for the United States, provides a framework for maintaining and restoring an adequate habitat base to ensure perpetuation of populations of North American waterfowl and other migratory bird species;

(13) a tripartite agreement signed in March 1988, by the Director General for Ecological Conservation of Natural Resources of Mexico, the Director of the Canadian Wildlife Service, and the Director of the United States Fish and Wildlife Service, provides for expanded cooperative efforts in Mexico to conserve wetlands for migratory birds that spend the winter there; and

(14) the long-term conservation of migratory birds and habitat for these species will require the coordinated action of governments, private organizations, landowners, and other citizens; and

(15) the treaty obligations of the United States under the Convention on Wetlands of International Importance especially as Waterfowl Habitat requires promotion of conservation and wise use of wetlands.

(b) PURPOSE.—The purposes of this Act are to encourage partnership among public agencies and other interests—

(1) to protect, enhance, restore, and manage an appropriate distribution and diversity of wetland ecosystems and other habitats for migratory birds and other fish and wildlife in North America;

(2) to maintain current or improved distributions of migratory bird populations; and

(3) to sustain an abundance of waterfowl and other migratory birds consistent with the goals of the North American Waterfowl Management Plan and the international obligations contained in the migratory bird treaties and conventions and other agreements with Canada, Mexico, and other countries.

SEC. 3. DEFINITIONS.

For the purposes of this Act:

(1) The term "Agreement" means the Tripartite Agreement signed in March 1988, by the Director General for Ecological Conservation of Natural Resources of Mexico, the Director of the Canadian Wildlife Service, and the Director of the United States Fish and Wildife Service.

(2) The term "appropriate Committees" means the Committee on Environment and Public Works of the United States and the Committee on Merchant Marine and Fisheries of the United States House of Representatives.

(3) The term "flyway" means the four administrative units used by the United States Fish and Wildlife Service and the States in the management of waterfowl populations.

(4) The term "Migratory Bird Conservation Commission" means that commission established by section 2 of the Migratory Bird Conservation Act (16 U.S.C. 715a).

(5) The term "migratory birds" means all wild birds native to North America that are in an unconfined state and that are protected under the Migratory Bird Treaty Act, including ducks, geese, and swans of the family Anatidae, species listed as threatened or endangered under the Endangered Species Act (16 U.S.C. 1531 et seq.), and species defined as nongame under the Fish and Wildlife Conservation Act of 1980 (16 U.S.C. 2901-2912).

(6) The term "Plan" means the North American Waterfowl Management Plan signed by the Minister of the Environment for Canada and the Secretary of the Interior for the United States in May 1986.

(7) The term "Secretary" means the Secretary of the Interior.

(8) The term "State" means the State fish and wildlife agency, which shall be construed to mean any department, or any division of any department of another name, of a State that is empowered under its laws to exercise the functions ordinarily exercised by a State fish and wildlife agency.

(9) The term "wetlands conservation project" means—

(A) the obtaining of a real property interest in lands or waters, including water rights, if the obtaining of such interest is subject to terms and conditions that will ensure that the real property will be administered for the long-term conservation of such lands and waters and the migratory birds and other fish and wildlife dependent thereon;

(B) the restoration, management, or enhancement of wetland ecosystems and other habitat for migratory birds and other fish and wildlife species if such restoration, management, or enhancement is conducted on lands and waters that are administered for the long-term conservation of such lands and waters and the migratory birds and other fish and wildlife dependent thereon, and

(c) in the case of projects undertaken in Mexico, includes technical training and development of infrastructure necessary for the conservation and management of wetlands and studies on the sustainable use of wetland resources.

SEC. 4. ESTABLISHMENT OF NORTH AMERICAN WETLANDS CONSERVATION COUNCIL

(a) COUNCIL MEMBERSHIP.—(1) There shall be established a North American Wetlands Conservation Council (hereinafter in this Act referred to as the "Council") which shall consist of nine members who may not receive compensation as members of the Council. Of the Council members—

(A) one shall be the Director of the United States Fish and Wildlife Service;

(B) one shall be the Secretary of the Board of the National Fish and Wildlife Foundation appointed pursuant to section 3(2)(B) of the National Fish and Wildlife Foundation Establishment Act (16 U.S.C. 3702); and

(c) four shall be individuals who shall be appointed by the Secretary, who shall reside in different flyways and who shall each be a Director of the State fish and wildlife agency;

(D) three shall be individuals who shall be appointed by the Secretary and who shall each represent a different charitable and nonprofit organization which is actively participating in carrying out wetlands conservation projects under this Act, the Plan, or the Agreement.

(2) The Secretary shall appoint an alternate member of the Council who shall be knowledgeable and experienced in matters relating to fish, wildlife, and wetlands conservation and who shall perform the duties of a Council member appointed under subsection (a)(1)(C) or subsection (a)(1)(D) of this section—

(A) until a vacancy referred to in subsection (b)(4) of this section is filled; or

(B) in the event of the anticipated absence of such a member from any meeting of the Council.

(b) APPOINTMENT AND TERMS.—(1) Except as provided in paragraphs (2) and (3), the term of office of a member of the Council appointed under subsections (a)(1)(C) and (a)(1)(D) of this section is three years.

(2) Of the Council members first appointed under subsection (a)(1)(C) of this section after the date of enactment of this Act, one shall be appointed for a term of one year, one shall be appointed for a term of two years, and two shall be appointed for a term of three years.

(3) Of the Council members first appointed under subsection (a)(1)(D) of this section after the date of enactment of this Act, one shall be appointed for a term of one year, one shall be appointed for a term of two years, and one shall be appointed for a term of three years.

(4) Whenever a vacancy occurs among members of the Council appointed under subsection (a)(1)(C) or subsection (a)(1)(D) of this section, the Secretary shall appoint an individual in accordance with either such subsection to fill that vacancy for the remainder of the applicable term.

(c) EX OFFICIO COUNCIL MEMBERS.—The Secretary is authorized and encouraged to include as ex officio nonvoting members of the Commission representatives of—

(1) the Federal, provincial, territorial, or State government agencies of Canada and Mexico, which are participating actively in carrying out one or more wetlands conservation projects under this Act, the Plan, or the Agreement;

(2) the Environmental Protection Agency and other appropriate Federal agencies, in addition to the United States Fish and Wildlife Service, which are participating actively in carrying out one or more wetlands conservation projects under this Act, the Plan, or the Agreement; and

(3) nonprofit charitable organizations and Native American interests, including tribal organizations, which are participating actively in one or more wetlands conservation projects under this Act, the Plan, or the Agreement.

(d) CHAIRMAN.—The Chairman shall be elected by the Council from its members for a three-year term, except that the first elected chairman may serve a term of less than three years.

(e) QUORUM.—A majority of the current membership of the Council shall constitute a quorum for the transaction of business.

(f) MEETINGS.—The Council shall meet at the call of the Chairman at least once a year. Council meetings shall be open to the public. If a Commission member appointed under subsection (a)(1)(C) or (a)(1)(D) of this section misses three consecutive regularly scheduled meetings, the Secretary may remove that individual in accordance with subsection (b)(4).

(g) COORDINATOR.—The Director of the United States Fish and Wildlife Service shall appoint an individual who shall serve at the pleasure of the Director and—

(1) who shall be educated and experienced in the principles of fish, wildlife, and wetlands conservation;

(2) who shall be responsible, with assistance from the United States Fish and Wildlife Service, for facilitating consideration of wetlands conservation projects by the Council and otherwise assisting the Council in carrying out its responsibilities under this Act; and

(3) who shall be compensated with the funds available under section 8(a)(1) for administering this Act.

SEC. 5. APPROVAL OF WETLANDS CONSERVATION PROJECTS.

(a) CONSIDERATION BY THE COUNCIL.—The Council shall recommend wetlands conservation projects to the Migratory Bird Conservation Commission based on consideration of—

(1) the extent to which the wetlands conservation project fulfills the purposes of this Act, the Plan or the Agreement;

(2) the availability of sufficient non-Federal moneys to carry out any wetlands conservation project and to match Federal contributions in accordance with the requirements of section 8(b) of this Act;

(3) the extent to which any wetlands conservation project represents a partnership among public agencies and private entities;

(4) the consistency of any wetlands conservation project in the United States with the National Wetlands Priority Conservation Plan developed under section 301 of the Emergency Wetlands Resources Act (16 U.S.C. 3921);

(5) the extent to which any wetlands conservation project would aid the conservation of migratory non-game birds, other fish and wildlife and species that are listed, or are candidates to be listed, as threatened and endangered under the Endangered Species Act (16 U.S.C. 1531 et seq.);

(6) the substantiality of the character and design of the wetlands conservation project; and

(7) the recommendations of any partnerships among public agencies and private entities in Canada, Mexico, or the United States which are participating actively in carrying out one or more wetlands conservation projects under this Act, the Plan, or the Agreement.

(b) RECOMMENDATIONS TO THE MIGRATORY BIRD CONSERVATION COMMISSION.—The council shall submit to the Migratory Bird Conservation Commission by January 1, of each year, a description, including estimated costs, of the wetlands conservation projects which the council has considered under subsection (a) of this section and which it recommends, in order of priority, that the Migratory Bird Conservation Commission approve for Federal funding under this Act and section 3(b) of the Act of September 2, 1937 (16 U.S.C. 669b(b)), as amended by this Act.

(c) COUNCIL PROCEDURES.—The Council shall establish practices and procedures for the carrying out of its functions under subsections (a) and (b) of this section. The procedures shall include requirements that—

(1) a quorum of the Council must be present before any business may be transacted; and

(2) no recommendations referred to in subsection (b) of this section may be adopted by the Council except by the vote of two-thirds of all members present and voting.

(d) COUNCIL REPRESENTATION ON MIGRATORY BIRD CONSERVATION COMMISSION.—The Chairman of the Council shall select one Council member of the United States citizenship to serve with the Chairman as ex officio members of the Migratory Bird Conservation Commission for the purposes of considering and voting upon wetlands conservation projects recommended by the Council.

(e) APPROVAL OF COUNCIL RECOMMENDATIONS BY THE MIGRATORY BIRD CONSERVATION COMMISSION.—The Migratory Bird Conservation Commission, along with the two members of the Council referred to in subsection (d) of this section, shall approve, reject, or reorder the priority of any wetlands conservation projects recommended by the Council based on, to the greatest extent practicable, the criteria of subsection (a) of this section. If the migratory Bird Conservation Commission approves any wetlands conservation project, Federal funding shall be made available under this Act and section 3(b) of the Act of September 2, 1937 (16 U.S.C. 669b(b)), as amended by this Act. If the Migratory Bird Conservation Commission rejects or reorders the priority of any wetlands conservation project recommended by the Council, the Migratory Bird Conservation Commission shall provide the Council and the appropriate Committees with a written statement explaining its rationale for the rejection or the priority modification.

(b) NOTIFICATION OF APPROPRIATE COMMITTEES.—The Migratory Bird Conservation Commission shall submit annually to the appropriate Committees a report including a list and description of the wetlands conservation projects approved by the Migratory Bird Conservation Commission for Federal funding under subsection (d) of this section in order of priority; the amounts and sources of Federal and non-Federal funding for such projects; a justification for the approval of such projects and the order of priority for funding such projects; a list and description of the wetlands conservation projects which the Council recommended, in order of priority that the Migratory Bird Conservation Commission approve for Federal funding; and a justification for any rejection or reordering of the priority of wetlands conservation projects recommended by the Council that was based on factors other than the criteria of section 5(a) of this Act.

SEC. 6. CONDITIONS RELATING TO WETLANDS CONSERVATION PROJECTS.

(a) PROJECTS IN THE UNITED STATES.—(1) Subject to the allocation requirements of section 8(a)(2) and the limitations on Federal contributions under section 8(b) of this Act, the Secretary shall assist in carrying out wetlands conservation projects in the United States, which have been approved by the Migratory Bird Conservation Commission, with the Federal funds made available under this Act and section 3(b) of the Act of September 2, 1937 (16 U.S.C. 669b(b)), as amended by this Act.

(2) Except as provided in paragraph (3), any lands or waters or interests therein acquired in whole or in part by the Secretary with the Federal funds made available under this Act and section 3(b) of the Act of September 2, 1937 (16 U.S.C. 669b(b)), as amended by this Act, to carry out wetlands conservation projects shall be included in the National Wildlife Refuge System.

(3) In lieu of including in the National Wildlife Refuge System any lands or waters or interests therein acquired under this Act, the", and after "may" insert ", with the concurrence of the Migratory Bird Conservation Commission, Secretary may grant or otherwise provide the Federal funds made available under this Act and section 3(b) of the Act of September 2, 1937 (16 U.S.C. 669b(b)), as amended by this Act or convey any real property interest acquired in whole or in part with such funds without cost to a State or to another public agency or other entity upon a finding by the Secretary that the real property interests should not be included in the National Wildlife Refuge System: *Provided*, That any grant recipient shall have been so identified in the project description accompanying the recommendation from the Commission and approved by the Migratory Bird Conservation Commission. The Secretary shall not convey any such interest to a State, another public agency, or other entity unless the Secretary determines that such State, agency, or other entity is committed to undertake the management of the property being transferred in accordance with the objectives of this Act, and the deed or other instrument of transfer contains provisions of the reversion of title to the property to the United States if such State, agency, or other entity fails to manage the property in accordance with the objectives of this Act. Any real property interest conveyed pursuant to this paragraph shall be subject to such terms and conditions that will ensure that the interest will be administered for the long-term conservation and management of the wetland ecosystem and the fish and wildlife dependent thereon.

(b) PROJECTS IN CANADA OR MEXICO.—Subject to the allocation requirements of section 8(a)(1) and the limitations on Federal contributions under section 8(b) of this Act, the Secretary shall grant or otherwise provide the Federal funds made available under this Act and section 3(b) of the Act of September 2, 1937 (16 U.S.C. 669b(b)), as amended by this Act, to public agencies and other entities for the purpose of assisting such entities and individuals in carrying out wetlands conservation projects in Canada or Mexico that have been approved by the Migratory Bird Conservation Commission: *Provided*, That the grant recipient shall have been so identified in the project description accompanying the recommendation from the Council and approved by the Secretary. The Migratory Bird Conservation Commission may only grant or otherwise provide Federal funds if the grant is subject to the terms and conditions that will ensure that any real property interest acquired in whole or in part, or enhanced, managed, or restored with such Federal funds will be administered for the long-term conservation and management of such wetland ecosystem and the fish and wildlife dependent thereon. Real property and interests in real property acquired pursuant to this subsection shall not become part of the National Wildlife Refuge System. Acquisitions of real property and interests in real property carried out pursuant to this subsection shall not be subject to any provision of Federal law governing acquisitions of property for inclusion in the National Wildlife Refuge System.

SEC. 7. AMOUNTS AVAILABLE TO CARRY OUT THIS ACT.

(a) AID IN WILDLIFE RESTORATION.—(1) Section 3 of the Act of September 2, 1937 (16 U.S.C. 669b), is amended—

(A) by inserting "(a)" before "An amount in the first sentence thereof; and

(B) by adding at the end thereof the following:

"(b)(1) The Secretary of the Treasury shall invest in interest-bearing obligations of the United States such portion of the fund as is not, in his judgment, required for meeting a current year's withdrawals. For purposes of such investment, the Secretary of the Treasury may—

"(A) acquire obligations at the issue price and purchase outstanding obligations at the market price; and

"(B) sell obligations held in the fund at the market price.

"(2) The interest on obligations held in the fund—

"(A) shall be credited to the fund;

"(B) constitute the sums available for allocation by the Secretary under section 8 of the North American Wetlands Conservation Act; and

"(C) shall become available for apportionment under this Act at the beginning of fiscal year 2006.".

(2) Section 4(a) of the Act of September 2, 1937 (16 U.S.C. 669c(a)), is amended by inserting "(excluding interest accruing under section 3(b))" after "revenues" in the first sentence thereof.

(3) The amendments made by this subsection of this Act take effect October 1, 1989.

(b) MIGRATORY BIRD FINES, PENALTIES, FORFEITURES.—The sums received under section 6 of the Migratory Bird Treaty Act (16 U.S.C. 707) as penalties or fines, or from forfeitures of property are athorized to be appropriated to the Department of the Interior for purposes of allocation under section 8 of this Act. This subsection shall not be construed to require the sale of instrumentalities.

(c) AUTHORIZATION OF APPROPRIATIONS.—In addition to the amounts made available under subsections (a) and (b) of this section, there are authorized to be appropriated to the Department of the Interior for purposes of allocation under section 8 of this Act not to exceed $15,000,000 for each of fiscal years 1991, 1992, 1993 and 1994.

(d) AVAILABILITY OF FUNDS.—Sums made available under this section shall be available until expended.

SEC. 8. ALLOCATION OF AMOUNTS AVAILABLE TO CARRY OUT THIS ACT.

(a) ALLOCATIONS.—Of the sums available to the Secretary for any fiscal year under this Act and section 3(b) of the Federal Aid in Wildlife Restoration Act (16 U.S.C. 669b(b)), as amended by this Act—

(1) such percentage of that sum (but at least 50 per centum and not more than 70 per centum thereof) as is considered appropriate by the Secretary, matched with non-Federal moneys in accordance with the requirements of subsection (b) of this section, less such amount (but not more than 4 per centum of such percentage) considered necessary by the Secretary to defray the costs of administering this Act during such fiscal year, shall be allocated by the Secretary to carry out approved wetlands conservation projects in Canada and Mexico in accordance with section 6(b) of this Act;

(2) the remainder of such sum after paragraph (1) is applied (but at least 30 per centum and not more than 50 per centum thereof), which can be matched with non-Federal moneys in accordance with the requirements of subsection (b) of this section, shall be allocated by the Secretary to carry out approved wetlands conservation projects in the United States in accordance with section 6(a) of this Act.

(b) FEDERAL CONTRIBUTION FOR PROJECTS.—The Federal moneys allocated under subsection (a) of this section for any fiscal year to carry out approved wetlands conservation projects shall be used for the payment of not to exceed 50 per centum of the total United States contribution to the costs of such projects, or may be used for payment of 100 per centum of the costs of such projects located on Federal lands and waters, including the acquisition of inholdings within such lands and waters. The non-Federal share of the United States contribution to the costs of such projects may not be derived from Federal grant programs.

(c) PARTIAL PAYMENTS.—(1) The Secretary may from time to time make payments to carry out approved wetlands conservation projects as such projects progress, but such payments, including previous payments, if any, shall not be more than the Federal pro rata share of any such project in conformity with subsection (b) of this section.

(2) The Secretary may enter into agreements to make payments on an initial portion of an approved wetlands conservation project and to agree to make payments on the remaining Federal share of the costs of such project from subsequent allocations if and when they become available. The liability of the United States under such an agreement is contingent upon the continued availability of funds for the purposes of this Act.

SEC. 9. REFUGE REVENUE SHARING.

No payment of any money allocated under section 8(a)(2) may be made by the Secretary for any fiscal year to acquire lands and waters for inclusion in the National Wildlife Refuge System under this Act, except as provided under section 6(a)(3), unless there are appropriated under section 401(d) of the Act of June 15, 1935 (commonly referred to as the "Refuge Revenue Sharing Act"; 16 U.S.C. 715s(d)), for such fiscal year an amount equal to the difference between the total amount of net receipts and the aggregate amount of payments required to be made for such fiscal year to counties.

SEC. 10. RESTORATION, MANAGEMENT, AND PROTECTION OF WETLANDS AND HABITAT FOR MIGRATORY BIRDS ON FEDERAL LANDS.

The head of each Federal agency responsible for acquiring, managing, or disposing of Federal lands and waters shall, to the extent consistent with the mission of such agency and existing statutory authorities, cooperate with the Director of the United States Fish and Wildlife Service to restore, protect, and enhance the wetland ecosystems and other habitats for migratory birds, fish, and wildlife within the lands and waters of each such agency.

SEC. 11. REPORT TO CONGRESS.

The Secretary shall report to the appropriate Committees on the implementation of this Act. The report shall include—

(1) a biennial assessment of—

(A) the estimated number of acres of wetlands and habitat for waterfowl and other migratory birds that were restored, protected, or enhanced during such two-year period by Federal, State, and local agencies and other entities in the United States, Canada, and Mexico;

(B) trends in the population size and distribution of North American migratory birds; and

(C) the status of efforts to establish agreements with nations in the Western Hemisphere pursuant to section 17 of this Act; and

(2) an annual assessment of the status of wetlands conservation projects, including an accounting of expenditures by Federal, State, and other United States entities, and expenditures by Canadian and Mexican sources to carry out these projects.

SEC. 12. REVISIONS TO THE PLAN.

The Secretary shall, in 1991 and at five-year intervals thereafter, undertake with the appropriate officials in Canada to revise the goals and other elements of the Plan in accordance with the information required under section 11 and with the other provisions of this Act. The Secretary shall invite and encourage the appropriate officials in Mexico to participate in any revisions of the Plan.

SEC. 13. RELATIONSHIP TO OTHER AUTHORITIES.

(a) ACQUISITION OF LANDS AND WATERS.—Nothing in this Act affects, alters, or modifies the Secretary's authorities, responsibilities, obligations, or powers to acquire lands or waters or interests therein under any other statute.

(b) MITIGATION.—The Federal funds made available under this Act and section 3(b) of the Act of September 2, 1937 (16 U.S.C. 669b(b)), as amended by this Act, may not be used for fish and wildlife mitigation purposes under the Fish and Wildlife Coordination Act (16 U.S.C. 661 et seq.) or the Water Resources Development Act of 1986, Public Law 99-662 (1986), 100 Stat. 4235.

SEC. 14. ADDITION OF ENVIRONMENTAL PROTECTION AGENCY ADMINISTRATOR TO MIGRATORY BIRD CONSERVATION COMMISSION.

Section 2 of the Migratory Bird Conservation Act (16 U.S.C. 715a) is amended by striking "the Secretary of Transportation," and inserting in lieu thereof "the Administrator of the Environmental Protection Agency,".

SEC. 15. LIMITATION ON ASSESSMENTS AGAINST MIGRATORY BIRD CONSERVATION FUND.

Notwithstanding any other provision of law, only those personnel and administrative costs directly related to acquisition of real property shall be levied against the Migratory Bird Conservation Account.

SEC. 16. TECHNICAL AND CONFORMING AMENDMENTS TO THE MIGRATORY BIRD TREATY ACT.

Section 2 of the Migratory Bird Treaty Act (16 U.S.C. 703) is amended—

(1) by striking "and" after "1936,"; and

(2) by inserting after "1972" the following: "and the convention between the United States and the Union of Soviet Socialist Republics for the conservation of migratory birds and their environments concluded November 19, 1976.".

SEC. 17. OTHER AGREEMENTS.

(a) The Secretary shall undertake with the appropriate officials of nations in the Western Hemisphere to establish Agreements, modeled after the Plan or the agreement, for the protection of migratory birds identified in section 13(a)(5) of the Fish and Wildlife Conservation Act of 1980 (16 U.S.C. 2912(a)). When any such agreements are reached, the Secretary shall make recommendations to the appropriate Committees on legislation necessary to implement the agreements.

(b) Section 13(a) of the Fish and Wildlife Conservation Act (16 U.S.C. 2912(a)) is amended by striking "and" after "U.S.C. 1531 to 1543);" and striking "necessary." and inserting "necessary; and" and adding at the end the following:

"(5) identify lands and waters in the United States and other nations in the Western Hemisphere whose protection, management, or acquisition will foster the conservation of species, subspecies, and populations of migratory non-game birds, including those identified in paragraph (3).".

SEC. 17. TO EXPAND THE BOGUE CHITTO NATIONAL WILDLIFE REFUGE.

The Act entitled "An Act to establish the Bogue Chitto National Wildlife Refuge" (Public Law 96-288; 94 Stat. 604) is amended by—

(1) striking the period at the end of subsection 3(b) and inserting in lieu thereof: ", and within an area approximately 10,000 acres as depicted upon a map entitled "Bogue Chitto NWR Expansion", dated September, 1989 and on file with the United States Fish and Wildlife Service."; and

(2) deleting "$10,000,000" in subsection 5(a) and inserting in lieu thereof "such sums as may be necessary".

SEC. 18. WETLANDS ASSESSMENTS.

Section 401(a) of the Emergency Wetlands Resources Act of 1986 (16 U.S.C. 3931(a)) is

amended by adding the following new paragraph:

"(5) produce, by April 30, 1990, a report that provides—

"(A) an assessment of the estimated total number of acres of wetland habitat as of the 1780's in the areas that now comprise each State; and

"(B) an assessment of the estimated total number of acres of wetlands in each State as of the 1980's, and the percentage of loss of wetlands in each State between the 1780's and the 1980's.".

Mr. CRANSTON. Mr. President, I move to reconsider the vote by which the bill as amended, was passed.

Mr. LOTT. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

FEDERAL ENERGY REGULATORY COMMISSION MEMBER TERM ACT

Mr. CRANSTON. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No 152, S. 388, the Federal Energy Regulatory Commission Member Act of 1989.

The ACTING PRESIDENT pro tempore. The clerk will report.

The assistant legislative clerk read as follows:

A bill (S. 388) to provide for 5-year staggered terms for members of the Federal Energy Regulatory Commission, and for other purposes, which had been reported from the Committee on Energy and Natural Resources, with amendments as follows:

(The parts of the bill intended to be stricken are shown in boldface brackets, and the parts of the bill intended to be inserted are shown in italic.)

S. 388

Be it enacted by the Senate and House Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Federal Energy Regulatory Commission Member Term Act of 1989".

SEC. 2. FIVE-YEAR TERMS FOR MEMBERS OF THE FEDERAL ENERGY REGULATORY COMMISSION.

(a) IN GENERAL.—Section 401(b) of the Department of Energy Organization Act is amended by striking "four years" in the third sentence and inserting "five years".

(b) STAGGERED TERMS.—Section 401(b) of such Act is amended by—

(1) inserting "(1)" after "(b)";

(2) striking the [fourth, sixth, and seventh] *fourth and sixth* sentences; [and]

(3) amend the seventh sentence to read, "A Commissioner may continue to serve after the expiration of his term until his successor is appointed and has been confirmed and taken the oath of Office, except that such Commissioner shall not continue to serve beyond the end of the session of the Congress in which such term expires,"; and

[3] *(4)* Adding at the end thereof the following:

"(2) Notwithstanding the provisions of paragraph (1), the terms of members first taking office after the date of enactment of the Federal Energy Regulatory Commission Member Term Act of 1989 shall expire as follows:

"(A) In the case of the member appointed to succeed the member whose term expires in 1989, such member's term shall expire on [December 31] *June 30* of the fourth year after the expiration of the predecessor's term.

"(B) In the case of members appointed to succeed members whose terms expire in 1991, one such member's term shall expire in 1991, one such member's term shall expire on [December 31] *June 30* of the third year after the expiration of the predecessor's term, and one such member's term shall expire on [December 31] *June 30* of the fourth year after the expiration of the predecessor's term, as designated by the President at the time of appointment.

"(C) In the case of members appointed to succeed members whose terms expire in 1992, one such member's term shall expire on [December 31] *June 30* of the fourth year after the expiration of the predecessor's term and one such member's term shall expire on [December 31] *June 30* of the fifth year after the expiration of the predecessors term.

"(D) Any member appointed to fill a vacancy occurring prior to the expiration for the term for which his predecessor was appointed shall be appointed only for the remainder of such term.".

(c) APPLICABILITY—The amendments made by this section apply only to persons appointed or reappointed as members of the Federal Energy Regulatory Commission after the date of enactment of this Act.

SEC. 3. COMPENSATION OF THE CHAIRMAN AND MEMBERS.

Section 204 of the Department of Energy Organization Act is amended by striking the second and third sentences and inserting in lieu thereof the following: "The Chairman shall be compensated at the rate provided for level II of the Executive Schedule under section 5313 of title 5. The other members of the Commission shall be compensated at the rate provided for level III of the Executive Schedule under section 5314 of title 5.".

SEC. 4. ACCESS TO STAFF AND PARTICIPATION IN POLICYMAKING AND SCHEDULING.

Section 401(c) of the Department of Energy Organization Act is amended by striking the period at the end of the first sentence of subsection (c) and inserting in lieu thereof, ": Provided, That the Commission (i) shall have full access to the Commission staff and resources and (ii) shall direct the formulation of policy and scheduling of matters including, but not limited to, generic policy initiatives and Congressional reports and testimony.".

The ACTING PRESIDENT pro tempore. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

AMENDMENT NO. 1143

Mr. LOTT. Mr. President, on behalf of Senator MCCLURE, I send an amendment to the desk and ask for its immediate consideration.

The ACTING PRESIDENT pro tempore. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Mississippi [Mr. LOTT], for Mr. MCCLURE, proposes an amendment numbered 1143.

On page 4, strike section 4.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment (No. 1143) was agreed to.

Mr. CRANSTON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LOTT. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MCCLURE. Mr. President, the amendment I am offering proposes to strike section 4 of S. 388, the Federal Energy Regulatory Commission Member Term Act of 1989. Section 4 would statutorily give Commissioners full access to FERC staff and resources, and it would statutorily provide for their full participation in the formulation of policy and the scheduling of Commission actions.

Section 4 was added to S. 388 by an amendment I offered in committee, which was adopted unanimously by the committee.

Mr. President, until just recently in the Commission's long history, that which my amendment requires statutorily was, in fact, the normal course of business; FERC Commissioners had full and unfettered access to all Commission staff, and they were full partners in the formulation and implementation of Commission policy.

However, at the time I offered my amendment in committee, it was clear that there were serious and worsening collegiality problems at the Commission, problems which were preventing the Commissioners from fully executing their duties and responsibilities. This was confirmed to me by several of the FERC Commissioners both at open committee hearings and in private.

Mr. President, the Federal Energy Regulatory Commission may be little known outside of Washington, but it routinely acts on matters which touch on the lives, fortunes, and well-being of citizens and businesses in every State of the Nation. It is essential that each and every Commissioner have at his or her disposal all of the information and assistance necessary for them to make decisions which are in the overall public interest. Failure to do so adversely affects the Nation's well-being. That is why I believed my amendment was important, and that is why the committee adopted it.

Subsequent to the committee's adoption of my amendment, however, changes have taken place which assure me that the problems that my amendment sought to remedy will no longer occur. We now have a new Commission Chairman who has pledged in private and in public that he will do everything in his power to restore the collegiality that had previously been the norm at the Commis-

sion. I have reviewed Mr. Allday's record as solicitor of the Department of the Interior, and I feel fully confident that that will be the case. Thus, there is no longer any reason for retaining section 4 of S. 388.

Mr. President, lest there be no mistake, let me say that there undoubtedly will still be strong disputes among the Commissioners. The Commission is made up of five individually appointed and Senate confirmed members so that all aspects of a proposed policy will be fully reviewed. And that virtually assures that there will be strong differences of opinion from time to time. That is not only predictable, it is healthy.

However, I no longer believe that the individual Commissioners will be forced to labor under the handicap which has, for too long now, crippled their ability to execute their duties and responsibilities—the situation which necessitated my amendment.

Mr. President, I feel assured and confident that section 4 is no longer necessary or warranted, and it is for these reasons that I offer my amendment today to strike section 4 of S. 388.

The ACTING PRESIDENT pro tempore. The bill is open to further amendment.

If there be no further amendment to be proposed, the question is on agreeing to the committee amendment, as amended.

The committee amendment, as amended, was agreed to.

The ACTING PRESIDENT pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 388

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Federal Energy Regulatory Commission Member Term Act of 1989".

SEC. 2. FIVE-YEAR TERMS FOR MEMBERS OF THE FEDERAL ENERGY REGULATORY COMMISSION.

(a) IN GENERAL.—Section 401(b) of the Department of Energy Organization Act is amended by striking "four years" in the third sentence and inserting "five years".

(b) STAGGERED TERMS.—Section 401(b) of such Act is amended by—

(1) inserting "(1)" after "(b)";

(2) striking the fourth and sixth sentences;

(3) amend the seventh sentence to read, "A Commissioner may continue to serve after the expiration of his term until his successor is appointed and has been confirmed and taken the oath of Office, except that such Commissioner shall not continue to serve beyond the end of the session of the Congress in which such term expires."; and

(4) adding at the end thereof the following:

"(2) Notwithstanding the provisions of paragraph (1), the terms of members first taking office after the date of enactment of the Federal Energy Regulatory Commission Member Term Act of 1989 shall expire as follows:

"(A) In the case of the member appointed to succeed the member whose term expires in 1989, such member's term shall expire on June 30 of the fourth year after the expiration of the predecessor's term.

"(B) In the case of members appointed to succeed members whose terms expire in 1991, one such member's term shall expire on June 30 of the third year after the expiration of the predecessor's term, and one such member's term shall expire on June 30 of the fourth year after the expiration of the predecessor's term, as designated by the President at the time of appointment.

"(C) In the case of members appointed to succeed members whose terms expire in 1992, one such member's term shall expire on June 30 of the fourth year after the expiration of the predecessor's term and one such member's term shall expire on June 30 of the fifth year after the expiration of the predecessor's term.

"(D) Any member appointed to fill a vacancy occurring prior to the expiration for the term for which his predecessor was appointed shall be appointed only for the remainder of such term.".

(c) *Applicability.*—The amendments made by this section apply only to persons appointed or reappointed as members of the Federal Energy Regulatory Commission after the date of enactment of this Act.

SEC. 3. COMPENSATION OF THE CHAIRMAN AND MEMBERS.

Section 204 of the Department of Energy Organization Act is amended by striking the second and third sentences and inserting in lieu thereof the following: "The Chairman shall be compensated at the rate provided for level II of the Executive Schedule under section 5313 of title 5. The other members of the Commission shall be compensated at the rate provided for level III of the Executive Schedule under section 5314 of title 5.".

Mr. CRANSTON. Mr. President, I move to reconsider the vote by which the bill, as amended, was passed.

Mr. LOTT. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

BILL PLACED ON CALENDAR—H.R. 1

Mr. CRANSTON. Mr. President, I ask unanimous consent that H.R. 1, the Department of Housing and Urban Development Reform Act of 1989, just received from the House, be placed on the Calendar.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. CRANSTON. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration en bloc of the following just received from the House: House Joint Resolution 357 and House Joint Resolution 358; that they be read a third time and passed, and the motion to reconsider the votes by which they were agreed to be laid on the table en bloc.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

REAPPOINTMENT OF SAMUEL C. JOHNSON

The joint resolution (H.J. Res. 357), providing for the reappointment of Samuel C. Johnson to the Board of Regents of the Smithsonian Institution, was considered, ordered to a third reading, read the third time, and passed.

REAPPOINTMENT OF JANNINE SMITH CLARK

The joint resolution (H.J. Res. 358), providing for the reappointment of Jannine Smith Clark to the Board of Regents of the Smithsonian Institution, was considered, ordered to a third reading, read the third time, and passed.

MEASURE PLACED ON CALENDAR—H.R. 3482

Mr. CRANSTON. Mr. President, I ask unanimous consent that H.R. 3482, the disaster forestry assistance bill just received from the House be placed on the calendar.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. CRANSTON. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar Orders Nos. 370, 371, 373, and 374 en bloc; that the committee amendments where appropriate be agreed to, that the bills be deemed read a third time and passed and motion to reconsider passage of the bills be laid upon the table.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. CRANSTON. I further ask unanimous consent that consideration of these items appear individually in the RECORD.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

REFORMULATION OF CEDAR BLUFF UNIT

The Senate proceeded to consider the bill (S. 53) to authorize the reformulation of the Cedar Bluff Unit of the Pick-Sloan Missouri Basin Program, Kansas, to provide for the amendment of water service and repayment contracts, which had been reported from the Committee on Energy

and Natural Resources, with amendments as follows:

(The parts of the bill intended to be stricken are shown in boldface brackets, and the parts of the bill intended to be inserted are shown in italic.)

S. 53

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. AUTHORIZATION OF REFORMULATION.

The Secretary of the Interior (hereafter in this act referred to as the "Secretary"), pursuant to the provisions of the Memorandum of Understanding between the Bureau of Reclamation and the Fish and Wildlife Service of the Department of the Interior, the State of Kansas, and the Cedar Bluff Irrigation District No. 6, dated December 17, 1987, is authorized to reformulate the Cedar Bluff Unit of the Pick-Sloan Missouri Basin Program, Kansas, including reallocation of the conservation capacity of the Cedar Bluff Reservoir, to create—

(1) a designated operating pool, as defined in such Memorandum of Understanding, for fish, wildlife, and recreation purposes, for groundwater recharge for environmental, domestic, municipal, industrial, and irrigation uses, and for other purposes; and

(2) a joint-use pool, as defined in such Memorandum of Understanding, for flood control, for water sales, for fish, wildlife, and recreation purposes, and for other purposes.

SEC. 2. CONTRACT WITH THE STATE OF KANSAS FOR OPERATING POOL.

The Secretary may enter into a contract with the State of Kansas for the sale, use and control of the designated operating pool, with the exception of water reserved for the city of Russell, Kansas, and to allow the state of Kansas to acquire use and control of water in the joint-use [pool.] *pool: Provided, That the State of Kansas shall not permit utilization of water from Cedar Bluff Reservoir to increase irrigation of lands in the Smoky Hill River Basin from Cedar Bluff Reservoir to its confluence with Big Creek.*

SEC. 3. CONTRACT WITH THE STATE OF KANSAS FOR CEDAR BLUFF DAM AND RESERVOIR.

(a) AUTHORIZATION.—The Secretary may enter into a contract with the State of Kansas, accepting a payment of $365,424, and the State's commitment to pay a proportionate share of the annual operation, maintenance, and replacement charges for the Cedar Bluff Dam and Reservoir, as full satisfaction of [the] *all* reimbursable costs associated with irrigation of the Cedar Bluff Unit, including the Cedar Bluff Irrigation District's obligations under Contract No. 0-07-70-W0064. [After the reformulation of the Cedar Bluff Unit authorized by this Act, any revenues in excess of operating expenses received from the sale of water from the Cedar Bluff Unit shall be allocated to pay the United States for the cost of the project.] *After the reformulation of the Cedar Bluff Unit authorized by this Act, any revenues in excess of operating and maintenance expenses received by the State of Kansas from the sale of water from the Cedar Bluff Unit shall be paid to the United States and covered into the Reclamation Fund to the extent that an operation, maintenance and replacement charge or reimbursable capital obligation exists for the Cedar Bluff Unit under Reclamation law. Once all such operation, maintenance and replacement charges or reimbursable obligations are satisfied, any additional revenues shall be retained by the State of Kansas.*

(b) TRANSFER OF FISH HATCHERY.—The Secretary may transfer ownership of the buildings, fixtures, and equipment of the United States Fish and Wildlife Service fish hatchery facility at Cedar Bluff Dam, and the related water rights, to the State of Kansas for its use and operation for fish, wildlife, and related purposes. *If any of the property transferred by this subsection to the State of Kansas is subsequently transferred from State ownership or used for any purpose other than those provided for in this subsection, title to such property shall revert to the United States.*

SEC. 4. TRANSFER OF DISTRICT HEADQUARTERS.

The Secretary may transfer title to all interests in real property, buildings, fixtures, equipment, and tools associated with the Cedar Bluff Irrigation District headquarters located near Hays, Kansas, contingent upon the District's agreement to close down the irrigation system to the satisfaction of the Secretary at no additional cost to the United States, after which all easement rights shall revert to the owners of the lands to which the easements are attached [The transferee of any interests conveyed pursuant to this section shall assume all liability with respect to such interests and shall indemnify the United States against all such liability.]

"SEC. 5. LIABILITY AND INDEMNIFICATION.

The transferee of any interest conveyed pursuant to this Act shall assume all liability with respect to such interests and shall indemnify the United States against all such liability.

SEC. [5] 6. ADDITIONAL ACTIONS.

The Secretary may take all other actions consistent with the provisions of the Memorandum of Understanding referred to in section 1 that the Secretary deems necessary to accomplish the reformulation of the Cedar Bluff Unit.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, was read the third time and passed.

CONSTRUCTION AND TESTING LAKE MEREDITH SALINITY CONTROL PROJECT

The Senate proceeded to consider the bill (S. 486) to authorize the Secretary of the Interior to construct and test the Lake Meredith Salinity Control Project, New Mexico and Texas, and for other purposes, which has been reported from the Committee on Energy and Natural Resources, with amendments as follows:

(The parts of the bill intended to be stricken are shown in boldface brackets, and the parts of the bill intended to be inserted are shown in italic.)

S. 486

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. AUTHORIZATION TO CONSTRUCT AND TEST.

The Secretary of the Interior (hereafter in this Act referred to as the "Secretary") is authorized to construct and test the Lake Meredith Salinity Control Project, New Mexico and Texas, in accordance with the Federal Reclamation laws (Act of June 17, 1902, 32 Stat. 788, and Acts amendatory thereof or supplementary thereto) and the provisions of this Act and the plan set out in the June 1985 Technical Report of the Bureau of Reclamation on this project with such modification of, omissions from, or additions to the works, as the Secretary may find proper and necessary for the purpose of improving the quality of water delivered to the Canadian River downstream of Ute Reservoir, New Mexico, and entering Lake Meredith, Texas. The principal features of the project shall consist of production wells, observation wells, pipelines, pumping plants, brine disposal facilities, and other appurtenant facilities.

SEC. 2. CONSTRUCTION CONTRACT WITH THE CANADIAN RIVER MUNICIPAL WATER AUTHORITY.

(a) AUTHORITY TO CONTRACT.—The Secretary is authorized to enter into a contract with the Canadian River Municipal Water Authority of Texas for the design and construction management of project facilities by the Bureau of Reclamation and for the payment of construction costs by the Canadian River Municipal Water Authority. Operation and maintenance of project facilities upon completion of construction and testing shall be the responsibility of the Canadian River Municipal Water Authority.

(b) CONSTRUCTION CONTINGENT ON CONTRACT.—Construction of the project shall not be commenced until a suitable contract has been executed by the Secretary with the Canadian River Municipal Water Authority of Texas and the State of New Mexico has granted the necessary permits for the project facilities.

SEC. 3. PROJECT COSTS.

(a) CANADIAN RIVER MUNICIPAL WATER AUTHORITY SHARE.—All costs of construction of project facilities shall be advanced by the Canadian River Municipal Water Authority as the non-Federal contribution toward implementation of this Act. Pursuant to the terms of the contract authorized by section 2, these funds shall be advanced on a schedule mutually acceptable to the Canadian River Municipal Water Authority and the Secretary, as necessary to meet the expense of carrying out construction and land acquisition activities.

(b) FEDERAL SHARE.—All project costs for verification, design preparation, and construction management (estimated to be approximately 33 percent of the total project cost) shall be nonreimbursable as the Federal contribution for environmental enhancement by water quality improvement.

SEC. 4. CONSTRUCTION AND CONTROL.

(a) PRECONSTRUCTION.—The Secretary shall, upon entering into a mutually acceptable agreement with the Canadian River Municipal Water Authority, proceed with preconstruction planning, preparation of designs and specifications, acquiring permits, acquisition of land and rights, and award of construction contracts pending availability of appropriated funds.

(b) TERMINATION OF CONSTRUCTION.—At any time following the first advance of funds by the Canadian River Municipal Water Authority, the Canadian River Municipal Water Authority may request that the Secretary terminate activities then in progress, and such request shall be binding upon the [Secretary.] *Secretary: Provided, however, That upon termination of construction pursuant to this section, the Canadian River Municipal Water Authority shall reimburse to the Secretary of the Interior a sum equal to 67 percent of all costs incurred*

by the Secretary in project verification, design and construction management, reduced by any sums previously paid by the Authority to the Secretary for such purposes. Upon such termination, the United States is under no obligation to complete the project as a nonreimbursable development.

[(b)] *(c)* TRANSFER OF CONTROL.—Upon completion of construction and testing of the project, or upon termination of activities at the request of the Canadian River Municipal Water Authority, *and reimbursement of Federal costs pursuant to subsection 4(b) of this Act,* the Secretary shall transfer the care, operation, and maintenance of the project works to the Canadian River Municipal Water Authority or to a bona fide entity mutually agreeable to the States of New Mexico and Texas. As part of such transfer, the Secretary shall return unexpended balances of the funds advanced, assign to the Canadian River Municipal Water Authority or the bona fide entity the rights to any contract in force, convey to the Canadian River Municipal Water Authority or the bona fide entity any real estate, easements, or personal property acquired by the advanced funds, and provide any data, drawings, or other items of value procured with advanced funds.

SEC. 5. AUTHORIZATION

[There are hereby authorized to be appropriated such sums as are necessary to carry out the provisions of this Act.]

There is hereby authorized to be appropriated to carry out the provisions of this Act the sum of $3,000,000 (October 1989 price levels), plus or minus such amounts, if any, as may be required by reason of ordinary fluctuations in construction costs as indicated by engineering cost indexes applicable to the types of construction involved herein.

SEC. 6. WETLANDS INVENTORY AND REPORT.

(a) The Secretary of the Interior is directed to inventory all wetlands on Federal lands or interests therein owned by or withdrawn for the use of the Bureau of Reclamation and, to the extent practicable, other Federal lands associated with reclamation projects. As part of the inventory, the Secretary shall make an initial determination of the value of such wetlands for purposes such as, but not limited to, recruitment and survival of waterfowl and other wetland dependent species, flood control, water quality, and sedimentation control.

(b) In assessing the value of wetlands for recruitment and survival of waterfowl and other wetland dependent species, the Secretary shall consider, among other things, the presence of factors supporting abundant and diverse wetland ecosystems, including, but not limited to:

(1) high primary productivity and functioning food chains;

(2) seasonal values for waterfowl breeding, nesting, staging and wintering; and

(3) protection from predation and disease.

(c) The Secretary shall indicate those wetland areas identified pursuant to subsection (a) of this section which also have been identified for protection or restoration pursuant to the North American Waterfowl Management Plan or by such entities as the Secretary deems appropriate.

(d) In fulfillment of this section, the Secretary is encouraged to consult with appropriate State and private entities.

(e) Not later than February 1, 1990, the Secretary shall report to the Senate Committee on Energy and Natural Resources, the Senate Committee on Appropriations, the House Committee on Interior and Insular Affairs and the House Committee on Appropriations a plan for implementation of this section, including identification of any reprogramming of funds required in fiscal year 1990 and such other resources as may be required.

(f) The Secretary shall report the results of the inventory authorized by this section to the Senate Committee on Energy and Natural Resources and the House Committee on Interior and Insular Affairs not later than December 31, 1991.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, was read the third time and passed.

LEADVILLE MINE DRAINAGE TREATMENT ACT

The bill (S. 1275) to authorize the Secretary of the Interior to construct, operate, and maintain a water treatment plant for the purpose of treating water discharged from the Leadville Mine Drainage Tunnel near Leadville, CO, in order to meet water quality standards, and for other purposes, was considered, ordered to be engrossed for a third reading, read the third time, and passed; as follows:

S. 1275

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, This Act may be cited as the "Leadville Mine Drainage Treatment Act of 1989".

SEC. 101. The Secretary of the Interior is authorized to construct, operate, and maintain a water treatment plant, including the disposal of sludge produced by said treatment plant as appropriate, and to install concrete lining on the rehabilitated portion of the Leadville Mine Drainage Tunnel, in order that water flowing from the Leadville Tunnel may meet water quality standards.

SEC. 102. Construction, operation and maintenance costs of the works authorized by this Act shall be nonreimbursable.

SEC. 103. The Secretary of the Interior shall be responsible for operation and maintenance of the water treatment plant, including sludge disposal authorized by this Act. The Secretary may contract for these services.

SEC. 104. There is hereby authorized to be appropriated beginning October 1, 1989, for construction of a water treatment plant for water flowing from the Leadville Mine Drainage Tunnel, including sludge disposal, and concrete lining the rehabilitated portion of the tunnel, the sum of $10,700,000 (October 1988 price levels), plus or minus such amounts, if any, as may be required by reason of ordinary fluctuations in construction costs as indicated by engineering cost indexes applicable to the types of construction involved herein and, in addition thereto, such sums as may be required for operation and maintenance of the works authorized by this Act.

SEC. 105. The treatment plant authorized by this Act shall be designed and constructed to treat the quantity and quality of effluent historically discharged from the Leadville Mine Drainage Tunnel.

CLARA BARTON PARKWAY

The Senate proceeded to consider the bill (H.R. 1310) to redesignate a certain portion of the George Washington Memorial Parkway as the "Clara Barton Parkway."

Mr. SARBANES. Mr. President, I rise in strong support of H.R. 1310, redesignating a portion of the George Washington Memorial Parkway as the "Clara Barton Parkway." I commend the chaiman of the Energy and Natural Resources Committee, Senator JOHNSTON, and the chairman of the Subcommittee on Public Lands, National Parks and Forests, Senator BUMPERS, for moving this bill to the floor so expeditiously.

This legislation accomplishes two important goals. First, it honors a great humanitarian, Clara Barton, founder of the American Red Cross. Clara Barton dedicated her life to helping people. As a teacher, she helped promote public education by establishing free schools in the East. She moved to Washington and became one of the earliest female Government workers. During the Civil War, she nursed and organized assistance for Union soldiers wounded on the battlefields at Manassas, Antietam, and Charleston. After the war, she became an avid supporter of the civil rights and women's rights movements. In 1881, Barton founded and became first president of the American Red Cross. It was her unique contribution that the misson of the Red Cross was expanded from providing aid during wartime to include providing relief after natural disasters.

Barton spent the last 15 years of her life in Glen Echo, MD, and her home, the first permanent headquarters of the American Red Cross and a national historic site, is immediately adjacent to the Maryland portion of the George Washington Parkway. It should be pointed out that Barton's work has been continued by the millions of Red Cross volunteers who have served their fellow citizens in times of need. From collecting blood, to teaching first aid, to assisting the victims of the recent San Francisco earthquake, the American Red Cross has carried on her noble tradition of providing humanitarian aid. It is therefore a fitting and appropriate tribute to Clara Barton and to the movement which she founded to rename this section of the parkway in her honor.

Second, redesignating this parkway would help to eliminate the confusion and frustration which currently exists for motorists using the George Washington Parkway. The George Washington Memorial Parkway runs on both sides of the Potomac, in two different States, with two different destinations, yet bears the same name. Renaming the Maryland side of the parkway after Clara Barton would remove the name confusion and be especially helpful to visitors and commuters in our area.

This renaming is strongly supported by the president emeritus of the American Red Cross, George M. Elsey, Maryland Gov. William Donald Schaefer, the Montgomery County delegation to the General Assembly, the Montgomery County Council, and the Chesapeake and Ohio Canal Association. It would result in a very minimal cost to the Federal Government and would certainly accomplish its two important goals.

I urge swift enactment of this measure.

The bill was ordered to a third reading, read the third time, and passed.

SUBSTITUTION OF CONFEREE

Mr. CRANSTON. I ask unanimous consent, Mr. President, that Senator WILSON be added as a conferee for H.R. 3614, H.R. 3630, H.R. 3550, and H.R. 3611 in lieu of Senator THURMOND.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

CENTENNIAL OF THE BIRTH OF PANDIT JAWAHARLAL NEHRU

Mr. CRANSTON. Mr. President, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of House Concurrent Resolution 217 honoring the centennial of the birth of Pandit Nehru, India's first Prime Minister, and that the Senate proceed to its immediate consideration.

The ACTING PRESIDENT pro tempore. The concurrent resolution will be stated by title.

The assistant legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 217) honoring the centennial of the birth of India's Pandit Jawaharlal Nehru.

The ACTING PRESIDENT pro tempore. Is there objection to the immediate consideration of the concurrent resolution?

There being no objection, the Senate proceeded to consider the concurrent resolution.

Mr. MOYNIHAN. Mr. President, 42 years ago the second most populous nation on earth, India, was teetering on the edge of chaos as it emerged from its colonial status. It could easily have followed the path of so many other poor and struggling nations and turned to totalitarianism. It did not. Today India is the world's largest democracy. Indeed. When Indians go to the polls later this year they will be participating in the largest democratic event in the history of the world.

No one deserves more credit for establishing a democratic India than its first Prime Minister, Pandit Jawaharlal Nehru. Despite daunting challenges, including dire poverty and religious and ethnic conflict, Nehru played a crucial role in molding India into a strong, independent, and democratic nation.

This is the centennial year of Nehru's birth. The concurrent resolution before the Senate today honors this man who helped to ensure that some 800 million Indians would live—as they do today—in a democratic nation. I am certain that my colleagues will join me in supporting the concurrent resolution.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the concurrent resolution.

The concurrent resolution (H. Con. Res. 217) was agreed to.

Mr. CRANSTON. Mr. President, I move to reconsider the vote.

Mr. LOTT. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

MEASURE PLACED ON CALENDAR—H.R. 3629

Mr. CRANSTON. Mr. President, I ask unanimous consent that H.R. 3629, a bill to extend the authority of the Secretary of Commerce to conduct the Quarterly Financial Report Program of the Census Bureau, be placed on the calendar.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

DETENTION OF PERSONS FOUND GUILTY OF CERTAIN VIOLENT OR DRUG OFFENSES

Mr. CRANSTON. I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 360, S. 1259, a bail reform bill.

The ACTING PRESIDENT pro tempore. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 1259) to amend Section 3143 of title 18, United States Code.

The ACTING PRESIDENT pro tempore. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

The ACTING PRESIDENT pro tempore. The bill is before the Senate and open to amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 1259

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Mandatory Detention for Offenders Convicted of Serious Crimes Act".

SEC. 2. MANDATORY DETENTION.

(a) PENDING SENTENCE.—Subsection (a) of section 3143 of title 18, United States Code, is amended by—

(1) striking "The judicial officer" and inserting "(1) Except as provided in paragraph (2), the judicial officer"; and

(2) inserting at the end thereof the following:

"(2) The judicial officer shall order that a person who has been found guilty of an offense in a case described in subparagraph (A), (B), or (C) of subsection (f)(1) of section 3142 and who is waiting for imposition of execution of sentence be detained.".

(b) PENDING APPEAL.—Subsection (b) of section 3143 of title 18, United States Code, is amended by—

(1) striking "The judicial officer" and inserting "(1) Except as provided in paragraph (2), the judicial officer";

(2) redesignating subparagraphs (A), (B), (C), and (D) of paragraph (2) as clauses (i), (ii), (iii), and (iv), respectively;

(3) redesignating paragraphs (1) and (2) as subparagraphs (A) and (B); and

(4) adding at the end thereof the following:

"(2) The judicial officer shall order that a person who has been found guilty of an offense in a case described in subparagraph (A), (B), or (C) of subsection (f)(1) of section 3142 and sentenced to a term of imprisonment, and who has filed an appeal or a petition for a writ of certiorari, be detained.".

SEC. 3. CLARIFICATION OF LENGTH OF CONTINUANCE PRIOR TO A DETENTION HEARING.

Section 3142(f) of title 18, United States Code, is amended in the matter following paragraph (2) by inserting after the second sentence the following: "The period provided for a continuance under the preceding sentence shall include Saturdays, Sundays, and holidays.".

Mr. CRANSTON. Mr. President, I move to reconsider the vote.

Mr. LOTT. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDERS FOR TOMORROW

RECESS UNTIL 9:45 A.M.; MORNING BUSINESS; CONSIDERATION OF LABOR-HHS APPROPRIATIONS

Mr. CRANSTON. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 9:45 a.m. on Thursday, November 16. I further ask unanimous consent that following the time for the two leaders there be a period for morning business until 10:30 a.m., with Senators permitted to speak therein for up to 5 minutes each. I further ask unanimous consent that at 10:30 a.m. the Senate begin consideration of the Labor-HHS appropriations bill, H.R. 3566.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

RECESS UNTIL 9:45 A.M. TOMORROW

Mr. CRANSTON. Mr. President, now if the acting Republican leader has no further business——

Mr. LOTT. Mr. President, we have no further business.

Mr. CRANSTON. I therefore now ask unanimous consent that the Senate stand in recess until 9:45 a.m. on Thursday, November 16.

There being no objection, the Senate, at 9:55 p.m., recessed until Thursday, November 16, 1989, at 9:45 a.m.

NOMINATIONS

Executive nominations received by the Senate November 15, 1989:

DEPARTMENT OF STATE

HARRIET WINSAR ISOM, OF OREGON, A CAREER MEMBER OF THE SENIOR FOREIGN SERVICE, CLASS OF MINISTER-COUNSELOR, TO BE AMBASSADOR EXTRAORDINARY AND PLENIPOTENTIARY OF THE UNITED STATES OF AMERICA TO THE PEOPLE'S REPUBLIC OF BENIN.

UNITED NATIONS

THE FOLLOWING-NAMED PERSONS TO BE REPRESENTATIVES AND ALTERNATE REPRESENTATIVES OF THE UNITED STATES OF AMERICA TO THE 44TH SESSION OF THE GENERAL ASSEMBLY OF THE UNITED NATIONS:

Representatives

THOMAS R. PICKERING, OF NEW JERSEY.
ALEXANDER FLETCHER WATSON, OF MASSACHUSETTS.

Alternate representatives

JONATHAN MOORE, OF MASSACHUSETTS.
MILTON JAMES WILKINSON, OF NEW HAMPSHIRE.

DEPARTMENT OF JUSTICE

RONALD FRANK EDERER, OF TEXAS, TO BE U.S. ATTORNEY FOR THE WESTERN DISTRICT OF TEXAS FOR THE TERM OF 4 YEARS, VICE HELEN M. EVERSBERG, TERM EXPIRED.

DEPARTMENT OF EDUCATION

JOHN T. MACDONALD, OF NEW HAMPSHIRE, TO BE ASSISTANT SECRETARY FOR ELEMENTARY AND SECONDARY EDUCATION, DEPARTMENT OF EDUCATION, VICE BERYL DORSETT, RESIGNED.

CONFIRMATION

Executive nomination confirmed by the Senate November 15, 1989:

DEPARTMENT OF TRANSPORTATION

BRIAN W. CLYMER, OF PENNSYLVANIA, TO BE URBAN MASS TRANSPORTATION ADMINISTRATOR.

THE ABOVE NOMINATION WAS APPROVED SUBJECT TO THE NOMINEE'S COMMITMENT TO RESPOND TO REQUESTS TO APPEAR AND TESTIFY BEFORE ANY DULY CONSTITUTED COMMITTEE OF THE SENATE.

EXTENSIONS OF REMARKS

THE TRUTH ABOUT WHAT THE U.N. OFFICIAL SAID TO THE CONTRAS

HON. GEO. W. CROCKETT, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. CROCKETT. Mr. Speaker, last month the Secretary of State took the unusual and unfortunate step of writing to the Secretary General of the United Nations to object to the alleged remarks of the Secretary General's representative to the Central American peace process, in which the representative encouraged the contras to abide by the Central American peace agreement.

I do not understand why the United States should have any objection to this United Nations official doing his job. Furthermore, according to a report by the Center for International Policy, the official was quoted out of context. So that my colleagues will know the truth about what he said, I include the Center's report at this point:

UN OFFICIAL'S SPEECH WAS CONCILIATORY

A Washington Post story of October 14, 1989 correctly reported the importance but inadvertently hardened the tone of a UN official's speech to the contras in Honduras last week. The visit to the contra camp was indeed a significant step forward in the regional peace process fully deserving the prompt, front-page coverage it received in the newspaper, but a transcript of the Spanish text of the official's speech shows that it lacked the hard, antagonistic tone that was conveyed by the newspaper article.

Specifically, the official, Francesc Vendrell, did not assert outright that U.S. policy was anachronistic and has been abandoned by the country that helped the contras. Rather he couched this thought in conditional, suggestive terms, reminding the contras that they were Nicaraguans, "patriots and people of Nicaragua," and advising them not to let themselves become the object of a policy that "could perhaps become an anachronistic policy" and not let themselves be abandoned by a country that at a given time were helping them. In the newspaper the official was quoted as saying bluntly, "You are Nicaraguans and not the objects of a [U.S.] policy that is anachronistic and has been abandoned by the country that helped you."

The complete text of Vendrell's remarks to the Contra troops on October 12 in Yamales, Honduras follows:

"We are here on a mission of peace and reconciliation. The Central American presidents have decided that the RN [Nicaraguan Resistance] has completed its mission and in a relatively short period of time should demobilize and return to Nicaragua. The commission is here to assure that your return is voluntary. The commission is here to ascertain your wishes, the wishes of each and every one of you because now if you want a democratic and free Nicaragua you have the possibility here of expressing your wishes freely. Therefore I would simply leave you with this thought, that the CIAV [International Commission for Support and Verification] is here to help you, to promote your return, your voluntary return, but you should simply keep two things in mind. You are in a foreign territory and can only stay here as long as the government of this country lets you. In the second place, I want you to remember that you are Nicaraguans, patriots and people of Nicaragua. Don't let yourselves be the objects of a policy that could perhaps become an anachronistic policy. Don't let yourselves be abandoned by a country that at a given time helped you. Thank you very much."

While the difference between the news story and the transcript is not a major difference in journalistic terms, it does make a difference diplomatically. It conveyed an intent different from that of the speaker. The official found himself in an unexpected situation. After conferring with the contra commanders in their tents, Vendrell and an OAS official, Hugo de Zela, reviewed contra troops who then stood with their weapons singing the national anthem. Contra leader and former National Guard colonel Enrique Bermudez addressed the three thousand troops, defiantly refusing to consider demobilization until there was true democracy in Nicaragua and the "Marxist-Leninist regime" removed. He then handed the bullhorn to Vendrell.

Vendrell, a top aide to Secretary-General Javier Perez de Cuellar, had had no time to prepare remarks and was reluctant to speak at all. Once underway, however, he had to say something that would reflect the demobilization mandate given to the UN-OAS commission by the five Central American presidents—the more so, since this might well be the only opportunity the commission would have to address the contra rank-and-file. Since the commanders had insisted on renewing their struggle, Vendrell was obligated to convey to the rank-and-file some realistic sense of their situation, namely that U.S. military aid could well become a thing of the past and that if they staked their futures on the assumption that the United States would support more war, they could be left high and dry. If he had said any less, he would have failed to address the contras' objective situation, would have failed to deliver the message of Tela, and would have allowed a UN mission sent by the five presidents of Central America to have been drowned out by a military commander.

The contras applauded his speech. In fact, they shared his views. The contras did not react hostilely, nor did their leadership.

However, an effort to be truthful to the assembled contras and faithful to the regional mandate given the UN commission emerged in the totally different environment of Washington as a blunt attack on U.S. policy.

When several Republican senators complained, Secretary Baker sent U.S. ambassador to the UN Thomas Pickering and a State Department official from Washington to see Secretary-General Perez de Cuellar. The secretary-general told the Americans that it was regrettable that his aide, Vendrell, had been quoted out of context. He then issued a statement at his daily briefing saying that Vendrell's remarks had given rise to misunderstandings about the UN's impartiality, and this he regretted. This amounted to damage control, but something less than the "repudiation" that the Washington Post reported on October 17.

Vendrell in his short remarks did take care to balance his cautioning advice to the contras with an emphasis on the voluntary nature of their demobilization, thus taking the U.S. position. Nicaragua has insisted that the demobilization is required, not voluntary.

NICARAGUAN TELEVISION INTERVIEW

Vendrell took a similar conciliatory line in an interview he gave to the main Nicaraguan television station on October 15. The full text follows:

Q. We are going to speak with Francesc Vendrell, who is the representative of the Secretary-General of the United Nations on the CIAV.

The whole world is waiting to learn exactly how your visit to Honduras and the camps went. There is much information and speculation.

Exactly what message did you take from Honduras to the Nicaraguan authorities?

A. Perhaps I could in this case convey to the general public a message of patience and flexibility, because this is truly a difficult situation. As I explained the last time I was in Nicaragua and as I also said in Honduras, it is very difficult to resolve in a few days a problem that has been created over eight years. I believe that above all the message I would bring, and I'm simply going to repeat it—the government has said it many times, President Ortega has said it—is that the members of the Resistance are Nicaraguans, they come from the people and are in a difficult, complex situation where they must be allowed to make their own decisions, through the leaders chosen by themselves. And the right that you are going to exercise at the end of February they also have the power to exercise, at least in their camps, in the sense that the members of the Resistance have the power to decide their own future.

Q. What has been the response of the government to this plea for patience?

A. This plea for patience and flexibility of positions—and I am not suggesting that the government has not been flexible—is a message that the secretaries-general at the moment of creation of CIAV, on the sixth of August, sent to the Central American presidents by noting that the deadlines were very short. This is not to say that we will not do all that is possible to meet those deadlines. For example, I mentioned the deadlines to the troops when I was in Yamales because I felt that I was obligated, as the representative of the CIAV, created by the Central American presidents, to explain to them or at least summarize in a very few words the contents of the Tela declaration and the fact that it has definite deadlines, at least for the moment, fixed by the presidents of Central America.

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

Q. In this case a plea of this kind can only be accepted when the other party, in this case the contras, have also decided to respect the accords of the Central American presidents. Have you seen any indication that they have done so?

A. This is a bit problematic. One would have to be quite unrealistic to assume that just because the five Central American presidents have set deadlines and have taken the decision that the Nicaraguan Resistance has to be demobilized that the Resistance is simply going to go home. This is why the CIAV was created. In part, the purpose of the CIAV is to promote the decision to demobilize, the decision to return to Nicaragua or, if absolutely necessary, to go to a third country. So I am not surprised and am not disheartened because we have not yet heard a reaction that could be called positive. What is important is that we were in Yamales and that the Nicaraguan Resistance decided to accept the presence of the CIAV in its camps. It is a signal, it is without doubt an indication of progress, because they could have refused our visit or not have provided the facilities. Although it is only a first step, it is an important one.

Q. We were discussing this with a member of the counterpart of the CIAV in Nicaragua, a Nicaraguan member, who told us that our country we have complied by launching an electoral process and that strict deadlines have been set for every aspect of the elections. Therefore, deadlines should also apply in the case of the contras.

A. Yes, but we have to take into account two points. First, the Resistance has not signed the Tela accords, so one cannot say that the Resistance has to comply because the other side is complying; they are not a party to the agreement. In the second place, there is a certain conflict between the elections, which are at the end of Feburary, and the date set for the demobolization of the Resistance which in principle is supposed to take place in December. This implies not only demobilization but actually vacating their camps by the fifth of December. This is one of the problems, for if everything were perfect, then one thing would precede the other.

Q. I wonder whether although the contras have not signed, they have issued declarations of respect for the accords and have said in principle that they are willing to demobilize if there is democratization in Nicaragua or if two steps [unintelligible section] they would be able to achieve demobilization.

A. Yes, what has happened is that there is a problem of lack of confidence. There is a lack of confidence on the part of the Nicaragaun Resistance that has been created during recent years, during which they have been the victim of a certain line of information, and they do not clearly perceive that those steps which you consider to have been taken have in fact been taken as many of us who have been able to be here have attested. There is a very, very serious lack of confidence. And this is the fundamental, basic problem that we must overcome.

Q. But in this case how can you overcome it, because in the case of the contras certainly they lack confidence but they have the support of the administration of the United States, which from a financial point of view . . . In this case to reconcile the interests of the CIAV on one hand, and the decision of the government of Nicaragua and the difficult position in which it finds itself. . . . [rest unintelligible]?

A. Most important here is the progress of the electoral process, above all an honest electoral process, verified, as is being done, by the United Nations and the OAS and by other international organizations. If this election is perceived as an honest election, then this will have a very great impact on the opinion of the Nicaraguan Resistance, above all among the members of the Resistance whom I would call the family, the people of Yamales.

TRIBUTE TO WILLIAM B. INGRAM

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. MATSUI. Mr. Speaker, I rise today to pay tribute to a truly special individual who has contributed significantly to education in California and across the Nation. William B. Ingram has served the past year as president of the California School Boards Association and is concluding his term in December. During his tenure as president and as a leader in education, Mr. Ingram has brought innovative ideas and thoughtful debate to the education community. His stature as a distinguished authority in education has become unquestioned through his demonstrated leadership as an educator and articulate spokesperson on behalf of children.

Mr. Ingram has demonstrated a lifelong commitment to youth. He has served in the Moreno Valley School District as a commissioner of juvenile justice and delinquency prevention and as a trustee and past president of the Perris Union High School District Board of Education. Over the past several years, Mr. Ingram has maintained an active role in education issues and has substantially increased the visibility of the California School Boards Association. Mr. Ingram has been directly responsible for the tremendous professional growth of the association in the areas of governmental relations, communications, research, board development, policy development and field services. His personal efforts to focus attention on specific education issues including at-risk children, early intervention, dropout prevention, and vocational education clearly indicate his compassion and concern for kids.

Mr. Speaker, on behalf of all my colleagues and all Americans who value a high quality of education for our Nation's children, I pay honor to the tireless efforts of Mr. William B. Ingram as he leaves the presidency of the California School Boards Association. It is with great pride and enthusiasm that we thank him for the lasting contributions he has already provided us, and those accomplishments we can expect from him in the future.

VERMONT LAW ENFORCEMENT AND NEW YORK MEDICAL GROUPS ENDORSE SEMIAUTOMATIC ASSAULT WEAPONS LEGISLATION

HON. FORTNEY PETE STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. STARK. Mr. Speaker, two statewide organizations, the Vermont State Association of Chiefs of Police and the New York Academy of Medicine, have recently endorsed H.R. 1190, The Semiautomatic Assault Weapons Act of 1989. I am proud to share their statements as part of the official record:

THE NEW YORK ACADEMY OF MEDICINE,
October 16, 1989.

Hon. FORTNEY H. (PETE) STARK,
House of Representatives, 1125 Longworth House Office Building, Washington, DC.

DEAR REPRESENTATIVE STARK: The New York Academy of Medicine favors moving in the direction of more stringent regulation of semiautomatic weapons. We endorse the steps that have been recently proposed or implemented by President Bush but urge that even stronger measures be adopted. Among the Fellows of the Academy are surgeons working in emergency rooms in New York City hospitals, who daily confront the task of caring for victims of gunshot wounds. They report an alarming increase in recent months in the number of persons coming to emergency rooms with gun shot wounds as a result of the use of semiautomatic assault weapons. Not only is the number of victims of gun shot wounds increasing but they also note the growing seriousness of the injuries reflecting greater use of this type of weapon. These trends point to the urgency of adopting measures to control the manufacture and sale of semiautomatic assault weapons.

We also wish to endorse some of the positive proposals in President Bush's May 15 speech on crime. We favor making permanent, as he does, the banning of foreign guns that are found to be unsuitable for hunting and support the President's proposals that would ban gun possession by persons convicted of a violent misdemeanor or who have committed a serious drug offense. We also urge passage of H.R. 1190, the Semiautomatic Assault Weapons Act, which deals with those weapons as well as large capacity ammunition feeding devices. This bill would make permanent the President's ban on importation of semiautomatic assault weapons but would also ban the domestic manufacture and sale of this type of weapon and would add additional useful features to a stronger federal policy on gun control. H.R. 1190 would control the nongovernmental sale and use of assault weapons by treating eleven types of semiautomatic assault weapons in the same way current federal law treats fully automatic machine guns.

The bill would not interfere with hunters who wish to purchase hunting rifles or hand guns. The manufacture and sale of semiautomatic assault weapons would be banned after enactment of the legislation. Current owners of semiautomatic weapons and ammunition devices so long as they register their weapons with the Bureau of Alcohol, Tobacco and Firearms in the U.S. Treasury Department. New owners of semiautomatic

weapons, however, would have to undergo a background check and would have to pay a transfer tax of $200 as well as registering their weapons.

As the number of victims of semiautomatic weapons grows, such legislation becomes imperative. The passage of H.R. 1190 would also assist law enforcement officers in their efforts to combat heavily armed drug traffickers.

Sincerely yours,

MARTIN CHERKASKY, M.D.,
Acting President.

CHIEFS OF POLICE ASSOCIATION OF VERMONT

RESOLUTION

Title: The Chiefs of Police Association of Vermont support HR 1190, the so-called Stark bill.

Whereas, Their is a continuing problem in this country with the criminal use of semiautomatic assault weapons.

Whereas, The criminal use of these weapons created a significant threat to police officers and the general public.

Whereas, The Stark bill is aimed at curbing the increasing number of certain semiautomatic weapons being made available.

Whereas, The Stark bill is very careful in defining precisely what constitutes an assault weapon to be sure that guns designed for legitimate purposes are not affected.

Resolved, The Chiefs of Police Association of Vermont shall support and aid in the passage of HR 1190 which, in part, bans the importation and domestic manufacture of 11 semiautomatic assault weapons and bans the importation and domestic manufacture of ammunition feeding devices with a capacity of more than 10 rounds. Be it further

Resolved, That copies of this resolution and a letter stating the associations position be sent to Congressman Peter Smith and any other member of the United States House or Senate who may be hearing testimony on this bill.

NEW YORK CITY SUPPORTS PUBLIC HEALTH RESPONSE TO AIDS

HON. WILLIAM E. DANNEMEYER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. DANNEMYER. Mr. Speaker, the attached article from today's edition of the New York Times describes the courageous decision of the New York Board of Health to ask the New York State Department of Health to add HIV infection to the list of reportable diseases in the State of New York, the State with the largest caseload of AIDS cases in the Nation.

While the decision may be controversial among political activists on the far left, the board's request has attracted widespread support among medical and public health experts. The article quotes two board members, Dr. Saul J. Farber and Dr. Kevin M. Cahill, as well as Dr. Stephen Joseph, the New York City health commissioner, in support of the resolution. Separately, the Medical Society of the State of New York and the medical societies representing New York's surgeons, orthopaedic surgeons, obstetricians and gynecologists have sued Governor Cuomo to have him declare HIV infection to be a course of action which the Governor, regretably, has studiously avoided.

Perhaps as the pressure mounts to treat HIV infection as a public health problem rather than as a civil rights concern, even Governor Cuomo will relent and allow the medical profession and public health officials to fight this terrible epidemic with a full complement of public health resources.

I encourage my colleagues to read the attached article and, if they agree with the board's action, to cosponsor H.R. 3102, the Public Health Response to AIDS Act of 1989:

HEALTH BOARD BACKS MOVE TO TRACE AIDS—JOSEPH STILL SEEKS TO LIST DRUG AND SEX PARTNERS

(By Bruce Lambert)

The New York City Board of Health reached a consensus yesterday to ask the state to require that the names of people infected with the AIDS virus be reported to the health authorities. The purpose would be to trace the people they have had sex with or shared needles with.

The proposal by the departing Health Commissioner, Dr. Stephen C. Joseph, was identical to one he has been advocating in the face of criticism from AIDS organizations, gay-rights groups and Mayor-elect David N. Dinkins.

The critics contend that recording names and tracing sex and drug partners would violate the privacy rights of AIDS patients and discourage people from being tested for AIDS. Health officials are pressing to trace partners because research shows that beginning medication even before symptoms appear may prolong patients' lives.

The Board of Health proposal would allow centers that offer anonymous testing to continue to safeguard anonymity. People who are screened through their physicians, hospitals or clinics and who test positive for the virus would be required to give the names of their sex and drug partners.

REACTION BY AXELROD

The State Health Department reserved comment until officials had seen the proposal, a spokesman, Peter Slocum, said. State Health Commissioner David Axelrod was cool to the proposal when Dr. Joseph broached it in June at an AIDS conference in Montreal. Dr. Axelrod said the rule might discourage people from being tested. But he did not rule it out forever, and evidence that early medication may help has grown stronger.

The action by the Board of Health adds weight to the move for reporting. "It's something I feel very strongly about," Dr. Joseph said.

The opposition remains strong. Timothy Sweeney, deputy director of the Gay Men's Health Crisis, the largest AIDS organization in the city, said:

"Our problem with his proposal is it's not going to bring people into the health system, but will in fact drive them away. Dr. Axelrod has been opposed to it, and Mayor-elect Dinkins has been opposed. It is inappropriate that during a transition that this issue be brought up."

The director of the AIDS project of the American Civil Liberties Union, Nan D. Hunter, said: "People go to doctors and clinics for treatment. And if you can't get treated without having your name reported, it becomes an enormous disincentive for treatment."

Dr. Joseph's proposal did not address how cooperation might be required. In tracing other sexually transmitted diseases like syphillis, patients are asked for the names of their sex partners. If they refuse, legal sanctions can be imposed. But they are rarely, if ever, used, because health workers prefer to seek cooperation.

Dr. Joseph, chairman of the Board of Health, announced on Monday that he would resign on Dec. 31. The board members have staggered terms.

SERIES OF WARM ENDORSEMENTS

The session yesterday was the last scheduled meeting for the year, and Dr. Joseph broached the proposal as the final item. He suggested that a resolution or letter be drafted to Dr. Axelrod, the State Public Health Council or both.

Although the board members did not vote, they endorsed Dr. Joseph's idea warmly. He said in an interview that they would work out the details in a private meeting.

One member, Dr. Saul J. Farber, said:

"Well done. I agree. It is our responsibility to track this important and disastrous public-health problem and to try to control the epidemic."

NO BREACHES REPORTED

"I think we all agree it's an important and needed step," another board member, Dr. Kevin M. Cahill, said. He urged, however, that the proposal be written to avoid adversarial relationships.

Dr. Joseph said there had never been a breach of confidentiality in the city's recording of its 22,000 AIDS cases.

The Centers for Disease Control require the confidential listing of people who have developed AIDS, but not of those who just test positive for infection with the virus. Some states require the recording of the names of those infected.

When Dr. Joseph called in the past for recording the names, many experts on AIDS and organizations opposed him. Mayor Edward I. Koch called opponents to a meeting at Gracie Mansion and said he would not adopt the proposal.

Dr. Joseph has continued to speak out and sent physicians letters encouraging them to trace contacts voluntarily. Mr. Koch said Dr. Joseph had told him of his intentions before the Board of Health meeting, but the Mayor did not say what he thought of the proposal, adding that he would see how the state reacted.

IN MEMORY OF SHIRLEY SOLOMON

HON. MEL LEVINE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. LEVINE of California. Mr. Speaker, I would like to bring to the attention of my colleagues in the U.S. House of Representatives the outstanding contributions of Shirley Solomon, of blessed memory. Mrs. Solomon led the way for environmental activists with her solid commitment to the respect and preservation of the Earth. As a distinguished communicator in the field of public relations, Shirley Solomon was unique in her ability to convey the need for continued public involvement in safe guarding the environment and in rallying others to action.

I would like to include a recent column by Anne Morgenthaler that appeared in the

Santa Monica Evening Outlook on October 19, 1989.

OIL-DRILLING OPPONENT DIES IN SANTA MONICA

(By Anne Morgenthaler)

Shirley Solomon, a public-relations expert who masterminded the campaign to fight Occidental Petroleum Corp.'s oil-drilling bid on Pacific Palisades, died Tuesday in Santa Monica Hospital Medical Center of bone cancer at age 70.

While operating a public relations firm in 1970, Solomon, a Brentwood resident, became involved in the No Oil Inc. community group's battle to stop the drilling project by organizing press conferences and rallying politicians against it.

"She took an unknown local situation (the oil-drilling proposal) and made it known statewide," said her husband, James, a physician.

Nancy Markel, board member of No Oil, described Mrs. Solomon as brilliant and creative.

While she was not actively involved in the drilling battle in the past several years, Solomon spent many hours making phone calls in the successful campaign to defeat a November 1988 Los Angeles ballot proposition that would have allowed the Palisades drilling project.

Avidly interested in environmental issues, Solomon and her husband also held an annual Energy Fair during the 1970s to publicize energy conservation measures and alternative forms of energy. The events, which drew about 250 exhibitors, were held at the Los Angeles, Anaheim and Long Beach convention centers.

At the request of the National Council for Survival Research and Education, Solomon also wrote the lyrics for the theme song used at Earth Day ceremonies in 1971.

The Los Angeles City Council adjourned its Wednesday meeting in her memory. At her request, no memorial service was immediately planned, though one might be held later, her husband said.

In addition to her husband, she is survived by a daughter, Barbara, of Santa Monica.

WILDERNESS ACT SILVER ANNIVERSARY

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. LAGOMARSINO. Mr. Speaker, 25 years ago, Congress enacted the Wilderness Act of 1964, a landmark measure in every way.

This Sunday, November 19, 1989, the U.S. Forest Service will observe the silver anniversary of the Wilderness Act in ceremonies at the Santa Barbara Museum of Natural History—ceremonies which will also commemorate the creation of the San Rafael Wilderness in the Santa Barbara County as the first addition to the wilderness system under the 1964 act.

It is with great pride that I take note of the fact that my predecessor in office, Congressman Charles Teague, was the key player in making the San Rafael Wilderness the first to be added to the wilderness system under terms of the 1964 act. That occurred on March 21, 1968.

And on September 28, 1984, just 5 years ago, President Reagan signed into law legislation which I authored creating the Dick Smith Wilderness as the newest wilderness addition in Santa Barbara County.

It is my fond hope that by this time next year, we will also be celebrating the addition of another 378,000 acres of wilderness in Los Padres National Forest, under the provision of my bill, H.R. 1473, passed by this House on October 16. Included in the bill is a 51,000-acre addition to the San Rafael Wilderness, a 38,000-acre addition to the Ventana Wilderness in Ventura County, and the creation of four new wilderness areas, including the Sespe Wilderness in Ventura County—211,000 acres—the Matilija Wilderness—30,000 acres—in Ventura and Santa Barbara Counties, the San Emigdigo Wilderness—36,000 acres—in Ventura and Kern Counties, and the Garcia Wilderness—11,600 acres—in the San Luis Obispo County.

Mr. Speaker, as we look back today from the perspective of a quarter-century, we can see that the 1964 Wilderness Act was one of the most significant conservation bills this body has ever enacted. Because of that act, we have preserved some of the most primitive and spectacular areas of wilderness on Earth. I ask my colleagues to join with me, the Forest Service, the National Audubon Society, and the Sierra Club in commemorating the 25th anniversary of this magnificent achievement this Sunday.

SOVIET PRISON SYSTEM

HON. BILL RICHARDSON

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. RICHARDSON. Mr. Speaker, In August of this year, two of our colleagues, Representatives FRANK WOLF and CHRIS SMITH, traveled to the Soviet Union to review that nation's prison system. Their trip included a visit to the notorious Perm 35, a political prison camp.

Despite being granted unprecedented access to Perm 35's facilities and inmates, Representatives WOLF and SMITH found that the Soviet's would have to implement far-reaching and permanent reforms in order to meet their commitments as stated in the Helsinki accords.

As a member of the Commission on Security and Cooperation in Europe, on which I serve with these two gentlemen, I found their report to be most useful and interesting. I would like to take this opportunity to insert sections of the delegation's final report into the RECORD. I expect my colleagues will find the report of great value.

CONGRESSIONAL DELEGATION TO THE SOVIET UNION AND PERM LABOR CAMP 35

U.S. REPS. FRANK WOLF AND CHRIS SMITH, AUGUST 4-11, 1989

(Final Report, Delegation Findings and Follow-up, October 1989)

This report provides a brief account of the findings of the Wolf/Smith delegation to the USSR, outlines our joint follow-up initiatives, and offers recommendations for U.S. officials and non-government organizations and activists interested in the progress of legal and penal reforms, prison and labor camp conditions, and the status of alleged political prisoners.

Purpose of the trip: Inspection visit to Perm Labor Camp 35 and substantive discussions on legal and penal reforms and human rights. U.S. Reps. Frank Wolf and Chris Smith, accompanied by Richard Stephenson of the U.S. State Department, interviewed 23 of the 38 inmates reportedly still in Perm 35 at the time of the trip, and one inmate at the Perm investigation prison.

BACKGROUND AND FINDINGS

Perm 35, a Soviet correctional labor camp known for its severe conditions and mistreatment of prisoners, including prisoners of conscience, was the principal focus of our delegation. Marking the first time any U.S. or Western Official has been allowed into a Soviet "political" labor camp, the trip's findings served to confirm and amplify much of the existing documentation on camp conditions and the existence of many prisoners believed to be incarcerated for basically political activities.

Helsinki Watch, Amnesty International, and others, including former prisoners themselves, provided background information for this trip. Many well-known political prisoners have been confined in the Perm Camp complex, which now includes only Perm 35: Natan Sharansky, Professor Yuri Orlov, Alexander Ginsburg, Deacon Valdimir Rusak, Father Alfonsas Svarinskas, and many others.

Interviews with prisoners ranged from 5-40 minutes, all in the presence of camp administrators and an official of the Soviet Ministry of Internal Affairs (MVD). We viewed punishment cells and other areas of the camp and were permitted to take photographs and videotape much of the camp and our interviews with prisoners.

The broader purpose of the delegation was to discuss Soviet progress toward legal reform advancing the "rule of law" in Soviet society. That is, our discussion focused on the need to institutionalize the positive changes occurring in Soviet human rights practices, open up the Soviet prison and labor camp system to greater scrutiny, and establish due process. We held discussions with Ministry of Foreign Affairs (MFA) officials on legal reforms, including the critically important draft laws on "freedom of conscience" (whose principal impact will be upon religious communities), draft laws on emigration, and reform of the Soviet criminal code. The delegation questioned representatives of the Procurator General and Ministry of Internal Affairs (MVD) regarding the Soviet penal system.

As members of the U.S. Commission on Security and Cooperation in Europe (Helsinki Commission), we emphasized that our interests in proposed Soviet legislation is to find indications that changes are systemic and not simply arbitrary. We reminded Soviet officials of the importance which the American people place on respect for fundamental human rights like freedom of speech, peaceful assembly and the right to publish and organize independent groups. While not presuming to "teach" this to the Soviets, we spoke about the lasting impressions such changes would make on the American people. For religious believers, in particular, a well-written law on conscience will offer legal recourse should local authorities decide to be heavy-handed. With respect to the 1991 Human Rights Conference in Moscow, we stressed that the adoption and implementation of laws guarantee-

ing freedom of conscience will have a direct bearing on U.S. support and enthusiasm for the Conference.

The rights of religious believers, including those in prison, was our major concern in meetings with the MVD, Council on Religious Affairs and religious officials, including the All-Union Council of Evangelical Christians/Baptists (Baptist Union). We also spoke with activists and dissidents in the religious communities, including former prisoners, to find their perspective on the present situation for religious communities in the USSR.

Our visit to Perm Labor Camp 35 was a key element in the overall equation of assessing Soviet human rights performance. The Soviet "gulag" (Russian acronym for the Soviet labor camp system) remains a stark symbol of "old thinking" in a country where political reform and dissent are coming into the open. Glasnot, or openness, has failed thus far to penetrate into the gulag, either to change conditions in the labor camps or to impact penal procedures which have led to systematically cruel and unusual punishment. It is important to recognize that the lingering fear of incarceration in the Soviet gulag threatens to hold hostage any meaningful reforms in Soviet society. Bringing "glasnost to the gulag" is an important step the Soviets can take to deal with concerns that President Mikhail Gorbachev's reforms might be reversed or undermined.

We have urged the Soviets to begin a process of opening up prisons and labor camps to independent human rights monitors, both Westerners and Soviet citizens. We have encouraged human rights organizations to request access to prisons and labor camps. And finally, we pressed the Soviets to permit visits by clergyman and to allow religious literature into prisons and labor camps.

Our foremost concern remains the plight of the 24 prisoners whom we met in Perm 35. They have endured severe conditions and several of them are already counted by the United States among the nearly one hundred remaining suspected political prisoners in the Soviet Union. U.S. human rights policy has long embraced advocacy for individual prisoners' cases, a practice rooted in American values recognizing the inherent dignity and rights of each human being.

Our evaluation of the Perm 35 cases in question is based on the claims of several inmates that they are political prisoners, the documentation of human rights groups which support those claims, and the findings from our interviews. Our conclusion is that, regardless of any dispute over these definitions of political prisoners, most of these prisoners would not be prosecuted for similar "crimes" today, or their offenses would be treated far less severely. In view of the excessive punishment endured by these prisoners, we have called on the Soviets to reexamine their cases in the context of "new political thinking" and release them on humanitarian grounds.

PROSPECTS FOR LEGAL AND PENAL REFORMS

To the Soviets' credit, the kind of access we were granted to Perm 35 would have been unthinkable even months ago. The Soviets have closed down two political labor camps in the vicinity of Perm 35 for lack of need as a result of prisoner amnesties. Soviet authorities say that they have removed hundreds of camp guards responsible for past human rights abuses. Officials of the Soviet Procuracy, as well as the new Supreme Soviet legislature, have talked about penal reforms. The highest ranking Soviet procurator supervising Legality in Correctional Facilities, Yuri Khitrin, admitted to us that it was necessary to discuss "humanizing" the Soviet penal system.

These statements would bode well for the prospect of reform. However, the practical impact on prison and labor camp conditions has thus far been minimal, and the Soviets have publicly stated few commitments to improve or reconstitute their gulag practices. On the other hand, the Soviets have promised for more than two years to institute legal reform which will decriminalize political dissent.

We discussed legal reforms with officials of the Council on Religious Affairs. Deputy Minister Alexander Ivolgin explained to us that they were reluctant to discuss a draft of "laws on conscience" which we put before them—one of two thus far published. Ivolgin claimed that the new law on religious groups had not yet been formally drafted for consideration by the Supreme Soviet. An official from CRA's legal office, Tatyana Belokopitova, offered a very disappointing response on the question of requiring registration of religious groups. The latest proposal would establish the right of "juridical person" (legal recourse) only for religious groups who submit to registering with central religious authorities. This proposal would fail to resolve either the present lack of legal rights for all churches or the desire of many believers not to register—it would instead pit these concerns against each other.

In a meeting with First Deputy Foreign Minister Anatoly Adamishin, the question of new religious laws was side-stepped by referring us to the Council on Religious Affairs. However, Mr. Adamishin assured us that the Supreme Soviet would place a high priority on new religious laws during its fall session. He was less optimistic about action on draft emigration (exit/entry) legislation. In general, Adamishin declared that economic and constitutional reforms would take precedent over both matters. On freedom of conscience, Adamishin commented, "We used to have a problem in regards to freedom of conscience, but we never had a total absence of religious freedom. The freedom to perform religious rites was always allowed, so we are not starting from scratch."

Regarding penal reforms, there appears to be a much tougher hill to climb. We met with a panel of procurators and investigators from the All-Union Procuracy and Ministry of Internal Affairs who denied our references to the arduous conditions in prisons and labor camps. We encountered a Soviet willingness to discuss "rule of law" questions, even while some observations caused a degree of discomfort: prosecutors bring charges only with sufficient evidence for a presumption of guilt; they are held responsible for "losing" cases; and all trial attorneys are answerable to the Procurator General.

We raised the issue of establishing due process for charges brought while prisoners are serving sentences—no sooner had we left than Mikhail Kazachkov was victimized for such pitfalls in the Soviet system. We identified those issues raised by former prisoners; cruel punishments, malnourishment, inadequate medical care, severe restrictions, on family visits. We were assured that draft legislation excludes provisions which disallowed family visits in the past. In addition, we were told that the Procuracy now shares the responsibility for supervision of correctional facilities with public commissions under the Supreme Soviet which guarantee "law, legality and order."

The Soviets indicated openess to future visits to prisons and labor camps by official and non-official groups. Mr. Khitrin offered agreement in principle to a follow-up by Director of the U.S. Bureau of Prisons, Mr. Michael Quilan, and Chairman of Prison Fellowship International, Mr. Charles Colson. We mentioned that groups such as Amnesty International, Helsinki Watch and the International Red Cross should be permitted access to prisoners in prisons and labor camps to monitor and report on conditions. We advocated on behalf of Independent Soviet monitors who wish to have access to correctional facilities.

Finally, we received assurance that prisoners could have Bibles and other religious literature and that clergy would be allowed to visit. Both have been forbidden in law and practice in the past. Khitrin told us that a decision had been made that from now on "all correctional labor colonies will have Bibles in necessary quantities and permit ministers of faith to visit." We urged that Soviets to put such commitments into practice by granting requests to visit prisons and camps.

FOLLOW-UP AND RECOMMENDATIONS

Release of Perm 35 prisoners

We have an obligation to work for the immediate release of all remaining Perm prisoners on humanitarian grounds. The Soviets are obligated to release all political prisoners in compliance with their commitments under the Helsinki Final Act and Vienna Concluding Document. In addition, one criteria for agreeing to Moscow Human Rights Conference was the release of all political prisoners. While Soviet authorities have raised questions in connection with many of the cases, we as members of the Helinski Commission have argued that the burden of proof is on the Soviets to prove the individuals in question are criminals. We have initiated or recommended the following action of behalf of remaining prisoners, including those in Perm 35:

(1) We have publicly called on the Soviets to release all those in Perm 35 convicted for nonviolent acts. We believe that in view of the excessive and cruel punishment these prisoners have suffered, a positive Soviet response would signal a truly humanitarian gesture.

(2) We have written Secretary of State James Baker to urge him to continue the practice of raising individual cases at the highest levels in U.S.-Soviet dialogue.

(3) We have discussed Soviet reforms and the status of prisoners with Deputy Secretary of State Lawrence Eagleburger, urging that human rights remain a top priority in U.S.-Soviet relations. While Soviet human rights improvements have occurred, we should continue identifying problems that persist and pressing our concerns while the Soviets seem willing to discuss and respond to them.

(4) We have urged human rights groups to advocate the immediate release of political prisoners.

(5) We urge concerned Westerners to reinvigorate campaigns of behalf of these prisoners, including letter-writing to Soviet officials, camp authorities and to the prisoners themselves.

Advancing glasnost to the Gulag

The Soviets should begin a process of opening up prisons and labor camps to interested individuals and human rights groups. Only by following our inspection visit by permitting further visits will the Soviets make progress in erasing the Stalinist stigma of the gulag.

(1) We have urged Westerners and human rights organizations to request to visit prisons and labor camps and meet with prisoners in order to report on conditions.

(2) We have urged members of the media, particularly the Moscow press corps, to make visits and report on prisons and labor camps. Since our visit, a few members of the media have been granted access to camps.

(3) We have helped to secure official Soviet approval for the visit of Bureau of Prisons Director, Michael Quinlin, and Prison Fellowship International chairman, Charles Colson, to visit several prisons and labor camps in the USSR and discuss reforms and ways to reduce crime and recidivism in that country.

(4) We have urged that Western leaders and human rights groups advocate on behalf of Soviet citizens who wish to visit prisons and labor camps, including clergy to perform religious rites or offer pastoral counsel.

(5) We have raised these concerns in congressional hearings, and support Helsinki Commission hearing to focus on conditions in the Soviet gulag.

Reforms

(1) We have shared our findings on the progress of legal reforms—including "freedom of conscience," freedom of emigration, and criminal code revisions—with prominent non-government organizations and urge their continued vigilence in encouraging further institutionalization of basic freedoms and that such laws be consistent with international law and with CSCE commitments.

(2) We have raised concerns about Soviet legal reforms in recent hearings sponsored by the Congressional Human Rights Caucus and, in the past, in CSCE hearings.

(3) We have expressed our support to Soviet and American officials for programs developed in a human rights framework to promote Soviet progress on "rule of law" issues and in other areas where U.S. expertise is helpful and welcomed by the Soviets.

PRISONERS MET AT PERM 35

Following is the list of prisoners (not all of them are necessarily political prisoners) who spoke with Reps. Wolf and Smith at Perm Labor Camp 35 in August 1989. For more information on these prisoners and their cases, please contact Helsinki Commission (U.S. Commission on Security and Cooperation in Europe, House Annex 2, Room 237, Washington, D.C. 20515).

Mailing address for prisoners (Moscow post office box): SSSR, RSFSR, S. Moskva uchr. 5110/VS, Last name, First initial.

Aleksandr Goldovich, Bogdan Klimchak, Viktor Makarov, Aleksandr Rasskazov, Valery Smirnov, Igor Mogil'nikov, Aleksandr Udachin, Maksim Ivanov, Vadim Arenberg, Akhmet Kolpakbayev, Igor Fedotkin, and Viktor Olinsnevich.

Ruslan Ketenchiyev, Lenoid Lubman, Nikolay Nukradze, Mikhailov Kazachkov, Oleg Mikhaylov, Yuriy Pavlov, Arnol'd Anderson, Vyacheslav Cherepanov, Vladimir Potashov, Anatoliy Filatov, Vladimir Tishchenkov, and Unidentified Central Asian.

Aknowledgment: We wish to thank Richard Stephenson, Soviet Desk Officer at the State Department, who accompanied us on the trip to Perm 35, providing translation and other assistance.

EAST GERMANY: A COMMUNIST REGIME UNDER SIEGE

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. LENT. Mr. Speaker, for 28 years, the Berlin Wall has stood as the terrifying, impenetrable symbol of Communist oppression. But recently, the world witnessed a powerful drama when, as President Bush put it, "The wall came tumbling down." Mere stone and mortar cannot contain the human spirit that thirsts for freedom. The tens of thousands of East Germans who have marched in a protest for self-determination will not be satisfied with open borders. "Free elections" is their battle cry in this revolution for democracy. I know my colleagues here in Congress and freedom-loving people throughout the world share my hopes that the East Germans will be victorious in their struggle for democratic reforms.

Historical perspective is crucial to understanding the situation in Germany today. Therefore, I'm pleased to bring to my colleagues' attention an article on this subject written by Mr. Sean King entitled "East Germany: A Communist Regime Under Siege." Sean is a constituent of mine from Seaford, and the son of Nassau County Comptroller Peter King. Sean is a sophomore at the American University's School of International Service.

This is an excellent, well written analysis, and I hope Sean will continue his writing with a follow-up story as the drama in East Germany unfolds. I hereby submit the article for inclusion in today's CONGRESSIONAL RECORD. Thank you:

EAST GERMANY: A COMMUNIST REGIME UNDER SIEGE—DEMONSTRATIONS AND EMIGRANTS UNDERMINE THE AUTHORITY OF THE GOVERNMENT

(By Sean King)

October 7, 1949 saw the creation of the German Democratic Republic (GDR), better known as East Germany. Formed shortly after the creation of West Germany, whose capital is Bonn, the GDR has consistently served as the European antithesis of democracy and social justice. Guided by the Soviets, who occupied Germany's eastern zone, the Socialist Unity Party of Germany and its leader, Wilhelm Pieck, took over this new German communist state, East Berlin, the sector of the city the Soviets occupied following World War II, became the capital of the new country.

Today the East German government practices perhaps the most regimented form of state communism, however East Germans enjoy a far better material lifestyle than their Polish, Bulgarian, and even Soviet comrades. This is partly due to special post-war attention from Moscow and West Germany. East Berlin's historical link with Bonn has helped bring much needed Western currency into the GDR, and borderless trade with West Germany has given East Germany a back door into the European Economic Community.

However, the GDR's land frontier with West Germany is anything but borderless. Immediately following the division of Germany, Moscow administered the construction of an almost insurmountable border with the West in order to prevent disenchanted citizens from fleeing. Stalin used this border to cut off auto and rail access to Berlin's western sectors, which resulted in the Berlin Airlift of March, 1948.

Despite the formidable barrier with the West, many East Germans, frustrated with their communist government, fled west through Berlin. By 1961, one in every six or 2,800,000 East Germans, had fled west via this route. The refugee hemorrhage was brutally halted by then-East German leader Walter Ulbricht and Soviet leader Nikita Khrushchev. On August 13, 1961 barbed wire was strung down the middle of the city, separating it into East and West sections. The wire was heavily guarded, and eventually became a permanent 176 kilometer-long stone structure known as the Berlin Wall.

Today East Germans are permitted by their government to travel throughout the Warsaw Pact nations with relatively few restrictions. When reform-minded Hungary this year opened its border with Austria, thousands of East Germans travelled freely to Hungary and moved west through the open border. Czechoslovakia attempted to assist its East German ally by stopping all East German citizens without permission from East Berlin from entering Hungary. However, the halted exodus sparked a wave of protest that has continued for the past month. Thousands of East Germans still fled from their homeland, taking refuge in the West German embassies in Warsaw, Poland, and Prague, Czechoslovakia. Living conditions in the West Germans' Prague embassy very quickly became overcrowded and filthy, and more East Germans were trying to get in every day. The East German government finally authorized the refugees to leave Prague for the West in an attempt to prevent bad press coverage from overshadowing the 40th anniversary of the GDR.

On October 8, 1989, students from American University protested outside the East German embassy. The protest commemorated the fortieth anniversary of a Communist state in East Germany. At the same time, on the other side of the world, refugees were huddled under tents in the back yard of the West Germany embassy in Prague, replacing those who had just fled on freedom trains for the West. In Berlin, Erich Honecker and Mikhail Gorbachev were reviewing East German troops as they paraded not ten blocks from the Berlin Wall.

East German leader Erich Honecker, after closing the GDR's borders with Poland and Czechoslovakia, fell victim to intense social unrest. Mass demonstrations in Dresden, Leipzig, and East Berlin drew crowds which at times numbered more than 100,000. Such unrest and opposition has not been seen in East Germany since the bloodily-suppressed uprising of June 17, 1953, when 800 Germans were slaughtered by Soviet and East German troops. The tremendous rejection of Honecker after over twenty-five years as East Germany's leader, pushed the ruling Communist party to oust the 77-year old ailing chief. On October 23 Egon Krenz, East Germany's former state security chief, was elected by the Communist party to replace Honecker. He barely received enough votes for the promotion. Many top Party representatives insubordinately voted against Krenz, who is alleged to have an al-

cohol problem. Such opposition is unprecedented in East Germany's history.

Krenz is the new leader of East Germany. The coming months will reveal whether Krenz, unlike Honecker, can be swayed by the policies of Glasnost, or if he will suppress his people and turn East Berlin into a European Tianammen Square.

A TRIBUTE TO STUDENTS AT BARSTOW'S HINKLEY ELEMENTARY SCHOOL

HON. JERRY LEWIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. LEWIS of California. Mr. Speaker, I would like to bring to your attention today a group of fine young students in Barstow, CA, who recently made a decision that will affect their lives for many years to come.

In October, over 1,000 students at Hinkley Elementary School in grades 4 through 8 signed pledges to abstain from the use of all drugs and to live a drug-free life. The students were participating in the "Drug Use is Life Abuse" program, an effort to inform young people about the dangers of drug use. I believe their commitment sets a fine example not only for the other students attending their school, but to people of all ages.

Mr. Speaker, as we continue to fight the war on drugs, it is extremely important that we recognize the efforts of those who are making valuable contributions. I hope you will join me today, Mr. Speaker, in congratulating each and every one of these fine students at Hinkley Elementary School who have made a lifetime commitment to remain drug free.

COUNTERTERRORISM R&D

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. BROOMFIELD. Mr. Speaker, in the course of the House/Senate conference on the Foreign Relations Authorization Act the attached statement of managers language was agreed to but inadvertently left out of the conference report. In order that the Counterterrorism R&D Program is not overlooked, I would like to call the following language to the attention of my colleagues.

COUNTERTERRORISM R&D

An effective and properly funded and coordinated U.S. government counterterrorism research and development effort is needed to develop measures to thwart the increasingly sophisticated weapons used by terrorists, such as the plastic explosives used to blow up Pan Am 103. The use of difficult-to-detect plastic explosives and the dangers posed by chemical and other threats underscores the need to develop equipment capable of detecting threats and assisting counterterrorism forces. Therefore the Managers believe the Administration should assign high priority to the interagency counterterrorism research and development program coordinated by the State Department to fill the gaps identified in previously existing counterterrorism research and development. The Managers therefore support the Administration's request of $6 million dollars for the program and urge that the program be fully funded in FY 1991.

SOUR MILK

HON. DAVID R. OBEY

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. OBEY. Mr. Speaker, mismanagement in our Nation's dairy purchase policies have resulted in the virtual elimination of Government-held stocks of cheese and nonfat dry milk. Cheese has disappeared from commodity distribution programs, the Federal Government has been forced to bid for dairy products on the commercial market in order to meet its nutrition program commitments, and food processors are seeing severe shortages and skyrocketing prices for nonfat dry milk.

The losers are the poor, the elderly, and the homeless who rely upon distributions of commodities such as cheese to supplement their diet. They are the American taxpayers who must foot the bill for the higher cost of purchasing dairy products on the open market instead of through the Dairy Price Support Program. They are food processors who are scrambling for supplies. And they are family dairy farmers trying to run a business in a market where prices resemble a roller coaster, and who are being told to expect another dairy support price cut on January 1 because, according to the Department of Agriculture, Federal stocks of dairy products are too high.

This unjustifiable and bizarre policy is causing consternation and bewilderment in the dairying regions of our Nation. With an eye on the reauthorization of Federal agricultural programs in 1990, I commend to your attention the following editorial from the Abbotsford Tribune-Phonograph, a smalltown publication from America's dairy heartland.

SOUR MILK

We must caution any local dairy farmer who would try to explain the ins and outs of the federal government's dairy price support program to a dairy cow. She might give sour milk.

Despite the fact that the federal government's dairy shelves for non-fat dry milk and cheese are virtually bare, the government has every intention of lowering the dairy price support an additional fifty cents on Jan. 1, 1990.

The milk glut continues, the federal government argues—even though the Commodity Credit Corporation paid thirty cents over support price in July for 74,000 pounds of American cheese destined for the National School Lunch program. And even though cheese and non-fat dry milk have been discontinued in distributions to homeless and low-income people through the Temporary Emergency Food Assistance Program.

The support price cut is automatic, given the federal government's purchase of over five billion pounds of milk equivalent this past year. The Commodity Credit Corporation now measures its annual purchase of surplus milk at nine billion pounds.

According to the National Milk Producers Federation, however, the milk surplus is a myth. The nine billion pound figure is arrived at by counting CCC purchases of milk based on butter-fat only. If you count CCC purchasers of milk based on milk solids-not-fat, however, the CCC's milk purchases drops to only one billion pounds per year.

The dairy industry has done a good job of selling more low-fat dairy products to the American consumer, but hasn't increased proportionately its sales of butter. We know that consumers favor a low-fat diet. Yet, the federal government fails to note the dairy industry's great strides—concentrating only on the accumulating dairy fat.

What is even more frustrating is that the US Department of Agriculture knows full well that it is playing around with the milk surplus numbers, but refuses to recognize reality as long as the federal government can save money in the dairy price support program.

Charles Shaw, an economist who heads the dairy support group at the Agricultural Stabilization and Conservation Service of USDA, is quoted in the Milwaukee Sentinel as saying that changing the way his agency counts the surplus would not be appropriate right now. Washington is looking for "ways to save the most money for taxpayers" he is reported to have said.

Dairy farmers can only be bitter about a federal government that has punished them severely to get milk production down to supply-demand levels, but continues to whip them to save a few shekels for political purposes.

Insult is added to injury when the Bush administration Agriculture Secretary Clayton Yeutter has proposed ending import restrictions on imported dairy products—another kick in the pants to a dairy industry that is trying to live within a domestic supply-and-demand framework.

The reality here is that the Bush administration is pummelling the Midwest dairy producer. We call on the Wisconsin congressional delegation to start howling in outrage and blaze a trail for equity in the 1990 Farm Bill.

THE 75TH ANNIVERSARY OF STONE HARBOR

HON. WILLIAM J. HUGHES

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. HUGHES. Mr. Speaker, today, I rise to congratulate the borough of Stone Harbor, NJ, which is celebrating its 75th anniversary.

This October, Stone Harbor capped off a year long celebration commemorating its past. I had the privilege of attending a portion of these celebrations, which brought back many happy memories of my boyhood.

In fact, I recall well the time, almost 50 years ago, when I would take the little ferry boat—the *Nellie Bly*—from Angelsea, across Grassy Sound, over to Stone Harbor. That's where I would earn extra money cleaning fish on the dock. These recollections were brought back, in particular, by a wonderful video production of the borough's history that was put together by the chairman of the anniversary event, Mr. Jack Fitzpatrick.

Indeed, an outstanding job was done in preparing for this celebration by Mayor Arden W. Hand; the Borough Council; Jane Scott, the

borough historian; and the service clubs which worked so hard in planning for the celebration—the Risley Club, the Point Club, the Beach Club, and the Bay Club.

At a time when many resorts are becoming increasingly commercialized and losing their sense of community, it is gratifying to see that places like Stone Harbor have been able to retain much of its history without sacrificing modern goals.

The beauty and achievement of this beach front resort is a tribute to the concerns and efforts of its citizens and should serve as a beacon to all communities. On behalf of the Second Congressional District of New Jersey I would like to applaud the 75th anniversary of Stone Harbor and the continued effort to maintain the past while moving toward the future.

For the benefit of my colleagues, I insert into the RECORD at this point an excellent article on Stone Harbor's anniversary which appeared in a recent edition of the Sandpaper newspaper:

A SLICE OF SMALL-TOWN LIFE—LOOKING BACK ON 75 YEARS IN STONE HARBOR

(By Ken Kirsch)

There isn't any one thing about Stone Harbor that sets it apart from the rest of the community on the Cape. It's a combination of things, as many tangible as intangible. But one thing is clear about the way of things in Stone Harbor. It's all according to plan.

This weekend, the borough plans to cap off a year-long celebration of its 75th anniversary with a nostalgic look at its past.

"In a few words, the borough is well-developed, neat and clean," said Borough Administrator Thomas Flud. "It's success lies in the consistency of planning." The plan was one carefully laid out by the borough's first inhabitants.

Jane Letzkus Scott is the borough's historian. The title is a fitting one. Her grandfather, John Larsen, helped found the borough of Stone Harbor. When the borough became incorporated in 1914, Larsen became its first clerk.

In the early 1900s, the South Jersey Realty company had set up shop at the shore and begun developing Stone Harbor. The company already had Stone Harbor's sister community of Avalon to its credit, so its expansion into the southern end of the island was a natural one. Larsen came to work for the company as its first pay clerk soon afterward, and took an active role in putting the borough together from the gritty expanse of sandy meadows it once was.

"The only way to get from 83rd Street to 96th Street in those days was by horse drawn carriage on the beach," Scott said, pointing to a historic photo from her many files. "That's how rough it was in the beginning."

From the start, the borough has been a tribute to planning. Scott's photos show off the outlined streets, tailored curbs and straight-as-an-arrow sidewalks that still mark the town. Thing is, though, in 1908, it was all done by horse and carriage. No bulldozers, no backhoes. Things started slowly.

"There might have been eight houses or so in the first group that went up," Scott said. "When I was a little girl here, there were no more than 30 kids in the first school."

The South Jersey Company sought to promote the fledgling real estate venture. Needing a connection to the mainland to prove the area was a viable homestead, developers sought to connect the island to Cape May Court House by rail line. The Stone Harbor Railroad supplied the borough with fabrics, tools and foodstuffs for years. It was one of few ventures that didn't prove a success the first time around, however.

The railroad project got off the ground in odd fashion. The Company bought some 45-foot long rails, which were cheaper than standard 30-foot rails, and prone to derailments. In addition, since the Company couldn't afford regulation ties, they cut their own in the woods using a rented sawmill. A cumbersome engine, far too heavy for the rails, was purchased at a savings, and so the rail was ready for its first test.

The railroads' maiden voyage in 1912, not surprisingly, was beset with derailments, and the project was abandoned until 1920. The second try proved more successful, and the rail line was used extensively for six years afterward.

Time passed calmly in Stone Harbor for the decades that followed, and little changed. By 1985, the borough had expanded to its present size. During that time, however, the downtown business district had begun to show signs of age. Again, the uniformity of planning which marked the borough's early days was what would save its most prized tourist attraction. And so the 96th St. Revitalization Project was born.

The project, officials believed, needed a committee all its own to oversee it. The borough created the Architectural Review Board as part of the plan. William Fox was appointed chairman, and still serves in that capacity today. Fox's group was singular in purpose.

"We wanted to make sure that things like signs and colors were done in good taste, and not gaudy," Fox said. "We were trying to keep the town a real nice place to visit, not the glitzy type of place some have fallen into." To do that, however, the group itself had to be carefully planned.

"It's hard to legislate good taste, so we made sure we had architects, engineers, interior decorators and people like that on the board who knew their stuff," he said. It was about this time that developer Gerald Katzoff came to town.

Katzoff had recently bought up a group of aging properties along 96th Street, including a movie theater, miniature golf course, and some retail shops. More importantly, however, he had already made waves next door in Avalon when he razed the beloved, but worn, Avalon Hotel. The chic hotel which now stands on the lot became a symbol of the future for the island: upscale, in good taste, and, above all, well-planned. It was the idea he took with him to Stone Harbor.

"The members of Architectural Review Board were very concerned about access, parking, and the overall look of Stone Harbor," Katzoff said. "That kind of concern only helps developers like me, it doesn't hurt. I had no difficulty conforming to the look they wanted."

All told, Katzoff spent some $25 million constructing the 17-shop Harbor Square Mall, completing renovations on the existing golf course and movie theater and purchasing the Shelter Haven Motel.

"I think we were critical, yet fair," Fox said of the project. "We realize someone's in the business to make a dollar and we can't interfere. But we think you can do that without the neon signs and flashing lights."

The Architectural Review Board remains the governing body of the commercial district, its sole concern.

Though it may seem, at times, a town apart from its neighbors, Stone Harbor is still a resort seeking the summer trade like everyone else. They have the same problems, albeit smaller, that occur everywhere else along the shore, except for one. As luck, or fate, would have it, the borough has never had a beach closing.

"It's definitely not an entity unto itself," said Police Chief James Sweitzer. "We deal with the same problems here as the rest of the shore. We have noisy parties, drunks, break-ins, parking problems and the rest of it."

The town depends heavily on a core crowd which own and rent duplexes in the town to return year after year for the summer. There is no tourism development commission. The Chamber of Commerce handles promotion of the borough with a successful, small-scale program—$8,000 a year for local newspaper and radio ads, and another $12,500 for a glossy tourism brochure. The borough's logo, "The Seashore at its Best," is recognized by few outside Stone Harbor.

In the off-season, however, the borough's 1,277 residents take care of their own. People smile here, and say hello to passing strangers. It's not uncommon to see members of the Volunteer Fire Department chatting with locals while sitting in their cars at a red light. The borough had a successful recycling program years before it became mandatory. Last year, Stone Harbor recycled 25 percent of its trash, surpassing by far the state-mandated goal of 15 percent.

"There are a great many families that have their roots here, so to speak," Scott said. "People thoroughly enjoy the community life here and they enjoy knowing everybody."

That becomes evident inside Fred's Tavern on 96th Street. The bar, owned by Mayor Arden Hand, is a comfortable repose where locals shoot pool and converse about daily life.

It's usually pretty quiet," said bartender of 15 years Bob Jaep. "Nothing much happens out of the ordinary down here."

While it may be true that the days pass quietly in Stone Harbor, residents can't claim the island all their own, even in the off-season. A six-block square patch of green between 111th and 117th streets is where the island's other residents live. On a good day, the birds may well outnumber the people of Stone Harbor.

The Stone Harbor Bird Sanctuary is the only such wildlife sanctuary within the boundaries of a municipality in the United States, and one of only two in the world. (The other is in Japan.) It's home to flocks of egrets, ibises, herons, and other indigenous shore birds.

Early in the morning, the birds can be spotted leaving the sanctuary to feed in the adjacent wetlands. Even the birds feeding grounds are protected as part of the preservation plan. The Wetlands Institute, technically in Middle Township, guards the critical habitat with a watchful eye.

Each year, the borough helps the Wetlands Institute stage events for its annual Wings 'N Water Festival. This weekend, however, the borough is honoring its own in the culmination of a year-long celebration of its 75th anniversary. The year-long celebration has seen a small-scale resurrection of the Stone Harbor Marathon, the Stone Harbor Mile. The Chamber of Commerce

put together a historic film for lectures held at different times during the year, and an official borough history was written. The Stone Harbor Garden Club held a flower show recently, in addition to other events.

This weekend's events will begin today, Oct. 6, with a special meeting of Mayor Hand and Borough Council in a tent at the 81st Street Recreation Field at 7:30 p.m. Following the meeting, the U.S. Coast Guard Band will play a musical program.

An anniversary parade with over 50 entrants from the community will begin Oct. 7 at noon at 96th Street. It will follow a northerly route on 1st Avenue and conclude at the recreation field.

The celebration will conclude Oct. 8 with a lobster/clambake at the recreation field from 1-4 p.m. Tickets are required for this event, all of which have been sold.

ENLIGHTENING SERIES ON "THE NEW EUROPE" BY McCLATCHY NEWS

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. MATSUI. Mr. Speaker, I would like to enter into the CONGRESSIONAL RECORD a second installment of articles by McClatchy News Washington Bureau Chief Leo Rennert and a group of McClatchy reporters on the emergence of "The New Europe." The series reflects countless hours of research and interviews and is quite possibly the most extensive and comprehensive look yet in any American newspaper at the new economic reality emerging from the European Community. Because of the relevant content of these stories and the useful information they will provide my colleagues, I will be submitting a third installment of the series in the CONGRESSIONAL RECORD tomorrow.

The article follows:

AMERICAN FIRMS LONG ON STUDY, SHORT ON ACTION

(By Leo Rennert)

LONDON.—The fabled Yankee trader, chasing financial rainbows to the far corners of the world, is becoming a rare species.

At least, that's the impression on this side of the Atlantic where major new business opportunities loom with the creation of a unified market by the 12 nations of the European Community.

With the EC racing to dismantle all internal barriers by the end of 1992, outsiders are pouring into Europe to establish commercial beachheads and take full advantage of a prosperous market of 324 million consumers.

Swiss and Swedish firms, whose countries are outside the EC, are expanding branch operations and buying up older companies to share in the expected bonanza. From the Pacific Rim, Japan and South Korea are rushing in with major new investments.

But U.S. business, with few exceptions, is doing a slow-motion dance—studying, monitoring, exploring the pluses and minuses of the new Europe, but seemingly reluctant to plunge ahead in a big way.

There are several reasons for this reticent attitude. Many American firms have been spooked by warnings that they view as protectionist of a "Fortress Europe" with high external trade walls. The United States also is paying a high price for devaluation of the dollar, which doesn't go as far as the yen in buying European assets.

European-based U.S. diplomats and business executives believe American companies that miss the boat will pay a high price in future years when it will have to compete not just with Japan but with formidable new European conglomerates at home and abroad.

They argue that while the EC undoubtedly will adopt trade policies that favor its own companies at the expense of foreign concerns, "Fortress Europe" fears are wildly exaggerated and, in any case, do not seem to deter more aggressive Japanese firms.

"This whole process is about strengthening European industry," says David Diebold, who recently completed a three-year stint as minister for commercial affairs at the U.S. Embassy in London. "There will be tricks and traps galore. As a government, we must do the best we can to watch and catch that. Competitive realities are always difficult. But we shouldn't sit back and whine about it.

"I do worry about American businesses that are not taking this seriously. Too many companies are still asleep at the switch. They don't grasp that 1992 already is here. Things are moving."

Diebold cautions that amid all the talk about Japan's dynamic moves into the EC, some things must be kept in perspective. Many big American firms like IBM, Ford and 3M have been in Europe for a long time and are well-positioned for 1992.

Ford began selling cars in Europe in 1903 and started manufacturing them in Britain in 1911—more than 25 years before Volkswagen was even founded. Today, Ford-Europe builds nearly 2 million cars a year and employs 100,000 workers. 3M set up shop in Europe 60 years ago and now has plants all over the continent and annual sales of $2.5 billion.

As of last year, U.S. investments in Europe totaled $152 billion; Japan's only $21 billion. Following the lead of U.S. multinationals, some West Coast electronic firms and other American concerns are beginning to establish EC operations. For the moment, the United States in still Goliath to Japan's David.

But the Japanese are moving fast to catch up. Penetration of the EC by new U.S. firms—particularly medium- and small-size concerns—is more a trickle than a flood.

"European firms are becoming larger and stronger," says Cheryl Mooney, business development manager for the U.S. Chamber of Commerce in Britain. "Now is the time for U.S. firms to go on the offense.

"I would have thought that by now, we'd be getting calls all the time. But there hasn't been a flood of inquiries."

Mooney suggests the U.S. Commerce Department should work more closely with U.S. chamber offices in Europe. "We have the contacts, but sometimes we feel we're out of the loop," she complains.

David Lomax, a top economic adviser at the National Westminister Bank, believes the Japanese are making all the right moves in penetrating the European banking world, while American banks are hobbled by Third World debts and a depreciated dollar.

"The Japanese are moving in a very thorough and steady way." he says. "They are the most thorough analysts of 1992. They're building a big commercial beachhead and they haven't made any major mistakes. They're ready to do what they did in California—get into retail banking by buying up local institutions."

In Cologne, West Germany, the Federation of German Industries also offers a bleak assessment about U.S. vs. Japanese performance in Europe.

"The Japanese are far more aggressive than the Americans," says Karin Rogge, director of European affairs for the federation, which represents 80,000 German companies.

"The Japanese have promotion offices all over Germany and fact-finding missions throughout the EC. Japan is looking for financial incentives from state and local governments and encouraging a bidding war for investments."

Federation officials periodically get requests to set up trans-Atlantic video conferences to enable German business people to exchange views with U.S. Commerce Secretary Robert Mosbacher and American corporate chieftains.

"It's very boring and it doesn't accomplish anything." Rogge remarks.

She also emphasizes that if U.S. business wakes up too late, it will have lost the best locations and the best opportunities for 1992 hookups with European partners.

In Dublin, Ireland, there's a similar message from Jim Pilkington, finance director of a large-scale computer systems plant owned by Amdahl of Sunnyvale, Calif. "Americans are standing back a little to see what unfolds, while the Japanese are moving at a phenomenally fast pace," he observes.

Ireland is beginning to attract more U.S. computer firms, but the Japanese also are pouring in. Yamanouchi is building a big pharmaceutical plant north of Dublin with an investment of $28 million.

Europe-based executives of U.S. firms reject fears that building American plants in Europe will cut down on the number of jobs in the United States. The world economy, they argue, now operates in a global village and industries must spread out accordingly.

They note that when Ford had a poor year in the United States in 1979, it managed to keep its American operations afloat with revenues from Europe. In their view, global diversification sharpens competitive skills and, by tapping talents on several continents, often leads to better product development and marketing strategies.

In Brussels, Belgium, where the EC is headquartered, a huge colony of lobbyists has sprung up as U.S. firms are scrambling to keep up with new business rules. Sometimes, they're behind the curve. The U.S. entertainment industry was slow to wake up to a new directive that restricts the number of American-made TV shows that can be shown on European stations.

Eamonn J. Bates, EC affairs manager of the American Chamber of Commerce in Belgium, estimates there are 2,000 representatives of private U.S. interests monitoring EC developments in Brussels and the number is expected to double by 1992.

Many of their concerns are focused on proposals that may require manufacturers to include a high percentage of local content in products before they are deemed "European" and allowed to be sold freely throughout the EC.

Still, Bates maintains that "Fortress Europe" fears are "born out of ignorance." Overseas and European manufacturers, he argues, will have an easier time doing business in the EC because they will need to comply with only a single set of safety, health and technical standards.

EUROPEANS SEE BETTER BUSINESS IN 1992

(By Leo Rennert)

LIEGE, BELGIUM.—Patrick De Maeyer can't wait for Europe 1992 and its unified market to become a reality. As manager of a plant that manufactures copper tubes for water and heating systems, he ships his wares to customers in half a dozen European countries.

Different product standards, time-consuming border checks, cumbersome certifications and inspections add hugely to his production and transportation costs.

Now, he can look forward to getting out of these straitjackets and operating freely in a market of 320 million consumers.

To De Maeyer, this means compliance with just one set of safety and technical standards and one set of inspectors roaming through his factory.

"Right now, we have to put up with British inspectors, German inspectors and French inspectors," he says. "We have a British inspector every three months for two days. He checks the whole production process. And he can stop the entire factory.

"As a matter of fact, two weeks after we began operating the plant, the British took away our licenses because of red tape on a change of ownership. We had to wait four months to get them back."

From this southeast corner of Belgium, De Maeyer's plant, a subsidiary of the $3 billion Swedish Trelleborg conglomerate, is within close range of markets in France, West Germany, Luxembourg and the Netherlands.

But his trucks have to wait several hours at border stations to get their papers inspected. Some borders are closed altogether on some weekends. The result: Expensive add-on costs for transportation and warehousing that Europe 1992 promises to erase. "Right now, I need a full-time employee just to fill out customs forms," De Maeyer reports.

Once the borders are thrown open, he figures he can cut transit time in half for many of his truck runs—from six to three hours to Amsterdam, from four to two hours to Cologne.

Tanguy Schmitz, another Liege businessman, is also bullish about the 12-nation European Community's push for unification. He's marketing and financial director of a new genetic engineering firm, Eurogentec, that is developing vaccines to reduce viral infections in trout and salmon produced in commercial fish farms.

Because it believes Eurogentec is at the cutting edge of promising new technology, the EC funds 40 percent of the firm's research costs. Schmitz also expects other benefits.

"There will be one regulation for our vaccines instead of 12," he points out. "And we won't have to set up 12 subsidiaries. Taxes also may come down as the EC works to bring national tax rates closer together. Belgium now is heavy with taxes."

But there also are clouds on the horizon. Europe '92 has triggered a wave of cross-border mergers and buyouts. Schmitz isn't sure that his small firm can remain independent. "Maybe we can develop a vaccine against buyouts," he says. "It's a terrible virus."

Marcel Hartenstein, unlike the other two, doesn't expect big changes. He's a contractor who has a special process for rehabilitating gas, water and sewage pipes. His customers are mainly local governments and Hartenstein doesn't anticipate an invasion of cutthroat competitors from other parts of the EC.

De Maeyer, however, tells him not to be so sure. Under new EC ground rules, public procurement contracts—15 percent of the gross national product of all member nations—will be thrown open to bidders from all sections of the EC.

"A Portuguese contractor could come to Liege and offer lower-priced competition," says De Maeyer. "He could bring with him workers who are paid 10 times less in wages."

"And where will he put them up?" asks a skeptical Hartenstein. "In tents, if he has to," says De Maeyer.

However, all three readily agree that, on balance, Europe '92 will spur economic growth and fuel expansion of their business operations. By 1992, De Maeyer expects his work force to grow from 212 to 250; Hartenstein projects an increase from 280 to 350, and Schmitz believes his 30-member staff may double in size.

"Big is good, it's the only way for Europe to compete with the United States and Japan," says Hartenstein.

All three see European unification as an inexorable process—despite British Prime Minister Margaret Thatcher's misgivings.

"The train is moving and the train is stronger than Mrs. Thatcher," says Schmitz.

DON'T JUST THROW MONEY AT THE DRUG PROBLEM

HON. FORTNEY PETE STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. STARK. Mr. Speaker, I happen to have strongly agreed with President Bush's State of the Union Address, when he stated, "We will never win this war on drugs unless we stop demand for drugs." There is now a bipartisan consensus that the demand side of the equation offers the most promising, successful aspects of our drug war.

The following article written by Michael Massing recently was printed in the Christian Science Monitor. It addresses some very important aspects of our continued efforts and why drug rehab and education is so very important:

[From the Christian Science Monitor, Nov. 6, 1989]

DON'T JUST THROW MONEY AT THE DRUG PROBLEM

(By Michael Massing)

The recent seizure of 20 tons of cocaine in a suburban Los Angeles warehouse has inspired new calls for increased spending on the war on drugs. "Hey, Washington, listen to us," declared Los Angeles police chief Daryl Gates as he stood photogenically in front of 1,100 boxes of impounded cocaine. "We need help. We want you to double the number of DEA [Drug Enforcement Administration] agents out here."

Whenever a giant drug seizure is made, law-enforcement officials call a press conference, heap praise on their own brilliant detective work, then issue strenuous pleas for more money, more cops, and more guns. These officials need to admit the grim truth—that such seizures, far from justifying more police monies, prove the inability of our enforcement agencies to solve the problem.

In the Los Angeles case, the uncovered cocaine was stored in an ordinary stucco warehouse in a suburban area. The building was left unguarded, its garage-like sliding door secured by a single $6 lock. For so valuable a stock to be safeguarded in so blasé a manner can only mean that the warehouse was but one of many facilities in the Los Angeles area.

We can only conclude that the US is even more awash in cocaine than previously thought. The DEA had estimated world cocaine production at 350 to 400 tons a year, the majority of which enters the US. The L.A. bust—twice as large as the previous one on record—means that the figure should be revised radically upward. The consumption of cocaine in the US has remained constant at about 75 tons a year. The DEA would have to seize a dozen warehouses like the one in Los Angeles before it could begin to reduce the amount of cocaine on the nation's streets.

Today's drug traffickers are simply too resourceful for the nation's drug agents to provide more than minor harassment. Since 1969, when Richard Nixon first declared the war on drugs, no law-enforcement action has had any long-term effect on the availability of drugs in the nation's cities. Whenever one source of drugs is taken out, another invariably emerges.

Take the "French connection." In this most celebrated of narcotics cases, federal drug agents, working undercover for many months, managed to disrupt the chief network for smuggling heroin into the US. The US, after patient negotiation, convinced Turkey to crack down on its own opium producers, the source for most of the raw material used in making French heroin. The amount of French-Turkish heroin entering the US dropped sharply. Federal agents announced that they had turned the corner in the war on heroin.

Yet no sooner was the French network smashed than Mexican traffickers, sensing a new business opportunity, rushed to expand their pipeline into the US. Mexican heroin, which in 1972 accounted for only 38 percent of the American market, made up 77 percent in 1974. Junkies had few problems feeding their habit.

In 1977 the Carter administration persuaded the Mexican government to spray its extensive marijuana fields with paraquat, a potent herbicide. American newspapers carried stories about the dangers of smoking plants treated with the substance, and almost overnight the market for Mexican marijuana dried up.

Then Colombia's marijuana traffickers went to work. Stepping up their shipments to the US, they quickly managed to fill the gap left by the Mexican growers. By 1978, Colombian gold accounted for three-fourths of all the marijuana sold in the US, and a joint remained as readily available as it had before the spraying campaign.

Of all the "victories" in the war on drugs, none has proved more pyrrhic than the South Florida Task Force. Set up in 1982 under the leadership of Vice President George Bush, the force brought together specialists from a host of federal agencies, all with the goal of stemining the flow of cocaine into the US. At the time, most drugs entered the country through southern Florida, transported by high-speed boat or small plane. The task force, high-tech radar, expanded Coast Guard patrols, and tighened customs procedures, proved highly success-

ful, registering hundreds of arrests and seizing tons of cocaine. By the mid-'80s, cocaine entering the country through the Miami area had dwindled to a trickle.

Unfortunately, the traffickers quickly adapted. They flew their merchandise to northern Mexico, then drove it undetected across the border. The nation's southwestern border has become the primary entry point for US-bound cocaine. Most of it ends up in Los Angeles, which recently replaced Miami as the nation's cocaine capital—a distinction it owes to the success of the South Florida Task Force.

Every year, the US spends more than $1 billion on drug interdiction. Despite this huge outlay, the goverrnment admits it's able to intercept only 5 to 7 percent of all the drugs smuggled into the country. Nontheless, President Bush has proposed spending billions more on state and local law enforcement. Congress, in a militant mood, will no doubt raise the ante.

Twenty years ago, this same approach, applied by liberals to our inner cities, was called throwing money at problems. Today, it's called getting tough on drugs. How much must we waste before we realize that it's not the amount of money that's the issue, but our overall reliance on cops, detectives, and drug agents to resolve a problem that is, at root, social in nature?

CELEBRATION OF THE SANTA MONICA FIRE DEPARTMENT CENTENNIAL 1889-1989

HON. MEL LEVINE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. LEVINE of California. Mr. Speaker, I rise today to pay tribute to the men and women of the Santa Monica Fire Department as they celebrate the centennial of the department. It was 100 years ago when 46 leading citizens and businessmen of Santa Monica gathered at a town hall meeting for purpose of organizing a fire company. The traditional virtues that have ruled the lives of American firefighters since colonial times still apply today. The firefighters' world is one that is made up of hard demanding work, personal sacrifice, compassion, loyalty, and teamwork. They are dedicated people who are committed to providing for the welfare of the citizens of our community. I ask that my colleagues in the U.S. House of Representatives join me in saluting this fire department.

The following is a brief history of the Santa Monica Fire Department:

A BRIEF HISTORY OF THE SANTA MONICA FIRE DEPARTMENT

Santa Monica's first known fire company was founded in October of 1875 when six citizens organized the Crawford Hook and Ladder Company. These men, J.C. Morgan, S.B. Adams, W. Beach, Harry DuPuy, John Mott and Johnny Doyle gathered together some buckets and axes, standing at the ready to respond to any fires that erupted in town. Harry DuPuy was chosen as Foreman of the company with the other members as his officers. Although their equipment was basic, they always made a gallant effort at fighting and fires that broke out. One of the worst was on July 19, 1876, at a place called the "Club House". On this day, thieves robbed the club and then sat it on fire getting away with about $850 during the excitment.

On the night of March 22, 1889, Mr. Robert Eckart, a founder of the Los Angeles City Fire Department and Mr. William Jackson, an Englishman who migrated to the United States in 1860, called forty-six leading citizens and businessmen of the city together in the town hall for purposes of organizing a fire company.

They equipped an old four wheel cart with some axes, ladders and 1000 feet of 2½ inch hose and placed them all in the old engine house on Oregon Avenue (Santa Monica Blvd.). With this basic equipment and a lot of dedication, these men officially formed the Santa Monica Hose, Hook and Ladder Company No. 1 with Robert Eckert, as the Foreman and President; William Jackson as First Assistant Foreman; George B. Dexter as Second Assistant Foreman; Fred C. McKinney as Secretary and A.G. Smith as Treasurer.

In 1900, a careful evaluation of other cities' equipment was accomplished by the town fathers. Seeing that Santa Monica lacked any good firefighting apparatus, they decided to purchase a LaFrance combination hose wagon and chemical engine for the department along with a team of horses. A.J. Myers was assigned as driver of the new wagon and was the only paid member of the department.

During the same year that Company No. 1 received their horse drawn wagon, a group of men from Ocean Park got together and formed a new fire company. This company was called Santa Monica Co. No. 2, was made up of eighteen members. A.N. Archer a prominent citizen in Santa Monica, was elected President of that company; William H. Menzies was Foreman; C.J. Marvin, Assistant Foreman; J.H. Hassinger, Secretary and E. Rudisill, Second Assistant Foreman. The City Trustees furnished lumber for a small firehouse which was erected on property donated by William Martin, a local businessman and owner of the area called Martin Block. All work was done by the men of Company No. 2 and this station served as their quarters for seven years.

In May of 1915, the city agreed to purchase it's first triple combination pumper. It was a Seagrave 750 gpm unit placed in service at Station 2 along with the Garford truck. William Mohr was assigned as the first Engineer of the new Seagrave which was referred to as "Nittinger's toy" around town.

On August 10, 1925, Fire Company No. 4 was founded. The station was built in the "newer" residential area of town at 1824 Montana. An REO triple combination pumper was placed in service there with two men. With addition of this new company, Santa Monica now had four engines with a pumping capacity of over 3,000 gallons a minute.

During World War II, Santa Monica formed its' own auxiliary fire department as a precaution against attacks from the enemy. Many citizens joined on a voluntary basis and were given Ford pumpers and surplus war clothing to use. These men drilled with the regular fire department and assisted them at fires when called on.

The auxiliary firefighters were an energetic group who loved being part of our department. They had their own apparatus and a chief who worked closely with our Assistant Chief Hardman. Their equipment was first stored at an old motel auto court. This soon became untenable, so the city was asked to provide separate stations for the volunteers and their equipment. The first auxiliary fire station was built at Alley 8 and Montana.

On August 1, 1946 the Bureau of Fire Prevention was formed by Ordinance 785. Captain William Bedford was assigned as the first Fire Marshal. This new division was in charge of all business and residential inspections for the city. Many new codes were written and implemented by the department and enforced by the Bureau.

Former Fire Chief Charles Carrell had appealed to the Santa Monica City Council regularly for years asking for a new station to cover the airport and the city's southeast side. The need was definitely there. Since the beginning of Santa Monica Airport, Santa Monica firefighters had responded to the airport for many crashes and fires. The Douglas Aircraft Company had provided their own fire brigade during the war but since operations began to wind down, they reduced their manpower. Civilian flight operations were steadily increasing alongside the military's flight operations.

After many meetings, the Douglas Company and Santa Monica came to an agreement. They would donate their old combination fire and police station to be used by the SMFD if we would refurbish it. They would also give us their crash truck fitted with "carrot top" overshot nozzles. Total cost to the city for this new station was about $8,500.

On March 9, 1949, the Douglas Company moved their station and the 1949 White crash truck to its present location at 2801 25th Street, officially turning it over to Santa Monica. For the next few months, the men worked hard at getting the station ready for occupancy. On September 16, 1949 after months of work, Engine Company 5 finaly became a reality.

Under the leadership of Fire Chief John Sturges, the Santa Monica Fire Department and the City of Santa Monica agreed to begin a paramedic program in 1974. The first group to attend paramedic training included Jerry Parker, John Stone, George Graham, Phil Donatelli, David Eastman and Jim Hill. After five months of training, they were assigned to Engine 4 with two men on each shift. Captain Bill Pajares was the Paramedic Coordinator assigned to the company.

Fire Protection, emergency medical services, and other emergency services in Santa Monica are currently provided by 115 uniformed and civilian personnel. There are four fire stations with 30 firefighting personnel on duty each day. There is a fully staffed Fire Prevention Division, a Training Division and Administrative Division which includes dispatchers and the administrative staff.

The present Fire Chief is Thomas C. Tolman who was appointed March 5, 1979 after the retirement of Chief Sturges. Chief Tolman began his career in fire protection with the Los Angeles City Fire Department in December, 1955. He was promoted through the ranks to the position of Assistant Fire Chief and retired from the Los Angeles Department when he became Fire Chief in Santa Monica.

After his appointment, the City of Santa Monica was one of the first cities in the State of California to adopt an ordinance which required sprinklers and smoke detectors in specified occupancies. An award-winning public education program was initiated in 1981 and an Arson Investigator's position was approved in 1982. A Fire Captain was

recently appointed as the Hazardous Material Coordinator. The Insurance Services Office's latest survey rated the fire department Class 2, an improvement of a prior Class 3 rating. The Santa Monica Fire Department is truly a "full service" emergency organization.

The traditional virtues that have ruled the lives of American firefighters since colonial times still apply today. The firefighters' world is one that is made up of hard demanding work, personal sacrifice, compassion, loyalty, great risk, and teamwork. They are dedicated people who are committed to providing for the welfare of the citizens of our community.

Members of the Santa Monica Fire Department, both past and present, have exemplified these virtues for the past 100 years. We salute everyone associated with the Santa Monica Fire Department on their birthday.

HANK BIALICK: MAN OF THE YEAR

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. LENT. Mr. Speaker, recent events abroad, from Tiananmen Square to the Berlin Wall, remind us just how precious our freedoms truly are. Americans at times forget that basic rights, such as speaking one's mind to others, or practicing the religion of his choice, are not available to the majority of the world's inhabitants. We must at all times not only recognize the possession of these rights but also express appreciation to those whose lives are dedicated to their exercise.

Such an individual deserving of our recognition and approbation is Henry M. Bialick of Long Island. Hank Bialick is the publisher of a chain of weekly newspapers, and it is his responsibility to bring to his readers the news of the community. This is not a task that he takes lightly. Under his leadership, the Oceanside-Rockville Center Beacon, the Baldwin-Freeport Citizen, and the East Rockaway-Lynbrook Observer have been recognized as outstanding journalistic publications that play an important role in the lives of the readers they serve.

Hank Bialick does not believe that a weekly newspaper should merely report the news; his motto "Your Voice in the Community" displays his desire that his readers use his publications to air their views and make positive, constructive changes in the community, and he puts his words into action each and every week. Readers are encouraged to write letters to the editor, and it make no difference whether the writer agrees or disagrees with a policy or an issue. Hank Bialick believes that each individual has a right to express himself in the pages of the Beacon, Citizen, and Observer, and encourages community participation in discussing problems and offering ways in which to resolve them. Mr. Speaker, this is a graphic demonstration of freedom of the press in action, and Hank Bialick deserves our gratitude for his tireless efforts in ensuring that the people of southwest Nassau County have the opportunity to exercise this freedom.

Hank Bialick has lent his considerable talents to a wide variety of charities and civic organizations. On December 2, 1989, the Olympia Guiding Light Masonic Lodge No. 1151 will honor Hank Bialick as its "Man of the Year" at a dinner dance to be held at Temple Avodah in Oceanside. The members of the Guiding Light Lodge are bestowing this award in recognition of Hank Bialick's service as historian and publicity director and his many years of tireless efforts on behalf of the community. I would like to take this opportunity, on behalf of my colleagues on both sides of the aisle, to express my appreciation to my good friend, Hank Bialick, for his unselfish and unflagging devotion to his neighbors, and to wish him and his lovely wife, Florence, many more years of health, happiness, and success.

A TRIBUTE TO BERTHA AND SAM FOX

HON. JERRY LEWIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. LEWIS of California. Mr. Speaker, I would like to bring to your attention today two outstanding community leaders, Bertha and Sam Fox. On December 3, the Arrowhead Chapter of Hadassah will honor Bertha and Sam Fox for their many years of leadership and expressions of love and concern to others in their community. In fact, Mr. Speaker, a gift of medical equipment is being purchased in their honor to be given to the Hadassah hospitals in Israel.

Over the years, Bertha and Sam have been affiliated with a number of civic and community organizations. Bertha has served with the congregation of Emanu El Sisterhood, the League of Women Voters, the Casa Ninos Chapter of the Children's Home Society, the San Bernardino-Tachikawa Sister City Commission, the Orton Dyslexia Society, the San Bernardino-Herzelia—Israel—Sister City Commission, and has been active with the PTA at the San Bernardino Public Schools. In addition, she has been president of the Arrowhead Chapter of Hadassah for 2 years and is currently South Pacific coast region vice president of Hadassah. A lifetime member of Hadassah, she has been very active in student exchange programs associated with AFS International, Sam has served as vice president of the congregation of Emanu El, chairman of the San Bernardino United Jewish Appeal and as a board member of the congregation of Emanu El. In addition, he has been active with the San Bernardino-Tachikawa Sister City Commission, the San Bernardino-Herselia Sister City Commission, and the AFS Student Exchange Program. Sam is currently an associate member of Hadassah, a board member of the Orton Dyslexia Society, and a member of Toastmasters.

Please join me, Mr. Speaker, in honoring Bertha and Sam Fox for their dedication and contributions to us all. Their work continues to enrich us all and for that we owe them many thanks and wish them good health in the years to come.

CELEBRATION OF THE 75TH ANNIVERSARY OF ST. SAVA SERBIAN ORTHODOX CHURCH

HON. PETER J. VISCLOSKY

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. VISCLOSKY. Mr. Speaker, I rise today to pay tribute to St. Sava Serbian Orthodox Church on the occasion of its 75th anniversary.

Under the leadership of the Very Reverend Father Todorovich, St. Sava presently serves 750 Serbian-American families. The devine liturgy is delivered each Sunday in old Slovanik and English languages. The service is further orchestrated by the moving songs of the choir. Additionally, the children are educated in the traditions of the Serbian Orthodox Christian faith at Sunday school each week.

Like so many others in search of a better life, Serbian-Americans came to northwest Indiana at the turn of this century to work in the new steel mills along the shores of Lake Michigan. The hopes for a better life for this Serbian community included not only freedom from persecution, a chance to build a home, and to educate their children, but also the opportunity to worship in a parish of their own. In February 1910, seven diligent individuals began organizing to build both a church and a school. By 1911, with the aid of others in the community, a school was established. In February 1914, the church community of St. Sava Serbian Orthodox Church was founded and within a year had secured a place to worship on 20th and Connecticut in Gary, IN, under the leadership of Rev. Pavle Veljkov.

In 1938, a new church was consecrated on 13th and Connecticut Street and remained the stie of services for the next 40 years. During this period, St. Sava served as a magnet drawing hundreds of post-World War II immigrants to Gary. Among these immigrants were brave men who fought with Draza Mihailovich, the Serbian Chetniks leader, and families from prison camps in Europe.

In 1978, a tragic fire destroyed the parish building in Gary. Quickly mobilizing their resources, the congregation of St. Sava Serbian Orthodox Church furnished the parish hall in Hobart, IN, with the necessary alter items and continued services without interruption.

The destruction of the old parish in 1978 helped lay the foundation for a new era at St. Sava. After purchasing 140 acres of land in Merrillville, IN, the St. Sava congregation began plans for a new church and school. Official construction on the new church began on July 31, 1985. Since then numerous ceremonies have been held to bless the foundation, bells, and crosses.

The congregation of St. Sava Serbian Orthodox Church is proud of its Serbian heritage and culture. Through their unshakeable strength, devoted faith, and community commitment, each succeeding generation has made a greater contribution to both northwest Indiana and our society. Proud of their Serbian heritage and culture, the members of St. Sava firmly believe in the principles of freedom and democracy.

With the start of construction of a new parish, St. Sava Serbian Orthodox Church has much reason to celebrate its 75th anniversary. Members of St. Sava have maintained their cultural heritage, fought for political freedom for Serbians, and served their community and Nation well. Indeed, St. Sava Serbian Orthodox Church is as intent today to serve as a cultural and religious focus for its parishioners as it was 75 years ago. Further, due to its outstanding efforts, the region as a whole has benefited.

As St. Sava Serbian Orthodox Church celebrates its 75th anniversary, I wish them continued success in the future and extend my gratitude to the congregation for their hard work.

TRIBUTE TO RICHARD ALATORRE

HON. BILL RICHARDSON

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. RICHARDSON. Mr. Speaker, any community's hopes for a better quality of life depend on committed and effective leadership. We in the Hispanic community are fortunate to have many such leaders working toward a brighter future for Hispanics across the Nation. Among the most impressive of these emerging leaders is Richard Alatorre, councilman of the city of Los Angeles. Mr. Alatorre's leadership has benefited not only Hispanics, but all Los Angelinos who seek to improve their city and quality of life.

Mr. Speaker, I would like to take this opportunity to insert a recent article on Mr. Alatorre. I think my colleagues would do well to learn of his impressive record and the growing strength of Latino leadership.

[From the Los Angeles Times, Oct. 22, 1989]

CROSSOVER DREAMS

(By Bill Boyarsky)

Lou Koransky needed help in the credit department of his busy jewelry store on Whittier Boulevard. It was 1960 and the old East Los Angeles of Russians, Armenians, Japanese, Latinos and Jews, which existed when Koransky arrived in Boyle Heights from Chicago in the '20s, had disappeared. The Koranskys and many other Jewish families, for example, had moved to West Los Angeles after World War II. Now East L.A. was almost entirely Latino, and a large number of Koransky's customers spoke no English.

The person Koransky sought had to speak Spanish. But mostly the employee had to be someone as smart and tough as Lou himself. "I was looking for someone who was aggressive," Koransky recalls, sitting in his small office at the rear of the store. "In the collection business, you have to have a certain amount of toughness. But you have to be very tactful because someday the slow customer might turn out to be a very good paying customer."

A perfect job description for a bill collector—or a politician. Koransky found a young man with those talents at Garfield High School, a few miles from the store. He was Richard Alatorre, the student body president, who was about to graduate and attend Cal State L.A.—and who would eventually become one of the most influential Latino politicians in the state.

"I was good," Alatorre says of his five years at the jewelry store. "The way I used to collect is I used to embarrass people, and that's painful. . . . I had this one guy, his bill was $15,000. I would go to his place, sit down with him, then I'd tell him, 'Well OK, man, how much you going to pay me?' He said, 'I'll give you $300.' I said, 'Hey, man, you think I sat down here and had a drink with you for $300? I need more.' So he gave me $1,000. . . . I was good because I was mean when I had to be mean. And I was a softie when I had to be a softie."

A quarter of a century later, Alatorre is still applying the lessons he learned in Lou Koransky's jewelry store. When it comes to back-room negotiations or to raising campaign funds, the Los Angeles city councilman and former state legislator can be shrewd and tough, not always playing by the accepted rules. The power he and his allies wield has led critics to dub them the "PRI of East L.A.," a cynical joke referring to the ruling party in Mexico, which is known for its win-at-all-costs politics. Yet many say he is extremely sympathetic when it comes to helping the struggling families of his old neighborhood find jobs, gain political clout and obtain city services. Over the years, he has moved back and forth between the tough, inside politics he believed were needed to bring economic development to East Los Angeles and the more accommodating kind of politics needed for acceptance in the mainstream.

Now, as he contemplates a possible run for mayor or county supervisor, Alatorre is walking a far trickier path, a path that makes it increasingly necessary for him to refine his unpolished personal style. That approach worked well with his East L.A. constituents. It clearly produced results among backroom powerbrokers in the State Assembly, who put him in charge of fashioning a legislative and congressional reapportionment that gave Latinos their most substantial political representation in history.

But to succeed in a highly visible citywide or countywide campaign, Alatorre needs different set of skills. He has to charm the media. And he needs the support of corporate executives and other major contributors whose backing is essential for a race that could cost several million dollars. Although Los Angeles has become a city where minorities are the majority, the largest single group of voters will remain middle-class and affluent whites. That's because they are the most likely to go to the polls, splitting between liberals and conservatives. Looking at it as a campaign manager would, it's clear that the winner in the next mayoral election is likely to be a minority person who appeals to white liberal and moderate voters.

On the surface, Alatorre looks like a candidate who could be packaged effectively in a high-profile campaign: A slender man of 46, he favors expensive-looking, well-cut Italian suits. His hair is black, his complexion dark. He comes across well on camera. But his combination of the crude and the pleasant, of bluntness and courtliness, casts an aura that puts off people used to more conventional, or more polite, politicians. At City Council meetings, Alatorre slumps in his chair looking bored as his colleagues drone on. He reads the newspapers, sneaks a cigarette at the side of the chambers. And smoking, swearing, always saying "Hey, man," Alatorre sometimes acts as if he never left Garfield High.

"I think a Hispanic is going to get elected mayor of Los Angeles," says Philip Montez, who was one of Alatorre's political mentors and is now the regional director for the U.S. Commission on Civil Rights in Los Angeles. "But I think it depends on the price that the Hispanic individual is willing to pay. The price is that you can't be as ethnic as where you came from." Alatorre's ascent has come at considerable personal cost. Twice he paid fines in ethics disputes. And he's gone through two divorces and a struggle with alcoholism.

Indeed, his rise from the barrio illustrates the difficulties that face an ethnic-minority politician who wants to move from such a neighborhood to the broad mainstream of politics.

Ethnic candidates began entering Los Angeles' political leadership in the 1960s, when the dual effects of the civil rights movement and a growing influx of immigrants from Asia and Latin America shaped a new urban politics. Blacks, organizing their communities with voter-registration drives, got elected to the City Council and in legislative districts; Mervyn M. Dymally, who built a power base in South-Central Los Angeles, was one of the first and most successful, becoming an assemblyman, lieutenant governor and now a congressman. Young Jewish politicians—Henry Waxman and Howard Berman (both now congressmen) and Waxman's brother, Michael—organized the large Jewish population that had settled on the Westside and in the San Fernando Valley.

In 1973, Tom Bradley became the city's first black mayor, heralding the emergence of an important variation: the crossover ethnic politician. That is somebody who can not only carry his ethnic base but also win support from other ethnic groups, as well as from voters not associated with an ethnic minority. Bradley is the supreme crossover ethnic-minority politician, well liked in his South-Central Los Angeles base, and, before his recent financial troubles, in non-black areas, particularly the Westside Jewish community. But there have been no crossover politicians from the rapidly growing Latino minority, which is projected to comprise almost 40% of the Los Angeles population by 1993, up from the current 29%. Now, leaders of that community are itching to reach the top, too.

So a serious test awaits Alatorre: Can he become a crossover campaigner in a bigger electoral arena? Can he mount a successful campaign for county supervisor or even mayor of Los Angeles? If he were to run for mayor in 1993 and succeed, he would be Los Angeles' first Latino mayor since Anglos forced Mexicans from power in the 19th Century.

Though his name may not yet be a household word in Los Angeles, Richard Alatorre long ago became a force in the state Democratic Party's mainstream. As an assemblyman from 1973 to 1985, he helped shape the state's farm labor law, which gave migrant workers collective bargaining rights. Using his influence with Assembly leaders, he got the UC Irvine School of Medicine to admit more minorities in return for an appropriation for a new teaching hospital. He was the first Latino with enough power to be a key leader in one of Sacramento's great events, the fall in 1980 of an Assembly speaker—in this case, Leo T. McCarthy—and later he became a key lieutenant to current speaker Willie Brown, whom he had supported in a pivotal vote.

His style was confrontational, clever, surgical. His friends say he is warm and intelli-

gent, but his enemies—those he has outmaneuvered—say he can play rough. When Republicans stormed into his office protesting the gutting of their districts, he replied: "It has nothing to do with you personally. Business is business." And when opponents accused him of going back on promises, he smiled and said, "What was then is then; what is now is now." When McCarthy was speaker, Alatorre was banished to the reapportionment committee in a year when there was no reapportionment bill. He and a friend got revenge by shepherding a series of good government bills out of the committee onto the Assembly floor. The legislation was so strict it was doomed to defeat, an embarrassment to McCarthy, who was cultivating an extra-clean image. Finally, McCarthy called Alatorre into his office and complained. "Leo," Alatorre replied, "I understand what you have to do to me. I hope you understand what I have to do to you."

He brought his calculatingly blunt style with him and when he decided to leave what he saw as the relative obscurity of the Assembly to run for City Council in 1985. A strong ally of the mayor, he's aligned with pro-development forces on the council and is acknowledged to be a skillful practitioner of complex, behind-the-scenes political maneuvers. He's a vocal advocate of civil rights and civil liberties. In his short tenure on the council, Alatorre has organized shelters for the homeless. He has put together government and private funds for construction of more than 250 units of low- and moderate-income housing in his district. He has obtained state "enterprise zone" tax incentives to promote development in East Los Angeles. Assuaging the fears of some of his more affluent constituents, Alatorre has also pushed through an anti-development minimall moratorium in the Eagle Rock section of his district.

Critics acknowledge that he can get things done, but many question his tactics. "He would have been a great guy in L.A. when everything was done on the inside," says Rudolfo F. Acuna, a professor of Chicano studies at Cal State Northridge, whose book, "A Community Under Siege," chronicles the political awakening of East L.A. Acuna says Alatorre spends too much time raising money from and catering to special-interest groups, to the neglect of the community.

"Richard knows how to command power, to use power," adds Council-woman Gloria Molina, whose district adjoins Alatorre's and who is considered to have a bright political future herself. "Richard's style was pretty dictatorial; he had a tendency to be a bully." But she says he has changed on the City Council. "I find him still persistent about things, but he isn't as pushy as he was before. He's changed as a person. I think he has softened up."

That change may be a reflection of his coming to terms with the strains of his political life. His second marriage ended just recently. And he revealed in answer to questioning, he is a recovering alcoholic.

"I have a drinking problem," he said during a long interview in his office. His coat was off. The door was closed. He was seated on the couch, his feet on the coffee table. The question was posed because reporters in Sacramento had talked about what they considered Alatorre's erratic behavior in committee hearings, where his moods would swing from anger to boredom to hilarity. A year ago, he sought treatment, he says, and since then he has been involved in a sobriety program.

"But, you know, I look at it from a positive. I'm happy I stopped. I never looked at myself as having a problem as it related to alcohol," he says, "but I think it got basically to a point where it just didn't work for me. And what I learned [is that] where other people have normal outlets for their rage, for their anger, for their hurt, I didn't. I suppressed it all," he says. "Not a lot of people can say they know me," he continues. "And that worked for me. But it also became very destructive. You know, this is the type of profession that just takes a lot out of you. It is very demanding. There's a lot of hurt and there's a lot of pleasure. . . . It was easier to escape your own problems by dealing with other people's problems. But that didn't do any good for Richard Alatorre," he concludes. "You know, I'm 46 years old and I'm still learning about Richard Alatorre."

To understand Richard Alatorre, it is necessary to understand where he came from. East Los Angeles, the gritty community where he was born and raised, reaches from the Los Angeles River, through Boyle Heights and City Terrace, out Brooklyn Avenue and starts just west of the river, at the plaza near Olvera Street, where Los Angeles was founded on Sept. 4, 1781.

The plaza, now as then, is an entry place for Latino immigrants. Many will eventually settle in Boyle Heights, Maravilla or Belvedere, where Latinos moved when downtown businesses displaced them from the plaza in the early 20th Century. Jews, Armenians, Japanese and blacks also lived in these East L.A. neighborhoods. A common history still links the groups that have passed through East L.A., and it is among them that Alatorre would have to forge new ties to win a citywide race.

The politics of East Los Angeles have traditionally revolved around two issues: civil rights and saving the neighborhoods from "urban renewal." Neighborhood-saving has not been especially successful. Thousands of homes have been removed for the huge county hospital, county jails and the San Bernardino, Santa Ana, Pomona and Long Beach freeways, but the battle countinues, with intense community opposition to a proposed new state prison and a county jail expansion. The battle for civil rights now involves enfranchising voters, and Alatorre is at the forefront. In addition to his efforts for reapportionment, he is a leader in the fight to force the Census Bureau to count non-citizens, which would eventually mean more political power for Latinos.

Alatorre grew up immersed in the neighborhood's conflicts. He spent his childhood with his parents and his sister, Cecelia, in a small, brown stucco house near Michigan Avenue where his mother, Mary Alatorre, a widow, still lives today. Mary was born in a small Arizona mining town and moved to Los Angeles in 1925. Dropping out of high school in the 10th grade, she learned to be a beautician and in 1931 met Joe Alatorre, who'd come to L.A. from El Paso, Tex., while working in his sister's beauty parlor on Brooklyn Avenue. He was a repairman at a stove factory.

A brief experience doing farm work taught Mary Alatorre the value of education. She remembers the growers: "They just pushed people around. They treated them just like dogs. All these things were embedded in my children. I told them there is nothing you can do but get yourself a good education. That was our whole goal, my husband and I."

They succeeded with Richard. "I figured out real early, manual labor and I had a falling out," says the councilman. "If I wasn't good with my hands, I had to use my head, and my head was pretty good. I was the oddball of the group. I was a student body officer or class officer every semester from junior high school through high school. . . . The girls thought I was God. The guys, they always respected me."

Cultivating that respect was his key to suriving in the neighborhood: He had to fit in with, if not belong to, the gangs, honing a kind of diplomatic skill that has served him well in politics. "It's a very tough area," Alatorre says during a drive along Michigan Avenue, near Eugene Oregon Park. "I always ran around with older guys. When I started junior high school, they were graduating into high school. Those were my friends. And obviously, because of that, I was well protected."

In high school he joined the debate team, and, with his father's encouragement, he took an interest in politics. A vision of his future crystalized when he heard John F. Kennedy give a campaign speech at East L.A. College on a rainy night in 1960. "He seemed to be the first presidential candidate reaching into my community and asking for our help. That represented hope to me," Alatorre says. So he handed out leaflets for Kennedy and also got involved in the campaign of Leopoldo Sanchez, who became one of the first Latinos elected to a judgeship in Los Angeles. Sanchez's victory inspired him: "I felt one day I would love to represent my community," he says.

He was one of a handful of students in his graduating class to go to a four-year college, eventually earning a graduate degree in public administration from USC. He went on to teach sociology at Cal State L.A. and at UC Irvine and night courses in government at the federal prison at Terminal Island.

From the outset, Alatorre's political career moved on two tracks. One was the liberal community politics of the growing Chicano movement, which was beginning to focus on poor education in East L.A. schools. The second was the more partisan politics centered on the Democratic Party and raising money to finance campaigns. Alatorre thrived in both worlds.

One day while in court on a collection case for the jewelry store, Alatorre befriended a young attorney who had been elected to the Assembly. Walter Karabian represented another part of the East Los Angeles world, the newer subdivisions around Monterey Park. He was good at raising money from the developers and other businesses in the area and was the majority leader of the Assembly.

Alatorre also hooked up with somebody from the more radical side of East Los Angeles politics—Montez, who was then executive director of the Foundation for Mexican American Studies. When Alatorre came to that office to get information for a college paper, Montez liked him and offered him a job. Alatorre became known as "the kind who hung around Phil Montez."

What he learned from Montez was to play his own game, not his opponent's. "We were meeting with Wilson Riles, the superintendent of public instruction, to discuss changes in the texts they were using in L.A. city schools that would be more favorable for Hispanics," Alatorre recalls. "Montez told me that this guy was a real scholar, an intellectual, and if you confront him as a gentleman, he'll dance you all over the floor. So I basically went in there and hit him in the knees, by using profanity and being outra-

geous. So I was able to bring the argument into my arena, and I won."

In 1970, Karabian hired him as a staff assistant in the Assembly. Then, in 1971, when Assemblyman David Roberti was elected to the Senate, Alatorre ran for Roberti's Assembly seat. He lost the first time in a special election. Rifle shots were fired mysteriously into the home of an underdog opponent, and the publicity helped give the opponent the victory. But Alatorre won in the regular election six months later.

Quickly finding more friends and mentors, he became a force in the Legislature and continued to best the big boys, the Anglos, at their own game. The outgoing Alatorre was accepted by the top social strata, a bipartisan group that included Democrats such as Willie Brown, Mike Roos and the late Jack Fenton and Republicans Bill Campbell, Bob Beverly and Ken Maddy. "We were all the same age, we all liked to travel, we all liked the good life," says Brown. They had dinner at Frank Fats, the Capitol hangout. They traveled together to Jamaica. And all the while, Alatorre listened and learned.

As his friends rose through the legislative ranks, Alatorre's influence grew. His work on the farm labor law and reapportionment made him a star among the state's Latino politicians. And political plums began coming his way. After the reapportinment, Brown named Alatorre chairman of the Government Operations Committee. This is a "juice" committee, so called because it has jurisdiction over the kinds of businesses—race tracks and liquor and beer interests—that can be squeezed for campaign contributions. A look at his campagin contributions reports tells the story: Quarter Racing Inc., Santa Anita, the San Francisco Bay Area's Pacific Racing Assn., the Miller Brewing Co. and the Wine and Spirts Wholesalers of California were among the donors. During this period, he led high-profile but unsuccessful efforts to legalize off-track betting as well as to weaken rent control and begin public financing of state elections.

While Alatorre relished his status in the Legislature, he wanted more visiblity. "To tell you the truth, I got tired of telling people that as an assemblyman I didn't work for GM," he says. "No one knows what an assemblyman does." Los Angeles City Hall, he thought, was full of opportunity. For one thing, television stations cover almost every meeting of the council, while no local stations cover Sacramento regularly anymore. So, in 1985 he ran for Los Angeles City Council. With a campaign financed substantially with special-interest contributions he had received as a powerful legislator, Alatorre was elected to represent the 14th Council District, which reaches from the Latino immigrant neighborhoods of Boyle Heights, through Asian and Latino Lincoln Heights and working-class Glassell Park up to the expensive homes in the hills of Eagle Rock. He is Bradley's main defender on the council in the investigations of the mayor's finances. He also played a key part in persuading the council to drop a plan to fight a federal suit and agree to a city reapportionment that made possible the election of a second Latino council member.

Alatorre may look bored at meetings, but he is a power on a City Council that is more divided than it has been in years. The council is a place of shifing alliances When two longtime Bradley allies left, Alatorre stepped into the vacuum. "Richard kind of forced things with the mayor, saying, 'Do you want help or not?'" one council aide recalls.

Even before Bradley's financial dealings got him in trouble, Alatorre was helping him fight off political challenges. Last year, he nagged Bradley's aides into supporting a Police Department expansion, which helped weaken an attack on the mayor by Council man Zev Yaroslavsky, then a mayoral hopeful.

Alatorre's alliances and his mastery of political strategy have made him an effective councilman, but another side of his street-level, back-room political style raises questions even in his Latino base. "He's probably the closest thing to Jesse Unruh we have," says Acuna, recalling the late Assembly speaker who pioneered modern legislative political fund-raising. "As a politician, he has no equal for making the deals, for putting it together." It is the nature of some of his money deals—going back to his "juice committee" relationships with special-interest groups in the Legislature—that concerns those around him.

In 1986, Alatorre agreed to pay a record $141,966 to settle a lawsuit filed against him by the City Attorney for failing to disclose the source of campaign contributions to his City Council election campaign. Much of the money had been accumulated while Alatorre was an assemblyman, and the law required him to disclose the names of the donors. Alatorre said it was an oversight, but his critics have maintained it was a deliberate attempt to illegally use contributions raised while he was a legislative power. And last year, Alatorre paid a $2,000 fine for violating state conflict-of-interest laws. He admitted that he tried to steer a $722,500 contract to The East Los Angeles Community Union after it paid him a $1,000 speaking fee.

TELACU, in fact, generates much of the controversy around Alatorre. It was founded in the 1960s to stimulate East Los Angeles businesses, build low-income housing and provide jobs as part of the federal War on Poverty. From the outset, TELACU was development-minded. Opponents accused it of questionable use of federal grants and of running businesses that seemed to have little connection with East L.A. jobs.

Alatorre is firmly allied with TELACU in a strong political operation, and TELACU now hopes to get a piece of Alatorre's biggest civic project, a proposal to redevelop a 67-acre area around Union Station into a neighborhood of commercial high rises in the next 10 to 15 years, which, opponents say, would destroy the essence of historic Olvera Street.

In answer to his critics, Alatorre says that his ties with TELACU and his work on city projects such as the Union Station-area development are evidence that he intends to shape East Los Angeles to meet community needs. "Why is it we do not open up opportunities for minorities and small-business people so they can do business with the city and with the state?" And as for his fund-raising, he says: "I believe in putting my money where my mouth is."

Today, Alatorre is a relaxed man on the turf he has occupied for many years. One Saturday, he stops for lunch at a hamburger stand he has been patronizing since he was a boy. The owners yell at him to get a street light for their Whittier Boulevard corner. "I can't even get some stuff for my mother, man," he replies. "Ask the mayor," says one man. "No, no, it ain't the mayor. If it was the mayor you'd get it," Alatorre says, pointing out that the hamburger stand is in unincorporated territory under the jurisdiction of the county. "I got to talk to this other guy [County Supervise Ed Edelman]. I'll bring him down here."

Clearly, he's at ease and in control of his own territory. But Los Angeles history is filled with warnings to ethnic politicians looking for influence outside their communities. Take, for example, the painful experience of Rep. Edward R. Roybal (D-Calif.).

In 1949, the liberal Roybal was elected to the City Council. The following year, he cast the only vote against an ordinance requiring Communists to register with the police and forbidding them from owning guns. Even more annoying to the city's business leaders, he opposed plans for massive development in East Los Angeles, of the type that later leveled poor residential neigborhoods on Bunker Hill and in Chavez Ravine. In 1958, Roybal ran for county supervisor in a district that was mostly Anglo. He lost, but many East L.A. old-timers believe Roybal was the victim of election theft. After Roybal finished 393 votes ahead on election night, the county registrar discovered a 12,000-vote counting error. Roybal went on to become one of the nation's first Latino congressman and is regarded as a father figure by many up-and-coming politicians. But the point is, even a widely respected figure like Roybal couldn't manage to go beyond his own district.

Today, however, a Latino politician such as Alatorre might face fewer obstacles. The business and union leaders who backed Bradley are looking for a new champion—and Alatorre is sympathetic to their development policies. Aware that their population is shrinking compared to Latinos, some black politicians seem willing to support a non-black who is sympathetic to their concerns. And Alatorre, because of his work with the NAACP, is the Latino with whom they've forged the strongest ties.

"He was able to establish the kind of rapport with the black community that a lot of other people can't," says Montez. "That's . . . street smarts."

But that may also be Alatorre's great handicap: He may be too much from the streets, too tough in his pursuit of power. Montez has a warning for his friend: "Richard has to be careful he doesn't get the omnipotent feeling [that his TELACU allies] can do anything they want. That's the one blind spot Richard has. And he's got to watch it. Richard has a very, very large constituency that is his if he just continues to develop it and stops playing the old boy network. That is vitally important to Richard's future."

The competition among ethnic candidates in the 1933 mayoral election may well be fierce. With the growing number of Latino voters, strong Latino contenders are expected. One of them may be Molina, a strong voice for community redevelopment. Others might be Sen. Art Torres, a longtime friend and ally of Alatorre, and Dan Garcia, an attorney and former City Planning Commission chairman. Appealing to the growing number of Asian voters might be Councilman Michael Woo, an urban planner who represents the Hollywood area.

As well as any of them, Alatorre knows the difficulties of an ethnic politician's moving up. "The increase in Hispanic voters makes it more viable," he says. "But you can't rely on the Hispanic community to be elected."

Still, he adds, "As a Hispanic, I think Los Angeles is where it's at politically, because of the change in the demography in the city." Alatorre won't say that he is considering running for mayor three years hence,

but he clearly believes that his future is here. "I may have questioned my decision [to move to Los Angeles] at first because I was adjusting, but now I think it is the best decision I have made—personally, as well as politically."

NATIONAL BOXING GOODWILL AMBASSADOR

HON. MERVYN M. DYMALLY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. DYMALLY. Mr. Speaker, it is with a great deal of pleasure that I bring to your attention the accomplishment of our friend Mr. Jim Balukevich.

Recently, Mr. Balukevich was inducted into the New Jersey Boxing Hall of Fame with the following citation:

NATIONAL BOXING GOODWILL AMBASSADOR

The one individual that unofficial title brings to many minds (and who has, incontestably, earned such honorable recognition) is Jim Balukevich . . . long time member of the Washington, D.C. Boxing Commission, and founder of the D.C. Boxing Hall of Fame.

This transplanted New Englander was born at Nashua, New Hampshire, where he eventually captained its 1933-34 H.S. basketball team; winning a college basketball scholarship as a result thereof. He turned it down to join the U.S. Army, and it was while stationed at Schofield Barracks, Oahu, Hawaii, that he went out for the boxing team . . . and wound up winning a bronze medal in the Hawaiian Division Boxing Tournament, in 1938.

An interesting sidelight of his Hawaii duty was his election to the social-political post as the wartime "Cock-Eyed Mayor" of the island town of Kaunakakai (pronounced cow-na-cock-eye), succeeding Hollywood's Warner Baxter. Ironically, Jim was subsequently made "Mayor for a Day" of his old hometown, Nashua (while on furlough from Camp Davis, N.C., in 1940), and received a replica of the key to the same city from Mayor James Donchess during a return visit last year.

Alaska duty followed, from which he was shipped to Corregidor (in the Philippines). It was Jim's outfit that liberated Saipan on June 15, 1944, which explains retired Ben Blaz (now a Congressman) referring to Balukevich as "The Liberator of the Islands" (Marianas, Guam, Saipan and Tinian), and Jim was again made a Mayor . . . this time of Garapan (Saipan's biggest city). The title "Mayor" suits this gentleman, really, as his present employment in D.C. keeps him in constant touch with politicians of all persuasions on Capitol Hill, and he attends scores of congressional affairs and parties. It is, therefore, genuinely fitting that he is also often referred to as "The National Veteran Boxers Association's Man in Washington."

Jim is a George Washington University graduate and remains active in its psychology chapter, as well as being a member of the National Honor Society in Psychology. Representative Fred Grandy (formerly of "Love Boat") recently added to Jim's academic credentials by presentation of an honorary degree from the University of Okoboji, a college of physical education in Iowa; also adding a spoof of Ph.D. in "Uplifting Behavior." At this point, it does well to point out that this goodwill ambassador—for all seasons—has been the deserving recipient of many, many awards and citations for boxing-related as well as community endeavors, and was inducted into the D.C. Boxing Hall of Fame, in 1987.

His travels throughout the country attending V.B.A. functions and promoting the welfare of the veteran boxer also compliments his memberships in the American Association for the Improvement of Boxing (A.A.I.B.) and the West Coast's Cauliflower Alley Club (Mike Mazurki, President). He is in constant demand as a "Presenter" and speaker at boxing, wrestling and other sports events, and constantly criss-crosses the U.S. voicing his welcomed opinions on legislation re boxing bills to strengthen the sport. He advocates the establishment of a National Federal Boxing Commission, and Congressman Bill Richardson has recommended that he serve as commissioner when it someday becomes a reality. He has seen many fighters come and go but still ranks Joe Lous as "the best boxing champ I ever met . . . and I doubt there will ever be gentlemen like Joe in boxing again."

This 74-year old former boxer is also a member of the "Honorable Order of Kentucky Colonels," an Honorary Lieutenant Colonel Aide-de-Camp in the Alabama State Militia, an Admiral of the Georgia Navy, a member of No. Carolina's "The Order of the Long Leaf Pine," as designated Ambassador of Good Will of the Cherokee Nation, a Deputy Marshal of Dodge City, a graduate of the U.S. Army Language School at the Presidio of Monterey, California (Russian), and a sport historian and artist on Capitol Hill. And somehow, he's also managed the time to contest and win the Senior Olympics Middleweight Boxing Championship (65-69 age group) in 1980, 1982 and 1984 (held at the Bob Hope U.S.O. Center, Hollywood, California) and the National Skip-rope Championships in 1981, 1982, and 1984 . . . proof postive that "A boxer may retire from the ring, but he never retires his love of the sport."

On November 10, 1989, Jim Balukevich's many laurels and accolades will be enhanced by his induction, it was read into the Congressional Record that "he is the kind of person that personifies the very best that the manly sport of boxing embodies." Anyone knowing this gentleman will readily re-echo those of this extra fine human being are at the helm.

The boxing world offers its congratulations.

MINORITY HEALTH ISSUES AND CONCERNS

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. RANGEL. Mr. Speaker, I rise to call your attention to a speech by Mr. Bailus Walker, Ph.D., professor of public health policy and management at the Graduate School of Public Health, State University of New York at Albany, and chairman of the Minority Health Commission of the Department of Health and Human Services. The speech was delivered on Saturday, November 11, 1989, at the City College of New York during a conference on minority health issues, which I sponsored in cooperation with the City College and Harlem Hospital Center.

Dr. Walker's speech is a most eloquent presentation of the most pressing health issues facing the minority population today and a brilliant analysis of the challenges faced by policymakers in the area.

Dr. Walker's remarks were as follows:

MINORITY HEALTH ISSUES AND CONCERNS

(By Bailus Walker, Ph.D.)

In recent years, there is very little that has been left unsaid about minority health problems and needs. That is not the same as saying we know all the answers. What we do know is that a large and unacceptable gap still exists between what is and what could be with respect to morbidity and mortality among our minority citizens. The problem can be summarized in 10 simple phrases:

1. Too many deaths of normal birthweight babies.
2. Too many infants whose birthweights are low.
3. Too many infants who have developmental disability induced by parental drug dependency.
4. Too much chronic disease, cancer, cardiovascular disease, diabetes.
5. Too many pregnant women with too late or no prenatal care.
6. Too many male homicides.
7. Too many persons without health insurance.
8. Too many homeless people.
9. Too few minorities educated in the health and biomedical sciences.
10. And, finally, too much rhetoric or oratorical overkill, and not enough action to address the problem.

This longstanding gap indicates that our society has yet to deal effectively with what should be one of our greatest concerns: the lack of uniformity in the availability of current knowledge, skills and resources.

Even to the most casual observer, it is clear that health service skills, knowledge and resources are not: Uniformly accessible; uniformly acceptable; or uniformly affordable to all our citizens.

At the same time, we see much happening in the health field: Congress extended the ban on airline smoking; cholesterol levels are lower; high blood pressure is generally better controlled.

These trends should result in overall improved health.

Added to this list are significant developments in medical technology: Lasers are being applied in gynecology, neurosurgery, and oral surgery; most organs—liver, lungs, pancreas—can now be transplanted; and, more than a year ago, a surgical team separated Siamese twins joined at the back of the head.

These too have benefitted patients in various ways. But much remains to be done.

And as we add up the list of challenges, we soon become amazed by the number of items and their complexity. Some are primarily biomedical, others pedagogic; still others are social, economic and political. Virtually all are interrelated.

What strikes one most forcefully is the diversity of challenges we face as we attempt to close what appears to be an intractable gap—the gap between the current burden of health problems in minority communities and the lesser burden that is achievable with knowledge and skills already at hand.

And so it seems to me the most useful service I might provide would be to consider the challenges and opportunities to improve

the health status of racial minorities. To do so undefiled for this occasion by political, budget or status-seeking motivation. Our approach will be panoramic, blurring, an infinity of detail. It fixes on a single broad theme of challenges of service.

In regard to service, demographic change is clearly a major element in the challenge of diversity to health services and medical care. Several broad trends pose critical questions for all of us.

The first is the widely-discussed change in the dimensions of poverty in America over the past two decades. Advances in the civil rights movement—led by many in this audience—made it possible for many working-class and middle-class minorities to move away from the inner city. The decline in jobs for unskilled workers, deterioration of family stability and changes in mix of people and services in the urban centers have led to the creation of an underclass. It seems easy to dismiss this group as irresponsible or unreachable.

The group is small compared with how many poor there are in the United States but it has grown rapidly in recent years. Although the number of people in poverty grew 18 percent from 18 million in 1967 to 33 million in 1988, the number of poor living in concentrated poverty areas (census tracts with a poverty rate of 40 percent or more) has grown rapidly, by roughly 50 percent between 1970 and 1980—from 3.5 million persons to 5.6 million.

Over the same period, the underclass grew by roughly 234 percent—from 750,000 to 2.5 million.

This group is characterized by a growing separation from the rest of society—its norms—and especially its resources.

There is also the working poor. This group made up about one-third of all persons 16 and over who were in poverty. These are the more than 6 million persons whose family income was below the official poverty level even though they worked or looked for work.

This most complicated aspect of this demographic parameter is that the working poor as a group owe their poverty to two sets of circumstances:

(1) Low earnings resulting from a range of labor market problems including: Unemployment; inability to find work; and low wage rate.

(2) A family structure that is conducive to poverty such as the presence of dependent children and only one earner.

Because the poverty threshold is a function of family size, it is actually possible for a "poor" worker to have earned more than a worker who, because of different family circumstances, is classified as non-poor.

A significant element of this trend is the growth of the population's share of non-white citizens. Already, blacks and other non-whites are around 15-16 percent of the population. Over two dozen major American cities have so-called "minority majorities."

In less than a century, non-Caucasians will be more than one-fourth of all U.S. residents. Moreover, because of differential birth rates, a disproportionate fraction of the country's children, adolescents and young adults will be non-white.

Just think of the social and economic, and health care implications of an aged population heavily white combined with a youth population heavily minority.

These trends have serious ramifications for health and social policy, for health and medical practice.

For example, growth in the non-white share of the population is distressingly bound up with the persistence and even increases in certain familiar pathologies of disenfranchisement—substance abuse—teenage pregnancy—intractable poverty as well as more recent challenges to the health services system, such as devising and delivering high quality health care to those with little or no previous access to such care.

They also raise basic questions about what health services are most critical for minority families, how such services should be provided, by what practitioner, when, and in what setting, and at what cost to whom.

These demographic trends expand or lend added weight in the health care system to a group with new or greater needs or with needs that have so far been inadequately addressed.

Finally, these trends revoke certain classic debates over health sciences, research and education. These include: Reactive versus therapeutic emphasis; family practice-community practice versus specialization.

They also raise questions about the role of social and behavorial sciences in coping with epidemics such as AIDS and drug dependence and abuse—epidemics that are as much a social and behavorial phenomenon as they are biological ones.

These are classic debates because they have been endemic to the health care field for a long time and yet they are not resolved as we meet here today.

Indeed as we move into the 1990s, it is imperative that we expand and refocus our efforts and resources to address these so-called new "social diseases."

By social disease, we have in mind a mixed bag of pathologies—some physical, some psychological, some both.

They range from homelessness to child abuse and neglect. If the future of the minority community depends upon our little children, the outlook is grim.

Reports from New York City in mid-July and from California a month earlier give us a stunning picture of youngsters growing up in poverty, with inadequate health care, social services and schooling, and nervous systems heavily burdened with lead—that ubiquitous toxic metal.

To many health analysts, it is difficult to believe that during 1988 and 1989—with all of the advances in immunization technology—that measles has gained its strongest foothold among poor ethnic minorities attacking our youngest who are most vulnerable to high fever and bronchial infection associated with the disease.

Much of this has to do with the lack of access to preventive health services in general and preventive child health care in particular.

Another overt symptom of this lack of access to preventive health services shows up in the infant mortality rate, still among the highest of the industrialized world, and in the related concern for prenatal care.

Thirty percent of Hispanic women and 27 percent of black women who gave birth from 1984 through 1986 had inadequate prenatal care. We could save 10,000 to 40,000 babies who die each year just by applying what we already know about case management, outreach, home visits, and appropriate counseling.

Unquestionably, we could effectively address 89-90 percent of the risk factor for infant death by instituting comprehensive pre-conception health services.

And then there is the deeply troubling problem of homelessness—a problem so serious it must be discussed in its own right. Homelessness is a combination of health, medical, social and economic problems. It is also a political problem.

It is not merely that the problem of housing affordability and availability come together in the growing number of homeless people in urban centers or that there are higher proportions of relatively young non-white individuals.

Equally, if not more disturbing, is the failure of government to ensure through the workings of a price and profit system and through other appropriate channels the basic right of every family and individual to a decent home and a suitable living environment.

We must strike sharply at those who wasted billions of dollars meant for the poor—money that could have housed millions of needy families, stopping a deeper slide into poverty and increasing the burden of unnecessary illness on minority communities.

The social toll of this mismanagement is far deeper, more pervasive than the five-year waiting list for public housing—35,000 people vying for 18,000 units in Baltimore, and a greater ratio in Washington, D.C. and in some 37 other cities where people on the list outnumber units ten to one.

Unfortunately, those who would get rich or powerful by subverting housing and urban development programs intended to help the poor do not recognize that these numbers represent far more than statistics. They represent the destruction of minority youth and their families, they represent families not plugged into the health services system and they represent the boldest kind of human misery which increases the risk of disease, dysfunction and premature death.

But the public health and medical community must share some of the blame because housing policy and programs have had too little thoughtful and constructive consideration of a meaningful nature from within the framework of public health and medicine itself despite the clear evidence of high morbidity and mortality rates associated with bad housing and with homelessness.

This is not to suggest that the public health and medical community can solve the nation's housing problem. But we can provide the focus of human health and welfare so essential to attaining this vitally important goal.

Now I come to what might be called the institutional challenges. Very near the top of any agenda must be the problems confronting public hospitals—the providers of last resort. They have for years accepted those who have no health insurance and are not eligible for public assistance, or otherwise disenfranchised—the mentally ill, the homeless, the hard core drug abuser.

But public hospitals' role as a safety net is seriously threatened because they do not have the resources to do the job. Because of budget limitations, public hospitals cannot update their aged facilities or technology. Staff shortages have created long waits and patients are frequently turned away.

As the cost of health care continues to rise, approaching what some experts predict to be 15 percent of the GNP by the mid-1990s, concerns over controlling cost is being expressed in all quarters.

The federal government, as one of the primary third-party payors, has focused attention in the 1980s on containment of cost within hospitals. All evidence now points to the 1990s as the decade for targeting physician costs. The sum vector of these developments is the need for attention to several issues that are critical to closing the gap.

1. *Fragmented Services.*—The health care system continues to be fragmented by organization structure and reimbursement mechanisms. Continuum of care needs will require that more effort be made to reduce the complexity often associated with accessing a range of health care services.

2. *The Uninsured.*—Moreover, as the need for health services grows, the inadequacy of Medicaid and Medicare has come to be viewed as a deplorable process which needs to be changed.

As the U.S. economy continues to move from being manufacturing to service-oriented, there is no indication that the number of uninsured will decrease. Service industries typically hire parttime or low wage full-time employees without offering benefits such as health insurance; similarly, the growing number of small employers forego health insurance as a benefit because of their inability to negotiate a reasonable premium. If we continue to tie health care to the workplace, there is little doubt that the number of insured will surely grow.

3. *Human Resource Need.*—The need for nurses, physicians and other health professionals trained to provide community-based primary care that is culturally sensitive and responsive to the needs of all socio-economic groups. I need not recount here the continuing underrepresentation of racial minorities in the health care system. This underrepresentation must be addressed in a more aggressive and progressive way. Most academicians, and others, could recite by rote the reasons for this underrepresentation. They include a broad range of social, economic and political reasons far too numerous to list here. But all of these issues are matters for serious and ongoing discussion.

4. *Quality.*—Quality recently has re-emerged as one of the buzz words of health care. While quality assessment and quality assurance have been part of the health care literature for decades, the rising cost of care has caused those who pay for the care to look with greater scrutiny at what they are getting for their health care dollar.

Rarely has a single issue dominated health care as much as "quality/access" is doing now. In line with this thrust, the Bush Administration has included in its budget $52 million for new initiatives which would expand the scope and funding for outcome research. Although billed as treatment effectiveness studies, the proposal really aims at the heart of quality assessment in that it will promote the study of efficacy: Are the health outcomes directly related to treatment being provided? This will continue to be a fundamental question throughout this decade.

However, technological advances also contribute greatly to the growth in health care spending and can divert resources from basic public health programs and services. Remember the artificial heart project. During the 24-year life of this program, it drained $240 million out of the public health budget. The project was terminated.

Even if the devices had worked acceptably, they would have brought limited benefit to a few at vast cost. Research into lifestyle factors that contribute to heart disease would have been a far more beneficial investment. The artificial heart project started at the same time as the Apollo program to land a man on the moon. Unlike Apollo, it veered badly off course (as a New York Times editorial pointed out).

A strong message emerged from the artificial heart experiment. In health services, prevention is always better than heroic cure. But it is difficult to convince those who would rather develop lung transplants than invest resources in smoking cessation efforts.

In the public health community and elsewhere, there is increasing concern about the exploding cost of medical technology. Estimates are that advances in medical technology accounts for as much as 40 percent of the annual increase in hospital beds.

As we consider the introduction of new technology, the question must no longer be "Is it feasible?" but "Is it worth the cost and who will benefit—a broad segment of the population or only a small group?"

Investing $240 million (the initial investment in the artificial heart project) in an immunization program or in a WIC program will benefit the total community, not just a few persons.

The issue is not simply a quantitative one but concerns equity of access to resources as well. In general, priority should be given to technologies that benefit more rather than fewer persons.

Over and over again, we have shown that investments in public health technology benefit more rather than fewer. One need only cite: Investments in water treatment and waste water treatment projects; immunization programs; prenatal care services; and in nutrition service, to name only four examples.

We add ours to the call of many others for an equitable and affordable solution to the health care access and health care costs problems. Let's get on with a comprehensive national health program that removes financial barriers to health care and emphasizes prevention.

At the same time, we must breach institutional boundaries sufficiently so that a comprehensive approach to solving human problems becomes possible. The drop-out phenomenon, teenage pregnancy, urban gangs, substandard housing, poverty, drug dependence and abuse are related.

The schools are trying to deal with two or three of those problems, the police with several, and the public health agencies with some. Sometimes efforts overlap. Sometimes there is tension and occcasionally they cooperate, and more often than not, the individual is lost in the process.

Also, more often than not, one agency or institution doesn't know what resources and skills another system has to offer.

We must ensure that health agencies and organizations eliminate redundancies and deal with human problems in what could be called a holistic manner recognizing that there are no quick fixes, no magic silver bullets. Thus, we should not tolerate those who run hot and cold on minority health issues that need long-term policies, programs and services.

Nor should we tolerate those who seek promotion, prestige and more publication for their curriculum vitae by continually analyzing minority communities and their problems, especially when the analysts do not inspire anyone to produce better schools, more and better housing, increases in drug treatment and prevention services, and access to health care, but provoke ill-informed people to unleash a barrage of slander and venom at racial minorities. This shortsightedness does a grave disservice to society as a whole and it ignores America's social challenge.

In conclusion, these then are selected examples of the challenges we face in minority health problems as we near the end of this decade.

When challenge is diverse enough, diversity itself becomes a challenge. And that we believe describes aptly enough the situation today for policymakers, community leaders, academicians, health service providers, and many others.

It is a challenge posed to each of us. And it is a challenge posed to us all who subscribe to the view that a good nation is a caring one.

SALUTE TO DON BOSCO TECHNICAL HIGH SCHOOL OF PATERSON, NJ, ON ITS 40TH ANNIVERSARY

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. ROE. Mr. Speaker, it is with the greatest pride and admiration that I rise today to salute a truly outstanding educational institution in my Eighth Congressional District of New Jersey that has helped mold the lives of young people in the greater northern New Jersey area for nearly a half century.

I am speaking of Don Bosco Technical High School of Paterson, NJ, which is currently observing the 40th anniversary of its founding. To celebrate this historic event, Don Bosco Tech will hold a dinner dance at the school on Saturday, December 2, 1989. I know this event will bring great pride to Rev. James Marra, the administrator of Don Bosco Tech and the dinner-dance moderator, and to everyone connected with this great institution.

Mr. Speaker, as a means of providing you and our colleagues with the details of this fine school's rich background, I would like to insert in the RECORD the official history of Don Bosco Technical High School:

When, forty years ago in September 1949, the doors of Don Bosco Tech were opened, a new Salesian presence was inaugurated in Paterson. Prior to this event the Salesians began a chaplaincy for thirty Italian families in the Sandy Hill section of Paterson in 1909. This activity developed into the parish of St. Anthony.

Forty years later, 1949, a new presence was established with the opening of a modern technical high school located on Union and Sherwood Avenues, in the Hillcrest section of Paterson. The first commencement took place in June 1953. Since then Don Bosco Tech graduates have found their place in the professions, in industry, medicine, teaching, and in a variety of careers. A number entered the priesthood and religious life. Success followed the alumni due to the quality education received.

The original building of today's complex housed the Harris Brothers' Silk Company, built in 1915. The empty building was purchased on July 31, 1948, by the Provincial, Very Rev. Ernest Giovannini, SDB. For many years he had dreamed of a technical school. The personnel were ready and some funds were available. The opportunity came with the purchase of land on Union Avenue.

Don Bosco Technical School is named after St. John Bosco, the founder of the Salesian Society. It traces its origin to the first technical school founded by him. A century of pioneering and experimentation forms the background of this technical high

school, as well as those in Boston and Los Angeles.

Within a few years after the opening of the school, it became necessary to expand and build new facilities. In 1952, a cafeteria was built to be followed by the construction of a well equipped gymnasium in 1953. To meet ever-expanding enrollment and the increasing demand for training in technological skills, in 1956 a new tech building was built and was named Savio Hall, after the boy Saint who grew up in Don Bosco's first school in Turin.

A few days after the purchase of the abandoned mill in 1948, a group of Salesian Brothers and students joined a contractor and his laborers in the task of creating classrooms and offices out of an old empty factory. As the interior of the building took shape, equipment for the technologies was gradually transferred from the Salesian Seminary in Newton, NJ; it was here that shops had been opened on a temporary basis when a group of Coadjutor brothers came from Europe a few years before. In the spring of 1949 an Advisory Board was set up to help in organizing the curriculum and to begin a publicity campaign to make the school known. Various organizations were formed to help in raising funds needed for completion of the renovations and for the purchase of new equipment. On Saturday, May 29, 1949, the dedication ceremonies took place, with the Bishop of Paterson, the Most Reverend Thomas A. Boland, D.D., presiding.

The educational program at Don Bosco is designed to enable the students to become "good Christians and useful citizens", following the method of education envisioned by St. John Bosco, the school's patron. A dedicated staff of religious and lay persons generously give of their time and energy to the balanced program: physical, religious, academic and technological.

A well designed program of religious education provides for those spiritual and sacramental experiences that will help the graduates of Don Bosco Tech to develop the moral character which will be necessary to cope with life and to bring a moral fiber with them into society.

The school academic department is effective in offering the pupils a solid grounding in basic scholastic skills and in preparing them for admissions to the colleges and universities of their choice. The educational facilities and service are a priority.

Don Bosco Tech offers an excellent technological experience which provides its graduates with a unique educational background that prepares students to enter industry upon graduation or to pursue further technological education in college. In this area the following are offered: Electronics, Architectural and Mechanical Drawing, Graphic Arts, Computer Programming, Automotive Repair, Drafting and Fine Woodworking. This entire component of the curriculum provides the graduate with an appreciation for and experience of skilled craftsmanship so much in demand in industry today.

In May 1984, Don Bosco Tech received accreditation by the Middle States Association of Colleges and Schools. The following comments of the Accreditation Team identify the esprit de corps that exists in the school: "All members of the student body and the staff were friendly and completely cooperative. A climate has been established which reflects a family atmosphere * * * You are fortunate to have a fine student body which loves its school and is well behaved. The veteran staff is capable and experienced."

The faculty considers this celebration of the fortieth anniversary of the school's foundation a milestone indicating, not the end of the journey, but rather an experience that will help D.B.T. charter its course into the third millennium. The loyalty and encouragement of so many alumni and friends spur the Salesians to guide youth toward a better future, following the beacon light still shining from St. John Bosco, Father and Teacher of Youth.

Mr. Speaker, I appreciate the opportunity to present a brief history of Don Bosco Technical High School of Paterson, NJ, a truly outstanding institution which, for 40 years, has continually aspired to the highest standards of educational excellence and which has most certainly made its community, its State, and our Nation a far better place to live.

INTRODUCTION OF FEDERAL EMPLOYEES RECOGNITION WEEK

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Ms. OAKAR. Mr. Speaker, today I am introducing legislation which would declare the week beginning March 5, 1990, "Federal Employees Recognition Week." It is important that we set aside a week to recognize the work of over 3 million Federal employees across our country. This recognition is certainly appropriate and well deserved.

Mr. Speaker, during the last several years, Federal employees have faced repeated attempts to cut their pay, while staffing cutbacks have increased their workload. While I and my colleagues have fought to ensure decent treatment for Federal workers, we have not always been successful. Three years ago Federal employees had their pay frozen and Federal retirees received no cost-of-living adjustments in their pension checks. On average, the salaries of Federal employees have fallen behind the private sector by 27 percent. Despite all this, Federal workers have continued to perform duties vital to our Nation's well-being.

I believe it would be extremely valuable for the public and Congress to be reminded of how much we ask of our public servants. Declaring March 5–11 as "Federal Employees Recognition Week" will focus our attention, however briefly, on the efforts and achievements of the U.S. Government work force.

H.J. RES. —

Whereas Federal employees serve the people of the United States by enabling the Federal Government to carry out its duties in an efficient manner;

Whereas more than 3,000,000 individuals are employed by the Federal Government;

Whereas many valuable services performed by Federal employees are often inadequately recognized by Federal officials and by the people of the United States; and

Whereas Federal employees should be recognized for the contributions that they make to the efficient operation of the Federal Government: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week beginning March 5, 1990, is designated "Federal Employees Recognition Week", and the President of the United States is authorized and requested to issue a proclamation calling upon the people of the United States to observe such week with appropriate ceremonies and activities.

TRIBUTE TO THE SACRAMENTO SSI OUTREACH PROJECT

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. MATSUI. Mr. Speaker, I rise today to pay tribute to the Sacramento SSI Outreach Project and its outstanding volunteers. The Social Security Administration and the Legal Center for the Elderly and Disabled have cosponsored this outreach project in order to locate and assist the elderly and disabled citizens in the Sacramento area who are eligible for supplemental security income benefits. It is with great pride that I share with my colleagues the outstanding accomplishments of this successful project.

In an effort to assist the 50 percent of eligible individuals who are not enrolled in the SSI program, the American Association of Retired Persons named Sacramento as 1 of only 10 cities nationwide to conduct an SSI Outreach Project. In addition, the Social Security Administration and the Legal Center for the Elderly and Disabled in Sacramento were chosen above many applicants as cosponsors of this SSI Outreach Project. During the 4-month period, from May 1, 1989, to August 31, 1989, in which this project was in effect, these organizations have made tremendous accomplishments in their efforts to reach the citizens of the Sacramento area.

With a 130-percent increase in SSI aged applications, this has been the most successful outreach effort in the Nation. Through their diligent work and dedicated efforts, the talented participants of this project have assisted those who are unaware of their eligibility for supplemental security income benefits. Today's Public Service Award winners have succeeded in reaching over 750 potentially eligible individuals who are now being assisted in filing the proper applications for benefits.

Mr. Speaker, the Social Security Administration and the Legal Center for the Elderly and Disabled are being recognized for their outstanding accomplishments on behalf of the Sacramento community and I ask that my colleagues join me in saluting these valuable organizations. I also take great pride in commending the participants and volunteers of the project for their leadership, professionalism, and dedication to providing the citizens of my home district with the highest level of public service possible. I offer my sincere thanks to these outstanding organizations and extend best wishes for continued success in all of their future endeavors.

HOUSING FOR THE HOMELESS

HON. FORTNEY PETE STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. STARK. Mr. Speaker, Mitch Snyder, founder of and driving force behind the Community for Creative Non-Violence, has written a persuasive argument on behalf of greater Federal resources for affordable housing programs. He makes a most convincing case that we, as a nation, ought to work to guarantee every American a safe, decent, and affordable home.

I recommend Mitch Snyder's article as required reading for my colleagues:

THE PRICE: OUR HUMANITY

(By Mitch Snyder)

Since 1981 federal housing programs have been cut nearly 80 percent from more than $32 billion a year to less than $8 billion a year. As a result, millions of men, women and children are homeless. Tens of millions of others live in overpriced, overcrowded, or substandard housing.

Those cuts have caused a current shortfall of nearly 4 million units of low-cost housing, which, experts tell us, will nearly double in the next 15 years, swelling the ranks of America's homeless to nearly 19 million.

Congress acknowledges the gravity of the situation, but points to the deficit as an explanation for its inaction. Yet, the deficit isn't going to stop the $150 or $200 billion bailout of the savings and loan industry. And if Congress can find that much money to bail out the S&Ss, why can't it restore the $25 billion a year cut from the housing budget?

The answer is not hard to see: The financial industry has great influence and brings great pressure to bear. And Congress responds.

Congress will restore the federal housing budget only when forced to do so, and the source of that pressure will have to be we, the people.

Occasionally, a member of Congress will ask why the government should subsidize housing for low- or moderate-income people. Why shouldn't "they" have to work and pay for their own housing, like everyone else?

To begin with, most people who are in need of housing assistance and legally entitled to it do in fact work.

Last year, when I was speaking to a fairly affluent group, I asked members of the audience who lived in federally subsidized housing to raise their hands. No one did. Then I asked homeowners to identify themselves. Most of those present raised their hands. We're not inclined to think of the $46 billion the U.S. Treaury loses each year because of homeowner deductions as a subsidy. But that's what it is, and it predominately benefits people who earn more than $50,000 a year.

Those in our society whose housing depends on a subsidy get less than $8 billion a year. Four out of five Americans eligible for federal housing assistance don't get it, while those for whom federal subsidies often represent additional disposable income receive more than $46 billion a year.

If we spent as much on housing for low- and moderate-income people as we spend on upper-income people, we could guarantee every American a safe, decent, and affordable home.

In 1949 Congress committed the federal government to guaranteeing decent and affordable housing for every American. Congress did so because it realized that the private sector could not produce housing sufficient to meet our nation's needs.

If the federal government doesn't build or finance the building of affordable housing for low- and moderate-income people, it just doesn't get built. The federal government's abdication of its responsibility in 1981 has had predictable and disastrous consequences.

Some say that we cannot afford to guarantee a decent home to all our citizens. I believe that we cannot afford not to.

We cannot, with impunity, allow millions of Americans to eat out of trash bins, and live and die on the street. We cannot permit tens of millions of Americans to languish in uninhabitable housing.

And more than half of those living below the poverty line pay more than 70 percent of their income for rent. Many of them will eventually join the ranks of the homeless.

Soon, growing numbers of moderate- and even middle-income Americans will find themselves in the same situation unless Congress restores the $25 billion a year cut from the federal budget.

Regardless of how terrible it is to be homeless, the heaviest price will be paid by those who ignore the homeless. The price of our insulation and our indifference is our humanity. In this century we have seen what happens to a society when it submerges its humanity. It is far too high a price to pay.

We must have affordable housing, and we must have it now. We can make that demand in the name of common decency. We can do it in the name of justice, or we can act in the name of a just and loving God. But regardless of how we do it, we must do it, and we must do it now.

THE REMARKABLE BYRNE BROTHERS

HON. MEL LEVINE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. LEVINE of California. Mr. Speaker, I rise to call to the attention of my colleagues an excellent article in Sunday's Los Angeles Times magazine entitled "Family Law" about the remarkable Byrne family.

These distinguished gentlemen and their predecessors have made, and continue to make, a remarkable impact on California as distinguished public servants.

I am privileged to call both Matt Byrne and Skip Byrne my friends. I only regret that the CONGRESSIONAL RECORD cannot include in its pages the superb picture, especially of Matt, that accompanied this article.

The article follows:

[From the Los Angeles Times magazine, Nov. 12, 1989]

FAMILY LAW

(By Adam Dawson)

More than 100 years ago, Irish nationalist Peter Christopher Byrne left his homeland for North America. According to disputed family legend, he settled first in Canada, then moved to Alton, Ill.—one step ahead of authorities who wanted to question him about a cache of weapons in his basement, weapons they believed were bound for Ireland. If the story is true, it may have been the last time a Byrne was on the wrong side of the law. What's undisputed is Peter Christopher's quiet legacy: His grandchildren left the family's traditional railroad jobs and became judges, lawyers, court clerks, bailiffs and probation officers, forming California's first family of law.

One of Peter Christopher's grandsons, William M. (Bill) Byrne, became a California legislator, a Municipal Court judge and a Superior Court judge and, for 24 years, served as a U.S. District Court judge in Los Angeles. His stint on the federal bench earned him the family nickname "Federal Bill," because even members of the Byrne clan need a little help telling their judges apart.

Federal Bill's son, Matt Byrne, joined his father on the federal bench in 1971 and is perhaps best known for revealing government misconduct and dismissing all the charges in the Pentagon Papers case in 1973.

One of Federal Bill's nephews, William E. Byrne, retired from the El Dorado County Superior Court three years ago. Dubbed "Placerville Bill," he now is in private practice in Sacramento.

One of Federal Bill's brothers, James T. Byrne, the only Republican in the bunch, served as a Los Angeles Municipal Court commissioner from 1962 until 1974. His son, J. Michael Byrne, left the Los Angeles district attorney's office when he became a municipal judge in 1982. Last year, he won election to the Los Angeles Superior Court, where he is one of 238 judges supervised by—you guessed it—his second cousin, presiding judge Richard (Skip) Byrne.

In all, six Byrnes have been federal or state judges or commissioners, and three sit on the bench in Los Angeles. "They are throwbacks," Alan Rothenberg, president of the State Bar of California, says of the Byrnes. "They believe in old-fashioned public service."

Or as U.S. District Judge Dickran Tevrizian puts it: "It must be in the genes. Some people are born great artists, others great musicians. This must be something passed down through the generations."

Federal Bill was one of eight children of John Byrne, a railroad fireman who settled in Oakland in the late 1800s. Shortly after the turn of the century, a wildcat strike against the railroad cost John his job, but it left him with plenty of time to hang out in Oakland, where, as another family legend has it, he became a drinking partner of author Jack London. John's unemployment and the hard times left their mark on the next generation of Byrnes.

"With my father [James] and his generation, there was a lot of fear of seeing the poverty he grew up in and not wanting to go back to that," says J. Michael Byrne, 46. Thus the lure of public service: It was steady, dependable work for relatively decent pay, open to those with little formal education.

A dropout before reaching high school, Federal Bill became a promising lightweight boxer, then worked as a pool-hall owner, a railroad fireman, a union leader and a state legislator before turning to law. "For him and others like him, there really weren't any great opportunities for advancement other than by going into public service," explains his son, Matt, 59. "Public service did afford an opportunity to play a more significant role in society."

While serving in the California Assembly, Federal Bill attended night courses at Loyola Law School, graduating in 1929. He spent 12 years in private practice, then served on the Municipal and Superior courts before President Harry S. Truman tapped him for the federal bench in 1950.

"He had a reputation for being a rather stern man on the bench," says U.S. District Judge Harry L. Hupp, who tried his first federal case before Federal Bill. "Both the prosecutor and I were rookies," Hupp recalls. But instead of getting the lectures and sarcasm they expected, they found the judge a willing teacher. "He took a fatherly interest in us neophytes—calling us up to the bench to let us know if we were doing the right thing and what we were doing wrong."

Federal Bill did much the same for members of his extended family. "He was a strong figure," says J. Michael, describing his uncle as the family mentor. "At family gatherings, he would discuss with you your career, political affiliations and life as much as your own father."

But sometimes his concern could be overbearing. For instance, when J. Michael and a friend announced in 1965 their plan to spend the summer registering black voters in Alabama, his own father reluctantly agreed. But the friend's father took his objections to a higher court—Federal Bill. A fierce argument ensued as the judge forbade his nephew to go. "He was afraid I would be arrested, and it [the criminal record] would follow me around for the rest of my life," J. Michael explains. "We went anyway."

By the time Matt Byrne joined his father on the federal bench in 1971, his father had been a federal judge for 21 years. A former U.S. attorney and successful trial lawyer who had served as executive director of the President's Commission on Campus Unrest, Matt became the youngest federal judge in the country at age 40.

Now he is considered one of the smartest—and perhaps most frustrated—judges in Los Angeles federal court. With his reading glasses perched low on his nose, Matt often shrugs broadly and tells attorneys: "Well, if that's the way you want to try your case"—leaving them wondering what they are doing wrong. He also chastises prosecutors by saying: "That's not the way we did things when I was U.S. attorney."

"The camaraderie of the trial of a lawsuit is a great intellectual exercise for both the lawyers and the judge, but it may be more fun for the lawyers," says Matt, a bachelor who is a big Dodgers fan and friend of team owner Peter O'Malley and manager Tommy Lasorda. Despite Matt's occasional look of indifference, which he says is necessary to avoid showing his feelings, he acknowledges that he enjoys the give-and-take with attorneys. Those exchanges, frequently laced with humor and sarcasm, can provide an educational but painful lesson for some attorneys.

"He's the sharpest judge in federal court, but he may be the most bored,'" says one former federal prosecutor. "He'd like to be in a courtroom where Clarence Darrow and F. Lee Bailey are slugging it out. Instead, it's just us."

As a result, some lawyers say, Matt is all too ready to jump in and question witnesses. "That's the hardest thing for a judge not to do, especially someone who was a trial lawyer,';' Tevrizian says. "It's like taking a kid to a candy store and saying, 'You can't have any.'" Others, such as Assistant U.S. Attorney George Wu, say Matt questions witnesses only when a lawyer has failed to elicit key information that the judge wants. "What's wrong with that?" Wu asks.

Although he has handled hundreds of trials, Matt is perhaps best remembered for the Pentagon Papers case. During the Vietnam War, two RAND Corp. researchers, Daniel Ellsberg and Anthony J. Russo, were charged with stealing and distributing copies of a classified study of U.S. involvement in Southeast Asia—the so-called Pentagon Papers. Matt dismissed the charges in the midst of the highly publicized trial after learning of secret government wiretaps and a White House-directed and CIA-aided break-in at the office of Ellsberg's psychiatrist in Beverly Hills.

"The bizarre events had incurably infected the prosecution of the case," he said in dismissing the charges. The government's actions, he continued, "offend a sense of justice."

Five weeks before dismissing the case, Matt revealed, he had met twice with President Richard M. Nixon's domestic adviser, John D. Ehrlichman. The first meeting, at Nixon's San Clemente retreat, was to ask about Matt's interest in running the FBI. Two days later, the pair met in Santa Monica. The judge again told Ehrlichman that he could not consider the FBI post until the Pentagon Papers case was over. At the time, some people wondered if the Nixon Administration was seeking to influence the criminal case by making the job offer. If so, the ploy backfired. Matt not only revealed the meetings but also disclosed the secret wiretaps and the Ellsberg break-in, all in spite of the prosecution's objections.

"He's not afraid to come down as hard on the government as he is on the defense," says Los Angeles defense attorney Anthony P. Brooklier. "He lets the chips fall where they may."

Without the unifying influence of Federal Bill, who died at age 77 in 1974, the Byrne clan gatherings are now largely limited to weddings and funerals. Each of Peter Christopher Byrne's grandsons and great-grandsons is now the center of his own family.

J. Michael Byrne, for instance, left Los Angeles to work in the Sacramento district attorney's office. "I thought it would be fun to practice in an area where people didn't know how to spell my last name," he says. But the family tug eventually drew him back to Los Angeles. He is married to Guillermina Gutierrez Byrne, a research attorney with the California Court of Appeal. Among her brothers are Gabriel Gutierrez, a Los Angeles Superior Court judge, and Ventura Municipal Judge Art Gutierrez.

J. Michael was appointed to the Rio Hondo Municipal Court in 1982 after nine years as a deputy district attorney. Last year, he ran for and won a seat on the Los Angeles Superior Court. He credits Federal Bill with setting the example for the rest of the clan. "The respect Bill had from the rest of us—that's, I think, what made a lot of us lean toward the law," he says.

William E. Byrne, J. Michael's 60-year-old first cousin, also found Federal Bill a willing adviser. Originally dubbed "Berkeley Bill" because of his parents' hometown, William frequently turned to his uncle for guidance. After graduating from law school, Berkeley Bill came south to discuss with Federal Bill where he should set up practice.

"He told me that if he had to do it over again, he'd do it in a place where he longed to live," Berkeley Bill recalls. So Berkeley Bill, an avid trout fisherman who liked gold rush country, established his practice in El Dorado. To the younger Byrnes, the move made him known as "Placeville Bill."

In 1964, a seat on the El Dorado County Superior Court opened up, and Berkeley Bill again turned to Federal Bill. "He said, 'Go ahead an apply for it.' It would have been nice to wait five or six years, but maybe then the opportunity wouldn't be there." At 35, Berkeley Bill was the youngest person in the state to have been appointed to Superior Court.

During the 1970s, he presided over a liability suit involving the 1964 Hell Hole Dam failure on the Middle Fork of the American River. American River Constructors closed the unfinished dam one winter, causing the structure to give way after heavy rains. Flooding were so severe that, 18 miles downriver, trout was washed 16 feet up into the trees. American River Constructors was found negligent in what Berkeley Bill refers to as his "most challenging case," one in which engineering experts from all over the world testified.

Two years ago, he resigned to join a Sacramento law firm. He now spends most of his time as a private judge—sometimes known as a "rent-a-judge." He and other former judges have discovered that parties involved in lawsuits are often willing to pay for a private judge rather than wait years for a sitting judge to hear their cases. Berkeley Bill resigned from the bench because, he says, "I just decided it was long enough. I wanted a change."

His second cousin, Skip Byrne, 56 envisions a similar change in three years, when he will have been on the Los Angeles Superior Court two decades, "I don't want to be tied down to being a judge for the rest of my life." he says.

Skip's most notable case probably was the one in which he presided over the complex division of J. Paul Getty's $4-billion trust in 1985. He was praised by attorneys for the way he handled the fractious, 19-month case, but he is quick to return the compliment. "I felt that the lawyers could, and did, bring about some reconciliation of adverse family interests."

He was named presiding judge of the Superior Court last year and so far has received favorable reviews in what many observers call a thankless task. "He's a good administrator who get things done without sitting on your head." says Superior Court Judge Alexander H. Williams III. Despite opposition from the ranks, Skip implemented the so-called fast-track system in civil court. Mandated by state law, it is an experiment in eight counties requiring judges to aggressively manage their own court calendars.

Since he became presiding judge, a position whose only real power is that of assigning his fellow judges to different courts, Skip also has instituted case-management seminars for the judges and has helped increase the use of computers to track cases through the legal system. It is a system in jeopardy, he believes—largely because of a funding shortage. "The underfunding of the judiciary deprives judges of the time necessary to pay attention to matters brought before them," he says.

With Berkeley Bill retiring and Skip thinking about doing the same, it might seem as though the Byrne dynasty is drawing to an end—especially at a time when, Skip says, a crass new attitude prevails among many lawyers. "Traditionally, people went into law to help their fellow man," he says. "Now the law is much more of a busi-

ness. . . . A lot of young lawyers just go into the law for the money."

But Skip and his wife, Marguerite, have six children, ranging in age from 18 to 30, and three of them have already graduated from law school with different intentions.

Mark, a 30-year-old assistant U.S. attorney, says he is carrying on a "sense of wanting to do something for the community in general." Elizabeth, 27, was a lawyer with a downtown Los Angeles firm like her brother Matt, 26, before joining a New York-based auction house. She adds: "It is part of your greater obligation to give back to the community. In our family, you serve society through the law."

So the family tradition continues. "Have you seen Skip's children?" asks Hupp. "The next generation is safe. There will be some Byrne judges there."

A TRIBUTE TO SAN BERNARDINO COUNTY SUPERVISOR ROBERT L. HAMMOCK

HON. JERRY LEWIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. LEWIS of California. Mr. Speaker, I would like to bring to your attention a most outstanding man who has committed his life to the highest level of professional and community service, San Bernardino County Supervisor, Robert L. Hammock. On November 28, 1989, Bob Hammock will be honored at an anniversary celebration for his 20 years of dedicated public service.

Supervisor Hammock was born on November 20, 1940, the son of Lynn Benoit Hammock and Mary Etta Hammock, who came to California from Texas. Bob graduated from San Bernardino High School before pursuing his education at San Bernardino Valley College and California Polytechnic University, where he majored in aeronautical engineering. Bob worked for Pioneer Title Insurance Co. from 1962 to 1969, and Ludwig Engineering Co. from 1969 to 1976. Prior to being elected to the county board of supervisors in 1976, Bob served on the San Bernardino City Council representing the city's Fourth Ward. He served as chairman of the county board of supervisors in 1983 and 1984, and again in 1986.

As a member of the county board of supervisors, Bob has served and continues to serve in a variety of capacities. They include: the Agua Mansa Industrial Growth Association Executive Committee; Authority for a Greater San Bernardino; County Supervisors Association of California Board of Directors; East Valley Planning Agency Airport Land Use Commission Governing Board; East Valley Transit Service Authority Governing Board; president of the Inland Empire Mexico Reconstruction Fund, Inc., Board of Directors; Local Agency Formation Commission; as vice chairman of the National Association of Counties Community Development Steering Committee's Housing Subcommittee; as member and past president of the Omnitrans Board of Directors; member and past president of the San Bernardino Associated Governments/ County Transportation Commission Board of Directors; member of the Southern California Association of Governments Executive Committee; as a board member of the South Coast Air Quality Management District and as a member of the Southern California Regional Association of County Supervisors.

In addition, Bob serves on the San Bernardino County Disaster Council and as a member of the San Bernardino County Air Pollution Control District Board, the San Bernardino County Flood Control District Board, a member of the Governing Board of the San Bernardino Building Authority, and as a member of the governing authority of all board-governed special districts.

Bob has also contributed his time and talents to the boards of the Arrowhead United Way, California Jaycees, Uptown YMCA, Boys Club, Zoological Society, Boy Scouts, First Fund of Children's Resources, YWCA, Campaign for Kids and the March of Dimes, and numerous other civic and community projects.

Mr. Speaker, I am proud to recognize the many fine contributions of my friend, Supervisor Bob Hammock on his 20 years of public service. I join all my friends in San Bernardino County in wishing him good health and God's speed in the years ahead.

A TRIBUTE TO JOHN KRUPA

HON. PETER J. VISCLOSKY

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. VISCLOSKY. Mr. Speaker, I would like to take this opportunity to share with you and my colleagues in the House of Representatives some thoughts about a truly fine man I had the pleasure to know and who regretfully passed away recently, Mr. John Krupa of East Chicago, IN.

John was a passionate man—passionate about his family, passionate about public life and passionate about commitment to community service. I had the pleasure of knowing John on a personal basis and working with him in a professional capacity. We had our political disagreements, but they were based in sincere differences of opinion. John understood that people had differing points of view and tried to work with you to accomplish a common goal.

John was a foundation and fixture in the community for over 25 years. His affiliation and political offices held were numerous and impressive. They included being one of the founders and active member of the American Legion Allied Post 369, former chairman of the Lake County Democratic Party, superintendent of the East Chicago Water Department, service on the city's sanitary district board and library board, and two terms as Lake County Clerk. John was also active in Twin City Community Services, East Chicago Exchange Club, and the Holy Name Society of St. Stanislaus Church. It was John who focused my attention on the problems and the potential of the East Chicago Salvation Army, another organization with which he was associated.

John had a love, pride, and faith in his community and country. He dedicated his life to improving East Chicago, the city in which he was born and lived his entire life. He did this not for riches nor fame, but because it was right. He will be missed, but never forgotten.

FREEDOM—MANS MOST PRECIOUS POSSESSION

HON. DAN BURTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. BURTON of Indiana. Mr. Speaker, many of our colleagues have been very concerned and distressed in recent days over the plight of the last three "Plantados" in Cuba. There are of course hundreds of political prisoners under Castro's dictatorship, but these three have been incarcerated for over 20 years, in violation of Cuba's own penal code. They have bravely resisted all "political rehabilitation" throughout that time. Alfredo Mustelier Nuevo, one of the Plantados, is now on a hunger and thirst strike. His condition is serious. If he dies, Mario Chanes and Ernesto Diaz, will commence their own hunger strikes.

Along with my colleagues from Florida, Mrs. ROS-LEHTINEN, and Mr. SMITH, I and others in Congress have sent telegrams to Castro in an effort to secure the release of these brave men. Peter Jennings did a radio segment about these Plantados on ABC radio news. The continued imprisonment of these men is a serious affront to human dignity, and a sad testimony to the brutality of totalitarian communism.

I commend to my colleagues' attention this excellent editorial broadcast all over the world recently on the Voice of America.

Time is running out for Alfredo Mustelier Nuevo. On October 27th, Mustelier began a hunger strike which he said he would continue until he is either released from a Cuban prison or dies. Mustelier is one of the Plantados—long-term political prisoners who have refused to accept "reeducation," or ideological indoctrination by the Cuban government. Mustelier was imprisoned in 1969 for opposing the Communist dictatorship of Fidel Castro. Mustelier began his hunger strike to protest his imprisonment beyond twenty years, which is a violation of the Cuban penal code. Two other long-term political prisoners—Ernesto Diaz Rodericguez, a prisoner for twenty-one years, and Mario Chanes de Armas, a prisoner for twenty-eight years—have vowed to join the hunger strike when Mustelier is released or dies.

These three men represent only a small percentage of the political prisoners who remain locked away in Castro's prisons. Estimates of the number of political prisoners range from several hundred into the thousands, according to Amnesty International and the Cuban Human Rights Committee. The human-rights group Americas Watch says it believes Cuba has held more political prisoners per capita for longer periods than any other country. According to former political prisoner Eleno Oviedo, who was released in January after serving twenty-six years, prison conditions are barbarous. One prison with three-hundred inmates had only two bathrooms. Food was scarce and brutality common. Mr. Oviedo said, "I was beaten for amusement of the prison guards. If you

didn't eat fast enough or if you didn't bathe fast enough, you would be beaten."

Because of international pressure, about two-hundred fifty Cuban political prisoners have been released and allowed to emigrate in the past year. In 1988, the Cuban government permitted a team from the United Nations Human Rights Commission to meet with some of the Cubans who wanted to bring cases of human-rights violations to the commission's attention. The Cuban government tried as much as possible to discourage contact with the six-member UN delegation. Following the visit, about thirty human-rights activists in Cuba suffered harsh punishments, including beatings, detentions and imprisonment.

The fate of many Cuban political prisoners, and of human rights in general, depends on continued international pressure. As long as there is repression in Cuba, there will be a voice that cries out for freedom. It is a cry that can never be stilled, a cry that the rest of the world must heed. As Alfredo Mustelier, the prisoner now on a hunger strike, said, "I am well aware that I am risking my life for my freedom, but freedom, like life itself, is man's most precious possession. All I have left is freedom or death."

That was an editorial reflecting the views of the U.S. Government.

HONORING RABBI MACHANE CHODOSH

HON. GARY L. ACKERMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. ACKERMAN. Mr. Speaker, I rise today to pay special tribute to one of the most important and thriving religious centers in the Forest Hills area, the Congregation Machane Chodosh. On November 19 the congregration will celebrate its 50th anniversary with a banquet at Terrace on the Park in Flushing Meadows.

In its half century existence the synagogue has influenced every facet of the lives of local Jews. Last year leaders of the congregation met with local police to discuss methods in improving community safety. It has also embarked on an outreach program to bring the unaffiliated into the congregation. As part of their effort to encourage new participation in their synagogue, the congregation has constructed an elevator for the elderly and handicapped.

The congregation constantly tries to remind the members of its community of its ancient tradition. Educational programs serve this purpose, especially courses in Jewish law and customs, and modern Hebrew. As a religious center founded by survivors of the Holocaust and refugees from Nazi Germany, the congregation feels a special affinity with survivors and victims of those horrendous events. Last year the congregation along with other synagogues in the area held a community wide observance of the 50th anniversary of Kristallnacht, which was attended by over 1,000 people.

The congregation's contributions have not been limited to the local sphere however. The synagogue has also been extremely active in assisting Jews worldwide. As a strong supporter of Israel, the temple has in recent years donated an ambulance and planted over 20,000 trees in Israel.

In a religious center that has been as successful and has grown as much as Rabbi Machane Chodosh, it is almost inevitable that a major reason for its success is due to the contribution of its leaders. A number of individuals have played important roles in developing Rabbi Machane Chodosh into the thriving community of 500 people it is today.One such individual is Sol Wachenheimer, president for many years and one who presided over the synagogue when it was undergoing construction. Some others who have made significant contributions to the synagogue over the years are: Mr. Herbert Jaffe, present president of the synagogue, Erick Liebenstein, present copresident, Mr. Samuel Bloom, chairman of the golden jubilee and Rabbi Manfred Gans, who has been spiritual leader of the congregation for the past 39 years.

Mr. Speaker, in a time when religion and morals seem to be increasingly ignored, it is a pleasure to witness a religious center enjoy as much success as Rabbi Machane Chodosh has enjoyed in the last 50 years. Mr. Speaker, I ask my colleagues to join me in congratulating Rabbi Machane Chodosh on its golden jubilee and to wish it as much success its second half century as it enjoyed in its first.

CELEBRATING LIRS' 50TH ANNIVERSARY

HON. THOMAS E. PETRI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. PETRI. Mr. Speaker, today marks the 50th anniversary of Lutheran Immigration and Refugee Service [LIRS], the national agency of Lutheran churches in the United States for ministry with uprooted people. I wish to congratulate this exemplary organization on this important occasion.

Officially, LIRS is an inter-Lutheran cooperative agency that represents 95 percent of all Lutherans in the United States. The church bodies it serves are the Evangelical Lutheran Church in America [ELCA] and Latvian Evangelical Lutheran Church [LELBA], both based in Chicago, and the Lutheran Church-Missouri Synod [LCMS], based in St. Louis.

Since 1939, LIRS has resettled more than 155,000 refugees through partnership with Lutheran social ministry organizations, congregations and community people. More than 6,000 congregational sponsors were mobilized for this work, to foster the well-being and sufficiency of refugees and their integration into American life.

The total number resettled includes more than 3,000 unaccompanied refugee children placed in foster care since 1978. LIRS is one of just two national voluntary agencies that resettles unaccompanied minors.

LIRS is structured as a three-tiered partnership of national administration, professional regional support, and private sector sponsorships. Through this unique agency and church partnership, newcomers have access to a wide range of community resources in addition to basic material and emotional support. The most recent newcomers include Europeans, Armenians, Evangelical Christians from the Soviet Union, and Amerasian young people. And LIRS continues to resettle refugees from Southeast Asia, Africa, and the Near East.

With the help of the ELCA and Lutheran World Federation World Service, LIRS ministers with undocumented people in the United States by supporting 42 social service, advocacy and legal service community-based projects that address their needs. Matching private funds offered by the Ford Foundation are distributed in like manner—$500,000 over the next 3 years. The LC–MS coordinates with LIRS with respect to the grants it makes through its own World Relief program of the Board for Social Ministry Services to these and other such projects, as well.

Recently in Guatemala, LIRS representatives took part in an international conference on effects of the peace talks and the plans to assist the 1 million refugees there or from there. LIRS also helped organize an ecumenical delegation to Washington, DC about Central Americans on the southwest Texas border. That delegation made it clear that the policy of massive detention and lack of due process for Central Americans was in need of change.

At one point this summer, as many as 5,000 refugees were being detained in camps on the Rio Grande Valley area. The ELCA responded to an emergency appeal to the churches for funds for legal services to help them. LIRS is also organizing help for refugee children who are being kept in detention centers because of their lack of legal status in this country.

In June 1989 the LIRS executive director was the LIRS' and therefore the churches' representative in an international conference in Geneva concerning Southeast Asian refugees. These talks reaffirmed commitments by governments not to push back refugees; to expand programs of direct departures from Vietnam; and to continue resettlement, especially for those 52,000 who have spent years of their lives in camps. It was tough. Most countries wanted to end asylum now.

Vietnam has just agreed with the United States to allow former political prisoners to move again. Most will want to rejoin their families and will require special help on arrival. Two government departments and the national voluntary agencies, including LIRS, are discussing the where and how of that effort.

In mid-September, LIRS cosponsored a major conference in Washington, DC on ministry to and with African and Haitian refugees. Several ELCA churchwide units were intimately involved in this one, especially the Commission on Multicultural Ministries.

LIRS is also well known for foster care ministry, helping refugee young people who come to the United States without their parents and who need support until they reach adulthood. Only LIRS is able to function as a Protestant agency with such services through Lutheran Social Service agencies matching the other functioning agency, the Roman Catholic effort through Catholic Charities in its dioceses. One Protestant agency, Bethany Children's Home of Grand Rapids, MI, receives its cases through LIRS.

LIRS maintains an office in Washington, DC, in close collaboration with the ELCA Office on Governmental Affairs, where is it housed near Capitol Hill.

As a member of the American Council for Voluntary International Action (InterAction), the LIRS staff works with 130 other private agencies in joint strategy and action efforts. The LIRS executive director is currently concluding 2 years as chair of the InterAction Committee on Migration and Refugee Affairs.

LIRS PROGRAMS

The past year has seen both growth and diversification in LIRSs national ministries to immigrants and refugees.

The importance of the First Asylum Concerns [FAC] Program was underscored in 1989 by the devastating effects of the employer sanction provisions of the Immigration Reform and Control Act of 1986. The provisions make it illegal for employers to hire undocumented workers. The result is that undocumented refugees from Central America and elsewhere who cannot return home are increasingly subjected to exploitation or are sinking deeper into extreme poverty.

One important objective of LIRS' FAC Program is to advocate for fair and humane first asylum policies, and to seek administrative and legislative relief for refugees already here who are threatened with deportation. LIRS has advocated for passage of legislation such as the DeConcini-Moakley bill to suspend deportation of Salvadorans and Nicaraguans.

LIRS has also been instrumental in forming a coalition of national voluntary agencies, legal advocacy organizations, local direct service projects, and refugee community groups. This coalition, called the Committee for U.S. Action on Asylum Concerns [CUSAAC], serves as a collaborative mechanism for sharing information and developing common perspectives on promoting and expanding protection for persons seeking safe haven in the United States. It also relates to counterpart organizations in other countries around the world.

Another important aspect of FAC's work is the provision of legal and basic social services directly to asylum seekers through its small grants program. These grants are provided to local projects that provide direct assistance to refugees in their communities.

LIRS and the people it serves are particularly indebted to the ELCA for its continued priority support of this critical program. This support amounted to $100,000 this year; and together with a grant of $40,000 from the Lutheran World Federation, it made possible the renewal and increase of a matching grant from the Ford Foundation. This grant will total $500,000 over a 3-year period, of which $425,000 is for direct grants to local projects, and $75,000 is for technical assistance to these projects in the areas of organizational management and fund raising.

In 1989, a total of $290,000 was available for project grants. Requests coming to LIRS from 55 projects totaled $877,000. A staff review panel awarded grants to 41 projects.

LIRS Children's Services Program continued its work of placing refugee children admitted to the United States into foster homes. This work is carried out under a contract with the U.S. Department of State, and is done in partnership with 23 Lutheran Social Ministry Organizations. In fiscal year 1988–89, 298 refugee children were placed.

An exciting prospect for the future is the possibility of implementing a special unaccompanied minors project for border children. This project would develop alternative living situations for refugee children from Central America who are being held in detention facilities by the INS. LIRS would use its relationships with border projects to identify and screen the eligible children, and then link them with the existing network of LIRS unaccompanied refugee minor programs.

At this point, the LIRS board has given authorization for a consultant to be retained to research the project and develop an operational plan. Funding would be sought first from foundations, and perhaps later from Federal or other private sources. This project enjoys wide support from the bishop and presidents of most of the affected synods and districts of the LC–MS and the ELCA.

June 1989 saw the launching of LIRS' new Immigration Services Program, staffed by an experienced immigration attorney. This program aims to assist Lutheran Social Ministry Organizations, individual congregations and others to develop the technical capacity for responsible immigration counseling. The goal is to establish a national network of Lutheran affiliated immigration counseling sites. Already, a needs assessment has been distributed nationally and training workshops have been conducted for the upper midwest in October. Training for the Southwest is scheduled for November.

The Refugee Resettlement Program continues to be LIRS' largest program. In fiscal year 1988–89, more than 8,000 refugees were resettled in the United States through 26 affiliated regional programs. This 33 percent increase over the same period last year is largely attributable to the increasing numbers of Evangelical Christians that have been leaving the Soviet Union. This unplanned increase has had positive effects on the financial position of that program, although they will be temporary.

Additional congregational sponsorship for added numbers of refugees are still required, although the Department of State restricts the agency as to where such refugees may be resettled. Encouragement from the bishops and other national leaders is needed for this large agency and/or congregationally centered ministry of resettlement. Other ways for congregations to assist are described in a new LIRS brochure.

LIRS' heavy involvement in resettling Americans has also led to securing $35,000 supplementary Federal grants for its seven Amerasian cluster sites. In addition, LIRS helped obtain a $50,000 grant for a special Hmong project in Wisconsin, and renewed participation with the Federal match grant program for four other affiliates.

UNO NEEDS OUR HELP

HON. DONALD E. "BUZ" LUKENS

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. DONALD E. "BUZ" LUKENS. Mr. Speaker, it would appear that Marxist tyrant Daniel Ortega has stacked the deck unjustly in favor of his military dictatorship. Consider the following:

Ortega has appointed a five-man commission to supervise the uncoming election. Four of the five members are strongly aligned to the Sandinistas.

If one wants to send donations to Violeta Chamorro and the UNO Party, that money must be funneled through the Sandinista-dominated electoral commission which extracts—steals—50 percent for itself. The United States donated $9 million to adequately support the opposition.

Despite the Sandinistas allowing just four consecutive Sundays for voter registration, an astonishing 1.7 million of a possible 1.9 eligible voters qualified for the February election.

Some 300,000 Nicaraguans have fled the country for various reasons ranging from fear of political persecution to death. Ortega has not responded to the requests of these refugees to be allowed the opportunity to vote in neighboring Costa Rica and Honduras.

Finally, Ortega has suspended the 19-month cease-fire with the Contras for security concerns. What is to keep him from suspending the elections on the grounds that the electorates safety could not be insured?

Despite the efforts of the Sandinistas and their 100,000 strong military, various polls indicate that UNO is leading. Violeta Chamorro and the UNO Party desperately need our help. We can not allow the Marxist dictatorship to steal the first genuine opportunity Nicaraguans have to choose their own destiny.

Democracy and freedom of choice are the most compelling and contagious concepts in the world political scene. The word democratic appears in numerous country's constitutions around the globe. However, true democracies are both rare and unique. The people of Nicaragua have caught the democratic bug and we have dedicated ourselves to the reality of fair and free elections in Latin America. We must insure that fair elections occur, and more importantly, the results are allowed to come to fruition.

I would like to call to the attention of Members of both parties an editorial Mrs. Chamorro wrote that appeared in yesterday's Washington Post and that was sent to us by our colleague from Virginia, FRANK WOLF.

In this editorial, Mrs. Chamorro pleads with us to ensure the Nicaraguan people fair elections. We owe this to her. I urge my colleagues to take a few minutes to read her piece:

KEEP WATCH ON OUR ELECTIONS

From Manila to Mexico, from Budapest to Berlin to Beijing, a great gale of democracy is blowing. But not on the Nicaraguans. What a cruel blast we've received from fate!

In 1979 we were all part of "the beautiful revolution": a great coalition that was to rid us of tyranny forever, of corrupt officals, of

bullying soldiers and police, of grinding poverty, of foreign tutelage, of one-party, one-family rule. Then we were the van-guard of the democratic revolution. Now we bring up the rear.

For one brief moment in July of 1979 our people rose in joy to greet our brave *muchachos* returning victorious to Managua: Davids who had vanquished Goliath. How could we imagine that soon we would behold them behind armored personnel carriers and helicopter gunships. Soon enough the heroes of the revolution were slaughtering one another. Soon enought the workers who struck against autocracy could no longer strike or organize; the political parities that had united against the dictator could not assemble; the newspaper that had spread the word of freedom could not publish; the church that had preached liberation from the pulpit was bound and gagged.

How sad that Nicaraguans, instead of enjoying the blessings of equality and prosperity for which they risked their lives, now flee their homeland in the hundreds of thousands. How sad that the government of which I ounce formed a part has become as corrupt as its predecessor, as cruel, as hated.

But we've had our fill of hatred and of opinionated warriors who promise paradise and deliver inferno. Ten years of living dangerously has brought civil war, an exodus of a fifth of our countrymen, an annual inflation of 30,000 percent, 40 percent unemployment and, for the first time in our history, mass hunger. Our industry and agriculture are paralyzed. We have gone from being the bread basket of Central America to being its basket case: an international beggar with the largest per-capita foreign debt in Latin America. Even a government-commissioned survey has found consumption to have fallen by 70 percent since the revolution. Of course the Sandinista media shout that all this is due to Mr. Reagan and now to Mr. Bush. But we Nicaraguans know full well that the shortages and the repression came before the war and the embargo.

Tired of war and warriors, of dogmas and slogans, we'd like to put our feet on the ground, our house in order. We want to be boring for a while—more like our neighbor to the south, Costa Rica—a country at peace with its neighbors where no family or party is above the law, with an army reduced to a minimum (and without any "State Security" forces at all), with no political party controlling the media, the military and the police, and with all parties allowed to compete freely at the ballot box. We do not look back: what has been positive in the revolution, we'd keep and extend. For example we would give peasants who farm nationalized lands clear title to them, and would distribute all remaining state farms to those peasants who have no land. We would like to find common ground.

We in the opposition have been able to find common ground among ourselves. Today I am proud to say that the opposition coalition includes every group that united against Somoza in 1979, except the Sandinistas, who many feel betrayed our revolution. The National Opposition Union (UNO) spans 14 parties of every political stripe: Communist, Socialist, Social Democratic, Populists, Liberal, Social Christian, Christian Democratic, Libertarian and Conservative. We are supported by all the independent labor unions, business organizations, and professional groups. Anyone who knows Nicaragua will tell you that forging unity among our diverse groups and tendencies is no small achievement, especially because our organizations have been restricted and repressed. But we have united around a common program for national reconciliation, economic reconstruction and social justice through democratic institutions.

Our common effort found fertile ground. Last month despite intimidation by Sandinista troops and myraid obstruction by government bureaucrats, a record 92 percent of eligible Nicaraguan voters formed long lines to register. As has been reported in The New York Times, the Sandinista military even went so far as to stage a sham battle in an unsuccessful attempt to stop voters from registering. To frighten the people, President Daniel Ortega has called us "traitors" and "mercenaries" and "CIA agents," and has declared that a vote for us is "a vote for the enemy of the people." Pronouncing the Sandinistas "sure winners," he has emphasized that people would "not be so foolish as to vote for a loser"—darkly intimating that after a Sandinista victory opposition voters will be treated as traitors. Our jails are filled already with "enemies of the people."

But the people remain steadfast. Despite the government's monopoly of television (we are allowed only 15 minutes per week on a feeble channel that cannot reach many areas), despite indiscriminate Sandinista use of state transport, telephones, offices, meeting places, telegraph and copiers, despite the fact that 50 percent of our desperately needed and profoundly appreciated donations are appropriated by the Sandinista-dominated electoral commission, the people are giving us their support. Just last week an independent survey showed us winning by a margin of nearly 2 to 1. Even though the Sandinistas have unleashed their mobs to disrupt our meetings, these meetings grow larger and larger. Recently even the Sandinista mayor of Managua acknowledged that his party is losing.

Accordingly the Sandinistas have resorted to a new, more desperate and dangerous diversion. Again turning their backs on their solemn commitment to their people and to the Centeral American presidents, they have broken the cease-fire with the rebels. their helicopter gunships and automatic artillery have opened fire. Their 90,000-man army sweep through our villages on the preposterous pretext that tiny groups of poorly equipped contras constitute a "threat to national security." Lacking arguments to defend their misgovernment, the Sandinistas wish to speak fear, to chill the people into submission. This stratagem must raise grave doubts about the supposed Sandinista commitment to free elections.

In view of these alarming developments I have come to this country to ask for help. With the solidarity of all those who support our cause, I believe we may secure a relatively free vote; without it we may be doomed to elections in the style of the Sandinistas' ally Gen. Noriega.

Keep watch. Send observers from Congress, from state and federal government, from political parties, from labor unions, from professional and human rights organizations. Send them now. They will be witnesses for democracy. Send journalists and cameras; let your news and polling organizations conduct independent voter surveys. Help give Nicaraguans the chance to feel again the breezes of democracy.

AFTON LEE A POSITIVE FORCE ON LIVES OF OTHERS

HON. BEN ERDREICH

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. ERDREICH. Mr. Speaker, the world is full of talkers, people who come up with grand ideas, but who never seem to be able, or willing, to put them into action. On Saturday, November 4, I joined the local community in Homewood, AL, who came together to share in the loss of a man who was able, and most willing, to take action time and again as a unifying force in his community.

Afton Lee was not a talker, he was a doer. A quiet, unassuming man, his community turned to him many times to get things done, to bring about unity, to help make his city the kind of place in which we all would like to live.

He had a strong belief in citizen participation and in the commonality among a diverse people. He became the first black to be elected to the Homewood, AL, City Council, and was reelected three times. A leader in his community of Rosedale in Homewood, he worked to improve his city physically, morally, and culturally.

He was an astute and successful businessman who used his wealth to help others, donating land for a library and for affordable housing in his community.

At the age of 93, when most of us would be content just "to be," Afton Lee was still going strong, still doing good deeds, still thinking of others.

Afton Lee was many things: Entrepreneur, philanthropist, community and political leader, and loving family man. Most importantly, Afton Lee was just plain, good people.

Afton Lee was giving all of his life, and at the age of 93, he still was giving, a positive force upon the lives of others.

His tragic death is a terrible loss for his family, yes, but also, for our community. He was family to our entire community, across our State and Nation; we cannot replace Afton Lee. He will be lovingly remembered, and sorely missed.

I would like to share with my colleagues in the House the following editorial that appeared in the Birmingham News on Afton Lee and how greatly he will be missed by the community of Homewood, AL:

AFTON LEE

Afton M. Lee Sr. will be greatly missed, by his family and by the community he loved and served so long and so well. He was more than a fine family man, more than a competent businessman and more than a respected public servant.

The 92-year-old Lee was a symbol of strength for Homewood and its Rosedale community, symbol of what cooperation between black and white citizens can mean to a city's stability.

"If there ever was a problem," said Homewood's longtime Mayor Robert Waldrop, "he would handle it."

Mr. Lee's public service included two terms on the Homewood City Council. A man of great wealth, he gave freely to charity and civic organizations.

His experience and counsel were respected by both the black and white citizens of Homewood.

Mr. Lee's senseless killing at his grocery store Monday leaves a great sense of frustration.

There is some comfort in knowing his killers will face justice. But there is great emptiness in the knowledge that Homewood, and Birmingham at large, cannot replace Afton Lee.

He has become the latest victim of an age in which the unthinkable is real and the atrocious too often is commonplace.

FMLN OFFENSIVE IN EL SALVADOR

HON. ROD CHANDLER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. CHANDLER. Mr. Speaker, I strongly condemn the recent offensive by the Communist guerrillas in El Salvador. The Farabundo Marti National Liberation Front, known by its Spanish initials FMLN, must cease this senseless violence and return to the negotiating table.

In the past 3 days, at least 1,500 rebels have attacked Government positions in the Capital and in other parts of the country, killing dozens of civilians and Government soldiers, and wounding hundreds of others. As one rebel said in today's New York Times, "we just want to kill as many people as possible."

Tragically, one of those killed was a resident of my State, Christopher Babcock, 25. Early reports suggest he was killed by FMLN guerrillas during an attack on the Presidential residence, which is located near the house where he was staying. My prayers are with his family and friends, as with all of the families of those killed in this terrible war, now in its 10th year.

Blame for this recent breakdown in international efforts to bring peace to Central America must be shared by the Sandinista Government in Nicaragua. In another article in today's New York Times, which I wish to have included in the CONGRESSIONAL RECORD following my remarks, five top FMLN commanders were seen in Managua during the past 2 weeks.

Just last month, Honduran authorities intercepted a truckload of arms going from Nicaragua to El Salvador. The shipment included AK–47 automatic rifles, 19,000 rounds of ammunition, over 500 rockets, detonators, and radios. Earlier this month, the Sandinistas ended the cease-fire in Nicaragua, further contributing to the breakdown in peace efforts in the region.

The Government of El Salvador deserves our strong support. This devastating war must end, and support for the guerrillas from Nicaragua and Cuba must be stopped.

REBEL DRIVE LONG PLANNED, U.S. SAYS

(By Robert Pear)

WASHINGTON, Nov. 13.—The Bush Administration asserted today that the rebel offensive in El Salvador had long been planned and that its goal was the weakening of the Salvadoran Government and a popular uprising in parts of the country.

American officials said also that they had information that demonstrated that the Nicaraguan Government was involved in supplying arms for the guerrillas and even in operational planning.

Some officials contended that the offensive was begun out of desperation because of a perception in Nicaragua and among the Salvadoran rebels that they could no longer count on much Soviet or Soviet bloc aid, given the developments in Moscow and Eastern Europe.

White House and State Department officials said the arms shipments from Nicaragua violated commitments by President Daniel Ortega Saavedra of Nicaragua. Under regional peace accords signed by Mr. Ortega, they said, Nicaragua was supposed to stop providing arms to the Salvadoran rebels.

REBELS REPORTED IN MANAGUA

Two Central Americans with access to the Salvadoran rebels of the Farabundo Marti National Liberation Front said they had seen the top five guerrilla commanders in Managua, the Nicaraguan capital, within the last two weeks. American officials say they have traced rebel radio traffic from Nicaragua to El Salvador this week.

On Oct. 18, Honduran authorities intercepted a truckload of arms going from Nicaragua to El Salvador. The shipment included AK–47 rifles, 19,000 rounds of ammunition, more than 500 rockets, detonators and radios, the officials said.

They contended that the driver of the truck said under interrogation that he worked for a Salvadoran refugee group and that he had been delivering weapons from Nicaragua monthly since August 1988.

Secretary of State James A. Baker 3d said he was distressed that the Soviet Union showed no evidence of "new thinking" in Central America or in other regional conflicts, like those in Afghanistan and Cambodia. "This is our biggest disappointment to date in the relationship, the lack of cooperation on regional conflicts," Mr. Baker said in an interview. Mr. Baker has complained offically to the Soviet Ambassador about the weapons shipments.

A SPECIAL RESPONSIBILITY

In a speech at the Organization of American States this evening, Mr. Baker said. "That Soviet Union bears a special responsibility because its arms and money, moving through Cuba and Nicaragua, continue to support the violence, destruction and war.

Despite the protest, some high-level officials in the Bush Administration maintained that the Salvadoran guerrillas staged their latest offensive because the Soviet Union was putting pressure on the Sandinista Government of Nicaragua to curtail military support for them.

"This is a desperation move" by the guerrillas, an Administration official said. "It is brought on in part because the Soviets have weighed in with the Nicaraguans, and perhaps the Cubans, about stopping support for that insurgency." The official said he believed the Soviets when they said they had "told the Nicaraguans to cool with the F.M.L.N.," as the guerrilla group is known.

The Bush Administration's response to the guerrilla offensive was low-key compared with the alarms sounded by the Reagan Administration. In 1981, Alexander M. Haig, Jr., who was then Secretary of State, described Central America as a principal arena of East-West conflicts, sought additional military aid for El Salvador and said the United States must "go to the source" of aggression in the region, meaning to Cuba or even the Soviet Union.

By contrast, President Bush's press secretary, Marlin Fitzwater, said today that the President of El Salvador, Alfredo Cristiani, and Salvadoran Government forces were "in control of the situation" and had not requested additional aid from the United States.

Asked if he would rule out an American role in fighting the guerrillas, Mr. Fitzwater said, "We can never predict the future, but at this point it's not anticipated."

A RESPONSIBLE MEASURE

Richard A. Boucher, the deputy spokesman at the State Department, said a state of siege imposed Sunday by Mr. Cristiani was "a responsible measure to protect civilians" from guerrilla attacks.

Mr. Boucher said Nicaragua was "the principal supplier" of arms to the Salvadoran rebels. Another State Department official said the truck stopped on October 18 at El Espino, Honduras was carrying "a large quantity of Soviet bloc weaponry and instruction manuals for urban commandos, inscribed on the cover with the letters F.M.L.N."

Salvadoran rebel commanders said that their offensive was a response to a series of attacks on leftist political and union leaders, including the bombing of a labor confederation on October 31.

At the Organization of American States here, the Foreign Minister of Nicaragua, Miguel d'Escoto Brockmann, offered a resolution today making an urgent appeal to the Salvadoran Government "to cease immediately the bombing of the civilian population" and other acts of violence.

Some American officials contend that the offensive has been planned for two years and that captured rebel documents, including one called Plan Fuego, outlined a number of steps actually undertaken by the rebels in the offensive that began on Saturday.

IN MEMORY OF GEORGE SLAFF, A TIRELESS ADVOCATE

HON. MEL LEVINE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. LEVINE of California. Mr. Speaker, I rise today to ask my colleagues in the U.S. House of Representatives to join me in paying tribute to the memory of a superb human being who was a good friend, George Slaff. I salute his memory and support his ideals and hard work from which so many benefited.

I would like to include here an article that appeared in the Los Angeles Times by staff writer, Michael Ybarra.

IN MEMORY OF GEORGE SLAFF, A TIRELESS ADVOCATE

(By Michael Ybarra)

George Slaff, a tireless advocate of liberal causes who helped secure one of the triumphs of the New Deal, and later served two terms as mayor of Beverly Hills, has died of cancer. He was 83.

The prominent entertainment attorney had been at Cedars-Sinai Medical Center for a week before he died Friday night.

Longtime friend David Golding said Slaff had been somewhat frail in recent years, but still never gave up the abiding vim with which he fought "barons."

"He was always a champion of liberal causes," Golding said. "He never changed his stance."

An attorney with a love for the underdog, Slaff was president of the Southern California branch of the American Civil Liberties Union for six years beginning in 1965.

Slaff's liberalism was rooted in the experiences of his family, which fled czarist Russia in the 19th Century. Slaff had said that the family home in Passaic, N.J., was a meeting place for socialist Russian emigres. As a boy of 10, Slaff carried around a soapbox for members of the Young People's Socialist League.

Slaff, who attended Harvard and Stanford universities, began his law career representing evicted tenants. He developed an interest in the regulation of gas and electric companies, earning a reputation as a "utilities rate-buster in several states.

At age 38, he went to Washington to lend his talents to the New Deal. As chief counsel to the Federal Power Commission in the 1930s and 1940s, he helped establish the government's right to regulate utility rates.

Later, Slaff moved to Beverly Hills. He was a friend of Samuel Goldwyn and chief counsel and personal attorney for the producer for 20 years. His clients also included Raquel Welch and the Smothers brothers.

He served 12 years on the Beverly Hills City Council, and was mayor in 1968-69 and 1975-76. Three years ago, he sued the city for violating the constitutional requirement for separation of church and state by allowing the lighting of a 27-foot menorah at a city park during Hanukkah in 1986.

Slaff was not afraid of being called a "liberal." In remarks to an interviewer four years ago, he said: "Many people in the Democratic Party don't want to be known as liberals. There seems to be some intellectual stigma in today's climate about being 'too liberal.' But I don't think liberalism can be considered excessive. To me, it's simply a matter of recognizing equal rights for all."

He is survived by his wife Eve, a sister, May Miller, a daughter, Nora Ross, and a grandson.

Final arrangments are pending. Instead of flowers, the family said that donations can be sent to the George Slaff First Amendment Fund at the ACLU or to Planned Parenthood.

INTRODUCTION OF THE SECURITIES MARKETS STABILIZATION ACT OF 1989, AND THE COORDINATED CLEARANCE AND SETTLEMENT ACT OF 1989

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. MARKEY. Mr. Speaker, today I, along with Mr. RINALDO, the ranking minority member of the Subcommittee on Telecommunications and Finance, which I chair; and my subcommittee colleague from New Mexico, Mr. RICHARDSON, am introducing the Securities Markets Stabilization Act of 1989 and the Coordinated Clearance and Settlement Act of 1989, both of which were unanimously approved this morning by the subcommittee.

The Securities Markets Stabilization Act of 1989 represents the first legislative step toward reform of the stock market in the aftermath of the frightening crashes of October 1987 and October 1989, events that have shaken investor confidence to its very core. This long-awaited and much needed first step comes after nearly 2 years of extensive consideration of all the issues surrounding market reform, a process that has included 12 hearings by this subcommittee, 4 in this year alone; indepth expert analyses by the Brady Commission, the Katzenbach Commission, the Securities and Exchange Commission, and the Working Group on Financial Markets; as well as a further series of 6 SEC investigations of program trading and other related issues initiated in response to requests of this subcommittee. I first introduced comprehensive market reform legislation in the 100th Congress, with H.R. 4997. And earlier this year, at the request of the Securities and Exchange Commission, Chairman JOHN DINGELL and I introduced similar legislation, H.R. 1609, the Stock Market Reform Act of 1989.

The Stabilization Act contains four provisions necessary to market reform: First, a grant to the SEC of authority to halt all trading in a market emergency; second, a directive to the SEC to require large traders to report their transactions; third, a directive to the SEC to assess the financial health of parents and affiliates of broker/dealers; and fourth, a grant of authority to the SEC to constrain program trading. A fifth provision would direct the Commission to facilitate coordinated clearing and settlement with other Government agencies. This provision stands alone in the coordinated clearance and settlement committee print.

All these provisions have been the subject of extensive negotiation with the SEC and Treasury, who strongly support moving forward on market reform. The provisions we have negotiated with the SEC and the securities industry on large trader reporting, risk assessment and others are extremely valuable from a market surveillance standpoint. In addition, the section concerning powers to prohibit certain trading practices address the one issue at the top of every investors list—the habitual, excessive, and violent market volatility that has driven the individual investor out of the stock market. This manufactured volatility has turned Wall Street into the mean streets of investing. It's as if we turned off all the Nation's stop lights, made all speed limits voluntary, stopped filling the pot holes, or repairing the bridges—and told the American public to go it alone. Such a retreat from common sense would not be tolerated in any of our hometowns, yet we are treating Wall Street with the kind of appalling disregard that can only result in financial disrepair. For this reason, the Securities Markets Stabilization Act committee print includes a provision that would authorize the SEC to suspend or constrain manipulative, abusive, or disruptive practices that feed volatility—such as program trading—during times of excessive market volatility.

Right now, we are faced with the tyranny of our own ingenuity. Somewhere along the way our regulators and our Government forgot the fundamental notion that technology must exist to serve, not suppress, human needs. Technology must continue to serve as an instrument to nurture our financial markets, markets which were first established to serve the capital raising needs of America's corporations. And technology must serve to allow individual Americans to invest in a piece of corporate America. But since October 1987, I have received numerous calls and letters from angry investors who have withdrawn their money from the market because they find no security in a stock market that behaves more like a yo-yo than an orderly mechanism for buying and selling shares in corporate America.

I do not believe that Congress can or should legislate up markets or down markets—what we should do is legislate fair markets. Right now we have unfair markets—markets that are dominated by a few 1-minute stockholders at the expense of the many. In the words of one recent subcommittee witness, comparing a program trader to an investor is like comparing a shark to a gourmet diner. We have large institutional shareholders who have engaged in trading strategies that are based on the erroneous notion that our markets contain unlimited liquidity. And we have aggressive traders whom I believe engage in manipulative trading strategies that profit from the volatility created by the lack of liquidity in our markets.

Excessive volatility in our securities markets is a national problem that demands a national solution. The SEC must have the necessary legal authority to address the impact of all of these trading strategies, legal and illegal, that fuel harmful market volatility. By the same token, we are not banning program trading—this bill will only give the SEC authority to suspend or constrain such trading practices during periods of high volatility.

I want to add in closing that our financial markets are a national treasure and a national resource. We should treat them with respect. The actions we take here today on market reform in particular are a true measure of that respect and are the first step in restoring the integrity and stability of our securities markets.

Mr. Speaker, for the benefit of my colleagues I am enclosing section-by-section analyses of the two bills introduced today.

I urge my colleagues to join me in cosponsoring this legislation.

SECTION-BY-SECTION ANALYSIS OF SECURITIES MARKETS STABILIZATION ACT OF 1989

SECTION 1. SHORT TITLE

This section provides that the bill may be cited as the "Securities Markets Stabilization Act of 1989".

SECTION 2. EMERGENCYS AUTHORITY; TRADING HALTS

This section of the bill amends Section 12(K) of the Securities Exchange Act of 1934 by clarifying and broadening the Commission's authority to suspend trading and to take temporary actions in the event of an emergency. The Commission would be authorized to take such action in order to maintain or restore fair and orderly securities markets and to ensure prompt and accurate clearance and settlement of securities transactions. This section also specifically authorizes the SEC to suspend trading for stated periods of time, subject to some limitations. In the case of a market-wide trading

halt, in lieu of the President's approval, the new subsection (k)(1) would require the Commission to notify the President of its decision and be notified by the President that the President does not disapprove of such a halt before a market-wide halt could be put into place. And finally the section defines an emergency as a major market disturbance characterized by, or constituting a substantial threat of sudden and excessive fluctuations of securities prices that threaten fair and orderly markets, or as a substantial disruption of the safe or efficient operation of the national system for clearance and settlement of securities.

Subsection (k)(1)—Trading Suspensions.—Under existing Section 12(k) of the Exchange Act, the Commission is authorized to (i) suspend trading in any security (other than an exempted security) for a period of time not exceeding ten days, and (ii) with the approval of the President, summarily to suspend all trading on any national securities exchange or otherwise, in securities other than exempted securities, for a period not exceeding ninety days. It also prohibits a member of national securities exchange, broker, or dealer from acting in contravention of a Commission suspension order.

Subsection (k), as amended, would preserve the Commission's present authority to suspend trading in individual securites without change. However, with respect to potential market-wide trading halts, in lieu of the President's approval, the new subsection (k)(1) would require the Commission to notify the President of its decision and be notified by the President that he does not disapprove of such decision.

The existing prohibition on actions by brokers, dealers or exchange members contained in Section (k) is altered slightly and transferred to new subsection (k)(4), which is discussed below.

Paragraph (k)(2)—Emergency Actions.—This new subparagraph (A) would authorize the Commission, by order, to take temporary emergency action with respect to any matter subject to regulation under the Exchange Act. The Commission's authority to take summary action under this subsection would extend to all matters subject to regulation under the Exchange Act by the Commission, and the securities self-regulatory organizations, including, but not limited to, the ability to alter, supplement, suspend, or impose requirements of restrictions with respect to hours of trading, position limits, and clearance and settlement. Thus, the Commission's emergency authority could be used to relax or to impose more stringent requirements in an emergency.

Emergency actions ordered by the Commission under subparagraph (B) would remain in effect for the time specified by the Commission. The Commission would be authorized to extend the effectiveness of emergency actions, but in no event would any action taken in response to a particular emergency remain in effect for more than ten business days, including extensions. This limitation would not apply with respect to actions taken in response to any other emergency that might occur during the ten business day period. While many of the measures authorized under this paragraph would be necessary only for very short periods, perhaps hours or minutes, other matters, such as those relating to hours of business and clearance and settlement, might be required for longer periods, up to ten days, in order to be effective.

Prior to taking temporary emergency action, the Commission would be required to make only the findings required by this paragraph, and would not be required to make findings or observe procedures prescribed by any other provisions of the Exchange Act. To ensure that the Commission would be able to take emergency action without procedural delay, the paragraph would expressly exempt the Commission, in exercising its emergency authority, from the agency rule-making requirements prescribed by the Administrative Procedure Act, and from the requirements prescribed by the Exchange Act Section 19(c) for abrogating, adding to, or deleting from the rules of a self-regulatory organization.

Paragraph (k)(3)—Presidential Override.—This paragraph expressly limits the Commission's authority to act to halt trading on any national securities exchange as provided in subsection (k)(1)(B) and to take emergency action pursuant to subsection (k)(2). This paragraph provides that the President may terminate any suspension of trading or other summary action taken by the Commission under those subsections.

Paragraph (k)(4)—Compliance.—This paragraph provides that no member of a national securities exchange, broker, or dealer shall act in contravention of a Commission order entered under subsection (k) of Section 12, unless such order has been stayed, modified, or set aside as provided in paragraph (k)(5) of Section 12.

Paragraph (k)(5)—Judicial Review.—Emergency action taken by the Commission under subsection (k) would be subject to judicial review in the United States Courts of Appeals as provided in Section 25(a) of the Exchange Act, based on an examination of all information before the Commission at the time such action was taken, subject to the assertion of any applicable privilege by the Commission. The reviewing court would be prohibited from entering a stay, writ of mandamus or similar relief unless the courts finds, after notice and hearing before a panel of the court, that the Commission's action is arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with law. Thus, a court reviewing emergency action taken by the Commission under subsection (k) would be permitted to act only after the Commission had an opportunity to explain the basis for its action.

Paragraph (k)(6)—Definition of "Emergency.".—This paragraph defines "emergency" to mean a major market disturbance characterized by, or constituting a substantial threat of sudden and excessive fluctuations of securities prices generally that threaten fair and orderly markets, or a substantial disruption of the safe or efficient operation of the national system for clearance and settlement of securities.

SECTION 3. LARGE TRADER REPORTING

Section 3 adds a new subsection (h) to Section 13 of the Securities Exchange Act of 1934 providing for the filing of reports concerning substantial securities transactions. This new subsection is designed to assist the Commission in its surveillance of the U.S. securities markets, clarifying and expanding its broad authority to adopt record-keeping and reporting rules for the purpose of monitoring the impact on the securities markets of large transactions. Generally speaking, the section would authorize the Commission to establish a two-tiered information-gathering and reporting system for monitoring large securities transactions. The first tier requires large traders to report their identity, and all the accounts which such large traders have used to effect such transactions. The second tier requires every registered broker or dealer to keep records of large trader transactions and provide such records to a self-regulatory organization of the Commission on request. The Commission could use the information required by this new subsection to reconstruct trading activities in periods of market stress, and for surveillance, enforcement and other appropriate regulatory purposes.

Paragraph (h)(1)—Large Trader Reporting.—This paragraph would authorize the Commission to adopt rules requiring any person effecting large transactions to provide information. The information provided would identify the "large trader" and also identify the accounts in and through which he effects large securities transactions. It is anticipated that each such "large trader" reporting under this paragraph will obtain a unique identifying number.

Paragrcph (h)(2)—Broker-Dealer Transaction Reporting.—This paragraph requires brokers and dealers effecting transactions for large traders to keep records of such transactions that equal or exceed a limit to be set by the Commission from time to time. Such records must be available for immediate reporting to the Commission (or any designated self-regulatory organization) at the opening of business on the business day following the day the transactions were effected. In addition, the paragraph requires that the records and reports be maintained and transmitted to the Commission in a format and in a manner to be prescribed by the Commission (including, but not limited to, machine readable form). It is anticipated that brokers and dealers will utilize the large trader's unique identifying number in order to record and report the large trader's transaction.

Paragraph (h)(3)—Aggregation.—This para- graph authorizes the Commission to prescribe rules governing the manner in which transactions shall be aggregated. Generally, aggregation of accounts among different broker-dealers will occur at the self-regulator level or at the Commission, through use of the unique large trader identifying number.

Paragraph (h)(4)—Examinations.—The paragraph reiterates authority currently contained in Section 17(b) of the Securities Exchange Act. It would require that all records made by brokers and dealers pursuant to subsection (h) be available at any time to reasonable, special, or other examinations by representatives of the Commission.

Paragraph (h)(5)—Considerations.—This paragraph provides that, in exercising its authority under this subsection, the Commission shall take into account existing reporting systems, and the costs associated maintaining information with respect to transactions effected by large traders and reporting such information to the Commission or self-regulatory organizations. The Commission understands the need for setting parameters for reporting securities transactions and making available records of such transactions. Every effort would be made to minimize the economic burdens of record-keeping and reporting whenever possible. Moreover, the costs and benefits of beneficial ownership reporting would be carefully considered, and the Commission would not impose requirements on broker-dealers to report beneficial ownership information that is not recorded in the normal course of business. For example, many broker-dealers currently maintain no beneficial ownership records of transactions of foreign persons that are carried out through

banks, particularly foreign banks, which serve as the record holder of such securities. Finally, the paragraph requires the Commission, in adopting any rules under subsection (h), to consider the relationship between the U.S. domestic markets and the international marketplace for securities.

Paragraph (h)(6)—Exemptions.—This para- graph would permit the Commission by rule, regulation, or order, to exempt any person, transactions, or classes or persons or transactions, either conditionally or upon specified terms and conditions or for stated periods of time, from the operation of subsection (h) and the rules and regulations thereunder.

Paragraph (h)(7)—Confidentiality.—This paragraph provides that the Commission (or any other Federal department or agency) could not be compelled to disclose publicly any information required to be reported under this section for which disclosure might otherwise be required pursuant to the Freedom of Information Act, 5 U.S.C. 552, or of any other law. However, the Commission is not prevented under this paragraph from complying with information requests from Congress, any other Federal department or agency requesting the information for purposes within the scope of its jurisdiction, or a court of the United States in any action commenced by the United States or the Commission.

Paragraph (h)(8)—Definitions.—This para- graph contains definitions necessary to carry out the purposes of this subsection.

(A) The term "large trader" means every person who for his own account or an account for which he exercises investment discretion, effects transactions for the purchase or sale of any publicly traded security in an aggregate amount equal to or in excess of the identifying activity level. Large traders may include, among others, individuals, banks, broker-dealers, insurance companies, investment advisors, mutual funds, pension funds, and trust companies.

(B) The term "publicly-traded security" means any equity security (including an option on individual equity securities, and an option on an index or group or equity securities) listed, or admitted to unlisted trading privileges on a national securities exchange, or quoted in an automated interdealer quotation system.

(C) The term "identifying activity level" means transactions in publicy traded securities at or above a level of volume or dollar amount, which occur over a set period of time, both items of which shall be set by the Commission from time to time.

(D) The term "reporting activity level" means largely the same as "identifying activity level."

(E) In addition to the entities described in Section 3(a)(9) of the Exchange Act, the term "person" is deemed to include two or more persons acting as partnership, limited partnership, syndicate or other group for the purpose of trading, acquiring, holding or disposing of any publicly traded security, except a foreign central bank.

SECTION 4. RISK ASSESSMENT FOR HOLDING COMPANY SYSTEMS

This section amends section 17 of the Securities Exchange Act of 1934 by adding a new subsection (h). The new subsection is intended to assist the Commission in obtaining information regarding the financial activities of affiliates of broker-dealers that are part of holding company systems that are reasonably likely to have a material impact on the financial and operational condition of broker-dealers under the Commission's jurisdiction. Over the past decade, an increasing number of broker-dealers have formed holding company systems and have moved many potentially risky activities (such as bridge loan financing, interest rate swaps, and foreign currency transactions) outside of the broker-dealer and into affiliates or holding companies that are not under direct regulatory oversight. Many of these activities may involve significant potential exposure to the broker-dealer entity. In periods of adverse market conditions, it is particularly important for the Commission to have access to information regarding the extent of such activities in order to assess the stability of broker-dealer participants in the marketplace.

The new subsection builds on the Commission's existing authority contained in the Exchange Act (i) to adopt rules concerning safeguards with respect to financial responsibility and related practices of brokers and dealers; (ii) to require record-keeping and reporting requirements for brokers, dealers, and municipal securities dealers, and (iii) to examine brokers, dealers, municipal securities dealers, and government securities brokers and dealers for which it is the appropriate regulatory agency. This new subsection, however, requires only record-keeping and reporting relating to the financial and securities activities of associated persons. It does not in itself provide the Commission with any new authority to regulate directly the activities of such associated persons.

Paragraph (h)(1)—Recordkeeping and Summary Reporting.—This paragraph would require registered brokers and dealers, and registered municipal securities dealers for which the Commission is the appropriate regulatory authority, to obtain information and make and keep records regarding the registered person's policies, procedures or systems for monitoring and controlling activities of any of its associated persons. The paragraph would not require information concerning the activities of any associated person that is a natural person. The information and records to be kept pursuant to this paragraph, to be prescribed by the Commission by rule, shall describe in the aggregate each of the financial and securities activities, conducted by, and customary sources of capital and funding of, those of its associated persons whose business activities are reasonably likely to have a material impact on the financial or operational condition of such registered person. Financial and securities activities would include, but not be limited to, activities of securities firms, futures, forwards, and spot market commodity transaction; commercial paper factoring and dealing; purchases of financial assets for sale as securities; merchant banking (including bridge financing); lending; and the exchange rate or foreign currency obligations. The record-keeping and reporting obligation would not extend to non-financial, non-securities activities, such as manufacturing. This paragraph also would enable the Commission to require, by rule, summary reports of the records kept pursuant to this paragraph to be filed with the Commission no more frequently than quarterly.

Paragraph (h)(2)—Call Reports.—This paragraph would empower the Commission to require special "call" reports, containing more detailed information than is required pursuant to paragraph (h)(1), concerning the financial and securities activities of an associated person of a broker-dealer. In addition to covering registered brokers and dealers and registered municipal securities dealers for which the Commission is the appropriate regulatory agency, paragraph (h)(2) would permit the Commission also to request "call" reports from registered government securities brokers or dealers for which the Commission is the appropriate regulatory agency.

As a result of adverse market conditions or as a result of the summary information provided to the Commission pursuant to paragraph (h)(1) or based on other available information, the Commission may require further reports concerning the financial and securities activities of a broker-dealer's associated persons if it reasonably concludes that it has concerns regarding the broker-dealer's financial or operational condition. For example, pursuant to this authority, the Commission may require registered persons to disclose the trading positions of their affiliates. Again, the paragraph would not require information to be required concerning the activities of any associated person that is a natural person. Special call reports required under this paragraph (h)(2) shall specify the information required, the period for which it is required, the time and date on which the information must be furnished, and whether the information is to be furnished, and whether the information is to be furnished directly to the Commission or to a self-regulatory organization with primary responsibility for examining the registered person's financial and operational condition.

Paragraph (h)(3)—Exclusion for Small Affiliates of International Holding Companies.—This paragraph provides for an exclusion for entities with a net worth of less than $25 million that are part of an international holding company that, on a consolidated basis, does not devote a significant amount or proportion of its assets to, or obtain significant revenue from, activities in the U.S. securities markets.

Paragraph (h)(4)—Commission exemptive Authority.—This paragraph permits the Commission to provide exemptions by rule, regulation or order from the record-keeping and reporting requirements contained in paragraphs (h)(1) and (h)(2), either conditionally or upon specified terms and conditions or for stated periods. In granting such exemptions, the paragraph requires the Commission to consider the primary business of any associated person; the nature and extent of domestic or foreign regulation of the asociated person's activities; the nature and extent of the registered persons securities activities; and, with respect to the registered person and its associated persons, on a consolidated basis, the amount and proportion of assets devoted to, and revenues derived from, activities in the United States securities markets. Moreover, with respect to regulated entities, the Commission must consider whether information of the type required by the section is available to the Commission, from a supervisory agency as defined in section 1101 of the Right to Financial Privacy Act of 1978 (12 U.S.C. 3401(6)), a state insurance commission or similar state agency, the Commodity Futures Trading Commission, or a similar foreign regulator.

Paragraph (h)(5)—Confidentiality.—Paragraph (h)(5) provides that the Commission could not be compelled to disclose publicly any information required to be reported under paragraph (h) for which disclosure might otherwise be required pursuant to the Freedom of Information Act, 5 U.S.C. 552, or any other laws. However, the Commission is not prevented from providing information

to Congress, any other Federal department or agency requesting the information for purposes within the scope of its jurisdiction or a court of the United States in an action commenced by the United States or the Commission.

Subsection (b)—Conforming Amendments.—In conforming amendments to be made to the Government Securities Act contained in section 15C of the Securities Exchange Act of 1934 (15 U.S.C. 780-4), the Secretary of the Treasury would be given similar rule-making authority with respect to government securities brokers and dealers registered under section 15C(a)(1)(A) of the Exchange Act, *i.e.*, those that are not registered brokers or dealers or financial institutions. In exercising that authority the Secretary would be required to avoid unnecessary duplicative requirements concerning holding company systems that have both registered brokers and dealers and registered government securities brokers and dealers. Specifically, the section requires that the requirements applicable to associated persons of government securities brokers and dealers who are also associated persons of registered broker dealers reporting to the Commission conform, to the greatest extent practicable, to the reporting and record-keeping requirements established by the Commission under Section 17(h).

SECTION 5. LIMITATION ON PRACTICES WHICH RESULT IN HIGH LEVELS OF VOLATILITY

This section amends section 9 of the Securities Exchange Act of 1934 by adding a new subsection (h). This new subsection authorizes the SEC by rule or regulation to prohibit or constrain manipulative or abusive practices that will result or are reasonably likely to result in levels of volatility that may adversely affect the integrity or stability of the securities markets. This provision is aimed at arming the SEC with the necessary tools to control excessive volatility and thereby to restore and retain the confidence of the investing public in our nation's securities markets. The SEC's authority to control and prevent such volatility does not extend beyond its currently authorized jurisdictional domain—the securities markets.

Paragraph (2) of this subsection provides for the Commission to seek monetary penalties in judicial proceedings for violations of this section. The penalties shall be determined by the court in light of facts and circumstance, but may not exceed the greater of either $100,000 for a natural person or $500,000 for any other person or the pecuniary gain to such defendant as a result of the violation.

Paragraph (3)(A) of this subsection provides the Commission, after notice and the opportunity for hearing, to issue a cease and desist order to persons violating, to those who have violated or to those who are planning to violate regulations or rules prescribed under this subsection. Subparagraph (B) provides that if the Commission determines that that violation is likely to cause significant disruption of the securities markets or otherwise significantly harm investors prior to the completion of the proceeding, the Commission may issue a temporary order requiring the respondent to cease and desist from any such violation and to take action to prevent such disruption or harm pending completion of such proceeding. Subparagraph (C) provides the Commission to recover through a civil action a penalty on those who violate a cease and desist order. Such penalty shall not exceed $100,000 in the case of a natural person, or $500,000 in the case of any other person, for each violation.

SECTION-BY-SECTION ANALYSIS OF THE COORDINATED CLEARANCE AND SETTLEMENT ACT OF 1989

SECTION 1. SHORT TITLE

This section provides that the bill may be cited as the "Coordinated Clearance and Settlement Act of 1989."

Section 1 amends section 17A(a)(2) of the Securities Exchange Act of 1934 by directing the Commission to facilitate the establishment of linked and coordinated facilities for clearance and settlement of transactions in securities and related financial instruments. In addition, this section would give the SEC the authority to adopt rules concerning the transfer and pledge of securities other than government securities, where the SEC determines that the absence of Federal rules substantially impedes the safe and efficient operation of the national system for the clearance and settlement of securities transactions. This section also directs the Commission to consult with appropriate regulatory authorities in addressing the need for coordinated and linked systems and requires the Commission to report its progress in this area to Congress not later than two years after enactment. And finally, this section directs the SEC to establish a Federal Advisory Committee to consider and report to the Commission on matters concerning where State commercial laws and related Federal laws regarding the transfer of certificated or uncertificated securities and the perfection of security interests do not provide the necessary certainty, uniformity, and clarity for purchasers, sellers, investors, financial intermediaries, and lenders concerning their respective rights and obligations.

The huge market movements that occurred during the October 1987 market break created margin and other settlement obligations within the stock, option, and futures markets that involved extraordinary large cash payments. Because many of the participants in each of these markets also participate in other markets, often through hedging or offsetting positions, the size of these cash flows were larger than would have been required if clearance and settlement of products in these markets were coordinated. The tremendous cash flows necessitated by the lack of coordinated settlement placed great strains on our nation's payment systems, and deprived the trading markets of liquidity at a time when it was most needed.

Several of the market break studies, including the President's Task Force on Market Mechanisms (the "Brady Commission Report") and the Interim Report of the President's Working Group on Financial Markets, noted this problem and suggested that improvements in clearance and settlement, and specifically increased intermarket coordination, were among the most important reforms that should be undertaken in response to the market break.

SECTION 2. COORDINATED CLEARING

Paragraph 2(A)—SEC Authority to Facilitate Linked and Coordinated Clearance and Settlement—Section 5(a) would amend section 17(a)(2) of the Exchange Act to direct the SEC to use its authority under the Exchange Act to facilitate the establishment of linked or coordinated facilities for clearance and settlement of transactions in securities, securities options, contracts of sale for future delivery and options thereon, and commodity options. As amended, paragraph (a)(2)(A) does not mandate any particular clearance or settlement system structure or facility. Indeed, effective coordination and linkage can, to a large degree, be achieved under current structures, for example, through the ongoing cross-margining and information sharing efforts. The SEC's mandate is intended to clarify that the SEC has authority to oversee the implementation and operation of such facilities as are developed by private or self-regulatory initiatives, while retaining the maximum flexibility to respond to changed facts and circumstances. The mandate also charges the SEC with the responsibility to assure that the facilities develop and operate in accordance with Congressionally determined goals and objectives that were added to section 17A of the Exchange Act as part of the Securities Acts Amendments of 1975.

Paragraph 2(B)—SEC Consultation with Other Regulators.—Under Section 17A(a)(2)(B), as amended, the Commission is directed to use its authority under Section 17A to assure equal regulation of registered clearing agencies and registered transfer agents. Although this section applies to all cleared products, it is expected that the SEC will exercise its authority only in instances where a particular cleared products or clearing system within its jurisdiction demonstrates a significant effect on other cleared products, clearing systems, or the financial system generally. In carrying out its responsibilities under paragraph 2(A), the SEC would be directed to consult with the CFTC and the Board of Governors of the Federal Reserve System.

Paragraph 2(C)—Reporting Progress Toward Linked and Coordinated Clearance and Settlement.—Section 17A(a)(2)(C), as amended, would direct the SEC in consultation with the Board of Governors of the Federal Reserve System, and other relevant regulatory authorities to examine progress toward the establishment of linked or coordinated facilities for clearance and settlement of transactions in securities, securities options, contracts of sale for future delivery and options thereon, and commodity options, and to submit to Congress within two years from the date of enactment of this amendment a report detailing and evaluating such progress.

SECTION 3. TRANSFER AND PLEDGE OF SECURITIES

Paragraph (f)(1)—SEC Authority to Promulgate Rules.—Section 17A(f)(1) of the Exchange Act, as amended, would authorize the SEC to promulgate rules concerning the transfer and pledge of certificated and uncertificated securities (including security interests therein). Paragraph (f)(1) would authorize the SEC to preempt state commercial laws (such as those based on the Uniform Commercial Code) governing transfer and pledge of securities, but only upon making three predicate findings: (1) that the rule is necessary or appropriate for the protection of investors or in the public interest and is reasonably designed to promote the prompt, accurate, and safe clearance and settlement of securities transactions; and (2) that in the absence of a uniform rule, the safe and efficient operation of the national system for clearance and settlement of securities transactions will be, or is, substantially impeded (for example, due to the lack of scope or inconsistent standards of such state laws); and (3) that to the extent such rule will impair or diminish directly or indirectly rights of investors under

state law concerning transfers of securities (or limited interests therein), that the benefits of such rules exceed the detriment to investors. The SEC would not be authorized to promulgate rules with respect to government securities issued pursuant to chapter 31 of title 31, United States Code, or securities otherwise processed within a book-entry system operated by the Federal Reserve Bank of New York.

In making determinations under subparagraphs (f)(1) (A), (B), and (C), the Commission would be required to consult with the Secretary of the Treasury and the Board of Governors of the Federal Reserve System before adopting any rules pursuant to new section 17(f). The Department of the Treasury and the Board of Governors of the Federal Reserve System have similar expertise and authority in this area with regard to government securities and bank check processing standards. Although consultation would be required before the adoption of rules, it is expected that the SEC will consult with the Secretary of the Treasury and the Board of Governors of the Federal Reserve System throughout the rulemaking process. If the Secretary of the Treasury shall object, in writing, to the Commission's findings with respect to the factors set forth in subparagraphs (A), (B), or (C) of subparagraph (f)(1), the Commission shall consider all feasible alternatives to the proposed rule, and it shall not adopt any such rules unless the Commission shall make an explicit determination that the rule is the most practicable method for achieving safe and efficient operation of the national clearance and settlement system.

Paragraph (f)(3)—Establishment of a Federal Advisory Committee.—Recognizing that state commercial laws concerning the transfer of securities and the creation and perfection of security interests is an area of technical expertise outside the traditional expertise of the SEC, and that rulemaking in this area can affect a wide range of interests, paragraph (f)(3)(A) would direct the SEC to establish a federal advisory committee in accordance with the Federal Advisory Committee Act. The SEC would be directed to establish the Advisory Committee within ninety days after the effective date of this section, to consider and report on such matters as the SEC determines, including the laws concerning the transfer of certificated or uncertificated securities, limited interests (including security interests) in such securities, or the creation or perfection of security interests in such securities do not provide the necessary certainty, uniformity, and clarity for purchasers, sellers, investors, financial intermediaries, and lenders concerning their respective rights and obligations. The SEC would be directed to consult with the Secretary of the Treasury and the Board of Governors of the Federal Reserve System in developing the Advisory Committee's charter and composition.

Under paragraph (f)(3)(B), the Advisory Committee shall consist of 15 members. The Secretary of the Treasury and the Board of Governors of the Federal Reserve System would be authorized to designate two such members of the Advisory Committee. It is expected that any Advisory Committee established in accordance with this section include at least several individuals with substantial expertise in commercial, securities, banking or bankruptcy law, either as academicians or practitioners. Under paragraph (f)(3)(C), the Advisory Committee would be directed to report to the SEC within six months (or such longer time as the SEC may designate) and to deliver copies to the Secretary of the Treasury and the Chairman of the Board of Governors of the Federal Reserve System.

It is intended that the Advisory Committee will guide the SEC in determining those areas of state commercial law that lack uniformity, clarity and certainty. Although the section would require the SEC to give consideration to the Advisory Committee's recommendations, the SEC would not be bound by those recommendations and would be authorized to adopt rules that preempt state commercial laws if the SEC makes the necessary findings provided in section 5(b). It is also intended that the SEC will not use its rulemaking authority expansively, for example, to write a federal commercial code with the scope and depth of existing state commercial laws. Rather, it is intended that the SEC use its authority to address specific concerns that require greater clarity, uniformity, or specificity for transactions processed in the national clearance and settlement system.

Paragraph (f)(3) would authorize the SEC to establish an Advisory Committee at any time, if the SEC determines such a Committee would be useful to guide the SEC's efforts at a future time. Although it is preferable that the SEC obtain the advice of experts through the Advisory Committee process, that process is not a prerequisite to SEC rulemaking, and the SEC may determine that circumstances require immediate rulemaking. Nonetheless, the SEC would be required to consult with the Secretary of the Treasury and the Board of Governors of the Federal Reserve System and, through the rulemaking process, should obtain the views of experts in the field of commercial law.

VIEWS OF THE CONGRESS

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for Wednesday, November 15, 1989, into the CONGRESSIONAL RECORD.

VIEWS OF THE CONGRESS

The Congress continues to be held in low esteem by Hoosiers. Increasingly, I find that what occupies the Congress may rank low on the concerns of the voters. The nation's important business, Hoosiers tell me, is being neglected.

Hoosiers give the Congress low rating for integrity and for effectiveness in addressing the nation's problems. They view the Congress as absorbed with its own activities—the problems of Members, pay levels, and reelection—rather than with helping the country. Many issues, under review in the Congress—limitation of outside income for Members, honoraria, political action committees—do not seem to be particularly important to the voters. They are concerned about ethics in the Congress, but they would prefer that the Congress focus its attention more on the national agenda than on policing the ethics of Members. People seem to think that ethics problems exist in both the legislative and the executive branches, and they do not identify ethics problems any more with one party than with the other.

I am disturbed by how many people just assume that Members of Congress get rich at taxpayers' expense, accepting bribes and payoffs routinely. They take it as an article of faith that most people run for public office in order to get rich, and they have the general view that the Congress is ripping off the country. The cynicism on this point is very high, and it is very difficult for a Member of Congress to overcome it.

Yet voters still continue to make a sharp distinction between the Congress as a whole and their own representative. They will often rate their congressman high—even higher than the ratings they give President Bush and certainly much higher than they give to the Congress overall.

Still, Hoosiers oppose any pay raise for Members of Congress. Voters certainly reject the view that without a pay increase for Members, only very wealthy people will run for office. They also reject the view that Members need to maintain two homes and that they need more money than the average person. In contrast, they are quite comfortable with comparable executives in the private sector earning more money.

People are also generally unhappy with the way campaigns are conducted. Their biggest complaint is money—not its source, but the amount spent. They want to see a limit on the total amount of money that candidates can spend, but they do not approve of public financing of congressional campaigns. While they do not consider comparison ads and criticism of records to be negative, they do not like ads that are personal or distort an opponent's record. They also believe that the media often goes too far in the investigations of alleged misconduct by Members of Congress, and there is some resentment of the media hounding public figures.

In contrast to the low ratings for the Congress, Hoosiers seem to approve of the way President Bush is handling his job. They support most of his programs, even though many Hoosiers doubt whether his highly publicized plans to fight illegal drugs, to improve education, and to clean up the environment will really work. Still, the lesson for the Congress is clear: the Congress would help itself by emphasizing legislative accomplishments rather than the internal problems of Members.

It is quite clear that crime and drugs now dominate the issues in the minds of Hoosiers voters. Crime and drugs are in a class by themselves, with no other issues even coming close. Voters do not see the solution to the drug problem as primarily spending more money. Indeed, they think that the current funding can be spent much more wisely. Instead they favor better law enforcement. They certainly favor tougher punishment and want to make sure that those convicted of crimes serve their entire sentences. They see the death penalty as very effective in fighting drugs. They also think that better education and the use of armed forces for drug interdiction will be part of the solution.

The voters also want progress on deficit reduction. They view the national deficit as the greatest threat to the economy, while also worrying about the trade balance, inflation, and even recession. They are optimistic about their own personal economic well-being, but less confident about the national economy and the next generation. Most voters understand and support the President's position against raising taxes. At the same time, they do not think the President will be able to hold to his pledge, expecting

him to ask the Congress for a tax increase sometime in his four-year term. I also find that Hoosiers are increasingly receptive to using the government to help solve pressing social problems. They are willing, for example, to spend more on education, health, AIDS research, infrastructure, social security, and day care for children of working parents. They are not willing to spend more on the military, public television and radio or the arts.

While Hoosiers seem to be quite confident of America's leadership in technology and progress in medical science they do not seem to me to be optimistic about our ability to prevent pollution or to address health care and education needs. On the big issues of war and peace, I am impressed that voters are both realistic and wary—largely thinking that the 1990s will be a decade of peace, but less hopeful about reducing terrorism and keeping American troops out of regional conflicts.

Although Hoosiers are becoming more willing to use government to meet specific needs, their overall confidence in government is low. People generally just do not believe that Washington does things well. They believe the worst; for example, a large number of them believe that 50 cents out of every dollar sent to Washington is wasted. People are very concerned about defense contractor fraud and the scandal at the Department of Housing and Urban Development. They have a basic lack of confidence in the ability of government to spend money responsibly, a view which was very large political

INTRODUCTION OF THE NATIONAL RECYCLABLE COMMODITIES ACT

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. FLORIO. Mr. Speaker, today I am introducing the National Recyclable Commodities Act [NRCA], an ambitious piece of legislation to promote the recycling of our municipal wastes.

In the coming decade, our State and local governments will face an enormous challenge in finding new ways to manage their municipal wastes.

The old ways are no longer working. Municipal landfills are filling up or closing down in response to strengthened pollution controls. New, replacement landfills are often controversial and difficult to site. As garbage volumes grow each year, our remaining landfill space is being exhausted at an accelerating rate.

Incinerators are now touted as a way to reduce trash volumes and conserve precious landfill capacity. Yet these facilities are also costly and controversial, and serious questions persist about the environmental impacts of air emissions and disposal of ash generated by these combustion units.

Clearly, our next step must be a significant expansion in the recycling of municipal refuse.

Fortunately, we will not be starting from scratch. Already, large quantities of refuse materials are being recycled by American and foreign industry. In the year 1986, for example, almost 20 million tons of waste paper, 1 million tons of waste glass, 600,000 tons of aluminum scrap, 400,000 tons of steel scrap—excluding junked automobiles—and 550,000 tons of lead scrap were recycled from residential, commercial, and institutional waste sources. Without these recycling efforts, our current difficulties would be greatly compounded.

Moreover, these waste materials now represent raw materials for important segments of American industry. Used beverage cans are needed for our secondary aluminum smelters, spent automotive batteries, for our secondary lead smelters, junked automobiles, for our steel minimills, and waste paper, for our sizable recycled paper industry.

Still, it is not enough to point to what is already being done. To cope with the approaching crisis, we must do much more.

Under the National Recyclable Commodities Act, the Federal Government, acting through the Department of Commerce, will assume a leadership role in the promotion of recycling. In particular, the National Recyclable Commodities Act targets the critical need to develop new industrial capacity and markets for recyclable materials.

The National Recyclable Commodities Act is an aggressive, prorecycling bill. While most experts now agree that a sound municipal waste management policy should establish a clearcut preference for recycling over incineration and landfilling, current Federal policies are often neutral, and in some cases actually disfavor recycling. Through its strong measures to benefit recycling, this legislation will put the so-called waste management hierarchy into practice, not just on to paper.

While the National Recyclable Commodities Act represents a key piece of the overall waste management puzzle, this bill is not intended as the complete answer.

For example, other measures are needed to ensure that pollutant emissions and releases from incinerators, landfills, and even recycling facilities are properly controlled.

Also, the National Recyclable Commodities Act can complement other legislation which seeks to reestablish and reinvigorate the State planning process for municipal waste management. Sound State and local planning is necessary to provide for safe management of the entire municipal waste stream, especially those components which cannot yet be recycled. To date, in the area of recycling, the State planning process has focused more on the "production" of recyclable materials through the implementation of source separation and collection programs.

The NRCA instead emphasizes the market development portion of the recycling system. It does this in four ways.

First, the NRCA requires the Department of Commerce to assume the lead role, among Federal agencies, in promoting the recycling of municipal wastes. To ensure that the recycling programs outlined by NRCA receive the necessary degree of support within DOC, this legislation creates a separate office, the Bureau of Recyclable Commodities, to carry out the enumerated functions.

DOC is ideally suited for promoting the recycling of municipal wastes, and for carrying out the specific activities and functions mandated by the NRCA.

The NRCA calls for the extensive collection of statistics and other information on recycling, and the conduct of market analyses, studies on industrial recycling capacity, and other similar investigations. The DOC has vast capabilities in data collection and market analysis in offices such as the Census Bureau, the National Technical Information Service [NTIS], and the Bureau of Economic Analysis.

The NRCA requires the designation of recyclable commodities, and identification and standardization of specifications and test methods for these commodities. The DOC contains the National Institute of Standards and Technology, formerly known as the Bureau of National Standards, which provides a wide range of technical services for industry and government, including the development of measurement standards and test methods.

The NRCA, in its entirety, is intended to promote a major expansion in U.S. recycling capacity. Moreover, specific provisions in the act require DOC to develop programs for the promotion of export markets for recyclable materials, and oversee research relating to the development of innovative recycling processes. The DOC already has substantial industrial and commodity promotion capabilities in offices such as the Economic Development Administration, the International Trade Administration, and the Minority Business Development Agency. These Departmental responsibilities include programs for the promotion of trade and export markets.

The NRCA requires DOC to promulgate and enforce labeling requirements for certain classes of containers, packaging, and disposable products sold or distributed in interstate commerce. The DOC has extensive regulatory expertise which can be applied to this new program. For example, the Bureau of Export Administration is responsible for administering and enforcing U.S. export control laws.

While the NRCA will create a new office within DOC for administration of recycling programs, this office will be able to draw upon the considerable expertise available through the other DOC offices.

Second, this bill places great emphasis on the collection and dissemination of accurate, timely information.

To recycle successfully, local governments and private firms must master a highly complex, dynamic market environment. Without the necessary information at hand, this challenge is greatly magnified. Lacking sufficient data to make important judgments, or Government officials and industry executives cannot fully anticipate and plan for the inevitable changes in the marketplace.

While some of the needed information is already gathered by various governmental agencies and industry trade associations, there is presently no single, comprehensive recycling data base. This legislation will create a repository of recycling information at the Department of Commerce.

This bill will ensure the availability of recycling statistics in the future, improve the quality of this data, and increase the rate at which this data is distributed to those engaged in recycling. Recognizing that recycling markets are constantly in flux, this initiative does not rely on one-time studies, which can become

obsolete almost as quickly as they are published. Rather, it calls for the periodic collection of data at annual, semiannual, and quarterly intervals. This time-series data will be critical for monitoring the movement in commodity prices and markets over time, and evaluating important trends that may affect future recycling activities.

The NRCA also addresses the need to gather data at a regional, as well as national, level. Because of the significant costs associated with the transport of materials over long distances, regional markets are often vital to the success of recycling. At the same time, effective recycling at the regional level often means moving materials across State boundaries to neighboring recycling plants. As a result, states have a critical need for technical information on the availability of recycling capacity in neighboring states. This bill recognizes the regional scope of recycling, and calls for data gathering across multi-State regions to be designated by the Department of Commerce.

Also, needed recycling data will be collected more efficiently within the framework provided by this bill. It is wasteful and counterproductive to have States, localities and private parties gather the same information over and over again. Hopefully, this legislation will provide a solid informational foundation. States and localities can then focus their scarce resources on gathering supplemental information to meet their individual needs.

The NRCA will also get more information into the hands of people who can make a difference. For instance, the labelling requirements contained in this bill are in keeping with the "Right To Know" philosophy I have supported in other legislation. These labelling standards will provide important information to consumers on the recyclability and composition of containers, packaging, and non-durable goods distributed in interstate commerce.

Similarly, standardized commodity definitions, specifications, and test methods enhance the flow of important, technical information needed to improve the quality of waste materials which enter the recycling chain. Timely Federal procurement guidelines can serve as excellent models for State governments, local governments, and private firms which are often hard-pressed to develop these complex standards on their own.

Most importantly, by collecting detailed information of recycling, we can rapidly identify those recycling techniques which are already working in the marketplace. These proven technologies are likely to offer the greatest hope for dramatically expanding the volumes of wastes recycled in the near future.

Third, the NRCA will promote greater technical clarity and standardization in every phase of recycling.

Under the NRCA, the Department of Commerce must develop uniform definitions for recyclable commodities, designate appropriate commodity grades, and identify and, to the extent practicable, standardize specifications and test methods applying to these materials.

While managers of recycling plants will always have the final say in accepting or rejecting waste materials, this legislation seeks to foster and maintain a high degree of coordination among all parties which have a major stake in successful recycling. Firms that operate recycling plants want to be assured of a steady, consistent supply of clean, high-grade materials for use as feedstocks or raw materials in their remanufacturing processes. As producers of commodities, local governments need to understand the range of recycling options, and the specifications which apply to each of these options.

By creating production councils to work on technical issues relating to specific commodities and commodity classes, the NRCA will establish an important institutional mechanism for standardizing these technical terms, and rapidly adjusting these guidelines in response to changes in market conditions or composition of municipal waste.

The net result will be a more consistent set of rules for recycling to be applied across the United States. While the immediate needs of the marketplace will always prevail, the standardization of commodity definitions should enhance the flow of technical information on recycling, and facilitate the movement of these materials in interstate commerce at the regional and national levels. A clear set of technical guidelines will also assist municipalities in producing high-quality recyclable commodities, and in preparing contingencies for upgrading or downgrading these materials in response to market fluctuations.

The move toward standardization is an important theme in other provisions of the NRCA. For example, labelling provisions contained in the NRCA will require uniform labelling of containers, packaging, and disposable products sold or distributed in interstate commerce throughout the United States.

Already, many States and localities have responded to the municipal waste crisis by enacting restrictions on various forms of packaging and disposable products. Unless the Federal Government acts forcefully and rapidly to establish effective, uniform of standards governing these goods, this trend toward a patchwork of State and local regulations will continue and may even intensify.

By developing a standardized set of labeling requirements, the provisions of NRCA will promote additional recycling across the United States, while providing manufacturers and distributors of goods with clear, uniform guidelines.

Fourth, and perhaps most importantly, the NRCA takes significant, yet measured, steps to bolster markets for recyclable commodities, and promote recycling industries.

At present, as new recycling programs come on-line across the United States, we can expect to see sizable increases in quantities of materials separated and collected for recycling. New Jersey is currently recycling approximately 15 percent of its municipal waste, and striving to meet an overall recycling goal of 25 percent. Our neighboring cities and States have set their own ambitious recycling goals. EPA has set a national recycling goal of 25 percent by the year 2000.

Still, separation of recyclable materials from the municipal waste stream does not, by itself, guarantee successful recycling. Effective recycling is critically dependent on the existence of adequate national and regional markets for each type of material collected.

Where these markets cannot adequately absorb the increasing supplies of recyclable materials, recycling programs are harmed. Recently, for example, east coast markets for waste paper have not been expanding rapidly enough to offset increases in waste paper volumes resulting from new recycling programs. In some cases, municipalities and private brokers have been unable to find buyers for collected paper. Moreover, declining prices can undercut the financial plans and expectations of those operating paper collection programs.

We must be careful not to exaggerate the existing problems in the marketplace, Even while some regional paper markets are presently saturated, record volumes of waste paper are being recycled each year in the United States. And each ton of paper recycled further reduces the need for new landfills and incinerators. We must also expect and plan for a significant degree of volatility in any commodity market.

At the same time, these market difficulties, left unattended, will undermine public confidence in recycling as a solution to the municipal waste crisis.

We must also be fair to the local governments and private firms who are taking a chance with recycling. We cannot simply mandate or encourage the collection of recyclable materials, and then walk away thinking that our problems are over.

Working closely with the private sector, the Federal and State governments must accept greater responsibility for assisting municipalities and private recyclers in moving their goods to market in an orderly fashion.

We should also remember that by choosing recycling, we are asking our local governments to function as producers of commodities, a new and challenging role for these communities. To be successful at recycling, they face several challenges.

Unlike the farmer who may choose whether to plant a certain crop, or the timber company which may leave its timber standing, the local governments must manage a steady flow of refuse materials. Where near-term markets fall short, other contingencies such as stockpiling or landfilling must be readied.

Localities also have limited control over what they produce. Waste composition is highly complex and dynamic, and ultimately dependent on consumer preference. Aluminum beverage cans replace steel cans, plastic food jars replace glass jars, and vice versa—and all these changes can occur with astonishing rapidity. A municipality's best defense is to understand, as rapidly as possible, what changes in the marketplace are occurring, and how these changes will affect waste composition and prospects for recycling.

And we are asking our localities to operate in a riskier market environment. As producers of commodities, they must become experts on glass cullet markets in New Jersey, plastic markets in South Carolina, newsprint markets in Oregon, and linerboard markets in Taiwan and Korea.

If they do this job well, the benefits will be substantial. Localities can reduce their dependence on costly and often controversial landfilling and incineration techniques. By involving the private sector in recycling these

municipalities can minimize the financial burden to local taxpayers.

The benefits of recycling to our economy should be evident as well. To build fewer landfills and incinerators, we must build more secondary paper mills, plastics recycling plants, steel minimills, composting facilities, and secondary lead and aluminum smelters. Construction and operation of these recycling mills will contribute to the expansion of the Nation's manufacturing base, create new employment opportunities for the U.S. labor force, and enhance the tax bases of Federal, State, and local governments.

In displacing goods and raw materials presently imported, domestic production of received goods can reduce the Nation's dependence on foreign supplies of these materials and improve the Nation's balance of trade. In the process, imported Japanese and Brazilian steel will become American steel, and Canadian newsprint will be turned into American newsprint.

At a time of renewed concern about our dependence on foreign energy supplies, recycling of refuse materials is a sound way to promote energy conservation.

The NRCA takes several important steps to strengthen end markets for recyclable materials and increase recycling capacity.

The NRCA requires DOC to establish a program to promote the export of recyclable commodities and recycled goods. Where domestic markets lag, foreign markets may provide an important outlet for collected materials.

The NRCA strengthens Federal procurement in key areas, calling for new guidelines on procurement of recycled goods made from waste paper, rubber scrap, waste glass, compost, and other refuse materials. Through its procurement practices, the Federal Government can act directly to stimulate market demand for recycled products. Moreover, Federal guidelines are often adopted by State and local governments, and even private firms as a model for procurement practices.

The NRCA will also create recycling research centers at American colleges and universities, and sponsor basic research relating to development of innovative recycling and composting processes, development of new material specifications and test methods, identification of new end markets, and characterization of waste composition. Basic research has played a major role, over the past century, in identifying new methods and processes for producing plentiful, high quality raw materials such as metals and timber, and can play a similar role in developing new techniques for improving the quality of our recyclable materials.

Through its numerous provisions promoting the collection and dissemination of information, and standardization of technical guidelines for recycling, the NRCA will work toward improving the efficiency of existing markets for recyclable materials.

The NRCA also includes important tax provisions designed to signal a new, more favorable climate for public and private investment in recycling. NRCA provisions will ensure that recycling facilities, like other solid waste disposal facilities, can be financed by tax-exempt facility bonds.

The NRCA provides an investment tax credit for qualified remanufacturing equipment used to produce secondary fiber and finished paper goods from waste paper, and recycled rubber goods from rubber scrap. These tax incentives are carefully targeted to minimize overall tax expenditures while spurring needed industrial investment in the recycling of waste paper and rubber scrap.

Finally, under NRCA, the DOC is required to prepare and submit to Congress reports evaluating the potential for expanded recycling of specific types of refuse materials. Where DOC finds that future markets will not be adequate to absorb increased supplies of recyclable commodities, the Department must identify policy options for influencing the timing and extent of additional needed investment in facilities for remanufacture, transport, or stockpiling of these materials. The findings of the two required studies may provide a basis for further congressional action to stimulate markets for recyclable commodities.

Mr. Speaker, if we are serious about recycling, then we must work to strengthen every part of the recycling system. We cannot simply encourage and even require the collection of these refuse materials without at the same time working to provide adequate industrial recycling capacity and markets.

I urge my colleagues who share the belief that recycling efforts must receive strong Federal backing to join us in moving this important legislation.

I insert a section-by-section analysis of the bill in the RECORD:

SECTION-BY-SECTION ANALYSIS OF THE NATIONAL RECYCLABLE COMMODITIES ACT

TITLE I—DEPARTMENT OF COMMERCE RECYCLING REQUIREMENTS

Section 101. Bureau of Recyclable Commodities

Establishes a Bureau of Recyclable Commodities in DOC to handle the requirements of the Act.

Section 102. Annual Statistics

Requires DOC to collect statistics on municipal refuse, pre-consumer refuse materials, and other materials contained in municipal refuse, statistics on the generation, sources, quantities, disposal, and recycling of these materials, and statistics on the recycling techniques, available markets, and industrial capacity for recycling.

Requires DOC to establish multi-state regions for collecting regional statistics, and revise the SIC code system as necessary to facilitate data collection.

Section 103. Designation of Types and Grades of Recyclable Commodities

Requires DOC to identify municipal refuse materials that qualify as recyclable commodities, and identify and, to the extent practicable, standardize commodity types and grades.

Requires DOC to identify, and to the extent practicable, standardize the technical specifications and test methods applying to the use of recyclable commodities as raw materials or feedstocks for recycling. Provides for the creation of advisory panels to assist DOC in identifying specifications and test methods.

Allows for the revision of specifications and test methods upon petition, and requires the issuance of recycling advisories upon a finding that a physical or chemical property, or contaminant, of a recyclable commodity is interfering with recycling.

Section 104. Periodic Market Analyses

Requires DOC to prepare periodic market reports, including price information, recycling rates, and market analyses. Authorizes the development of market indices as appropriate.

Section 105. Study on Recycling Capacity

Requires DOC to prepare, within 9 months of enactment, a report to Congress evaluating the potential for expanding recyclying of waste paper and paperboard, rubber scrap, plastic scrap, ferrous scrap, and lead scrap. Within 18 months of enactment, a similar report on aluminum scrap, other non-ferrous scrap, waste glass, and yard and food waste must be submitted.

Section 106. Labeling of Packaging, Containers, and Non-durable Goods

Requires DOC to promulgate regulations prescribing labeling on recyclability and composition of packaging, containers, and non-durable goods. Items covered and deadlines for promulgation are:

Containers and packaging used to hold food, beverages, soaps, detergents, cleaning preparations, personal care products, liquor stores, drug stores—2 years.

Paper and paperboard products—3 years.

Other containers, packaging, and non-durable goods as determined by the Secretary—4 years.

Requires that goods be labeled alternatively as "RECYCLABLE ", with the blank space filled in with the principal constituent material used in manufacturing the item, or "NONRECYCLABLE BY FEDERAL STANDARDS".

Requires DOC to design a standardized, national recycling seal or symbol for voluntary use by manufacturers on items determined to be recyclable. DOC must promulgate regulations defining minimum content standards for goods labeled "RECYCLED".

Authorizes DOC to issue recall orders or seek injunctive relief requiring the removal from commerce of any items sold or distributed in violation of labeling requirements. Where terms of a recall order are violated, DOC may assess civil penalties of $25,000 per day for continued noncompliance.

Section 107. Federal Procurement

Requires DOC to establish guidelines for procurement, including designating items made of recycyled materials that can be procured by agencies, setting forth practices and procedures for procurement, providing information about availability, relative price, and performance, and establishing minimum content standards where appropriate.

The guidelines must include, at a minimum, guidelines for the procurement of recycled paper and paperboard goods, the procurement and use of waste glass in highway construction, the procurement and use of discarded tires and other rubber scrap for highway construction, procurement and use of compost and soil amendments from yard and food waste, procurement of recycled packaging and containers, procurement of recycled automotive batteries, and at least three other categories. By 1990, 30 percent of paper and paperboard goods must have a recycled material content of at least 25 percent; by 1991, 40 percent must have a recycled material content of at least 35 percent, and, by 1992, 50 percent must have a recycled material content of at least 50 percent.

Requires agencies procuring items designated in procurement guidelines developed

by DOC to procure items composed of the highest percentage of recyclable materials practicable. Requires each agency to develop an affirmative procurement program that will assure that items composed of recycled materials will be purchased to the maximum extent practicable.

Repeals section 6002 of the Solid Waste Disposal Act and authorizes the review and revision of guidelines issued under this section.

Section 108. Promotion of Export Markets

Requires DOC, in cooperation with the Department of State, to develop a program to promote the export of recyclable commodities for recycling by foreign industries, and requires the compilation of statistics and information on foreign recycling techniques, markets, commodity specifications, prices, and other information. Requires DOC to develop a program to promote the export of recycled goods produced in the United States.

Section 109. National Recycling Campaign

Requires DOC to establish a national recycling clearinghouse for the dissemination of statistics and other information to the public. Requires DOC to develop and conduct a national advertising campaign that promotes recycling and the purchasing of recycled goods.

Section 110. University Recycling Research Centers

Creates a grant program, to be administered by DOC, for accredited institutions of higher education to establish and operate up to a total of six recycling research centers for, among other things, research relating to innovative recycling processes to be employed in the manufacture of recycled goods and innovative processes to facilitate recycling. The Federal share for these grants is limited to 80 percent of the operating costs of the centers.

Section 111. Federal Office Source Separation Program

Requires DOC to establish a program for the source separation and collection of materials contained in refuse from office facilities of Federal departments, agencies, and instrumentalities. Any savings from this program are to be retained by the organization carrying out the program.

Section 112. Review of Product Specifications

Provides DOC with the authority to conduct an independent technical assessment of any product specification or standard set by a Federal, State, or local governmental agency, industry trade association, or other standard-setting group that may disfavor recycled materials or otherwise adversely impact markets for recycled materials and publish the results of this review. DOC may not review specifications or standards established by individual private firms or persons.

Section 113. Interagency Working Group

Requires DOC to establish an interagency working group, consisting of respresentatives of DOC, the Environmental Protection Agency and other appropriate Federal departments and agencies, to ensure the fullest possible coordination of actions taken by these departments and agencies.

Section 114. Citizen Suits

Authorizes citizens suits against the Secretary if the Secretary fails to perform any act or duty under the Act that is not discretionary with the Secretary, or against any person alleged to be in violation of any regulation, guideline, standard, requirement, or order effective pursuant to the Act.

Section 115. Judicial Review

Provides for judicial review of final regulations promulgated pursuant to the Act.

Section 116. Definitions

Defines various terms used in the Act.

TITLE II—TAX INCENTIVES FOR CERTAIN RECYCLING AND REMANUFACTURING FACILITIES

Section 201. Recycling Facilities Treated Like Solid Waste Disposal Facilitates Under Tax-exempt Bond Rules

Amends section 142 of the Internal Revenue Code of 1986 to include qualified recycling facilities as facilities that may be financed by a tax-exempt facility bond. Qualified recycling facilities do not include equipment to refine marketable material or equipment used in the conversion of municipal waste into fuel or energy (i.e., incinerators).

Section 202. Investment Tax Credit for Certain Remanufacturing Equipment

Amends section 46 of the Internal Revenue Code of 1986 to provide for a 15 percent investment tax credit for qualified remanufacturing equipment. Qualified remanufacturing equipment includes any equipment used to produce secondary paper fiber from waste paper or paperboard, and crumb rubber, reclaimed rubber, or other recycled rubber materials from rubber scrap. Also included is equipment used to manufacture paper or paperboard products from secondary paper fiber and rubber products from crumb rubber, reclaimed rubber, or other recycled rubber materials if these finished products, contain at least 60 percent of the recycled materials and the recycled materials are produced on the same or adjacent site. Excludes any equipment used to sort waste, equipment used to mix recycled rubber material with asphalt or other building materials, equipment related to tire retreading, and equipment related to the production of any fuel or other energy.

DEATH PENALTY FOR TERRORISTS WHO MURDER U.S. CITIZENS ABROAD

HON. BILL SCHUETTE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. SCHUETTE. Mr. Speaker, on October 26, 1989, I introduced H.R. 3539, a bill which would reinstate the death penalty for terrorists who murder U.S. citizens abroad. This legislation sends a clear and distinct message that we as a nation cannot and will not tolerate heinous acts of terrorism against our citizenry anywhere in the world.

In 1988, acts of terrorism escalated to record numbers—856 incidents of international terrorism were recorded which resulted in the death of 658 persons and the wounding of 1,131 more. Who can forget the tragedy of the senseless murder of 189 Americans returning home for Christmas last year who were killed by a terrorist's bomb planted on Pan Am flight 103 over Lockerbie, Scotland. Such atrocities must be stopped. However, we cannot effectively begin to combat the war against terrorism without the reinstatement of the death penalty.

The death penalty was reinstated last year in response to the great national concern and frustration of the senseless murder of innocent people caught in the drug war. The murder of U.S. citizens abroad warrants similar outrage, and therefore should be regarded with the same intolerance. My bill will reassert that principle.

It should be noted that my legislation does not mandate the death penalty for all cases, but rather allows the maximum flexibility of imposing punishment on those terrorists convicted of murdering U.S. citizens. By reinstating the death penalty we not only add teeth to our justice system, we also put terrorists on notice that they will not be dealt with lightly.

I have heard arguments that a mandatory life sentence for these heinous crimes is a much tougher approach. But tougher on whom? Certainly not the murderer. Perhaps tougher on the American taxpayer who would be responsible for the financial burden of incarcerating the criminal for the rest of his or her life. There is no doubt that a justice system which incorporates the death penalty is a much stronger and harsher system than one which does not include this option.

Opponents of the death penalty may be fearful of the inadvertent death of a person wrongfully accused of a crime which may be punishable by death. To negate these concerns, this legislation imposes the exact comprehensive safeguards regarding the implementation of the death penalty that were incorporated into the Anti-Drug Abuse Act of 1988.

The additional option of the death penalty in cases involving the ruthless murder of innocent American citizens abroad further strengthens our commitment to stopping terrorism around the world. In addition, it is important to show the families of the victims of terrorism that the perpetrators of these crimes will be brought to justice.

REV. DR. JOAN SALMONCAMPBELL,

HON. WILLIAM H. GRAY III

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. GRAY. Mr. Speaker, I rise today to pay tribute to the Reverend Dr. Joan Salmoncampbell, who will be guest preacher at Berean United Presbyterian Church in Philadelphia on Sunday, November 26. This visit will be her first in Philadelphia since her election in June 1989 as Moderator of the General Assembly Presbyterian Church, U.S.A. She is the first black female minister ever to hold this distinguished office, which is the highest ranking office in the Presbyterian Church, U.S.A. We pay tribute to the Reverend Joan Salmoncampbell for many reasons—as a wife and parent she and her husband, James Campbell are together the parents of seven sons and three daughters. As a musician and educator, she has taught voice and piano privately, fine arts and music from elementary school through high school, has been a choir director and arranger, performed throughout the East Coast and Eastern Europe and was a contral-

to soloist with the world-renowned Wings Over Jordan Choir. As an administrator, Reverend Salmoncampbell was Associate Executive for Mission Program in the Philadelphia Presbytery and as pastor and church leader has been involved in numerous activities, reaching thousands of people.

I wish at this time to recognize the Reverend Dr. Joan Salmoncampbell for her achievement and her good works during her first official visit to Philadelphia as Moderator of the General Assembly.

THE EMERGENCY PROTECTIVE CHILD SERVICES RELIEF ACT OF 1989

HON. MAJOR R. OWENS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. OWENS of New York. Mr. Speaker, I am rising today in support of H.R. 3614 and to draw particular attention to an amendment now included within that bill, H.R. 3576, Emergency Protective Child Services Relief Act of 1989.

I Introduced this bipartisan bill, cosponsored by Mr. BARTLETT and Mr. MILLER, based largely upon language in S. 1735 developed by Senators DODD, KENNEDY, and KOHL. It is legislation that addresses the increasingly tragic connection between child abuse and parental drug use.

More than 2.3 million reports of child abuse were filed during 1988, up 3 percent from the year before. Of those 1,225 resulted in deaths, an increase of 5 percent from 1987, when 1,163 children died. According to a nationwide survey conducted by the National Committee for the Prevention of Child Abuse, substance abuse was the dominant characteristic in the child abuse and neglect caseloads of more than two-thirds of the States reporting information. Almost 90 percent of the caretakers reported for child abuse in the District of Columbia are active substance abusers. In 1987 almost three-fourths of New York's neglect related fatalities resulted from parental drug use.

Child welfare agencies around the country are overwhelmed by drug related abuse and need help.

The bill would amend the Child Abuse Prevention and Treatment Act to establish a $40 million grant program for which State and local agencies, community and mental health agencies, and nonprofit youth serving agencies with experience in child abuse interventions, would be eligible to apply.

The funds may be used for:

Hiring of additional child protective service workers;

Recruitment of additional foster and adoptive care families; and

The provision of additional training for personnel to improve their ability to provide emergency child protective services related to substance abuse by parents of such children.

I urge my colleagues to support this vitally important expansion of our efforts to stem this epidemic in the incidence of child abuse and neglect. The war on drugs needs to be total and comprehensive when it comes to protecting the most defenseless individuals in our society.

PROCTER & GAMBLE NOMINATED FOR THE WORLD ENVIRONMENT CENTER'S GOLD MEDAL AWARD

HON. RICHARD RAY

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. RAY. Mr. Speaker, I would like to bring the attention of my colleagues the fact that the Procter & Gamble Cellulose Co. has been nominated for the world environment center's very prestigious 1990 Gold Medal Award.

Procter & Gamble, on a parochial note, has a bleached kraft pulp plant at Flint River in the Third Congressional District of Georgia. In addition, Procter & Gamble's record of being a good employer and a good citizen in all areas of the Nation and the world in which they are located is commendable. I have had the pleasure of working with the company on numerous occasions and was honored to recommend it for the award. I believe Procter & Gamble has been environmentally conscience and is quite deserving of such recognition.

Mr. Speaker, I would like to insert my recommendation letter into the RECORD at this point. Thank you.

U.S. CONGRESS,
HOUSE OF REPRESENTATIVES,
Washington, DC, November 7, 1989.

Dr. JOEL I. ABRAMS,
Chairman, 1990 Gold Medal Awards Jury World Environment Center, New York, N.Y.

DEAR DR. ABRAMS: I would like to recommend the Procter & Gamble Cellulose Company for the World Environment Center's 1990 Gold Medal Award.

The Procter & Gamble Company has been an environmental leader in the Third District of Georgia, the District I have had the pleasure of representing in the United States House of Representatives since 1983. Their Flint River Plant is a showcase among bleached kraft pulp plants for overall environmental performance.

The 200,000 acres of land connected with the plant are managed by P&G's Land and Timber Group in accordance with management practices recommended by the State of Georgia Forestry Commission. These forests provide much needed wildlife refuge and recreational areas.

The plant is comprised of state-of-the-art equipment which allows for product efficiency while maintaining environmental protection. The capital investment on environmental systems at the plant is roughly 10 percent of the total installed capital for the manufacturing site and is scheduled to be increased substantially. Annual operating expenses for plant environmental control average about 3 million dollars.

The Flint River Plant compares very favorably when compared to a typical pulp mill. Flint River water usage averages only one-third, color discharge averages only one-fourth, and BOD discharges average only one-fifth of a typical North American mill. Additionally, Flint River Plant has not exceeded any of its wastewater permit limitations since its startup.

Procter & Gamble has done much to ensure that environmental concerns are addressed and regulations are followed. They constructed a 650 million gallon holding pond at a cost of 3 million dollars to minimize water discoloration. The company sponsored river and lake studies at a cost of over a million dollars which were conducted by the Science Advisory Committee, a group of independent scientists led by Dr. Ruth Patrick of the Philadelphia Academy of Natural Sciences, to determine the effect of the treated effluent on the area. These studies, some of the most intense ever conducted over a one year period on any river in the United States, showed no harmful effects on the aquatic life of the river or lake. In fact, the plant has contracted to have the Philadelphia Academy of Natural Sciences to continue to monitor for treated effluent discharge to ensure that no significant changes occur in the health of the river and lake.

As a member of the community, Procter & Gamble has been active and accessible. The Flint River Plant has been involved in the formation of the Lake Blackshear Watershed Association, the local Community Awareness and Emergency Response Coordinating Group, and a course on environmental protection for the local grade schools.

Additionally, Procter & Gamble has received numerous awards in the area of environmental protection. The Flint River Plant has been recognized by the National Council for Air and Stream Improvement for having the lowest effluent BOD and color per ton of production in the industry. Environmental awards have been presented to the plant, including honors from the American Paper Institute and National Forest Products Association, the Georgia Business and Industry Association, the Georgia Lung Association, the Georgia Water and Pollution Control Association, the Georgia Wildlife Federation, and the Izaak Walton League.

Procter & Gamble has shown me through its work at the Flint River Plant that it is very deserving of the 1990 Gold Medal Award. I am sure that you will give Procter & Gamble every consideration in the selection process.

Sincerely,

RICHARD RAY,
Member of Congress.

AMERICA'S COMMITMENT TO THE NAVY MUST REMAIN UNSHAKEN

HON. OWEN B. PICKETT

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. PICKETT. Mr. Speaker, yesterday's fire aboard the U.S.S. *Inchon* in Norfolk is the latest in a series of almost a dozen unrelated tragic accidents that have plagued the Navy this fall.

The Chief of Naval Operations, Admiral Trost, has very prudently called for an immediate fleetwide safety standdown to closely examine established safety procedures and practices.

What these accidents don't call for, Mr. Speaker, are knee jerk reactions or a weakening of our commitment to a strong Navy.

The total number of operating and training fatalities annually in the Navy has been declining throughout most of the 1980's. Fiscal year 1989 marked the best year on record for safety in Navy aviation. The men and women serving our Navy today are the same outstanding men and women who served before this series of accidents began.

Last April, after I returned with President Bush from Norfolk, where we attended a memorial service for those who died aboard the *Iowa*, I stood here in the well and spoke of a quiet determination among the Navy families to carry on, to do their duty, and to serve America well.

I can assure you that this same sense of duty and purpose is alive and well among our Navy people today.

A TRIBUTE TO ALFRED G. FRISCH

HON. BILL PAXON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. PAXON. Mr. Speaker, I rise today to pay tribute to my constituent and friend, the late Alfred G. Frisch.

Mr. Frisch died on October 14, at age 75, and surely his community and country will miss him greatly. He was an example of character and service such as is rarely seen.

A native of Buffalo, Mr. Frisch moved to Marilla in 1938, and became involved in local politics. After serving in the Army from 1943 to 1946, he was elected to the town board, and subsequently became supervisor.

Mr. Frisch made some of his most notable contributions while serving on the Erie County Board of Supervisors, where he was instrumental in developing the delivery system for mental health services throughout Erie County. In 1972, he became president of the county mental health association.

Included among the many organizations that Mr. Frisch devoted his time to were the Marilla Library Board, the Grace Lutheran Church, the Marilla and Erie County Historical Societies, the Marilla Fire Department, and Marilla Grange. He was also a member of the Marilla Town Republican Committee for more than 30 years.

I worked with Al Frisch during my first years in office as a member of the Erie County Legislature. He was an early supporter and counsel and I will miss him.

It is a great honor for me to be able to express today my admiration and respect for Alfred G. Frisch, and to express my hope that his memory will inspire others to emulate his devotion to community service.

ALAMOGORDO, NM, LOSES CIVIC PIONEER

HON. JOE SKEEN

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. SKEEN. Mr. Speaker, today I rise to reflect on the recent loss of one of New Mexico's—and one of my district's—finest citizens, John C. Rolland. John, 81, proudly and honorably served as mayor of the city of Alamogordo from 1955 through 1959. John served our country during World War II with the Navy. He also proudly served the citizens of New Mexico and Otero County as president of the chamber of commerce and as a member of the New Mexico Military Institute Board of Regents. As a community and civic leader, John was one of the founders of Alamogordo Federal Savings & Loan, one of the largest mortgage lenders in Otero County.

Mr. Speaker, I ask unanimous consent that an article published in yesterday's Alamogordo Daily News, written by Don McKinney, be reprinted in the RECORD. Mr. McKinney's article includes a detailed notation of the many highlights in John Rolland's life as well as reflections on his life by many of his fellow community citizens.

[From the Alamogordo Daily News, Nov. 14, 1989]

CIVIC PIONEER ROLLAND, DIES

(By Don McKinney)

Alamogordo today lost another of its civic pioneers.

John C. Rolland, 81, who was the city's mayor from January 1955 through February 1959, died this morning.

The Alamogordo native was born December 10, 1907, and the lifelong city resident had an active role in the shaping of the city.

Services were pending with Hamilton Funeral Home this morning.

Rolland operated the family pharmacy business located near New York Avenue and 10th Street for 50 years.

Besides being mayor, he also was a member of the City Commission for several years. He was one of the formative forces in the establishment of Alamogordo Federal Savings and Loan, one of the largest mortgage lenders in Otero County.

He was elected to the board of directors of Alamo Fed in 1939 and stepped down in 1944 to join the Navy. After World War II, he was again elected to the board in 1946 and has served as chairman of the board continuously since 1967.

His civic work included a stint as president of the Alamogordo Chamber of Commerce in 1947 and president of the Alamogordo Rotary Club from 1952-53.

He was a member of the board of regents of New Mexico Military Institute; the administrative board of Grace United Methodist Church and a member of the board of directors of First National Bank at Alamogordo during 1960-75.

Rolland was an active contributor, campaign worker, division chairman and former board member of Otero County United Way. He also served on the advisory board of the Betty Dare Good Samaritan Center.

He was voted the Alamogordo Citizen of the Year in 1972.

Although he was ill, he recently served as a member of the Otero County Economic Development Council.

Alamogordo pioneer Maude Suton and her husband Charles were close friends with the Rolland family.

"Ever since I've been out here, there was a Rolland Drugs," she said this morning.

"Johnny was a wonderful person, always kind. He never got riled up about anything. He did a real good job as mayor.

"We all ran around together. He was the same age as my husband."

Rolla Buck, city manager during Rolland's tenure as city commissioner and mayor, remembered him as a lifelong friend.

"They had a drug store here and Johnny was the main man in it. We played together growing up.

"He was just a good person. His attitude towards life was one of kindness and giving.

"He was a person that liked to do what was right in every way. He was about the most honest person I have ever known.

"Lots of times he would come in to me when Alamogordo was growing real fast to help him go over the plats and plans for subdivisions."

"He wanted to see good development in the city."

"Eber McKinley, also a former mayor, grew up with Rolland.

"We were born less than a block apart. He was about two and one-half years older than me. I guess we really got close in school," McKinley said.

"He was one of the most honorable people I have ever known in my life."

"He was an excellent city commissioner. Johnny was a very progressive influence on the community."

McKinley served for a number of years with Rolland on the Alamogordo Federal Savings and Loan board.

Earl Wallen, president of the savings and loan, remembers the 48-year veteran of the board as an even-tempered man.

"As a director and a person he was great. He was a very kind man always trying to help other people."

Wallen said during Rolland's tenure on the board, Alamo Fed had grown from $1 million in size in 1939 to $102 million this year.

"He was a quiet leader, not boisterous, but very efficient."

He was preceded in death by his wife Ruth in 1981.

Survivors include his daughter, Helen (Mrs. Dennis) Howe of East Point, Fla.; a granddaughter, Cindy (Mrs. Carl) Munz of Carlsbad.

He is also survived by six grandchildren, Scott Cameron, Cammie and Cory Munz, and Jacob, Joshua, and Jeremy Cameron, all of Carlsbad.

H.R. 3265, FCC REAUTHORIZATION

HON. MATTHEW J. RINALDO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. RINALDO. Mr. Speaker, I was unavoidably detained on Monday, October 30, and could not speak on the floor in support of the FCC reauthorization bill, which I cosponsored with the Telecommunications Subcommittee chairman, the gentleman from Massachusetts [Mr. MARKEY]. I am pleased that the House passed this legislation by voice vote on the suspension calendar.

This bill, as approved by the Energy and Commerce Committee and the Telecommunications Subcommittee, authorizes the full $109.8 million requested in the President's fiscal year 1990 budget. This is only $800,000 more than the amount that the House appropriated for the FCC in fiscal year 1990.

The bill as amended sets the FCC's fiscal year 1991 authorization at $121.5 million. This increase is appropriate for two reasons. First, this figure reflects the FCC's revised estimate of the additional money it will need in 1991 and 1993 to move and consolidate its offices.

Second, this funding increase recognizes that the FCC's workload and responsibility have greatly increased in recent years. The industries regulated by the FCC have become much larger and more important to our overall economic health and our ability to remain competitive. New technical and regulatory challenges for the agency spring up every day, as they have from HDTV to information services in the 1980's. Keeping the FCC well-equipped and able to deal with these new challenges has to be a central part of our communications strategy as we move to the 21st century.

The legislation extends the FCC's Older Americans Program, which was originally authored by my colleague from Texas, Mr. FIELDS. As the ranking Republican on the House Aging Committee, I share Mr. FIELDS' hopes that the Older Americans Program will be an important tool that will be used by the FCC to its fullest potential.

The Energy and Commerce Committee adopted an amendment to this legislation relating to the Commission's authority to take into account trade practices of foreign countries. The administration has raised concerns about this amendment, fearing it may create policymaking authority at the FCC.

I want to assure the House, and especially my Republican colleagues, that the opposite is true. The commitee clearly did not create any new authority for the FCC through this amendment. I worked closely on the language of the provision with the chairman of the full committee and the subcommittee. I can assure the House that the committee's action makes explicit the limits of existing FCC authority. The committee report makes clear that the President is the policymaker with respect to trade policy, not the FCC. That will not change after this amendment becomes law.

The only thing this amendment does is remind the FCC that it may take into account the Nation's trade policies when the agency makes rules governing telecommunications industries—no more, no less.

I also note that while the administration is concerned about this trade provision, it does not object to passage of the underlying bill.

Finally, I want to mention my concerns on one issue that has been a source of controversy betwen the Telecommunications Subcommittee and the FCC. The Telecommunications Subcommittee members are in agreement that the Commission should not impose access charges on information service providers.

Twice, the subcommittee chairman and I have fought the FCC on this issue. The subcommittee believes strongly that access charges are inappropriate and would drive up the public's cost in getting information services. We didn't make these views explicit in the committee report only because FCC Chairman Sikes pledged during our authorization hearing not to impose these fees. We expect the Commission to live up to that pledge and work to make information services widely available for all our citizens.

Once again, I am pleased that the House has approved this needed authorization legislation. I hope it will be quickly approved by the Senate and sent to the President for approval.

IN HONOR OF POLLY B. BACA

HON. ESTEBAN EDWARD TORRES

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. TORRES. Mr. Speaker, I rise today to honor the achievements of Ms. Polly B. Baca, and the contributions she has made to the Hispanic community.

Ms. Baca began her professional career as an editorial assistant for a trade union newspaper in Washington. During President Lyndon Johnson's administration she served as a public information officer for a White House agency. She then joined the national campaign staff of the late Senator Robert F. Kennedy in his bid for President of the United States in 1968. Later she served as the director of information for the National Council of La Raza and then as a special assistant to the chairman of the Democratic National Committee.

Ms. Baca's political career continued to excel as a member of the Colorado State Legislature for 12 years, where she was first elected to the Colorado House of Representatives then to the Colorado Senate. During her tenure in the Colorado Legislature she set precedent as the first woman to chair the Senate Democratic Caucus and the first and only minority woman elected to the Senate. To this day she is the only Hispanic woman who has ever served in a leadership position in any State senate in the United States.

She expanded her political career to the national arena by serving in many positions in the National Democratic Party. She served as chair of the Colorado Delegation to the 1978 National Democratic Mid-Term Conference, cochair in 1980 and 1984 to the National Democratic Presidential Nominating Conventions, cochair of the 1985 National Democratic Fairness Commission, vice president of the 1988 National Democratic Presidential Nominating Convention, and served as a vice chair of the Democratic National Committee [DNC] from 1981 to 1989.

Ms. Baca has been recognized by "World Who's Who of Women"; "Who's Who in American Politics"; "Who's Who in the West"; and the Mexican American History Calendar". She is one of 14 individuals originally named to be inducted into the National Hispanic Hall of Fame. Due to her extensive experience and outstanding service she has appeared on numerous television and radio programs, and has been interviewed by many major magazines and newspapers.

Ms. Baca has enhanced her career by her participation in foreign affairs programs. She has lectured in Japan and the Philippines, led a delegation to Bulgaria, participated in a fact-finding delegation in Central America, participated in a conference in Moscow, and has also attended leadership programs in Europe.

Ms. Baca is now back home in Colorado as the executive director of the Colorado Institute for Hispanic Education and Economic Development. She is doing what she does best and that is to serve the public. I have no doubt that the Hispanic community will continue to benefit from Ms. Baca's exceptional talents, motivation and knowledge, in her now role. She is an inspiration not only to young hispanic women but to all young people.

Mr. Speaker, I ask my colleagues to rise and join with me to congratulate Ms. Polly Baca on her past achievements, and the challenges that lie ahead for her.

TRIBUTE TO HOWARD PAULSEY

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. LAGOMARSINO. Mr. Speaker, I ask my colleagues to join me in recognizing Special Agent Howard A. Paulsey on his retirement after many years of service with the Federal Bureau of Investigation.

Mr. Paulsey entered duty with the FBI in October 1964. During the first 5 years of his 25-year career with the FBI, he served here in Washington, DC, as well as in Denver and Los Angeles. Since then he has served in my district at Santa Maria, CA, where he became Supervisory Senior Resident Agent in December 1979.

While in Santa Maria, Mr. Paulsey headed many important investigations, including the PSA Airline crash near Santa Maria in 1987, and investigations into several major escapes from the U.S. penitentiary at Lompoc.

Mr. Paulsey and his colleagues became good friends with my staff when my Santa Maria District Office was next door to the FBI office in the Old Post Office Building. I would personally like to thank him for the many occasions when he went out of his way to assist my staff with our constituent services.

On the evening of December 8, Mr. Paulsey will be honored at his retirement dinner. I want to wish him a very happy and productive retirement.

FIFTIETH ANNIVERSARY OF THE CHURCH OF ST. ALBERT THE GREAT

HON. TONY P. HALL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. HALL of Ohio. Mr. Speaker, today the celebration of the Feast of St. Albert the Great has a special meaning for the members of the Church of St. Albert the Great in Kettering, OH, within my district. This is the close of the church's golden jubilee year, marking 50 years since it was founded by Father Joseph Rolfes.

As chairman of the House Select Committee on Hunger, I am expecially happy to join in celebration with the parish's members, who have a deep commitment to alleviating

hunger, and who regularly assist with anti-hunger efforts at home and around the world.

The parish held its first Mass on August 27, 1938, with fewer than 50 people. Since that time, it has grown to nearly 2,000 families. The parish has been guided by the leadership of four pastors in its history: The founding pastor, Father Joseph H. Rolfes, who served from 1939 to 1965; Father Joseph U. Urbain, who served from 1965 to 1967, Father James O. Byrne, who served from 1967 to 1980, and the current pastor, Father David C. Robisch, who has served since 1980.

In keeping with the spirit of the great educator St. Albert, this parish has a tradition of providing quality education for its youth. St. Albert the Great Elementary School opened in 1949, the first Catholic school in what is now the city of Kettering. Since then, the school has graduated more then 3,500 students, giving them the strong educational foundation to serve in leadership and professional positions in the Dayton area and the Nation.

The parish focus through the years has not only been its own needs, but also those of the community. Beginning in the 1960's, its tithing set aside 10 percent of the weekly collection to aid the missions and to assist those in need, such as the recent victims of Hurricane Hugo. The parish maintains a monthly food drive contributing more than 100 bags of groceries each month to a local food pantry.

The parish today continues its tradition of forming its members in Gospel values and reaching out in service to others. It is my pleasure to extend my congratulations to the people of the Church of St. Albert the Great on the first half century, and best wishes for continued service in the next 50 years.

THE EMERALD SOCIETY HONORS EDWARD A. SHEERAN

HON. THOMAS J. MANTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. MANTON. Mr. Speaker, I rise today to congratulate Edward A. Sheeran as he is honored by the Grand Council of United Emerald Societies of New York for his many accomplishments.

Eddie Sheeran Emigrated to New York City in 1961 from Roscommon, Ireland. Shortly after he arrived in the United States, he began his career at Chase Manhattan Bank as a teller. Through his dedication to hard work and personal service, Eddie Sheeran rose to great heights within the bank. From his humble beginnings, Eddie became an assistant manager and later was promoted to vice president. Today he serves as Queens division executive and is one of the most visible bankers in Queens.

Mr. Speaker, Eddie Sheeran's banking career is just one aspect of his success. Eddie Sheeran has distinguished himself as a community leader without peer. For example, Eddie served as the first chairman of the United Way in Queens. Under his leadership, the United Way raised $300,000 within Queens County. Eddie also has been an important force in establishing a strong Junior Achievement Program in Queens. As chairman of the Queens chapter, Eddie established a board of volunteers to teach economics classes in Queens high schools. He volunteered to teach one class each week and within 2 years had raised $70,000 for Junior Achievement.

Eddie Sheeran is an extraordinary fundraiser for worthy causes. As chairman of the Queens chapter of the American Cancer Society, Eddie raised $52,000 last year. As chairman of development for the Greater Jamaica Development Corp., Eddie organized a parade for the opening of the new Jamaica Center subway station. The day resulted in $56,000 net profit for the development company.

Eddie serves on the boards of many other philanthropic organizations, including the Queens Council on the Arts, the Queens Symphony Orchestra, Queens Chamber of Commerce, and the American Lung Association. He is also treasurer of the Scarborough School for the Mentally Retarded. In the Irish Community, Eddie Sheeran has been a driving force in a variety of groups, including the Ancient Order of Hibernians, Knights of St. Patrick, and the Bedford Park Shamrock Club. He is also active in his parish, St. Bartholomew's Church where he serves as chairman of the education committee.

Mr. Speaker, I ask my colleagues to join me today in honoring Edward Sheeran for his lifelong dedication to helping those in need. His generous spirit which has touched and improved the lives of many people in New York City should be an inspiration to us all.

THE 59TH ANNIVERSARY OF THE LUTHERAN IMMIGRATION AND REFUGEE SERVICE

HON. CHESTER G. ATKINS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. ATKINS. Mr. Speaker, today marks the 50th anniversary of the Lutheran Immigration and Refugee Service [LIRS]. I would like to join my colleagues in recognizing this very important date for one of the world's finest refugee resettlement agencies and one of two U.S. resettlement agencies authorized to place unaccompanied refugee children with foster families. The tireless advocacy of LIRS for world's refugees is to be commended.

LIRS has resettled more than 155,000 refugees through partnership with Lutheran social ministry organizations, congregations and communities since 1939. The number of unaccompanied minors, the most vulnerable of the refugee population, placed in foster homes since 1978 is more than 3,000. Families from Vietnam, Cambodia, Hungary, the Soviet Union, and many other countries have been resettled and involved in a network of thousands of dedicated sponsors in local churches and communities across the country. LIRS has been a consistent resource in enabling those with a well founded fear of persecution to seek legal protection in the United States as well as providing assistance to those persons taking steps to become lawful immigrants.

In my home State of Massachusetts, the work of LIRS is well known and has added to the very fabric of our life as a Commonwealth. If Bogdan Baudis could tell you his story today, you would hear of a Polish worker, a member of Solidarity, who fled persecution in his homeland and now lives and works in Massachusetts as a computer programmer. Or if Mrs. Keang of Lowell, MA, could speak to you today, she would tell you of genocide in Cambodia, of the Khmer Rouge, of life alone—as a widow—in a war zone on the Thai-Cambodian border. And today, thanks to LIRS, she has joined her surviving children and begun a new life.

LIRS is an inter-Lutheran agency of the Evangelical Lutheran Church in America, Lutheran Church-Missouri Synod and Latvian Lutherans in the United States. The LIRS network includes 25 regional offices and a staff of 39, each of whom deserve our thanks: Jamie Alden, Farida Alli, Ross Anderson, Horace Beasley, Marta Brenden, Steve Burton, Ben Chong, Janice Drayton, Sandra Edwards, Wilson Fernandez, John Finck, Marion Foseum, John Fredriksson, Moniera Green, John Griswold, Joan Hall, Ann Henry, Lenore Hosa, Anh Huynh, Thoai Huynh, Donald Larsen, Julie MacDonald, Jacquelyn Mize-Baker, Jennifer Monroe, Ruth Motayne, Duyen Nguyen, Faith Olson, Ky Phan, Laurie Rodriguez, Kathryn Sincell, Edward Snyder, Edmarine Stubbs, Arthur Thompsen, Milton Tucker, Josephine Verardo, John Whitfield, John Winter, Lily Wu, and Wajid Yusufazai.

Mr. Speaker, I come before you today to congratulate the Lutheran Immigration and Refugee Service and to say "thank you" for 50 years of global assistance. Without the commitment of LIRS, thousands of immigrants and refugees who dream of coming to the United States would have little hope of making a new life on their own in dignity and free of fear and persecution.

PORTUGUESE BENEFICIAL ASSOCIATION D. LUIZ FILIPE

HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. MACHTLEY. Mr. Speaker, I rise today to pay tribute to the Portuguese Beneficial Association D. Luiz Filipe which was funded in 1892.

As the third oldest beneficial association in the United States, its original and principle goal was to provide assistance and support to Portuguese immigrants who arrived in Bristol, RI. The association provided services which were crucial to survival of the new arrivals and they picked the Prince D. Luiz Filipe as protector of the association.

Through the years, the association has been host to many distinguished members of the Portuguese community including Cesar Brito, Luiz D. Martins, Roswell Bosworth, and Luiz Raposo.

I would like to commend the beneficial association for the work they have done on behalf of Portuguese immigrants over the years. They have made our Nation a home for

many families while allowing our new citizens to assimilate their own culture and beliefs with their new land. I wish the association the best in the following years and I hope it strives to uphold the strong ideals and values it has established in its 97-year history.

HONORING LT. COL. GARY P. PULLIAM, OFFICE OF LEGISLATIVE LIAISON, U.S. AIR FORCE

HON. EARL HUTTO

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. HUTTO. Mr. Speaker, I rise today to honor Lt. Col. Gary P. Pulliam, Office of Legislative Liaison, U.S. Air Force, who will be retiring on November 22, 1989, after 20 years of exemplary service to the Air Force and to our Nation. A consummate professional, he has amassed an absolutely outstanding military record. Graduating from pilot training in 1971, Lieutenant Colonel Pulliam served as an air training command instructor pilot for 3 years before transitioning to the C–130 weapon system. Flying C–130's out of the Philippines, he participated in missions throughout Southeast Asia, including Vietnam. Lieutenant Colonel Pulliam returned to flight training status in 1977 when he was assigned to Little Rock AFB, AR, as a C–130 flight instructor. In 1980, Lieutenant Colonel Pulliam's career took a new turn when he was assigned to Wright Patterson AFB to work the acquisition of airlift and training programs. After graduating from Armed Forces Staff College in 1984, he was assigned to the Pentagon. There he put his acquisition experience to further use working airlift, training, and special operations projects. Capping his distinguished career, Lieutenant Colonel Pulliam has spent the last 2 years at the Pentagon as an action officer and a deputy division chief in Air Force Legislative Liaison.

In this capacity, he is credited with developing and then articulating key Air Force initiatives on Capitol Hill. As a result, Lieutenant Colonel Pulliam has ensured congressional support for important training, airlift, and special operations programs which will enhance force readiness and capabilities Air Force wide. I worked personally with Lieutenant Colonel Pulliam on special operations programs and can say that, due to his efforts, we have seen the revitalization of our special operations capabilities. In addition, Lieutenant Colonel Pulliam has organized and attended numerous meetings between senior DOD leaders and Members of Congress. These meetings have always been very productive, benefitting myself, many of my colleagues, and thousands of our constituents. In fact, Lieutenant Colonel Pulliam has so impressed me with his abilities that I have asked him to work for me as my administrative assistant. To my good fortune, he has accepted.

A gentleman of Lieutenant Colonel Pulliam's talent and integrity is rare indeed. While his honorable service will be genuinely missed, it gives me great pleasure today to recognize him before my colleagues and to wish him clear skies and favorable winds as he brings to a close a long and distinguished career in the service of the U.S. Air Force and his country. His wife Darlene has been there by his side the whole way, supporting him, through the good times and the bad times that characterize military life. His son Andrew, now a student at William and Mary, is a fine young man who calls Virginia his home. His daughter Amy, a student at Lake Braddock School in Burke, VA, is understandably excited about staying here in the Washington area. This family has served our Nation well. I salute them, and wish them God speed in the years ahead.

THE ADOPTION OF THE AMERICANS WITH DISABILITIES ACT

HON. NEWT GINGRICH

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. GINGRICH. Mr. Speaker, I wish to recognize and compliment my colleagues on the Committee on Education and Labor for adopting H.R. 2273, the Americans With Disabilities Act of 1989. This is important legislation that will extend to individuals with disabilities full civil rights—in the public and private sector. For too long such individuals have only been protected against discrimination based on disability in the public sector. The final vote in the committee was 35 to 0, a reflection of true bipartisan spirit for the legislation. H.R. 2273 now contains the provisions adopted by the other body in S. 933, and clarifications developed through bipartisan efforts—coordinated by our colleagues, Mr. HOYER and Mr. BARTLETT.

Three additional committees have jurisdictional over this critical civil rights bill—the Committee on Judiciary, the Committee on Public Works and Transportation, and the Committee on Energy and Commerce. It is my understanding that they too are giving thoughtful consideration to this measure and are working in a bipartisan manner.

MALCOLM BALDRIGE NATIONAL QUALITY AWARD

HON. GREG LAUGHLIN

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. LAUGHLIN. Mr. Speaker, it is a great pleasure to point out that the cover story of the November 13 issue of Businessweek magazine features an American company, that has a plant in my district, that is gaining market share and profits around the world in high-technology products.

The company is Motorola, Inc., which earlier this year won the Malcolm Baldrige National Quality Award for its excellent quality standards.

The Businessweek story cites Motorola's success in the highly competitive international semiconductor market, and points out that Japanese companies like Canon have chosen Motorola's microprocessing chips over competing Japanese chips because of Motorola's quality and service.

Motorola is seeking lower trade barriers in Japan, but in 1988 alone, they had sales in Japan of $750 million.

The Businessweek cover story cites Motorola's excellent commitment to long-term research, especially in comparison with American corporations who are fixated on the next quarter's bottom line instead of a longer range view.

As for quality, Motorola's in-house quality enhancement program has cut defects from nearly 3,000 per million products in 1983 to under 200 per million products today.

The lesson of the Motorola success story, Mr. Speaker, is that American companies can compete when they demonstrate long-term vision, quality products, and a dedication to service.

A TRIBUTE TO JOHN BURTON

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. CLAY. Mr. Speaker, I rise today to pay tribute to John Burton, a native of St. Louis, MO, who has dedicated his life to serving his community. Mr. Burton was born on July 18, 1910, in St. Louis. After attending the public schools there, he received his college degree and settled in Ypsilanti, MI.

John Burton's organizing and leadership skills were first demonstrated as an activist for the United Auto Workers Union. As he gained the respect of many Ypsilanti citizens, he used his abilities to gain a place in local politics, serving 18 years on the Ypsilanti City Council.

Possibly his most memorable achievements came in 1967 when he was elected mayor of the city of Ypsilanti. In doing so, he became the first peson of color to serve as mayor in any city in Michigan. The fact that this came at a time of great racial tension made Mr. Burton an inspiration to all blacks struggling to gain the respect they deserved. John Burton was able, with his experience as labor, church, and community leader, to deal with the racial conflicts of the time with a unique understanding, strength, and perseverance.

John Burton did not stop there. After his tenure as mayor of Ypsilanti was over he remained active in the community, continuing to fight the causes in which he believes. Because of his political astuteness he has served as adviser to mayors, Governors, Senators, and Representatives. He currently serves on the Eastern Michigan Board of Regents, where he has helped greatly in promoting and advancing higher education in the State.

Mr. Burton has received numerous honors from various institutions in Michigan. He was most recently honored by the Ypsilanti-Willow Run Chapter of the NAACP on November 10, 1989.

Mr. Speaker, I am proud to rise today to salute a man such as John Burton. From his humble beginnings in St. Louis he has risen to be an influential and highly respected member

of his community and beyond. I hope that at 78 years of age we all can have the same determination and energy with which to serve our people.

LUTHERAN IMMIGRATION AND REFUGEE SERVICE CELEBRATES ITS 50TH ANNIVERSARY

HON. BRUCE A. MORRISON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 15, 1989

Mr. MORRISON of Connecticut. Mr. Speaker, I am pleased to offer my congratulations to the Lutheran Immigration and Refugee Service [LIRS], the national agency of Lutheran churches in the United States, on its 50th anniversary.

As chairman of the House Subcommittee on Immigration, Refugees and International Law, it gives me particular pleasure to note that LIRS has resettled more than 155,000 refugees since 1939 through partnership with Lutheran social ministry organizations, congregations, and community people. More than 6,000 congregational sponsors were mobilized to foster the well-being and sufficiency of refugees and their integration into American life.

As one of just two national voluntary agencies that resettles unaccompanied minors, LIRS placed more than 3,000 unaccompanied refugee children in foster care since 1978.

Along with the Evangelical Lutheran Church in America [ELCA] and the Lutheran World Federation World Service, LIRS works with undocumented people in the United States by supporting 42 social service, advocacy and legal service community-based projects. LIRS also helped organize an ecumenical delegation to Washington to make clear that the administration policy of massive detention and lack of due process for Central Americans was in need of change. LIRS is especially to be commended for its efforts in organizing assistance for children who are being kept in detention centers because of their lack of legal status in this country.

Finally I wish to commend LIRS for its cosponsorship of the conference held this September in Washington on the subject of Haitian and African refugees. It was my pleasure to address that conference and to know, firsthand, of the fine work it accomplished.

I salute the LIRS on its 50th anniversary, and look forward to continuing to work with Don Larsen, LIRS' outstanding executive director, John Fredriksson, LIRS Washington representative, and all of the excellent staff that have made LIRS the fine organization that it is today.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, November 16, 1989, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

NOVEMBER 17

8:30 a.m.
Commerce, Science, and Transportation
Communications Subcommittee
To continue oversight hearings on the implementation of the Cable Telecommunications Act (P.L. 98-549).
SR-253

9:30 a.m.
Banking, Housing, and Urban Affairs
